Annual Security Report Notice

The University of Phoenix annual security report includes statistics for the previous three years concerning reported crimes that occurred on campus, in certain off-campus buildings or property owned or controlled by the University, and on public property within, or immediately adjacent to and accessible from, the campus. The report also includes the sex offender registry, institutional policies concerning alcohol and drug use, crime prevention, the reporting of crimes, sexual assault, and other related matters. You can obtain a copy of this report by contacting your local Campus Security Authority or by accessing the following Web site: http://www.phoenix.edu/safety.

University of Phoenix is authorized by the Washington Higher Education Coordinating Board (HECB) and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree Authorization Act. This authorization is subject to periodic review and authorizes University of Phoenix to advertise and recruit for the following degree programs offered via distance learning: Associate of Arts; Bachelor of Science in Business; Bachelor of Science in Accounting; Bachelor of Science in Criminal Justice Administration; Bachelor of Science in Health Administration; Bachelor of Science in Health Administration/Health Information Systems; Bachelor of Science in Health Administration/Long Term Care; Bachelor of Science in Human Services; Bachelor of Science in Human Services/Management; Bachelor of Science in Information Technology; Bachelor of Science in Management; Bachelor of Science in Nursing; Bachelor of Science in Organizational Security and Management; Bachelor of Science in Psychology; Master of Arts in Education/Administration and Supervision; Master of Arts in Education/Adult Education & Training; Master of Arts in Education/Curriculum & Instruction; Master of Arts in Education/Curriculum & Instruction/Computer Education; Master of Arts in Education/Curriculum & Instruction/English and Language Arts Education; Master of Arts in Education/Curriculum & Instruction/English as a Second Language; Master of Arts in Education/Curriculum & Instruction/Mathematics Education; Master of Arts in Education/Early Childhood Education; Master of Arts in Education/Elementary Teacher Education; Master of Arts in Education/Secondary Teacher Education; Master of Arts in Education/Special Education; Master of Arts in Education/Teacher Leadership; Master of Business Administration; Master of Health Administration; Master of Health Administration/Education; Master of Health Administration/Gerontology; Master of Health Administration/Informatics; Master of Information Systems; Master of Public Administration; Master of Management; Master of Management/Human Resources Management; Master of Management/Public Administration; Master of Science in Accountancy; Master of Science in Administration of Justice and Security; Master of Science in Nursing; Master of Science in Nursing/Health Care Education; Master of Science in Nursing/Informatics; Master of Science in Nursing/Master of Business Administration; Master of Science in Nursing/Master of Business Administration/Health Care Management; Master of Science in Nursing/Master of Health Administration; Master of Science in Nursing/Nurse Practitioner; Master of Science in Psychology; Doctor of Business Administration; Doctor of Education in Educational Leadership; Doctor of Education in Educational Leadership/Curriculum and Instruction; Doctor of Education in Educational Leadership/Educational Technology; Doctor of Health Administration; Doctor of Management in Organizational Leadership; Doctor of Management in Organizational Leadership/Information Systems and Technology; Doctor of Philosophy in Higher Education Administration; and Doctor of Philosophy in Industrial/Organizational Psychology. Authorization by the HECB does not carry with it an endorsement by the board of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the HECB at P.O. Box 43430, Olympia, WA 98504-3430.

For the Master of Arts in Education/Early Childhood Education; Master of Arts in Education/Elementary Teacher Education; Master of Arts in Education/Secondary Teacher Education; and Master of Arts in Education/Special Education programs: Eligibility for initial educator certification in Washington is based on completion of a state approved educator preparation program.
This program is approved in Arizona and is authorized for field placements in Washington by the Professional Educators Standards Board. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to http://pathway.pesb.wa.gov/out of state for more information. Teachers are advised to contact their individual school districts as to whether this program may qualify for teacher advancement.

For the Associate of Arts/Elementary Education; Master of Arts in Education/Adult Education & Training; Master of Arts in Education/Teacher Leadership; Doctor of Education in Educational Leadership; Doctor of Education in Educational Leadership/Curriculum & Instruction; Doctor of Education in Educational Leadership/Educational Technology; and Doctor of Philosophy in Higher Education Administration programs:

This program is not intended to lead to teacher certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

University of Phoenix is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

University of Phoenix is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Registration does not mean that credits earned at the institution can be transferred to all other institutions. Minnesota residents may enroll in the following programs: Associate of Arts/Concentration in General Studies, Associate of Arts/Concentration in Communications, Associate of Arts/Concentration in Accounting, Associate of Arts/Concentration in Hospitality, Travel and Tourism, Associate of Arts/Concentration in Foundations of Business, Associate of Arts/Concentration in Accounting, Associate of Arts/Concentration in Hospitality, Travel and Tourism, Associate of Arts/Concentration in Human Services Management, Associate of Arts in Psychology, Associate of Arts/Concentration in Health Care Administration, Associate of Arts/Concentration in Health Care Administration/Medical Records, Associate of Arts/Concentration in Criminal Justice, Associate of Arts/Concentration in Information Technology, Associate of Arts/Concentration in Information Technology/Networking, Associate of Arts/Concentration in Information Technology/Programming, Associate of Arts/Concentration in Information Technology/Web Design, Associate of Arts/Concentration in Information Technology/Support, Bachelor of Science in Communication, Bachelor of Arts in English, Bachelor of Science in Environmental Science, Bachelor of Science in Psychology, Bachelor of Science in Health Administration, Bachelor of Science in Criminal Justice Administration, Bachelor of Science in Organizational Security and Management, The Bachelor of Science in Business, Bachelor of Science in Management, Bachelor of Science in Management Concentration in Manufacturing Sector, Bachelor of Science in Accounting, Bachelor of Science in Information Technology, Bachelor of Science in Nursing, Master of Science in Psychology, Master of Health Administration, Master of Health Administration Bridge, Master of Health Administration/Education, Master of Health Administration/Education Bridge, Master of Health Administration/Gerontology, Master of Health Administration/Gerontology Bridge, Master of Health Administration/Informatics, Master of Health Administration/Informatics Bridge, Master of Science/Administration of Justice and Security, Master of Science/Administration of Justice and Security Bridge, Master of Business Administration, Master of Public Administration, Master of Management, Master of Science in Accountancy, Master of Science in Nursing, Master of Science in Nursing/Specialization in Nursing/Health Care Education, Master of Science in Nursing/Specialization in Informatics, Master of Science in Nursing and Master of Health Administration, Doctor of Management in Organizational Leadership, Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology, Doctor of Health Administration, Visual Communication Certificate, Information Systems Security Certificate, APLUS Fundamentals Certificate, Information Systems Security Minor, Multimedia and Visual Communication Minor, Graduate Health Care Informatics Certificate, Gerontology Health Care Certificate, Graduate Certificate in Human Resources Management, Graduate Accounting Certificate, Graduate Marketing Certificate
Required Course of Study for the BSHS/M

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSHS 302 ~ .............................................................................. 3 credits
Introduction to Human Services

BSHS 322 ~ .............................................................................. 3 credits
Communication Skills for the Human Services Professional

MGT 331 ..................................................................................3 credits
Organizational Behavior

BSHS 312 ~ ..................................................................................3 credits
Models of Effective Helping

MGT 330 ..................................................................................3 credits
Management: Theory, Practice and Application

BSHS 342 ..................................................................................3 credits
Human Lifespan Development

MGT 350 ..................................................................................3 credits
Critical Thinking: Strategies in Decision Making

BSHS 402 ~ ..................................................................................3 credits
Case Management

BSHS 332 ~ ..................................................................................3 credits
Professional, Ethical, and Legal Issues in Human Services

MGT 449 ..................................................................................3 credits
Quality Management and Productivity

FIN 324 ~ ..................................................................................3 credits
Financial Analysis for Managers I

BSHS 442 ~ ..................................................................................3 credits
Advocacy and Mediation

PSY 428 ..................................................................................3 credits
Organizational Psychology

BSHS 352 ~ ..................................................................................3 credits
Technology in Human Services

BSHS 422 ~ ..................................................................................3 credits
Cultural Diversity and Special Populations

BSHS 382 ~ ..................................................................................3 credits
Research and Statistics

BSHS 462 ~ ..................................................................................3 credits
Building Community in Organizations

MKT 421 ~ ..................................................................................3 credits
Marketing

BSHS 452 ~ ..................................................................................3 credits
Program Design and Proposal Writing

GEN 480 ~ ..................................................................................3 credits
Interdisciplinary Capstone Course

The University of Phoenix reserves the right to modify the required course of study.

Additional Admission Requirements of the BSHS/M

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
• Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the BSHS/M

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Mathematics, 6 credits
Science and Technology, 6 credits

Must include at least three credits in the physical or biological sciences

Humanities, 6 credits
Social Science, 6 credits

Nevada students must complete three credits in Nevada Constitution
Additional Liberal Arts, 3 credits

Puerto Rico students have a 12 credit Interdisciplinary requirement due to the 6 credit Spanish requirement in Liberal Arts.

Professional Development, 3 credits

BSHS 302 is completed as part of the required course of study

Integrating, 3 credits

GEN 480 is completed as part of the required course of study

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance.

Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSHS/M for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Mathematics, 6 credits

Science and Technology, 9 credits

Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.

Humanities, 9 credits
Social Science, 9 credits

Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts, 3 credits
Interdisciplinary Requirements, 6 credits
Professional Development, 3 credits

Integrating, 3 credits

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance.

Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Degree Requirements for the BSHS/M

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 60 upper division credits.
  • A minimum of 54 credits of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.0.
  • A minimum of 120 total credits that include a minimum of 60 upper division credits. Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.

Academic Progression Requirements for the BSHS/M

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSHS/M

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of thirty (30) credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived. BSHS 302, GEN 480

Course Descriptions for the BSHS/M

BSHS 302 ..........................3 credits

Introduction to Human Services

This course is designed to give adult learners an overview of expectations for academic success in the Bachelor of Science in Human Services program. The course examines learning theory and the application of adult learning principles. Students will gain knowledge of skills needed to do critical thinking, make oral presentations, function in learning teams, conduct research, and write academic papers. Students will be introduced to the university library and learn how to access its resources successfully. An introduction to the human services profession will be accomplished by studying roles and responsibilities of human services workers.

BSHS 322 .................................................................3 credits

Communication Skills for Human Services Professional

This course explores the theory and practice of professional communication skills, including active listening, interviewing, verbal and nonverbal communications, exploration and goal setting skills, and various techniques for helping people change. Students will develop an understanding of the relationship dynamics between clinicians, clients, and human service staff through application of communication techniques and strategies.
Organizational Behavior
This course in organizational behavior encompasses the study of individual and group behavior in organizational settings. Managing organizational behavior challenges individuals to understand and embrace workforce diversity, elements of change, effective communication, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in organizations in the new millennium.

BSHS 312 ................................................................. 3 credits

Models of Effective Helping
This course presents an exploration of the major theoretical areas in the helping professions: cognitive, behavioral, affective/humanistic, and systems. Students learn the theoretical bases for each of the major theories, the approach to change, and the techniques and interventions used by practitioners of these theories. The course emphasizes the development of a personal theory and approach to human services and the creation of a resource file containing practical applications of theory-based techniques for use by the human services worker.

MGT 330 ................................................................. 3 credits

Management: Theory, Practice, and Application
This course explores the rich field of management in theory and practice, and as both a science and an art. The course also addresses the role of managers in the current world of rapid change, increased competitive forces, and increased expectations for the successful performance of employees and organizations. The focus is on some of the ways and means of achieving desired goals. The student will leave this course with a solid background in the nature and work of management and managers. Applications of concepts to current workplace issues will be stressed.

BSHS 342 ................................................................. 3 credits

Human Lifespan Development
This course presents students with empirical research findings and theoretical frameworks to foster an understanding of the various stages and dimensions of human development across the lifespan. Emphasis is placed on biological, cognitive, emotional, and social development in a timeframe extending from prenatal development through the elder years and on toward eventual end of life and bereavement processes.

MGT 350 ................................................................. 3 credits

Critical Thinking: Strategies in Decision Making
The course provides students opportunities for analysis, synthesis, prescription, and application roles of critical thinking and decision making within the organization. Emphasis is placed on preparing managers who can deal clearly, rationally, and creatively with, diverse workforce and dynamic work place. This course equips students with concrete skills in critical thinking and decision making that will allow them to identify and solve organizational problems as well as provide strategic direction.

BSHS 402 ................................................................. 3 credits

Case Management
This course covers principles, practices, and issues in case management. The diagnosis and treatment of developmental, psychological, and psychiatric problems and treatment resources in lease restrictive and most cost effective settings will be examined.

BSHS 332 ................................................................. 3 credits

Professional, Ethical, and Legal Issues in Human Services
Ethical principles and practices of human service workers are examined in accordance with The Community Support Skill Standards for Human Service Workers and the Ethical Standards of Human Service Professionals. Major legal issues in the delivery of human services are examined. The roles, functions, and legal and ethical responsibilities of the human service worker are investigated.

MGT 449 ................................................................. 3 credits

Quality Management and Productivity
This course examines the concepts of continuous improvement and quality management, viewing quality as a systematic process that improves customer satisfaction. The course covers methodologies that will aid managers in assuring that the organization’s quality system is effectively meeting the organization’s continuous improvement goals.

FIN 324 ................................................................. 3 credits

Financial Analysis For Managers I
This course is designed to frame financial issues for non-financial managers. Basic accounting and financial terminology and concepts are introduced and practiced. Topics covered include: the accounting environment, financial statements, financial markets, working capital management and financial planning, and Internal Controls.

BSHS 442 ................................................................. 3 credits

Advocacy and Mediation
This course is designed to explore the potential use and benefits of mediation as a part of the advocacy process. Attention to overcoming barriers of effective service delivery will be examined. Students will experience the roles of mediator, advocate, and agency representative. Workshops will include role-plays in dyads and small groups.

PSY 428 ................................................................. 3 credits

Organizational Psychology
This course is concerned with analyzing the external and internal system dynamics that maximize performance excellence of individual and work groups in an organization. Organizational Psychology focuses on the human factor of business. This course applies Organizational Psychology theories and techniques to the features/dimensions of corporate structure that are transforming in order to accommodate the changes in the modern world. An understanding of external and internal customer relations in the transformed organizations is discussed.

BSHS 332 ................................................................. 3 credits

Technology in Human Services
This course is a survey of the use of communications technology in human services. It examines how technology affects the delivery of human services and how technology is used in delivering the service. Students are required to have access to the internet and have a valid e-mail address to take this course.
BSHS 422.................................................................................. 3 credits

Cultural Diversity and Special Populations
Students will explore rich and unique features of ethnically diverse populations and "special populations," and identify their human services needs. Students will become familiar with available local community services to meet those needs. The development and assessment of cultural competence as it applies to social service agencies and behavioral health professionals is emphasized.

BSHS 382 ................................................................................. 3 credits

Research and Statistics for the Social Sciences
This course is a survey of basic research methods and appropriate use of statistics in the social sciences. The nature and history of the scientific method, research tools, data collection and analysis will be reviewed. Understanding research reports and the ability to critically evaluate published research will be emphasized. While key statistical concepts will be reviewed, students will gain a conceptual understanding of underlying principles enabling them to become "informed consumers" of research. Software for descriptive and inferential parametric and nonparametric statistical procedures will be introduced to the students. Students will practice establishing research designs, critically evaluating research reports and interpreting statistical analyses.

BSHS 462 .................................................................................. 3 credits

Building Community in Organizations
This course provides a framework for understanding organizations as social communities. Students will learn to identify the essential elements of organizational communities, the managerial implications of considering organizations as communities, the skills necessary to effectively work in organizational communities and the powerful benefits of working in community. Emphasis will be placed on the skills of working effectively in community.

MKT 421 .................................................................................. 3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

BSHS 452 .................................................................................. 3 credits

Program Design and Proposal Writing
This course covers finding federal, state, and private funding for human services programs and agencies and writing proposals to secure funding. Students will practice designing and evaluating programs. Students will use the Internet to explore funding sources and to identify suggestions for developing successful grant proposals.

GEN 480 .................................................................................. 3 credits

Interdisciplinary Capstone Course
This is the capstone course for business, health and human services, and information technology undergraduate students. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 .................................................................................. 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level course work. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 .................................................................................. 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 300 .................................................................................. 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 .................................................................................. 3 credits

Collegiate Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................................. 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
PHY 101 ................................................................................... 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ..................................................................................... 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 .................................................................................... 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Beginnings -- A Brief History

In 1976, the leading edge of the Baby Boom generation was just turning 30. That same year saw the introduction of the first personal computer, the Apple I -- an event that signaled the birth of a new economic system in which intellectual capital would eventually supplant industrial might as the dominant economic force. These milestones marked the beginning of a sea of change in higher education, though many (perhaps even most) within that system did not recognize it at the time.

Considered together, these phenomena suggested that the jobs that would make up the workforce of the future were only just beginning to be created or imagined. In order to fill those jobs, the bulk of the new workforce would require higher-level knowledge and skills than those needed in a manufacturing economy. At the same time, the largest-ever age cohort of the population, adult learners, would be going through the stages of life during which they would be most affected by the coming economic dislocation and would need advanced education to adapt to these changes.

It was in this historical context in 1976 that Dr. John Sperling, a Cambridge-educated economist and professor-turned-entrepreneur, founded University of Phoenix. Sperling anticipated the confluence of technological, economic, and demographic forces that would in a very short time herald the return of ever larger numbers of adult learners to formal higher education.

In the early 1970s, at San Jose State University in San Jose, California, Sperling and several associates conducted field-based research in adult education. The focus of the research was to explore teaching/learning systems for the delivery of educational programs and services to adult learners who wished to complete or further their education in ways that complemented both their experience and current professional responsibilities. At that time colleges and universities were organized primarily around serving the needs of the 18-22 year-old undergraduate student. That is not all surprising, given that the large majority of those enrolled were residential students of traditional college age, just out of high school. According to Sperling adult learners were invisible on the traditional campus and were treated as second-class citizens.

Other than holding classes at night (and many universities did not even do this), no efforts were made to accommodate their needs. No university offices or bookstores were open at night. Students had to leave work during the day to enroll, register for classes, buy books or consult with their instructors and advisors. Classes were held two or three nights per week and parking was at the periphery of a large campus. The consequence, according to Dr. Sperling was that most adult learners were unable to finish a four-year program in less than eight years, or a two-year program in less than four years (Tucker, 1996, p. 5).

Sperling’s research convinced him not only that these underserved learners were interested in furthering their educational goals, but also that this group differed from their more traditional counterparts in significant ways. He saw a growing need for institutions that were sensitive to and designed around the learning characteristics and life situations of a different kind of learner population. He suggested ways for institutions to pioneer new approaches to curricular and program design, teaching methods, and student services. These beliefs eventually resulted in the creation of University of Phoenix, and they continue to this day to inspire the University’s mission, purpose, and strategies.

As an institution, University of Phoenix is unique in its single-minded commitment to the educational needs of non-traditional students, who in fact today make up the majority (73 percent) of all college enrollees. This focus informs the University’s teaching and learning model approach to designing and providing student services, and academic and administrative structure. It also guides the institution as it plans and prepares to meet the needs of the next generation of learners.

Over the last three and a half decades, the University of Phoenix has been cause-driven working to build an institution with the agility to address directly the shifting economic and academic challenges that many students face. Dr. Sperling’s predictions concerning the innovations higher education would be required to make have come to pass. Today roughly 45 percent of all college students work at least part-time and approximately one quarter of all students have dependent children. The educational tenets set forth by Dr. Sperling in 1976 now apply to the majority of college students in the United States.

The University’s growth over the last thirty-five years has been fueled by constant innovation, and ongoing efforts to improve the learning experience through advanced technology. The University has grown from a degree-completion institution serving an audience of mostly middle managers wishing to complete their education and excel in the workplace, to a comprehensive university serving students of all ages from the associate through the doctoral degree levels.

Ownership Information

University of Phoenix, Inc. is a wholly-owned subsidiary of Apollo Group, Inc. (the “Parent”). The Parent’s voting stock (Class B Common Stock) is 100 percent held by management. The Parent has one class of non-voting stock (Class A Common Stock) which is publicly traded on the NASDAQ Stock Exchange under the symbol “APOL”. The Parent files quarterly and annual financial statements with the Securities and Exchange Commission and these are available to the general public. The University’s central administration offices are located in Phoenix, Arizona.

Mission

The Mission of University of Phoenix is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities.

Purposes

1. To facilitate cognitive and affective student learning--knowledge, skills, and values -- and to promote use of that knowledge in the student’s work place.
2. To develop competence in communication, critical thinking, collaboration, and information utilization, together with the commitment to lifelong learning for enhancement of students’ opportunities for career success.
3. To provide instruction that bridges the gap between theory and practice through faculty members who bring to their classroom not only advanced academic preparation, but also the skills that come from the current practice of their professions.

UNIVERSITY OF PHOENIX
4. To provide General Education and foundational instruction and services that prepare students to engage in a variety of university curricula.

5. To use technology to create effective modes and means of instruction that expand access to learning resources and that enhance collaboration and communication for improved student learning.

6. To assess student learning and use assessment data to improve the teaching/learning system, curriculum, instruction, learning resources, counseling and student services.

7. To be organized as a for-profit institution in order to foster a spirit of innovation that focuses on providing academic quality, service, excellence, and convenience to the working student.

8. To generate the financial resources necessary to support the University’s mission.

**Accreditation and Affiliations**

**Regional Accreditation**

University of Phoenix is regionally accredited by The Higher Learning Commission and is a member of the North Central Association.

The Higher Learning Commission
230 South LaSalle Street, Suite 7-500, Chicago, Illinois 60604-1413
Phone: 800.621.7440 | 312.263.0456 | Fax: 312.263.7462

Overland Park, KS 66213
(913) 339-9356
http://www.acbsp.org

**College of Nursing and Nursing Programs**

The Bachelor of Science in Nursing and Master of Science in Nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE).

Commission on Collegiate Nursing Education (CCNE)
One Dupont Circle, NW, Suite 530
Washington, DC 20036-1120
(202) 887-6791
http://www.aacn.nche.edu/accreditation/

**College of Education and Education Programs**

The Master of Arts in Education program with options in Elementary Teacher Education and Secondary Teacher Education has been approved for initial accreditation by the Teacher Education Accreditation Council (TEAC) for a period of five years, from December 20, 2007 to December 20, 2012.

In addition, the College of Education has approval for education programs through the following state agencies:

- Arizona Department of Education
- California Commission on Teacher Credentialing
- Colorado Department of Education
- Hawaii Teacher Standards Board
- Idaho State Department of Education
- Indiana Department of Education
- Missouri Department of Elementary and Secondary Education
- New Mexico Public Education Department
- Nevada Department of Education
- Oregon Teacher Standards and Practices Commission
- Puerto Rico Department of Education
- Texas Education Agency
- Utah State Office of Education
- Washington State Department of Education
- Walt Disney World Education

*Programs vary by state. Not all programs are approved in all states.*

The University also maintains voluntary memberships with numerous educational organizations, including the American Council on Education, the Association of American Colleges, the American Association for Adult and Continuing Education, the American Association for Higher Education, National Association of Schools of Public Affairs and Administration, the Council for Adult and Experiential Learning, the College and University Personnel Association, the Arizona Association of Collegiate Registrars and Admissions Officers, the American Association of Collegiate Registrars and Admissions Officers, the Independent Colleges and Universities of Arizona, the American Association of Colleges of Nursing, National League for Nursing, the National Board for Certified Counselors, the National Association for Foreign Student Admissions, Association of International Educators, the National Association of Veterans Program Administrators, the Service Members Opportunity College, and Defense Activity for Non–Traditional Support. Additionally, the University maintains memberships in various professional, program specific organizations.

**Academic Programs**

Undergraduate and graduate programs at University of Phoenix are offered in business and management, nursing and health sciences, education, criminal justice, social sciences, natural sciences, humanities, and information technology. Undergraduate students are required to complete general education requirements that are distributed across traditional liberal arts categories and interdisciplinary components. General Education requirements are described in greater detail in the Undergraduate Programs section of the catalog. Not all programs are offered at all campuses. Specific programs offered are listed later in this catalog.
Enrollment and Student Profile

As of the third quarter ending May 31, 2011, University of Phoenix had an enrollment of over 398,000 students and had expanded to in excess of 230 campuses and learning centers in 40 U.S. States as well as locations in the District of Columbia and Puerto Rico. Additionally, University of Phoenix offers degree programs globally through its online delivery system.

According to students responding to a registration survey during fiscal year 2010, the average student is in his or her mid-thirties (32 for undergraduates and 37 for graduates). Gender of entering students is approximately 68 percent female and 32 percent male. Approximately 46 percent of entering students reporting belonged to an ethnic minority.

Currently, based on student selection, across University of Phoenix, approximately 33 percent of the students are seeking undergraduate business or management degrees and 9 percent are seeking graduate business or management degrees. Enrollments in selected other University of Phoenix degree programs include: 16 percent in health sciences and nursing, 11 percent in social and behavioral sciences, 9 percent in education, and 8 percent in technology.

University Library

The University of Phoenix Approach to Library Services

As busy working professionals, our students and faculty members know how difficult it can be to travel to a distant library and match their schedules to library building hours. To accommodate student and faculty needs, University of Phoenix offers its library services online. This online distribution of information is well suited to the needs of today’s “knowledge workers” and offers a functional version of the types of information systems University of Phoenix students and faculty will be expected to use throughout their careers.

The core of our library web site is the University Library, a collection of resources available to all students and faculty at any time and from virtually any location where an Internet connection is available. In addition to our University Library, the library maintains selected links to other worthwhile sites on the web and provides user education and research assistance.

The online distribution of information is not only optimally matched to the needs of working professionals, but also allows for equitable sharing of library resources among students and faculty members at all University of Phoenix learning centers and in our distance education programs. Instead of encountering disparities in library resources between large and small learning centers and between on-campus and online students, University of Phoenix library patrons enjoy access to the same broad spectrum of resources regardless of where and how they attend class.

University of Phoenix provides a comprehensive digital library for students at all locations. For more information, please see your Library Handbook or contact the University Library at library@phoenix.edu.

What is in the University Library?

Thousands of scholarly journals and periodicals holding full-text articles relevant to each University of Phoenix degree program are contained in the University Library’s resources. Financial reports on over 10,000 public companies and a variety of directories and other reference publications are also available. In addition, the University Library has a collection of multimedia available, including videos, images, and audio files, on a variety of topics. Many of the resources found in the University Library are commercial products held by the University through license agreements with content providers and are not accessible to the general public like web pages found through an Internet search engine.

Getting Started with the University Library

To get started using the University Library, students and faculty members should follow these steps:

- Visit the student and faculty website https://ecampus.phoenix.edu/. This is the same website used to obtain course modules, grades, and other University of Phoenix resources and services.
- After logging into the student and faculty website, select the Library tab and then the University Library link to enter the University Library.
- Select an appropriate resource and begin research.

Electronic Reserve Readings

In addition to the University Library resources for research by topic, University Library staff members also maintain Electronic Reserve Readings for individual courses. These pages provide links to materials relevant to the course curriculum. Links to Electronic Reserve Readings, when available, are listed on course pages within eCampus.

Additional Resources for Help

- The Library Handbook includes detailed information and helpful tips on conducting research.
- Ask a Librarian is a service found in the University Library that allows users to direct specific reference or research strategy questions to University Library staff.
- Request a Specific Document is a service found in the University Library that allows users to request a document or book that is not available in the University Library. Specific timelines and rules apply to this service.
- View the Research Tutorial is a feature in the University Library that allows users to learn research skills by participating in an interactive web-based research activity.
- Choose Resources by Subject on the homepage of the University Library website contains overviews of research recommendations for specific subject areas.
- Search FAQs on the homepage of the University Library contains a searchable form to obtain answers to “Frequently Asked Questions” received by the library.
How to Contact the University Library
Student Technical Support 1-877-832-4867
Email library@phoenix.edu
International students and faculty can reach Tech Support at 1-602-387-2222. Callers should identify themselves as international students or faculty and give a call back number. Tech Support will call back to minimize phone charges.

Current Resources of the University Library
For a current list of resources in the University Library, please refer to the Library Handbook. Students, staff, and faculty can also view the full listing of the University Library’s resources by clicking the View All Resources Alphabetically link on the University Library homepage.
THE UNIVERSITY’S TEACHING AND LEARNING MODEL

The mission of University of Phoenix is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals. As a result, the University’s teaching and learning model is grounded in the theoretical and empirical literature of learning and cognitive psychology. The University employs best practice from recent education literature, as well as best service practices that enhance the academic experience for students who are new to higher education. This combination increases student retention and successful degree completion.

Active Learning

The model is based first on the assumption that the learner’s active involvement in the learning process is essential to good practice. Thus, in all modalities University of Phoenix classrooms are intended to be dynamic learning spaces. Instructors are expected to serve as facilitators of learning who manage the learning process by engaging learners in a variety of activities (lectures being but one) that lead students to an understanding of course content and the development of academic and professional competence. By involving students in a variety of learning activities, respect is demonstrated for diverse ways of learning and knowing. Interaction and participation in classes and Learning Teams is expected of those students in the bachelor and master degree programs. Students pursuing an associate degree at the Online Campus (excluding AACR & AAPF) are involved in collaborative learning activities, but are not required to participate in formal Learning Teams.

Collaboration

The effectiveness of cooperation and collaboration in enhancing learning is well and widely documented. Structures that encourage and facilitate collaboration are central to the University’s teaching and learning model. Working students frequently come to formal learning activities with greater life and work experience. This means that learners themselves can be invaluable resources in enhancing their own and others’ learning. Traditional pedagogy emphasizes a top-down, vertical transfer of information. Students and learning model. Working students frequently come to formal learning activities with greater life and work experience. This means that learners themselves can be invaluable resources in enhancing their own and others’ learning. Traditional pedagogy emphasizes a top-down, vertical transfer of information. Students with rich and varied experience find benefit in instructional practices that encourage collaboration. This adds a robust horizontal dimension to the learning exchange as students teach and learn from one another. Good practice in education capitalizes on this dimension to the students’ advantage.

Emphasis on Application and Relevance

There is wide agreement in the literature that students learn best when bridges are built between new knowledge and the learners’ experience. Practices that encourage reflection and application are based on the recognition that a learner’s experience provides a context through which he or she is more able to construct meaning from new information. It also makes learning relevant to the learners. In University of Phoenix courses, students’ experiences and current circumstances are interwoven with subject matter in class discussions as well as in individual, team and other collaborative assignments. Real-world relevance is critical to basic comprehension as well as to maintaining student interest. Students very often say they are able to apply at work the next day what they learned in class the night before.

University-Wide Learning Goals

The University’s faculty leadership has established five broad learning goals that guide curriculum development, instruction, learning assessment, and program evaluation and improvement. The University Learning Goals are:

1. Professional Competence and Values
2. Critical Thinking and Problem Solving
3. Communication
4. Information Utilization
5. Collaboration

The intent is to help all University graduates attain levels of theoretical and practical disciplinary knowledge appropriate to the levels of degrees or credentials they are earning, while developing competence in essential intellectual and social processes that will enable graduates to practice their professions successfully.

Curriculum

The University’s curriculum is faculty-developed and centrally managed by a team of college staff and instructional designers with objectives and outcomes that are carefully defined. Individual instructors have the responsibility to expand and enhance the basic curriculum by augmenting it with current resources and practices. The curriculum is under continual content and quality review.

Convenience of Time and Place

University of Phoenix classroom programs are offered at times and in places that are convenient to adult learners. Classes are held primarily in the evening and on weekends when learners are most likely to need access. The University’s goal is to make access to programs and services convenient to its student population. Wherever possible, campuses and learning centers are located at strategic locations near major freeways and thoroughfares that permit convenient access.

Access

Access in the 21st Century means many different things. To the student in rural America or the working parent with children at home, access may be possible only through an Internet connection. Those students usually work toward their degrees through the Online Campus or through courses offered via FlexNet®, a combination of classroom and online learning. The University’s goal is to make access to programs and services available to all those who wish to avail themselves of them and to work to completion of a degree program.
Program Format

University of Phoenix is a non-term institution and does not operate according to a traditional academic calendar. New student cohorts can begin at any time. Typically, graduate courses at University of Phoenix meet for six consecutive weeks and undergraduates courses meet for five weeks. Classes meet once per week for four (4) hours. When a course ends, the next course usually begins the following week. This intensive calendar allows students to achieve their educational goals in a more time-efficient manner.

The University’s low student/faculty ratio and class size that averages 13-15 students facilitate active learning and collaboration and encourage time-on-task. As a rule, bachelor and graduate degree seeking students take only one course at a time. This allows them to focus attention and resources on one subject, a structure that enhances learning and helps students balance ongoing professional and personal responsibilities.

Associate degree students enrolled at the Online Campus (excluding AACR & AAPF) enroll in two courses concurrently for nine consecutive weeks. The longer course length allows students to complete two courses concurrently and keeps the weekly workload at a manageable level.

Learning Teams

In addition to regular course instructional sessions, bachelor’s and master’s level students meet weekly in Learning Teams. Learning Teams are small groups of three to six students drawn from within the larger cohort. Learning Teams are an essential design element in the University’s teaching and learning model through which students develop the ability to collaborate -- an ability expected of professionals and leaders in other professional arenas. A listing of faculty may be obtained at each local campus and/or in the appendix pages at the end of this catalog. Current contact information for each campus may be found at http://www.phoenix.edu.

Staff Screening

All external candidates must have a new background check submitted each time they are being considered for a position with the University. The background check must be completed prior to the start date.

Student Technology Recommendations and Competencies

In an effort to assist students with adequate preparation for their course work at the University of Phoenix, technology recommendations and competencies have been established. These recommendations and competencies are in effect for the School of Advanced Studies, School of Business, College of Education, College of Information Systems and Technology, Colleges of Arts and Sciences, College of Nursing, College Extension, and the School of Continuing Education. To that end, students will need to access and use the hardware and software as described below. Additional recommendations and competencies may be required for particular courses/programs. Students using software and hardware other than that recommended must still meet the technology competencies. Please note that due to the rapid rate of change in information technology, hardware and software competencies will be updated on a regular basis. Some courses in the College of Information Systems and Technology may require additional software.

Technology Recommendations

Hardware & Peripherals

You are required to have access to a computer with the following:

- A processor of 2 GHz or faster
- 1GB RAM or greater
- 80GB hard drive or greater
- Cable/DSL connection or better
- Monitor and video card with 1024x768 or greater resolution
- Sound card with speakers
- Inkjet or laser printer
- Microphone

Software/Applications

You will need access to and competence on the following applications:

- Operating system
  - Windows® XP or later
  - Mac OS 10.4 or later, with a Microsoft Windows partition required for some courses.
  - Microsoft Office 2003 or later(PC), Office 2004 (Mac)
  - Microsoft® Project (for selected courses)

- Internet Browser
  - Microsoft® Internet Explorer version 7.0 or later
  - Mozilla Firefox 3.5 or later
  - Google Chrome 7.0 or later
  - Apple Safari 5.0 or later
  - Adobe® Reader 9.0 or later
  - Adobe Flash plug-in 10.0 or later

- System is enabled to allow installation of browser plug-ins as required
• Local administrative privileges to Operating System may be required.
• A current anti-virus application (updated regularly)
• E-mail address
• Internet service provider (ISP) account with broadband access
For the College of Information Systems and Technology, access to additional software is required. Please look for updated software requirements on your resource page. The following software is currently used:

University of Phoenix Provided Access
(Provided via virtual student desktop for specific courses)
• Microsoft® Access
• Microsoft® Visual Studio.NET
• Microsoft® SQL Server
• Red Hat LINUX
• Adobe® Flash Professional
• Adobe® Dreamweaver
• Adobe® Photoshop
• Adobe® Acrobat Standard
• LabSim from TestOut

Student Must Establish Access
• ALICE Software (for selected courses; free download)
• Citrix Online Plug-in (latest version)
• Microsoft® Visio® (for selected courses)
• JAVA® JRE/JDK (for selected courses)
• VisualLogic (for selected courses; free download)

For the Master of Science in Nursing/Family Nurse Practitioner and the Post Masters Family Nurse Practitioner programs, the University requires the following:
• Handheld computing devices (i.e. PDA, PPC, SmartPhone, Ipad)

Note: Due to the rapid rate of change in information technology, the hardware and software requirements and technology skills may be updated.

Note: If you need to purchase a computer, the University recommends a portable laptop or notebook for classroom use. The School of Advanced Studies requires Doctoral students to bring a laptop computer to residencies. You may be eligible for student discounts on hardware and software. There is more information on your student website, https://ecampus.phoenix.edu.

Technology Competencies

Students attending the University of Phoenix are expected to have the ability to complete the following activities:
• Access course and program material on the Web.
• Correspond with University of Phoenix staff, students, and faculty using e-mail and the Web.
• Complete, send, and receive assignments to faculty or other students using e-mail and attachments/files.
• Read/print e-mail and attachments/files from students, staff, and faculty.
• Use the University of Phoenix Electronic Library also known as the Learning Resource Center (LRC) and/or Internet for research and completion of course assignments.
• Prepare and conduct presentations in the classroom using presentation equipment.

• Use the appropriate software for the course. (The University uses as standards Microsoft® Office products including MS® Word, MS® Project, MS® Excel, MS® Power Point, etc.)
• Use CD ROMs when required as part of course assignments.
• Use an appropriate anti-virus application to insure the files transmitted and received are virus free.

Online Learning System

The University’s Online Learning System (OLS) is a computer- and web-based learning environment that has replaced the traditional classroom for many University of Phoenix students. It offers a convenient medium for faculty-to-student and student-to-student interaction. An easy-to-use, easy-to-access system, OLS allows students “to go to class” to engage in individual and group discussion or lectures, anytime or any place! OLS works with most Internet Service Providers. It features a familiar “Windows” type format, which makes navigation fast and easy. A full set of capabilities allows students to complete 100% of their education and administration online (Doctoral students are required to attend residencies). In addition to participating in the full range of class meeting and study group activities, students can communicate with instructors, interact with classmates, and conduct their research online. They can also:
• Register for classes
• Pay their tuition
• Order their books
• Meet with a representative
• Obtain their grades
• Request transcripts and more

Even without the new software, students can log on to our Web site from any Internet Service Provider – so they can check their e-mail and access student services from any location and computer.

Distance Education

The University of Phoenix recognizes that adult professionals are sometimes faced with obstacles that prevent continued commitment to classroom instruction. Students may be employed in remote areas, may be traveling extensively on the job, or may have been transferred on the job following the start of a degree program. Because the University of Phoenix was developed to provide educational services to adult learners, distance education options were developed to allow these students to continue their life-long learning when faced with such obstacles. Distance education options include computer–based educational modalities that are group-based. The same rigor expected in the classroom exists for distance education students when completing curriculum goals, objectives, and outcomes.

FlexNet®

Select University of Phoenix locations offer degree programs through the University’s FlexNet program. This learning modality combines the online and campus-based classroom experiences into one. Through FlexNet, students attend the first and last night of class at one of the University’s campus-based locations, while the remaining nights of class are conducted online.
Group-Based Online Education

The Online computer-based educational delivery system has extended the boundaries of the classroom. It is an outgrowth of the University’s recognition of the technological transformation of the workplace. The Online program utilizes the Online Learning System (OLS) that makes group learning possible independent of time and location. Rather than gathering in a classroom, students and instructors interact electronically and asynchronously. Unlike other forms of distance learning, such as directed study, online education is interactive and participative. Online students can complete their University studies from virtually anywhere in the world.

Structure

Students in the group-based Online program benefit from the same quality, real world-oriented education that as distinguished the University of Phoenix since it was founded. Students become active members of a learning group of between 7-20 adult learners, and work in smaller learning teams each week on required projects and assignments. Students complete one course at a time, then move on to the next course in the same way as students who meet face-to-face.

Process

When students are admitted to the program, they are provided with all the information needed to connect to the Online Learning System. Prior to the start of the first class, students become familiar with the system through an Online orientation. At this time, group members will become acquainted through an exchange of professional and academic backgrounds. Additionally, students will be introduced to their first instructor who will explain the nature of the course and give the first assignment. Each week’s instruction begins with a general class meeting. Here, the instructor introduces all the material to be studied, gives assignments, and answers questions.

Key Features of the Group-Based Online Program

Interactive Learning

Computer conferencing exchanges are student-centered, involving dynamic and extensive sharing of ideas, opinions, and information. As a result, knowledge building occurs as students examine each other’s written arguments and positions.

In the face-to-face classroom environment the instructor often produces 60–80% of the oral exchanges. Research shows that in the online learning environment, the instructor produces only 10–15% of the verbal interactions. In this way, adult learners are much more actively involved in their own education, an element that the University of Phoenix has found to be essential to adult learning programs.

Equitable Participation

As anyone who has attended a traditional classroom setting knows, one or two students can often dominate any class discussion, while more reserved students sit silently. In the Online setting, no one readily dominates. While some students might spend more time communicating, everyone must participate. Participation, therefore, is more equitably distributed and active for everyone, as each student has equal access to the “floor.”

Time and Place Independent

All communications in the University’s Online computer-conferencing system are asynchronous rather than real-time. While this naturally imposes some limitations, it has been found that asynchronous communications result in increased access for students since they can control the time and place for their participation.

They enjoy far greater flexibility since activities need not be simultaneous. Asynchronous communication also enables both students and faculty to synthesize material at their own pace and to provide well thought out responses free of the pressure of instantaneous feedback.

OLS is available 24 hours per day, 7 days per week, enabling adult learners to choose the times when they believe they are best prepared to engage in particular learning activities and spend as long as they wish working on them. The result is that the Online adult learner has increased control and has more options than in the classroom.

(Note: There are two scheduled downtimes a month. They occur on the 1st and 3rd Saturday of each month from 11:00 p.m. to 5:00 a.m. Sunday.)

Computer Text-Based Communications

All of the Online communications are text-based, and the users (students and faculty) are able to maintain an ongoing common transcript which greatly enhances opportunities for reflective interaction. At any time they choose, students can review and reflect on the transcripts they have stored in their computers. These archives invite students to organize and reorganize the body of ideas being developed in their class.

(Note: There are two scheduled downtimes a month. They occur on the 1st and 3rd Saturday of each month from 11:00 p.m. to 5:00 a.m. Sunday.)

Services Provided

Through OLS, students are able to contact the Learning Resource Center to request literature searches and have them forwarded directly to their personal “inbox” on the Online Learning System. The University staffs a technical support help desk 24 hours per day, seven days per week.

Confidentiality

The electronic computer-conferencing system shall be maintained by an employee of the University (System Operator) who is required by University policy to uphold the confidentiality of any messages she/he may review in the process of tracking overall system usage, and ensuring that the system is functioning properly. The Director of Academic Affairs, the Vice President, Executive Director/Department Chairs, and certain university administrators may review the archives of class meetings and to assist in the resolution of grade disputes, grievances, and charges of academic dishonesty, if required.

Policy on the Illegal use of OLS

The University of Phoenix retains the right to monitor the Online Learning System conferencing system, via the System Operator, in order to verify appropriateness of use. Illegal activities are expressly prohibited and include such things as distribution of “pirated” software, distribution of unauthorized surveys, exchange of “hot” billing numbers for long distance charges, and messages that are pornographic, slanderous, or offensive by community standards.

Illegal activity will be deleted by the System Operator and the originators of such messages may be denied system access on a suspended or permanent basis.
UNIVERSITY POLICIES

Calendar

The educational mission of the University of Phoenix is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. A student could begin a degree program in virtually any month of the year. This calendar allows the adult student to balance the demands of career, family, and education.

Students qualifying for financial aid may receive a new award each academic year. An academic year is defined as the period of time in which a student completes at least 24 credit hours and 30 weeks of instructional time. Therefore, students may have their eligibility assessed for grants and/or loans several times during their program of study. The average processing time for financial aid is 90 days. Students should reapply for financial aid prior to the start of each new academic year.

Course Cancellation

The University of Phoenix may be required to cancel courses or programs when necessary. In addition, courses or programs may not begin on their scheduled start dates in the event of certain circumstances, such as faculty unavailability or insufficient enrollment. In such situations, the University will work with students in an effort to provide them with the opportunity to reschedule or to transfer to a comparable University course or program if available. Any payments made for canceled courses that have not started or are currently in process will be refunded or applied to another University course or program. All attempts will be made to address such cancellations with registered students as early as possible.

Directed Study

Under certain circumstances students may need to complete a course via directed study. Students should contact their campus for information about availability, requirements, or additional fees that may apply. A maximum of twelve credits completed via directed study may be applied to degree requirements.

Concurrent Enrollment

Because of the intensive nature of the University’s courses, students are not encouraged to concurrently enroll in courses at the University of Phoenix or to enroll in courses at other institutions while enrolled in University courses. However, students are given the opportunity to concurrently enroll in a limited number of courses. Under no circumstances may an associate degree student enrolled at the Online Campus (excluding AACR & AAPF) be concurrently enrolled in more than three (3) courses at any given time. Concurrent enrollment in a third course is prohibited for new students in the first two courses of any University of Phoenix program. Enrollment is considered from the start date of any course through the end date of the course. Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence. Under no circumstances may an undergraduate or graduate student be concurrently enrolled in more than two (2) courses at any given time. Concurrent enrollment is prohibited for new students in the first two courses of any University of Phoenix program. Enrollment is considered from the start date of any course through the end date of the course. Under no circumstances may BSN clinical nursing courses be taken concurrently with any other courses. Courses taken concurrently with other institutions will not be limited.

Dual Enrollment

Any student planning to complete both an associate of arts degree and a baccalaureate degree must complete all 60 required credits of the associates degree and meet admission requirements for their chosen degree before enrolling in any University baccalaureate degree program. There is no dual enrollment between Degree Seeking Students from University of Phoenix and Online Associate programs with the exception of AAPF.

Multiple University Degrees

Students may earn additional undergraduate or additional graduate degrees from the University of Phoenix. These students are treated the same as if they held a degree from another regionally accredited, or approved nationally, accredited institution and must meet residency requirements toward the additional degree. The following requirements must be met to complete degree programs:

- Students must complete an application for each program. (Another application fee is not required).
- Only one degree in a specific discipline may be earned. In most cases additional MAED degrees may be earned due to the unique specializations. Students may not earn both an MAED/TED-E & MAED/TED-S.
• The required course of study for each program must be completed as approved by the University. Residency must be met for each degree. Graduate students must complete a minimum of 18 credits toward an additional degree as outlined by each College. Undergraduate students must complete a minimum of 30 credits of the additional degree's required course of study in order to meet residency. A student holding one University of Phoenix Undergraduate degree may earn a different degree by applying the credits earned from the first degree toward the additional degree; however, students must still meet all additional residency requirements (30 credits), along with the general education and minimum credit requirements in effect for the additional degree at the time of enrollment.

• Students must successfully complete any project required for each program.

• A diploma application must be completed for each program. Students may earn only one certificate per program. Students who have earned a graduate degree in Business or Management may not receive a certificate or concentration in the same area of focus. Example: a student may not earn an MBA/PM and a PM certificate; however, students who have completed a certificate may return to receive an MBA degree with a concentration in the same area as the completed certificate or another approved concentration.

Maximum Credit Load

Undergraduate students may earn a maximum of 39 credits in a twelve (12) month period. Graduate students may earn a maximum of 33 credits in a twelve (12) month period. Credits attempted and earned beyond the maximum allowable limits will be transcripted but will not apply toward degree completion requirements. Courses taken concurrently at other institutions will not be counted toward this total and will not be limited in any way.

Course Credits

All credits issued for successfully completed University of Phoenix course work are in semester credits. Courses numbered 100-299 carry undergraduate, lower division credit. Courses numbered 300-499 carry undergraduate, upper division credit. Courses numbered 500-599 carry graduate credit. Professional courses numbered 600-699 may be applied to either undergraduate or graduate credit requirements. Courses numbered 700-799 carry Doctoral credit.

Most courses are three semester credits. Each three-credit course in a five-week session shall consist of 45 hours of student class work. This includes 20 hours of classroom instruction. Required learning team hours constitute the remaining class work requirement. Please note: Hours at University of Phoenix are based on a full 60 minutes, compared with the traditional 50-minute clock hour. In addition to the class work requirement, students typically complete at least two hours of individual student work out of class for each hour of class work. This time typically consists of individual study time, reading, research and writing.

Student Identification Numbers

All students are assigned a unique student identifier called an Individual Record Number (IRN). This is the primary number students use to obtain campus, web and voice response services. A letter and ID card will be mailed upon request.

Name and Social Security Number Changes

The University requires documentation of legal name and social security number changes. The following forms of identification will be accepted: marriage license, divorce decree, passport, Social Security Card or court order. A social security card issued by Social Security Administration is required for changes in social security numbers.

Duplication of Credit

Duplication occurs when students take the same course more than once or take a course that duplicates the content of a satisfactorily completed course. The grade and credit earned for the most recently completed course will apply toward academic standing and the total number of credits required for degree completion. The previously completed course will remain on the permanent transcript, but will not be applied toward academic standing or the total number of credits required for degree completion.

Course Audit Policy

At some campuses, and upon approval of the campus Director of Academic Affairs, a student may choose to audit a course. Courses that have been audited will be transcripted with the grade of “AU” and will not earn the student any credit. Students auditing a course are considered passive participants and will not be held responsible for study group work or class assignments. They must follow all other University policies for non-auditing students, including financial aid. Students will be required to pay a one (1) credit hour tuition charge consistent with the program rate for each audited course.

The Online campus does not allow external auditing due to the unique nature of an Online classroom environment.

Re–Entry Students

Students who have been out of attendance for a period of more than one (1) year from the last date of positive recorded class attendance in a program applicable course are considered re-entry students and are subject to the following policies:

• Re-entry students who re-enter into the most current program/program version offered in their state or jurisdiction do not require submission of an appeal for re-entry.
Transfer of Credit

Academic credit earned for degree level courses appearing on an official transcript from an institution that offers associate degrees or higher, which was accredited, or a candidate for accreditation at the time the student attended, by a regional or national accrediting body, or a foreign institution recognized/authorized by the country’s Ministry of Education, will be reviewed for transfer into the University with a minimum grade of C-. For program specific transfer requirements see individual program descriptions as additional conditions may apply for the transfer of credit towards specific program degree requirements. Transfer credit will be evaluated according to University policies and accepted subject to the approval of the University’s Central Office of Admissions & Evaluation.

Graduate level coursework from institutions that hold accreditation through the American Bar Association or that have been provisionally approved for accreditation may also be reviewed for transfer into the University. Coursework from ABA accredited institutions that are not from a Graduate level program (i.e. JD, LLB, LLM) will not be accepted. Paralegal degrees are not considered Graduate level programs.

Transfer credits that are based on a different unit of credit or calendar system than the one prescribed by University of Phoenix are subject to conversion before being transferred. Only course evaluations performed by the University’s Central Office of Admissions & Evaluation or Prior Learning Assessment division are final. Any preliminary reviews by campus personnel are unofficial and not binding, and subject to change.

The acceptable regional accreditation bodies are:

- Middle States Association of Colleges and Schools
- New England Association of Schools and Colleges
- Higher Learning Commission of North Central Association of Colleges and Schools
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools
- Western Association of Schools and Colleges

The acceptable national accreditation bodies are:

- Association of Biblical Higher Education (formerly Accrediting Associate of Bible Colleges)
- American Academy of Liberal Arts
- Association of Advanced Rabbinical and Talmudic Schools
- Accrediting Council for Independent Colleges and Schools
- Accrediting Bureau of Health Education Schools
- Accrediting Commission of Career Schools and Colleges
- Association of Theological Schools
- Council on Occupational Education
- Distance Education and Training Council
- Transnational Association of Christian Colleges and Schools
- National Accrediting Commission of Cosmetology Arts & Science
- Accrediting Council for Continuing Education and Training

A maximum of 30 credits may also be awarded for the successful completion of exams from approved national testing programs (CLEP, Excelsior, Berlitz, NLN, AP, DLPT, College Level GED, and DANTES) according to University policy except where prescribed otherwise for limitations of nontraditional credits under state statutes.

For a description of the type and amount of credit that can be applied toward an undergraduate degree, see individual program descriptions. Students will have up to 90 days from notification of Transfer Credit decisions to submit an appeal with the Student Appeals Center.

Transferability of credit is at the discretion of the accepting institution. It is the student’s responsibility to confirm whether or not credits earned at the University of Phoenix will be accepted by another institution of the student’s choice.

Students transferring from Meritus University will have earned credit totals for Prior Learning and Canadian Forces credit assessments honored at University of Phoenix. Applicability of assessed credits in transfer for Meritus University students will still be defined by the program requirements of the chosen program that the student is entering at University of Phoenix.

Students transferring to University of Phoenix into specified undergraduate bachelor degree programs with a previously completed regionally accredited Associate of Arts degree from a Community College will be considered as having satisfied their lower division elective and general education requirements (up to the amount of credits earned in the Associate of Arts degree), which will make the student ready to begin their Required Course of Study at University of Phoenix. Students who take advantage of this policy will still need to meet all pre-requisite or state specific content requirements as outlined in the Academic Progression and General Education Requirements sections of the catalog for their chosen program.

Not all programs are eligible for this policy. Please check with a campus representative to determine which programs are eligible. Students who take advantage of this policy and then change to a program that is not eligible for this policy will have courses individually evaluated for applicability towards degree requirements (as the policy will not carry forward into the new degree program).

Nondiscrimination Policy

The University of Phoenix is guided by the principle of equal opportunity and respect for others. The University is firmly committed to providing equal opportunity in its educational programs, activities, and employment practices and will not tolerate any discrimination or harassment of any kind with regard race, color, religion, sex, sexual orientation, gender identity, age, national origin, disability, veteran status, or any other category protected by federal, state, or local law. More specifically, the University complies with Title IX of the Education Amendments of 1972, Titles VI and VII of the Civil Rights Act of 1964 and regulations, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Age Discrimination in Employment Act of 1974, and any other applicable federal, state, or local law. Conduct deemed to be in violation of this policy is prohibited and will not be tolerated by the University of Phoenix. Retaliation, in any form, against the person raising such a concern will also not be tolerated by the University of Phoenix.

Discrimination Procedures:

1. Students, faculty or staff alleging discrimination must present their grievance within six weeks.

a. Allegations of sex discrimination must be presented to Camie Pratt, Associate Vice President and Title IX Coordinator, Office of Dispute Management, 4615 E. Elwood Street, Mailstop AA-S401, Phoenix, AZ 85040, 602.557.3391, Camie.Pratt@phoenix.edu or designee.
The Title IX Coordinator or their designee will manage efforts to conduct a prompt, thorough and impartial investigation and make a determination on whether the party presented a factual connection between the allegation of discrimination and the alleged actions.

If the Title IX Coordinator finds that there is a factual connection between the allegation of discrimination and the alleged actions then one of the following procedures will be followed:

- If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.
- If the accusation is against a student then the Student Code of Conduct procedures apply.
- If the accusation is against an employee then the appropriate campus director or their designee will contact Human Resources and human resources policies for processing claims of discrimination will be followed.

In instances where it is determined that a formal process is not appropriate the student, faculty or employee may be warned or counseled regarding the allegation.

Harassment Procedures

1. Students, faculty or staff alleging harassment must present their grievance within six weeks.

a. Allegations of sexual harassment must be presented to Camie Pratt, Associate Vice President and Title IX Coordinator, Office of Dispute Management, 4615 E. Elwood Street, Mailstop AA-S401, Phoenix, AZ 85040, 602.557.3391, Camie.Pratt@phoenix.edu or designee.

i. The Title IX Coordinator or their designee will manage efforts to conduct a prompt, thorough and impartial investigation and make a determination on whether the party presented a factual connection between the allegation of harassment and the alleged actions.

- If the Title IX Coordinator finds that there is a factual connection between the allegation of harassment and the alleged actions then one of the following procedures will be followed:
  - If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.
  - If the accusation is against a student then the Student Code of Conduct procedures apply.
  - If the accusation is against an employee then the appropriate campus director or their designee will contact Human Resources and human resources policies for processing claims of discrimination will be followed.

ii. If the appropriate director or designee finds that there is a factual connection between the harassment and the alleged actions then one of the following procedures will be followed:

- Investigation - a prompt, thorough, and impartial investigation will be conducted within 60 days barring any unusual complexity.
- Opposing parties will receive notice of the outcome of the complaint within 30 days of the close of the investigation.
- Opposing parties shall be afforded the opportunity to appeal within 10 days of receiving notice of the outcome.

b. All other discrimination claims must be presented to the Campus Director of Academic Affairs, Campus Director of Operations, or their respective designee.

i. Campus Director of Academic Affairs, Campus Director of Operations, or Director of Student Services, or their respective designee will conduct a prompt, thorough and impartial investigation and make a determination on whether the student presented a factual connection between the allegation of discrimination and the alleged actions.

- If the appropriate director or designee finds that there is a factual connection between the allegation of discrimination and the alleged actions then one of the following procedures will be followed:
  - If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.
  - If the accusation is against a student then the Student Code of Conduct procedures apply.
  - If the accusation is against an employee then the appropriate campus director or their designee will contact Human Resources and human resources policies for processing claims of discrimination will be followed.

In instances where it is determined that a formal process is not appropriate the student, faculty or employee may be warned or counseled regarding the allegation.

Timeframe for Conducting Title IX complaints:

- Investigation - a prompt, thorough, and impartial investigation will be conducted within 60 days barring any unusual complexity.
- Opposing parties will receive notice of the outcome of the complaint within 30 days of the close of the investigation.
- Opposing parties shall be afforded the opportunity to appeal within 10 days of receiving notice of the outcome.

Harassment Policy

It is the policy of the University of Phoenix that the educational environment at each of its campuses be free of all forms of improper or unlawful harassment including sexual harassment or sexually offensive conduct. Conduct on the part of faculty, staff, or students which would violate this policy includes, but is not limited to:

- Unwelcome or unwanted sexual advances,
- Requests for sexual favors,
- Any suggestion, whether overt or subtle, that a grade or other academic achievement is dependent upon the granting of sexual favors or submission to sexual requests,
- Unwelcome physical contact, including patting, pinching, hugging, kissing, fondling, etc.,
- Offensive verbal conduct, including sexually explicit jokes, comments, innuendo, or other tasteless action that would offend a reasonably sensitive person,
- The display of sexually offensive pictures, posters, illustrations, or objects,
- Slurs, jokes, or ridicule based on race, ethnic or national origin, religion, gender, sexual orientation, gender identity or disability.

Conduct deemed to be in violation of this policy is prohibited and will not be tolerated by the University of Phoenix. Retaliation, in any form, against the person raising such a concern will also not be tolerated by the University of Phoenix.

b. All other discrimination claims must be presented to the Campus Director of Academic Affairs, Campus Director of Operations, or their respective designee.

i. Campus Director of Academic Affairs, Campus Director of Operations, or Director of Student Services, or their respective designee will conduct a prompt, thorough and impartial investigation and make a determination on whether the party presented a factual connection between the allegation of harassment and the alleged actions.

- If the Title IX Coordinator finds that there is a factual connection between the harassment and the alleged actions then one of the following procedures will be followed:
  - If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.
  - If the accusation is against a student then the Student Code of Conduct procedures apply.
  - If the accusation is against an employee then the Title IX Coordinator or their designee will contact Human Resources and human resources policies for processing claims of discrimination will be followed.

In instances where it is determined that a formal process is not appropriate the student, faculty or employee may be warned or counseled regarding the allegation.

Timeframe for Conducting Title IX complaints:

- Investigation - a prompt, thorough, and impartial investigation will be conducted within 60 days barring any unusual complexity.
- Opposing parties will receive notice of the outcome of the complaint within 30 days of the close of the investigation barring any unusual complexity.
Disability Services

Obtain Information

The campus disability services advisor is responsible for managing the ADA process, including negotiations, and finalizing appropriate student accommodations. Additional information and a list of campus disability services advisors are located at http://www.phoenix.edu/students/disability-services.html.

Acceptable Use of University Computing and Communication Resources

The University’s computing and communication resources are the property of the University. Use of University computing and communication resources is a privilege and is provided as a service to the University’s users. Among other purposes, these resources are provided for the delivery of curriculum and related materials; for conducting online classes; for conducting educational research; for communication between and among students, faculty, and staff; and, for accessing and obtaining the University’s services.

Students and faculty using these resources without authorization, or in excess of their authorization, will be subject to appropriate review processes and sanctions. In addition, all activity and information, including personal activity and information, on University systems may be monitored and recorded. Any individual accessing University computing and communication resources expressly consents to such monitoring and is advised that if such monitoring reveals unauthorized or criminal activity, Information Security Personnel will provide the evidence from monitoring to the appropriate University officials for investigation and possible release to law enforcement authorities.

General Requirements of Users

Users of University computing and communication resources must:

- Comply with this policy and all applicable local, state, and federal laws and regulations.
- Not intentionally compromise the confidentiality, integrity or availability of University computing and communication resources.
- Not attempt to circumvent the University’s physical, technical, or administrative security measures.
- Abide by the provisions of the Student Code of Conduct (for students) or the provisions of the Faculty Standards (for faculty members).
- Be truthful and accurate in personal identification.
- Respect the rights and privacy of others.
- Maintain the security of their user resource accounts.
- Comply with the terms of use of any University or third-party service provider website(s).

Intellectual Property

Users must adhere to applicable intellectual property law, and the terms and conditions of any and all software licensing agreements and/or copyright laws as specified by the vendor or licensor. Explicitly:

- Unauthorized use of University trademarks or logos and other protected trademarks and logos is prohibited.
- Infringing upon the copyright, trademark, patent, or other intellectual property rights of others in computer programs or electronic information (including plagiarism and unauthorized use or reproduction) is prohibited.
- The unauthorized storing, copying or use of audio files, images, graphics, computer software, data sets, bibliographic records and other protected property is prohibited except as permitted by law.
Privacy & Security
The University strives to maintain the confidentiality, integrity, and availability of its systems, networks, and data. The University implements policies to ensure that access to sensitive data is restricted to those individuals who have a need-to-know. The following sections describe how Information Security Personnel may monitor computing and communication resources for violations of this acceptable use policy.

Monitoring
System and network activities of users are routinely logged and monitored. These activities include:

- Use of accessed accounts
- Time and duration of network activity
- Web pages accessed and duration of access
- Network software accessed
- Volume of data storage and transfers

In the case of a suspected violation of this policy, University officials may authorize Information Security Personnel to conduct a more detailed investigation to gather evidence on the suspected violation.

Restriction of Access to Computing and Communication Resources
Access to University computing and communication resources is a privilege that may be wholly or partially restricted without prior notice and without consent of users:

- If required by applicable law or policy.
- If a reasonable suspicion exists that there has been or may be a violation of law, regulation, or policy.
- If required to protect the confidentiality, integrity, or availability of computing and communication resources.
- Necessary to protect the confidentiality, integrity, or availability of computing and communication resources.

Confidentiality
Confidentiality of e-mail and other network transmissions can not be completely assured. Therefore, all users should exercise caution when sending personal, financial, confidential, or sensitive information by e-mail or across the Internet.

Responsibility to Inform User of Unauthorized Access or Disclosure
If the University believes unauthorized access to or disclosure of private user information has occurred, the University will make reasonable efforts to inform the affected user, except when notification is impractical or when notification would be detrimental to an investigation of a violation of law or policy.

Violations and Enforcement
Reporting Violations
Any actual or suspected violation of this policy should immediately be brought to the attention of the system administrator of the equipment or facility most directly involved. Alternatively, a report may be made directly to Apollo Internal Audit or Apollo Information Security and Compliance.

Response to a Reported Violation
Upon receiving notice of a violation, the University may temporarily suspend a user’s privileges or move or delete the allegedly offending material pending further investigation.

A person accused of a violation will be notified of the charge and have an opportunity to respond before the University imposes a permanent sanction. Appropriate cases will be referred to the University disciplinary process appropriate to the violator’s status (i.e., faculty member or student) or to appropriate law enforcement authorities.

In addition to sanctions available under applicable law and University policies, the University may impose a temporary or permanent reduction or elimination of access privileges to computing and communication resources.

The University may temporarily suspend any account, whether or not the account user is suspected of any violation, if it is believed to be necessary to preserve the integrity of University computing and communication resources. The University will provide appropriate notice to the account user. Servers and computers that threaten the security of University systems will be removed from the network and allowed to reconnect only with the approval of Information Security Personnel.

In the event of any inconsistency or conflict between this policy and any other terms or conditions students may be subject to, the University reserves the right to resolve such conflicts in its sole discretion.

Violation Examples
This list below contains examples of actions considered to be a violation of this policy. It is not intended to be all-inclusive, nor does it represent all possible violations in a particular circumstance or the applicability of any other law or policy to those facts.

- Unlawful communications, including threats of violence, obscenity, pornography, and harassing communications.
- Unauthorized, anonymous communication is prohibited. (All users are required to cooperate with appropriate University personnel or other authorized personnel when investigating the source of anonymous messages.)
- Misrepresenting or forging the identity of the sender or the source of electronic communication.
- Altering the content of a message originating from another person or computer with intent to deceive.
- Use of University computing and communication resources for private business or commercial activities.
- Fund-raising or advertising on behalf of non-University organizations.
- The unauthorized reselling of University computing and communication resources.
• Unauthorized acquisition attempts to acquire and use the user id or passwords of others.
• Interference with or disruption of the computer or network accounts, services, or equipment of others.
• The intentional propagation of computer “worms” and “viruses,” the sending of electronic chain mail, denial of service attacks, and inappropriate “broadcasting” of messages to large numbers of individuals or hosts.
• Failure to comply with requests from appropriate University officials to discontinue activities that threaten the operation or integrity of computers, systems or networks, or otherwise violate this policy.
• Revealing passwords or otherwise permitting the use by others (by intent or negligence) of personal accounts for computer and network access without authorization is prohibited.
• Altering or attempting to alter files or systems without authorization.
• Unauthorized scanning of networks for security vulnerabilities.
• Attempting to alter any University computing or networking components (including, but not limited to, bridges, routers, and hubs) without approval or beyond one’s level of authorization.
• Negligent or intentional conduct leading to disruption or damage of University data, systems or networks.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
CONSUMER INFORMATION

Introduction

All institutions participating in federal financial aid programs are required to notify enrolled and potential students and current and prospective employees regarding available consumer information. This document provides access to required consumer information. Where applicable, each section lists specific locations where additional information is available. Additionally, the right to request and receive this information in writing is available by contacting the campus director or designee at each University of Phoenix location during regular business hours.

Student Financial Aid Consumer Information

University of Phoenix participates in federal financial aid programs, including:
- Federal Pell Grant
- Academic Competitiveness Grant (ACG)
- National Science and Mathematics Access to Retain Talent (SMART) Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Teacher Education Assistance for College Higher Education (TEACH) Grant
- Iraq and Afghanistan Service Grant (IASG)
- Federal Perkins Loan Program
- Federal Stafford Direct Loan (DL) Program
- Federal Stafford Direct Parent Loan for Undergraduate Student (PLUS)
- Federal Stafford Direct PLUS loan for Graduate and Professional Degree Students

Degree-seeking students who are U.S. citizens or eligible noncitizens enrolled in an eligible academic program can apply for federal financial aid as a means of assisting with financing their education. Some certificate programs may also be eligible for federal financial aid.

Students may also be eligible to receive funding through state grant or scholarship programs in their states where available. Depending on the program, student eligibility may be need-based, non-need-based, credit-based, or dependent on other specific conditions.

Students should contact a local campus or an Online finance advisor at 866-766-0766 for additional information on the financial aid programs available at each campus. A list of campuses is available at www.phoenix.edu/campus_locations.html.

University of Phoenix Family Educational Rights and Privacy Act (FERPA) and Consumer Privacy Policy

University student records are confidential for all schools receiving funding under programs administered by the U.S. Department of Education in accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA). Generally, information pertaining to a student record is not be released to a third party without written or authorized electronic consent via a FERPA Release form, judicial order, or a lawfully issued subpoena.

Access to Education Records

FERPA regulations require the University to comply with students’ rights to inspect and review their academic records by responding within 45 days from the time the University receives a written request to access their records. However, University Services will respond to students’ requests to review their records within 14 days from receipt of the request. Students should submit their request to the University Registrar and specify the record or records the students wish to receive copies of or inspect.

Note: Under FERPA, a student is defined as an individual who is or has attended an educational institution. Students with at least one positive attendance, or Y, posted are considered a student.

Education records are defined as all records, files, documents and materials containing information directly related to a student, and maintained by an educational institution.

The following are not interpreted as education records:
- Personal records maintained by an individual; must be kept in the sole possession of the individual and are not accessible to others.
- Records of the law enforcement unit of an educational institution.
- Personnel records; records related to a person as an employee not used for any other purpose.
- Medical records.
- Records created after the student is no longer a student; alumni records.

Releasable Information - Directory

In compliance with FERPA, a University designated representative without prior written or authorized electronic consent of the student can release the following education record information, provided the student does not have a FERPA Hold Request Form on record.
- Student name
- Home address
- Email address
- Home telephone number
- Year of birth
- Dates of attendance at the University
- Dates of admission to the University
- University programs of study
- University degree completion dates and type of degrees earned
- Current enrollment status (full-time and withdrawn)
- Most recent previous institutions attended and degree(s) earned
- Grade level (freshman, sophomore, junior or senior)
- Photographs
- Honors and awards received
- Participation in officially recognized activities

If a student submits written or authorized electronic requests via a FERPA Hold Request form that directory information not be released to a third party. No information can be released, absent a judicial order or a lawfully issued subpoena. A FERPA Hold Request is valid throughout the student’s enrollment.

University of Phoenix, 2012-2013

CONSUMER INFORMATION
To remove a FERPA Hold Request, the student must complete and submit a FERPA Hold Release form to the Registrar’s Office.
To remove previously authorized parties from record, the student completes and submits a FERPA Rescind form listing all parties to whom information should no longer be released.

Information Not Released - Non-Directory
In compliance with FERPA, the following student information must not be released by the University without prior written or authorized electronic consent of the student, a judicial order, or a lawfully issued subpoena. The student’s signature on the written requests shall be verified before acting upon the request.
- Place of birth*
- Month and day of birth*
- Social Security Number (SSN), Individual Record Number (IRN) or Personal Identification Number (PIN)**
- Grades or grade point averages
- Course schedules
- Employment information including: employer, position held, work address, or work telephone number.
- Academic performance information, such as academic suspension, probation, disqualification, or academic dishonesty charges.
- Admission information including test scores or entry grade point averages.
- Financial and accounting information
- Gender*
- Race*
- Ethnicity*
- Citizenship*
- Country of origin*

*Although this information may be disclosed without prior written consent according to FERPA, the University policy is to maintain the confidentiality of this student information. The University will notify students to provide contact information directly to a third party when this information is requested.
**Student IRNs, SSNs or PINs should not be released to a third party; unless necessary to perform a required task, for example the Student Financial Agreement, FBI request, etc.

Note: Non-directory information can only be released to third parties via telephone or in-person if the student has provided written or authorized electronic consent including a security word. If the student does not complete the release information, including security word, information is not released via telephone or in-person.

Note: All third party inquiries, including parents, require a FERPA Release Form on file unless the third party meets one of the definitions under FERPA allowing without prior written or authorized electronic consent from the student, for example power of attorney, etc.

The University can release information to school officials with legitimate educational interest. The University may release information under the following conditions:
- School officials with legitimate educational interest
- Person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials such as Apollo Group, Nettex Scholarship Management, Aptimus, Protiviti, ACS, ECMC Solutions, National Student Clearinghouse, Paradigm, Inc., Education Sales Management, Double Positive, Hills Consulting Group, SCRP-SAFE, Student Outreach Solutions, i3, Inside Track, Salesforce, Iron Mountain, Intraedge, ITC InfoTech, Outsell Y-Connecting, collection agencies (CS, ARS, States Recovery, FMS, Account Control Technology-ACT, Acante USA, Capital Management Systems, FCBS, NARS Call Center Solutions, National Enterprise Systems, Northland Group, Penta Group, Redline Recovery, Tate and Kirlin, and Windham Professionals), Cerovo and other services.
- Other schools to which a student seeks or intends to enroll
- Specified officials for audit and evaluation purposes
- Appropriate parties in connection with financial aid to a student
- Organizations conducting studies for, or on behalf of, the student
- Accrediting organizations
- To comply with a judicial order or lawfully issued subpoena
- Appropriate officials in cases of health and safety emergencies
- State and local authorities, pursuant to state law
- The U.S. Immigration and Customs Enforcement, in compliance with the Student Exchange Visitor Information System (SEVIS) program
- Under “Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (USA PATRIOT ACT) of 2001,” Section 507 amends FERPA and allows institutions to disclose without consent or knowledge of the student personally identifiable information from the student’s education records to the Attorney General of the United States or to his designee in response to an ex parte order in connection with the investigation or prosecution of terrorism crimes specified in 2332h(g)(5)(B) or an act of domestic or international terrorism as defined in Section 2331 of Title 18 United States Code. Institutions that, in good faith, produce information from education records in compliance with an ex parte order issued under this amendment “shall not be liable to any person for that production.”
- Under the Campus Sex Crime Prevention Act, institutions are permitted to disclose information concerning registered sex offenders who are required to register under the Violent Crime Control & Law Enforcement Act
- The institution may disclose the results of a disciplinary proceeding if the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and he or she has been found to have violated the institution’s policies and procedures with respect to the allegation. Disclosures may only be made if the institution determines the student did violate its policies and such disclosures must only include the name of the student, violation committed and any sanction imposed by the institution against the student.
- The institution must, upon written request, disclose to the alleged victim of a crime of violence, or a non-forcible sex offense, the results of any disciplinary hearing conducted by the institution against the student who is the alleged perpetrator of the crime or offense. If the alleged victim is deceased as a result of the crime or offense, the institution must provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.
- The disclosure is to organizations conducting studies for, or on behalf of, educational agencies or institutions.
- If a student initiates legal action against an educational institution, the institution may disclose to the court, without a court order or subpoena, the student’s education records that are relevant for the institution to defend itself.
• The disclosure is to parents of a dependent student as defined in Section 152 of the Internal Revenue Code of 1986.

A school official has a legitimate educational interest if:
• Performing a task specified in his or her job description or contract
• Performing a task related to a student’s education
• Providing a service or benefit relating to a student or a student’s family
• Representing a school in which a student seeks to enroll
• Disclosing information to federal and state authorities auditing compliance of federal or state support programs
• Disclosing information to state and local officials to whom this information is specifically allowed to be disclosed pursuant to state laws if the allowed disclosure concerns the juvenile justice system and the system’s ability to effectively serve the student whose records are released
• Disclosing information in connection with financial aid; to determine financial aid eligibility; amount of aid, conditions for the aid, or to enforce the terms of conditions of the aid
• Disclosing information to state and local officials to whom this information is specifically allowed to be disclosed pursuant to state laws if the allowed disclosure concerns the juvenile justice system and the system’s ability to effectively serve the student whose records are released
• Disclosing information to accrediting organizations carrying out their function
• Disclosing information to officials of other schools where the student seeks or intends to enroll.

The University can disclose personally identifiable information, directory, and non-directory, without student consent if the disclosure meets one of the following conditions:
• This disclosure is to other school officials whom the University determines have legitimate educational interest.
• The disclosure is to officials of other schools where the student seeks or intends to enroll.
• The disclosure is, subject to requirements of 34 CFR §99.35, to authorized representatives of the Comptroller General of the United States, Secretary, or state and local educational authorities.
• The disclosure is in connection with financial aid the student has applied for or received, if the information is necessary for such purposes as to determine the following:
  • Eligibility for aid
  • Amount of aid
  • Conditions for aid
  • Enforce terms and conditions of the aid

Students requesting demographic or personally identifiable information on other University of Phoenix students for survey or research purposes must contact the Campus Director of Operations and Academic Affairs when approved through the Human Subjects Committee in the Office of the Provost.

The University shall retain a record of student information disclosed to a third party if disclosure does not fall under a FERPA exception. This information is made on University computer system containing dates, names and reasons for release. Students shall have reasonable access to their educational records and may request to review and challenge the contents, which they feel to be inaccurate, misleading, or otherwise in violation of their privacy or other rights. FERPA regulations require the University to comply with the students’ right to inspect and review their academic records by responding within 45 days from the time the University receives a written request to access their records.

However, University Services will respond to student's requests to review their records within 14 days from receipt of the request. Students should submit their request to the University Registrar and specify the record or records they wish to receive copies of or inspect.

**Student Right to Access**

Student wishing to review their educational records shall submit a written request to the Registrar specifying the records to be reviewed. Only records covered by the Family Educational Rights and Privacy Act will be made available.

If necessary, the Registrar's Office will work with a campus designee so that the student can review the record. FERPA regulations require the University to comply with students’ right to inspect and review their academic records by responding within 45 days from the time the University receives a written request to access their records. However, University Services will respond to students’ requests to review their records within 14 days from receipt of the request. Students should submit their request to the University Registrar and specify the record or records they wish to inspect or have a copy.

Students who wish to review their records at a campus location must present photo identification before access to educational records is allowed. For copies of records from the student’s file, students must fill out and submit the Student Request for Information from Files form. Distance education students must submit a written request specifically outlining which record they would like to review. Upon verification of the student’s signature, the records will be released.

A designated University official must be present when a student wishes to review their records at a campus location. This includes documents on file or student history notes that do not reference other student information. Printed files requested by the student and mailed from the Registrar’s Office will not include history notes from any record systems.

**Procedure**

Students alleging their University records are inaccurate or misleading, or who allege violations of FERPA, may present their challenges to the University Registrar.

Students have the right to correct record-keeping errors, but not to seek to overturn administration decisions and assessments. The registrar shall review students’ challenges and, when appropriate, amend students’ records accordingly. Students will be notified within 14 days of the registrar’s actions and based on the action may request a formal hearing.

Student must submit request for amendment in writing to the registrar identifying the specific portion of his or her record he or she wants changed and why he or she believes it’s inaccurate or in violation of his or her privacy. The registrar will respond to the request within 14 days.

If the University denies the request to change the record, the registrar will notify the student of the decision and advise them of their right to challenge the information.

Students’ request for a formal hearing must be made in writing and submitted to the University Services. The registrar will arrange for a hearing, and notify the student within 14 days from the receipt of the request of the date, place and time of the hearing. A hearing panel appointed by the registrar shall represent the University. The panel shall consider all relevant evidence supporting students’ allegations of inaccurate or misleading information in students’ records. Decisions of the panel will be final.
The University will provide a written decision within 14 days of the hearing based on evidence presented at the hearing and will include a summary of evidence presented and the rationale for the decision. If the University decides that the challenged information is not misleading, inaccurate or in violation of the student’s privacy rights, it will notify the student within 14 days of his or her right to place in the record a statement commenting on the challenged information or a statement of reasons for disagreeing with the decision. The statement will be maintained as a part of the student’s record as long as the contested portion is maintained. If the University discloses the contested portion of the record, it must also disclose the statement.

If the University decides the information is inaccurate or in violation of the student’s right of privacy, it will amend the record and notify the student within 14 days, in writing, that the record has been amended.

Students may not inspect and review the following absent a judicial order or legally issued subpoena:
- Confidential letters and recommendations for which they have waived their rights of inspection
- Educational records containing information about more than one student
  - Access is permitted only to that part of the record concerning the inquiring student
- Records of instructional, supervisory, administrative, and certain educational personnel, which are in the possession of the originator
- Records connected with an application to attend the University if the application was denied, for example, a student is enrolled in an undergraduate program and applies for admission to a graduate program but is denied.

University of Phoenix cannot deny students access to their records. Copies do not need to be provided, unless by not providing copies, the students’ rights are denied.

The University may release foreign transcripts to students.

The University reserves the right to deny transcripts or copies of records not required to be made available by FERPA in any of the following situations, absent a judicial order or legally issued subpoena:
- Student has an unpaid financial obligation with the University.
- The University issues transcripts for students who have filed for bankruptcy provided University of Phoenix obtains a copy of the bankruptcy petition filed with the courts.

Students have the right to file a complaint with the FERPA office in Washington, D.C. Inquiries should be directed to:
Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5920

For a period of 25 years following the death of a student, education records of deceased students may only be released to the executor of the estate (written authorization required) or immediate family members (notarized affidavit required) defined as: spouse or legally recognized domestic partner, parents, legal guardians (court document required), children (over the age of 18), and siblings. Beyond this time, requests for these records may be released to anyone after review and approval from the Registrar’s Office.

The Student Verification Process (SVP) is required for inbound and internally transferred phone calls that request the release of or update to any student record information. The Student Verification Process is not required for outbound phone calls provided those calls are to contact numbers in our student academic systems and the student verifies his/her identity. A government issued photo ID or University of Phoenix issued photo ID can be used in place of the SVP for in-person requests.

The University is required to provide students a copy of its FERPA policy annually and upon written request from the student. Potential students can review the University FERPA Policy within this document, http://www.phoenix.edu/about_us/regulatory/consumer-information.html.

Current students can also obtain a copy of the FERPA policy in their student catalog at https://ecampus.phoenix.edu/portal/public/login.aspx.

Solomon Act

University of Phoenix complies with the Solomon Act, which provides certain information to military recruiters. Information that may be released includes:
- Student name
- Home address
- Email address*
- Telephone listing
- Age (Date of Birth)
- Place of birth*
- Level of education
- Academic major
- Degrees received*
- Most recent educational institution attended*

*This information may be released only when available.

Procedure

1. Request is routed from campus or corporate department to the Apollo Ethics & Compliance Department at the following address:
   University of Phoenix
   Apollo Ethics & Compliance Department
   4025 S. Riverpoint Parkway Mail Stop: CF-L302
   Phoenix, AZ 85040
   Fax: (480) 643-1015

2. Within 15 days of a request by the recruiter, the Apollo Ethics & Compliance Department will make contact with the requestor and discuss the necessary information requested, our method for determining costs, and our basis for concluding that such charges are reasonable and customary.

3. The Apollo Ethics & Compliance Department routes specific report details to the Office of the Registrar.

4. The Office of the Registrar processes request of information and routes report back to the Apollo Ethics & Compliance Department within 72 business hours.

5. The Apollo Ethics & Compliance Department sends the information to the requestor.

6. Documentation will be made and kept verifying each occurrence of report fulfillment.
Privacy Policy

Our Privacy Philosophy

University of Phoenix is committed to protecting your privacy when you visit our Site(s). We want you to know what Information we collect, how we use it, and how you can request that this Information be updated or corrected.

Certain University Site(s) may be subject to additional privacy policies (collectively “Additional Policies”). In the event of any direct conflict between any Additional Policies and this policy, the Additional Policies shall control. The University reserves the right to resolve any conflicts between policies in its sole discretion.

The University reserves the right to amend or otherwise modify this Privacy Policy at any time, visit http://www.phoenix.edu/copyright-legal/privacy_policy.html periodically to check for updates.

Scope

Our Privacy Policy covers any visitor to our Site(s), including current and potential students. This policy applies to both online and offline collection, storage, processing, and transfer of Personal Information.

Definitions

As used in this Privacy Policy, the following terms have the following meanings:

- “Business Associates” means third party service providers which Apollo Group, Inc. or the University may contract with to provide services on their behalf including those related to the Site(s) or for transactions occurring on the Site(s) including, but not limited to Social Networking, hosting, web analytics, lead generation, business or financial services.
- “Educational Partners” means our parent, the Apollo Group, Inc., and its subsidiaries including educational companies or institutions that Apollo Group, Inc. or its subsidiaries may be providing educational or other related services to under contract.
- “Financial Information” means specific Personal Information of a financial nature such as your credit card number.
- “Information” means any Information collected and includes “Personal Information”, “Financial Information”, “Web Analytical Information” or any other Information collected from you through our site(s).
- “Marketing Information” means your Web Analytical Information and your Personal Information such as your name, address, email address, and telephone number that the University collects uses and discloses for the marketing and promotional purposes as disclosed in this Privacy Policy.
- “Personal Information” means Information that may be used, alone or in combination, to identify a specific individual and includes Financial Information.
- “Site” or “Sites,” means the University website located at http://www.phoenix.edu/, as well as any other University-controlled or authorized Sites (including, without limitation, any business associate sites), regardless of domain name or IP address.
- “Social Network”, means various Internet communication technologies provided on Sites that facilitate conversation and interaction between people online and includes, but is not limited to, blogs, discussion forums, wikis, chat sessions, news groups, etc.
- ““Social Network Content” (or “SNC”) means user-generated content you consent to share via a Social Network and includes, but is not limited to, Personal Information, including digital sounds and pictures that you upload to a Social Network. It also includes your Personal Information that may be displayed on other users’ Social Network pages.
- “University”, “we”, “us”, and “our” refer to the University of Phoenix and its parent company Apollo Group, Inc.
- “Unrelated Entities” means third parties that are not Educational Partners and who are not providing services to Apollo Group, Inc. or University of Phoenix as Business Associates.
- “Web Analytical Information” means internet generated Information we collect when you visit our Sites. This Information may be linked with marketing and Personal Information. When linked with other Information identifying you personally, either alone or in combination with other Information, then such Information also will be considered Personal Information.

Information We Collect

We collect various types of Information from you through our Sites, when we talk to you on the phone and in person with University representatives. Some of this Information is collected automatically through various web and internet technologies including Social Networking tools used by the University. Other Information is collected when you provide it in response to an advertisement, a survey, a request for Information, when you register for our educational or other services, or when you set up a Social Network profile.

Information Collected Automatically

Each time you visit one of our Sites, Web Analytical Information is automatically gathered. In general, this Information does not identify you personally. Examples of Web Analytical Information include, but are not limited to:

- IP address
- Collection Date
- Publisher Name
- Connection Speed
- Day of Week Time of Day (hour)
- Language settings
- Country, State, DMA, City (relating to IP address, if available)
- Domain (.com, .net, .mil, .org, .edu, etc.)

Our collection of Web Analytical Information lets us see how users are finding, and navigating our Sites, and it tells us which pages users visited most often so we can make our Sites more useful and relevant. This Information may be linked with personal Information to accomplish the purposes described in this Privacy Policy.

Information You Provide to Us

In addition to the Web Analytical Information automatically collected when you visit our Sites, the University also collects, uses and discloses Personal Information that you provide to us voluntarily when you respond to an advertisement or survey, register for our educational or other services, order merchandise or services from us, set up a Social Network profile, request Information regarding one of our educational programs, etc. While the exact nature of the Personal Information may vary depending on the type of response or service requested, the following is a non-exclusive list of the types of Information that may be collected to the extent it is necessary and applicable for the intended purposes:

- First, Middle and Last Name, Previous Names
- Street Address, City, State, Country, Postal Code
How We Use This Information

Marketing Information
We use marketing Information to help us better plan our Sites and services to meet your needs; to measure and improve our Site(s) and services and features, to communicate with you by email, postal mail, telephone, cellular/mobile phone, PDA devices, and/or on applications for mobile phones such as iPhone or Blackberry about products or services that may be of interest to you, to provide you with customer support, to prevent potentially illegal activities (including illegal downloading of copyrighted materials in accordance with our Copyright Infringement policy), and to enforce our Terms of Use. We also use a variety of technological systems to detect and address anomalous activity and to screen content to prevent certain abuses such as spam. These efforts may on occasion result in permanent suspension or termination of Site functionality for some users.

Personal Information
The University recognizes that by choosing to provide us with your Personal Information, you are demonstrating your trust in us and we take that trust seriously. We will not sell, rent or lease your Personal Information to others.

We may collect, use and disclose Personal Information for the following purposes:
- to determine your admissibility and to register you for your selected educational programs
- to provide requested products and services
- to respond to your inquiries
- to administer promotions to which you have indicated an interest
- for our internal marketing purposes, which includes, but is not limited to, sending you material about products, services, updates, etc. that we think may be of interest to you
- for fostering communication and collaboration among members of the University community through Social Networks
- for sharing with our Educational Partners who may contact you with respect to their educational or marketing services;
- for sharing with our Educational Partners or Business Associates who are performing services on our behalf
- to analyze how Sites and services are being accessed and used;
- to improve Site and service performance and delivery
- to analyze risk and business results
- to obtain payment for services that we provide to you
- to maintain business records for reasonable periods
- to provide to Educational Partners, Business Associates or Unrelated Entities in connection with the contemplated or actual reorganization, merger, acquisition, financing, securitization, insuring, sale or other disposal of all or part of our business or assets, including for the purposes of determining whether to proceed with such transaction or fulfilling any records or other reporting requirements to such parties. In the event of any actual reorganization, merger, or acquisition such Information may be transferred as part of the transaction to the acquirer
- and/or as may be required or permitted by legal, regulatory, industry self-regulatory, insurance, audit, or security requirements applicable to the University, our Educational Partners, or our Business Associates.

Express Consent to Receive Pre-Recorded Voice Messages, Text Messages and Calls Using an Autodialer
In connection with the uses set forth above, we may use an automatic telephone dialing system, artificial or prerecorded voice messages, or text messages to provide you with various communications. Further, when you provide us with a cellular, wireless, or mobile telephone number as your contact number, you agree that you are providing us with your express consent to receive calls using an automated dialing system, prerecorded voice messages or text messages related to your enrollment. If you do not wish to receive these updates on your cellular or mobile phone, please provide us with a LAN-based telephone number.

Financial Information
Your Financial Information will be used to conclude your registration or other transaction you have initiated with us. It will not be sold, rented, or otherwise transferred to an educational partner, business associate or unrelated entity outside of this purpose, except in the case of a reorganization, merger or acquisition of our shares or assets or those of our parent company Apollo Group, Inc.

Student Educational Records
If you are or subsequently become a student at the University, your educational records are subject to the U.S. federal Family Educational Rights and Privacy Act (FERPA), state laws and the University policies. Students have the right to limit access to FERPA-defined directory Information about them. To obtain a copy of the University FERPA policy, go to http://www.phoenix.edu/about_us/regulatory/consumer-information.html. You may also contact us via one of the below methods:
Opt-Out

Location of Information Processing

Because we operate in multiple jurisdictions, including the United States and Canada, some Educational Partners and Business Associates may be located outside of the jurisdiction in which you reside. In such cases, your Personal Information may be collected, used, disclosed, stored and processed in these other jurisdictions for the purposes described in this Privacy Policy. The data protection and other laws of the United States and other countries might differ from your jurisdiction. While we require our Educational Partners and Business Associates to use your Personal Information only to perform the services we have retained them to provide and take reasonable steps to ensure that your privacy is protected in accordance with applicable laws. Please be advised that, by using our Sites, your Information may be transferred across borders and will be subject to the laws of those other jurisdictions, including lawful requirements to disclose Personal Information to government authorities.

Opt-Out

You may opt-out of our collection, use and disclosure of your Personal Information at any time, subject to contractual, academic, legal or technical restrictions and reasonable notice. Note that if you opt-out of certain uses of your Personal Information, we may no longer be able to provide certain products or services. You may not be permitted to opt-out to certain necessary collection, uses and disclosures, for example, but not limited to, educational announcements, maintaining reasonable academic, business and transaction records and disclosures to government entities as required for us to comply with applicable laws. To opt-out please email Ethics.Compliance@apollogrp.edu.

You can choose to no longer receive marketing communications from us and you may express your choice where indicated on the applicable email or other communication or visit http://awhpsmta01.universityofphoenix.com/webdocs/UnsubscribeEmail.html. Please note, however, that such a request will only remove you from our list and the list of any Business Associate performing services on our behalf. We are not responsible for the use any other party may make of the Information once it has been transferred in accordance with this Policy and you will need to contact such entity to have your Information removed from their database.

You may change various user settings related to sharing your Personal Information contained in any user profile you set up as part of Social Network activities furnished by us, subject to contractual, academic, legal or technical restrictions and reasonable notice. Note that your withdrawal from Social Network activities might prevent us from providing you with certain products or services. Students who desire to prevent release of their directory and educational record information in accordance with FERPA may place a FERPA Hold on their academic file. Current students can obtain a copy of the FERPA policy at https://ecampus.phoenix.edu/portal/portal/public/login.aspx.

Potential students can review the University FERPA Policy within this document.

Our Security Measures

We will take commercially reasonable measures to secure and store your Information to protect against the loss, misuse, and alteration of the Information under our control. We utilize industry standard security measures when accepting your credit card Information during the online ordering process, as well as whenever we ask you to login to any of our Site(s).

Unfortunately, no data transmission over the internet can be guaranteed to be completely secure. As a result, although we will utilize such measures, we do not guarantee you against the loss, misuse, or alteration of Information under our control, and you provide Information to us at your own risk. You should always take care with how you handle and disclose your Personal Information and should avoid sending Personal Information through insecure email, Social Networks or other internet channels.

Monitoring of Communications

We may monitor and retain all incoming and outgoing communications for training of our representatives and for quality assurance purposes. To the extent such communications are selected, they are only retained as long as necessary to adequately discharge these purposes, unless a specific communication needs to be retained for legal reasons. If you prefer that your communications not be retained for any reason, please advise your representative.

Internet Technologies Used

Cookies, web beacons and other relevant internet technologies are used on our Sites to allow us to accomplish the uses set out above as well as to deliver Sites messaging and to keep track of your Information. These small pieces of program code reside in your computer and browser and can be removed. If you desire to remove such technologies you may do so, but this may render our Sites unusable to you. You can opt out of cookies or the other internet technologies used by disabling these features in your browser program. Consult your browser’s Help menu for assistance in changing cookie settings or removing cookie files.

Children’s Privacy

We are very sensitive to the issue of children’s privacy. Our Sites are neither developed for, nor directed at children under 13. If you believe your child has provided us with Personal Information, or registered at one of our Sites and would like to have this Information removed, please visit http://awhpsmta01.universityofphoenix.com/webdocs/UnsubscribeEmail.html.

Site Hosting and Links from Our Sites to Other Websites

Some of our Sites may be hosted by our Business Associates or contain links to external websites hosted by Educational Partners and Unrelated Entities. When you access these Sites or external websites, the providers of the websites may have access to your Personal Information and may apply their own policies on how your Personal Information is used. Please make sure to read the policies of any sites you visit on the internet carefully. Please be aware that we are not responsible for the privacy practices or the content of any sites or external websites that we do not control directly and the collection, use and disclosure of Information about you by Educational Partners, Business Associates and Unrelated Entities will be subject to the policies applicable on those other sites or external websites.
Privacy Policy Changes
University of Phoenix may update this Privacy Policy or revise it from time to time. If you are concerned about how your Personal Information is used or disclosed you should contact us as described below or check back at this Site periodically to obtain a current copy of this Privacy Policy. We urge you to review this Privacy Policy frequently to obtain the current version. Your continued provision of Personal Information or use of our services following any changes to this Privacy Policy constitutes your acceptance of such changes. If we intend to use Information that personally identifies you in a manner materially different from what we stated at the time it was collected, we will attempt to notify you at least 30 days in advance. You will be given a choice as to whether or not previously provided Information may be used in a new way.

FEDERAL, STATE AND INSTITUTIONAL FINANCIAL AID PROGRAMS

General Requirements
General eligibility requirements for financial aid are as follows:
- Student must be a U.S. citizen or eligible noncitizen
- Student must be enrolled in an eligible program
- Student cannot also be enrolled in elementary or secondary school
- Student must have a high school diploma or general educational development (GED) credential
- Student must make satisfactory academic progress (SAP)
- Student must meet enrollment status requirements
- Student must have resolved any drug conviction issue
- Student must have timely registered for Selective Service, if required by law.
- Submit a current award year Free Application for Federal Student Aid (FAFSA)

For additional eligibility requirements go to http://www.phoenix.edu/tuition_and_financial_options/financial_options/financial-aid-options-non-citizens.html

Federal Grant Programs

Federal Pell Grant
A Federal Pell Grant is awarded based on financial need for each student. Need is primarily based on adjusted gross income (AGI) and family size. Other factors such as assets and the number of family members in college are also taken into account. The exact eligibility amount is calculated when the University receives and processes an Institutional Student Information Record (ISIR) from the U.S. Department of Education.

Pell Grants are awarded only to undergraduate students who have not earned a bachelor's or professional degree. The maximum Pell Grant for the 2011-2012 award year is $5,550.

Survivors of Servicemembers Grant
Effective for the 2009-2010 award year, students who have a Pell Grant eligible expected family contribution (EFC) may be eligible for the Survivors of Servicemembers Grant. Student will be treated as a student who has a zero EFC and will be awarded the maximum Federal Pell Grant scheduled award if the following criteria apply and is otherwise eligible:
- Parent or guardian died as a result of military service in Iraq or Afghanistan after September 11, 2001

How to Access Your Information and Contact Us
If you want access to or wish to update any of your Personal Information or have any questions about our privacy practices, please contact our Chief Ethics and Compliance Officer at Ethics.Compliance@apollogrp.edu or Apollo Group, Inc Attn: Chief Ethics & Compliance Officer 4025 S. Riverpoint Parkway Phoenix, AZ 85040 USA

Iraq and Afghanistan Service Grant
Effective for the 2010-2011 award year, students who do not have a Pell Grant eligible expected family contribution (EFC) may be eligible for the Iraq and Afghanistan Service Grant (IASG), equal to the maximum Federal Pell Grant award for the award year, if the following criteria apply and is otherwise eligible:
- Parent or guardian died as a result of military service in Iraq or Afghanistan after September 11, 2001
- Student must be less than 24 years old or was enrolled in a postsecondary program, at least part time, at the time of the parent or guardian’s death

The amount of the IASG award is the same as the maximum Pell Grant for the award year, adjusted for enrollment status and cost of attendance (COA). All other federal financial aid will be awarded based on the student’s calculated EFC of the student.

Federal Supplemental Educational Opportunity Grant
The Federal Supplemental Educational Opportunity Grant (FSEOG) is awarded to undergraduates having exceptional financial need, with priority given to Federal Pell Grant recipients with the lowest expected family contribution (EFC). The maximum annual award for each student will be $500. The minimum FSEOG amount is $100. This amount is disbursed equally in two payment periods within the award year. Students will be awarded FSEOG based on the availability of funds at the University. The University cannot guarantee every eligible student will receive a FSEOG award.

Teacher Education Assistance College of Higher Education Grant
The Teacher Education Assistance College of Higher Education (TEACH) Grant Program is a non-need based program that provides up to $4,000 per year to students who meet the following criteria:
- Enrolled in an eligible TEACH program at University
- Have a cumulative 3.25 GPA
- Sign an Agreement to Serve (ATS) and complete all counseling requirements
Grant recipients must agree to teach for at least four years within eight years of finishing a teacher preparation program and to teach high-need subjects in designated schools that serve low-income students. Recipients who do not complete the four-year teaching obligation will have the grant converted to an unsubsidized Direct Loan that must be repaid with interest from the date the loan was issued.

### Federal Perkins Loan Programs

#### Federal Perkins Loan

The Federal Perkins Loan is a deferred payment, deferred interest loan, administered by the University, awarded to undergraduate, graduate and professional students with exceptional financial need. The maximum annual award amount for each student is $4,000. This amount is disbursed equally in two payment periods within the award year. Students are awarded based on availability of funds at the University. The University cannot guarantee every eligible student will receive a Perkins loan award. This loan is made with government funds, with a share contributed by the University.

**Terms and Conditions**

Students who receive a Federal Perkins Loan are subject to the terms and conditions disclosed on the Federal Perkins Loan Master Promissory Note (MPN).

An interest rate of 5 percent per annum begins to accrue and repayment begins nine months after the borrower graduates or withdraws from the University. The monthly payment amount depends on the amount of debt and length of repayment period. The minimum monthly payment is $40. This loan must be repaid to the University.

A Perkins Loan borrower is not charged any fees. However, after repayment begins, if a payment is skipped, late, or less than a full payment, a late charge can apply. If the borrower continues to not make payments as required, the borrower will pay collection costs. Under certain conditions, borrower can receive a deferment or forbearance on loan(s), as long as the loan is not in default. Further information is presented during the required Perkins Loan entrance and exit counseling process.

#### Federal Stafford Direct Parent Loan Program (DL)

Loans made through this program are referred to as Direct Loans (DL). Eligible students and parents borrow directly from the U.S. Department of Education. Direct Loans include subsidized and unsubsidized loans, PLUS Loans, and Consolidation Loans. These loans are paid directly to the U.S. Department of Education.

A subsidized loan is awarded based on financial need. Borrower will not be charged any interest before repayment begins or during deferment periods. The federal government subsidizes the interest during these periods.

An unsubsidized loan is not awarded based on need. Borrower will be charged interest from the time the loan is disbursed until it is paid in full. If interest is allowed to accrue while student is in school or during other periods of non-payment, it will be added to the principal amount and additional interest will be based on that higher amount. Borrower can choose to pay the interest as it accrues.

The amounts borrowed depend on student grade level and dependency status at the University.

A student whose parent cannot obtain a parent loan for undergraduate student (PLUS) loan is allowed to borrow additional unsubsidized federal Direct Stafford amounts. Student dependency status will be determined based on answers to questions on the FAFSA.

**Terms and Conditions**

For more information on loan terms and conditions, refer to the Borrower’s Rights and Responsibilities section of the Federal Direct Stafford/Ford Loan MPN.

After a student submits a completed MPN, an award letter is sent from the University and a disclosure statement from the lender informing the student of the types and amount of student loans awarded for the loan period. When the funds are received, the University confirms eligibility and current registered courses. Any changes and/or breaks in attendance or failure to start class as scheduled may prevent federal financial aid funds from being disbursed.

Loans are processed for an academic year, which is a minimum of 24 credits and 30 weeks of instructional time. A student can reapply for subsequent loans after successfully completing these requirements. The University will disburse federal financial aid funds in at least two disbursements. A student is eligible for the first disbursement at the beginning of the payment period and the second disbursement occurs after the midpoint of the academic year. To meet eligibility standards for second and subsequent loan disbursements, the student must successfully complete the previous credits and meet the calendar and instructional week midpoint of the loan period, as well as maintain satisfactory academic progress (AP) according to University policy. Schedule changes and/or lack of attendance may delay the timing of scheduled disbursements.

#### Federal Stafford Direct Parent Loan for Undergraduate Student

If a student is a dependent undergraduate student, a parent may apply for a Federal Stafford Direct Parent Loan for Undergraduate Student (PLUS) loan to assist with the educational expenses of a student. The application process includes completion and submission of a PLUS loan application by the parent(s). The application process is completed through the Federal Stafford Direct Loan Program.

This loan is based on credit worthiness as determined by the U.S. Department of Education.

The yearly limit is equal to the cost of attendance (COA) minus any other financial aid received. Interest is charged on the loan from the date first disbursement is made until the loan is paid in full. The parent borrower has the option to begin repayment either within 60 days from date loan is fully disbursed or wait six months after the dependent student (on whose behalf the parent borrowed) ceases to be enrolled at least half-time basis.

Parents have the option of deferring repayment on Parent PLUS loans while the undergraduate student (on whose behalf the parent borrowed) is in school and for a six-month grace period after the student graduates or drops below full-time enrollment. This change is effective for Parent PLUS loans first disbursed on or after July 1, 2008. Payments can also be deferred if the parent(s) themselves are enrolled in college. The parent(s) will need to submit an application for an in-school deferment.

Before the deferment option on the Parent PLUS loan was added on July 1, 2008, some lenders allowed parents to defer payments on the PLUS loan while the student is in school by granting one of several types of forbearances. In each case the forbearance allows a full or partial suspension of payments for up to one year at a time. The discretionary forbearance can be renewed each year; the economic hardship deferment and excess debt burden forbearances each have a three-year time limit. The deferments and forbearances are still available for all Parent PLUS loans.
Note: Interest on the Parent PLUS loan is not subsidized and continues to accrue while deferred or in forbearance and is capitalized when the loan enters repayment.

**Terms and Conditions**

Students whose parents receive a PLUS loan are subject to the terms and conditions disclosed on the Federal Stafford Direct PLUS Loan Application and MPN.

**Federal Stafford Direct PLUS Loan Program**

Graduate and professional students are now eligible to borrow under the Federal Stafford Direct Loan Program. Graduate and professional students can borrow an amount up to the cost of attendance (COA) minus other financial assistance. The terms and conditions applicable to parent PLUS loans also apply to graduate PLUS loans.

Applicants are required to complete the Free Application for Federal Student Aid (FAFSA) and are given an opportunity to request the maximum eligibility under the Federal Stafford Direct Loan Program before applying for a graduate PLUS loan.

**Terms and Conditions**

Students who receive a graduate PLUS loan are subject to the terms and conditions disclosed on the Federal Stafford Direct PLUS Loan Application and MPN.

**Education Loan Interest Rates**

All Direct Loan and FFEL Program loans with a first disbursement date that is on or after July 1, 2006 have fixed interest rates that will remain the same throughout the life of the loan. Loans that were first disbursed before July 1, 2006 have variable interest rates that are adjusted each year on July 1. For subsidized and unsubsidized loans first disbursed before July 1, 2006, the variable interest rate will never be more than 8.25%. For PLUS loans first disbursed before July 1, 2006, the variable interest rate will never be more than 9.00%.

**Fixed Rates:**

Direct Loan and FFEL Program Loans First Disbursed on/after July 1, 2006

Note: Effective July 1, 2010, the only loans that can be made are Direct Loans.

Notes: Interest rates on Stafford and PLUS loans first disbursed before July 1, 1998 are calculated using different statutory formulas, percentage add-ons, or both. Generally, interest rates on Consolidation Loans are fixed rates calculated based on the weighted average of the loans being consolidated rounded up to the next higher 1/8 of one percent, not to exceed 8.25 percent.

To access information on your federal loans, go to www.nslds.ed.gov.

Interest rate on a borrower’s loan may be changed to 6.0 percent during the borrower’s active duty military service. Additionally, this law applies to borrowers in military service as of August 14, 2008. Borrower must contact the creditor, or loan holder, in writing to request the interest rate adjustment and provide a copy of the borrower’s military orders.

**Loan Payment Calculator**

Loan Payment Calculators may be used by students or potential students to calculate monthly payments under the standard and extended repayment plans, [www.finaid.org/calculators/loanpayments.phtml](http://www.finaid.org/calculators/loanpayments.phtml) or [www2.ed.gov/offices/OSFAP/DirectLoan/calc.html](http://www2.ed.gov/offices/OSFAP/DirectLoan/calc.html).

**Federal Financial Aid Programs**

**Entrance Counseling**

The University ensures loan entrance counseling is conducted online at the U.S. Department of Education website, [https://studentloans.gov/myDirectLoan/index.action](https://studentloans.gov/myDirectLoan/index.action), before a borrower takes out a loan. Entrance counseling generally includes the following:

- An explanation of the use of a master promissory note (MPN)
- Importance of repayment obligation
- Description of consequences of default
- Sample repayment schedules
- Information in reference to a borrower’s rights and responsibilities
- Other terms and conditions

**Exit Counseling**

The University ensures loan exit counseling is conducted online at the U.S. Department of Education National Student Loan Database (NSLDS) website, [http://www.nslds.ed.gov/nsls_SA/](http://www.nslds.ed.gov/nsls_SA/), within 15 days of completion of a program or withdrawal from the University. Exit counseling generally includes the following:

- An explanation of the use of a MPN
- Importance of repayment obligation
- Description of consequences of default
- Sample repayment schedules
- Information in reference to a borrower’s rights and responsibilities
- Other terms and conditions

**Perkins Loan Counseling**

The University ensures Perkins loan counseling is conducted online at the Mapping Your Future website, [http://mappingyourfuture.org/oslc/](http://mappingyourfuture.org/oslc/). Perkins loan counseling generally includes the following:

- Importance of repayment obligation
- Explanation of repayment terms
- Description of consequences of default
- Sample repayment schedules
- Information in reference to a borrower’s rights and responsibilities
- Other terms and conditions

**TEACH Grant Counseling**

The University ensures initial and subsequent Teacher Education Assistance College of Higher Education (TEACH) Grant counseling is conducted online at the TEACH Grant website, [https://teach-ats.ed.gov/ats/index.action](https://teach-ats.ed.gov/ats/index.action). TEACH Grant counseling generally includes the following:

- TEACH Grant Program and service obligations
- Information in reference to a borrower’s rights and responsibilities
- Other terms and conditions

**Student Financial Aid Rights and Responsibilities**

Students receiving federal financial aid have varying rights and responsibilities. In accordance with the Borrower’s Rights and Responsibilities Statement, [http://www.direct.ed.gov/pubs/dlrights.pdf](http://www.direct.ed.gov/pubs/dlrights.pdf), attached to the Master Promissory Note (MPN) the student has the right to the following:

- Written information on loan obligations and information on rights and responsibilities as a borrower
- A copy of the MPN, either before or at the time loan is disbursed
- A grace period and an explanation of what this means
- Notification, if in grace period or repayment, no later than 45 days after a lender assigns, sells or transfers the loan to another lender
- A disclosure statement, received before repayment begins, that includes information about interest rates, fees, the balance owed, and a loan repayment schedule
- Deferment or forbearance of repayment for certain defined periods, if qualified and requested
- Prepayment of loan in whole or in part anytime without an early-repayment penalty
- Documentation that loan is paid in full

In accordance with the Borrower’s Rights and Responsibilities Statement, [http://www.direct.ed.gov/pubs/dlrights.pdf](http://www.direct.ed.gov/pubs/dlrights.pdf), attached to the Master Promissory Note (MPN) the student has the responsibility for the following:

- Completing exit counseling before leaving school
- Repaying loan according to repayment schedule even if not completed academic program, dissatisfied with the education received, or unable to find employment after graduation.
- Notifying lender or loan servicer if:
  - Move or change my address
  - Change telephone number
  - Change name
  - Change SSN
  - Change employers, employer’s address or telephone number changes
- Make monthly payments on loan after grace period ends, unless a deferment or forbearance
- Notifying lender or loan servicer of anything that might later change eligibility for an existing deferment or forbearance

**Student Loan Code of Conduct**

The University protects students with established loan policies. University of Phoenix follows federal regulations that govern student loan requirements.
The Student Loan Code of Conduct creates and maintains uniform student loan practices that focus on the best interest of the student borrowers. It also manages relationships between school employees, learning institutions, lender advisory board members and student loan organizations.

University of Phoenix encourages students to review the Student Loan Code of Conduct at http://cdn-static.phoenix.edu/content/dam/altcloud/doc/oduction/Student-Loan-Code-of-Con
duct.pdf, to learn about loan regulations.

Students should contact the University by email at PLL@phoenix.edu with any questions about the information in this document.

**Statement of Educational Purpose**

The parent or student signing a Free Application for Federal Student Aid (FAPSA) certifies that (1) will use federal and/or state student financial aid only to pay the cost of attending an institution of higher education, (2) are not in default on a federal student loan or have made satisfactory arrangements to repay it, (3) do not owe money back on a federal student grant or have made satisfactory arrangements to repay it, (4) will notify your college if you default on a federal student loan and (5) will not receive a Federal Pell Grant from more than one college for the same period of time.

The parent or student, signing the Free Application for Federal Student Aid (FAPSA) agrees, if asked, to provide information that will verify the accuracy of your completed form. This information may include U.S. or state income tax forms that you filed or are required to file. Also, you certify that you understand that the Secretary of Education has the authority to verify information reported on this application with the Internal Revenue Service and other federal agencies. If you sign any document related to the federal student aid programs electronically using a Personal Identification Number (PIN), you certify that you are the person identified by the PIN and have not disclosed that PIN to anyone else. If you purposely give false or misleading information, you may be fined up to $20,000, sent to prison, or both.

**Refrerrals to the Office of Inspector General**

University of Phoenix is required by law to make referrals to the Office of Inspector General of any cases of suspected fraud and abuse involving the federal financial aid programs.

**State Grants**

The actual amount of state grants awarded to any student is contingent on availability of funds. The University cannot guarantee any funding from the state grant sources listed as the list is subject to change without notice based upon changes in state law or regulation and/or University participation. Where a work or other requirement is included in order to preclude the conversion of a scholarship or grant to a loan, the University makes no representation or warranty as to whether a graduate will be able to obtain such employment or fulfill such other requirement.

**Institutional Grants**

University of Phoenix is committed to providing financial assistance opportunities through institutional grant programs for potential and current students.

**Thinking Ahead Grant**

The Thinking Ahead Grant is directed toward new students with an expected family contribution (EFC) of $12,500 or less and has a minimum unmet need of $200. The grant award is applied to unmet direct costs, not to exceed $1,500 per award year, of a bachelor’s degree program for students maintaining continuous enrollment. Eligibility is reviewed and determined after federal financial aid certification.

**Institutional Scholarships**

The Center for Scholarship Excellence (CSE) is a department of University of Phoenix. The CSE is committed to assisting with financial support through institutional and external scholarship programs. The CSE encourages students to borrow responsibly as they work towards their educational goals.

University of Phoenix has a comprehensive scholarship website at http://phoenix.edu/scholarships to meet the needs of our students. This website features scholarships offered by University of Phoenix, scholarship resources, tips, suggestions, articles, external scholarship search engine and much more.

Institutional scholarships are just one type of scholarship. University of Phoenix funds institutional scholarships. The CSE creates and manages them. The University often partners with nonprofit organizations to promote scholarship programs. These scholarships are available to potential students, current students or alumni.

Private outside entities fund external scholarships. Many are available to University of Phoenix students and the general population. Depending on the external scholarship requirements, student eligibility may be need-based, merit-based or credit-based. The CSE will evaluate external scholarship programs, determine applicability to the University student populations, and will communicate these opportunities to students and campuses.

The website, http://www.phoenix.edu/tuition_and_financial_options/scholarships/institutional-scholarships.html, is updated regularly for institutional scholarships, qualifications, and selection criteria specific to University of Phoenix current and potential students as opportunities become available.

**Private Student Loans**

Private student loans are available to students who are not eligible for federal financial aid loans or who need assistance beyond their financial aid eligibility. These loans are made privately through banks and other financial institutions and are subject to a credit check and individual lender terms. Eligibility is determined by the lender and amounts are limited to the cost of education minus other aid. These loans are not subsidized or guaranteed by the federal government. Private loans should only be considered after applying for federal financial aid. Contact the lender for specific terms and conditions.

To assist with finding the right lender for a private loan, visit the Student Lending Analytics website, www.studentlendinganalytics.com/alternative_loan_options.html.

Student Lending Analytics has developed a list of private loan options to serve schools and their students who need a focused resource for help in finding a private student loan.

A student may choose any eligible lender; the University will process the request accordingly.
Application Process

The following documentation is required:

- MyApply® application process at https://myapply.phoenix.edu/Apply/Login.aspx
- Student Financial Agreement Form
- Authorization to Apply to Future Charges form if, and only if, a student chooses this option

Federal Financial Aid Application Process

A student can apply for federal financial aid after submitting an application for admission to the local campus or via MyApply® and registering for courses in an eligible degree program. During the application process, the following forms may be completed for federal financial aid grants and loans:

- University of Phoenix Financial Aid Application
- Current award year Free Application for Federal Student Aid (FAFSA)
- Federal Stafford Direct Loan Master Promissory Note (MPN)
- Entrance Counseling

The average processing time for financial aid awards is 90 days. The University highly recommends using the online financial aid application process at https://faw.phoenix.edu. This access allows a student to complete and electronically sign required student financial aid documents, including the FAFSA.

Students qualifying for financial aid may apply for a new award each academic year (the period of time a student successfully completes a minimum of 24 credit hours and 30 weeks of instructional time). Therefore, the student may have eligibility assessed for grants or loans several times during a program of study. A student should reapply for financial aid prior to the start of each new academic year.

Additional documents may be requested by the University to complete the application process. A student will receive written notification from the University of verification requirements and timelines for completion of the process.

For more information on federal financial aid eligibility go to http://www.phoenix.edu/tuition_and_financial_options/financial_options/financial-aid-options-non-citizens.html

Reapplication Process

The University notifies students when new award year paperwork is required, provided the student is considered enrolled. Returning students may be proactive and submit completed paperwork.

Cancellation of Federal Financial Aid

The student or parent must inform the University if all or a portion of federal financial aid funds are to be canceled. The student or parent must submit a signed and dated statement; or complete a Financial Aid Cancellation form; or complete Financial Aid Change form, located on the financial aid website (FAW), https://faw.phoenix.edu/.

The University may return the loan funds, cancel the loan, or do both, provided that the cancellation request is received within the required timeframes. If the University receives a student or parent request for cancellation after these dates, the University may, but is not required to, honor the request. Regardless of when the request is received, the University informs the student or parent in writing of the outcome of the request.

When processing a loan cancellation request, the University must return the funds (if received) and/or cancel the loan, or do both as appropriate. The University is not responsible for returning any portion of a loan that was disbursed to a student or parent directly before the request for cancellation was received.

Verification

A federal financial aid student may be chosen to participate in the verification process by the U.S. Department of Education Central Processing System, following procedures established by federal regulations. Central Processing System prints an asterisk next to the expected family contribution (EFC) on the ISIR, Student Aid Report (SAR), or SAR Acknowledgement to identify students selected for verification.

If a student is selected for verification, the University will request a copy of tax returns signed by the student and, if applicable, a student’s parent or parents or spouse, and a verification worksheet. Additional documents may be requested by the University to complete the application process. A student will receive written notification from the University of verification requirements and timelines for completion of the process.

Failure to comply with request for verification documents can result in disqualification for federal financial aid.

Professional Judgment

The University may exercise discretion to accommodate special circumstances, with respect to some aspects of eligibility, using Professional Judgment. Professional judgment allows the University to treat a student individually when the student has special circumstances not sufficiently addressed by standard procedures. The University uses professional judgment on a case-by-case basis.

Special circumstances will include conditions that differentiate an individual student from a whole class of students. The University will not accept professional judgments made for a student by another school, but will review the circumstances and, if appropriate, document the professional judgment decision. The decision of the University regarding professional judgment is final and cannot be appealed to the U.S. Department of Education.

The University will complete Verification before exercising professional judgment.
Satisfactory Academic Progress

Satisfactory Academic Progress for Federal Financial Aid

Financial aid satisfactory academic progress (SAP) is based on federal regulations and is intended to provide early intervention for students facing academic challenges and help students successfully complete their program of study.

Evaluation

The University evaluates SAP for the student’s primary program of study, based on a completed payment period (generally, at least 12 credit hours and 15 weeks of instruction).

Grade Point Average (GPA)

A cumulative program GPA is calculated using only grades earned at the University for the student’s primary program of study.

Pace of Completion (Pace)

Students must earn at least 67 percent of the credit hours attempted toward completion of the primary program of study. Credit hours taken at other institutions and accepted toward students’ primary program of study at the University are included in both attempted and completed credit hours when measuring pace of completion. The pace of completion is calculated using the following formula:

\[
\text{Pace of Completion} = \frac{\text{Cumulative number of credit hours successfully completed}}{\text{Cumulative number of credit hours the student attempted}}
\]

Maximum Time Frame

The maximum timeframe to complete the program cannot exceed 150 percent of the published length of a program, measured in credit hours attempted, for undergraduate and graduate students. Progress is evaluated cumulatively for students’ primary program of study, at the end of each completed payment period.

Regular (RG)

Students meeting all three of the financial aid SAP components defined above have regular (RG) financial aid status and are eligible for federal financial aid.

Financial Aid Warning (FW)

Students who are on a regular (RG) status and, at the end of the next payment period, do not meet all three of the financial aid SAP components defined above, are automatically placed on financial aid warning (FW) status.

The University will disburse federal financial aid funds to students with an FW status for one payment period.

Financial Aid Disqualification (FD)

Students on financial aid warning (FW) status who do not meet all three of the financial aid SAP components (defined above) at the end of the next completed payment period, are not eligible for additional federal financial aid and will be placed on financial aid disqualification (FD) status.

Students placed on FD status are not eligible for federal financial aid but may be eligible to appeal this status for consideration of significant extenuating circumstances.

Financial Aid Probation (FP)

Students who successfully appeal an FD status are placed on financial aid probation (FP) status. The University will disburse federal financial aid funds to students with an FP status for one probationary payment period, provided that all other eligibility requirements are met.

The University will notify students when their financial aid status changes.

Reestablishing Academic Progress

Students on a financial aid warning (FW) status can retain eligibility without filing an appeal by meeting all three of the financial aid SAP components defined above by the end of the FW payment period.

Students who reach a financial aid disqualification (FD) status can change their status only through the financial aid SAP appeal process. Students may not regain eligibility for federal financial aid by merely paying for courses or sitting out for an increment.

The University will notify students when their financial aid status changes.
Federal Financial Aid Appeals

Students placed on financial aid disqualification (FD) status may appeal the disqualification to regain eligibility for federal financial aid, if there are extenuating circumstances. Through the financial aid SAP appeal process, federal financial aid reinstatement may be possible if the appeal is approved and the student is placed on financial aid probation (FP) status.

<tbody>
<tr>
<td>Financial Aid Disqualifica-tion (FD)</td>
<td><strong>It is highly recommended students contact their finance advisor prior to submitting an appeal. The finance advisor will be able to answer questions and provide specific time-frames for SAP appeals</strong> Submit an appeal packet, along with supporting documentation directly to the PJ fax line at 877-290-8683. The packet must include: • Professional Judgment SAP appeal template, hand signed and dated. (The SAP appeal template can be found at <a href="http://www.faw.phoenix.edu">www.faw.phoenix.edu</a> or by contacting your campus advisor.) • A detailed explanation and timeline corresponding to courses in which SAP standards were not met and how the situation has been resolved. • Supporting documents for all issues mentioned in statement. • Provide a statement explaining, in detail, the steps that will be taken and resources that will be used to ensure remaining courses are successfully completed. Approval and/or reinstatement of financial aid eligibility is not guaranteed. The Professional Judgment Team reviews all appeals on a case-by-case basis. Approval is only granted when there are significant extenuating circumstances. All decisions made by the Professional Judgment Team are final. The University allows students a maximum of two approved appeals during enrollment at the University. The appeals cannot be consecutive and will only be considered if significant extenuating circumstances exist. If the appeal is approved the student is placed on financial aid probation (FP) status and eligible for federal financial aid for one additional payment period. • The University will disburse federal financial aid funds to students on financial aid probation (FP) status for one payment period, provided all other eligibility requirements are met. • The student must meet University financial aid SAP standards at the end of the subsequent payment period to maintain federal financial aid eligibility.</td>
</tr>
</tbody>
</table>

Cost of Attendance Policy

A student’s cost of attendance (COA) is established for use in calculating amounts of federal financial aid awards and packaging aid. The COA consists of various components to determine eligibility for a period of enrollment. The University reviews and, if necessary, updates each component annually, referencing the College Board website, http://professionals.collegeboard.com/higher-ed, the National Retail Federation Survey and reviewing actual institutional data. If an annual adjustment is deemed nominal at 5 percent or less, the University may opt to maintain the COA used in the prior award year.

The average monthly living expense, electronic course materials and book estimates used in the federal cost of attendance (COA) are as follows:

<table>
<thead>
<tr>
<th></th>
<th>Living Expense</th>
<th>Electronic Course Material</th>
</tr>
</thead>
<tbody>
<tr>
<td>Campus</td>
<td>$1,327.00</td>
<td>$74.00</td>

<td>$1,088.00</td>
<td>$75.00</td>
</tr>
<tr>
<td></td>
<td></td>
<td>$76.00</td>
</tr>
<tr>
<td></td>
<td></td>
<td>$87.00</td>
</tr>
</tbody>
</table>

Contact a local campus for detailed information regarding actual tuition and fee information.

Policy

The University uses an average monthly cost of living expense based on the following:
• Nine months for associates degree-seeking students
• Ten months for bachelor’s degree-seeking students
• Twelve months for graduate students

The University’s COA is made up of the following components:

Tuition

Average tuition rates are obtained annually for Online campus programs and local campus programs at each degree level. The tuition expense for the COA is an average based on modality and degree level. The University documents how averages are calculated and makes this information available upon request. If a student’s period of enrollment is less than a full academic year, costs will be adjusted to match the period of enrollment.

Electronic Course Materials and Books

The University charges a flat fee for each enrolled course, for the period of enrollment.

Living Expense

• Housing
• Transportation excluding Online students
• Miscellaneous

The monthly living expense component is based on an average between moderate and low, as published by the College Board. This average is used to calculate a monthly living expense amount used for students of all regions and states. The monthly living expense is then multiplied by the months in the loan period, based on degree level. Students receiving military housing assistance will have a reduction in living expenses in the amount of the housing allowance.
Remaining Periods
Remaining periods of enrollment will be prorated if the loan period contains less than 24 credit hours. Proration is calculated by dividing the number of remaining instructional weeks by four, rounding up that result, and multiplying it by the monthly living expense amount. The COA will not increase if a remaining period needs to be extended due to the student failing or withdrawing from a course(s) in the prorated period.

Loan Fees
The University calculates an average loan fee as one of the components in the COA by performing a separate calculation for undergraduate and graduate students.

School Supplies
The University computes an average supply fee by reviewing the National Retail Federation Survey; designed to gauge consumer behavior and shopping trends related to back-to-college spending. This documentation is available for review, upon request.

Tribal Budget
The University prepares a separate tribal budget for students who receive tribal funding. The tribal budget consists of actual tuition rates for the tuition component and may include a child or dependent care average component obtained from the National Association of Childcare Resource and Referral Agency (NACCRRA). The University averages each childcare type for weekly and hourly cost for each state. Documentation is available for review, upon request.

Minnesota Child Care Budget
For students who are receiving the Minnesota Postsecondary Child Care Grant, the University will add actual child care costs to the COA before computing financial need. This amount will be captured in the application process.

Leave of Absence
Leave of Absence for Federal Financial Aid
A leave of absence (LOA) is a temporary interruption in a student’s program of study, whether necessitated by a planned or an unanticipated event or circumstance. An approved LOA is not required if a student is not in attendance only for a scheduled break. However, a scheduled break may occur during an approved LOA. An LOA must meet certain conditions to be approved. An LOA may be approved if the University determines that the LOA Request meets all requirements and conditions of the University policy and federal regulations (34 CFR 668.22(d)), including that there exists a reasonable expectation the student will return to the University at the end of the LOA period. Students must follow this LOA Policy when requesting the LOA. If an LOA does not meet the requirements and conditions of University policy and applicable federal regulations, the student may be withdrawn from the University in accordance with the University’s withdrawal policy. Upon withdrawal, the University is required to perform a Return of Title IV (R2T4) Calculation.

Generally, the student must submit an LOA request and any supporting documentation on or before the start of the LOA. However, if unforeseen circumstances prevent the student from providing a prior written request for the LOA, the University may grant the LOA request, if appropriate.

Leave of Absence Request Form
Provide to the campus finance advisor a completed, signed, and dated LOA Request Form on or before the start of the requested LOA. The LOA Request Form is available for download from the Financial Aid Website (FAW), https://faw.phoenix.edu/

Written Request
Provide to the campus finance advisor a written, signed, and dated request, on or before the start of the requested LOA, including the reason for the LOA.

Unofficial Withdrawal
If a student is out of attendance due to an unforeseen circumstance and considered an unofficial withdrawal and the campus can document the reason and decision for the LOA prior to the return calculation being performed, the student will be placed on an approved LOA. However, if the student is an unofficial withdrawal and the campus does not document the reason prior to the calculation being performed, the student will be considered an unofficial withdrawal.

Length
Length of an LOA is the number of days between the LOA start date and the LOA reentry date. The first day of the initial LOA is used when determining the start date for the 12-month period. If a student is granted an LOA due to unforeseen circumstances, the beginning date of the approved LOA is the first date the student was unable to attend class because of the unforeseen circumstance.

Extension
The student may request an LOA extension if the request is made before the scheduled reentry date. An extension request must be written, signed and dated and provided to the campus finance advisor on or before the scheduled reentry date. The student must demonstrate good cause for an LOA extension. Apollo Financial Aid (AFA) will make the final determination on any LOA extension request.
### Coursework
The University will allow students returning from an LOA to complete coursework started prior to the LOA with no additional charges.

### Failure to Return
A student who is granted an approved LOA remains in an in-school status for federal financial aid repayment purposes. However, if a student on an approved LOA fails to return, the University must report the student’s change in enrollment status to loan holders as of the withdrawal date. A possible consequence of not returning from an LOA is that the grace period for a federal financial aid loan program might be exhausted in whole or in part. Therefore, before the University will grant an LOA for a student who is receiving federal financial aid, HEA program loan recipient, the student must acknowledge possible consequences for failure to return at the end of an LOA, including the possible exhaustion of all or part of the student’s grace period.

### Terms and Conditions

#### Prior Loan Deferments
If a student is registered and attending classes at the University, a student may have federal financial aid loans from previous colleges deferred. Deferral forms can be obtained from the lender if the loan is from another school. All deferment forms must be returned to the Student Finance Advisor, who will forward the forms to University Services in Phoenix, Arizona, for processing to the holder of the student’s loan. The loan holder makes the final determination of granting a student’s deferment request. Students receiving federal financial aid funds may also obtain deferments while serving in the Peace Corps; under the Domestic Volunteer Service Act; and as a volunteer for a tax-exempt organization of demonstrated effectiveness in the field on community service. Borrowers must formally request a deferment through the procedures established by the holder of their loan or loans. Detailed information regarding deferments may be viewed at www.studentaid.ed.gov or www2.ed.gov/offices/OSFAP/DirectLoan/postpone.html. Receiving a deferment is not automatic; therefore, a student or a student’s parent must apply for it.

#### Loan Consolidation
A consolidation loan may help make payments more manageable by combining several federal student loans into one loan with one monthly payment. A student will need to apply for a loan consolidation and choose a repayment plan. Repayment plans include the following: standard, extended, graduated, income-contingent for direct loans, income-sensitive for Federal Family Education Loan (FFEL), or income-based.

#### Loan Forgiveness Information
Under certain circumstances, the federal government will cancel all or part of an educational loan. To qualify, a student must complete at least one the following:
- Perform volunteer work
- Perform military service
- Teach or practice medicine in certain types of communities
- Meet other criteria specified by the forgiveness program

#### Application of Funds
The University will only apply federal financial aid funds to allowable charges. Allowable charges are defined as tuition (including Direct Study and state sales tax), electronic course materials, and California Student Tuition Recovery Fund (STRF) Assessment Fee (if applicable). Federal financial aid and state assistance funds are retained at the time of disbursement to pay allowable charges owed the University because of monies returned to the student or parent, or returned to the federal financial aid or state assistance program.

#### Authorization to Apply Financial Aid Funds
The University applies federal financial aid funds to a student account for current tuition, electronic course material, and directed study fees including state sales tax for the payment period and prior year charges up to $200. If a student authorized the University, through completion of the Authorization to Apply to Future Charges form during the financial aid application process, the University also retains federal financial aid funds for unpaid estimated future charges owed to the University for the loan period/academic year. Future charges are defined as allowable charges that have not been charged to a student account.

If a student is eligible to receive any remaining funds for the payment period, the credit balance funds are returned to the student in a living expenses check. At that time, the student is notified of the disposition of funds the University retained. Total processing time is approximately two weeks from date the University receives funds from the lender. The University will not require or coerce the authorization and will notify the student or parent they may cancel or modify the authorization at any time. If the student or parent chooses to cancel or modify the authorization, the cancellation or modification is not retroactive. Funds retained for incurred allowable charges and prior year charges retained prior to the University receiving the authorized cancellation will remain on account. If modifications have been requested, subsequent disbursements will be processed according to remaining authorizations.

There are three options to notify the University regarding Authorization to Apply to Future Charges form:
- Initial notification on financial aid website (FAW), https://faw.phoenix.edu/
- The student is prompted to answer authorization to apply funds questions when completing the financial aid application process.
• When a student electronically signs and submits the Authorization to Apply to Future Charges form, they no longer have access to make corrections on the FAW for that award year.

• Update or Change Authorization to Apply to Future Charges
• If a student or parent wants to update original authorization to apply funds, they can submit signed and dated statement outlining any changes to the Authorization to Apply to Future Charges form at any time. Student completes and faxes to AFA for processing. A submitted update is only in effect for future disbursements and the authorizations are retroactive.

• Signed statement
• The University will accept a signed statement from a student or parent outlining any changes to the Authorization to Apply to Future Charges form at any time.

• AFA processes the request accordingly.
• A submitted update is only in effect for future disbursements and authorizations are not retroactive.

Federal Financial Aid Credit Balance
Whenever the University credits federal financial aid funds to a student’s account, and those funds exceed the student’s allowable charges, a federal financial aid credit balance occurs. The order in which funds are credited does not matter. The University will pay the excess federal financial aid funds directly to the student as soon as possible, but no later than 14 days after the balance occurred on the student’s account. The University will not require a student to take any actions to obtain his or her credit balance.

Timeline to Issue a Federal Financial Aid Credit Balance
If there is no authorization on file, excess funds will be issued by the University to the student within 14 days of the date that funds are disbursed (applied to the student’s account, or in the case of a check, the date that the check is signed by the student or parent). If the student or parent cancels their authorization to retain excess funds, the University will return any federal financial aid funds on account to the student or parent within 14 calendar days of receiving the request for cancellation. The cancellation request or modification is not retroactive and it takes effect on the date the University receives it from the student/parent.

Timeline to Issue Federal Financial Aid Credit Balance for Book Voucher
Pell eligible students with a federal financial aid credit balance that meets the criteria of funds that could have been disbursed 10 days prior to the beginning of the payment period will be provided the lesser of the amount of the credit balance or the amount needed by the student as determined by the University. These funds will be supplied to the student in the form of a book voucher no later than the 7th day of the payment period. Students may opt out of this offer by declining the book voucher.

Treatment of Unclaimed Federal Financial Aid Credit Balance
If the University is unable to locate a student to pay a credit balance and has exhausted all possible avenues to find the student, the University will return the credit balance to the federal financial aid programs.

The University will return any unclaimed federal financial aid credit balance issued by check to the applicable federal financial aid programs no later than 240 days after the check issued date. If the funds were issued via electronic funds transfer (EFT) and subsequently rejected, the University will return the funds to the applicable federal financial aid programs no later than 45 days after the funds were returned or rejected.

Financial Aid Awarding
The law requires financial aid administrators to determine whether a student is eligible for grant programs prior to loan programs of federal student aid (PSA) to reduce the need for borrowing. The University estimates Federal Pell Grant Program eligibility as Estimated Financial Assistance (EFA) when making Campus-Based awards. Pell Grant eligibility for an undergraduate student is estimated before originating a subsidized or unsubsidized Direct loan for that student. In addition, an unsubsidized Direct Loan is not originated without first determining the need for a subsidized Direct Loan. However, if the amount of the subsidized Direct loan is $200 or less and the amount can be included as part of an unsubsidized Direct Loan, the University is not required to originate a separate subsidized loan.

For a dependent student, the University may originate a Parent PLUS and disburse Parent PLUS funds without determining the Pell Grant and subsidized Direct Loan eligibility for a student. Determining Pell eligibility is not relevant for Grad PLUS, but (unlike Parent PLUS) the University must determine a graduate/professional maximum subsidized/unsubsidized Direct loan eligibility before the student applies for PLUS.

Schedule Requirements
An academic year is defined as a minimum of 24 credits and 30 weeks of instructional time. The academic year begins with the first eligible course of a degree program and ends when a student successfully completes the credits and weeks time requirement. An academic year has no calendar time constraints and continues through periods of non-attendance that are less than 180 days until both credit and weeks requirement are met. A week of instructional time includes at least one academic related activity for federal financial aid.

Overlapping Courses
Students who overlap courses more than twice within an academic year, or associate degree students who take more than two courses concurrently, may need to complete more than 24 credits to complete 30 weeks of instructional time. In addition, the academic policy of the University prohibits a student from taking more than two courses concurrently without written approval from the campus Director of Academic Affairs. Due to overlapping courses there will be more credit hours included in the academic year, federal financial aid may not completely cover the cost of attendance and related charges.

Audits, Withdrawals, Non-Required Courses and Repeats
The law prohibits payment for auditing a course or payment for any course for which an assigned grade is not used in computing requirements for graduation. This includes repeats of grades D or better, unless a higher grade is required, withdrawals, and courses that are not applicable to the declared degree objective. This does not apply to repeats of required courses that a student has failed.
Financial Aid Disbursements

Federal
A student can receive the first disbursement of federal financial aid funds at the start of program or academic year. The student becomes eligible to receive a disbursement of federal financial aid funds for the second payment period when they successfully complete one-half the weeks of instructional time and one-half the credit hours in the academic year, program or the remaining portion of a program more than one-half of an academic year but less than a full academic year. First-time, first-year undergraduate borrowers will not have the first installment disbursed until 30 calendar days after the program of study academic year begins.

Disbursement for Books and Supplies
Pell eligible students who have completed all student eligibility requirements 10 days prior to the start of the academic year/payment period and will have a federal financial aid credit balance may request to use Pell funds to purchase books and supplies. The student will be provided with the lesser of the credit balance or amount needed for the books and supplies as determined by the University by the 7th day of the payment period. The credit balance will be provided as a book voucher. Students receiving funds through this method do not need to provide written authorization and may opt out of receiving a book voucher. If a student opts out of receiving the voucher, the credit balance will be sent to them approximately two weeks after all federal financial aid funds have been disbursed.

State
Term based or payment period disbursements are determined by each state. Payment periods are paid in installments during the course of a program of study to help meet the cost in each payment period. The payment period determines when funds are disbursed and the exact amount to be disbursed. The regulations provide a separate payment period definition for each type of academic programs. Programs that measure progress in credit hours and have academic terms, for credit-hour term programs, the payment period is the term. In the case of programs that measure progress in credits without academic terms, the school is required to either divide the program’s academic year, program or portion of a program into payment periods.

Attendance
Students must be considered enrolled and attending the University to maintain federal financial aid eligibility.

Class Attendance
Attendance at class meetings is required. Students are responsible for scheduling and planning ahead for any absences that may occur during a course to the extent possible.

Online
In order to be in attendance during a week, a student must post at least one message to any of the course forums on two separate days during the online week. Deadlines for attendance are based on Mountain Standard Time (MST). Attendance is tracked automatically in all Online courses.

In classes at the Online campus, a class “session” is defined as 12:00 a.m. (MST) Tuesday to 11:59 p.m. (MST) the following Monday. If a student posts a message to a class newsgroup on any two days during that week, the student is in attendance for that class session.

In associate degree courses at the Online Campus, a class “session” is defined as 12 am (MST) Monday to 11:59 pm (MST) the following Sunday. If a student posts a message to a class newsgroup on any two days during that week, the student is in attendance for that class session.

Local Campus: Most local campus classes meet four (4) hours per week. Student/learners are in attendance at the local campus workshops if they physically attend the local campus workshop meeting at any time during the scheduled class and sign the attendance roster. Attendance at the scheduled campus class meetings is mandatory.

Directed Study: Attendance in Directed Study courses is tracked in the same manner for both the local campus and online modalities. A Directed Study student/learner receives automatic attendance for a class week if she or he posts one (1) message to any of the course forums during the scheduled class week. Deadlines for attendance are based on Mountain Standard Time.

FlexNet®: FlexNet® student/learners are in attendance at the local campus workshops if they physically attend the local campus workshop meeting during the scheduled class hours and sign the attendance roster. They are in attendance during online class weeks if they post to any of the class forums on two separate days based on Mountain Standard Time within the online class week. Attendance for the online weeks of a FlexNet® course is tracked automatically.

School of Advanced Studies: In order to be in attendance during a week, a student/learner must post at least one (1) message to any of the course forums on two separate days during the online week. Deadlines for attendance are based on Mountain Standard Time. Dissertation courses (i.e. DOC 722, DOC 733, etc) only require one post per week in any of the course forums to remain in attendance. Messages posted in all class forums should contribute to a student’s academic experience and count as Academically Related Activity. Residency courses require daily sign-in to confirm attendance. Posting to the residency forum is not required for attendance. During residency courses, physical attendance, submitting assignments via the Assignments link, and acknowledging participation in the completion of the learning team deliverable all count as Academically Related Activities.

Attendance is mandatory in all University courses; however, circumstances do occasionally arise which prevent a student from attending class. The University’s unexcused absence policy allows unexcused absence(s) to be granted based on the number of workshops within a course (refer to the chart below). An unexcused absence may affect the final course grade due to the missed opportunity to earn participation points.

Unexcused absences will result in an automatic withdrawal (W) grade if students miss more than the maximum allowed absences. Refer to the chart below:

<table>
<thead>
<tr>
<th># of workshops</th>
<th>Allowed Absences</th>
<th>Absences resulting in withdrawal (W) grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>0</td>
<td>1</td>
</tr>
<tr>
<td>5-9</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>9 (Associates)</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>
Faculty requests for a withdrawal/failing (WF) grade will be approved for extenuating circumstances only and will be administered by the Registrar’s Office. Requests should be submitted to the Registrar’s Office by sending the approved Official Grade/Attendance Change Form.

Academically Related Activities (ARA)

To maintain continuous attendance and financial aid eligibility, the following activities that occur on or after the course start date and on or before the course end date will be considered academically related activities. Academically Related Activities (ARAs) determine a student’s enrollment status with the University. Students can maintain continuous enrollment by ensuring no more than 14 days elapse between posting attendance at an academically related activity.

For Online/Directed Study Students:
- All OLS Postings in a course (includes discussions, assignments, and quizzes, learning team activities)

For Local Campus Students:
- Physical Attendance; verified by a signed attendance roster
- Assignments posted via the assignment link
- Learning Team Acknowledgements via assignment link

For Local Campus Students:
- Physical Attendance: verified by a signed attendance roster
- Assignments posted via the assignment link
- Learning Team Acknowledgements via assignment link

FlexNet® Courses:
- Online Learning System (OLS) posts occurring during Online workshop week will be counted as an academic related activity

School of Advanced Study Students:
- Messages posted in all class forums, physical attendance, submitting assignments via the Assignments link, and acknowledgment participation in the completion of the learning team deliverable all count as Academic Related Activities.

Financial Policies and Procedures

Finance Plans

Cash Plan
The Cash Plan requires all tuition and electronic course materials fees to be paid in full prior to the start of each course.

Federal Financial Aid Plan
The Federal Financial Aid Plan is available to students receiving federal grants, federal loans or both to pay for tuition in an eligible degree or a certificate program.

Military or Government Billing Plan
Under the Military or Government Billing Plan, University of Phoenix directly bills the military or other government agency for a student’s tuition.

Third-Party Billing Plan
Under the Third-Party Billing Plan, University of Phoenix directly bills an approved employer for a student’s tuition.

Tuition Deferral Plan
The Tuition Deferral Plan is available for students whose employers offer to repay some or all of their employees’ tuition. The plan is also available to students receiving benefits from the U.S. Department of Veterans Affairs.

Supplemental Funding

Private Student Loans
Private student loans are credit-based funding source provided by outside, nonfederal lenders to pay for the cost of attendance not covered by any other financial aid. Private student loans are credit-based funding source provided by outside, non-federal lenders. Eligibility and terms and conditions are determined by the lender.

Tribal Funding
Several American Indian tribal nations provide funding for the tuition of a student who is a recognized member.

Learn more about ways students help finance their education online at www.phoenix.edu/content/altcloud/en/tuition_and_financial_options/tuition_and_fees.html.

Payment Policies
Tuition for each course must be paid according to the terms and conditions outlined in the primary financial option selected on the Student Financial Agreement form. Students who do not comply with the primary financial option term will not be allowed to attend classes.

A student may be administratively withdrawn for failure to make payment in a timely manner, preventing the student from attending future class sessions, until the amount owed is paid in full or satisfactory payment arrangements are made.

All applicable fees are due and payable as incurred. Electronic course material and books for each course must be paid at the time they are ordered or in accordance with a student’s stated payment option. Students are required to clear any indebtedness to the University before grades and transcripts will be issued or the degree awarded.

All costs of collection, court costs and reasonable attorneys’ fees will be added to delinquent accounts collected through third parties. University of Phoenix may obtain a current credit report as needed to support decision to defer tuition payment or to assist in collection of amounts owed.

All tuition, fees and payment policies are subject to change. Students who primarily attend a University of Phoenix campus other than University of Phoenix Online are subject to financial approval by their primary campus prior to enrolling in a course.

Processing and Late Fees
A late fee is assessed for every course for which the student’s tuition payment has not been received according to the terms of the primary financial option selected. A processing fee is charged for checks returned for any reason.

Tuition Deferment Options
Tuition and fees can be deferred up to 60 days from the start of a course if the following information is provided prior to a student’s course start date:
- A signed Tuition Reimbursement Certification and Authorization Form along with a valid credit card or debit card
- A completed Student Authorization Form

Both of these forms can be found in the Student Authorization and Agreement section of the Financial Options Guide.
Financial Options Guide

The Financial Options Guide has been updated and can be reviewed at http://cdn-static.phoenix.edu/content/dam/alt-cloud/tuition/financial-options-guide.pdf

Financial Obligation

The University does not impose penalties on students who are unable to meet financial obligations due to delays caused by the University.

Drop Credit Policy

The student may request a tuition credit from University of Phoenix when he or she drops a course due to extenuating circumstances.

Eligibility Requirements

If the student drops from a course and earns a W grade, the student may be eligible for a tuition credit. In a 12-month period, credit for no more than two single courses for a bachelor or higher degree, or credit for no more than two blocks in an associate degree program may be applied. The 12-month period begins on the end date of the first dropped course for which the student receives a tuition credit. If the student receives a tuition credit, the student must complete at least one course with a grade other than W or WF prior to qualifying for a second tuition credit.

Apollo Group, Inc., employees, spouses, dependents and faculty members are not eligible for the tuition credit.

Deadlines

The student must submit the request within 59 days from the end date of the dropped course. The W grade does not have to post prior to submission. The tuition credit is valid for up to 60 days from the end date of the dropped course.

Credit Amount

The tuition credit applies to the course taken immediately following the dropped course. If the amount of the credit is greater than the tuition rate of the course subsequently taken, the University will apply the remaining credit to another course. Both courses must start within 60 days from the end date of the dropped course. The student may use the credit at any University of Phoenix campus. The credit cannot be transferred to another student. No cash refunds will be given.

Veterans Educational Benefits

Students who are entitled to U.S. Department of Veterans Affairs (DVA) education benefits must make initial contact with a campus veteran affairs certifying official. A formal application for admission to the University should be completed before applying for DVA education benefits. Application for veteran education benefits should be sent to a local campus-certifying official for submission to the DVA.

Each University of Phoenix program segregated by instructional modality (classroom based or distance education), requires separate State Approving Agency (SAA) approval for the training of veterans or eligible persons. A student should contact a local campus for information on current approvals. DVA education benefit eligibility and payment rates vary depending on each individual’s military history and educational program being pursued. Only the DVA can determine DVA education applications eligibility. For information, a student should contact a DVA representative, toll free at (888)-GI-BILL-1 (888-442-4551) or review http://www.gibill.va.gov.

Students receiving Chapter 30, 32, 33, 35, 1606, and 1607 benefits attending University of Phoenix North Carolina campuses are required to submit a copy of high school transcripts if they are transferring less than 24 credits to University of Phoenix from a previously attended post-secondary institution. Directed study courses have Defense Activity for Non-Traditional Education Support (DSST-DANTES) approval for tuition reimbursement. For more information on this program, a student should contact the Educational Service Officer on the military base. University of Phoenix does not participate in the DVA education advanced payment program.

More information about veterans’ benefits can be reviewed at http://www.phoenix.edu/colleges_divisions/military.html. Visit the Department of Veterans Affairs website, www.gibill.va.gov, for additional information on educational entitlements.

Credit for Prior Education and Training

Credit for prior education or training must be evaluated and reported to the U.S. Department of Veterans Affairs (DVA) prior to the start of week 25 of enrollment. The DVA may not always pay DVA education benefits after week 24 if the DVA records indicate the student has a large amount of transfer credits.

Please ensure all prior education transcripts, DD-295, DD-214, Army/American Council on Education Registry Transcript System (AARTS), Coast Guard institute transcripts, and Sailor/Marine/American Council on Education Registry transcripts are submitted for evaluation in a timely manner. The student is responsible to ensure all transcripts are submitted to the University. Academic credit earned for courses appearing on an official transcript from a regionally accredited or candidate for accreditation college or university will be evaluated according to University policies and accepted subject to the approval of the University Office of Admissions and Evaluation. Transfer credits based on a different unit of credit than the one prescribed by University of Phoenix are subject to conversion before being transferred. Only the official transcript and course evaluations performed by the University Office of Admissions and Evaluation or Prior Learning Assessment Center are final. Any preliminary reviews by campus personnel are unofficial, not binding and subject to change.

DVA Standard of Academic Progress Requirements

To receive DVA education benefits, a student must maintain satisfactory academic progress (SAP) and conduct. Accordingly, benefits will be terminated for individuals who are disqualified, suspended or expelled from the University.

Academic Probation

Academic probation shall occur when a grade point average (GPA) falls below acceptable levels. Undergraduate degree- and certificate-seeking students must maintain a program GPA of 2.0. Graduate and doctoral students must maintain a program GPA of 3.0. Probation lasts for a period of four consecutive courses. Any coursework taken concurrently will be applied to the three consecutive course period. Veteran students will continue to receive DVA education benefits during the probation period. The veteran will be informed of the probation, and a notation to the student DVA file will record when the probationary period commenced.
**Academic Disqualification**

Academic disqualification (AD) will result if a student fails to clear an academic probation status within four courses from the onset of probation. Veteran students will not be eligible for DVA educational benefits after disqualification. The DVA and student will be notified of the disqualification. To reapply, a formal application for admission must be submitted in accordance with University admission procedures. In addition, applicants should explain the reasons for the scholastic deficiencies; the manner in which the intervening time has been spent; and why they should be given favorable consideration for readmission. The readmission file will be reviewed by the Student Appeals Center and a decision reached regarding readmission. If approved, the student would be required to complete all program requirements in effect at the time of readmission. An application for DVA education benefits will also be necessary to reestablish benefits with University of Phoenix.

**Military Tuition Assistance**

To obtain federal military tuition assistance, visit the education office to receive college counseling and develop an education plan. From that point, a student can submit a military Tuition Assistance request, [http://www.phoenix.edu/colleges_divisions/military/military-financial-options/tuition-assistance.html](http://www.phoenix.edu/colleges_divisions/military/military-financial-options/tuition-assistance.html).

A student can currently receive 100 percent federal tuition assistance from military service, with a $250 cap per semester hour and a $4,500 annual limit.

If a student wants to apply the military tuition assistance, a student will need to submit a completed authorization form to a Military University Representative at least two weeks before a course start date.

**DVA Tuition Assistance Top-Up Benefit**

Active duty students requesting to use the Tuition Assistance Top-Up (TATU) benefit program should direct all questions or concerns to the DVA at 1-888-GI-BILL-1 (1-888-442-4551) or online at [www.gibill.va.gov/](http://www.gibill.va.gov/). University of Phoenix VA certifying official is not involved in the processing of any TATU request.

For more information about VA Tuition Assistance and financial options, go to [www.phoenix.edu/colleges_divisions/military/military-financial-options/tuition-assistance.html](http://www.phoenix.edu/colleges_divisions/military/military-financial-options/tuition-assistance.html).

**Readmission of Servicemembers**

Any student whose absence from the University is necessitated by reason of service in the uniformed services is entitled to readmission if the following criteria are met:

- The student (or an appropriate officer of the Armed Forces or official of the Department of Defense) gives verbal or written notice to the University’s Military Division verifying that the student’s absence from the University was necessitated by service in the uniformed services.
- The cumulative length of the absence and of all previous absences from the University by reason of service in the uniformed services does not exceed five years.

Note: A student who submits an application for readmission to the University must provide documentation to establish that the student has not exceeded the specified service limitations and that the student’s eligibility for readmission has not been terminated. Examples of documentation to verify that the student is still within the acceptable service limitations include the student’s deployment paperwork or a letter from the commanding officer that includes the student’s dates of service.

Exception: The University may not delay or attempt to avoid readmission of a student under this section by demanding documentation that does not exist, or is not readily available, at the time of readmission.

- The student submits verbal or written notification of intent to reenroll.

Note: If the student’s last date of attendance with the University is more than 365 days in the past, the student must complete an updated admissions application and Enrollment Agreement in accordance with the University reentry policy. The Military Division should then submit these completed documents along with the Servicemembers Readmission Form to eXp. The student may remain in original program/version without appeal provided the cumulative length of absence does not exceed five years and that the program has not been expired.

A student’s eligibility for readmission under this section by reason of such student’s service in the uniformed services terminates upon the occurrence of any of the following events:

- A separation of such person from the Armed Forces (including the National Guard and Reserves) with a dishonorable or bad conduct discharge, OR
- A dismissal of such person permitted under section 1161(a) of Title 10, USC, OR

Note: If the student does not submit a notification of intent to reenroll within the time limits, the student is subject to the University established leave of absence policy and general practices.
University of Phoenix is accredited, reviewed and/or approved by federal, state and international agencies, as well as private accreditation bodies.

Academic Program Improvement

University of Phoenix pursues a strategy of continuous quality improvement in relation to its academic programs. This strategy is implemented through assessment programs designed to measure student learning at various levels within the University. Multiple types of assessment are utilized to create as comprehensive a picture as possible of the strengths and potential challenges to student learning. Resulting data can be used to improve academic programs and enhance the overall academic experience.

During each fiscal year from September 1 to August 31, the colleges and schools within the University follow pre-established plans to conduct programmatic assessment. Plan progress is monitored quarterly through the fiscal year. The process for assessment of academic programs uses the following four phases:

1. Assessment Planning
2. Collecting Evidence and Analyzing Data
3. Implementing Improvement
4. Monitoring Effectiveness of Improvements

By utilizing this assessment process, the colleges and schools are able to evaluate academic programs, identify areas for potential change, modify assessment plans as needed, communicate changes in academic programs to faculty and students, and pursue continuous quality improvement.

Students or potential students may obtain a copy of the improvement plan for a specific program by contacting

University of Phoenix Office of Academic Administration
4615 E. Elwood St.
Mail Stop: AA-S402
Phoenix, AZ 85040

Disability Services

University of Phoenix recognizes and accepts its obligations under the Rehabilitation Act of 1973, Americans with Disabilities Act (ADA) of 1990, and the ADA Amendments Act of 2008, prohibiting discrimination on the basis of a disability and requiring the University to provide reasonable accommodations and academic adjustments to qualified disabled students in all University programs and activities. The University of Phoenix Disability Services Office provides services to students with temporary health issues or a permanent disability.

Students have the responsibility to both self-disclose and request accommodation through the campus disability services advisor. Communication with faculty or other staff members does not constitute fulfilling the University ADA accommodation requirements. Confirmation through documentation from a health care provider is required prior to accommodations or adjustments being determined and fulfilled.

Obtain Information

The campus disability services advisor is responsible for managing the ADA process, including negotiations, and finalizing appropriate student accommodations. Additional information and a list of campus disability services advisors are located at http://www.phoenix.edu/students/disability-services.html.
Reverse Transfer Agreements

University of Phoenix has established reverse transfer agreements with partnering institutions. With a Reverse Transfer Agreement in place, University of Phoenix will notify the partner transfer institution and provide directory information for students meeting certain credit requirements that indicate the student may be eligible to earn an associate’s degree from the transfer institution. The transfer institution may pursue communication with the student to discuss requirements and may award the associate’s degree to the student per their discretion.

Graduation Rates

In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must publish information regarding graduation rates as defined by the National Center for Education Statistics (NCES). This graduation measure includes only undergraduate degree- and/or certificate-seeking students who have never attended another institution of higher learning, and graduate within 150 percent of the normal time to completion. Data are collected on the number of students entering the institution as first-time, full-time (FTFT) degree- and/or certificate-seeking undergraduate students in a particular cohort year. Graduation rates are disaggregated by race and ethnicity, gender and federal financial aid grant or loan funds. For the graduation rates, please go to http://www.phoenix.edu/about_us/regulatory/consumer-information/graduation-rates.html.

Retention Rates

In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must make available information regarding retention rates of degree- and/or certificate-seeking first-time, full-time (FTFT) undergraduate students entering the institution. Retention rate is a measure of the rate at which students persist in their educational program at an institution, expressed as a percentage. For the retention rates, please go to http://www.phoenix.edu/about_us/regulatory/consumer-information/retention-rates.html.

Student Diversity

In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must make available information regarding student diversity as defined by the IPEDS. Data reported are for enrolled full-time students. For further details please go to http://www.phoenix.edu/about_us/regulatory/consumer-information/student-diversity.html.

Types of Education Graduates Enroll

In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must make available information regarding the types of graduate and professional education in which graduates of the institution four-year degree programs enrolled.

Approximately 18% of students who completed a bachelor’s degree from the University of Phoenix between July 1, 2009-June 30, 2010 went on to enroll in a graduate or professional program at the University of Phoenix. The majority of these students enrolled in the following programs:

- Master of Business Administration
- Master of Science in Psychology
- Master of Science in Accountancy
- Master of Management
- Master of Information Systems
The data is derived from the IPEDS completion survey (July 1, 2009-June 30, 2010 data) and the IPEDS Fall Enrollment survey (fall 2009 data).

Alumni Attending Graduate School
Forty-three percent of University of Phoenix alumni indicated they are attending, or plan to attend, graduate school. Of this 43%, 71% are currently pursuing a graduate degree at the University of Phoenix. Of this 43%, 20% plan to pursue a graduate degree at the University of Phoenix.

Survey completed in 2011 between January 17 and February 11; a total of 27,416 alumni respondents.

Withdrawing From the University
Circumstances may necessitate withdrawal from the University. A student who received, or is eligible to receive federal financial aid funds provided certain criteria are met, and subsequently officially or unofficially withdraws is subject to a Return of Title IV (R2T4) Calculation as required by federal regulations.
Official Withdrawal

Withdrawal Date

Students who provide official notification of their intent to withdraw must complete the Official Withdrawal Rescission form via the University e-Campus website, https://ecampus.phoenix.edu/portal/portal/public/login.aspx, or notify the designated campus offices of Enrollment Services, Academic Services, and Financial Services to be considered official withdrawals. The withdrawal date for official withdrawals is the last date of academic attendance or attendance at an academically related activity determined from University attendance records.

Date of Determination

The date of determination for students who officially withdraw from the University is the latter of the student’s withdrawal date or the date of notification. The University will return federal financial aid for which it is responsible no later than 45 days after the date the University determines the student has withdrawn.

Rescission of Official Notification

Students who rescind their intent to withdraw must provide an electronic or written statement to the University stating their intent return to the University to participate in academically related activities and complete the payment period. If the student subsequently withdraws after rescinding intent to withdraw, the withdrawal date is the latter of the date the student first provided notification to the University or the last date of academic attendance or academically related activity determined from the University’s attendance records. The date of determination for students who rescind their intent to withdraw and subsequently withdraw from the University, without official notification, is no greater than 15 days after the student’s official last date of attendance. Students who want to rescind their intent to withdraw must complete the Official Withdrawal Rescission form via e-Campus.

Unofficial Withdrawal

Withdrawal Date

Students who do not provide official notification to the University of their intent to withdraw are considered unofficial withdrawals after 14 consecutive days of nonattendance at an academically related activity. If a student requests an extension of the course he/she is currently attending and his/her intent is to complete the course, the days in the extension period will not count towards the 14 days of nonattendance at an academically related activity. In addition, students on an institutionally scheduled break of greater than 5 days or who have been granted an inclement weather exception will not have the days count towards the 14 days of nonattendance at an academically related activity.

The withdrawal date for a student who ceases attendance at the University, including a student who does not return from an approved leave of absence, is the last date of academic attendance or attendance at an academically related activity determined from the University’s attendance records. In the case of a student who has received an approved leave of absence, the University will review the student record on or after their originally approved return date. The review determines if the student reentered as scheduled, or did not reenter as scheduled and must be withdrawn for the purposes of the Return of Title IV (R2T4) calculation and deferment processing.

Date of Determination

The date of determination for students who unofficially withdraw from the University is no greater than 1) 15 days after the official last date of attendance; or 2) when a student fails to return from an approved leave of absence. The University will return the amount of federal financial aid funds for which it is responsible no later than 45 days after the date the University determines the student has withdrawn.

Administrative Withdrawal

Withdrawal Date

Students who are withdrawn from the University due to failure to meet admission, academic, candidacy, financial or code of conduct policies are considered administrative withdrawals. The withdrawal date for students who are administratively withdrawn is the last date of academic attendance or attendance at an academically related activity.

Date of Determination

The date of determination for students who are administratively withdrawn from the University is the date the University determines the withdrawal. The University will return federal financial aid funds for which it is responsible no later than 45 days after the date of the administrative withdrawal.

Return of Federal Financial Aid

The requirements for federal financial aid when a student withdraws are separate from the Institutional Refund Policy and State Refund Policy. Therefore, a student may still owe funds to the University for unpaid institutional charges.

Federal regulations specify how the University must determine the amount of federal financial aid earned when a student withdraws from the University.

The percentage amount of federal financial aid a student earned in a payment period is calculated as follows:

\[
\text{Total Number of Calendar Days Completed in Payment Period} / \text{Total Number of Calendar Days in Payment Period} \times 100
\]

The amount of federal financial aid a student earned is determined on a rate-of-progression basis. For example, if a student completes three out of 12 credit hours in the payment period, the student has earned 25 percent of the payment period the student was scheduled to receive. When the student completes more than 60 percent of the payment period, the student earns all the assistance scheduled for that payment period.

A federal financial aid credit balance created during the payment period will not be released to the student nor returned to a federal financial aid program prior to performing the R2T4 Calculation. The University retains these funds even if, under the 14-day credit balance payment requirements, funds are otherwise required to be released. The University will perform the R2T4 Calculation, including any existing federal financial aid credit balance for the period in the calculation as disbursed aid.

The University will include any federal financial aid credit balance as disbursed aid. Although not included in the R2T4 Calculation, any federal financial aid credit balance from a prior period that remains on a student account when a student withdraws will be included as federal financial aid for purposes of determining the amount of any final federal financial aid credit balance when a student withdraws.
Upon completion of any applicable refund policies, any federal financial aid credit balance will be allocated first to repay any grant overpayment owed by a student as result of the current withdrawal. Within 14 days of the date that the University performs the R2T4 Calculation, the University will pay any remaining federal financial aid credit balance in one or more of the following ways:

- Pay authorized charges at the University
- Reduce federal financial aid loan debt to the student or parent for a PLUS loan with student/parent authorization

The University will determine the results of the application of its refund policy before allocating a federal financial aid credit balance. However, the University is not required to complete its refund process, for example making a refund to a student, before completing the steps for allocating the federal financial aid credit balance.

If the University is unable to locate the student or parent when attempting to pay a credit balance, it will return the funds to the federal financial aid programs. The U.S. Department of Education does not specify the order of return to the federal financial aid programs for a credit balance, the University will return funds to federal financial aid programs in the appropriate order as describe in procedure and in the best interest of the student.

The calculation for unearned federal financial aid is as follows:

- Total amount disbursed + amount that could have been disbursed - amount of federal financial aid earned = amount of unearned federal financial aid that must be returned

The calculation of earned federal financial aid includes all student financial aid grants and loan funds that were disbursed or that could have been disbursed to a student.

In addition, Federal Supplemental Educational Opportunity Grant (FSEOG) program funds are excluded if the following resources are used as a matching source:

- University scholarships
- Tuition waivers
- State scholarships and grants
- Funds from foundations or other charitable organizations

The non-federal share of FSEOG program funds will be included if the University meets its matching share requirement with institutional funds.

**Return of Unearned Federal Financial Aid**

When a return of federal financial aid is due, the University and the student may both have a responsibility for returning funds. The University will return the lesser of the following amount to the appropriate federal financial aid programs:

- The total amount of unearned aid;
- The amount equal to the total University charges incurred by the student for the payment period multiplied by the percentage of unearned aid

University charges incurred by the student will include tuition, fees, books and directed study including state sales tax initially assessed the student for the entire payment period. Initial charges will only be adjusted by those changes the University makes prior to the student withdrawal.

If after the student withdraws, the University changes the amount of University charges it assessed a student, or decides to eliminate all institutional charges, those changes affect neither the charges nor aid earned in the calculation. Although University charges may not have actually charged due to the student’s withdrawal in the payment period, the University will use the actual charges to date, to include full tuition, fees, books and directed study (including sales tax) for each course for the payment period, and estimate remaining charges based on the students’ primary campus.

Charges should not reflect Withdrawn (W) grade adjustments.

After the University has allocated its portion of unearned funds, the student must return assistance owed in the same order specified above for the University. The amount of assistance that the student is responsible for returning is calculated by subtracting the amount returned by the University from the total amount of unearned federal financial aid to be returned. The student, or parent in the case of funds due to a parent PLUS Loan, must return or repay, as appropriate, the amount determined to any federal financial aid program in accordance with the terms of the loan; and any federal grant program as an overpayment of the grant. The amount of a grant overpayment due from a student is limited to the amount by which the original grant overpayment amount exceeds one-half of the total federal grant funds received by the student.

**Timelines for Return of Federal Financial Aid**

The University will return the amount of federal financial aid for which it is responsible no later than 45 days after the date the University determines the student has withdrawn.

**Timeframe for Returning Unclaimed Credit Balance**

If the University attempts to disburse a credit balance by check and the check is not cashed, the University must return the funds no later than 240 days after the date the University issued the check. If a check is returned to the University, or an electronic funds transfer (EFT) is rejected, the University may make additional attempts to disburse the funds, provided those attempts are made no later than 45 days after the funds were returned or rejected. When a check is returned or an EFT is rejected and the University does not make another attempt to disburse the funds, the funds must be returned before the end of the initial 45-day period.

**Program and/or Version Changes**

Program and/or version changes that result in one or more courses that are not accepted towards the new program or version may result in a recalculation of the academic year. As a result of that recalculation, there may not be enough federal financial aid funds to cover tuition costs for the newly defined academic year. This situation may increase the shortfall or personal contribution needed to cover cost of attendance and related charges.

**Institutional Refund Policy**

The following provisions pertain to all refund policies applied by the University unless specifically stated otherwise.

Students, who begin a program under Registered (R) status, pending the completion of admission file and are subsequently denied admission, are eligible for a refund of the full tuition amount of the course in which they are currently enrolled. Tuition is not refunded for any completed course. A tuition refund can be requested in writing from a local campus.

Students who withdraw from a course prior to the start date will receive a 100 percent refund for that course. Students who have completed 60 percent or less of the course are eligible for a pro rata refund.
State Refund Policies

Students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw from the University prior to the start of their program and after the three-day cancellation period.

Florida

Students in the state of Florida will have tuition refunded using the University Institutional Refund Policy with the following exceptions:

- Students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw within three business days after signing the Enrollment Agreement.
- The University will retain $45 of the application fee for students who withdraw from the University prior to the start of their program and after the three-day cancellation period.
- Refunds will be paid within 30 days of a student’s official withdrawal.

Georgia

Students in the state of Georgia will have tuition refunded using the University Institutional Refund Policy with the following exceptions:

- Students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw within three business days after signing the Enrollment Agreement.
- Students providing written notification of withdrawal prior to the first class session or have been out-of-attendance for more than 14 days will receive a full refund of tuition paid for the unattended course.
- Refunds are paid within 30 days of a student’s official withdrawal.
- A student who is out-of-attendance for more than 14 days is considered withdrawn.

Indiana

Indiana has established refund policies that differ from the University Institutional Refund Policy. If a student attends a class in Indiana, the Indiana state refund policy will be applied. The University institutional refund policy will be applied in addition to the University Institutional Refund Policy. If a student attends a class in Indiana, the Indiana state refund policy will be applied. The University institutional refund policy will be applied in addition to the University Institutional Refund Policy.

- The student cancels the Enrollment Agreement within six business days after signing.
- The student does not meet the University minimum admission requirements.
- The student’s enrollment was procured as a result of a misrepresentation in the written materials utilized by the University.

Example of a refund on attendance for a 5-week course:

- Attend 1 week 90% refund due
- Attend 2 weeks 50% refund due
- Attend 3 weeks 40% refund due
- Attend 4 weeks no refund due

Example of a refund on attendance for a 6-week course:

- Attend 1 week 83% refund due
- Attend 2 weeks 78% refund due
- Attend 3 weeks 67% refund due
- Attend 4 weeks 56% refund due
- Attend 5 weeks 44% refund due
- Attend 6 weeks no refund due

Example of a refund on attendance for a 9-week course:

- Attend 1 week 89% refund due
- Attend 2 weeks 78% refund due
- Attend 3 weeks 67% refund due
- Attend 4 weeks 56% refund due
- Attend 5 weeks 44% refund due
- Attend 6 weeks no refund due

Example of a refund on attendance for a 6-week course:

- Attend 1 week 90% refund due
- Attend 2 weeks 50% refund due
- Attend 3 weeks 40% refund due
- Attend 4 weeks no refund due

Example of a refund on attendance for a 5-week course:

- Attend 1 week 90% refund due
- Attend 2 weeks 50% refund due
- Attend 3 weeks 40% refund due
- Attend 4 weeks no refund due
Example of a refund on attendance for a 9-week course:
- Attend 1 week 90% refund due
- Attend 2 weeks 75% refund due
- Attend 3 weeks 50% refund due
- Attend 4 weeks 50% refund due
- Attend 5 weeks 40% refund due
- Attend 6 weeks no refund due

**Kansas or Missouri**

Students in the states of Kansas or Missouri will have tuition refunded using the University Institutional Refund Policy with the following exceptions:
- Students have the right to a full refund of all monies paid if they withdraw within three business days after signing the Enrollment Agreement.
- To cancel enrollment, a student must notify the local campus in writing on or before the three-day period. After the three-day period, all fees, including application fees, assessment fees, and book fees, are non-refundable.
- A tuition refund must be requested in writing to the student's local campus.

**Kentucky**

Students in the state of Kentucky will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
- A student who cancels enrollment anytime before the start of the first class session will receive a full refund of all monies paid.
- The University may retain 10 percent of the tuition agreed upon in the Enrollment Agreement or $100, whichever is less, for students who fail to attend in the enrollment period for which advanced payment was made.
- Refunds will be paid within 30 days of a student's official withdrawal.
- A student who is out-of-attendance for more than 14 days is considered withdrawn.

**Louisiana**

Students in the state of Louisiana will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
- Students who cancel enrollment anytime before the start of the first class session will receive a full refund of all monies paid, except the application fee, which is non-refundable.
- Refunds will be paid within 30 days of a student's official withdrawal.
- The University may retain an administrative fee, not to exceed 15 percent of total tuition and fees paid.

**Minnesota**

Students in the state of Minnesota will have tuition refunded using the University Institutional Refund Policy with the following exception:
Refunds for state aid programs and non-state aid programs are calculated on a proportional basis using the state mandated or institutional refund policy. To calculate the minimum refund due to the State Grant Program, the SELF Loan Program, and other aid programs (with the exception of the state Work Study Program), the Higher Education Services Office Refund Calculation Worksheet of the Minnesota State Grant manual is used.

**Ohio**

Students in the state of Ohio will have tuition refunded using the University's Institutional Refund Policy with the following exceptions:
- Students have the right to a full refund of all monies paid if they withdraw within five calendar days of signing the Enrollment Agreement.
- A student who withdraws before the first class and after the five-day cancellation period is obligated for the registration fee.
- To cancel enrollment, a student must notify the local campus in writing on or before the five-day cancellation period after signing the Enrollment Agreement.
- Refunds will be paid no later than 30 days after cancellation.

**Oregon**

Students in the state of Oregon will have tuition refunded using the University Institutional Refund Policy except all fees, including application fees, assessment fees, student service fees, and book fees are non-refundable.

**South Carolina**

Students in the state of South Carolina will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
- Students have a right to a full refund of all monies paid, including application and materials fees, if they withdraw within 72 hours excluding weekends and legal holidays after signing the Enrollment Agreement.
- A full refund of all monies will be made to any applicant not accepted by the University.
- After the 72-hour cancellation period, the University may retain up to a $100 if the student does not attend a course.
- The University may retain an administrative fee up to $100.
- Refunds will be paid within 40 days of a student's official withdrawal.

**Wisconsin**

Students in the state of Wisconsin will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
- Students have the right to cancel enrollment until midnight of the third business day after receipt of notice of acceptance and is entitled to a full refund of any tuition paid.
- Refunds will be paid within 30 days of a student's official withdrawal.
- If the University cancels or discontinues a course or educational program stated in the Enrollment Agreement, the University will refund all monies paid for that course or program.

The refund policy of the state where Online students reside will be used to calculate their refund amount. The refund policy of the state where Ground students attend class will be used to calculate their refund amount.
Copyright Infringement and Peer-to-Peer File Sharing

Copyright Law
Copyright is a form of legal protection provided by U.S. law, Title 17 U.S.C. §512(c)(2), that protects an owner’s right to control the reproduction, distribution, performance, display and transmission of a copyrighted work. The public, in turn, is provided with specific rights for fair use of copyrighted works. Copyrighted works protect original works of authorship and include:

- Books, articles and other writings
- Songs and other musical works
- Movies and Television productions
- Pictures, graphics and drawings
- Computer software
- Pantomimes and choreographic works
- Sculptural and architectural works

Specific information on copyright law and fair use may be found at the following sites:
- The U.S. Copyright Office: http://www.copyright.gov
- The Electronic Frontier Foundation fair use frequently asked questions: http://eff.org/IP/eff_fair_use_faq.php.

Copyright Infringement
The copyright law provides the owner of copyright in a work the exclusive right to the following:

- Reproduce the work in copies
- Prepare derivative works based upon the work
- Distribute copies of the work to the public by sale or other transfer of ownership, or by rental, lease, or lending
- Perform the work publicly
- Display the copyrighted work publicly
- Perform the work publicly by means of a digital audio transmission in the case of sound recordings

The copyright law states, “anyone who violates any of the exclusive rights of the copyright owner is an infringer of the copyright or right of the author.” Generally, under the law, one who engages in any of these activities without obtaining the copyright owner’s permission may be liable for infringement.

Peer to Peer File Sharing
Peer-to-Peer (P2P) file sharing is a general term that describes software programs that allow computer users, utilizing the same P2P software, to connect with each other and directly access digital files from one another’s hard drives. Many copyrighted works may be stored in digital form, such as software, movies, videos, photographs, etc. Through P2P file sharing it has become increasingly easy to store and transfer these copyrighted works to others thus increasing the risk that users of P2P software and file sharing technology will infringe the copyright protections of content owners. If P2P file-sharing applications are installed on a student’s computer, the student may be sharing someone else’s copyrighted materials without realizing they are doing so. As a user of the University network, recognizing the legal requirements of the files that a student may be sharing with others is important. A student should be careful not to download and share copyrighted works with others.

The transfer and distribution of these works without authorization of the copyright holder is illegal and prohibited.

Violations and Penalties under Federal Law
In addition to University sanctions under its policies as more fully described below, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or statutory damages affixed at not less than $750 and not more than $30,000 per work infringed. For willful infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504, 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

University Plans to Effectively Combat Unauthorized Distribution of Copyrighted Material; Student Sanctions
A student’s conduct in the University classrooms and websites is subject to and must fully conform to the University Student Code of Conduct policy, its Acceptable Use policy and any other applicable University policies. The University may monitor traffic or bandwidth on the networks utilizing information technology programs designed to detect and identify indicators of illegal P2P file sharing activity. In addition to, or as an alternative, the University may employ other technical means to reduce or block illegal file sharing and other impermissible activities. The University will also provide for vigorous enforcement and remediation activities for those students identified through the University Digital Millennium Copyright Act policy as potential violators or infringers of copyright.

Disciplinary sanctions will be based on the seriousness of the situation and may include remediation based on a comprehensive system of graduated responses designed to curb illegal file sharing and copyright offenses through limiting and denial of network access or other appropriate means. These sanctions may be in conjunction with additional sanctions through the University Student Code of Conduct, its Acceptable Use Policy and any other University policy applicable to the particular situation.

Students who are subject to professional codes of conduct that apply to their enrollment at the University shall be sanctioned according to the requirements of the respective code.

Education and Awareness
The University uses a variety of means to inform students and faculty about copyright laws and the response to copyright infringement claims by the University.

The University informs its campus community through the Consumer Information Guide and other periodic communications that unauthorized distribution of copyrighted material, including unauthorized P2P file sharing, may subject students and faculty to civil and criminal liabilities and the extent of the possible liabilities; The Consumer Information Guide is available on the University website, is provided to potential students and employees, and is sent by email on a yearly basis to current students, faculty and employees.

Legal Sources for Online Music and Videos
The following links are online sources that provide information on legal access to copyrighted music and videos:

Digital Millennium Copyright Act (DMCA) Policy

The University of Phoenix, in compliance with the federal Digital Millennium Copyright Act (DMCA), has established a mandated process for receiving and tracking alleged incidents of copyright infringement. The University has designated an agent who will investigate notices of alleged copyright infringement and take appropriate actions. Such actions may include terminating repeat infringers accounts under the Digital Millennium Copyright Act (DMCA). The copyright infringement notices must be given in writing, preferably by email, or by U.S. mail to the agent listed below:

University of Phoenix
Attn: Copyright Agent
4025 S. Riverpoint Parkway, CF-K612
Phoenix, AZ 85040
Email: CopyrightAgent@apollogrp.edu

If a valid DMCA notification is received, the University will respond under this process by taking down the infringing content found on our networks. On taking down content under the DMCA the University will take reasonable steps to contact the owner of the removed content so that a counter notification may be filed. Upon receiving a valid counter notification, the University will generally restore the content in question, unless the University receives notice from the notification provider that a legal action has been filed seeking a court order to restrain the alleged infringer from engaging in the infringing activity.

Please note that the DMCA provides that you may be liable for damages including costs and attorneys fees if you falsely claim that someone is infringing on your copyright. Alternatively, you can also be liable for damages including attorneys’ fees if you materially misrepresent that an activity is infringing on the copyright of another. Therefore, the University recommends contacting an attorney if you are unsure whether your work or the work of another is protected by copyright laws.

Filing Notice of Alleged Infringement

Following is the process for filing a notification under the DMCA. Notice must be given in writing to the designated agent as specified above and contain the following information:

• Identify in sufficient detail the copyrighted work that you believe has been infringed upon; for example, a student describes the work that you own.
• Identify the material that you claim is infringing on your copyright as set forth in number 1 and provide detailed information reasonably sufficient to locate the infringing item; for example, provide the link to the infringing information.
• Provide a reasonably-sufficient method of contacting you: phone number, address and email address.
• If possible, please provide any information that you allow the University to notify the alleged infringing party of notice of the alleged infringement.
• The following statement must be included in your notice: "I have a good faith belief that the use of the copyrighted materials described above and contained on the service is not authorized by the copyright owner, its agent, or by protection of law."
• The following statement must be included in your notice: "I swear, under penalty of perjury, that the information in the notification is accurate and that I am the copyright owner or am authorized to act on behalf of the owner of an exclusive right that is allegedly infringed."
• The notice must be signed.

Filing Counter Notification of Alleged Infringement

The person or provider of the alleged infringing material may present a counter notification pursuant to the DMCA. Upon proper counter notification, the University may reinstate the removed content. Notice must be given in writing to the designated copyright agent as specified above and contain the following information:

• Identify the material that has been removed. This may include providing the location or the URL when possible.
• Provide your name, address telephone number and email address if available.
• Provide a statement that you consent to the jurisdiction of the Federal District Court for the judicial district in which you reside, or for any address outside the United States, for any judicial district, in which the service provider may be found and that you will accept service of process from the person who provided notification to the University of the alleged infringement or an agent of such person.
• Provide the following statement: "I swear, under penalty of perjury, that I have a good faith belief that the material identified above was removed or disabled as a result of a mistake or misidentification of the material to be removed or disabled."
• The notice must be signed.

Upon receiving a valid counter notification, the University will provide the person who filed the original notification with a copy of the counter notice and inform them that the material will be reinstated or access to it restored between 10 and 14 business days following receipt of the counter notice, pursuant to the DMCA unless the University receives notification that legal action to seek a court order restraining the alleged infringer from further engaging in the infringing activity has been filed.
Vaccinations and Immunizations

Information regarding program admissions requirements, including immunization requirements for designated states is located at http://www.phoenix.edu/admissions/admission_requirements.html.

Campus Safety Policies

The University Campus Safety policies have been prepared to increase University of Phoenix community’s awareness of current programs that exist to protect its members’ safety and well-being and to satisfy the requirements of the Safe and Drug Free Schools and Communities Act and Clery Act. The information included relates to the following:

- Annual crime statistics
- Safety and awareness
- Crime prevention
- Drug and alcohol abuse
- Health risks
- Available counseling programs
- Prohibited use or distribution of drugs and alcohol
- Legal affects of drug and alcohol use
- Emergency Mass Notification
- Information related to campus safety

The information is intended to provide a general description of University of Phoenix campus safety policies; however, it is not intended to serve as a contractual agreement between the University and the recipient. Additionally, the University will disseminate and publicize, for each of its campus locations, crime statistics from the most recent calendar year and two preceding calendar years. Specific campus location statistics are available electronically at www.phoenix.edu/about_us/campus_safety.html or by requesting a printed copy from your local campus security authority.

Campus Crime Statistics

Crimes Reported for All Campuses

This report is compiled in conjunction with University of Phoenix Campus Safety Policies. The following statistics are in accordance with definitions used in the Uniform Crime Reporting System of the Department of Justice, FBI, as modified by the Hate Crime Statistics Act. The data includes all crimes reported to the University of Phoenix campus security authority. If a crime has occurred and has not been reported, it cannot be reflected in the following statistics. For this reason, University of Phoenix encourages everyone to report all crimes to their designated campus security authority and local law enforcement agency. Specific campus location statistics are available electronically at http://www.universityofphoenix.com/about_us/campus_crime_statistics.aspx or by requesting a printed copy from your local campus security authority.

University of Phoenix expressly reserves the right to modify or to adopt additional campus polices and procedures relating to campus safety, at any time without notice.

Statement of Policy On Sex Offender Registration

The Federal Campus Sex Crimes Prevention Act requires colleges and universities to issue a statement advising the campus community where state law enforcement agency information concerning registered sex offenders may be obtained. The Act also mandates that sex offenders who are already required to register in a state to provide notice of each institution of higher education in that state at which the offender is employed or is a student.

To learn the identity of registered sex offenders on or near a campus, or anywhere in the United States, visit the Sex Offender databases at http://www.sexoffender.com or http://nsopr.gov. You can search by city, county, or zip code. This information is collected by other agencies and this institution cannot guarantee this information is correct or complete. The information provided here is intended to be in compliance with the Campus Security Act and for campus safety purposes only. It should not be used to intimidate, threaten, or harass. Misuse of this information may result in prosecution.

Emergency Mass Notification Policy

Apollo Group, Inc., and University of Phoenix have established an emergency mass notification process that includes emergency escalation processes, mass notifications and supporting systems. These processes enable Apollo, and its subsidiary educational institutions to contact or send notices, alerts or warnings without delay to employees for Apollo, and University of Phoenix faculty, and students in an emergency, dangerous or otherwise high-risk situation at a University site.

Apollo and University of Phoenix maintain emergency management policies, procedures and systems to protect lives and property, and to continue necessary critical functions and essential services. An emergency is defined as a situation that poses an immediate threat to the health or safety of someone in the University community at a University site or that significantly disrupts Apollo programs and activities. The Emergency Mass Notification policy applies to all officers and employees for Apollo, Apollo’s U.S. based subsidiaries, faculty, and students of University of Phoenix in an emergency, dangerous or otherwise high-risk situation at a University site.

The policy can be viewed in its entirety in the Campus Safety Policies at http://www.phoenix.edu/about_us/campus_safety/campus_safety_policies.html, or by requesting a printed copy from your local campus.

Campus Security Authority Contact List

University of Phoenix campus security authorities assist in the safety of the University community by serving as contacts for University security issues. Contact information for all campus security authorities can be viewed at www.phoenix.edu/about_us/campus_security/campus_security_authority.html.

Drug and Alcohol Abuse Prevention Program

Drug abuse affects all aspects of American life. It threatens the workplace, our homes, our schools and our community. The U.S. Department of Education requires institutions of higher education to implement a drug prevention and awareness program for their students and employees through the Safe and Drug Free Schools and Communities Act.

All students are expected to conduct themselves as mature adults and as members of an academic community. The consumption of alcohol or drugs while attending class or meeting with campus personnel is prohibited and may be subject to disciplinary action. All drug and alcohol abuse policies, prevention and referrals can be found in the Campus Safety Policies Manual located at http://www.phoenix.edu/about_us/campus_safety/campus_safety_policies.html
Standards of Conduct

The University community must adhere to a code of conduct that recognizes the unlawful manufacture, sale, delivery, unauthorized possession or use of any illicit drug is prohibited on property owned or otherwise controlled by University of Phoenix. If an individual associated with the University is apprehended for violating any drug or alcohol related law when on University property, or participating in a University activity, the University will fully support and cooperate with federal and state law enforcement agencies. Underage possession or consumption of alcoholic beverages is not permitted on property owned or controlled by the University and the state laws will be enforced. Also, intentionally or knowingly selling, or intentionally or knowingly furnishing alcoholic beverages to persons under the age of 21, or to persons obviously inebriated, is not permitted on property owned or controlled by the University.

Pell Grant

Federal guidelines state the grantee must certify that he or she will not engage in unlawful activities related to controlled substances during the period covered by the grant.

Federal Financial Aid Penalties for Drug Violations

Federal guidelines focus strongly on illicit drug use and distribution. The Higher Education Opportunity Act states students convicted of an illicit drug violation can be denied federal financial aid for a specific period, in addition to other legal penalties. The Free Application for Federal Student Aid (FAFSA) asks students if they have been convicted of a drug-related offense, “Have you ever been convicted of possessing or selling illegal drugs?” If you answer “yes,” complete and submit this application, and we will send you a worksheet in the mail for you to determine if your conviction affects your eligibility for aid. Failure to answer the question automatically disqualifies students from receiving federal financial aid. Answering this question falsely could result in fines up to $20,000, imprisonment or both. More information about federal penalties and sanctions is located at www.usdoj.gov/dea/agency/penalties.htm

Penalties for Drug Convictions:

If the student was convicted of both possessing and selling illegal drugs, and the periods of ineligibility are different, the student will be ineligible for the longer period.

Possession of Illegal Drugs:
  • For a first offense, a student loses eligibility for federal financial aid for one year from the date of conviction.
  • For a second offense, a student loses eligibility for federal financial aid for two years from the date of conviction.
  • For a third offense and subsequent offenses, a student is indefinite ineligibility for federal financial aid from the date of conviction.

Sale of Illegal Drugs:
  • For a first offense, a student loses eligibility for federal financial aid for two years from the date of conviction.
  • For a second offense and subsequent offenses, a student is indefinite ineligibility from the date of conviction.

How to Regain Eligibility

A student can regain eligibility for federal student aid funds they received if after receiving federal financial aid to notify Apollo Financial Aid (AFA) immediately, become ineligible for further federal financial aid and repay federal financial aid received after the conviction.

Institutional Sanctions for Alcohol and Drug Violations

Any member of the University community found consuming or selling alcohol or drugs on University property shall be subject to discipline on a case-by-case basis.

• Discipline will be based on the seriousness of the situation.
• A case may result in dismissal from the University.
• In all cases, the University will abide by local, state and federal sanctions regarding unlawful possession of drugs and the consumption of alcohol.
• Additional state penalties and sanctions may also apply.
• The University has adopted a zero tolerance policy regarding underage drinking.

Title II of the Higher Education Act-Academic Year 2009-2010 Report

In compliance with Title II of the Higher Education Act (HEA), University of Phoenix has submitted institutional questionnaires that detail the University’s program offerings, student demographics and student performance in those states where the University has teacher education programs that have produced program completers also known as graduates. University of Phoenix provides professional preparation for teachers in multiple states. For an overview of the information contained in the Institutional Report for University of Phoenix, go to http://www.phoenix.edu/about_us/regulatory/consumer-information/title-ii-hea-pass-rate-information.html.
STUDENTS’ RIGHTS AND RESPONSIBILITIES

University of Phoenix Supplemental Standards for Candidates in the College of Nursing

Candidates in a College of Nursing program leading to certification or licensure in nursing and/or healthcare at University of Phoenix are subject to greater scrutiny because of their anticipated interactions with students, families, patients and clients in the community. These degree candidates participate in one or more clinical rotations, practicum, and/or preceptorships as part of their academic program. As prospective nurses, nurse practitioners and/or healthcare providers, College of Nursing candidates are expected to represent the University as professionals and adhere to the ethics and standards of their profession as well as the University’s Student Code of Conduct.

The following Supplemental Standards for Candidates in the College of Nursing Programs ("Supplemental Standards") apply to these degree candidates before, during, and after clinical rotations, practicum, and/or preceptorships. The Supplemental Standards address a candidate’s affective attributes and disposition to be nurses, nurse practitioners and/or healthcare providers. A corresponding Professional Dispositions Rubric provides additional guidance.

A candidate’s ability to satisfactorily meet the Supplemental Standards is a matter of ongoing academic judgment made by faculty, campus staff, and campus management.

1. The candidate contributes to a positive climate in the University classroom and all clinical rotations, practicum, and/or preceptorships.
2. The candidate demonstrates mastery of written and spoken language for self-expression, as well as for effective interaction in all settings.
3. The candidate is a thoughtful and responsive listener.
4. The candidate is committed to reflection, assessment, and learning as an ongoing process.
5. The candidate is willing to give and receive help.
6. The candidate is sensitive to community and cultural norms for the degree program, the University classroom, and clinical rotations, practicum, and/or preceptorships.
7. The candidate appreciates and values human diversity and shows respect for others’ varied talents and perspectives.
8. The candidate values the development of critical thinking, independent problem solving, and performance capabilities in himself/herself and those with whom he/she interacts.
9. The candidate demonstrates a commitment to keeping abreast of new ideas and understanding in the nursing and/or healthcare field.
10. The candidate demonstrates a level of responsibility and ethical judgment consistent with professional guidelines developed for these fields and appropriate for professional nurses, nurse practitioners and/or healthcare providers.
11. The candidate maintains the highest ethical standards in interactions with faculty, students, staff, clients, and patients as well as in preparation and submission of required course work, and the completion of tests.

12. The candidate maintains a pattern of exceeding minimal requirements in courses and clinical rotations, practicum, and/or preceptorships.

When it is determined by faculty, campus staff, or campus management that a candidate falls short of meeting any of the above Supplemental Standards, they may file a “Referral Form” with the Campus College Chair, Campus Director of Academic Affairs, or designee. Any candidate who receives one or more referral(s) shall be counseled, remediated, or withdrawn from their program, as appropriate.

Candidates who are separately charged with violating the Student Code of Conduct shall be subject to the policies, procedures, and sanctions for processing such charges. However, a charge under the Student Code of Conduct may also be the basis for a referral on separate academic grounds under these Supplemental Standards. Similarly, an observation under the Referral Process may be the basis for a Student Code of Conduct charge.

Procedure for Processing Referral Forms

The College of Nursing has instituted processes to ensure that candidates are regularly evaluated by the faculty and have access to counseling and advisement on professional requirements. These processes are conducted through collaboration between faculty, campus staff, and campus management who understand the professions and who can offer constructive feedback. It is the intention of the Referral Process to identify a candidate’s deficiencies and promote dialogue on how the candidate can improve and move forward in their program.

During the course of their program, faculty members, through a review of grades and dispositions, will monitor a candidate’s academic progress. The Campus College Chair (CCC), or designee, will serve as the primary point of contact in instances where a remediation plan and/or Candidate Retention Committee are deemed necessary.

A. One Referral

1. Notification of a Referral Form is sent to the candidate in writing by the Campus College Chair or designee identifying the candidate’s deficiencies in meeting the above Supplemental Standards.
2. The candidate must meet with the Campus College Chair or designee to discuss why the referral occurred and whether or not a formal remediation plan or other corrective action is needed.
3. The Campus College Chair or designee may convene a meeting of the Candidate Retention Committee ("CRC") if deemed necessary. If the CRC will be convened, the notification to the candidate shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the CRC.
4. If the CRC will be convened, the candidate shall be provided with ten (10) days to respond to the notification.
5. If the CRC meeting is held, the Committee members shall discuss with the candidate the issues or problems that appear to be hindering his/her academic progress and make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.
6. The CRC shall issue a report explaining the basis for its recommendation.

**B. Two or More Referrals**

1. Notification of a Referral Form(s) is sent to the candidate in writing by the Campus College Chair or designee identifying the candidate’s deficiencies in meeting the above Supplemental Standards.
2. Notification shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the CRC.
3. The candidate shall be provided with ten (10) days to respond to the notification.
4. After the candidate has the opportunity to respond, the Campus College Chair or designee shall convene a meeting of the Candidate Retention Committee.
5. The CRC members shall discuss with the candidate the issues or problems that appear to be hindering their academic progress and make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.
6. The CRC shall issue a report explaining the basis for its recommendation.

**C. Candidate Retention Committee**

1. The CRC is comprised of the Campus College Chair or designee and at least two faculty members.
2. The candidate will be expected to participate in a dialogue with the Committee to exchange ideas on remediation or withdrawal from the program.
3. The candidate will not be permitted to have representation by an attorney or any other third party in this academic meeting.
4. If the CRC recommends that the candidate be withdrawn from the program, and this recommendation is endorsed by the Campus Director of Academic Affairs, the candidate has the right to appeal this decision to the Central Administration Appeals Committee (CAAC) within 10 days of receipt of the decision.
5. The CAAC is generally comprised of at least the Dean and an Associate Dean from the College of Nursing or designee(s), and a Regional Director of Academic Affairs (RDAA).
6. The decision of the CAAC is final.
Candidates who are separately charged with violating the Student Code of Conduct shall be subject to the policies, procedures, and sanctions for processing such charges. However, a charge under the Student Code of Conduct may also be the basis for a referral on separate academic grounds under these Supplemental Standards. Similarly, an observation under the Referral Process may be the basis for a Student Code of Conduct charge.

**Procedure for Processing Referral Forms**

The College of Education has instituted processes to ensure that candidates are regularly evaluated by the faculty and have access to counseling on professional requirements. These processes are conducted through collaboration between faculty, campus staff, and campus management who understand the profession and who can offer constructive feedback. It is the intention of the Referral Process to identify a candidate’s deficiencies and promote dialogue on how the candidate can improve and move forward in their program.

During the course of their program, faculty members, through a review of grades and dispositions, will monitor a candidate’s academic progress. The Campus College Chair (CCC), or designee, will serve as the primary point of contact in instances where a remediation plan and/or Candidate Retention Committee are deemed necessary.

**A. One Referral**

1. Notification of a Referral Form is sent to the candidate in writing by the Campus College Chair or designee identifying the candidate’s deficiencies in meeting the above Supplemental Standards.
2. The candidate must meet with the Campus College Chair or designee to discuss why the referral occurred and whether or not a formal remediation plan or other corrective action is needed.
3. The Campus College Chair or designee may convene a meeting of the Candidate Retention Committee (“CRC”) if deemed necessary. If the CRC will be convened, the notification to the candidate shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the CRC.
4. If the CRC will be convened, the candidate shall be provided with ten (10) days to respond to the notification.
5. If the CRC meeting is held, the Committee members shall discuss with the candidate the issues or problems that appear to be hindering his/her academic progress and make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.
6. The CRC shall issue a report explaining the basis for its recommendation.

**B. Two or More Referrals**

1. Notification of a Referral Form(s) is sent to the candidate in writing by the Campus College Chair or designee identifying the candidate’s deficiencies in meeting the above Supplemental Standards.
2. Notification shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the CRC.
3. The candidate shall be provided with ten (10) days to respond to the notification.
4. After the candidate has the opportunity to respond, the Campus College Chair or designee shall convene a meeting of the Candidate Retention Committee.
5. The CRC members shall discuss with the candidate the issues or problems that appear to be hindering their academic progress and make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.
6. The CRC shall issue a report explaining the basis for its recommendation.

**C. Candidate Retention Committee**

1. The CRC is comprised of the Campus College Chair or designee and at least two faculty members.
2. The candidate will be expected to participate in a dialogue with the Committee to exchange ideas on remediation or withdrawal from the program.
3. The candidate will not be permitted to have representation by an attorney or any other third party in this academic meeting.
4. If the CRC recommends that the candidate be withdrawn from the program, and this recommendation is endorsed by the Campus Director of Academic Affairs, the candidate has the right to appeal this decision to the Central Administration Appeals Committee (CAAC) within 10 days of receipt of the decision.
5. The CAAC is generally comprised of at least the Dean and an Associate Dean from the College of Education or designee(s), and a Regional Director of Academic Affairs (RDAA).
6. The decision of the CAAC is final.
Supervision Programs

Candidates in Education Administration and Supervision Programs

The following Supplemental Standards for Candidates in Administration and Supervision Programs (“Administration Supplemental Standards”) apply to these degree candidates throughout their academic program and internship. The Supplemental Standards address a candidate’s affective attributes and dispositions to be an administrator. A corresponding Administrator Dispositions Rubric provides additional guidance.

A candidate’s ability to satisfactorily meet the Administration Supplemental Standards is a matter of ongoing academic judgment made by faculty, campus staff, and campus management. These supplemental, dispositional standards are adopted from the Administrator Dispositions Index items based on the work of the Council for Chief State School Officers (2003) and the National Association of Secondary School Principals (2001).

1. The administrator candidate believes the purpose of school is student learning and is committed to educating all students.
2. The administrator candidate values and is committed to lifelong learning for self and others.
3. The administrator candidate believes there are a variety of ways in which teachers can teach and students can learn.
4. The administrator candidate is committed to establishing a safe and supportive learning environment.
5. The administrator candidate is committed to high-quality standards, expectations, and performances from self, staff, students, and others.
6. The administrator candidate is committed to ethical principles in decision-making.
7. The administrator candidate believes the school is an integral part of the larger community and is committed to collaborating with families and community members.
8. The administrator candidate believes in involving stakeholders in order to work toward common goals.
9. The administrator candidate values and is committed to timely communication to inform the community and public.
10. The administrator candidate recognizes and addresses the feelings, needs, and concerns of others.
11. The administrator candidate believes that diversity benefits the school and is committed to working effectively with people from all backgrounds.
12. The administrator candidate welcomes responses from others and actively works to form partnerships with parents.
13. The administrator candidate believes that risks must be taken to improve schools.
14. The administrator candidate believes and is committed to continual school improvement.
15. The administrator candidate is committed to motivating others to enhance professional and organizational growth.

When it is determined by faculty, campus staff, faculty supervisors, or campus management that an administrator candidate falls short of meeting any of the above standards, they may file a “Referral Form” with the Campus College Chair or Campus Director of Academic Affairs. Any candidate who receives one or more referral(s) shall be counseled, remediated, or withdrawn from their program, as appropriate.

Candidates who are separately charged with violating the Student Code of Conduct shall be subject to the policies, procedures, and sanctions for processing such charges. However, a charge under the Student Code of Conduct may also be the basis for a referral on separate academic grounds under these Supplemental Standards. Similarly, an observation under the Referral Process may be the basis for a Student Code of Conduct charge.

Procedure for Processing Referral Forms

The College of Education has instituted processes to ensure that administrative candidates are regularly evaluated by the faculty and have access to counseling on professional requirements. These processes are conducted through collaboration between faculty, campus staff, and campus management who understand the profession and who can offer constructive feedback. It is the intention of the Referral Process to identify a candidate’s deficiencies and promote dialogue on how the candidate can improve and move forward in their program.

During the course of their program, faculty members, through a review of grades and dispositions, will monitor a candidate’s academic progress. The Campus College Chair (CCC), or designee, will serve as the primary point of contact in instances where a remediation plan and/or Candidate Retention Committee are deemed necessary.

A. One Referral

1. Notification of a Referral Form is sent to the candidate in writing by the Campus College Chair or designee identifying the candidate’s deficiencies in meeting the above Supplemental Standards.
2. The candidate must meet with his/her Academic Advisor and/or the Campus College Chair or designee to discuss why the referral occurred and whether or not a formal remediation plan or other corrective action is needed.
3. The Campus College Chair or designee may convene a meeting of the Candidate Retention Committee (“CRC”) if deemed necessary. If the CRC will be convened, the notification to the candidate shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the CRC.
4. If the CRC will be convened, the candidate shall be provided with ten (10) days to respond to the notification.
5. If the CRC meeting is held, the Committee members shall discuss with the candidate the issues or problems that appear to be hindering his/her academic progress and make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.
6. The CRC shall issue a report explaining the basis for its recommendation.
B. Two or More Referrals

1. Notification of a Referral Form(s) is sent to the candidate in writing by the Campus College Chair or designee identifying the candidate’s deficiencies in meeting the above Supplemental Standards.

2. Notification shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the CRC.

3. The candidate shall be provided with ten (10) days to respond to the notification.

4. After the candidate has the opportunity to respond, the Campus College Chair or designee shall convene a meeting of the Candidate Retention Committee.

5. The CRC members shall discuss with the candidate the issues or problems that appear to be hindering their academic progress and make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.

6. The CRC shall issue a report explaining the basis for its recommendation.

C. Candidate Retention Committee

1. The CRC is comprised of the Campus College Chair or designee and at least two faculty members.

2. The candidate will be expected to participate in a dialogue with the Committee to exchange ideas on remediation or withdrawal from the program.

3. The candidate will not be permitted to have representation by an attorney or any other third party in this academic meeting.

4. If the CRC recommends that the candidate be withdrawn from the program, and this recommendation is endorsed by the Campus Director of Academic Affairs, the candidate has the right to appeal this decision to the Central Administration Appeals Committee (CAAC) within 10 days of receipt of the decision.

5. The CAAC is generally comprised of at least the Dean and an Associate Dean from the College of Education or designee(s), and a Regional Director of Academic Affairs (RDAA).

6. The decision of the CAAC is final.

Policy on Supplemental Standards for Candidates in College of Education Programs

The University of Phoenix policy on supplemental standards are designed to address affective attributes and dispositions that are required by educators/administrators in their respective professions’ ethics and standards. The dispositions were adapted, in part, from the standards of the Interstate New Teacher Assessment and Support Consortium (INTASC).

The policy states that as prospective educators/administrators, College of Education candidates are expected to represent the University as professionals and adhere to the ethics and standards of their profession as well as the University’s Student Code of Conduct. In addition to the UOPX Student Code of Conduct, candidates in the College of Education are also held to Supplemental Standards because of their anticipated interactions with students, parents, and the school community.

Policy on Nursing Ethics and Professional Competence

The University of Phoenix Policy on Nursing Ethics and Professional Competence is defined as compliance with the following nursing guidelines:

1. University of Phoenix Professional Nursing Responsibilities.

American Nurses Association Code for Nurses.

The policy sets forth expectations and regulations for professional and ethical conduct by students enrolled in the Bachelor of Science in Nursing and Master of Science in Nursing degree programs. The policy states that all forms of unethical behavior or professional incompetence are to be reported and reviewed. Reported violations will be addressed through a formal process to the Campus Ethics Committee.

Expectations for conduct and the standards are discussed in the beginning classes for either the baccalaureate or graduate degree programs. Content supporting this information is provided to students in their program handbooks.

Students’ Right to Privacy

The University of Phoenix maintains compliance with the Family Educational Rights and Privacy Act of 1974 (FERPA), as amended. FERPA defines requirements which are designed to protect the privacy of student records maintained by the University. The law requires that:

1. Students should be provided access to official records directly related to them. Students who wish to see their records must make an appointment or submit a written request through the University Registrar’s Office or local campus office.

2. Students may not remove any materials, but are entitled, at their expense, to one copy of any materials contained in their file, unless a disclaimer appears on the document indicating that the student is not to be given a copy, or if the student waived the rights to the document.

3. Students are given the opportunity for a hearing to challenge such records on the grounds that they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under the law does not include any right to challenge the appropriateness of a grade as determined by the faculty member.

4. Students’ written consent must be received prior to releasing personally identifiable student data from their records to other than a specified list of exceptions.

The University is authorized to release public directory information concerning students. Directory information includes the student’s name, address, phone number, date and place of birth, major field of study, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. Directory information is subject to release by the University at any time unless the Registrar has received a prior written request from the student specifying that the information not be released.

The University is authorized to provide access to student records to University officials and employees who have legitimate educational interests for such access; these are persons who have responsibilities in the University’s academic, administrative, service, or research functions.

A copy of the University’s FERPA policy is available to students through the Registrar’s Office or the student ecampus website at: http://ecampus.phoenix.edu.
The Student Code of Conduct of University of Phoenix supports the University’s mission to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities.

By virtue of membership in the University’s academic community, students accept a responsibility and obligation to abide by this Student Code of Conduct. Conduct, either on or off-campus, that is determined to impair, interfere, or obstruct the opportunities of others to learn or that disrupts the mission, processes, or orderly functions of the University will be deemed misconduct and shall be subject to appropriate disciplinary action.

Misconduct for which students are subject to disciplinary action includes, but is not limited to, the following enumerated violations:

1. Actions, oral statements, and written statements which threaten or violate the personal safety of any member of the faculty, staff, or other students.

2. Harassment that has the effect of creating a hostile or offensive educational environment for any student, faculty, or staff member.

3. Sex discrimination/harassment that has the effect of creating a hostile or offensive educational environment for any student, faculty, or staff member. This includes, but is not limited to, sex discrimination, sexual harassment, unwelcome conduct of a sexual nature, unwelcome sexual advances, requests for sexual favors, and other verbal and nonverbal, or physical conduct of a sexual nature including sexual violence.

4. Stalking, persistently pursuing another person that has the effect of imposing unwelcomed contact and/or communication.

5. Disruptive behavior that hinders or interferes with the educational process.

6. Violation of any applicable professional codes of ethics or conduct.

7. Failure to promptly comply with any reasonable directive from faculty or University officials.

8. Failure to cooperate in a University investigation.

9. Carrying of weapons on campus, at campus-sanctioned events, or when meeting with campus personnel. (This policy is not applicable to students who are law enforcement officers required by law to carry firearms at all times).

10. Using, dealing in, or being under the influence of alcohol or illegal drugs while in class, at campus-sanctioned events, or when meeting with campus personnel.

11. Failure to maintain confidentiality and respect the privacy of personal or professional information communicated about clients, one’s employer, other students or their employers.

12. Falsification, alteration or invention of information, including, but not limited to, any third party document used to apply for financial aid, or lying during a University investigation.

13. Violation of the Student Code of Academic Integrity.

14. Violation of the policy on Acceptable Use of University Computing and Communication Resources for Students and Faculty.

15. Hazing (any action which recklessly or intentionally endangers the mental health or physical health or safety of a student for the purpose of initiation or admission into or affiliation with any University-sanctioned organization).

16. Violation of University regulations and policies (in addition to those regulations and policies covered by items 1-15 above).  

17. Violation of federal, state, provincial, or local laws or regulations that impacts the University’s educational environment.

**Student Code of Academic Integrity**

University of Phoenix is an academic community whose fundamental mission is the pursuit of intellectual growth. Achievement of this mission is dependent upon the development of autonomous thought and respect for the ideas of others. Academic dishonesty threatens the integrity of individual students as well as the University’s academic community.

By virtue of membership in the University’s academic community, students accept a responsibility and obligation to abide by this Student Code of Academic Integrity, which is a part of the Student Code of Conduct. Academic integrity violations include all forms of academic dishonesty, including but not limited to the following:

- Plagiarism - Intentional or unintentional representation of another’s words or ideas as one’s own in an academic exercise. Examples of plagiarism include but are not limited to:
The exact copy of information from a source without proper citation and without use of quotation marks or block quotation formatting. If any words or ideas used in a class posting or assignment submission do not represent the student’s original words or ideas, the student must distinguish them with quotation marks or a freestanding, indented block quotation (for a quotation of 40 or more words), followed by the appropriate citation in accordance with the Publication Manual of the American Psychological Association. When a student copies information from a source, he or she must acknowledge the source with quotation marks or block quotes irrespective of whether or not the source has been formally published.

Paraphrasing statements, paragraphs, or other bodies of work without proper citation using someone else’s ideas, data, language, and/or arguments without acknowledgement.

Presenting work as the student’s own that has been prepared in whole or part by someone other than that particular student. This includes the purchase and/or sharing of work.

Failure to properly cite and reference statistics, data, or other sources of information that are used in one’s submission.

Self-plagiarism, double dipping, or dovetailing - Submission of work that has been previously prepared and turned in without fair citation of the original work and prior approval of faculty. Students who submit assignments that were previously submitted are subject to the same consequences they would face if they plagiarized these assignments. The use of one’s previous work in an assignment requires prior approval from the current faculty member and citation of the previous work.

Fabrication - Falsification or invention of any information, citation, data, or document. This includes the invention or alteration of data or results, or relying on another source’s results in any assignment without proper acknowledgement of that source. Fabrication includes citing sources that the student has not actually used or consulted.

Unauthorized assistance - Use of materials or information not authorized by the faculty member to complete an academic exercise, or the completion of an academic exercise by someone other than the student.

Copyright infringement - Acquisition or use of copyrighted works without appropriate legal license or permission which includes peer-to-peer file sharing.

Any unauthorized distribution of copyrighted material, including peer-to-peer file sharing, including illegal downloading or unauthorized distribution of copyrighted materials using the University information technology system may subject a student to civil and criminal liabilities.

Refer to: http://www.copyright.gov/title17/92chap5.pdf for information on federal copyright infringement and remedies.

Misrepresentation - Falsely representing the student’s situation to faculty when (1) justifying an absence or the need for a complete grade; or (2) requesting a makeup exam, a special due date, or extension of a syllabus or class deadline for submitting a course requirement.

Collusion - Helping or allowing another student to commit any act of academic dishonesty.

Procedure for Processing Alleged Violations of the Student Code of Conduct:

A. Alleged Violations:

1. An alleged violation of the Student Code of Conduct, unless related to student records or sex discrimination/harassment, shall be forwarded to the Campus Director of Academic Affairs, the Campus Director of Operations, or their designee.

2. An alleged violation of the Student Code of Conduct relating to student records shall be forwarded in writing to the Registrar.

3. An alleged violation of the Student Code of Conduct that relates to sex discrimination/harassment shall be forwarded to the university’s Title IX Coordinator, Camie Pratt, Associate Vice President, Office of Dispute Management, 4615 E. Elwood Street, Mailstop AA-S401, Phoenix, AZ 85040, 602.557.3391, Camie.Pratt@phoenix.edu or designee.

4. All alleged violations of the Student Code of Conduct shall be subject to a fair and impartial process in determining whether or not a violation has occurred.

5. An alleged violation of the Student Code of Conduct may result in a warning or it may be subject to review by a committee as described below.

B. Investigation:

1. Alleged violations of the Student Code of Conduct shall be investigated in a prompt, thorough, impartial, and reasonable manner.

2. The investigation shall gather relevant evidence, including, but not limited to, pertinent documents and statements from witnesses. Title IX investigations will be conducted within 60 days barring any unusual complexity.

3. While an alleged violation of the Student Code of Conduct is being investigated, a student may be removed from class, campus-sanctioned events, and other University functions after review and consultation with Apollo Legal Services and/or the Office of Dispute Management.

C. Notification:

1. A student who is charged with a violation of the Student Code of Conduct shall be notified of the specific charge(s) in writing by United Parcel Service (UPS) and/or by additional means which may validate proof of receipt, and shall be given ten days to submit a written response to the designated University official. (Note: If this is a drug and/or alcohol related offense you must also notify the Office of Dispute Management.)

2. Failure of a student to respond to the Charging Letter shall result in suspension from the University following completion of the current course if the student is then actively attending classes and is not subject to immediate suspension.

3. In those instances where the campus determines the conduct does not warrant a Charging Letter, it may choose to issue a Warning Letter and/or provide counseling to the student. Note: A Warning Letter is not appealable.

4. In Title IX cases the complainant(s) shall be notified of the conduct procedures and notified of when and if a Charge Letter or warning is sent to the respondent(s).
D. Student Response

1. A student response acknowledging guilt will be sent to the Campus Director of Academic Affairs, the Campus Director of Operations, the Registrar (only in violations relating to student records) or their designee who will determine the appropriate sanctions.

2. In Title IX cases, a student response acknowledging guilt will follow the Title IX committee process outlined below.

3. A student response denying the charge(s) will follow the committee process outlined below.

E. Committees:

1. Campus Committee:
   a. After the campus investigation is completed and the student has responded to the Charging Letter, a Campus Committee shall be convened to review the file and make findings and recommendations to the Campus Director of Academic Affairs or the Campus Director of Operations (a designee may be appointed if the Director has recused himself/herself).
   b. The Campus Committee shall be chaired by a full-time campus administrator.
   c. The Campus Committee composition shall be at least three impartial individuals who have no prior involvement with the student or the investigation: a campus administrator, a faculty member, and a student representative.
   d. The Campus Committee shall use the preponderance of the evidence standard of proof (more likely than not) to weigh the evidence and make a recommendation to the Director of Academic Affairs or designee about whether a violation occurred and what sanction, if any, is warranted.

2. Registrar’s Committee:
   a. After the Apollo Ethics and Compliance Department’s investigation is completed and the student has responded to the Charging Letter, a Registrar’s Committee shall be convened to review the file and make findings and recommendations to the Registrar (a designee may be appointed if the Registrar has recused himself/herself).
   b. The Registrar’s Committee shall be chaired by an Associate Registrar or Director from the Registrar’s Office (or designee).
   c. The Committee composition shall be at least three impartial individuals, who have no prior involvement with the student or the investigation: an Associate Registrar (or designee), Director or Operations Manager from the Registrar’s Office or designee, a Director from University Services (or designee), and the Director of Student Financial Aid programs or Director of Student Financial Accounting or Campus Director of Finance, as appropriate.
   d. The Registrar’s Committee shall use the preponderance of the evidence standard of proof (more likely than not) to weigh the evidence and make a recommendation to the Registrar or designee about whether a violation occurred and what sanction, if any, is warranted.

3. Title IX Committee:
   a. After the investigation is completed and the student has responded to the Charging Letter, opposing parties will be afforded the opportunity to present written witness statements for inclusion in the Title IX Case Packet.
   b. The Title IX Committee shall be convened to review the file and make findings and recommendations to the Campus Director of Academic Affairs or the Campus Director of Operations (a designee may be appointed if the Director has recused himself/herself).
   c. The Title IX Committee shall be chaired by a full-time campus administrator or designee.
   d. The Title IX Committee composition shall be at least three impartial individuals who have no prior involvement with the parties or the investigation: a director (or designee), a faculty member, and a student.
   e. The Title IX Committee shall use the preponderance of the evidence standard of proof (more likely than not) to weigh the evidence and make a recommendation to the Director of Academic Affairs or designee about whether a violation occurred and what sanction, if any, is warranted.

F. Committee Process:

1. Students shall be afforded the opportunity to address the Committee to make a statement in their defense. This may be done via teleconference. (Note: In Title IX cases opposing parties are afforded the opportunity to separately address the committee to make a statement).

2. Students are not entitled to representation by an attorney or any other third party at any point in the process. However, in accordance with the Higher Education Opportunity Act (HEOA), in cases of an alleged sex discrimination/harassment, opposing parties are entitled to have third parties present during the committee process. (Note: The third party cannot be an attorney).

3. Tape, digital, or other electronic recording of the committee meeting is not permitted.

4. The Committee members are given a "Case Packet" with all relevant information for the committee meeting, including any written response received from the student. In Title IX cases, the Case Packet will include opposing parties’ statements, all evidence discovered during the investigation, and any written witness statements the parties have submitted.

5. The Committee members sign a standard Confidentiality Statement for Committee Members and, after the Committee’s deliberations; the Case Packets are collected and destroyed in order to maintain confidentiality.

G. Decision:

1. For campus cases, the Committee Chair delivers a summary report, generally containing Findings of Fact, Conclusions, and Recommendations, to the Campus Director of Academic Affairs or the Campus Director of Operations (or designee), who has the ultimate authority to accept, reject, or modify the recommendations of the Campus Committee and render the decision.

2. For Registrar cases, the Committee Chair delivers a summary report, generally containing Findings of Fact, Conclusions, and Recommendations, to the Registrar (or designee), who has the ultimate authority to accept, reject, or modify the recommendations of the Registrar’s Committee and render the decision.
3. For Title IX cases, the Committee Chair delivers a summary report, generally containing Findings of Fact, Conclusions, and Recommendations, to the Campus Director of Academic Affairs or the Campus Director of Operations (or designee), who has the ultimate authority to accept, reject, or modify the recommendations of the Title IX Committee and render the decision.

4. The decision shall be communicated to the student by the decision maker. The decision shall be delivered by United Parcel Service (UPS) and/or by additional means which may validate proof of receipt. In Title IX cases, opposing parties will receive notice of the outcome of the complaint within 30 days of the close of the investigation. (Note: If this is a drug and/or alcohol related offense you must also notify the Office of Dispute Management.)

5. In accordance with the requirements under the Higher Education Opportunity Act (HEOA), upon written request, the University of Phoenix will disclose to an alleged victim of a crime of violence, or a non-forcible sex offense, the results of any disciplinary hearing conducted by the institution against the student(s) who is/are the alleged perpetrator of the crime or offense. If the alleged victim is deceased as a result of the alleged crime or offense, the University of Phoenix will provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.

6. In accordance with the requirements under the HEOA, in cases of an alleged sex discrimination/harassment, opposing parties will be informed of the committee determination, including any sanction that is imposed.

7. Any decision which affects a student’s enrollment or academic status shall be communicated to the Registrar’s Office for records update.

H. Sanctions:

1. If a violation is found, disciplinary sanctions shall be based on the seriousness of the situation and may include, but are not limited to, documented counseling by a University staff member, loss of academic credit, action plan (must be approved by the Office of Dispute Management), suspension and/or expulsion.

2. A recommendation of expulsion by the decision maker shall be automatically reviewed by the Student Discipline Review Committee in the Office of Dispute Management and must be endorsed before the campus communicates that sanction to the student.

I. Appeals:

1. In those instances where students are found to be in violation of the Student Code of Conduct after receiving a Charging Letter, they may appeal the decision to the Student Discipline Review Committee (SDRC) in the Office of Dispute Management (ODM) within ten days of receiving the campus decision. In Title IX cases, opposing parties shall be afforded the opportunity to appeal within 10 days of receiving notice of the outcome and if an appeal is filed each party shall receive notice of the other party’s appeal.

2. The SDRC is usually comprised of a senior manager from the University, a Regional Director of Academic Affairs, and an Associate or Assistant Dean from the accused student’s college (or their respective designee). The decision of the SDRC is final and shall be communicated directly to the student and the campus except in the case of a decision by the SDRC supporting a campus recommendation of expulsion (see H.2. above).

3. If the sanction against the student is expulsion, the review of the appeal shall be conducted by the Senior Management Review Committee (SMRC) in the Office of Dispute Management. The SMRC is usually comprised of the Provost, the Vice President of University Services, and the Dean of the accused student’s college (or their respective designee). The decision of the SMRC is final and shall be communicated directly to the student and the campus.
The following policy and procedures are to be used to resolve disputes by both current and former students of the University. Students are encouraged to bring the concerns outlined below to the attention of the appropriate individual/department, as set forth in Step One below. These individuals/departments will investigate and resolve such concerns accordingly. A covered dispute is subject to the conditions below and may be submitted to the formal Dispute Resolution Procedures set forth in this section if not satisfactorily resolved through the prior intervention of Step One.

In connection with the University policies identified in Step One below, this policy is intended to address disputes between a student and the University and create a framework by which students and the University can resolve all such disputes arising from a student's interactions with the University. Although the University strongly recommends utilization of the resources identified in Step One to resolve such disputes, the only dispute resolution policy that is mandatory is the arbitration policy. Arbitration is the exclusive means by which all covered disputes asserted by either a student (whether current or former) or the University, involving justiciable disputes and/or any justiciable matter arising from the student's interactions with the University, shall be decided and finally resolved.

Claims and/or disputes covered by this policy fall into one of two levels:

- Level One disputes involve alleged violations of state or federal law, any statutory or common law tort claim or alleged breach of contract claim, claims of discrimination or harassment pursuant to state or federal law, or any other issue of a substantial nature. If not resolved sooner, Level One disputes may be processed through all three steps of the following Dispute Resolution Procedures.
- Unless such issue involves a violation of law, issues of a lesser nature, for example, Student Code of Conduct violations, general student grievances, academic issues and grade disputes, etc. are considered Level Two disputes and if not resolved sooner may be processed only through Step One of the following Dispute Resolution Procedures.

**Step One: Internal Resolution**

Students should first attempt to resolve any dispute or issue related to the following subject matters, or like subject matters, by contacting the following individuals/departments, and utilizing the process set forth in the corresponding section(s) of the Academic Catalog, as referenced below. Please note that the information provided below represents only the initial contact with whom such disputes should be reported. Students should carefully consult the Academic Catalog to gain a fuller understanding of the processes associated with reporting and resolving disputes related to these subject matters.

- Allegations of sex discrimination or sexual harassment: Camie Pratt, Associate Vice President and Title IX Coordinator, Office of Dispute Management (“ODM”). See Nondiscrimination Policy and Harassment Policy in Academic Catalog.
- Allegations concerning all other forms of discrimination: Campus Director of Academic Affairs, Campus Director of Operations, Campus Director of Student Services, or their respective designee. See Nondiscrimination Policy and Harassment Policy in Academic Catalog.
- Student Code of Conduct Violations, other than sex discrimination and sexual harassment: Registrar. See Student Code of Conduct section in Academic Catalog.
- General Student Grievances (other than sex discrimination and sexual harassment): Office of Dispute Management. See General Student Grievances section in Academic Catalog.
- Student Grievances relating to financial aid, account balances, or collections: Campus Management. See General Student Grievances section in Academic Catalog.
- Academic Issues: Student Appeals Center in ODM. See Student Appeals Center Section in Academic Catalog.
- Grade Disputes: Director of Academic Affairs or designee. See Grade Disputes section in Academic Catalog)

**Step Two: Mediation**

If a Level One dispute is not resolved as a result of Step One, then prior to proceeding to Arbitration, all parties are encouraged to participate in a formal mediation session facilitated by a professional, neutral mediator. Mediation is not mandatory but is strongly encouraged as an effective way to resolve disputes. Mediation is not a mandatory prerequisite to arbitration.

The physical location for the mediation shall be mutually selected by the parties. If the parties elect mediation, the student is required to pay the sum of $100 towards the mediation costs, which amount shall be paid directly to the mediator. Any other costs associated with the mediation shall be paid by the University. Both the student and the University shall submit in writing to the other the name(s) of one or more professional, neutral mediators as a potential mediator in the matter. The parties will exercise their best efforts to agree on the selection of a mediator. If the parties cannot agree on the selection of a mediator, then the parties can submit the matter to the American Arbitration Association for the purpose of having a neutral mediator appointed.

The mediator shall schedule the mediation as expeditiously as possible. All parties will have the opportunity to attend and participate in the mediation. Any party may be represented by counsel of his or her choosing, at his or her own expense. The mediator shall direct how the mediation will be conducted. As with all mediations, any resulting resolution must be agreed to by the parties, which shall constitute a final and binding resolution of the matter.
Step Three: Binding Arbitration

1. This Binding Arbitration provision ("Arbitration Agreement") is governed by the Federal Arbitration Act, 9 U.S.C. § 1 et seq. and evidences a transaction involving commerce. This Arbitration Agreement is a condition of becoming enrolled with the University. This Arbitration Agreement applies to any covered dispute arising out of or related to the student’s interactions with the University. Nothing contained in this Arbitration Agreement shall be construed to prevent or excuse the student from utilizing the University’s existing internal procedures for resolution of complaints, as set forth in Step One above, and this Arbitration Agreement is not intended to be a substitute for the utilization of such procedures. Except as it otherwise provides, this Arbitration Agreement is intended to apply to the resolution of disputes that otherwise would be resolved in a court of law, and therefore this Arbitration Agreement requires all such disputes to be resolved only by an arbitrator through final and binding arbitration and not by way of court or jury trial. Such disputes include without limitation disputes arising out of or relating to interpretation or application of this Arbitration Agreement, including the enforceability, revocability or validity of the Arbitration Agreement or any portion of the Arbitration Agreement. Regardless of any other terms of this Arbitration Agreement, claims may be brought before an administrative agency if applicable law permits access to such an agency notwithstanding the existence of an agreement to arbitrate. Such administrative claims include without limitation claims or charges brought before the U.S. Department of Education, State Boards of Education, or the Office of Federal Contract Compliance Programs.

2. Notwithstanding any other language in this Arbitration Agreement, a student’s Enrollment Agreement, the Academic Catalog or any other University policy or practice, this Arbitration Agreement will not be unilaterally revised, modified or eliminated by the University with respect to any covered dispute after that dispute has been submitted to arbitration pursuant to this Arbitration Agreement. The University will not revise, modify or eliminate this Arbitration Agreement without giving at least thirty (30) days written notice to Students.

3. The parties shall select the neutral arbitrator and/or arbitration sponsoring organization by mutual agreement. If the parties cannot mutually agree to an arbitrator and/or arbitration sponsoring organization, the arbitration will be held and the arbitrator selected under the auspices of the American Arbitration Association ("AAA"). Except as provided in this Arbitration Agreement, the arbitration shall be held in accordance with the then current Commercial Arbitration Procedures of the AAA. The AAA rules are available at (www.adr.org). However, nothing in said rules or procedures and/or any modification thereto shall affect the enforceability and validity of the Class Action Waiver, including but not limited to, the provision that the enforceability of the Class Action Waiver may be determined only by a court and not by an arbitrator. Unless the parties jointly agree otherwise, the arbitrator shall be either an attorney who is experienced in the subject matter at issue and licensed to practice law in the state in which the arbitration is convened, or a retired judge.

4. The party bringing the claim must demand arbitration in writing and deliver the written demand by hand or first class mail to the other party within the applicable statute of limitations period. Any demand for arbitration made to the University shall be provided to the Legal Department, at 4025 S. Riverpoint Parkway, Mail Stop: CF-KX01, Phoenix, Arizona 85040. The arbitrator shall resolve all disputes regarding the timeliness or propriety of the demand for arbitration. A party may apply to a court of competent jurisdiction for temporary or preliminary injunctive relief in connection with an arbitrable controversy, but only upon the ground that the award to which that party may be entitled may be rendered ineffectual without such provisional relief.

5. In arbitration, the parties will have the right to conduct adequate civil discovery, bring dispositive motions, and present witnesses and evidence as needed to present their cases and defenses, and any disputes in this regard shall be resolved by the arbitrator.

6. CLASS ACTION WAIVER: There will be no right or authority for any dispute to be brought, heard or arbitrated as a class, collective or representative action or as a class member in any purported class, collective action or representative proceeding ("Class Action Waiver"). Notwithstanding any other clause contained in this Arbitration Agreement, any claim that all or part of the Class Action Waiver is unenforceable, unconscionable, void or voidable may be determined only by a court of competent jurisdiction and not by an arbitrator.

7. Each party will pay the fees for his, her or its own attorneys, subject to any remedies to which that party may later be entitled under applicable law. The University shall initially bear the administrative costs associated with the conduct of the Arbitration, subject to: (1) a one-time payment by the student toward these costs equal to the filing fee then required by the court of general jurisdiction in the state where the student in question attended the University; and (2) any subsequent award by the Arbitrator in accordance with applicable law.

8. The Federal Rules of Evidence shall apply. The arbitrator shall have jurisdiction to hear and rule on pre-hearing disputes and is authorized to hold pre-hearing conferences by telephone or in person, as the arbitrator deems necessary. The arbitrator shall have the authority to entertain a motion to dismiss and/or a motion for summary judgment by any party and shall apply the standards governing such motions under the Federal Rules of Civil Procedure and applicable federal common law.
9. Within 30 days of the close of the arbitration hearing, any party will have the right to prepare, serve on the other party and file with the arbitrator a brief. The arbitrator may award any party any remedy to which that party is entitled under applicable law, but such remedies shall be limited to those that would be available to a party in his or her individual capacity in a court of law for the claims presented to and decided by the arbitrator, and no remedies that otherwise would be available to an individual in a court of law will be forfeited by virtue of this Arbitration Agreement. The arbitrator will issue a decision or award in writing, stating the essential findings of fact and conclusions of law. Except as may be permitted or required by law, as determined by the arbitrator, neither a party nor an arbitrator may disclose the existence, content, or results of any arbitration hereunder without the prior written consent of all parties. A court of competent jurisdiction shall have the authority to enter a judgment upon the award made pursuant to the arbitration.

10. It is against University policy for any student to be subject to retaliation if he or she exercises his or her right to assert claims under this Arbitration Agreement. If any student believes that he or she has been retaliated against by anyone at the University, the student should immediately report this to ODM.

11. This section entitled "Binding Arbitration" is the full and complete agreement relating to the formal resolution of student-related disputes in arbitration. Except as stated in paragraph 6, above, in the event any portion of this Arbitration Agreement is deemed unenforceable, the remainder of this Arbitration Agreement will be enforceable. If the Class Action Waiver is deemed to be unenforceable, the University and the student agree that this Arbitration Agreement is otherwise silent as to any party’s ability to bring a class, collective or representative action in arbitration.
Admission Statuses

Registration

Registration and payment of tuition are required prior to the start of each course. A new application fee is not required for students transferring from WIU. Students who register in a financial aid eligible program may qualify for financial aid in accordance with federal regulations.

Students must sign an Enrollment or Disclosure Agreement for the degree program which they intend to pursue. Students who change programs or who reenter after an absence of one year or more must sign a new Enrollment or Disclosure Agreement.

The student’s enrollment agreement defines the student’s curriculum and degree requirements. The executed enrollment agreement will be effective for a one year time period from the date signed. If the student has not started their program within this timeframe, the student will be required to submit new admissions paperwork (application and Enrollment/ Disclosure Agreement) and update to the most recent version available at their campus.

Admission Statuses

There are twelve types of admission statuses at the University of Phoenix representing a student’s standing: Registered, Registered with International Credentials, Admission Deadline Exceeded, Conditional, Orientation Pending, Graduate Provisional, Admitted, Deferred, Non-Degree, Denied for Cause, Denied, and Reentry. Applicants to certain degree programs are permitted to begin their course of study under Registered, Registered with International Credentials and Provisional admissions statuses, but are not considered unconditionally admitted until the Office of Admissions and Evaluation grants a status of Admitted and all transfer credits are reviewed for applicability to the degree program.

Official decisions regarding admission and academic statuses may be delivered to students via the student website or US Mail.

Admitted (AM) Status

The Office of Admissions and Evaluation in University Services grants a student Admitted status after all documents have been received, the applicant’s admission file has been officially reviewed, and all admission requirements have been met. All materials to obtain admission should be submitted by the end of the second course. No student may enroll in the fourth course without admission being granted. This provides the University the necessary information to develop individualized program schedules for each student and provides an opportunity for an admission decision to be made early in the program.

Graduate Provisional (PV) Status

Students who meet all admission requirements in graduate programs except the minimum GPA requirement of 2.50 or 3.00 (see program specific admissions requirements) may be admitted on Provisional status if their entrance GPA is between 2.0 and 2.49 or 2.50 and 2.99 depending on the program of interest. Students admitted on provisional status must achieve a GPA of 3.0 in their University of Phoenix course work at the end of their fourth completed program applicable course to be unconditionally admitted and placed on Admitted status. Failure to meet the minimum grade point average (GPA) of 3.0 by the fourth completed program applicable course will result in a DA (Disqualified Admission) student academic status and a PD (Program Disqualification) program academic status. Students who are disqualified from their program are not eligible to reenter that program for a minimum of three years and are not eligible for readmission into an alternate program until the lapse of six months from the date of disqualification.

Registered (RR) Status

Students qualify for registered status upon completion of the application for admission and payment of the application fee (if applicable). Qualified degree-seeking students in the business, human services, management, education, counseling, computer information systems, psychology or nursing programs may attend a maximum of four courses under registered status. The University makes no guarantees of a favorable admission to students enrolled in course work under registered status.

Registered International Credentials (RI) Status

Students using copies of international academic credentials qualify for registered with international credentials status upon completion of the application for admission and payment of the application fee (if applicable). Students will not be granted unconditional admission using copies of international credentials until verification of the credentials or an original international academic record is received. Qualified degree-seeking students in the business, human services, management, education, counseling, computer information systems, psychology or nursing programs may attend a maximum of four courses under registered status. The University makes no guarantees of a favorable admission to students enrolled in course work under registered with international credentials status.
Orientation Pending (OP) Status
Undergraduate degree applicants with less than 24 credits of previous college credit/experience as listed on their admissions application will be granted Orientation Pending (OP) admitted status after all admission documents have been received, the admission file has been reviewed, and all admission requirements for the chosen program have been met. As a condition of admission, students on Orientation Pending (OP) admitted status must satisfactorily complete the University Orientation prior to gaining unconditional admission status.

Deferred Admission (DF) Status
Students will be granted deferred admission (DF) if documents or information required for admission (AM) are missing from the file. Students will remain on DF status until the required documents or information is received. Students on DF status cannot attend class and will be administratively withdrawn from the university until the status is resolved.

Conditional (CD) Status
Students who are high school seniors who have not yet graduated may be granted conditional status upon completion of the admission application and payment of any required fees. Scheduling for students is not permitted under this status, and upon completion of high school, students may apply for admission to a specific associate degree program.

Non-Degree (ND) Status
Individuals interested in taking coursework at the University, but not interested in pursuing a degree, may register as non-degree students. Non-degree students enrolling in single courses within a degree or certificate program must meet the admissions requirements for the respective college or school. An approved list of courses is available on www.phoenix.edu under Individual Courses.

Admission Deadline Exceeded (DE) Status
Students who are unable to attain admitted status by the completion of their fourth university course will be placed on Admission Deadline Exceeded (DE) status and be administratively withdrawn from the University.

Denied for Cause (DC) Status
Applicants for admission who have violated a University policy or procedure or committed some other act which, if he or she were already a student, would subject him or her to sanctions for violating the Student Code of Conduct will be placed on denied for cause status (DC) and will be administratively withdrawn from the university.

Denied Admission (DN) Status
Applicants who do not meet the minimum requirements for admission to a program will be placed on denied admission status and be administratively withdrawn from the University.

Re-entry Required (RE) Status
Students who were previously admitted (AM, PV, IV, OP) into a program but have not posted positive attendance in a course for 365 days will be placed on Re-entry Required (RE) admission status. Students placed on Re-entry Required (RE) status will be required to re-enter the most current program/version in their state or jurisdiction and submit an admission application, enrollment agreement and any other documents as required by the new program.

Student Academic Statuses
The following statuses are applicable to students regardless of degree program they are pursuing.

Official decisions regarding your admissions and academic statuses may be delivered to you via your student website or US Mail.

Academic Disqualification
Academic Disqualification results when students on academic probation fail to achieve the minimum grade point average at the conclusion of the probationary period of four (4) consecutive courses. Students who have been Academically Disqualified will be administratively withdrawn from the university and are not eligible for readmission until the lapse of six months from the date of disqualification. The date of disqualification will be the course end date of the final course completed within the AF sequence. No exceptions to the 6 month disqualification will be granted by the Student Appeals Center (SAC). Upon the conclusion of the 6 month disqualification students can petition the Student Appeal Center to return. The student may be required to retake or replace the course(s) with the lowest grade(s) earned. Students on Academic Disqualification may not transfer to another degree program or major until they have fulfilled the requirements for reentry as determined by a SAC appeal. The University will note the date a student is placed on and removed from Academic Disqualification on the permanent transcript. The existing schedule will be deleted and scheduling will be restricted for students placed on Academic Disqualification.

Scholastic Disqualification
Each degree program may have specific Progression Requirements. Failure to meet those Progression Requirements will result in Scholastic Disqualification. For example, Scholastic Disqualification results when a student fails to earn a specified minimum grade in a required progression course. Students who have been Scholastically Disqualified will not be allowed to continue in their degree program until they have fulfilled the requirements for progression as determined by University policy. The University will note the date a student is placed on and removed from Scholastic Disqualification on the permanent transcript. The course that placed the student on Scholastic Disqualification, or its equivalent, may be scheduled, but all other scheduling will be restricted. Students that fail their second attempt of a course for progression in their degree program will be placed on Scholastic Suspension. Students may appeal to the Student Appeal Center to petition to have the Scholastic Suspension removed. The University will note the date a student is placed on and removed from Scholastic Suspension on the permanent transcript.

For details about the Progression Requirements in your degree program, you should carefully review your Program Handbook. If you have any questions about Progression Requirements or Scholastic Disqualification, you should talk to your Academic Representative or College Campus Chair.
NOTE: Students who have been placed on Scholastic Disqualification may not transfer to another degree program or major until they have fulfilled the requirements for progression unless otherwise determined by the Campus Director of Academic Affairs and the Dean of the College for the new program/version.

Expulsion (EX)

Expulsion occurs when a student is administratively withdrawn from the university and not allowed to return under any circumstances. The date of expulsion is noted on the official transcript, any courses on the existing student schedule are deleted and future scheduling is restricted.

Disqualified for Admission (DA) Academic Status

Disqualified for Admission or DA academic status results when students who are admitted provisionally fail to achieve the minimum grade point average (3.0 graduate) at the conclusion of the provisional period of four completed program applicable courses. Students who have been Disqualified for Admission (placed on DA academic status) will be administratively withdrawn from the university and are not eligible to re-enroll until the lapse of six months from the date of disqualification. Approval must be granted by the Student Appeals Center in order to re-enroll into any program with the University. Students placed on Disqualified for Admission (DA) status may not appeal to return before the end of the six month disqualification period. There will be no exceptions.

Students who have been Disqualified for Admission (placed on DA academic status) may not transfer to another degree program or major until they have fulfilled the six month disqualification period and have received approval through a student appeal.

Scholastic Suspension

Scholastic Suspension occurs when a student is suspended for a period of time or indefinitely from the University as determined by appropriate campus officials and/or Central Administration. The student will be administratively withdrawn from the university if placed on Scholastic Suspension. A student may be placed on Scholastic Suspension due to a violation of the Student Code of Conduct or for the failure to meet the minimum grade requirement after the second attempt of a course required for progression in their degree program. The University will note the permanent transcript with the date a student is placed on and removed from Scholastic Suspension. A student may appeal to the Student Appeals Center to have the Scholastic Suspension removed if it is based on progression requirements. A student may appeal to the Student Discipline Review Committee to have the Scholastic Suspension removed if it is based on a violation of the Student Code of Conduct.

Program Academic Statuses

The following statuses are applicable to the specific degree programs students are pursuing if the student changes degree programs, statuses can be adjusted depending on new program requirements.

Official decisions regarding your admissions and academic statuses may be delivered to you via your student website or US Mail.

Withdrawn for Nursing License or Liability Insurance (WL)

Student withdrawn from course for failure to maintain verification of current RN license and/or professional liability insurance in his/her student file. The student will also be administratively withdrawn from the university.

Level 1 Candidate Status

Level 1 Candidate status is determined at the time of matriculation and is based on the admissions requirements for the desired program. Not all programs have a candidate status requirement.

1S: Level 1 Candidate Status Satisfied: Student has met the admissions requirements and has been admitted.

1N: Level 1 Candidate Status has not been satisfied: Student has not met the admissions requirements, has been denied admission, and therefore does not meet the requirements to achieve Level 1 Candidate Status. Students in a 1N Candidate Status should not attend class.

Level 2 Candidate Status

Level 2 Candidate status is a review of additional requirements needed for the student to progress in their program past a certain point, as designated in program policy.

2S: Level 2 Candidate Status Satisfied: Student has met the additional requirements by the specified deadline indicated in the program requirements.

2N: Level 2 Candidate Status Not Satisfied: Student has not met the additional requirements by the specified deadline indicated in the program requirements. A candidate status of 2N restricts the student from attending any future courses until the requirements are met and the student will be administratively withdrawn from the university.

Academic Probation

Academic Probation shall occur when a student’s grade point average falls below acceptable levels. Probation lasts for a period of four consecutive program applicable courses following the course whose grade caused the student’s GPA to fall below the minimum requirement for the program. Concurrent enrollment is prohibited during the four course AP sequence. Associate degree students enrolled at the Online Campus should continue traditional block scheduling format with concurrent enrollment in two courses (excluding AACR & AAPF). In graduate programs, the four course sequence excludes any undergraduate prerequisite courses. Financial Aid and VA students will continue to receive funds during the probationary period.

Program Disqualification

Effective for new enrollments March 1, 2009 and later—Students provisionally admitted (PV), who fail to meet the minimum requirement for admission (AM), will be placed on Program Disqualification (PD) program academic status and Disqualified Admission (DA) academic status. Students who are disqualified from their program are not eligible to reenter that program for a minimum of three years. Students disqualified for admission are not eligible for readmission into an alternate program until the lapse of six months from the date of disqualification.

Students may appeal to reenter into the program from which they were disqualified (PD) or any updated version of the program after a lapse of three years.

Student Falsification of Information

All students applying for admission to the University have the responsibility to submit a complete and accurate application package including all academic and professional credentials required. Submitting incomplete, false, or misleading information may be grounds for dismissal at any time.
General Student Grievances

The University has a responsibility to protect the rights of students and ensure compliance with its nondiscrimination policy by providing a process for those who desire to file a grievance against the University, including any claim of discrimination. Students who are alleging discrimination or harassment, please refer to the Nondiscrimination Policy section or Harassment Policy sections of this catalog.

Other grievances must be submitted in writing to ODM, which will determine the appropriate course of action or render a decision. Grievances relating to financial aid, account balances, or collections must be reviewed by campus management before being submitted to ODM. When such a grievance is received by ODM, the student will be provided guidance to file an appeal to be reviewed by the Financial Grievance Committee (FGC) for a final decision if it cannot be resolved informally.

Student Appeals Center (SAC)

The Student Appeals Center (SAC) is an avenue by which students may request exceptions to academic policy via an appeal. Upon receipt, a SAC appeal is routed to the appropriate decision maker; these individuals have the authority to make exceptions to University policy based upon a student's individual circumstances. Decisions are based upon maintaining the academic integrity of the institution. It is incumbent upon the student to provide their Academic Representative with an appeal letter and all relevant documents and statements of support. The Academic Representative will submit all of this information to SAC electronically.

State Boards

The University of Phoenix is regulated by a large number of state regulatory bodies across the country. The following is a list of those regulatory bodies, with contact information.

- In Alabama, the student may contact the Alabama Department of Postsecondary Education, PO Box 302130, Montgomery, AL 36130-2130; telephone (334) 242-2959.
- In Arizona, the student may contact the Arizona State Board for Private Postsecondary Education, 1400 W. Washington, Room 260, Phoenix, AZ 85007; telephone (602) 542-2399; website: www.azppse.gov.
- In Arkansas, the student may contact the Arkansas Department of Higher Education, 114 East Capitol, Little Rock, AR 72201-3818; telephone (501) 371-2065.
- In California, the student may contact the Bureau for Private Postsecondary Education, C/O Department of Consumer Affairs, PO Box 980818, W. Sacramento, CA 95798-0818; telephone (916) 431-6959, (888) 370-7589.
- In Colorado, the student may contact the Department of Higher Education, Commission on Higher Education, 1300 Broadway Road, Second Floor, Denver, CO 80203; telephone (303) 866-2723, (303) 866-4209.
- In Delaware, the student may contact the Delaware Department of Education, The Townsend Building, 401 Federal St., Suite 2, Dover, DE 19901-3639; telephone (302) 735-4000, 302-735-4120.
- In Florida, the student may contact the Commission for Independent Education, 325 West Gaines Street, Suite 1414, Tallahassee, Florida 32399-0400; telephone (850) 245-3200.
- In Georgia, the student may contact the Nonpublic Postsecondary Education Commission, 2082 East Exchange Place, Suite 220, Tucker, GA 30084; telephone (770) 414-3306.
- In Hawaii, the student may contact the Business Registration Division of the Hawaii Department of Commerce and Consumer Affairs, P.O. Box 40, Honolulu, HI 96810; telephone 808-586-2744.
- In Idaho, the student may contact the Idaho State Board of Education, P.O. Box 83720, Boise, ID 83720-0037; telephone (208) 332-1587.
- In Illinois, the student may contact the Illinois Board of Higher Education, 431 East Adams Street, Second Floor, Springfield, IL 62701-1418; telephone (217) 557-7355; website: www.ibhe.org.
- In Indiana, the student may contact the State of Indiana Commission on Proprietary Education (COPE), 302 W. Washington Street, Room E201, Indianapolis, IN 46204-2767; telephone (317) 464-4400, (317) 232-1324.
- In Iowa, the student may contact the Iowa College Student Aid Commission, 603 E. 12th Street, 5th Floor, Des Moines, IA 50319; telephone (515) 725-3400.
- In Kansas, the student may contact the Board of Regents, 1000 SW Jackson, Suite 520, Topeka, KS 66612-1368; telephone (785) 296-4936, 785-296-4917.
- In Kentucky, the student may contact the Kentucky Council on Postsecondary Education, 1024 Capital Center Drive, Suite 320, Frankfort, KY 40601-8204; telephone (502) 573-1555 ext. 350.
- In Louisiana, the student may contact the State of Louisiana Board of Regents, P.O. Box 3677, Baton Rouge, LA 70821; telephone (225) 342-4253.
- In Maine, the student may contact the Maine State Board of Education (MSBE), 23 State House Station, Augusta, ME 04333-0023; telephone (207) 624-6616.
- In Maryland, the student may contact the Maryland Higher Education Commission, 839 Bestgate Road, Suite 400, Annapolis, MD 21401-3013; telephone (800) 974-0203.
- In Massachusetts, the student may contact the Massachusetts Board of Higher Education, One Ashburton Place, Suite1401, Boston, MA 02108-1696; telephone (617) 994-6937.
- In Michigan, the student may contact the Michigan Department of Education, P.O. Box 30008 (or) 608 W. Allegan, Lansing, MI 48909; telephone (517) 373-9235.
- In Minnesota, the student may contact the Minnesota Office of Higher Education, 1450 Energy Park Drive, Suite 350, St. Paul, MN 55108; telephone (651) 259-3975, (800) 657-3866.
- In Mississippi, the student may contact the Mississippi Institutions of Higher Learning Commission Proprietary School and College Registration Mississippi Commission on College Accreditation, 3825 Ridgewood Road, Jackson, MS 39211; telephone (601) 432-6997.
- In Missouri, the student may contact the State of Missouri Coordinating Board for Higher Education, 205 Jefferson Street, Jefferson City, MO 65101; telephone (573) 751-2361.
- In Nebraska, the student may contact the Coordinating Commission for Postsecondary Education, P.O. Box 95005, Lincoln, NE 68509-5005; telephone (402) 471-0020, (402) 471-2847.
In Nevada, the student may contact the Nevada Commission on Postsecondary Education, 3663 E. Sunset Road, Suite #202, Las Vegas, NV 89120; telephone (702) 486-7330.

In New Jersey, the student may contact the New Jersey Commission on Higher Education, 20 W. State Street, PO Box 542 Trenton, NJ 08625-0542; telephone (609) 292-4310, (609) 984-2709.

In New Mexico, the student may contact the New Mexico Higher Education Department, 2048 Galisteo Street, Santa Fe, NM 87505-2100; telephone (505) 962-4538.

In North Carolina, the student may contact the Board of Governors of the University of North Carolina, General Administration, 910 Raleigh Road Chapel Hill, NC 27515-2688; telephone (919) 962-4538.

In Ohio, the student may contact the Ohio Board of Regents, registration number 1154320, 30 E. Broad Street, 36th Floor, Columbus, OH 43215-3414; telephone (614) 466-6000.

In Oklahoma, the student may contact the Oklahoma State Regents of Higher Education, 655 Research Parkway, Suite 200, Oklahoma City, OK 73104-3603; telephone (405) 225-9100, (405) 225-9142.

In Oregon, the student may contact the Oregon Office of Degree Authorization, 1500 Valley River Dr. Suite 100, Eugene, OR 97401; telephone (541) 687-7478.

In Pennsylvania, the student may contact the Pennsylvania Department of Education, 333 Market Street, Harrisburg, PA 17126-0333; telephone (717) 783-6785.

In Puerto Rico, the student may contact the Consejo de Educacion Superior de Puerto Rico / Puerto Rico Council on Higher Education, PO Box 19900, San Juan, Puerto Rico 00910-1900; telephone (787)-724-7100 ext 2022 or ext 2016.

In South Carolina, the student may contact the Nonpublic Postsecondary Institution Licensing, 1333 Main Street, Suite 200, Columbia, SC 29201; telephone (803) 737-2281.

In Tennessee, the student may contact the Tennessee Higher Education Commission, Parkway Towers, Suite 1700, 404 James Robertson Pkwy, Nashville, Tennessee 37243-0830; telephone (615) 741-3605.

In Texas, the student may contact the Texas Higher Education Coordinating Board, P.O. Box 12788, Capitol Station, Austin, TX 78711; telephone (512) 427-6520.

In Utah, the student may contact the Utah System of Higher Education State Board of Regents, 60 South 400 West, Salt Lake City, UT 84101-1284; telephone (801) 321-7103.

In Virginia, the student may contact the Commonwealth of Virginia Council of Higher Education, James Monroe Building, 101 North Fourteenth Street, Richmond, VA 23219; telephone (804) 225-2600.

In Washington, the student may contact the Washington Higher Education Coordinating Board, PO Box 43430, Olympia, WA 98504-3430; telephone (360) 753-7869, 360.753.7866.

In Washington DC, the student may contact the Government of the District of Columbia Education Licensure Commission, 810 1st Street, NE, 2nd Fl., Washington, DC 20002; telephone (202) 727-2824.

In West Virginia, the student may contact the West Virginia Higher Education Policy Commission, 1018 Kanawha Boulevard East, Suite 700, Charleston, West Virginia, 25301, telephone (304) 558-2101.

In Wisconsin, the student may contact the Wisconsin Educational Approval Board, 201 W. Washington Ave., 3rd Floor, Madison, WI 53703; telephone (608) 266-1996, (608) 266-1996.

In Wyoming, the student may contact the Wyoming Department of Education, Hathaway Bldg., 2Floor, 2300 Capitol Avenue, Cheyenne, WY 82002-0050; telephone (307) 777-5712. You may obtain a copy of the University’s accreditation and/or license documents, or information on how to contact any of the agencies that regulate the University, by contacting Apollo Legal Services at (602) 557-8119.

Grading Procedures

Formal grade reports are available through the student web site upon completion of each course. Grade reports indicate the course taken, credits received, and grade assigned. A student who has failed to make payment for tuition of a course will have the grade withheld until payment is made.

Faculty members are required to post final grades within seven days of completion of the course. The University has established the following grading guidelines to be complied with by all faculty

<table>
<thead>
<tr>

Note: D- is the minimum passing grade for a University course; however, some University programs and courses require higher minimum grades (College of Arts and Sciences, Education, Nursing, Counseling). Minimum grade requirements are documented within policy for those specific programs. Students who receive a grade below the minimum passing grade established for a course will not earn quality points as the grade is considered a failing grade.

A = Outstanding achievement. Student demonstrates intellectual initiative in accomplishing course goals and objectives through high level of originality and creativity.

B = Very good work. Student performance meets designated course goals and objectives by demonstrating understanding of the course materials at an acceptable level.

C = Average work. Student performance demonstrates average comprehension and satisfactory achievement of the course goals and objectives.

D = Unacceptable work. Student performance demonstrates minimum acceptable performance in accomplishing course goals and objectives.

F = Failing. Student performance demonstrates unsatisfactory or below minimally acceptable achievement in accomplishing course goals and objectives.

The IP grade is not calculated into the GPA.

*IP = IN PROGRESS

An IP grade may be awarded in the following instances:

• Faculty are not required to subtract one letter grade for IP grade awards.
• An IP grade is not calculated into the GPA.

*IX = IN PROGRESS EXTENSION

An IX grade may be awarded in the following instances:

• This grade is only awarded to eligible students who require reasonable accommodations under American Disabilities Act (ADA).
• A new IX course completion date must be determined by the Disability Services Advisor and can range from 5 weeks to 15 weeks.
• Students who require reasonable accommodations will not be penalized one letter grade after completing the course to comply with an academic adjustment granted by the University in accordance with the ADA.
• IX grade will default to an F when the course exceeds its expiration date and no grade has been submitted.
• An IX grade is not calculated into the GPA.

*QC = No grade awarded.

A QC is awarded in the following instances:

• This grade may be used for zero credit courses once the attendance requirement has been satisfied.
• A QC grade may automatically post for certain Doctoral and Counseling courses when the IP period expires and no formal grade has been submitted.
• A QC grade is not calculated into the GPA.
• This grade allows students to repeat a course (doctoral dissertations, etc.) without penalizing their GPA.

AU = AUDIT

• Students may register for and audit selected University courses upon campus approval and payment of an audit fee.
• Students who audit a course must meet the following conditions:
  • Students must obtain the campus Director of Academic Affairs approval to enroll in the course.
  • Auditing students are passive participants in the class and are not held accountable for Study Group Task/Team work nor for assignment submission unless otherwise negotiated with the faculty member.
  • Auditing students are governed by all University policies and procedures that apply to non-auditing students.
  • Department chairs determine which courses within their department are appropriate for audit.
  • Auditing students will receive a designation of “AU” on their permanent record which will not carry any academic credit.
  • Auditing students may not change their auditing status after attending one night of the course.

W = WITHDRAWAL

Student withdrew due to exceeding the maximum allowable absences from the course or has been administratively withdrawn by the university. A "W" grade will be issued in the following scenarios:

• The student recorded positive class attendance in at least one scheduled class and failed to meet the class attendance requirements due to exceeding the maximum allowable absences.
• The student recorded positive class attendance in at least one scheduled class and has been administratively withdrawn from the university and/or program during the course.
Student Financial Aid academic year consists of a minimum of 24 credits as a final grade will be required to successfully complete additional grades that are not calculated in the GPA will not qualify as successfully within prescribed timelines. Courses completed with 0 credits and/or progress, he or she must successfully complete the required credit hours.

In order for a student to move forward within a Student Financial Aid academic year and/or meet the standards for satisfactory academic progress, he or she must successfully complete the required credit hours within prescribed timelines. Courses completed with 0 credits and/or grades that are not calculated in the GPA will not qualify as successfully completed courses. Therefore, students receiving a F, W, WF, I, IP or QC as a final grade will be required to successfully complete additional courses to make up for credit deficiency(ies) within their academic year. A Student Financial Aid academic year consists of a minimum of 24 credits and 30 weeks.

Grade Disputes and Grade Corrections

Students should raise concerns or questions about perceived assignment and course grading errors directly with faculty promptly after receiving feedback and grades. No one other than the faculty member teaching the course may determine assignment or course grades for a student. Students are not allowed to submit extra work to raise their grade. Students’ grades represent the work and knowledge level attained within the regularly scheduled course dates. Grades on individual assignments may be changed by the faculty at anytime while the course is in session. Students’ grades may not be changed by the faculty member after final grades have been submitted unless the student initiates the grade dispute process or if the faculty member determines the original grade was improperly calculated.

Students disputing a grade received may contact their Academic Representative, who will assist the student with initiating a grade dispute. However, the decision regarding whether to change the grade rests solely with the faculty member. A grade dispute must be initiated within six (6) weeks of the grade posting date. Grade disputes are not appealable beyond the campus level.

Program Changes

Students wishing to change their program/version must enter into the most current program or version offered in their state or jurisdiction. Students must do this through consultation with their Academic Representative. Students changing into a new program must have documentation on file that meets all admission requirements for the new program being entered. Students who are changing programs to a new program that has employment/work experience/access to work environment requirements must submit a Program Change Addendum. Previously transferred or completed University of Phoenix coursework may not apply to the new program requirements due to differences in degree and content requirements for the new program being entered.

Diploma Application and Degree Conferral

Students must submit a Diploma Application in order for their degree to be conferred. Once students have completed all degree requirements, a Diploma/Certificate Application link will be posted on their student web site at https://ecampus.phoenix.edu under the Important Messages section. If for some reason the link does not appear, students may contact their Academic Representative for a paper copy of the Diploma Application. Once the Registrar’s Office receives the Diploma Application and the student has satisfied all financial obligations to the University, an official audit of the student’s record will be conducted. If all degree requirements have been met, the student will be degree conferred and a Diploma and degree posted transcript will be ordered and mailed to the student.
Posthumous Degrees

The University may present posthumous degrees to the executor of the estate (written authorization required) or immediate family members (notarized affidavit required) of deceased students who were actively enrolled and in good academic and financial standing in a University program at the time of their death. Immediate family members include: spouse, legally recognized domestic partner of the deceased, parents, legal guardians (court document required), children (over the age of 18), and siblings.

Degree Posting

Degrees are posted to students' transcripts on a monthly basis. A student's degree will be posted on his or her transcript with the last day of the month in which all degree requirements are completed. Degree requirements are considered to be met when all credit has been posted to the academic record. The student's individual degree completion date is recorded on the transcript, indicating that all academic requirements for the degree were fulfilled on that date.

Diplomas are ordered bearing the date the degree was posted for all students who have completed degree requirements and who have paid all tuition and fees.

Students who are not eligible for graduation are notified by their Academic Representative of their degree deficiencies.

Graduation with Honors

Bachelor degree students who complete their degree program with a Program Grade Point Average of 3.85 or higher will graduate with Honors distinction. The Honors designation will appear on the University Diploma and permanent transcript.

Participation in Commencement Ceremony

Commencement ceremonies are held at each University campus. Students must also be in good academic and financial standing to be eligible for commencement participation. Associate students who have completed all but 6 credits required for their degree will be permitted to participate in the commencement ceremony. Undergraduate and Graduate students who have completed all but 9 credits required for their degree will be permitted to participate in the commencement ceremony. Doctoral students must satisfy all credit and non credit bearing degree requirements, including a completed dissertation approved by the Dean, prior to commencement eligibility. Certificate students should refer to their local campus for commencement eligibility.

All Bachelors level students who have met the University Honors requirements, and have been degree conferred, will be recognized at commencement ceremonies with the University gold honor cord. (Students must be degree conferred before the ceremony date.)

Per the Massachusetts Board of Higher Education, Online students are restricted from participating in commencement ceremonies held in Massachusetts.

Per the Puerto Rico Council on Higher Education, students enrolled in programs that are not approved for enrollment at the Puerto Rico campus are restricted from participating in commencement ceremonies held in Puerto Rico.

Program Completion Deadlines

Program completion deadlines have been established for all programs offered by the University and are applicable to all continuously enrolled students. Program completion deadlines are calculated based on the first date of positive recorded attendance in the first program applicable course and are listed below:

<table>
<thead>
<tr>
<th>Program</th>
<th>Years for Completion</th>
</tr>
</thead>
<tbody>
<tr>

Disclaimer on Job Placement

The purpose of the degree programs offered by the University of Phoenix is to extend the nature and range of careers available to its students by providing a quality education that integrates theory with practical application. However, the University cannot offer guarantees of job placement, advancement, or continued employment.
ACADEMIC RESEARCH GROUP

Academic Quality and Outcomes Assessment—Ensuring Consistent Quality

Over the last three decades, University of Phoenix has made significant investments in developing and maintaining systems to ensure academic quality. These systems enable the institution to measure and evaluate the University’s effectiveness in meeting its mission and purposes and to use the evidence to continuously improve students’ educational experiences and institutional processes.

The comprehensive nature of the academic quality systems and the data produced, provide the University with significant and meaningful input that is used to review and improve every aspect of the institution. Data gathered from course evaluations and student learning assessments are used in the curriculum development process, as well as in the creation of faculty development tools. Data gathered from the continuous evaluation of institutional processes and systems are used to streamline processes and to make administrative support systems more user-friendly, continuously building on the analysis of information gathered.

Academic Quality Improvement and Outcomes Assessment

Academic quality improvement is an integral part of the organizational culture at University of Phoenix. The University’s Academic Quality Management System (AQMS) is the mechanism used to ensure that the institution is meeting its mission and purposes through continuous assessments based on a comprehensive array of quality control and assurance instruments. One major component of this system is the assessment of student learning.

Assessment of Student Learning

The University’s search for the best ways to assessment student learning and the use of the resulting evidence to guide continuous quality improvement, led to the adoptions of an academic assessment process. The process is comprised of four ongoing and iterative steps. These include:

• Prepare annual assessment plan for academic programs
• Collect and analyze student learning data
• Implement improvements based on assessment results
• Monitor effectiveness of implemented improvements

The academic assessment process provides the means for governing and monitoring the educational experience of our students, and gathering evidence of student learning. The University’s academic assessment process includes an ongoing combination of cognitive measures, such as course embedded assignments, portfolios, and exams, and affective measures that gather information from students, alumni, and employers. The instruments and measures are designed to provide reliable evidence to support continuous improvement of academic programs.

Assessment of Students Educational Experiences and Institutional Processes

Another major component of the AQMS is the assessment of students’ educational experiences and institutional processes. A cadre of instruments and measures are used to monitor the day-to-day educational systems involving student, faculty, curricular, and administrative services.

By performing interim program diagnoses, evaluating faculty adherence to program standards and practices, and making small-scale resource decisions, information from the AQMS is used formatively for assessing quality and compliance.

AQMS Measures and Instruments

Beginning of Program Survey (BOPS)

During the registration process, students are asked to provide basic background information about themselves on the BOPS. Much of the information from the BOPS is used for analyzing outreach trends and for regulatory reporting. However, the BOPS also contributes to assessment in two important ways. First, it is used to obtain basic demographic information about students: age, gender, race/ethnicity, work experience, occupation, and income. Second, students are asked to provide information about their goals in attending the University by identifying their major academic and professional objectives.

Faculty Grading Practices

Accurate and fair evaluation of student academic performance is an important attribute of an effective educational program. Accordingly, measures of grade variance are reported by program. Grade variance for campus and individual faculty members are reported as elements of feedback for self-improvement and compliance with University standards of good practice.

End-of-Program Survey

Students finishing their degree programs complete an End-of-Program Survey. This survey asks graduating students to evaluate their overall University of Phoenix experience in areas such as quality of the education they received, skills and knowledge, and workplace application, as well as career advancement and progression. University officials use the information from this survey to enhance curriculum, instruction, student services, and overall university operations.

Longitudinal Research

Numerous special studies are undertaken to explore trends and issues of potential significance to academic decision-makers. These studies may include enrollment by campus by academic program, persistence and graduation rates by admission status (first-time; lower-and upper-division transfers), gender and race/ethnicity, class size by rating of faculty and educational effectiveness, etc. Emphasis is placed on examining the nature and extent to which students’ educational needs and expectations are being met during the enrollment process, throughout their course work, when they graduate, and in their continuing professional development as alumni.

Additional Research Support

Special studies can be conducted on academic policy, program and organizational effectiveness, and marketing issues necessary to support institutional decision-making. Research support may take several forms, including: a) assistance in reviewing and evaluating externally conducted research, b) assistance with project planning and management for internally based research projects, c) assistance with interpretation of secondary databases, d) analysis and reporting on information contained in various institutional databases, and e) information for campus needs (e.g., marketing based on geographical analysis, etc)
Whether you are a recent graduate or a long-time University of Phoenix alumnus, the Alumni Association is an exclusive benefit of University of Phoenix. Join the association and benefit from this complimentary membership and the valuable services it offers to help transform your future.

Complete your profile today by logging on to your alumni website at alumni.phoenix.edu. Begin connecting with the association and your classmates, and start exploring the benefits available to you:

**Career Resources**
- **Education 2 Career (E2C)** - This new job career portal connects alumni with leading companies that are actively looking to hire University of Phoenix graduates. E2C is an interactive site where alumni can upload resumes, interact with recruiters, get job alerts and more.
- **Alumni Career Center** - Alumni Career Center is powered by CareerBuilder, the largest career website in the United States. The career center is fully equipped with a wide variety of tools and resources that can help alumni market their skills to potential employers.

**Alumni Services**
- **Alumni Directory** - The Alumni Directory connects graduates of University of Phoenix in the same industries or geographical locations and builds a foundation that promotes communication and networking.
- **Mentor Program** - One person can make a huge difference in someone’s career. Be the one. Be a mentor. The program connects students and alumni in the same field of study, industry or location. You can sign up to become a mentor today on the website.
- **Benefits & Savings** - University of Phoenix has partnered with numerous businesses to offer benefits and savings to alumni. Registered members of the Alumni Association can take advantage of the many businesses that offer special rates through the University Marketplace available through the Alumni Association website.
- **Scholarships** - University of Phoenix alumni have the opportunity to “pay forward” their education by nominating someone for the Paying it Forward® scholarship. Each year, 30 full-tuition Paying it Forward scholarships are awarded to individuals seeking to pursue a bachelor’s degree. The Alumni Association also awards thirty-six $3,000 University of Phoenix Alumni Scholarships each year to associate, bachelor’s, master’s or doctoral alumni who are currently enrolled in a subsequent degree program at University of Phoenix. Six full-tuition Forever a Phoenix® scholarships are also awarded each year to alumni who are not currently enrolled in a subsequent degree program to pursue a bachelor’s or master’s degree.
- **Get Connected** - When our network grows, so does yours. Start connecting and networking with fellow graduates by join the Alumni Association on Facebook, LinkedIn, and Twitter.
- **Homecoming** - The Alumni Association hosts more than 70 homecoming events across the country each fall. From sporting events, to exclusive receptions, homecoming offers something for everyone.
- **Phoenix Focus** - The University of Phoenix alumni electronic magazine helps you learn about fellow alumni who are making strides in their careers, and reports the latest on industry trends and career news. Do you have a success story to share? Drop us an email at alumni@phoenix.edu.

Admission Procedures

Application Process
Potential students applying for admission to the University’s undergraduate degree programs begin the admission process by submitting a complete and accurate application. An application which is later verified to contain incomplete, false or misleading information may be grounds for dismissal and administrative withdrawal. Once the application has been received by the University, applicants are responsible for ensuring the completion of their admission file. No applicant will be formally accepted for admission until their admission file is complete and officially evaluated. Formal written notice is provided by the central Office of Admissions & Evaluation upon formal acceptance.

The University will advise students whose admission file documents are required in order to begin a program of study. Students may attend their first four courses under Registered status. Students, however, must submit all admission documentation and gain unconditional admission status prior to the start of their fifth course. Students failing to submit all documentation prior to the end of the required time frame will be administratively withdrawn until formally admitted by the central Office of Admissions & Evaluation. The University cannot guarantee that a student who begins course work under Registered status will be admitted to the degree program.

Undergraduate students who have served in the military service must submit their Army American Council on Education Registry Transcript System (AARTS) or Sailor/Marine American Council on Education Registry Transcript (SMART), Coast Guard Institute (CGI) or discharge papers (DD214) for review for potential transfer credits. This is a requirement if students will be applying for VA educational assistance.

Applications of individuals who have not gained admission to, or enrolled in the University, will be kept on file for one year. After that time, the applicant is required to submit a new application and materials for admission review.

Transcript Requests of Other Institutions
Because institutions vary in the time they take to respond to transcript requests, all transcripts should be requested immediately upon submission of an application. University staff will process all requests for transcripts on behalf of the student. However, it remains the student’s responsibility to ensure that all transcripts are submitted to the University. Students must sign a "Transcript Request Form" for each transcript being requested from educational institutions and national testing programs.

Official Transcript Time Limits
All official transcripts must show an issuance date not more than one year prior to receipt by the University. This is to ensure that all prior course work is reflected on the transcript. Official foreign records do not have the same time limit issuance requirements, as these documents may be difficult to obtain. This exception does not apply to Canada or U.S. territories.

Foreign Academic Records
Students applying to the University with foreign academic records or credentials may have additional requirements that must be met in order to enroll in courses or gain admission due to the differences in educational systems and document requirements.

All academic records from Afghanistan, Somalia or Turkmenistan must be evaluated by an external evaluation service approved by the University of Phoenix.

An applicant submitting academic records from Albania, Algeria, Andorra, Angola, Anguilla, Antigua, Argentina, Armenia, Aruba, Australia, Austria, Azerbaijan, Bahamas, Bahrain, Bangladesh, Barbados, Barbuda, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia-Herzegovina, Botswana, Brazil, British Virgin Islands, Brunei/Brunei-Darussalam, Bulgaria, Burkina Faso, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Cayman Islands, Central African Republic, Chad, Chile, China, Colombia, Congo, Democratic Republic of Congo, Costa Rica, Cote d’Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Czechoslovakia, Democratic People’s Republic of Korea (North Korea), Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, French Guiana, French Polynesia, Gabon, Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guyana, Haiti, Holy See, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kuwait, Kyrgyzstan, Laos People’s Democratic Republic, Latvia, Lebanon, Lesotho, Liberia, Libya Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Mauritania, Mauritius, Mexico, Republic of Moldova, Monaco, Mongolia, Montenegro, Montserrat, Morocco, Mozambique, Myanmar, Namibia, Nepal, Netherlands, Netherland Antilles, New Caledonia, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Palestine, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia (Russian Federation), Rwanda, Saint Barthélemy, Saint Kitts and Nevis, Saint Lucia, Saint Martin, Saudi Arabia, Scotland, Senegal, Serbia, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, South Korea, Spain, Sri Lanka, St. Vincent and The Grenadines, Sudan, Sweden, Switzerland, Syria, Tajikistan, Tanzania, Thailand, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turks and Caicos Islands, Union of Socialist Republics (U.S.S.R.), Ukraine, United Arab Emirates, Uruguay, Uzbekistan, Western Samoa, Venezuela, Vietnam, Yemen, Yugoslavia, Zambia or Zimbabwe may be evaluated internally by the central Office of Admissions and Evaluation or evaluated by an external evaluation service approved by the University of Phoenix. Internal evaluation practices utilized by the central Office of Admissions and Evaluation follow standards and practices defined by the National Association of Foreign Student Administrators (NAFSA) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). Certain programs that lead to certification may require students to have an evaluation performed by an external evaluation agency that is approved by both the University and the state in which the student seeks certification.
Students using foreign academic records to satisfy an admission requirement will not be eligible to attend classes prior to the University receiving a favorable evaluation from an approved credentials evaluation service or evaluation performed by the Central Office of Admissions & Evaluation. Original academic records or copies of academic records that have been verified as authentic by the issuing institution are required to be on file prior to a student gaining unconditional admission to the University. If the academic records are in another language, a certified English translation or translation performed by the Central Office of Admissions and Evaluation (Spanish and French only) is required. The University will accept translations from the issuing institution or an official translation service.

Non-Native Speakers of English
An applicant who does not have appropriate English language experience in an academic environment will not be eligible to attend classes under Registered status. Official documentation with an appropriate score on the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), Pearson Test of English Academic (PTE) or Berlitz Online English Proficiency Exam must be submitted with the admission file and admission granted before the applicant may begin the program.

Admission Appeal Process
Any applicant who has been denied admission to the University has the right to appeal the decision to the Student Appeals Center. All appeals, including any evidence to be considered, must be submitted in writing to the Student Appeals Center. The written appeal may consist of a letter of explanation for academic deficiencies, lack of experience, and any other factors which might be of benefit when the Student Appeals Center conducts its review. It is incumbent upon the applicant to submit all relevant documents and statements of support attached to the appeal letter to the Student Appeals Center. The Student Appeals Center will carefully review all materials submitted, and notify the applicant in writing of its decision within ten working days.

Undergraduate Admission Requirements
Most undergraduate programs have additional admission requirements listed within the program specific information. All applicants are expected to meet the following admission requirements:

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet one of the following exceptions in order to meet the English Language Proficiency Requirement:
  - Achieved a minimum passing score of 213 on the computer-based test (CBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  -or-
  - Achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  -or-
  - Achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  -or-
  - Achieved a minimum score of 75 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  -or-
  - Successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  -or-
  - Achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:

- The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.
- The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
- The applicant has earned the equivalent of a U.S. high school diploma in a country where English is the official language.
- The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
- The applicant has completed four years of active duty service in a branch of the United States military or the United States Coast Guard as verified by appropriate paperwork.
- Applicants (including re-entry students) attending the Puerto Rico campus must meet the English language proficiency requirement for admission.
- Applicants who reside in the United States must meet one of the following requirements:
  - Be a legal resident of the United States
  - Have been granted permanent residency
  - Have a valid visa that does not prohibit educational studies
  - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  - Have been granted asylum along with copy of passport and I-94 bearing the stamp indicating the issue and expiration dates of the Asylee status.
• Applicants who reside in Canada must meet one of the following requirements:
  • Be a legal resident of Canada
  • Be a landed immigrant
  • Have a valid visa that does not prohibit educational studies
• A completed and signed undergraduate application
• A signed Enrollment/Disclosure Agreement.
• Students, who list less than 24 previous college credits as
  • Full-time students enrolled at a public or private institution of
    higher learning in New Jersey are required by law to maintain
    • Be a landed immigrant
    • Be a legal resident of Canada
    • Have a valid visa that does not prohibit educational studies
    • A completed and signed undergraduate application
    • A signed Enrollment/Disclosure Agreement.
    • Students attending a local campus in Oklahoma must provide

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to University Services.

• Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to University Services.

• Full-time students enrolled at a public or private institution of higher learning in New Jersey are required by law to maintain health insurance coverage, either through a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR immunization requirement may be granted for the following reasons:

• A medical exemption may be granted to specific vaccines.
  • A U.S. licensed physician (M.D. or D.O.) must state in writing that giving a specific vaccine would endanger the student’s life or health, and specify the reason based on valid medical contraindications.
  • The physician must state the length of time during which the vaccine would endanger the student’s health or life.
  • The exemption certification must be signed by the physician on the physician’s printed stationery.
• A religious exemption may be granted if the student signs a statement certifying that the student’s religious beliefs prohibit the practice of immunization.
• If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.
• A copy of each exemption must be kept in the student’s health record at school.
The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to University Services.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

- The student was born before January 1, 1957 (applicable to MMR vaccine only).
- The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
- The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
- The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
- The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
- The student has a statement that immunization is contrary to his/her religious beliefs.
- The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.
- The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

**University Orientation Workshops**

Students, who list less than 24 previous college credits as recognized by the University on the admissions application, are required to complete a University Orientation Workshop (UNIV 100 for Online or UNIV 101 for local campus).

Students will be granted Orientation Pending (OP) admitted status once all admission documents have been received, the admission file has been reviewed and all admission requirements for the chosen program have been met. Upon successful completion of the Orientation and evaluation of all transfer credits, students on OP status will be updated and the admission status will be updated to Admitted (AM).

Attendance and participation in the Orientation is required. To successfully complete the Orientation and receive an Orientation Complete (OC), students must attend all three weeks and submit all assignments by the Orientation end date.

Students who do not successfully complete the Orientation will receive an Orientation Not Complete (ON) and will remain on Orientation Pending (OP) admission status. Students will be allowed two attempts to successfully complete the Orientation. After a second unsuccessful attempt, participants are required to sit out for a period of six months after the last posted attendance in the second attempt.

Orientation Extended (OX) status is only awarded to eligible students who require special accommodations. The OX status provides students with an additional 3-9 weeks to complete the Orientation Workshop. If a student does not fulfill the Orientation Workshop requirements at the end of the extension period, the OX status will default to Orientation Not Complete (ON) status. Students may request additional extensions.

The Orientation must be successfully completed prior to enrollment in a credit-bearing degree applicable course. Students, who list more than 24 previous college credits as recognized by the University on the admissions application, are not required to complete a University Orientation Workshop.

Re-entry students who were previously admitted to the University are not required to complete the Orientation upon re-entry to the University.
First-Year Sequence

The following First-Year Sequence is applicable to students starting on or after February 1, 2010. Students who begin courses prior to February 1, 2010 will not be required to complete the First-Year Sequence.

All students entering undergraduate degree programs (other than LVN/BSN, LPN/BSN, BSN, BLS, and BSED/E) who have fewer than 24 previous college credits as recognized by the university on the admissions application are required to complete the following First-Year Sequence:

Courses requiring prerequisites are identified by a ~ symbol following the course number.

GEN 195 (Required as first course)................................. 3 credits
Foundations of University Studies
SCI 163 ................................................................. 3 credits

HUM 186............................................................................. 3 credits
Media Influences on American Culture

Note: Non-Degree students may not enroll in any of the University of Phoenix or Associates First-Year Sequence courses.

Course Descriptions for First-Year Sequence

GEN 195............................................................................. 3 credits
Foundations of University Studies

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

SCI 163 ............................................................................. 3 credits
Elements of Health and Wellness

This course reinforces the concept that learning effectively and living well involves both the mind and body. It presents the fundamentals of wellness and preventive health including strategic planning to attain and maintain personal optimal health. In addition, physical and mental diseases are discussed along with the dangers of environmental pollution, stress, addiction, and other negative factors that can affect personal health.

FP 120 .................................................................................. 3 credits
Essentials of Personal Finance

This course provides an overview of the elements necessary for effective personal financial planning and the opportunity to apply the techniques and strategies essential to this understanding. Primary areas of study include creating and managing a personal budget, understanding and paying taxes, working with financial institutions, wise use of credit cards and consumer loans, financing automobiles and homes, and the use of insurance for protecting one's family and property.

COM 170 .................................................................................. 3 credits
Elements of University Composition and Communication I

This course addresses the key elements necessary for effective academic writing in college. The course begins with focus on pre-writing strategies and builds to drafting and revising essays. In addition, the course includes skill development at the sentence and paragraph level.

COM 172 .................................................................................. 3 credits
Elements of University Composition and Communication II

This course builds upon the foundations established in Com155. It addresses the various rhetorical modes necessary for effective college essays: narration, illustration, description, process analysis, classification, definition, comparison and contrast, cause and effect, and argumentation. In addition, requirements for research essays, including the use of outside sources and appropriate formatting, are considered.

PSY 211 .................................................................................. 3 credits
Essentials of Psychology

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

HUM 114 .................................................................................. 3 credits
Critical Thinking and Creative Problem Solving

This course focuses on developing the critical and creative thinking skills necessary to analyze and solve problems, make decisions, implement strategies, and formulate well supported points of view on key academic, social, and professional issues. The principles of creative thinking are essential to critical thinking skills. Students will learn how to evaluate their ideas and how to communicate their points of view persuasively.

HUM 186 ~ .................................................................................. 3 credits
Media and American Culture

The course provides an introduction to the most prominent forms of media that influence and impact social, business, political, and popular culture in contemporary America. It explores the unique aspects of each medium as well as interactions across various media that combine to create rich environments for information sharing, entertainment, business, and social interaction in the U.S. and around the world.

University of Phoenix, 2012-2013
UNDERGRADUATE PROGRAMS
First-Year Sequence - Online Associate Programs

The following First-Year Sequence is applicable to students starting on or after February 1, 2010. Students who begin courses prior to February 1, 2010 will not be required to complete the First-Year Sequence.

All students entering undergraduate degree programs (other than AAEE) who have less than 24 previous college credits as recognized by the university on the admissions application are required to complete the following First-Year Sequence:

### Course Descriptions for First-Year Sequence for Online Associates

#### Introduction to University Studies

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

#### Principles of Health and Wellness

This course reinforces the concept that learning effectively and living well involves both the mind and body. It presents the fundamentals of wellness and preventive health including strategic planning to attain and maintain personal optimal health. In addition, physical and mental diseases are discussed along with the dangers of environmental pollution, stress, addiction, and other negative factors that can affect personal health.

#### Foundations of Personal Finance

This course provides an overview of the elements necessary for effective personal financial planning and the opportunity to apply the techniques and strategies essential to this understanding. Primary areas of study include creating and managing a personal budget, understanding and paying taxes, working with financial institutions, wise use of credit cards and consumer loans, financing automobiles and homes, and the use of insurance for protecting one’s family and property.

#### University Composition and Communication I

This course addresses the key elements necessary for effective academic writing in college. The course begins with focus on pre-writing strategies and builds to drafting and revising essays. In addition, the course includes skill development at the sentence and paragraph level.

#### University Composition and Communication II

This course builds upon the foundations established in COM 155. It addresses the various rhetorical modes necessary for effective college essays: narration, illustration, description, process analysis, classification, definition, comparison and contrast, cause and effect, and argumentation. In addition, requirements for research essays, including the use of outside sources and appropriate formatting, are considered.

#### Foundations of Psychology

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality, thinking, learning and memory, motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

#### Critical and Creative Thinking

This course focuses on developing the critical and creative thinking skills necessary to analyze and solve problems, make decisions, implement strategies, and formulate well supported points of view on key academic, social, and professional issues. The principles of creative thinking are essential to critical thinking skills. Students will learn how to evaluate their ideas and how to communicate their points of view persuasively.
Academic Progression

Students entering the University bachelor degree programs (other than AAEE, LVN/BSN, LPN/BSN, BSN, B.S.L.S., and BS/ED/E) with fewer than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence. To enroll in the required course of study students must have a minimum of 24 credits. Students who have 24 credits may take select courses in the business foundation. Students must have 60 credits to enroll in the major.

As an alternative, enrollment into major course work also extends to students who have completed 45 credits, of which 21 credits were earned at the University.

Math and English Prerequisites

In line with the mission of the University’s General Education program to ensure that students have reached baseline levels in basic skills before entering into the professional programs, students must satisfy prerequisites in the areas of math and English. Math and English prerequisites may be satisfied in one of the following ways:

- Successful completion of University of Phoenix math and English courses
- Transfer credit may be used by students who have achieved a “C-” or better in a comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill math and English prerequisites must be eligible to receive general education credit.
- Achieve a passing score on the College Mathematics CLEP exam and/or a passing score on the College Composition CLEP exam.
- Students in the state of Florida who have passed the CLAST exam will have satisfied math and English prerequisites. All students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English prerequisites.
- All undergraduate students must fulfill the Spanish prerequisite prior to enrolling in any course that requires Spanish as a prerequisite. The Spanish prerequisite may be fulfilled in one of the following ways:
  - Successful completion of COMM P215 with a passing grade.
  - Achieve a passing score on the Spanish CLEP, AP, Berlitz, or DLPT exam.
  - Transfer credit may be used by students who have achieved a “C-” or better in a comparable course at a regionally or approved nationally accredited institution.

Waivers

The University defines a waiver as the substitution of a required course at the University with a course of the same level listed on an official transcript from another institution. Students may find specific course waiver information after the applicable required course of study. Students requesting course waivers must make formal written requests to the central Office of Admissions & Evaluation, utilizing the Request for Course Waiver Form citing the courses they request to be waived, the courses to be transferred into the required course of study, and the university where the courses were completed.

An official catalog course description must accompany the request. The official transcript from the institution where the course was completed must also be submitted, unless it has previously been submitted to the University as part of the application process.

Degree Requirements

Students must complete the minimum number of upper and/or lower division credits that make up the required course of study. Completion of the Comprehensive General Education Program, including a minimum number of credits distributed among Liberal Arts and Interdisciplinary components is also required. Degree requirements may vary by program and may be found after each required course of study.

Degree Completion Options

Bachelor degree seeking students who have successfully completed the required course of study and need additional academic work in order to fulfill the minimum number of credits required for graduation may choose the following options:

- Complete additional upper or lower division elective courses offered by the University of Phoenix;
- Complete approved CLEP, Excelsior, or DANTES examinations;
- Participate in the Prior Learning Assessment process as described in this catalog; or
- Complete approved courses at other regionally or nationally accredited associate degree granting candidates for accreditation college or university.

Students who need additional academic credits to graduate should contact an Academic representative to ensure that there is no duplication or regression of previously completed course work.

General Education

In its commitment to help working adults achieve their professional and personal goals, the University of Phoenix endorses the role of general education in ensuring student success in the classroom, the workplace, and the community. The general education curriculum, which is developed through the College of Arts and Sciences, provides instruction that focuses on skills in communication, critical thinking, and computation, and fosters a philosophical orientation that enables students to function as productive members of society. The University’s general education program embraces four goals:

- To refine students’ abilities to apply problem-solving skills in many settings and contexts.
- To promote students’ active awareness of their relationships to the natural, social, and cultural environments.
- To develop students’ appreciation for and commitment to lifelong learning.
- To prepare students with competencies needed to fully benefit from and successfully complete their professional programs of study.

Undergraduate general education requirements emphasize the mastery of competencies within the respective frameworks of mathematics and physical sciences, life sciences, technology, communication arts, social sciences, and humanities. Students are required to demonstrate proficiency in written and oral communications, in the handling and use of quantitative information, and the application of analytic and synthetic-creative thinking skills. This background provides students with the perspectives needed for meaningful self-examination of personal and social values, as well as enhanced ability to understand and cope with social, technological, and cultural change.
If elective curriculum is being taken to satisfy graduation requirements, the courses being taken cannot duplicate credits earned in the required course of study, credits earned at other institutions, credits earned through national testing programs, or credits awarded through Prior Learning Assessment.

**Liberal Arts Components**

The liberal arts component of the General Education Program is comprised of traditional liberal arts categories. The number of credits required in each category varies by program and may be found after each program. The purpose of this component is to ensure that students are exposed to a breadth of traditional liberal arts essential to a baccalaureate experience, and is distributed as follows:

- **Communication Arts**, credit requirements vary by program
  Course work in the Communication Arts primarily focuses on the development and application of writing, speaking, group process, and interpersonal communication skills.

- **English/Language Arts**, credit requirements vary by program
  Course work in the English/Language Arts primarily focuses on the development and application of writing, speaking, group process, and interpersonal communication skills.

- **Mathematics**, credit requirements vary by program
  Course work in the mathematics area develops quantitative and analytical skills in the fields of mathematics and advanced logic. The area does not include courses in which mathematics is merely an applied component (such as finance and accounting), nor does it include mathematics foundation courses below the level of college algebra.

- **Social Sciences**, credit requirements vary by program
  Course work in the social science promotes understanding of human behavior as well as the structure and dynamics of social systems. Emphasis is on the discovery of patterns in social processes and institutions, both past and present. Courses in anthropology, sociology, ethnic and gender studies, geography, political science, psychology, history, and certain communications courses focusing on mass media and society typically satisfy these requirements.

In accord with the General Education requirements, Nevada students must take six units of social science credits. However, three of those units may be HIS 311, Nevada and the U.S. Constitutions which is required for Nevada students.

- **Social Studies**, credit requirements vary by program
  Course work in the social studies promotes understanding of human behavior as well as the structure and dynamics of social systems. Emphasis is on the discovery of patterns in social processes and institutions, both past and present. Courses in anthropology, sociology, ethnic and gender studies, geography, political science, psychology, history, and certain communications courses focusing on mass media and society typically satisfy these requirements.

- **Spanish**, credit requirements vary by program
  Course work in Spanish primarily focuses on the development and application of writing, speaking, group process, and interpersonal communication skills in Spanish. This is a requirement of the Puerto Rico Council on Higher Education.

- **Humanities**, credit requirements vary by program
  Course work in the humanities focuses on the development of ideas and values, appreciation of cultural and artistic achievements, and the evaluation of human experience. Courses in general humanities, philosophy, literature, fine arts, music, theater, and religious studies normally satisfy requirements in this area. Certain courses in political science and intellectual history emphasizing the development of cultural thought processes may also satisfy humanities requirements.

- **Fine Arts**, credit requirements vary by program
  Course work in the fine arts focuses on the development of ideas and values, appreciation of cultural and artistic achievements, and the evaluation of human experience. Courses in general humanities, philosophy, literature, fine arts, music, theater, and religious studies normally satisfy requirements in this area. Certain courses in political science and intellectual history emphasizing the development of cultural thought processes may also satisfy humanities requirements.

- **Science/Technology**, credit requirements vary by program
  Course work in the sciences provides students with an understanding of nature and the physical world, along with knowledge of the methods scientists use to study the world around them. Courses in astronomy, biology, chemistry, physics, anatomy and physiology, geology, and environmental science typically satisfy requirements in this area. All students must complete a minimum of three credits in the physical/biological sciences as part of the six credit Science/Technology requirement. Certain courses in geography or aerospace studies which emphasize the earth’s physical characteristics, weather, and climate are included in the science category, along with highly specialized course work in the social sciences such as physical anthropology, archaeological field methods, and psychology courses which focus on human physiological processes. Technology refers to the application of scientific knowledge in making and using tools to enhance materials culture. Course work in the area of technology which satisfies general education requirements includes engineering, materials science, electronics courses that emphasize theory and design, and computer science courses that focus on programming languages and hardware/software engineering. Courses which focus primarily on the social and environmental conflicts which arise over the uses of technology usually satisfy requirements in the social sciences and humanities.

- **Additional Liberal Arts**, credit requirements vary by program
  Students will pursue more depth in the liberal arts by selecting two different courses in any of the liberal arts categories listed above.

- **Interdisciplinary Component**
  **Interdisciplinary**, credit requirements vary by program
  To fulfill this requirement, students may select additional general education courses, or they may select from any University courses other than those in their major field. The intent of this requirement is to further increase students’ exposure to the liberal arts and to facilitate their exposure to field of study beyond the necessarily narrow scope of their professional interest. Students are encouraged to explore diverse content areas to add depth to their academic and professional knowledge base.
Professional Development Component

Professional Development, 3 credits

GEN 300, Skills for Professional Development, is required as the first course for all undergraduate students. It is part of the required course of study. This course focuses on the knowledge and skills necessary for a returning adult student to be successful. It also introduces students to the theories of adult learning that underlie their professional programs. Note: This requirement can also be fulfilled with GEN 101 for ICS students. ICS students will be required to complete other upper division elective or business credits in the BSB program to satisfy degree requirements. The upper division credit must be business-related for Bachelor of Science in Business students.

Integrating Component

Integrating, 3 credits

GEN 480, This is the capstone course for business, health and human services, and information technology undergraduate students. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

BUS 475, The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery. In addition to the 54 credits in this prescribed General Education program, each major course of study at the University of Phoenix's includes courses that integrate general education principles. The University of Phoenix's educational philosophy is based on the integration of theory and practice. Within that philosophical framework, a number of the courses required for the professional program have a strong general education component.

Prior Learning Assessment

Prior Learning Assessment is a process that may save students time and money in completing a degree program. The Prior Learning Assessment process determines if learning received outside of the traditional university classroom is comparable to academic curriculum and eligible for college credit. Learning that is eligible for assessment includes: Professional Training, Licenses, course work at non-transferable institutions, and Experiential Learning Essays.

Prior Learning Assessment applies only to Associate or Undergraduate degree programs. Any credit awards by assessment are limited to elective or general education requirements.

Corporate articulation provides an opportunity for students to earn up to 30 undergraduate semester credits (unless otherwise prescribed by state statutes on non-traditional credit limitations) for professional training obtained through their employer(s). Corporate training is assessed for academic equivalency to college level classroom learning. The recognition of corporate training is a concept based on accepted principles of adult learning and serves to validate the professional competence and learning experience achieved by students outside of a traditional college classroom.

Credit awards are applied to associate or bachelor elective or general education areas within degree programs.

Prior Learning Credit

A maximum of 30 Prior Learning credits may be earned as a result of professional training (workshops, seminars, licenses, business and professional courses, and other institutionally-sponsored course work).

The University may award up to 30 undergraduate semester credits for verified college-level learning gained through experience, and submitted in the form of experiential course writing referred to as Experiential Learning Essay. No student may earn more than 60 credits from any combination of experiential learning, national testing, credit by exam, and professional course work and training. Some states may have restrictive state regulations. Students should check with their Academic Advisor.

Notwithstanding the above, Oregon residents must comply with Oregon Administrative Rule section 583-030-0035(5)(b)(C), which states in part: “... No more than 25 percent of an undergraduate degree program may be earned through award of credit for noncollegiate work.” Oregon considers noncollegiate work to be learning validated by a student “portfolio,” a credit evaluation guide issued by the American Council on Education, or some similar criterion.

Oregon's allowance for 25 percent of a program typically translates into approximately 30 semester credits for a bachelor's degree and approximately 15 credits for an associate's degree. Oregon does allow a full year of an undergraduate academic program (including an associate's) to be awarded through a combination of noncollegiate learning and advanced placement credit from passing examinations such as those from the College Level Examination Program (CLEP), provided noncollegiate learning does not exceed 25 percent of the program.

Notwithstanding the above, Maryland residents may not earn more than 30 credits from any combination of experiential learning, national testing, credit by exam, and professional course work and training.

Notwithstanding the above, Washington students may not earn more than 30 semester credits for a bachelor’s degree and 15 credits for an associate’s degree from any combination of experiential learning, national testing, credit by exam, and professional course work and training.

Faculty Assessment Evaluations

Portfolio evaluations are performed in accordance with the policies of the University, individual state regulatory requirements, the standards of the Council for Adult and Experiential Learning, and the Council for Higher Education Association.

The University maintains a centralized Prior Learning Assessment team within University Services which directs evaluations and controls for the assessment of prior learning for credit.

Prior Learning Assessment Submission and Posting & Fees

Charges arising out of services and the posting of credit awarded for prior learning are separate and apart from tuition and curriculum fees.

When materials are complete, they are sent to Prior Learning Assessment in Phoenix and a non-refundable application fee is required and collected. The evaluation and posting fees apply to credit awarded through Prior Learning Assessment:

Student portfolios are subject to fees related to evaluation and assessment of all portfolio inclusions. The fees may vary depending upon number of items reviewed. Fee structure and information may be viewed at: http://www.phoenix.edu/admissions/prior_learning_assessment_center/prior_learning_assessment_center.aspx.
Transcription of Prior Learning Assessment Credits

Credits awarded are posted to student transcripts by Prior Learning Assessment. Since these credits are a permanent part of a student’s academic record, fees are non-refundable.

Privacy of Portfolio

The University considers all Prior Experiential Learning course writing and Professional Training Portfolios to be confidential. For this reason, access to portfolio submissions is limited to members of the University’s assessment and administrative staff, faculty evaluators, and members of accreditation evaluating teams. However, students may sign a release form which allows the University to use portions of the portfolio material in professional training workshops for counselors and faculty members, and as classroom examples.

Standardized Credit Recommendations

Credits awarded through the assessment process are applicable to University of Phoenix degrees, and may be transferable subject to the receiving institution’s discretion.

Credit awards are applied to Associate or Bachelor elective or general education areas within degree programs. Student degree program admission is required (all other transfer credit applied in the program) prior to portfolio submission.

Estimated Program Length

To determine the number of months it takes to complete the program as designed, add all the credit hours in a given program, divide the result by 24 credit hours and then multiply the result by the number of months in the academic year for the degree (Associate = 9 months in an academic year, Bachelors = 10 months in an academic year, Masters/Doctoral = 12 months in an academic year, Undergraduate Certificate = 10 months in an academic year and Graduate Certificate = 12 months in an academic year). Example: Associate program is 60 credits. Divide 60 credit hours by 24 credit hours (60/24 = 2.5). Then multiply the result by the number of months in the academic year for the degree (2.5 x 9 months = 22.5 months).
COLLEGES OF ARTS AND SCIENCES

Arts and Sciences is responsible for developing and offering liberal arts degree programs as well as general education courses which support the University’s undergraduate degree programs. General education course work seeks to broaden students’ outlook and to establish a strong foundation for lifelong learning. Program requirements are designed to assist students in developing communications and problem solving skills needed for professional growth, and to strengthen students’ appreciation of the larger social, political, scientific, and aesthetic culture.

The colleges work closely with other academic departments and faculty throughout the university to design curricular offerings which reflect the unique character of University of Phoenix students and degree programs.

There are three colleges in Arts and Sciences, the College of Natural Sciences, College of Humanities, and the College of Social Sciences. Arts and Sciences faculty hold graduate degrees and have completed substantial graduate level study appropriate to the academic field in which they are teaching. In addition, many Arts and Sciences faculty members have extensive practical experience in relevant professions.

COLLEGE OF HUMANITIES

The College of Humanities offers Bachelor degrees in Communications, History, and English, Associate degrees in Communications and General Studies, and an Associate degree through credit recognition designed for military members. As part of a broad education, coursework in the humanities provides students with knowledge of the arts, history, language, literature, philosophy, religion; skills in communication, independent and analytical thinking, and problem-solving; an ethical framework; and appreciation for the diversity of human experience and expression.

Associate of Arts Degree Through Credit Recognition**

The following Associate of Arts Degree Through Credit Recognition (AARC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University of Phoenix acknowledges that many service members have already achieved an education equivalent to an associate degree through college course work, military training and experience, and national testing programs. The University of Phoenix Associate of Arts Degree through Credit Recognition allows service members to fulfill their degree requirements by recognizing approved college level learning to award an Associate of Arts degree no matter where service members are located throughout the world.

All Arts and Sciences faculty are committed to the central role of general education in undergraduate degree programs.

In its commitment to help adult learners achieve their professional and personal goals, the University of Phoenix recognizes the role of general education in ensuring students’ success in the classroom, the workplace, and the communities in which they live. The general education curriculum prepares students with the foundation skills and philosophical orientation necessary to succeed in their professional programs. It also ensures that students have a broad exposure to the liberal arts, and that they explore diverse content areas to add depth to their academic and professional knowledge base. This preparation includes the development of the basic techniques of intellectual inquiry and self-reflection that guide continuous growth and development of the individual throughout life.

The basic tenets of liberal arts - communication, critical thinking, information utilization, collaboration, ethics and professional growth - are integrated throughout the professional curricula, e.g., through writing across the curriculum, the infusion of diversity issues, and a universal focus on critical thinking skills.

The Associate of Arts degree includes the option of a professional focus. The University does not certify students in their professional focus but acknowledges their qualifications by recognizing their American Council on Education (ACE) certified training received through the Armed Forces. Students need a minimum of 15 semester hours in a related field to qualify for one of the professional focuses listed below. The focus will be printed on the student’s official University of Phoenix transcript.

- Aerospace Physiology Technology
- Allied Health Management
- Allied Health Sciences
- Aviation Technology
- Biomedical Technology
- Business Administration
- Cardiopulmonary Technology
- Computer Science Technology
- Criminal Justice
- Dental Laboratory Technology
- Electronics Technology
- Health Care Technology
- Histologic Technology
- Marine Engineering
- Marine Environmental Science
- Medical Laboratory Technology
- Nuclear Medicine Technology
- Nuclear Technology
- Occupational/Environment Health
- Operating Room Technology
- Pharmacy Technology
- Physical Therapy
• Radiologic Technology
• Respiratory Therapy
• Technical Management
• Technical Studies
• Technology Instruction
• Urological Laboratory Technology

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

**Additional Admission Requirements for The Associate of Arts/ Credit Recognition**

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• Applicants for admission must be active duty military, retired military, veterans, spouses of active duty military personnel, full or part-time Reservists, National Guard and Coast Guard members, and Department of Defense employees.

**General Education Requirements for the AACR**

All students must complete 60 general education credits from the following areas:
- Communication Arts, 6 credits (3 credits must be in English Composition)
- Humanities, 6 credits
- Mathematics, 6 credits
- Social Sciences, 6 credits
- Fine Arts, 6 credits
- Science/Technology, 6 credits
- Additional Liberal Arts, 6 credits
- Interdisciplinary Component, 21 credits

**AA Through Credit Recognition Degree Requirements**

Students are required to have a minimum of 60 credits to complete the Associate of Arts Degree through Credit Recognition. Students are required to have a 2.0 minimum cumulative Grade Point Average (GPA) in all course work completed at the University of Phoenix. Acceptance of course work from regionally accredited colleges and universities and nationally accredited associates degree granting institutions will be based upon prevailing University of Phoenix transfer credit policies. All credits accepted in transfer to the University (grades of “C-” or better) that are applicable to the professional focus area will be posted on the University of Phoenix transcript. This may include transfer credits earned in excess of the minimum 60 credits required for graduation.

**Degree Completion Options for the AACR**

Students, who fall short of the 60 credits necessary to complete their degree, will have various degree completion options.
- Credits may be earned from:
  - University of Phoenix
  - Prior Learning Assessment, including:
    - Licenses and foreign language evaluations
    - Professional training and course work, including certificates
  - Course work from regionally accredited or candidate for accreditation colleges and universities
  - Passing scores for national testing programs such as CLEP, DANTES and Excelsior
  - American Council on Education recognized military training and experience in the Armed Services

**Academic Progression Requirements for the AACR**

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

The Associate of Arts through Credit Recognition Degree Completion Deadline

The application is valid for two years. During this time students can update their records by submitting additional documentation. If a student has not completed the required credits during this time frame, the University will close the file. Further activity will require a new application and fees.

Issuance of Diplomas

Students will receive a diploma and an official University of Phoenix transcript when they have satisfied all the degree requirements. Diplomas require approximately two weeks to process. For more information call (800) 800-7006.

Course Descriptions for the AACR

COMM 299 ............................................................................... 3 credits
Written Communication for AACR

This course assists students in analyzing their experiences and communicating the experiences effectively. Further, the course focuses on core academic skills necessary for writing effective college-level essays and covers writing strategies, paragraph use and structure, and sentence construction. This course also covers the application of peer-review, collaborative, and error analysis strategies for developing more effective communication.
COMM 215 ............................................................................... 3 credits
Essentials of College Writing

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ............................................................................... 3 credits
Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 101 ............................................................................... 3 credits
Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 ............................................................................... 3 credits
Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

Associate of Arts - Professional Focus

The following Associate of Arts - Professional Focus (AA/PF) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University of Phoenix Associate of Arts in Professional Focus acknowledges college level coursework, military training, and national testing to partially fulfill the requirements of the degree. The Associate of Arts degree includes a professional focus recognized by the American Council on Education (ACE) as equivalent college content, to fulfill a 15 credit professional focus in the degree.
**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.
Additional Admission Requirements for the AA/PF
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript may be submitted in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, (includes Online students and any cross-border locations) must provide the university with an official a copy of High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants for admission must be active duty military, retired military, veterans, spouses of active duty military personnel, full or part-time Reservists, National Guard members, Coast Guard members, or Department of Defense employees.

Degree and General Education Requirements for the AA/PF
Completion of a minimum of 60 credits that include the following distribution:

- Communication Arts, 6 credits
  (A Track must include COMM 215, equivalent or higher)
  (B Track must include COMM 170 and COM 172)
  Puerto Rico students may not use conversational English to satisfy Communication Arts.
  Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus.
- Mathematics, 6 credits
  Must include MTH 209, equivalent or higher
  (B Track must include: SCI 163)
  Must include at least three (3) credits in the physical or biological sciences
- Humanities, 6 credits
  (B Track must include: HUM 114)
- Social Science, 6 credits
  (B Track must include: PSY 211)
- Additional Liberal Arts, 9 credits
  (A Track must include GEN 200)
  (B Track must include GEN 195)
  Puerto Rico students must complete 6 credits of Spanish. Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish 1 or higher will satisfy the Spanish requirement.
- Elective, 6 credits
  (B Track must include: FP 120)
- Professional Focus/Interdisciplinary, 15 credits
  The 15 credit Professional Focus requirement will be fulfilled through selected transfer credits, including ACE recognized credit earned from military specialty training, technical schools, MOS’s, Navy ratings, NEC’s, and law enforcement training.
  • A minimum grade point average (GPA) of 2.0.
  • Students must complete the AA/PF degree within 5 years.
  • The diploma awarded for this program will read as: Associate of Arts and will not reflect the professional focus. The professional focus will be reflected on the transcript only.
**Degree and General Education Requirements for the AA/PF for Arkansas Students**

Completion of a minimum of 60 credits that include the following distribution:
- Communication Arts, 6 credits
  (A Track must include COMM 215, equivalent or higher)
  (B Track must include COMM 170 and COMM 172)
- Mathematics, 6 credits
  Must include MTH 220
- Science/Technology, 9 credits
  (B Track must include: SCI 163)
  Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.
- Humanities, 9 credits
  (B Track must include: HUM 114)
- Social Science, 9 credits
  (B Track must include: PSY 211)
  Must include HIS 145 and POL 215 or equivalent transfer coursework with US History or Government content.
- Additional Liberal Arts, 3 credits
  (A Track must include GEN 200)
  (B Track must include GEN 195)
- Elective, 6 credits
  (B Track must include: FP 120)

**Professional Focus/Interdisciplinary, 15 credits**

The 15 credit Professional Focus requirement will be fulfilled through selected transfer credits, including ACE recognized credit earned from military specialty training, technical schools, MOS’s, Navy ratings, NEC’s, and law enforcement training.

- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- A minimum grade point average (GPA) of 2.0.
- Students must complete the AAPF degree within 5 years.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the professional focus. The professional focus will be reflected on the transcript only.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Academic Progression Requirements for the AA/PF**

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Professional Focus for the AA/PF**

- The AA/PF program offers a Professional Focus. The University does not certify students in their Professional Focus but acknowledges their qualifications by recognizing their professionally and or approved nationally accredited transferable coursework, ACE certified training received through the United States Armed Forces or law enforcement training. University of Phoenix coursework may also be recognized to fulfill professional focus credits.
- The student may request a dual focus on their enrollment agreement. Each professional focus must be adequately demonstrated.
- A minimum of 15 credits are required for each Professional Focus chosen.
- The student may amend their Professional Focus by submitting a signed request to the Military Division prior to graduation.
Residency Requirements and Course Waivers for the AA/PF

- Students must meet the established University residency requirement for degree conferral. The University requires that 15 credits must be completed at University of Phoenix.
- Students may transfer a maximum of 45 credits, which may be earned by combining the areas below, but credit cannot exceed the maximum number of credits in any one area:
  - 30 credit limit on experiential learning
  - 30 credit limit on national testing (including CLEP, Excelsior, Berlitz, NLN, AP, DANTES, and DLPT)
  - 30 credit limit on professional training credit

The following course may not be waived: GEN 200.

Course Descriptions for the AA/PF

COMM 215 .................................................................3 credits

Essentials of College Writing

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasive essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 .................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 .................................................................3 credits

Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .................................................................3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 209 ........................................................................3 credits

College Mathematics II

This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220 ........................................................................3 credits

College Algebra

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................3 credits

Introductory Chemistry

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ........................................................................3 credits

Fundamentals of Physics

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ........................................................................3 credits

The American Experience Since 1945

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ........................................................................3 credits

State and Local Political Processes

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.
**Associate of Arts/Concentration in General Studies**

The following Associate of Arts/Concentration in General Studies (AAGS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts degree in General Studies provides a solid foundation in liberal arts and sciences based on a survey of mathematics, physical and life sciences, humanities, social science and technology. Students will apply effective communication skills, as directed, for informal, formal, and quantitative tasks and will be conversant with the values and terminology of a variety of academic disciplines. They will be able to access information resources, evaluate them for credibility and relevance, and use the sources to present a wide range of alternatives.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aags.

**Note:** Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.

**General Education Requirements for the AAGS**

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)

Interdisciplinary Requirement 27 credits
(B Track must include: FP 101)

Concentration 18 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

**Additional Admission Requirements for AAGS**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**Degree Requirements for the AAGS**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum program grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Academic Progression Requirements for the AAGS**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
Course Descriptions for the AAGS

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety. ETH 125 ................................................................. 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Emphasis in General Studies**
(Maryland-Online)

The following Associate of Arts/Emphasis in General Studies (AAGS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts degree in General Studies provides a solid foundation in liberal arts and sciences based on a survey of mathematics, physical and life sciences, humanities, social science and technology. Students will apply effective communication skills, as directed, for informal, formal, and quantitative tasks and will be conversant with the values and terminology of a variety of academic disciplines. They will be able to access information resources, evaluate them for credibility and relevance, and use the sources to present a wide range of alternatives. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aags.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.

General Education Requirements for the AAGS

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: USE 101)
Interdisciplinary Requirement 27 credits
(B Track must include: FP 101)
Emphasis 18 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Additional Admission Requirements for AAGS

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

Degree Requirements for the AAGS

The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum program grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the emphasis. Emphases are reflected on the transcript only.

Academic Progression Requirements for the AAGS

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
• With the exception of GEN 105, USE 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

Residency Requirements for the AAGS
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAGS

COM 150 ..................................................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ...................................................................................3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ...................................................................................3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ...................................................................................3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ...................................................................................3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
**Associate of Arts/Concentration in General Studies**

*(Minnesota/Arkansas)*

The following Associate of Arts/Concentration in General Studies (AAGS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts degree in General Studies provides a solid foundation in liberal arts and sciences based on a survey of mathematics, physical and life sciences, humanities, social science and technology. Students will apply effective communication skills, as directed, for informal, formal, and quantitative tasks and will be conversant with the values and terminology of a variety of academic disciplines. They will be able to access information resources, evaluate them for credibility and relevance, and use the sources to present a wide range of alternatives.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aags-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aags-mn.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

**General Education Requirements for the AAGS for Arkansas Students**

Communication Arts Requirement 6 credits

*(A Track must include: COM 150 and COM 220)*

*(B Track must include: COM 155 and COM 156)*

Mathematics Requirement 6 credits

Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

*Must include: MAT 219 and MAT 220*

Science & Technology Requirement 9 credits

*(B Track must include: SCI 162)*

*Must include: BIO 100 and CHM 109*

The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits

*(A Track must include: ETH 125)*

*(B Track must include: PSY 201 and ETH 125)*

*Must include: HIS 135*

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits

*(A Track must include: CRT 205)*

*(B Track must include: HUM 111)*

Additional Liberal Arts Requirement 6 credits

*(A Track must include: GEN 105)*

*(B Track must include: US 101 and FP 101)*

Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

**General Education Requirements for the AAGS for Minnesota Students**

Communication Arts Requirement 6 credits

*(A Track must include: COM 150 and COM 220)*

*(B Track must include: COM 155 and COM 156)*

Mathematics Requirement 6 credits

Science & Technology Requirement 9 credits

*(B Track must include: SCI 162)*

Social Science Requirement 9 credits

*(A Track must include: ETH 125)*

*(B Track must include: PSY 201 and ETH 125)*

Humanities Requirement 9 credits

*(A Track must include: CRT 205)*

*(B Track must include: HUM 111)*

Additional Liberal Arts Requirement 6 credits

*(A Track must include: GEN 105)*

*(B Track must include: US 101 and FP 101)*

Interdisciplinary Requirement 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

**Additional Admission Requirements for AAGS**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**Degree Requirements for the AAGS**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
The residency requirements for the AAGS:

- Many courses in the Required Course of Study build on or are required to complete the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................................3 credits
Introduction to College Algebra

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 219 ...................................................................................3 credits
College Algebra

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

<tbody>
<tr>
<td>BIO 100</td>
<td>Introduction to Life Science with Lab</td>
</tr>
<tr>
<td></td>
<td>This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.</td>
</tr>
<tr>
<td>CHM 109</td>
<td>Introductory Chemistry</td>

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AACOM
XCOM 100 ................................................................................ 3 credits
Introduction to Communication
This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organizational, intercultural, and rhetoric.
XCOM 200 .................................................................................. 3 credits
Foundations of Interpersonal Communication
This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.
XCOM 225 .................................................................................. 3 credits
Foundations of Mass Communications
This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.
IT 235 .................................................................................. 3 credits
Image Editing and Implementation
Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

CMC 260 .................................................................................. 3 credits
Communication Variety: The Spice of Life
The field of communications underlies virtually every aspect of today’s increasing global interdependence. This course addresses how customs, values, and societal systems generate expectations—often tacit—about how communication should occur. This course also addresses the problems—often misunderstood—about how communication is occurring. Students develop greater sensitivity to intercultural and intracultural differences to foster effective information exchange and develop mutually satisfying communication solutions.

CMC 240 .................................................................................. 3 credits
Information Strategies: Putting 2 and 2 Together
This course addresses effective communication strategies via the gathering, analysis, evaluation, and synthesis that comprise information literacy as a standard of modern problem solving. Students recognize the need for information, formulate meaningful questions to guide their search, access what is cogent, interpret bias, and integrate material for a compelling presentation. Furthermore, they perform these tasks with a regard for social responsibility and professional ethics.

COM 150 .................................................................................. 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .................................................................................. 3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .................................................................................. 3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.
GEN 105 ................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Communications (Maryland-Online)

The following Associate of Arts/Emphasis in Communications (AACOM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Communications focuses on the growth and convergence of major venues of telecommunications, the role of media in a democratic society, and standards of social responsibility within the culture of journalism. Courses include win-win communication processes, problem-solving information strategies, an extensive review of information sources, and news presentation for print, web, and broadcast delivery. Students review and assess pivotal influences on the development of mass media and speculate upon their future evolution.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aacom.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Emphasis in Communications - Track A and B
XCOM 100 ~ ................................................................. 3 credits
Introduction to Communications
XCOM 200 ~ ................................................................. 3 credits
Fundamentals of Interpersonal Communication
XCOM 225 ~ ................................................................. 3 credits
Mass Communication
IT 235 ~ ................................................................. 3 credits
Image Editing and Implementation
CMC 260 ~ ................................................................. 3 credits
Communication Variety: The Spice of Life
CMC 240 ~ ................................................................. 3 credits
Information Strategies: Putting 2 & 2 Together
The University reserves the right to modify the required course of study.

Additional Admission Requirements for AACOM
- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AACOM
Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)
Emphasis 18 credits
CREDITS APPLIED TO THE REQUIRED COURSE OF STUDY WITH THE EXCEPTION OF THE ELECTIVES WILL NOT BE APPLIED TO THE CORE AND CANNOT COUNT TOWARD GENERAL EDUCATION TOTAL

Degree Requirements for AACOM
The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of ‘D’ or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

The diploma awarded for this program will read as: Associate of Arts and will not reflect the emphasis. Emphases are reflected on the transcript only.
Academic Progression Requirements for the AACOM

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

Residency Requirements for the AACOM

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AACOM

XCOM 100 ................................................................. 3 credits
Introduction to Communication

This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organizational, intercultural, and rhetoric.

XCOM 200 ................................................................. 3 credits
Foundations of Interpersonal Communication

This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

XCOM 225 ................................................................. 3 credits
Foundations of Mass Communications

This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.

IT 235 ........................................................................ 3 credits
Image Editing and Implementation

Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

CMC 260 ................................................................. 3 credits
Communication Variety: The Spice of Life

The field of communications underlies virtually every aspect of today’s increasing global interdependence. This course addresses how customs, values, and societal systems generate expectations—often tacit—about how communication should occur, and problems—often misunderstood—about how communication is occurring. Students develop greater sensitivity to intercultural and intracultural differences to foster effective information exchange and develop mutually satisfying communication solutions.
**CMC 240** ................................................................. 3 credits
**Information Strategies: Putting 2 and 2 Together**
This course addresses effective communication strategies via the gathering, analysis, evaluation, and synthesis that comprise information literacy as a standard of modern problem solving. Students recognize the need for information, formulate meaningful questions to guide their search, access what is cogent, interpret bias, and integrate material for a compelling presentation. Furthermore, they perform these tasks with a regard for social responsibility and professional ethics.

**COM 150** ................................................................. 3 credits
**Effective Essay Writing**
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**COM 220** ................................................................. 3 credits
**Research Writing**
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**ETH 125** ................................................................. 3 credits
**Cultural Diversity**
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

**CRT 205** ................................................................. 3 credits
**Critical Thinking**
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**GEN 105** ................................................................. 3 credits
**Skills for Learning in an Information Age**
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
General Education Requirements for the AACOM for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220
Science & Technology Requirement 9 credits
B Track must include: SCI 162
Must include: BIO 100 and CHM 109
The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

General Education Requirements for the AACOM for Minnesota Students

Communication Arts Requirement 6 credits
A Track must include: COM 150 and COM 220
B Track must include: COM 155 and COM 156
Mathematics Requirement 6 credits
A Track must include: 3 credits in the physical or biological sciences
B Track must include: SCI 162
Science & Technology Requirement 9 credits
A Track must include: ETH 125
B Track must include: PSY 201 and ETH 125
Social Science Requirement 9 credits
A Track must include: CRT 205
B Track must include: HUM 111
Humanities Requirement 9 credits
A Track must include: GEN 105
B Track must include: US 101 and FP 101
Concentration 15 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Degree Requirements for the AACOM

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AACOM

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General Education course, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

University of Phoenix, 2012-2013
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

MAT 219 ................................................................. 3 credits

Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 ................................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 ................................................................. 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135 ................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

ETH 125 ................................................................. 3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media— including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Bachelor of Science in Communication (Maryland-Online)
The following Bachelor of Science in Communication (BS/COM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Communication (BS/COM) degree program is designed to develop knowledge and skills for effective communication in a variety of public and private work environments. The program was created specifically to build upon personal and professional communication experiences. The BS/COM degree enhances the communication skills necessary for the development of professional competence and values; critical thinking and problem solving; information utilization; and collaboration. The curriculum focuses on the development of core communication competencies. It emphasizes theory and application in the domains of interpersonal, small group, organizational, and mass communication. Specific areas of focus include business communication, diversity, intercultural communication, conflict resolution, legal and ethical issues, media and culture, and future trends in communication technology.

Additional Admission Requirements for the BS/COM
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

Degree Completion Requirements for the BS/COM
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 42 upper division credits.
  - All students must meet the General Education areas approved by the university.
  - A minimum grade point average (GPA) of 2.0.
  - All students must complete the minimum number of credits required by their degree program.
  - All undergraduate students are required to complete the minimum general education credits required by their program version.
  - The diploma awarded for this program will read as: Bachelor of Science in Communication and will not reflect the emphases. The Emphases are reflected on the transcript only.

General Education Requirements for the BS/COM
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
- Communication Arts, 6 credits
- Humanities, 6 credits
- Mathematics, 6 credits
- Social Sciences, 6 credits
- Science/Technology, 6 credits
- Must include at least 3 credits in the physical or biological sciences

Additional Liberal Arts, 6 credits
- Interdisciplinary Component, 18 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for BS/COM
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others. All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for BS/COM
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 27 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a coursework in the required course of study, a student must have completed a previous coursework which meets the following criteria:

- The coursework must have been completed and transcribed from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The coursework must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The coursework must be approved through the articulation agreement and must be comparable in content and credits to the University coursework it is replacing.

The following coursework in the required course of study may not be waived: GEN 200, GEN 300, COM 480

Course Descriptions for the BS/COM

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

COM 100 .......................................................... 3 credits

Introduction to Communication
This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organization, intercultural, and rhetoric.

COM 200 .......................................................... 3 credits

Foundations of Interpersonal Communication
This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

COM 225 .......................................................... 3 credits

Foundations of Mass Communication
This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.

COM 310 .......................................................... 3 credits

Communications: Theories and Practice
This course explores the various theories of communication that create the foundation for study of communication in the bachelor’s degree program at the University of Phoenix. Major communication areas examined in this course include intrapersonal, interpersonal, group and teamwork, organizational, intercultural, and mass media. Each area, along with others, will be studied in greater depth in subsequent courses in the degree program.

COM 330 .......................................................... 3 credits

Small Groups and Team Communication
This course explores the dynamics of group communication and effective team work. Both social and workplace scenarios will be examined. Analytical techniques will be included to provide effective strategies for communication in these contexts.

COM 350 .......................................................... 3 credits

Organizational Communication
This course examines various theoretical frameworks necessary for effective organizational communication. It analyzes the application of communication strategies within organizations in terms of their effectiveness. It provides the infrastructure necessary for the creation and maintenance of successful communication strategies in organizations.

COM 360 .......................................................... 3 credits

Intercultural Communication
The purpose of this course is to assist students in understanding and apply the principles of effective intercultural communication in a diverse society and in global commerce. Students will develop an understanding of why and of how cultural issues influence effective communication. This course introduces techniques for improving written, oral, and interpersonal communication skills in response to intercultural settings.

COM 400 .......................................................... 3 credits

Media and Society
The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.

COM 440 .......................................................... 3 credits

Communication Law
This course focuses on the U.S. legal environment and its specific laws, court decisions, policies, and regulations that address the freedom and responsibilities that come with the First Amendment to the U.S. Constitution. The personal, commercial, and political exercise of free speech, and its regulation, will be analyzed in this course.
COM 450 ................................................................. 3 credits

**Ethics and Communication**

While ethical decision-making permeates every facet of personal and professional life, this course focuses specifically upon ethical issues that are inherent in personal and public forms of communication. Special emphases are placed on ethical issues in commercial communication. Ethical decision-making models will be discussed and applied to cases involving various contemporary and controversial communication topics.

COM 470 ................................................................. 3 credits

**Mediation and Conflict Resolution**

Communication is the foundation upon which mediation and other forms of alternative dispute resolution are based. This course starts with an examination of the theoretical basis for ADR in light of communication theory. Then it focuses upon the effective application of theory and practice to achieve meaningful results and to avoiding conflict in the future.

COM 480 ................................................................. 3 credits

**Communication Capstone Course**

This is the capstone course for students pursuing the bachelor’s of science in communication. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 .............................................................. 3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ................................................................. 3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ................................................................. 3 credits

**Skills for Lifelong Learning**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 ................................................................. 3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................. 3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................. 3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.
**Course Descriptions for the Emphasis in Marketing and Sales Communication**

**COM 302** ................................................................. 3 credits

**Marketing Communications**

This course provides students with the basic concepts and methods related to marketing communications, including communication theories and the communication mix. Emphasis is placed on the marketing mix variables of product, place, price, and promotion, as well as marketing communications tools.

**PSY 322** ................................................................. 3 credits

**Consumer Psychology and Research**

This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

**COM 339** ................................................................. 3 credits

**Advertising and the Media**

This course addresses the elements of advertising and the media. Topics include advertising concepts, selection of media, and the use of media and advertising as marketing communications tools. The course also emphasizes the ongoing convergence of media content and commercial messages and how it is redefining marketing communications.

**COM 352** ................................................................. 3 credits

**Public Relations and Message Management**

This course focuses on the role of public relations in marketing communications and how it can be used to attain organizational marketing and sales objectives. Topics covered in this course include media relations, relationship-building strategies, crisis communication, ethics, and the development of public relations messages.

**COM 373** ................................................................. 3 credits

**Sales Communications**

This course addresses the elements of sales communications. Topics include sales promotion, direct sales, personal selling, and customer relationship management as marketing communications tools.

**COM 486** ................................................................. 3 credits

**Marketing and Sales Message Management**

This course focuses on bridging the gap between sales and marketing communications through the use of customer message management. Topics covered in this course include creating a sense of value for customers; the development of marketing communications campaigns; the integration of the sales cycle and marketing communications; the use of a “single voice” to customers across all selling touch-points; and the ethical considerations associated with customer message management.

---

**Course Descriptions for the Emphasis in Communication and Technology**

**CIS 205** ................................................................. 3 credits

**Management Information Systems**

This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

**COM 420** ................................................................. 3 credits

**Creativity and Communication**

Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of “creative” is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one's creativity is one of the primary focuses of the course.

**VCT 235** ................................................................. 3 credits

**Image Editing & Implementation**

Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

**VCT 310** ................................................................. 3 credits

**Web Design**

This course focuses on the principles of good web design and the essential role of the web designer in today’s business environment. Topics covered include layout, style, artistic quality, navigation, performance, communication, community, e-commerce and marketing.

**VCT 320** ................................................................. 3 credits

**Electronic Publishing**

This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

**VCT 420** ................................................................. 3 credits

**Multimedia Development**

This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.
**Course Descriptions for the Emphasis in Culture and Communication**

**SOC 262** .......................................................... 3 credits

**Contemporary American Society**

Students in this course will explore the implications of ethnicity, culture, and diversity within the context of society. Students will be introduced to racial and ethnic relations, prejudice, stereotypes, discrimination, and adaptation and conflict in diverse cultures.

**SOC 333** .......................................................... 3 credits

**Genders in Society**

The objective of this course is to explore gender differences and communication. This course introduces students to gender inclusiveness and sensitivity through the examination of the roles of genders in society. Students will focus on gender communication in business, organizations, family and the media. Additionally, students will explore communication traits of men and women and the impact of miscommunication between genders.

**SOC 335** .......................................................... 3 credits

**The Peoples and Cultures of Asia**

This course provides students with an overview of the cultural traditions and contemporary development of Asian countries. Course topics include the geography, history, politics, economic development, and social conditions of Asian countries.

**SOC 337** .......................................................... 3 credits

**Contemporary Latin American Society**

This course introduces the cultural perspectives of Latin America. Students will explore cultural geography, ethnicity, class and culture, gender, and challenges facing Latin America.

**SOC 338** .......................................................... 3 credits

**The African American Experience**

This course serves as an introduction to the African American experience. This course will explore the social construction of identity, culture and the inequalities African Americans face in popular culture. Race, class and gender of the African American people will be explored from a historical to modern day perspective.

**COM 403** .......................................................... 3 credits

**Contemporary Communication in a Diverse Society**

The objective of this course is to focus on the dynamics of human communication across cultures and genders in a multicultural society.

**Course Descriptions for the Emphasis in Journalism**

**JRN 310** .......................................................... 3 credits

**Introduction to Journalism**

This course is the introduction to the journalism emphasis. The role of the journalist will be described from its origin to the emergence of the modern-era journalist. Key journalistic theories and principles will be discussed. Special attention will be given to influences in journalism and qualities that exemplify journalistic writing. The concepts of journalistic writing, research, technology, ethics, and personal responsibility will be introduced. Controversial issues faced by journalists will be highlighted throughout the course.

**JRN 320** .......................................................... 3 credits

**Research for Journalism**

This course focuses on the research methods employed in journalistic writing and reporting. The goal of this course is to enhance the understanding of the characteristics of credible sources and accurate information. Information will be assembled and evaluated to support journalistic goals by interpreting information needs, choosing accurate and unbiased sources, and selecting relevant and reliable information. The importance of employing ethical practices to research techniques is emphasized throughout the course.

**JRN 330** .......................................................... 3 credits

**Journalistic Writing I**

This course focuses on understanding journalistic writing styles. The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.

**JRN 340** .......................................................... 3 credits

**Journalistic Writing II**

This course focuses on the application of the diverse journalistic writing techniques used by today’s changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written media messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The association between research and responsible writing will be explored, as writing strategies to craft effective messages are developed. The role of ethics in journalism is emphasized throughout the course.

**JRN 350** .......................................................... 3 credits

**Controversial Issues in Journalism**

This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter’s ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public’s need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.

**JRN 360** .......................................................... 3 credits

**Storytelling: A Multimedia Approach**

This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.
Bachelor of Science in Communication

The following Bachelor of Science in Communication (BS/COM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Communication (BS/COM) degree program is designed to develop knowledge and skills for effective communication in a variety of public and private work environments. The program was created specifically to build upon personal and professional communication experiences. The BS/COM degree enhances the communication skills necessary for the development of professional competence and values; critical thinking and problem solving; information utilization; and collaboration. The curriculum focuses on the development of core communication competencies. It emphasizes theory and application in the domains of interpersonal, small group, organizational, and mass communication. Specific areas of focus include business communication, diversity, intercultural communication, conflict resolution, legal and ethical issues, media and culture, and future trends in communication technology.

Concentration in Culture and Communication

The concentration in Culture and Communication is designed to prepare students with a well-rounded view of diversity in American society. Students will focus on the experiences of people from different cultures and how communication differs by race and gender. In addition, students will gain a global perspective on race, ethnicity, and class in the United States. Students will compare cultural topics such as Asian American, African American, Hispanic American, gender, and their differences.

Additional Admission Requirements for the BS/COM

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution's student website.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
• Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.

Degree Completion Requirements for the BS/COM

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 42 upper division credits.
  • All students must meet the General Education areas approved by the university.
  • A minimum grade point average (GPA) of 2.0.
  • All students must complete the minimum number of credits required by their degree program.
  • All undergraduate students are required to complete the minimum general education credits required by their program version.
  • The diploma awarded for this program will read as: Bachelor of Science in Communication and will not reflect the concentrations. The Concentrations are reflected on the transcript only.
General Education Requirements for the BS/COM

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts
Puerto Rico students may not use conversational English to satisfy Communication Arts

Humanities, 6 credits
Mathematics, 6 credits
Social Sciences, 6 credits
Nevada students must complete 3 credits in Nevada Constitution
Science/Technology, 6 credits
Must include at least 3 credits in the physical or biological sciences
Additional Liberal Arts, 6 credits
Puerto Rico students must complete 6 credits of Spanish in place of this requirement.

Oregon students and students attending Online who reside in Oregon must fulfill this content area with three (3) credits in the physical or biological sciences.

Interdisciplinary Component, 18 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BS/COM for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Mathematics, 6 credits
Must include MTH 220.
Science/Technology, 9 credits
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.
Humanities, 9 credits
Social Science, 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts, 6 credits
Interdisciplinary Component, 9 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for BS/COM

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.
Residency Requirements and Course Waivers for BS/COM

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 27 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the required course of study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: GEN 200, GEN 300, COM 480

Course Descriptions for the BS/COM

GEN 300.................................................................................. 3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

COM 100.................................................................................. 3 credits

Introduction to Communication

This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organization, intercultural, and rhetoric.

COM 200.................................................................................. 3 credits

Foundations of Interpersonal Communication

This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

COM 225.................................................................................. 3 credits

Foundations of Mass Communication

This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.

COM 310.................................................................................. 3 credits

Communications: Theories and Practice

This course explores the various theories of communication that create the foundation for study of communication in the bachelors degree program at the University of Phoenix. Major communication areas examined in this course include intrapersonal, interpersonal, group and teamwork, organizational, intercultural, and mass media. Each area, along with others, will be studied in greater depth in subsequent courses in the degree program.

COM 330.................................................................................. 3 credits

Small Groups and Team Communication

This course explores the dynamics of group communication and effective team work. Both social and workplace scenarios will be examined. Analytical techniques will be included to provide effective strategies for communication in these contexts.

COM 350.................................................................................. 3 credits

Organizational Communication

This course examines various theoretical frameworks necessary for effective organizational communication. It analyzes the application of communication strategies within organizations in terms of their effectiveness. It provides the infrastructure necessary for the creation and maintenance of successful communication strategies in organizations.

COM 360.................................................................................. 3 credits

Intercultural Communication

The purpose of this course is to assist students in understanding and apply the principles of effective intercultural communication in a diverse society and in global commerce. Students will develop an understanding of why and of how cultural issues influence effective communication. This course introduces techniques for improving written, oral, and interpersonal communication skills in response to intercultural settings.
COM 400 ..................................................................................3 credits

**Media and Society**

The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.

COM 440 ..................................................................................3 credits

**Communication Law**

This course focuses on the U.S. legal environment and its specific laws, court decisions, policies, and regulations that address the freedom and responsibilities that come with the First Amendment to the U.S. Constitution. The personal, commercial, and political exercise of free speech, and its regulation, will be analyzed in this course.

COM 450 ..................................................................................3 credits

**Ethics and Communication**

While ethical decision-making permeates every facet of personal and professional life, this course focuses specifically upon ethical issues that are inherent in personal and public forms of communication. Special emphases are placed on ethical issues in commercial communication. Ethical decision-making models will be discussed and applied to cases involving various contemporary and controversial communication topics.

COM 470 ..................................................................................3 credits

**Mediation and Conflict Resolution**

Communication is the foundation upon which mediation and other forms of alternative dispute resolution are based. This course starts with an examination of the theoretical basis for ADR in light of communication theory. Then it focuses upon the effective application of theory and practice to achieve meaningful results and to avoiding conflict in the future.

COM 480 ..................................................................................3 credits

**Communication Capstone Course**

This is the capstone course for students pursuing the bachelor’s of science in communication. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 ..................................................................................3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ..................................................................................3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ..................................................................................3 credits

**Skills for Lifelong Learning**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 ..................................................................................3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ..................................................................................3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ..................................................................................3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ..................................................................................3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.
Course Descriptions for the Concentration in Communication and Technology

**CIS 205 ................................................................. 3 credits**
**Management Information Systems**
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

**COM 420 ............................................................ 3 credits**
**Creativity and Communication**
Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of "creative" is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one's creativity is one of the primary focuses of the course.

**VCT 235 .............................................................. 3 credits**
**Image Editing & Implementation**
Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

**VCT 310 .............................................................. 3 credits**
**Web Design**
This course focuses on the principles of good web design and the essential role of the web designer in today’s business environment. Topics covered include layout, style, artistic quality, navigation, performance, communication, community, e-commerce and marketing.

**VCT 320 .............................................................. 3 credits**
**Electronic Publishing**
This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

**VCT 420 .............................................................. 3 credits**
**Multimedia Development**
This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.
**Course Descriptions for the Concentration in Culture and Communication**

- **SOC 262** ................................................................. 3 credits

**Contemporary American Society**

Students in this course will explore the implications of ethnicity, culture, and diversity within the context of society. Students will be introduced to racial and ethnic relations, prejudice, stereotypes, discrimination, and adaptation and conflict in diverse cultures.  

**SOC 333** ................................................................. 3 credits

**Genders in Society**

The objective of this course is to explore gender differences and communication. This course introduces students to gender inclusiveness and sensitivity through the examination of the roles of genders in society. Students will focus on gender communication in business, organizations, family and the media. Additionally, students will explore communication traits of men and women and the impact of miscommunication between genders.  

**SOC 335** ................................................................. 3 credits

**The Peoples and Cultures of Asia**

This course provides students with an overview of the cultural traditions and contemporary development of Asian countries. Course topics include the geography, history, politics, economic development, and social conditions of Asian countries.  

**SOC 337** ................................................................. 3 credits

**Contemporary Latin American Society**

This course introduces the cultural perspectives of Latin America. Students will explore cultural geography, ethnicity, class and culture, gender, and challenges facing Latin America.  

**SOC 338** ................................................................. 3 credits

**The African American Experience**

This course serves as an introduction to the African American experience. This course will explore the social construction of identity, culture and the inequalities African Americans face in popular American culture. Race, class and gender of the African American people will be explored from a historical to modern day perspective.  

**COM 403** ................................................................. 3 credits

**Contemporary Communication in a Diverse Society**

The objective of this course is to focus on the dynamics of human communication across cultures and genders in a multicultural society.  

**Course Descriptions for the Concentration in Journalism**

- **JRN 310** ................................................................. 3 credits

**Introduction to Journalism**

This course is the introduction to the journalism concentration. The role of the journalist will be described from its origin to the emergence of the modern-era journalist. Key journalistic theories and principles will be discussed. Special attention will be given to influences in journalism and qualities that exemplify journalistic writing. The concepts of journalistic writing, research, technology, ethics, and personal responsibility will be introduced. Controversial issues faced by journalists will be highlighted throughout the course.

- **JRN 320** ................................................................. 3 credits

**Research for Journalism**

This course focuses on the research methods employed in journalistic writing and reporting. The goal of this course is to enhance the understanding of the characteristics of credible sources and accurate information. Information will be assembled and evaluated to support journalistic goals by interpreting information needs, choosing accurate and unbiased sources, and selecting relevant and reliable information. The importance of employing ethical practices to research techniques is emphasized throughout the course.  

**JRN 330** ................................................................. 3 credits

**Journalistic Writing I**

This course focuses on understanding journalistic writing styles. The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.  

**JRN 340** ................................................................. 3 credits

**Journalistic Writing II**

This course focuses on the application of the diverse journalistic writing techniques used by today's changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written media messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The association between research and responsible writing will be explored, as writing strategies to craft effective messages are developed. The role of ethics in journalism is emphasized throughout the course.  

**JRN 350** ................................................................. 3 credits

**Controversial Issues in Journalism**

This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter’s ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public’s need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.  

**JRN 360** ................................................................. 3 credits

**Storytelling: A Multimedia Approach**

This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.
Bachelor of Arts in English

The following Bachelor of Arts in English (BA/ENG) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Arts in English degree is designed to provide students with substantive academic content in the discipline of their choice. After completion of additional methodology courses required for teacher certification in all states, the degree may assist in the preparation of students for teaching opportunities in elementary and secondary education. The degree may also provide an academic foundation for students interested in pursuing further graduate education necessary for postsecondary teaching positions in English and Literature at most colleges and universities. Focused studies are designed to provide an interdisciplinary component that will increase the student's breadth of learning. The degree will provide workers in business and government, as well as education, with learning that promotes critical thinking, information utilization, collaboration, communication, and analytical skills essential to effective and efficient work productivity. The Bachelor of Arts in English is designed to provide students with a comprehensive understanding of rhetoric, literature, and writing. Students will choose from topics in American and English literature, writing essentials, linguistics, and poetry, literary masterpieces, and technical writing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ba-eng.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BA/ENG Required Course of Study - English Major

GEN 200 3 credits
Foundations for General Education and Professional Success

Major Courses-Lower Division

ENG 125 3 credits
Literature in Society

English Literature since 1800
ENG 495 3 credits
Advanced Creative Writing
ENG 496 3 credits
African American Literature

The University reserves the right to modify the required course of study.

Focus Study -15 credits

To satisfy the Focus Study requirement, students must complete 15 credits in a content area outside of their selected major. All 15 credits must be from the same content area and can be satisfied using transfer or University of Phoenix coursework. Credits completed to satisfy the Focus Study requirement may not apply within applicable General Education categories.

Electives -24 credits

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Arts in English degree.
Electives - 9 credits (for Arkansas students only)
Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Arts in English degree.

Additional Admission Requirements BA/ENG

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the BA/ENG

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - All students must meet the General Education areas approved by the university.
  - Completion of a fifteen (15) credit Focus Study.
  - A minimum grade point average (GPA) of 2.0.
  - Students may choose additional elective credits to fulfill upper division and elective requirements.
  - All undergraduate students are required to complete the minimum general education credits required by their program version.
- The diploma awarded for this program will read as: Bachelor of Arts in English and will not reflect the Focus Study.

General Education Requirements for the BA/ENG

Communication Arts Requirement(s) 6 credits
Must include COMM 215 or equivalent
Puerto Rico students may not use conversational English to satisfy Communication Arts
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts.
Mathematics Requirement(s) 6 credits
Must include MTH 209
Social Science Requirement(s) 6 credits
Nevada students must complete 3 credits in Nevada Constitution
Science & Technology Requirement(s) 6 credits
Must include 3 credits in the physical or biological sciences
Humanities Requirement(s) 6 credits
Foreign Language Requirement(s) 6 credits
NTP Foreign Language Exams may be used to satisfy foreign language requirements.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for Arkansas students for the BA/ENG

Communication Arts Requirement(s) 6 credits
Must include COMM 215 or equivalent
Mathematics Requirement(s) 6 credits
Must include MTH 209 and MTH 220
Social Science Requirement(s) 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with a lab component.
Science & Technology Requirement(s) 9 credits
Must include 3 credits in the physical or biological sciences
Must include CHM 110 and PHY 101 or equivalent transfer coursework with US History or Government content.
Humanities Requirement(s) 9 credits
Additional Liberal Arts 6 credits
Foreign Language Requirement(s) 6 credits
NTP Foreign Language Exams may be used to satisfy foreign language requirements.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.
Academic Progression Requirements for the BA/ENG

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix course work,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study. Students must declare a Focus Study within 84 applied credits of a program.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BA/ENG

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 15 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the major, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the major. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the major, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: GEN 200
Course Descriptions for the BA/ENG

**GEN 200 .......................................................... 3 credits**

**Foundations for General Education and Professional Success**
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

ENG 125 .......................................................... 3 credits

**Literature in Society**
This course introduces themes in literature and provides guided study and practice in reflecting on themes, which describe the human experience across cultural and societal boundaries. The course includes readings from literature in different genres and cultures. Students will study the literature in thematic units and be asked to make connections to their own lives and cultures.

ENG 106 .......................................................... 3 credits

**Survey of Literacy Masterpieces**
This course provides students with a survey of literary masterpieces across the ages. Students will gain insight into writing and culture from the content of this course. Topics include Shakespeare, Homer, Dante, Milton, Machiavelli, and Joyce, among other literary authors.

ENG 155 .......................................................... 3 credits

**Mythology in Literature and Life**
This course provides an overview of mythology and its relationship to ancient and current cultures. The course covers the purposes and types of myths, the development of myths and mythological characters; the common elements of mythological structures, the predominant characteristics of deities and heroes in myth and the obstacles and dangers that these archetypes encounter, how myths affect our personal and social lives, in which these ancient archetypes are found in contemporary society, and how attitudes and behaviors are influenced by mythological literature.

ENG 157 .......................................................... 3 credits

**Multicultural Literature**
This course provides students with an introduction to multicultural literature. Emphasis is placed on increasing students’ awareness and understanding of the values, beliefs, and experiences of people from different cultures through literature.

ENG 215 .......................................................... 3 credits

**Effective Academic Writing**
This course develops the skills used in writing applied research papers for a university-level audience. Students will write position papers, persuasive essays, and case study analyses. Students will study classical rhetorical concepts of authority and the Toulmin method of argument analysis, and will evaluate outside sources for objectivity and utility in constructing persuasive arguments. Students practice giving peer feedback, revising essays in response to feedback, and writing collaboratively as learning teams. The course reviews the elements of grammar, mechanics, style, and proper documentation of outside sources.

COMM 251 .......................................................... 3 credits

**Rhetoric and Critical Thinking**
This course in critical thinking and informal logic helps students develop the ability to reason clearly and critically. It includes an introduction to the disciplines of inductive and deductive logic, fallacious reasoning, and problem-solving techniques. Emphasis is placed on the identification and management of the perception process, use of assumptions, emotional influences, and language in various forms of communication.

HUM 150 .......................................................... 3 credits

**Introduction to Film Studies**
Introduction to Film Studies is designed to provide students with an overview of film history and the skills necessary to analyze and critique film. Students will learn about film theory, aesthetics, genres, and basic film criticism. Students will analyze film through an examination of cinematography, editing, acting, scenes, and sound to allow students to view films critically, to develop a systematic and convincing interpretation of the films they watch, and to acquire the ability to analyze films in well-constructed and persuasive essays.

ENG 135 .......................................................... 3 credits

**Essentials of Contemporary Communication**
This course covers the skills necessary for effective written and oral communication in the work environment and in modern society. The course reviews basic communication theories and discusses the fundamentals of interpersonal, written, and oral communication skills.

ENG 221 .......................................................... 3 credits

**Technical Writing Fundamentals**
This course covers the fundamentals and best practices of using written communication in business and in the information technologies. Topics include strategies, techniques, and nuances for producing emails, memos, reports, proposals, project specifications, and user manuals, as well as other technical documents.

ENG 290 .......................................................... 3 credits

**Children’s Literature in a Pluralistic Society**
This course examines the social function of children’s literature from oral origins to modern anthologies, exploring messages in nursery rhymes, fairy tales, and early childhood fiction. Students will apply major schools of literary criticism and relate children’s literature to theoretical models of childhood. The course surveys readings across cultures (European/American, Native American, African American, Asian, and Hispanic/Latino), genres (nursery rhymes, fairy tales, picture books, early childhood fiction), and time periods. It addresses portrayals of ethnicity, race, class, and gender in children’s literature, and considers the implications of film adaptations of select children’s stories in a pluralistic society.

ENG 301 .......................................................... 3 credits

**American Ethnic Literature**
This course will survey the literature of the major ethnic groups in the United States (Hispanics/Latinos, Native Americans, African-Americans, and Asian-Americans) as a means to explore ethnic diversity and minority voices. Focusing on contemporary relevance, a wide range of representative literary works and authors will be discussed in their historical, socio-political, and cultural contexts with special consideration of characteristic literary themes and techniques.
ENG 306................................................................................... 3 credits

**Poetry and Society**

This course surveys English language poetry from medieval times through the present. Students analyze and interpret poetry, paying particular attention to the role of the poet and poetry in society. Poems are addressed in historical context, by theme, and for their relevance to contemporary culture.

ENG 340................................................................................... 3 credits

**Creative Writing**

This course introduces students to creative writing in various genres. The purpose of this course is to develop and expand students' imaginative writing processes and to develop and expand their understanding of the human experience through creative writing. This would include identifying elements of writing and developing skills and techniques for creative writing in poetry, fiction, and nonfiction writings.

ENG 380................................................................................... 3 credits

**Applied Linguistics**

This course introduces students to the nature of language and the way in which language is acquired and used in society. It also addresses grammatical aspects of language such as syntax, semantics, and pragmatics and changes in language over time. Stages of language acquisition and bilingual development will also be discussed.

ENG 491................................................................................... 3 credits

**American Literature to 1860**

This course will survey major authors, ideologies, and historical contexts of American literature from colonial times until the Civil War era. A diverse range of works, genres, movements, and cultural narratives will be explored. Accounts of early explorers, Puritan sermons, American Indian mythology, slave narratives, political, and social writings, and poetry will be read and discussed.

ENG 493................................................................................... 3 credits

**American Literature since 1800**

This course will provide students with an in-depth analysis of American literature from the 19th century to the present. A diverse range of works, genres, movements, and cultural narratives will be explored. Humanities ENG 495................................................................................... 3 credits

**English Literature since 1800**

This course will survey major authors, ideologies, and historical contexts of English literature from the 19th century to the present. A diverse range of works, genres, movements, and cultural narratives will be explored. Humanities

ENG 496................................................................................... 3 credits

**American Autobiography**

Through the use of memoirs, autobiographies, journals, or diaries, students in this course will be introduced to individuals who impacted the social, political, and cultural environments of America.

ENG 492................................................................................... 3 credits

**Shakespeare**

This course will focus on Shakespearean literature and will cover significant plays still popular today. Students will discuss the influence of Shakespeare on literary, social, and theatrical concepts.

ENG 308................................................................................... 3 credits

**American Literature since 1860**

This course will survey the writings of 150 years in the historical and cultural context of America. The influence of vast social, political, and philosophical changes in America on literary works will be explored. The major literary movements, works, and authors of four distinct time periods will be read and discussed: the late 19th century, the early 20th century, the late 20th century, and the 21st century.

ENG 494................................................................................... 3 credits

**African American Literature**

This course will provide students with an in-depth analysis of African American Literature. Topics include the underlying historical experiences and cultural values of African Americans and how these experiences and values were expressed through various types of literature. Throughout the course, students will be encouraged to examine African American Literature in a socio-historical context.

COMM 215 ............................................................................. 3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
MTH 209.................................................................3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

GEN 101 .................................................................3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .................................................................3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 220.................................................................3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 .................................................................3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 .................................................................3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 .................................................................3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science in History
The following Bachelor of Science in History (BS/HIS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in History degree is designed to provide students with substantive academic content in the discipline of their choice. After completion of additional methodology courses required for teacher certification in all states, the program may assist in the preparation of students for teaching opportunities in elementary and secondary education. The degree may also provide an academic foundation for students interested in pursuing further graduate education necessary for postsecondary teaching positions in history at most colleges and universities. Focused studies are designed to provide an interdisciplinary component that will increase the student’s breadth of learning. The program will provide workers in business and government, as well as education, with learning that promotes critical thinking, information utilization, collaboration, communication, and analytical skills essential to effective and efficient work productivity. The Bachelor of Science in History introduces students to the study of the past and develops their understanding of historical events as they relate to the present. Students develop skills in research, critical thinking & analysis, and communication through a rigorous study of the past as a contextual framework. Students will gain a proficient understanding of the major historical facts and themes in Western Civilization, United States, and Global History through their course of study.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

### Focus Study - 15 credits

To satisfy the Focus Study requirement, students must complete 15 credits in a content area outside of their selected major. All 15 credits must be from the same content area and can be satisfied using transfer or University of Phoenix coursework. Credits completed to satisfy the Focus Study requirement may not apply within applicable General Education categories.

### Electives - 27 credits

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in History degree.

### Electives - 12 credits (for Arkansas students only)

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in History degree.

The University reserves the right to modify the required course of study.

### Additional Admission Requirements BS/HIS

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution's student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
Degree Requirements for the BS/HIS
The degree requirements for this program are the following:
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 45 upper division credits.
  • All students must meet the General Education areas approved by the university.
  • Completion of a fifteen (15) credit Focus Study.
  • A minimum program grade point average (GPA) of 2.0.
• Students may choose additional elective credits in order to fulfill the required upper division and elective requirements.
• All students must complete the minimum number of credits required by their degree program.
• All undergraduate students are required to complete the minimum general education credits required by their program version.

General Education Requirements for the BS/HIS
Communication Arts Requirement(s) 6 credits
Must include COMM 215, equivalent or higher
Puerto Rico students may not use conversational English to satisfy Communication Arts
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus.
Mathematics Requirement(s) 9 credits
Must include MTH 209 and MTH 233, equivalent or higher
Social Science Requirement(s) 6 credits
Must include HIS 311 in Nevada only
Science & Technology Requirement(s) 6 credits
Must include at least three credits in the physical or biological sciences
Humanities Requirement(s) 6 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for Arkansas students for the BS/HIS
Communication Arts Requirement(s) 6 credits
Must include COMM 215, equivalent or higher
Mathematics Requirement(s) 9 credits
Must include MTH 233, equivalent or higher
Must include MTH 220.
Social Science Requirement(s) 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.
Science & Technology Requirement(s) 9 credits
Must include at least three credits in the physical or biological sciences
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.
Humanities Requirement(s) 9 credits
Additional Liberal Arts 6 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BS/HIS
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.

Students must declare a Focus Study within 84 applied credits of program.
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.
Residency Requirements and Course Waivers for the BS

The University requires that the majority of coursework in the major and focus be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of thirty (30) upper division credits at the University. Students in this program may waive a maximum of fifteen (15) credits from their major and focus on the basis of regionally or approved nationally accredited transferable coursework. Prior learning credit and military credits may not be used to waive coursework.

In order to be granted a waiver for a course in the major and focus, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the major. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the major or focus, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution in which the University has entered into an approved articulation agreement with.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved Articulation Agreement.
- The course must be comparable in content and credits to the University course it is replacing and be approved through the Articulation Agreement.

The following courses in the required course of study may not be waived: GEN 200

Course Descriptions for the BS/HIS

GEN 200 ........................................................................................................... 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
HIS 110 ........................................................................................................... 3 credits
U.S. History to 1865
This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.
HIS 120 ........................................................................................................... 3 credits
U.S. History 1865 to 1945
This course recounts the story of our country by looking at the experiences of the many diverse races and nationalities that, woven together, have created the United States of America. Students will learn to appreciate the contributions various peoples have made to the American culture. Emphasis will be placed on how both compromise and conflict have played major parts in American history.
HIS 145 ........................................................................................................... 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.
HIS 112 ........................................................................................................... 3 credits
History of Western Civilization from Prehistory to the Middle Ages
This course provides an overview of the principal social, cultural, political, economic, and global developments that shaped Western civilization from prehistory to the Middle Ages. It presents a framework for understanding current social experience by applying historical perspectives to contemporary issues.
GEO 155 ........................................................................................................... 3 credits
Cultural Geography
This course provides students with an introduction to the cultural factors that impact the way in which humans use the environment. Topics include settlement patterns, the modification of the landscape, and resource utilization.
HIS 276 ........................................................................................................... 3 credits
Global Civilizations 1400-1700
This course provides an overview of the establishment of world civilizations during the European Middle Ages through the 1700s. The principle social, cultural, political, economic, and global developments that influenced multiple civilizations during this period will be explored. The framework of this course will provide a societal understanding by applying historical perspectives to contemporary issues.
REL 134......................................................................................3 credits

World Religious Traditions II
This course provides a survey of the major historical developments, structural cosmology, symbolic interpretation, and values of the Judaic, Christian, and Islamic religious traditions.
HIS 275 .............................................................3 credits

Global Civilizations to 1400
This course provides an overview of the establishment of civilizations throughout the world to the 1400s. The principle social, cultural, political, economic, and global developments that influenced multiple civilizations will be explored. The framework of the course will provide a societal understanding by applying historical perspectives to contemporary issues.
HIS 114 ......................................................................................3 credits

History of Western Civilization from the French Revolution to the Present
This course provides an overview of the principle social, cultural, political, economic, and global developments that shaped Western civilization from the French Revolution to the present. It presents a framework for understanding current social experience by applying historical perspectives to contemporary issues.
HIS 206 .....................................................................................3 credits

Asian History
This course provides a historical overview of India, China, Southeast Asia, Korea, and Japan. Emphasis will be placed on the diverse political, social, intellectual, and economic histories of these countries.
HIS 205 ......................................................................................3 credits

Latin American History
This course provides an overview of the history of Latin America. Topics include politics, economic development, international relations, and cultural development.
HIS 308 ......................................................................................3 credits

European History: Early Modern Era to the Present
This course discusses the growth and development of European nations from the Early Modern Era to the present, with a focus on Europe’s social, political, and economic history.
HIS 309 ......................................................................................3 credits

American Colonial and Revolutionary History
This course discusses the development of the American colonies and the origins of the American Revolution.
HIS 335 ......................................................................................3 credits

Europe and the World Wars
This course discusses the causes and history of World War I, the interwar era, and World War II, with a particular emphasis upon social, political, and economic developments during the period.
HIS 349 ......................................................................................3 credits

The History of Modern China
This course provides students with a survey of the final century of dynastic rule and the rise to power of the Nationalist and Communist parties. Social and cultural developments, the impact of Western imperialism, and the evolution of revolutionary ideologies are highlighted throughout the course.
HIS 403 ......................................................................................3 credits

Foundations of American Foreign Policy
This course provides students with a review of U.S. diplomatic relations with Europe, Latin America, and Asia from the Declaration of Independence to the First World War.
RES 404 ......................................................................................3 credits

Historical Research Methods
This course provides students with the opportunity to learn and apply various types of research methods used in historical research. Emphasis is placed on research, writing, and critical thinking in a historical context.
HIS 301 ......................................................................................3 credits

United States Constitution
This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those who supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution, known as the Bill of Rights, as well as later amendments, and the issues of slavery and civil rights as seen through major court decisions.
HIS 341 ......................................................................................3 credits

Ancient Worlds
This course provides students with the opportunity to study the historical and cultural developments of Ancient Worlds including Egypt, Greece, and Rome.
HIS 343 ......................................................................................3 credits

The Ancient World: Greece
This course provides an examination of the tumultuous history of the Middle East. Topics include the spread of Islam, the 19th-century Middle East, the Middle East after World War I, and the present-day Middle East.
HIS 355 ......................................................................................3 credits

The History of Modern Mexico
This course presents an analysis of the historical, cultural, social, economic, and political development of Mexico from 1821 to the present.
HIS 356 ......................................................................................3 credits

The History of Africa
This course examines the events and processes leading up to the colonization of Africa, and the subsequent changes in African society under colonial rule and after independence.
HIS 359 ......................................................................................3 credits

The History of Russia and the Soviet Union
This course provides students with an overview of the history of modern Russia and the Soviet Union including the decline of Imperial Russia, the Revolution of 1917, and collapse of the Soviet Union.
HIS 458 ......................................................................................3 credits

History of Human Discovery
This course seeks to provide an interdisciplinary approach to human discovery by investigating the minds, hearts, and actions of some of the significant people and events in the history of human development.
COMM 215 ................................................................. 3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 101 ................................................................. 3 credits

**Skills for Lifelong Learning**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................. 3 credits

**Skills for Professional Development**

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 233 ................................................................. 3 credits

**Statistics**

This course surveys descriptive and inferential statistics with emphasis on practical applications of statistical analysis. The principles of collecting, analyzing, and interpreting data are covered. It examines the role of statistical analysis, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings through the applications and functions of statistical methods.

MTH 209 ................................................................. 3 credits

**College Mathematics II**

This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

HIS 311 ................................................................. 3 credits

**Nevada and U.S. Constitution**

This course is a study of the history and development of the Nevada and U.S. Constitutions, particularly during the 20th Century. The historical, political, economic, and social foundations upon which the U.S. Constitution was built and the philosophies of the proponents and opponents to its adoption are analyzed.

Selected provisions of the Nevada Constitution and, in particular, Article 1 of the Declaration of Rights are also analyzed. (Nevada students only.)

MTH 220 ................................................................. 3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................. 3 credits

**Introductory Chemistry**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.
COLLEGE OF SOCIAL SCIENCES

The College of Social Sciences offers undergraduate and graduate degree programs in a number of diverse academic areas including counseling, psychology, and human services. In addition, the college offers a certificate program in mediation.

The College provides innovative educational programs designed to enhance the core knowledge, skills and values essential for students seeking to achieve their academic goals in the field of social sciences. These programs are developed and taught by skilled practitioners who work in their respective fields. Through individual and collaborative work, students can acquire the knowledge and skills needed in today’s working environment.

Associate of Arts in Psychology

The following Associate of Arts/Concentration in Psychology (AAPSY) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Psychology includes courses in positive psychology, theories of personality, human sexuality, diversity, psychological disorders, social dynamics and the physiological and neurological bases of human behavior. In this program, students will analyze the interrelationship among leading psychological theories and evaluate how these theories differentially define and explain variations in human behavior. Students will be introduced to the research process and challenged to critically evaluate research results, theories, models, and concepts across a wide range of topics in the field of Psychology.

For more information about our graduation rates, the median debt range of topics in the field of Psychology.

Please contact your enrollment advisor for more information.

Concentration in Psychology - Track A

PSY 201 ~ ................................................................. 3 credits
Foundations of Psychology
PSY 220 ~ ................................................................. 3 credits
Positive Psychology: What’s Right With Me
PSY 230 ~ ................................................................. 3 credits

Abnormal Psychology: Abuse, Addiction & Other Disorders

Additional Admission Requirements for AAPSY

• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAPSY

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: U.S. 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Concentration 18 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Degree Requirements for AAPSY

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAPSY

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAPSY

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAPSY

COM 150 .......................................................... 3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .......................................................... 3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
ETH 125 .....................................................................................3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .....................................................................................3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .....................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich age. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Course Descriptions for the AAPSY - Track A

PSY 201 .....................................................................................3 credits

Foundations of Psychology
This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 202 .....................................................................................3 credits

Course Descriptions for the AAPSY - Track A

PSY 230 .....................................................................................3 credits

Psychology of Human Sexuality: What Turns You On and Why?
This course is a comprehensive view of the psychosocial and physiological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

PSY 240 .....................................................................................3 credits

Abnormal Psychology: Abuse, Addiction, and Other Disorders
This course introduces the study of major psychological disorders as defined in the DSM-IV-TR, including their diagnoses, causes, and treatments. It covers such subjects as depression, bipolarity, anxiety, panic, somatoform, dissociation, substance abuse, anorexia, schizophrenia, and childhood disorders, as well as gender and cultural differences.

Course Descriptions for the AAPSY - Track B

PSY 201 .....................................................................................3 credits

Foundations of Psychology
This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 220 .....................................................................................3 credits

Positive Psychology: What's Right With Me
How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.

PSY 230 .....................................................................................3 credits

Theories of Personality: I Think, Therefore Who Am I?
What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight in to the question of the self. Psychoanalytic, social, behavioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240 .....................................................................................3 credits

The Brain, the Body, and the Mind: All Together Now
This course provides an introduction to the investigation of physiological and neurological basis for human behavior. The student will be able to study and discuss various influences on personality development, such as pre-natal maternal behavior; gender; nature versus nurture; brain development; genetic composition; sensory motor interactions; learning disabilities; drug impacts; and neurological diseases.
PSY 265 ......................................................... 3 credits
Psychology of Human Sexuality: What Turns You On and Why?
This course is a comprehensive view of the psychosocial and physiological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

PSY 270 ................................................................. 3 credits
Abnormal Psychology: Abuse, Addiction, and Other Disorders
This course introduces the study of major psychological disorders as defined in the DSM-IV-TR, including their diagnoses, causes, and treatments. It covers such subjects as depression, bipolarity, anxiety, panic, somatoform, dissociation, substance abuse, anorexia, schizophrenia, and childhood disorders, as well as gender and cultural differences.

Associate of Arts in Psychology (Maryland-Online)

The following Associate of Arts/Emphasis in Psychology (AAPSY) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 220 .................................................................................... 3 credits
Positive Psychology: What's Right With Me
How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.

PSY 230 .................................................................................... 3 credits
Theories of Personality: I Think, Therefore Who Am I?
What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight in to the question of the self. Psychoanalytic, social, behavioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240 .................................................................................... 3 credits
The Brain, the Body, and the Mind: All Together Now
This course provides an introduction to the investigation of psychological and neurological basis for human behavior. The student will be able to study and discuss various influences on personality development, such as pre-natal maternal behavior; gender; nature versus nurture; brain development; genetic composition; sensory motor interactions; learning disabilities; drug impacts; and neurological diseases.

135
PSY 265 ..................................................................................3 credits

**Psychology of Human Sexuality: What Turns You On and Why?**

This course is a comprehensive view of the psychosocial and physiological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

PSY 270 ..................................................................................3 credits

**Abnormal Psychology: Abuse, Addiction, and Other Disorders**

This course introduces the study of major psychological disorders as defined in the DSM-IV-TR, including their diagnoses, causes, and treatments. It covers such subjects as depression, bipolarity, anxiety, panic, somatiform, dissociation, substance abuse, anorexia, schizophrenia, and childhood disorders, as well as gender and cultural differences.

**Associate of Arts in Psychology (Minnesota/Arkansas)**

The following Associate of Arts/Concentration in Psychology (AAPSY) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state.

Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Psychology includes courses in positive psychology, theories of personality, human sexuality, diversity, psychological disorders, social dynamics and the physiological and neurological bases of human behavior. In this program, students will analyze the interrelationship among leading psychological theories and evaluate how these theories differentially define and explain variations in human behavior. Students will be introduced to the research process and challenged to critically evaluate research results, theories, models, and concepts across a wide range of topics in the field of Psychology.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aapsy.

Additional Admission Requirements for AAPSY

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AAPSY for Arkansas Students**

**Communication Arts Requirement 6 credits**

(A Track must include: COM 150 and COM 220)

(B Track must include: COM 155 and COM 156)

**Mathematics Requirement 6 credits**

Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

**Must include: MAT 219 and MAT 220**

**Science & Technology Requirement 9 credits**

(B Track must include: SCI 162)

**Must include: BIO 100 and CHM 109**

The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.

**Social Science Requirement 9 credits**

(A Track must include: ETH 125)

(B Track must include: PSY 201 and ETH 125)

**Must include: HIS 135**

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

**Humanities Requirement 9 credits**

(A Track must include: CRT 205)

(B Track must include: HUM 111)

**Additional Liberal Arts Requirement 6 credits**

(A Track must include: GEN 105)

(B Track must include: US 101 and FP 101)

**Concentration 15 credits**

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
General Education Requirements for the AAPSY for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Degree Requirements for the AAPSY

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAPSY

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAPSY

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
**Course Descriptions for the AAPSY**

**Effective Essay Writing**

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**ETH 125** ................................................................. 3 credits

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

**HIS 135** ................................................................. 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

**CRT 205** ................................................................. 3 credits

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**GEN 105** ................................................................. 3 credits

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Course Descriptions for the AAPSY - Track A**

**PSY 202** ................................................................. 3 credits

**Foundations of Psychology**

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

**PSY 220** ................................................................. 3 credits

**Positive Psychology: What's Right With Me**

How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.
PSY 230.......................................................................................... 3 credits

**Theories of Personality: I Think, Therefore Who Am I?**

What is theory? What is a personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their theories in offering insight into the question of the self. Psychoanalytic, social, behavioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240.......................................................................................... 3 credits

**The Brain, the Body, and the Mind: All Together Now**

This course provides an introduction to the investigation of physiological and neurological basis for human behavior. The student will be able to study and discuss various influences on personality development, such as pre-natal maternal behavior; gender; nature versus nurture; brain development; genetic composition; sensory motor interactions; learning disabilities; drug impacts; and neurological diseases.

PSY 265.......................................................................................... 3 credits

**Psychology of Human Sexuality: What Turns You On and Why?**

This course is a comprehensive view of the psychosocial and psychological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

**Course Descriptions for the AAPSY - Track B**

**Foundations of Psychology**

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 220.......................................................................................... 3 credits

**Positive Psychology: What’s Right With Me**

How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.

Course Descriptions for the AAHSM
HSM 210 .................................................................................. 3 credits

Human Services in the United States
This course is a foundation for studies of human services in the United States. It provides an overview of the evolution of American human services delivery systems, including historical perspectives, as well as current and future trends. It covers the role of human services workers, how needs are determined and met, and factors that affect the delivery of services such as theoretical perspectives, social policies, and government regulations. Community advocacy, prevention techniques, contemporary issues, and careers in the human services industry are also examined.

HSM 220 .................................................................................. 3 credits

Human Services Administration: So You Want to Help People
This course discusses the roles and responsibilities of administrators in human services organizations. It covers recent studies related to the changing contexts of human services delivery, leadership, organizational culture, human resource management, financial management, strategic planning, working with boards, marketing and public relations, social entrepreneurship, partnership, and collaboration.

HSM 230 .................................................................................. 3 credits

Ethical Issues in Human Services Organizations
HSM 230 explores the legal and ethical environments of human service organizations. Students consider tools and traditions for ethical decision-making, the role of the leader, and the role of organizational culture in sustaining a moral vision, and the design of need for legal and ethical oversight. Students analyze current ethical and legal dilemmas and controversies through case studies and debate.

HSM 240 .................................................................................. 3 credits

Public Policy Development in Human Services
This course focuses on the formation and execution of public policy and programs by government and private organizations within human services. Emphasis is placed on evaluative and analytical approaches for determining positive and negative characteristics of policies and programs. Students will learn to analyze and critique organizations and the policies and programs within those organizations.

HSM 260 .................................................................................. 3 credits

Financial Management for Human Service Managers
This course focuses on the conceptual understanding and practice of financial management as it applies to human service agencies. Students complete the course with a better understanding of basic accounting concepts, budgets and budgeting systems, and how to create performance measures, and the ability to analyze financial statements for the purpose of cost analysis and forecasting. Aspects of setting fees, funding and risk management are also covered.

HSM 270 .................................................................................. 3 credits

Program Planning and Grant Proposal Writing in Human Services
This course provides practical knowledge in program planning, grant proposal writing, and program evaluation. Students will examine the planning process from conceptualization to implementation and evaluation. Also discussed is how to locate private and public funding for human service programs and agencies.

COM 150 .................................................................................. 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................................. 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
ETH 125 .....................................................................................3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .....................................................................................3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .....................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Human Services Management (Maryland-Online)

The following Associate of Arts/Emphasis in Human Services Management (AAHSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs are available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Human Services Management emphasis focuses on providing a solid foundation for future workers in the industry. Some of the content is focused in the areas of human services organizations, roles of human services workers, public policy, multicultural practices, information technology, financial management, and regulatory and ethical issues. Some of the activities included in the emphasis are creating care plans, developing alternative funding strategies, and determining the characteristics of good human services management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahsm.

(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Emphasis 18 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
Degree Requirements for AAHSM
The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the emphasis. Emphasis are reflected on the transcript only.

Academic Progression Requirements for the AAHSM
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

Residency Requirements for the AAHSM
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAHSM
HSM 210 ................................................................. 3 credits

Human Services in the United States
This course is a foundation for studies of human services in the United States. It provides an overview of the evolution of American human services delivery systems, including historical perspectives, as well as current and future trends. It covers the role of human services workers, how needs are determined and met, and factors that affect the delivery of services such as theoretical perspectives, social policies, and government regulations. Community advocacy, prevention techniques, contemporary issues, and careers in the human services industry are also examined.

HSM 220 ................................................................. 3 credits

Human Services Administration: So You Want to Help People
This course discusses the roles and responsibilities of administrators in human services organizations. It covers recent studies related to the changing contexts of human services delivery, leadership, organizational culture, human resource management, financial management, strategic planning, working with boards, marketing and public relations, social entrepreneurship, partnership, and collaboration.
HSM 230 .................................................................3 credits
Ethical Issues in Human Services Organizations
HSM 230 explores the legal and ethical environments of human service organizations. Students consider tools and traditions for ethical decision-making, the role of the leader, and the role of organizational culture in sustaining a moral vision, and the design of and need for legal and ethical oversight. Students analyze current ethical and legal dilemmas and controversies through case studies and debate.

HSM 240 .................................................................3 credits
Public Policy Development in Human Services
This course focuses on the formation and execution of public policy and programs by government and private organizations within human services. Emphasis is placed on evaluative and analytical approaches for determining positive and negative characteristics of policies and programs. Students will learn to analyze and critique organizations and the policies and programs within those organizations.

HSM 260 .................................................................3 credits
Financial Management for Human Service Managers
This course focuses on the conceptual understanding and practice of financial management as it applies to human service agencies. Students complete the course with a better understanding of basic accounting concepts, budgets and budgeting systems, and how to create performance measures, and the ability to analyze financial statements for the purpose of cost analysis and forecasting. Aspects of setting fees, funding and risk management are also covered.

HSM 270 .................................................................3 credits
Program Planning and Grant Proposal Writing in Human Services
This course provides practical knowledge in program planning, grant proposal writing, and program evaluation. Students will examine the planning process from conceptualization to implementation and evaluation. Also discussed is how to locate private and public funding for human service programs and agencies.

COM 150 .................................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .................................................................3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .................................................................3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .................................................................3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration In Human Services Management (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Human Services Management (AAHSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Human Services Management concentration focuses on providing a solid foundation for future workers in the industry. Some of the content is focused in the areas of human services organizations, roles of human services workers, public policy, multicultural practices, information technology, financial management, and regulatory and ethical issues. Some of the activities included in the concentration are creating care plans, developing alternative funding strategies, and determining the characteristics of good human services management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahsm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.
Concentration in Human Services Management - Track A and B

HSM 210 ~ ................................................................. 3 credits

Financial Management for Human Service Managers

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAHSM

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAHSM for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Must include: BIO 100 and CHM 109
The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

General Education Requirements for the AAHSM for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for the AAHSM

The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAHSM

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
• University of Phoenix coursework,
• Regionally or nationally accredited coursework (C- or higher grade),
• University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
• National Testing Programs, and
• ACE evaluated Military credits.

The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.

• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAHSM

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAHSM

HSM 210...................................................................................3 credits

Human Services in the United States

This course is a foundation for studies of human services in the United States. It provides an overview of the evolution of American human services delivery systems, including historical perspectives, as well as current and future trends. It covers the role of human services workers, how needs are determined and met, and factors that affect the delivery of services such as theoretical perspectives, social policies, and government regulations. Community advocacy, prevention techniques, contemporary issues, and careers in the human services industry are also examined.

HSM 220...................................................................................3 credits

Human Services Administration: So You Want to Help People

This course discusses the roles and responsibilities of administrators in human services organizations. It covers recent studies related to the changing contexts of human services delivery, leadership, organizational culture, human resource management, financial management, strategic planning, working with boards, marketing and public relations, social entrepreneurship, partnership, and collaboration.

HSM 230...................................................................................3 credits

Ethical Issues in Human Services Organizations

HSM 230 explores the legal and ethical environments of human service organizations. Students consider tools and traditions for ethical decision-making, the role of the leader, and the role of organizational culture in sustaining a moral vision, and the design of and need for legal and ethical oversight. Students analyze current ethical and legal dilemmas and controversies through case studies and debate.

HSM 240...................................................................................3 credits

Public Policy Development in Human Services

This course focuses on the formation and execution of public policy and programs by government and private organizations within human services. Emphasis is placed on evaluative and analytical approaches for determining positive and negative characteristics of policies and programs. Students will learn to analyze and critique organizations and the policies and programs within those organizations.

HSM 260...................................................................................3 credits

Financial Management for Human Service Managers

This course focuses on the conceptual understanding and practice of financial management as it applies to human service agencies. Students complete the course with a better understanding of basic accounting concepts, budgets and budgeting systems, and how to create performance measures, and the ability to analyze financial statements for the purpose of cost analysis and forecasting. Aspects of setting fees, funding and risk management are also covered.
**Effective Essay Writing**

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.
Bachelor of Science in Psychology

The following Bachelor of Science in Psychology (BS/P) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Psychology program provides students with a strong foundation in general psychology. Students will gain insight into the cognitive and affective processes that underlie the individual human experience through an analysis of a variety of theoretical approaches related to human development and behavior. The courses in this program do not have a clinical emphasis and do not lead to professional licensure; instead, they are designed to provide supervisors, managers and other professionals with greater skills in critical thinking, communication, collaboration, and information utilization through the enhanced understanding of human psychology.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bs-p.

Capstone Course in Psychology

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BS/P

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Completion Requirements for the BS/P

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 51 upper division credits.
  - All students must meet the General Education areas approved by the university.
  - A minimum grade point average (GPA) of 2.0.
  - All students must complete the minimum number of credits required by their degree program.
General Education Requirements for the BS/P
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
Puerto Rico students may not use conversational English to satisfy Communication Arts.
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts

Humanities Requirement(s) 6 credits
Mathematics Requirement(s) 6 credits
Science & Technology Requirement(s) 6 credits
Must include at least three (3) credits in the physical or biological sciences
Social Science Requirement(s) 6 credits
Nevada students must complete three (3) credits in Nevada Constitution
Interdisciplinary Requirement(s) 18 credits
Additional Liberal Arts Requirement(s) 6 credits
Puerto Rico students must take 6 credits of spanish in place of this requirement

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BS/P for Arkansas Students
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
Social Science Requirement(s) 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.
Humanities Requirement(s) 9 credits
Mathematics Requirement(s) 6 credits
Must include MTH 220.
Science & Technology Requirement(s) 9 credits
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.

Additional Liberal Arts Requirement(s) 6 credits
Interdisciplinary Requirement(s) 9 credits
Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BS/P
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.

- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who lack 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed prior to enrolling in any other program applicable course.
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BS/P
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 24 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the major, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the major. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the major, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: GEN 300, PSY 490

**Course Descriptions for the BSP**

**Skills for Professional Development**

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

PSY 300 .....................................................................................3 credits

**General Psychology**

General Psychology is a survey course which introduces the student to the major topics in scientific psychology as applied to human behavior. Applications of these principles will be made to the human experience.

PSY 310 .....................................................................................3 credits

**History and Systems of Psychology**

The purpose of this course is to familiarize the student with the various methods of inquiry, terminologies, and theoretical systems that comprise the history of psychology. A broader view is used to introduce the modern era of psychology and its use. These include: structuralism, functionalism, Gestalt, behaviorism, psychoanalysis, and phenomenological/existential approaches.

PSY 355 .....................................................................................3 credits

**Motivational Processes in Human Psychology**

This course examines theories and research results pertaining to the structures (self, person, role, and event schemas) and processes (expectations, attributions, and inferences) underlying self and person perception.

PSY 315 .....................................................................................3 credits

**Statistical Reasoning in Psychology**

This is an introductory course in applied statistics, with particular emphasis in psychology. Both descriptive and inferential statistics are included. In addition, this course provides the basic statistical background and understanding needed.

PSY 340 .....................................................................................3 credits

**Biological Foundations of Psychology**

This course is designed to expose you to the underlying physiological mechanisms of behavior. Physiological psychology is a complex but fascinating field of study. It explores the relationship between our biological systems and behavior. Structure and function of the nervous system from the neuron to the brain, as well as the interrelationships between the brain and such behaviors as eating, sleeping, learning, memory, emotion, and mental disorders will be discussed using examples from the behavior of both humans and lower organisms.

PSY 360 .....................................................................................3 credits

**Cognitive Psychology**

This course will present an overview of cognitive psychology and its findings, theories, and approach. Cognitive psychology deals with how we acquire and use knowledge so the course will cover topics such as perception, attention, memory, language, reasoning, and problem solving.

PSY 375 .....................................................................................3 credits

**Lifespan Human Development**

This course focuses on a historical view of human development leading to the current lifespan approach to form an understanding of the developing individual, and it explores influences on human development, ranging from individual models to cross-cultural groups. Emphasis is given to personality, social, intellectual, and physical development, and the major theories used to describe how people change throughout their lifespan.

PSY 390 .....................................................................................3 credits

**Learning and Cognition**

This course concerns the study of learning from the most basic associationist ideas to complex cognitive behaviors such as problem solving and thinking. Various ideas regarding the nature of the mind are presented along with the fundamental concepts of learning and conditioning. Strengths and weaknesses of the memory system are discussed as they relate to higher cognitive processes such as language, problem solving, and eyewitness identification. Neurophysiological correlates of cognitive phenomena and memory disorders are also discussed.

PSY 400 .....................................................................................3 credits

**Social Psychology**

This course provides a unified view of the field of social psychology organized around the concepts of social influence and power and exchange in social life and explores in-depth human thoughts, feelings, and actions as influenced by other people. Specific topics include socialization, perception of self and others, pro-social and anti-social behavior, attitudes, interpersonal attraction, social influence, and group behavior.
PSY 405..................................................................................... 3 credits
Theories of Personality
This course surveys the field of personality from a scientific perspective, examining the general approaches to understanding personality. The key theorists and concepts associated with each perspective are highlighted, along with the strengths and limitations of the different approaches.

PSY 410..................................................................................... 3 credits
Abnormal Psychology
This course is designed to provide students with an introduction to theories and research concerning abnormal behavior (psychopathology). The course will address such topics as the incidence (frequency) of abnormal behavior of various types; how abnormal behaviors are classified into various diagnostic categories; the etiologies (causes) of psychological disorders; and the variety of methods employed in the treatment of abnormal behavior.

PSY 435..................................................................................... 3 credits
Industrial/Organizational Psychology
This course is designed to introduce the student to the field of industrial/organizational psychology. The emphasis is on the psychological principles and how they can be applied in a work context. Topics will include legal issues in employment, selection of employees, performance appraisal, training, leadership, motivation, and group behavior.

PSY 450..................................................................................... 3 credits
Diversity and Cultural Factors in Psychology
This course is a study of the issues and influences related to gender, sexual orientation, and the major racial/ethnic and cultural groups in the United States and how they affect theoretical and research paradigms in psychology and clinical and counseling practices. The course expands the students’ frame of reference concerning human diversity and applies this knowledge to counseling and research issues in psychology.

PSY 460..................................................................................... 3 credits
Environmental Psychology
In this course students will learn about the interaction between people and their environments; how our behavior affects our environment, and how that environment, in turn, influences our own behavior. An emphasis will be placed on developing behavioral solutions for environmental problems.

PSY 475..................................................................................... 3 credits
Psychological Tests and Measurements
This course will cover the basic principles, research, and theories on testing and measurement of psychological constructs. It is expected that students complete the course with knowledge of various techniques for psychological testing; a familiarity of several professionally developed tests; the ability to develop, administer, and interpret certain tests; and knowledge of measurement theory which includes reliability and validity.

PSY 480 .................................................................................... 3 credits
Elements of Clinical Psychology
This course is intended to provide the beginning psychology student with an overview of the theory and practice of clinical and counseling psychology. The course includes reference to major theories of personality, assessment, and psychotherapy. Topics include psychodynamic, cognitive/behavioral, and biological theories of normal and abnormal psychological processes, and the assessment of behavior, abilities, and personality. Therapies covered include a variety of psychoanalytic approaches, and humanistic, biological, cognitive/behavioral, and child and family therapies.

PSY 490 .................................................................................... 3 credits
Capstone Course in Psychology
This is the capstone course for undergraduate psychology students. The course provides students with the opportunity to integrate and apply learning from their psychology program of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 ............................................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200................................................................................... 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ................................................................................ 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220.................................................................................... 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
CHM 110 ................................................................. 3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ....................................................................................3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 .....................................................................................3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ....................................................................................3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

The Bachelor of Science in Human Services

The following Bachelor of Science in Human Services (BSHS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The BSHS program curriculum at University of Phoenix employs an interdisciplinary approach for assimilating theory, knowledge, skills and core competencies of today’s human service professional. The conceptual framework of the program draws from a range of human service domains such as counseling, biopsychosocial development, human systems and social change, social work, psychology, and management theories. The program is designed with experiential components, integrated within the academic foundation, to provide students with experience as service providers in a range of human service settings in both private and public sectors. The Human Services program’s interdisciplinary design builds core skills and competencies based on established methods for delivering a variety of direct service roles in the wide-ranging field of human services. In addition to completing core curriculum courses, students must declare and complete courses in an area of concentration selected from the following: 1) Management, 2) Addictions, 3) Family and Child Services, 4) Gerontology. Upon graduation from the program students will be qualified for Registry as Mental Health Facilitators with the National Board for Certified Counselors-International and prepared academically to sit for the Human Services-Board Certified Practitioner examination administered by the Center for Credentialing and Education.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bshs.

**Required Course of Study for the BSHS**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSHS 305 ~ ........................................................................... 3 credits

**Prerequisite is for B Track only**

BSHS 325 ~ ........................................................................... 3 credits

**Human Systems and Development**

BSHS 335 ~ ........................................................................... 3 credits

**Additional Admission Requirements for the BSHS**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution's student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**Degree Requirements for the BSHS**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 60 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - Students will declare a concentration at the time of enrollment.
  - The diploma awarded for this program will read as: Bachelor of Science in Human Services and will not reflect the concentration or emphasis. Concentrations and emphases are reflected on the transcript only.
Academic Progression Requirements for the BSHS

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, who do not enroll in the First-Year Sequence, may not enroll in any course from the First-Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study. Students who list 24 or more previous college credits, as recognized by the University on the admissions application, must enroll in the first course as outlined in the Required Course of Study for this program (BSHS 305) and are not required to enroll in the First-Year Sequence. See Preferred Sequence and Prerequisites section of policy for specific course requirements for this program.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

General Education Requirements for the BSHS

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
- (A Track must include: COMM 215, equivalent or higher)
- (B Track must include COM 170 and COM 172)
- Oregon campus students, enrolled in the A Track, must use writing courses to complete the 6 credits of Communication Arts

Mathematics, 6 credits
- Must include MTH 209 or higher
- Science and Technology, 6 credits
- (B Track must include: SCI 163)
- Must include at least three credits in physical or biological sciences

Humanities, 6 credits
- (B Track must include: HUM 114)
- Social Science, 6 credits
- (B Track must include: PSY 211)
- Nevada students must complete three credits in Nevada Constitution
- Additional Liberal Arts, 6 credits
- Puerto Rico students must complete 6 credits of Spanish. Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish I or higher will satisfy the Spanish requirement.

Interdisciplinary Requirements, 18 credits
- (B Track must include: FP 120)
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSHS for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
- (A Track must include: COMM 215 or higher)
- (B Track must include COM 170 and COM 172)

Mathematics, 6 credits
- Students attending an Arkansas campus and students attending Online, who reside in Arkansas, are required to complete MTH 220 College Algebra. The MTH 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
- Science and Technology, 9 credits
- (B Track must include: SCI 163)
- Must include: CHM 110 and PHY 101
- The Science and Technology requirement may also be satisfied with any science transfer coursework with a lab component.

Humanities, 9 credits
- (B Track must include: HUM 114)
Social Science, 9 credits
(B Track must include: PSY 211)
Must include: HIS 145 or POL 215
The Social Science requirement may also be satisfied with any transfer coursework with US History or Government content.

Additional Liberal Arts, 6 credits
Interdisciplinary Requirements, 9 credits
(B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Residency Requirements and Course Waivers for the BSHS

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the required course of study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the Required Course of Study may not be waived: BSHS 305, BSHS 415, BSHS 415Q, BSHS 475, BSHS 485.

Field Experience for the BSHS

The BSHS programs include two field experience courses: BSHS 415 and BSHS 475. Each field experience course is 15 weeks in length. These courses require at least 175 hours of field experience, or an average of 12 hours per week committed to a community human services placement site. Weekly seminars (2 hours per week) are provided to offer support and supervision of the student activities during their field experience.

Students in the Bachelor of Sciences in Human Services program may not enroll in BSHS 415 and BSHS 475 with other BSHS courses.

Course Description for the BSHS

BSHS 305.................................................................................. 3 credits

Historical Development of Human Services: An Introduction

In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

BSHS 325.................................................................................. 3 credits

Human Systems and Development

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

BSHS 335.................................................................................. 3 credits

Ethics and Values for Human Service Professionals

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.
BHS 345 ..................................................................................3 credits

**Diversity and Special Populations**

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BHS 355 ..................................................................................3 credits

**Delivery of Human Services: Theory and Practice**

This course facilitates identification of specific human needs and conditions, which are the core of the human services profession, and the range of human service delivery systems that address them. The conditions most often encountered with addictions and chemical dependency, aging populations, crime, mental and physical illnesses, poverty, delinquency and developmental disabilities will be explored in depth. On completion of this course students will demonstrate knowledge of theory and skills necessary for employing the major models of human service delivery at individual, group and community levels with attention to global influences affecting social policy and the political and ideological perspectives on human services delivery internationally. Students will complete Module 2 of the MHF training.

BHS 375 ..................................................................................3 credits

**Information Management Systems & Technology in Human Services**

This course provides the foundation for appropriate integration and use of information management systems crucial to the delivery of human services. Skills developed include methods of obtaining, organizing, analyzing, evaluating, maintaining and disseminating information. Domains addressed in the course involve the application of confidentiality guidelines and the appropriate use of client data, utilizing technology to assist in conducting needs assessments and basic program evaluation, and accessing research literature for advocacy and education initiatives. Basic computer skills such as word processing and the use of spreadsheets for maintaining a database are addressed along with a survey of assistive technology available for a range of special needs populations.

BHS 4150 ..................................................................................0 credits

**Orientation to Field Experience**

This course will provide an overview of the expectations and requirements for a successful Field Experience. Students will be provided with information regarding field placement with approved sites, documentation of field experience, and requirements for supervision. Orientation is offered well in advance of the first Field Experience course, BHS 375. Students will have ample time for field site selection. (0 credits) Prerequisite: BHS 375. May not be taken as Directed Study.

BHS 385 ..................................................................................3 credits

**Interpersonal Communication & Interviewing Skills**

Human Services delivery requires expertise in communicating well with a wide range of people and groups. A key component of effective communication is the development of genuine positive regard for others, skill in establishing empathic relationships, and obtaining information needed for effective intervention with successful outcomes. This course provides knowledge of theory and practice in interpersonal communication. Students will learn skills for resolving conflict, establishing positive rapport, assisting clients in becoming clear about goals and focusing on outcomes, and practicing professional and ethical behaviors in all client interactions. Students will complete Modules 3, 4, 5 and 6 of the MHF training.

BHS 395 ..................................................................................3 credits

**Client Assessment and Plan Development**

This course enables students to understand the process of conducting needs assessments, developing an action plan for services, implementing the action plan, and subsequent evaluation of outcomes. Students will learn the process of developing goals and measurable objectives, designing an individualized program for clients, implementing the program, and using ongoing assessment and evaluation of results to revise or modify individualized programs. Students will demonstrate competency in identifying needs, and mobilizing resources and necessary supports for assisting clients in meeting goals. Students will complete Module 10, 11 and 12 of the MHF training.

BHS 405 ..................................................................................3 credits

**Intervention, Direct Service Delivery & Case Management**

This course provides an overview of the role of the human service worker as a change agent with a focus on the application of theory and skills necessary for providing interventions and direct service delivery to individuals and groups. Specifically, students will develop competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Additionally, students will learn how to access resources, use consultation, and make referrals. Students will complete Module 16 of the MHF training.

BHS 415 ..................................................................................3 credits

**Field Experience I**

This is a 15-week course requiring at least 175 hours of field experience, or an average of 12 hours per week committed to a field placement site. Students will work in a human services setting under the supervision of a qualified professional. In addition to providing direct service, students will attend a weekly 2-hour class for faculty supervision and evaluation of core competency development. Typical activities of a field placement involve employing skills acquired so far in the program progression: conducting interviews, working directly with clients and groups, developing action plans and documenting. Students will complete Modules 13 and 14 of the MHF training.

156
BSHS 425.................................................................................. 3 credits
Administration & Management of Human Service Programs
Administration and management involve components of indirect services associated with systematic delivery of direct human services. Students will learn theories of strategic planning, human resource management, strategies for evaluation and planning the development of human service organizations, elements of agency operations, risk management, budgeting, and fiscal acquisition through grant writing and contract negotiation. The emphasis of this course is on leadership development, and managing professional and volunteer staff. Additional content areas addressed in the course involve advocacy efforts and grass roots movements focused on constituency building.

BSHS 435.................................................................................. 3 credits
Research & Statistics in Human Services
This course provides an overview of research methods and appropriate use of statistics in the social sciences. A component of program development and evaluation involves knowledge of theory related to understanding research and statistics in the human services arena. The scientific method, research tools, data collection, and analysis will be reviewed. Understanding research and developing the ability to critically evaluate published research reports will be emphasized. Statistical concepts will be reviewed, and students will gain a conceptual understanding of underlying principles of research and statistical analysis. Statistical software will be introduced, and students will compute descriptive and inferential statistical data. Students will practice developing research designs and conducting statistical analyses.

BSHS 445.................................................................................. 3 credits
A Survey of Crisis and Mental Health Issues and Interventions
In this course students explore the relationship between mental health and human service delivery systems in the United States as well as global initiatives for improving the international service base. Students will learn to define and describe the nature and process of crisis and the impact of trauma-causing events on the mental health of diverse clients. Students will compare and contrast the range of service delivery modalities and networks, including the operation of emergency management systems, and will demonstrate understanding of roles and skills needed when services are provided in emergency and crisis situations. The course facilitates development of skills necessary for assessing and managing suicide risk. Students will complete Module 15 of the MHF training.

BSHS 455.................................................................................. 3 credits
Working With Addictions
This course introduces students to the biology of addiction, including brain reward mechanisms, the role of environment and genetics, psychodynamics, and the impact of addiction on individuals, families, and communities. The roles of addiction in society in relation to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis are emphasized in the course. The course examines major models of conceptualizing and integrating prevention, intervention, rehabilitation and maintenance/relapse prevention. Students will learn strategies for accessing supportive measures and case management processes for developing wrap-around action plans for service delivery to individuals and groups with addiction and chemical dependence related issues.

BSHS 465.................................................................................. 3 credits
Professional Development and Identity
In this course students will explore processes for enhancement of self-awareness and the effect of personal style and personality on human service delivery. Students will examine personal values, cultural differences and biases, individual philosophies and belief systems then integrate this understanding of self into the development of an identity as a human service professional. Students will demonstrate strategies for cultivating self-awareness and modeling self-care. Students will investigate the value of membership in supportive professional organizations such as the National Organization for Human Services (NOHS). Students will complete Module 17 of the MHF training.

BSHS 475.................................................................................. 3 credits
Field Experience II
This is a 15-week course requiring at least 175 hours of field experience, or an average of 12 hours per week committed to a community human services placement site. Weekly seminars (2-hours per week) are provided to offer support and supervision of the student activities during their field experience. Students will learn to present issues for supervision. Each student will create a portfolio of his or her competencies and accomplishments for career purposes. This course requires accumulation of the total 350 service hours necessary for graduation from the program (the first 175 hours were compiled in BSHS/415, FE I) and demonstration of a professional attitude and disposition as evaluated in 8 domains: Professionalism, Personal Growth, Sensitivity, Flexibility, Emotional Maturity, Group Membership Skills, Accepting Feedback, and Relationship with Authority. Students will complete Modules 7 and 18 of the MHF training.

BSHS 485.................................................................................. 3 credits
Capstone: Advocacy and Creating Social Change
This course is the culmination of the BSHS program with a focus on the basic tenets of client advocacy efforts and the processes of creating social change. As human services professionals, students will demonstrate strategies for using their knowledge and skills for understanding and helping clients. The Capstone Project asks students to develop an advocacy action plan that addresses a local need they have determined utilizing a community needs assessment. Students will complete Module 19 of the MHF training.

COMM 215 ................................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
MTH 209 ............................................................................................. 3 credits

College Mathematics II

This course continues the demonstration and examination of various basic algebra concepts which was begun in MTH/208. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance.

GEN 200 ............................................................................................. 3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ............................................................................................. 3 credits

Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ............................................................................................. 3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access resources successfully.

Course Descriptions for the Concentration in Addictions

BSHS 456 ............................................................................................. 3 credits

Addiction Interventions for Human Service Workers

This course has a focus on familiarizing students with fundamental interventions used in drug and alcohol treatment settings. Students will conduct an investigation of 12-step, alternative support group, secular organization, therapeutic community, and structured in-patient/outpatient approaches to intervention and treatment. Students will be prepared to apply basic skills for assessing and evaluating client needs, making referrals, and working as a colleague in groups of professional service providers. An exploration of commonly used evaluation instruments for assessing level of care is underscored along with tenets of co-facilitation of treatment groups and assessing special population needs. Students will demonstrate foundational knowledge and understanding of guidelines for treatment as outlined by the Substance Abuse and Mental Health Services Administration and the American Society of Addiction Medicine’s Patient Placement Criteria.

BSHS 457 ............................................................................................. 3 credits

Codependence & Working with Families

In this course students will demonstrate an understanding of the impact of controlling behaviors and supporting dysfunction in relation to addictions and families. Theories of codependency are explored as a disease of loss of selfhood and an addiction resulting from an imbalance of inner and outer self-awareness. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate understanding and skill in case management and referral for treatment in addition to assisting clients with recovery goals, self-awareness, self-acceptance, self-responsibility and self-reflection with a focus on prevalence, and consequences of codependency in families.

BSHS 458 ............................................................................................. 3 credits

Action Planning, Relapse Prevention & Aftercare

This course provides advanced skills development for the addiction and chemical dependency human service worker. Students will conduct an in-depth evaluation of various treatment approaches employed when preparing action plans with clients. An investigation of comprehensive treatment programs, community action programs, school-based programs, and public health approaches to relapse prevention and aftercare strategies will provide students an opportunity to develop and present an individualized program for a fictional client. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

Course Descriptions for the Concentration in Family and Child Services

BSHS 406 ............................................................................................. 3 credits

Family and Social Systems: Contemporary Trends

Theories of public and private families, as differentiated by societal interaction, are explored with a focus on family systems as they exist within social systems. Micro and macro family environments are investigated. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems. Topics include the family, the state, and social policy with historical perspectives from federal and state legislation. Students will debate current trends in social policy, the efficacy of social welfare systems on a global scale, and demonstrate an understanding of the concept of practical compromise. Roles of the human service worker as advocate and service provider in the family systems context will be addressed.

BSHS 407 ............................................................................................. 3 credits

Family Violence Across the Lifespan: A Multi-Strata Problem

This course explores the phenomenon and social problem of family violence with both macro- and micro-theory explanations and an in-depth literature review. Students will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Attention is focused on professional and social responses that include clinical interventions, educational initiatives within schools, and responses to the disclosure of family violence in agency and private settings. Skills to develop a human services approach to preventing family violence are enhanced in this course; students are required to outline their own personal and professional roles in the movement to end family violence.
BSHS 408 ............................................................................................................. 3 credits
Childhood Abuse and Neglect
This course focuses on the segment of family violence involving physical child abuse, child sexual abuse and exploitation, child neglect and psychological maltreatment of children. Students will examine the scope of these problems and the characteristics of both victims and perpetrators while conducting a search for patterns and dynamics of each distinction. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases. Areas of focus involve various forms of each category including indicators for the range of abuses on an international scale with child labor, slavery, and child prostitution issues.

Course Descriptions for the Concentration in Gerontology
BSHS 437 ............................................................................................................. 3 credits
Social Systems and Aging
This course traces the origins of social systems for the aging around the world, followed by an examination of program types, the effects on retirement, demographic changes, political sustainability of social programs for the aging, institutional settings and labor supply. Students will define and measure population aging by comparing and contrasting U.S. data with other countries by exploring elderly dependency and age-dependency ratios. Additional topics for discussion and demonstrated understanding by students include: the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology.

BSHS 438 ............................................................................................................. 3 credits
Care for Aging Populations
The course is an exploration of various living environments for aging and elderly including retirement communities, living with relatives and/or children, independency, assisted living, the goodness-of-fit between lifestyle and housing, and managing long-term care. Students will demonstrate knowledge of segregated versus age-integrated residential settings and the impact on residents. An in-depth investigation of care-related issues across the growing aging population will include topics such as chronic illness, subsidized and un-subsidized healthcare related expenses, and needs assessment protocol. The basic model and principles of integrative, interdisciplinary healthcare is presented as the foundation for a team approach to the development of intervention plans, strategies of care, and implementation.

BSHS 439 ............................................................................................................. 3 credits
Grief, Loss and End of Life Issues
In this course students will learn strategies for facilitating the transition from curative measures to palliative care for the relief of emotional/psychological distress, pain, and a range of physical symptoms. Core competencies involve demonstrated learning of methods for anticipating the demands of end-of-life caregiving including advanced directives, 24/7 services, hospice case management, care and placement options, and easing the common challenges as individuals and families move from care and grief modalities to acceptance and healing.

Students will demonstrate understanding of patient and caregiver needs and roles in life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

Course Descriptions for the Concentration in Management
BSHS 426 ............................................................................................................. 3 credits
Human Services Management: Theory & Practice
This course traces the historical context of human services management as it relates to current theory and practice. Students will examine strategies for managing an integrated, diverse workforce and prepare to be generalists, understanding the scope of leading an organization with commonly encountered agency pressures. Students will employ learned management practices to inspect, distinguish, and measure the important attributes of program management and supervision. By demonstrating a basic understanding of organizational behavior and the challenges of embracing workforce diversity, dynamic systems change, performance evaluation and effective communication with a range of Para-professional and professionals, students will explore their roles as managers in the growing human services field.

BSHS 427 ............................................................................................................. 3 credits
Critical Thinking Skills in Management Decision Making
This course will familiarize students with strategies related to making sustainable decisions. Techniques used to make decisions, solve problems and lead environments will be explored. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Specific details to human services are considered and methods for service delivery to needs-based populations and the workers who serve in this capacity. Students are introduced to, and will demonstrate understanding of, the Six Sigma elements and five-step approach for process improvement.

BSHS 428 ............................................................................................................. 3 credits
Human Services Program Design & Proposal Writing
This course introduces students to the purposes, challenges and benefits of program design and grant writing. Students will review components of each and conduct a needs assessment and develop a business case for implementation on program design. Special attention will be given to research for finding available funding sources and how to form important partnerships. Students explore the methods of research using quantitative, qualitative and mixed-method program design concepts. Students will examine concepts of logic models and their impact on people, processes, and conditions related to program design. Using a specific framework, learners will uncover funding possibilities and use tools to prepare for the rigor related with grant writing. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.
COLLEGE OF NATURAL SCIENCES

The foundation of today’s technological world is rooted in the natural sciences. As part of any academic program, studying the natural sciences gives students insight into the fundamental processes of nature and provides the basic knowledge needed to understand modern scientific accomplishments. Students also develop the critical thinking, independent thinking, and problem solving skills that form the basis for lifelong learning.

The College of Natural Sciences offers a variety of courses in natural, environmental, and life sciences as well as programs in health administration, environmental sciences, and biology.

**Associate of Arts/Concentration in Health Care Administration**

The following Associate of Arts/Concentration in Health Care Administration (AAHCA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration concentration focuses on health care organizations, roles of health care workers, public policy, information technology, financial management, and regulatory and ethical issues of health care. Students will discuss current strengths, weaknesses, and challenges of the U.S. health care system. Students will also critically examine the current state of health and disease, health care’s laws and ethics, the psychology of health, and financial operations of the health care system.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Health Care Administration - Track A and B**

- **HCA 210 ~ Introduction to Health Care: Riding the Fourth Wave** 3 credits
- **HCA 220 ~ The Language of Health Care** 3 credits
- **HCA 230 ~ Communication Skills for Health Care Professionals** 3 credits
- **HCA 240 ~ Health & Diseases: Understanding Pathos of Pathology** 3 credits
- **HCA 250 ~ The Psychology of Health** 3 credits
- **HCA 270 ~ Financial Matters for Health Care Professionals** 3 credits

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAHCA**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- **Tennessee:** Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**General Education Requirements for the AAHCA**

- **Communication Arts Requirement 6 credits**
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- **Mathematics Requirement 6 credits**
  - (A Track must include: SCI 162)
  - (B Track must include: SCI 162)
- **Science & Technology Requirement 6 credits**
  - (A Track must include: 3 credits in the physical or biological sciences)
  - (B Track must include: SCI 162)
- **Social Science Requirement 6 credits**
  - (A Track must include: ETH 125)
  - (B Track must include: ETH 125)
- **Humanities Requirement 6 credits**
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- **Additional Liberal Arts Requirement 3 credits**
  - (A Track must include: GEN 105)
  - (B Track must include: US 101)
- **Interdisciplinary Requirement 9 credits**
  - (B Track must include: FP 101)
- **Concentration 18 credits**

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

**Degree Requirements for AAHCA**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Academic Progression Requirements for the AAHCA**

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:

  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

**Residency Requirements for the AAHCA**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the AAHCA**

**HCA 210** .................................................................................. 3 credits
**Introduction to Health Care: Riding the Fourth Wave**
This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

**HCA 220** .................................................................................. 3 credits
**The Language of Health Care**
This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

**HCA 230** .................................................................................. 3 credits
**Communication Skills for Health Care Professionals**
This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

**HCA 240** .................................................................................. 3 credits
**Health & Diseases: Understanding Pathos of Pathology**
This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.
The Psychology of Health
In this course, the student is introduced to the psychological factors that relate to maintaining a healthy workplace. The course also exposes the student to management elements of cultural diversity, collaboration, and healthy behaviors.

HCA 270 .................................................................3 credits

Financial Matters for Health Care Professionals
This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care operations. This course introduces the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the responsibilities of health care financial management.

COM 150 .................................................................3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .................................................................3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .................................................................3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Health Care Administration (Maryland-Online)

The following Associate of Arts/Emphasis in Health Care Administration (AAHCA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration emphasis focuses on health care organizations, roles of health care workers, public policy, information technology, financial management, and regulatory and ethical issues of health care. Students will discuss current strengths, weaknesses, and challenges of the U.S. health care system. Students will also critically examine the current state of health and disease, health care’s laws and ethics, the psychology of health, and financial operations of the health care system.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: This is not a nursing program nor will the courses included in this program fully prepare a student to enter a nursing program.

Financial Matters for Health Care Professionals

The University reserves the right to modify the required course of study.
**Additional Admission Requirements for AAHCA**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AAHCA**

- Communication Arts Requirement 6 credits
  
  *(A Track must include: COM 150 and COM 220)*
  
  *(B Track must include: COM 155 and COM 156)*

- Mathematics Requirement 6 credits
  
  *(A Track must include: 3 credits in the physical or biological sciences)*
  
  *(B Track must include: SCI 162)*

- Social Science Requirement 6 credits
  
  *(A Track must include: ETH 125)*
  
  *(B Track must include: PSY 201 and ETH 125)*

- Humanities Requirement 6 credits
  
  *(A Track must include: CRT 205)*
  
  *(B Track must include: HUM 111)*

- Additional Liberal Arts Requirement 3 credits
  
  *(A Track must include: GEN 105)*
  
  *(B Track must include: US 101)*

- Interdisciplinary Requirement 9 credits
  
  *(B Track must include: FP 101)*

- Emphasis 18 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

**Degree Requirements for AAHCA**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the emphasis. Emphases are reflected on the transcript only.

**Academic Progression Requirements for the AAHCA**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General Education elective, or emphasis courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

**Residency Requirements for the AAHCA**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAHCA

HCA 210...................................................................................3 credits
Introduction to Health Care: Riding the Fourth Wave
This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 220 ..................................................................................3 credits
The Language of Health Care
This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

HCA 230...................................................................................3 credits
Communication Skills for Health Care Professionals
This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

HCA 240...................................................................................3 credits
Health & Diseases: Understanding Pathos of Pathology
This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCA 250...................................................................................3 credits
The Psychology of Health
In this course, the student is introduced to the psychological factors that relate to maintaining a healthy workplace. The course also exposes the student to management elements of cultural diversity, collaboration, and healthy behaviors.

HCA 270...................................................................................3 credits
Financial Matters for Health Care Professionals
This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care operations. This course introduces the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the responsibilities of health care financial management.

COM 150 ...................................................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................................3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ...................................................................................3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ...................................................................................3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ...................................................................................3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Concentration in Health Care Administration/Medical Records

The following Associate of Arts/Concentration in Health Care Administration/Medical Records (AAHCA/MR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration with emphasis in Medical Records lays a foundation for further study in health care at the undergraduate level. Topics focus on medical terminology related to disease diagnosis and treatment, patient information management, and medical claims processing. Software instruction synthesizes a variety of records processes common in medical facilities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaehca-mr.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: Associate of Arts/Health Care Administration-Medical Records provides foundation skills in medical record keeping. However, it does not lead to certification in medical coding practice or any other related practice.

Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCR 210 .................................................................3 credits

Patient Records: Keeping it Real
Documenting patients’ health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records. Settings include hospitals, physicians’ offices and alternate care facilities. Students review uses of health data and legal aspects of health information management.

HCR 220 .................................................................3 credits

Claims Preparation I: Clean Bills of Health
Medical records processing revolves around insurance and reimbursement. This course focuses on the background, knowledge and skills related to basic billing duties, HIPAA regulations, patient encounters, and the preparation, compliance, and transmission of claims. Students are introduced to the history, current state and future direction of the major diagnostic and procedural coding systems.

HCR 230 .................................................................3 credits

Claims Preparation II: Footing the Bills
This course continues medical records processing instruction. Topics focus on the background, knowledge and skills related to private payers, Medicare, Medicaid, Tricare, Champva, workers compensation and disability. Claims processing includes payments, appeals, and secondary claims; patient billing and collection; hospital billing and reimbursement.
HCR 240 ......................................................... 3 credits

Computerizing Medical Data: The Paper Chase Goes Techno
This medical records capstone course enables students to develop
career skills in computerizing data through application of a soft-
ware program widely used in health care. While popular for medi-
cal billing and collections, MedisoftTM also applies to managing
patients’ health care information, scheduling, correspondence, and
a variety of reports. This course requires a PC with Windows
2000® or Windows XP® operating system.
COM 150 .......................................................... 3 credits

Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................................. 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................................. 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................................. 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
**Associate of Arts/Concentration in Health Care Administration (Minnesota/Arkansas)**

The following Associate of Arts/Concentration in Health Care Administration (AAHCA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration concentration focuses on health care organizations, roles of health care workers, public policy, information technology, financial management, and regulatory and ethical issues of health care. Students will discuss current strengths, weaknesses, and challenges of the U.S. health care system. Students will also critically examine the current state of health and disease, health care’s laws and ethics, the psychology of health, and financial operations of the health care system.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca-mn.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**General Education Requirements for the AAHCA for Arkansas Students**

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Must include: BIO 100 and CHM 109
The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

**General Education Requirements for the AAHCA for Minnesota Students**

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

**Additional Admission Requirements for AAHCA**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
Degree Requirements for the AAHCA

The degree requirements for this program are the following:

• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAHCA

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAHCA

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAHCA

HCA 210 ................................................................. 3 credits

Introduction to Health Care: Riding the Fourth Wave

This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 220 ................................................................. 3 credits

The Language of Health Care

This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.
HCA 230 Communication Skills for Health Care Professionals
This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

HCA 240 Health & Diseases: Understanding Pathos of Pathology
This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCA 250 The Psychology of Health
In this course, the student is introduced to the psychological factors that relate to maintaining a healthy workplace. The course also exposes the student to management elements of cultural diversity, collaboration, and healthy behaviors.

COM 150 Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

MAT 219 Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100 Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

ETH 125 The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

CRT 205 Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media— Including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.
GEN 105 ................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Health Care Administration/Medical Records (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Health Care Administration/Medical Records (AAHCA/MR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration with emphasis in Medical Records lays a foundation for further study in health care at the undergraduate level. Topics focus on medical terminology related to disease diagnosis and treatment, patient information management, and medical claims processing. Software instruction synthesizes a variety of records processes common in medical facilities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca-mr.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: Associate of Arts/Health Care Administration-Medical Records provides foundation skills in medical record keeping. However, it does not lead to certification in medical coding practice or any other related practice.

Degree Requirements for the AAHCA/MR
The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAHCA/MR
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAHCA/MR
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.
• ACE evaluated Military credits.
• National Testing Programs, and
• University of Phoenix coursework,
• Regionally or nationally accredited coursework (C- or higher grade).
• University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
• National Testing Programs, and

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

University of Phoenix, 2012-2013
Course Descriptions for the AAHCA/MR

HCA 220  ................................................................. 3 credits
The Language of Health Care
This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

HCA 240 ................................................................. 3 credits
Health & Diseases: Understanding Pathos of Pathology
This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCR 210 ................................................................. 3 credits
Patient Records: Keeping it Real
Documenting patients’ health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records. Settings include hospitals, physicians’ offices and alternate care facilities. Students review uses of health data and legal aspects of health information management.

HCR 220 ................................................................. 3 credits
Claims Preparation I: Clean Bills of Health
Medical records processing revolves around insurance and reimbursement. This course focuses on the background, knowledge and skills related to basic billing duties, HIPAA regulations, patient encounters, and the preparation, compliance, and transmission of claims. Students are introduced to the history, current state and future direction of the major diagnostic and procedural coding systems.

HCR 230 ................................................................. 3 credits
Claims Preparation II: Footing the Bills
This course continues medical records processing instruction. Topics focus on the background, knowledge and skills related to private payers, Medicare, Medicaid, Tricare, Champva, workers compensation and disability. Claims processing includes payments, appeals, and secondary claims; patient billing and collections; hospital billing and reimbursement.

COM 150 ................................................................. 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Great emphasis includes a clear, focused thesis, and accurately confused words, modifiers, parallel structure, and sentence variety.

MAT 219 ................................................................. 3 credits
Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 ................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100 ................................................................. 4 credits
Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.
Please contact your enrollment advisor for more information. If the program is available via the Online modality in their state. The availability of programs and program may be offered at these University of Phoenix campus locations:

- Bachelor of Science in Environmental Science

University of Phoenix, 2012-2013

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

The Bachelor of Science in Environmental Science is designed to provide students with a comprehensive understanding of the relationship between scientific principles and the environment. Topics will include biological and ecological fundamentals, the environment and society, environmental management and law, global health, risk assessment, ethics, and technology.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bs-evs.

Students must choose one course from the list below:

**Course** | **Credits**
--- | ---
ENV 315 | 3 credits
Global Change
ENV 310 | 3 credits
Environmental Management
ENV 330 | 3 credits
Global Environmental Health
ENV 430 | 3 credits
Environmental Technology
ENV 431 | 3 credits
Public Policy Analysis
SUS 300 | 3 credits
Environmental Sustainability
BIO 325 | 3 credits
Environmental Sustainability
Economic Botany
ENV 350 | 3 credits
Water and Wastewater Treatment Technology
ENV 400 | 3 credits
Watershed Hydrology

The University reserves the right to modify the required course of study.

**Focus Study -15 credits**

To satisfy the Focus Study requirement, students must complete 15 credits in a content area outside of their selected major. All 15 credits must be from the same content area and can be satisfied using transfer or University of Phoenix coursework. Credits completed to satisfy the Focus Study requirement may not apply within applicable General Education categories.

**Electives -27 credits**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in Environmental Science degree.

**Electives -12 credits (for Arkansas students only)**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in Environmental Science degree.

**Additional Admission Requirements BS/EVS**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**Degree Requirements for the BS/EVS**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - All students must meet the General Education areas approved by the university.
  - Completion of a fifteen (15) credit Focus Study.
  - A minimum grade point average (GPA) of 2.0.
  - Students may choose additional elective credits to fulfill upper division and elective requirements.
  - All undergraduate students are required to complete the minimum general education credits required by their program version.
  - The diploma awarded for this program will read as: Bachelor of Science in Environmental Science and will not reflect the Focus Study.

**General Education Requirements for the BS/EVS**

- Communication Arts Requirement(s) 6 credits
  *Must include COMM 215, equivalent or higher*
- Puerto Rico students may not use conversational English to satisfy Communication Arts
- Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus.
- Mathematics Requirement(s) 9 credits
  *Must include MTH 209 and STAT 167, equivalent or higher*
- Social Science Requirement(s) 6 credits
  *Must include HIS 311 in Nevada only*
- Science & Technology Requirement(s) 6 credits
  *Must include at least three credits in the physical or biological sciences*
- Humanities Requirement(s) 6 credits
- Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
General Education Requirements for Arkansas students for the BS/EVS

Communication Arts Requirement(s) 6 credits
Must include COMM 215, equivalent or higher

Mathematics Requirement(s) 9 credits
Must include STAT 167, equivalent or higher
Must include MTH 220.

Social Science Requirement(s) 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Science & Technology Requirement(s) 9 credits
Must include at least three credits in the physical or biological sciences
Must include PHY 101 or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits

Additional Liberal Arts 6 credits

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program. For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BS/EVS

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.

Students must declare a Focus Study within 84 applied credits of program.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BS/EVS

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 15 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the major, the student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the major. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the major, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.

The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: GEN 200

This course is designed to introduce biology at an entry level by examining the hierarchy that ranges from the fundamentals of cell biology to the physiology of organisms, and the interactions among those organisms in their environment. The topics in this course include cell biology, genetics, molecular biology, evolution, physiology, and ecology.

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

This course will examine the key concepts of geography and the interactions between human life and the environment. Topics will include population, urbanization, economic and cultural landscapes, physical landscapes, and world climate.

This course will provide students with the scientific principles, concepts, and methodologies that are required to identify and analyze risks associated with environmental problems, and examine alternative solutions for resolving or preventing these problems.

This course will introduce the key concepts of geology by examining the Earth and the processes that take place within it. Topics will include historical geology, rocks and minerals, plate tectonics, igneous activity, mass wasting, weathering and erosion systems.
will analyze the cumulative impact of human activities on global environment. Students will examine a variety of environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

**Environmental Economics**

This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

**Environmental Toxicology**

The purpose of this course is to provide the fundamental knowledge of the effects of environmental chemicals on living systems, and the toxic responses of the human and plant systems. Students will discuss risk, ethics, and social responsibility with regard to environmental toxicology.

**Environmental Risk Assessment**

This course provides an overview of the basic concepts of human and ecological risk assessment. Students evaluate various components of risk assessment, including human health, environmental, occupational, ecological, and risk management. Significant case studies are used to illustrate the assessment process.

**Global Change**

This course will examine the impact of human activity on the environment. Students will examine a variety of environmental issues influenced by human activity, including the development and impact of global climate change on Earth.

**Environmental Management**

This course examines environmental problems from a local, national, and international perspective. Federal legislation will be reviewed on air pollution and water quality. Students will be introduced to control techniques for treating air and water, and the emerging environmental issues such as global climate changes, bioterrorism, organic pollutants, and industrial ecology.

**Global Environmental Health**

This course explores the impact of industrialization and development on the global environment. Students will be provided an overview of scientific and policy issues of global environmental health.

**Environmental Technology**

This course presents students with the current and emerging technologies that are available for the management of the environment. Environmental factors will be examined for the proper selection and application of these technologies.

**SCI 362** .................................................................3 credits

**Environmental Issues and Ethics**

This course applies scientific, philosophical, economic, and ethical principles to current and future environmental issues. Students will analyze the cumulative impact of human activities on global ecosystems, as well as responsibilities to the natural world, in terms of the complex interrelationships humans have with their environment.

**ECO 370** .................................................................3 credits

**Environmental Economics**

This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

**ENV 410** .................................................................3 credits

**Environmental Toxicology**

The purpose of this course is to provide the fundamental knowledge of the effects of environmental chemicals on living systems, and the toxic responses of the human and plant systems. Students will discuss risk, ethics, and social responsibility with regard to environmental toxicology.

**ENV 420** .................................................................3 credits

**Environmental Risk Assessment**

This course provides an overview of the basic concepts of human and ecological risk assessment. Students evaluate various components of risk assessment, including human health, environmental, occupational, ecological, and risk management. Significant case studies are used to illustrate the assessment process.

**ENV 315** .................................................................3 credits

**Global Change**

This course will examine the impact of human activity on the environment. Students will examine a variety of environmental issues influenced by human activity, including the development and impact of global climate change on Earth.

**ENV 310** .................................................................3 credits

**Environmental Management**

This course examines environmental problems from a local, national, and international perspective. Federal legislation will be reviewed on air pollution and water quality. Students will be introduced to control techniques for treating air and water, and the emerging environmental issues such as global climate changes, bioterrorism, organic pollutants, and industrial ecology.

**ENV 330** .................................................................3 credits

**Global Environmental Health**

This course explores the impact of industrialization and development on the global environment. Students will be provided an overview of scientific and policy issues of global environmental health.

**ENV 430** .................................................................3 credits

**Environmental Technology**

This course presents students with the current and emerging technologies that are available for the management of the environment. Environmental factors will be examined for the proper selection and application of these technologies.

**ENV 431** .................................................................3 credits

**Public Policy Analysis**

This course will examine the fundamentals of public policy analysis to the environment. Students will explore the management of public policy issues related to land use and urbanization, ecosystem preservation, global analysis, and policy making.

**SUS 300** .................................................................3 credits

**Environmental Sustainability**

Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.

**BIO 325** .................................................................3 credits

**Economic Botany**

This course focuses on the economic uses of plants from international, historical, environmental and contemporary perspectives. Economic uses include plant textiles, spices, herbs, perfumes, oils, waxes, beer, coffee, tea, wine, chocolate, marijuana, psychedelics, fuel algae, and fungi.

**ENV 350** .................................................................3 credits

**Water and Wastewater Treatment Technology**

This course will introduce students to water and wastewater treatment technology. Topics will include drinking-water treatment and distribution, wastewater collection and treatment, and water reuse.

**ENV 400** .................................................................3 credits

**Watershed Hydrology**

This course will introduce students to the water cycle and freshwater management. Topics will include examination of bodies of water, geology and soil properties, the water cycle, groundwater flow, pollution effects, and government involvement.

**COMM 215** ...............................................................3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

**STAT 167** .................................................................3 credits

**Statistics for Life Sciences**

This course will examine the concepts of statistics leading to the application of these concepts to the life sciences. Topics will include populations and samples, random sampling, probabilities, distributions, and confidence intervals.
Skills for Professional Development
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 209 ................................................................. 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

HIS 311 ................................................................. 3 credits
Nevada and U.S. Constitution
This course is a study of the history and development of the Nevada and U.S. Constitutions, particularly during the 20th Century. The historical, political, economic, and social foundations upon which the U.S. Constitution was built and the philosophies of the proponents and opponents to its adoption are analyzed. Selected provisions of the Nevada Constitution and, in particular, Article 1 of the Declaration of Rights are also analyzed. (Nevada students only.)

MTH 220 ................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

PHY 101 ................................................................. 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**Focus Study -15 credits**

To satisfy the Focus Study requirement, students must complete 15 credits in a content area outside of their selected major. All 15 credits must be from the same content area and can be satisfied using transfer or University of Phoenix coursework. Credits completed to satisfy the Focus Study requirement may not apply within applicable General Education categories.

**Electives - 27 credits**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in Biological Science degrees.

**Electives - 12 credits (for Arkansas students only)**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in Biological Science degrees.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements BS/BIO**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
Degree Requirements for the BS/BIO

The degree requirements for this program are the following:

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - All students must meet the General Education areas approved by the university.
  - Completion of a fifteen (15) credit Focus Study.
  - A minimum program grade point average (GPA) of 2.0.
  - Students may choose additional elective credits in order to fulfill the required upper division and elective requirements.
  - All students must complete the minimum number of credits required by their degree program.
  - All undergraduate students are required to complete the minimum general education credits required by their program version.

General Education Requirements for the BS/BIO

Communication Arts Requirement(s) 6 credits
Must include COMM 215, equivalent or higher
Puerto Rico campus students may not use conversational English to satisfy Communication Arts

Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus.

Mathematics Requirement(s) 9 credits
Must include MTH 209 and STAT 167, equivalent or higher

Social Science Requirement(s) 6 credits
Nevada students must complete three (3) credits in Nevada Constitution
Science & Technology Requirement(s) 6 credits
Must include at least three credits in the physical or biological sciences

Humanities Requirement(s) 6 credits
Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for Arkansas students for the BS/BIO

Communication Arts Requirement(s) 6 credits
Must include COMM 215, equivalent or higher

Mathematics Requirement(s) 9 credits
Must include STAT 167, equivalent or higher
Must include MTH 220.

Social Science Requirement(s) 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Science & Technology Requirement(s) 9 credits
Must include at least three credits in physical or biological or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits

Additional Liberal Arts 6 credits

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BS/BIO

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other general Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Students must declare a Focus Study within 84 applied credits of program.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.
Residency Requirements and Course Waivers for the BS/BIO

The University requires that the majority of coursework in the major and focus be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of thirty (30) upper division credits at the University. Students in this program may waive a maximum of fifteen (15) credits from their major and focus on the basis of regionally or approved nationally accredited transferable coursework. Prior learning credit and military credits may not be used to waive coursework.

In order to be granted a waiver for a course in the major and focus, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

In order to be granted a waiver, without credit, for a course in the major or focus, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution in which the University has entered into an approved articulation agreement with.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved Articulation Agreement.
- The course must be comparable in content and credits to the University course it is replacing and be approved through the Articulation Agreement.

The following courses in the required course of study may not be waived: GEN 200

Course Descriptions for the BS/BIO

GEN 200 .....................................................................................3 credits Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

BIO 101 .....................................................................................3 credits Introduction to Biology

This course is designed to introduce biology at an entry level by examining the hierarchy that ranges from the fundamentals of cell biology to the physiology of organisms, and the interactions among those organisms in their environment. The topics in this course include cell biology, genetics, molecular biology, evolution, physiology, and ecology.

PHY 101 .....................................................................................3 credits Fundamentals of Physics

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

CHM 110 .....................................................................................3 credits Introductory Chemistry

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

GLG 150 .....................................................................................3 credits Exploration of the Earth Sciences

This course focuses on the dynamic forces impacting Earth’s environment. It is a study of the major constructs in geology, oceanography, meteorology, and astronomy collectively called Earth Science. A scientific approach will be used in orienting students to develop an understanding of the interconnectivity of each of these sciences.

SCI 256 .....................................................................................3 credits People, Science and the Environment

This in-depth environmental science course examines how people use science to understand how they relate to the environment. The course explores relationships between people and ecosystems and the science behind how ecosystems work. It reviews the historical development of the environmental movement, interactions between humans and natural ecosystems, and more specifically, the role of a growing population and associated pressures on natural resources. This course further examines how economics, natural systems, and conservation are interrelated. The many forms of pollution are interrelated. This course challenges students to consider the impact of lifestyle choices on environmental sustainability.
SCI 151 ................................................................. 3 credits
Astronomy
This course is designed to introduce students to the science of astronomy, utilizing current concepts of the Earth, the solar system, and the universe. In addition, historical developments in astronomy from ancient mythology to modern science will be covered.
BIO 204 ................................................................. 3 credits

SCI 209 ................................................................. 3 credits
Oceanography
This course examines the linkages between the evolution of earth and water masses. Students will focus on the physical, chemical, biological and geological aspects of the ocean processes.
BIO 280 ................................................................. 3 credits

SCI 315 ................................................................. 3 credits
Conservation Biology
This course will examine the concepts and issues related to the conservation of biodiversity. Topics will include the impact of society on plants and animals, aquatic and terrestrial ecosystems, extinction, and genetic diversity.
BIO 315 ................................................................. 3 credits

SCI 330 ................................................................. 3 credits
Ecology and Evolution
This course provides the fundamental principles of ecology and evolution. Students will focus on populations and communities, adaptation, and other factors that affect organisms.
BIO 330 ................................................................. 3 credits

SCI 335 ................................................................. 3 credits
Invertebrate Zoology
This course presents students with the study of invertebrates. Students will examine the ecology of invertebrates along with their structures and functions.
BIO 335 ................................................................. 3 credits

SCI 340 ................................................................. 3 credits
Entomology
This course presents students with the study of entomology. Students will examine insects and their interaction with the ecosystem.
BIO 340 ................................................................. 3 credits

SCI 405 ................................................................. 3 credits
Microbiology
This course presents students with the fundamentals and applications of microbiology. Topics will include microbial genetics, microorganisms, diseases, and immunity.
BIO 405 ................................................................. 3 credits

SCI 410 ................................................................. 3 credits
Human Biology
This course provides students with concepts of human biology. Topics include structure, function and the interrelationships of the cells, organ, skeletal and muscular systems, genetics, inheritance, and homeostasis.
BIO 410 ................................................................. 3 credits

SCI 410 ................................................................. 3 credits
Genetics
This course presents students with the concepts of genetics. Students will examine mitosis and meiosis, chromosomes, DNA structure, gene mutation, and genome dynamics.

ENV 315 ................................................................. 3 credits
Global Change
This course will examine the impact of human activity on the environment. Students will examine a variety of environmental issues influenced by human activity, including the development and impact of global climate change on Earth.
SCI 362 ................................................................. 3 credits

ENV 410 ................................................................. 3 credits
Environmental Toxicology
The purpose of this course is to provide the fundamental knowledge of the effects of environmental chemicals on living systems, and the toxic responses of the human and plant systems. Students will discuss risk, ethics, and social responsibility with regard to environmental toxicology.
BIO 402 ................................................................. 3 credits

ENV 325 ................................................................. 3 credits
Immunology
This course will examine the key concepts of immunology. Topics will include the development and anatomy of the immune system, innate immunity, the structure and function of immunoglobulin, cellular interactions, disease, and histocompatibility.
ENV 410 ................................................................. 3 credits

ENV 315 ................................................................. 3 credits
Economic Botany
This course focuses on the economic uses of plants from international, historical, environmental and contemporary perspectives. Economic uses include plant textiles, spices, herbs, perfumes, oils, waxes, beer, coffee, tea, wine, chocolate, marijuana, psychedelics, fuel algae, and fungi.
COMM 215 ................................................................. 3 credits

ENV 325 ................................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
STAT 167 ................................................................. 3 credits

ENV 325 ................................................................. 3 credits
Statistics for Life Sciences
This course will examine the concepts of statistics leading to the application of these concepts to the life sciences. Topics will include populations and samples, random sampling, probabilities, distributions, and confidence intervals.
Skills for Professional Development

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 101 ....................................................................................3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

GEN 300 ....................................................................................3 credits

College Mathematics II

This course continues the demonstration and examination of various algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 209 ...................................................................................3 credits

College Algebra

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

HIS 145 .....................................................................................3 credits

The American Experience Since 1945

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ......................................................................................3 credits

State and Local Political Processes

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

MTH 220...................................................................................3 credits
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Emphasis in Emergency Management

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Emphasis in Health Management

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Emphasis in Health Information Systems

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Additional Admission Requirements BSHA

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Applicants must be currently employed or have access to a work environment.
• Applicants to the Emergency Management emphasis (BSHA/EM) must be currently employed or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

**Degree Requirements for the BSHA**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 48 upper division credits
  - A minimum of 54 credits of the 120 must be in the general education areas approved by the University.
  - Oregon students must fulfill the Additional Liberal Arts area with three (3) credits in the physical or biological sciences.
  - A minimum program grade point average (GPA) of 2.0.
  - Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.

- Students will declare an emphasis at the time of enrollment.
- The diploma awarded for this program will read as: Bachelor of Science in Health Administration and will not reflect the emphasis. Emphases are reflected on the transcript only.

**General Education Requirements for the BSHA**

All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement.

- Communication Arts Requirement(s): 6 credits
- Mathematics Requirement(s): 6 credits
- Science & Technology Requirement(s): 6 credits
- Must include at least 3 credits in the physical or biological sciences
- Humanities Requirement(s): 6 credits
- Social Science Requirement(s): 6 credits
- Additional Liberal Arts Requirement(s): 6 credits
- Interdisciplinary Requirement(s): 18 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Academic Progression Requirements for the BSHA**

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.

- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Residency Requirements and Course Waivers for the BSHA**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of eighteen (18) upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework (national testing program credit, prior learning credit, and military credit may not be used to waive with or without credit coursework in the required course of study).

Students may also waive nine (9) lower division credits from the required course of study.

In order to be granted a waiver with credit, for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years (5 years for Information Security & Technology courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver without credit, for a course in the Required Course of Study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution in which the University has entered into an approved articulation agreement with.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved Articulation Agreement.
- The course must be comparable in content and credits to the University course it is replacing and be approved through the Articulation Agreement.

The following courses in the required course of study may not be waived: GEN 200, HCS 449

**Course Descriptions for the BSHA**

**GEN 200** ................................................................. 3 credits  
**Foundations for General Education and Professional Success**  
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**HCS 212** ................................................................. 3 credits  
**Health Care Vocabulary**  
This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems. In addition, students will also explore terminology related to body systems and common diseases and treatments associated with these systems.

**HCS 235** ................................................................. 3 credits  
**Health Care Delivery in the United States**  
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

**HCS 245** ................................................................. 3 credits  
**Introduction to Health and Disease**  
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

**HCS 320** ................................................................. 3 credits  
**Health Care Communication Strategies**  
This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss the influences of gender and culture, examine channels of communication including the development of interpersonal and technology related communication, and the impact of consumer and interdisciplinary communication.

**HCS 325** ................................................................. 3 credits  
**Health Care Management**  
This course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

**HCS 335** ................................................................. 3 credits  
**Health Care Ethics and Social Responsibility**  
This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

**HCS 341** ................................................................. 3 credits  
**Human Resources in Health Care**  
This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.
HCS 483 .................................................................................................3 credits

**Health Care Information Systems**

The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.

HCS 490 .................................................................................................3 credits

**Health Care Consumer - Trends and Marketing**

In this course students will have the opportunity to examine the traits, trends and needs of today's health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.

HCS 405 .................................................................................................3 credits

**Health Care Financial Accounting**

This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting, and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

HCS 440 .................................................................................................3 credits

**Economics: The Financing of Health Care**

This course provides an overview of the economics of health care. The various payers are examined, including private, state, and federal entities. Issues such as the cost effectiveness of prevention, the management of patients and their diseases, as well as the cost of treatment settings are discussed. Third-party reimbursement from various sources, ranging from for-profit insurance carriers to charitable donations, are reviewed. The health care system’s use of grant funding and research dollars is described.

HCS 465 .................................................................................................3 credits

**Health Care Research Utilization**

This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements of evidence based research within health care.

HCS 451 .................................................................................................3 credits

**Health Care Quality Management and Outcomes Analysis**

This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and the role of the governing body of the health care organization in ensuring compliance with the standards of regulatory and accreditation organizations. Methods for assuring quality in process and outcome management are described, as well as the significance and statistical application of measuring outcomes. Various health care customers are identified. Changing trends in the provision and reimbursement of health care services are reviewed.

COMM 215 .................................................................................................3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 101 .................................................................................................3 credits

**Skills for Lifelong Learning**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .................................................................................................3 credits

**Skills for Professional Development**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 .................................................................................................3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................................................3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 .................................................................................................3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
HIS 145 ................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ............................................................. 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Emphasis in Health Management
HCS 457 ............................................................. 3 credits
Public and Community Health
This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.

HCS 430 ............................................................. 3 credits
Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 475 ............................................................. 3 credits
Leadership and Performance Development
This course provides students with an overview of leadership theories to assist in the development of effective leadership skills. Students will discuss workplace change and the leader’s role in the change process as well as examining and analyzing effective performance indicators for staff and organizational goals.

HCS 445 ............................................................. 3 credits
Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

HCS 446 ............................................................. 3 credits
Facility Planning
This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss future health care consumer utilization trends, and as well as examine the regulatory compliance requirements.

HCS 449 ............................................................. 3 credits
Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Emphasis in Emergency Management
EMC 310 ........................................................... 3 credits
Principles of Emergency Management
This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.

EMC 330 ........................................................... 3 credits
Political and Policy issues for Emergency Management
This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

EMC 340 ........................................................... 3 credits
Emergency Services and the Community
This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 ........................................................... 3 credits
Managing Emergency Response Operations
This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.
EMC 320 ............................................................... 3 credits
Emergency Preparedness and Planning
This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

HCS 449 ............................................................... 3 credits
Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Emphasis in Health Information Systems

HCIS 410 ............................................................... 3 credits
Project Planning and Implementation in Health Care
This course provides the foundation for understanding the broad concepts of successful planning, organization, and implementation within the realm of health care information technology. This course uses real-world examples to support and expand a student’s skills in project management. Topics covered include project scoping, estimating, budgeting, scheduling, tracking and controlling.

DBM 381 ............................................................... 3 credits
Database Concepts
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.

NTC 361 ............................................................... 3 credits
Network and Telecommunications Concepts
This course provides an overview of telecommunication systems in a business environment. Topics covered include voice communications, standards, transmission, networks, and internetworking.

BSA 376 ............................................................... 3 credits
Systems Analysis and Design
This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. The Systems Development Life Cycle will be fundamental to the course.

HCIS 420 ............................................................... 3 credits
Information Systems Risk Management in Health Care
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of health care information systems. This course will survey remedies and prevention techniques available to address risk and security management. Health care organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.

HCS 449 ............................................................... 3 credits
Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.
The Bachelor of Science in Health Administration

The following Bachelor of Science in Health Administration (BSHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Health Administration (BSHA) Program is designed to integrate a framework of general education courses with a health care curriculum that provides the graduate with the foundational knowledge needed to enter today’s challenging health industry. The BSHA curriculum focuses on the basic body of knowledge, understanding, and skills identified as relevant to an ever-expanding and diverse health care arena.

Coursework includes content in some of the following areas: management, finance, legal and ethical parameters, human resources, and information systems. Upon completion of the core curriculum healthcare students have the opportunity to select a concentration that is designed to expand their professional opportunities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha.

Concentration in Emergency Management

This concentration is designed for EMTs, First Responders, Firefighters, or any other emergency personnel that want to expand their knowledge and skills related to emergency management. Focus will be on principles of emergency management, managing emergency response operations, and planning and preparedness of emergency situations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-em.

Additional Admission Requirements BSHA

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.

- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must be currently employed or have access to a work environment.

- Applicants to the Emergency Management concentration (BSHA/EM) must be currently employed or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

Degree Requirements for the BSHA

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 48 upper division credits
  - A minimum of 54 credits of the 120 must be in the general education areas approved by the University.
  - Oregon students must fulfill the Additional Liberal Arts area with three (3) credits in the physical or biological sciences.
  - A minimum program grade point average (GPA) of 2.0.
  - Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  - Students will declare a concentration at the time of enrollment.
  - The diploma awarded for this programs will read as Bachelor of Science in Health Administration and will not reflect the concentration. Concentrations are reflected on the transcript only.
General Education Requirements for the BSHA
All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement. Communication Arts Requirement(s): 6 credits
Mathematics Requirement(s): 6 credits
Science & Technology Requirement(s): 6 credits
Must include at least 3 credits in the physical or biological sciences
Humanities Requirement(s): 6 credits
Social Science Requirement(s): 6 credits
Nevada students must complete 3 credits in Nevada Constitution
Additional Liberal Arts Requirement(s): 6 credits
Puerto Rico students must complete 6 credits of Spanish instead
Oregon students and students attending Online who reside in Oregon must fulfill this content area with three (3) credits in the physical or biological sciences
Interdisciplinary Requirement(s): 18 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
General Education Requirements for the BSHA for Arkansas Students
All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement. Communication Arts Requirement(s): 6 credits
Mathematics Requirement(s): 6 credits
Must include MTH 220
Science & Technology Requirement(s): 9 credits
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.
Humanities Requirement(s): 9 credits
Social Science Requirement(s): 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.
Additional Liberal Arts Requirement(s): 6 credits
Interdisciplinary Requirement(s): 9 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.
Academic Progression Requirements for the BSHA
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others. All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.
Residency Requirements and Course Waivers for the BSHA
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
Students in this program may waive a maximum of eighteen (18) upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework (national testing program credit, prior learning credit, and military credit may not be used to waive with or without credit coursework in the required course of study).
Students may also waive nine (9) lower division credits from the required course of study.
In order to be granted a waiver with credit, for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;

The course must have been completed within the past ten (10) years (5 years for Information Security & Technology courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver without credit, for a course in the Required Course of Study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution in which the University has entered into an approved articulation agreement with.

- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved Articulation Agreement.

- The course must be comparable in content and credits to the University course it is replacing and be approved through the Articulation Agreement.

The following courses in the required course of study may not be waived: GEN 200, HCS 449

Course Descriptions for the BSHA

GEN 200 ................................................................................... 3 credits

Health Care Vocabulary

This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems. In addition, students will also explore terminology related to body systems and common diseases and treatments associated with these systems.

HCS 235 ..................................................................................... 3 credits

Health Care Delivery in the United States

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 245 ..................................................................................... 3 credits

Introduction to Health and Disease

This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 320 ..................................................................................... 3 credits

Health Care Communication Strategies

This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss the influences of gender and culture, examine channels of communication including the development of interpersonal and technology related communication, and the impact of consumer and interdisciplinary communication.

HCS 325 ..................................................................................... 3 credits

Health Care Management

This course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

HCS 335 ..................................................................................... 3 credits

Health Care Ethics and Social Responsibility

This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

HCS 341 ..................................................................................... 3 credits

Human Resources in Health Care

This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.
HCS 483 ................................................................. 3 credits
Health Care Information Systems
The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.

HCS 490 ................................................................. 3 credits
Health Care Consumer - Trends and Marketing
In this course students will have the opportunity to examine the traits, trends and needs of today’s health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.

HCS 405 ................................................................. 3 credits
Health Care Financial Accounting
This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting, and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

HCS 440 ................................................................. 3 credits
Economics: The Financing of Health Care
This course provides an overview of the economics of health care. The various payers are examined, including private, state, and federal entities. Issues such as the cost effectiveness of prevention, the management of patients and their diseases, as well as the cost of treatment settings are discussed. Third-party reimbursement from various sources, ranging from for-profit insurance carriers to charitable donations, are reviewed. The health care system’s use of grant funding and research dollars is described.

HCS 465 ................................................................. 3 credits
Health Care Research Utilization
This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements of evidence based research within health care.

HCS 451 ................................................................. 3 credits
Health Care Quality Management and Outcomes Analysis
This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and the role of the governing body of the health care organization in ensuring compliance with the standards of regulatory and accreditation organizations. Methods for assuring quality in process and outcome management are described, as well as the significance and statistical application of measuring outcomes. Various health care customers are identified. Changing trends in the provision and reimbursement of health care services are reviewed.

COMM 215 ............................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 101 ................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.

MTH 220 ............................................................... 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ............................................................... 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ............................................................... 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
HIS 145 ................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ............................................................... 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Concentration in Health Management
HCS 457 ................................................................. 3 credits
Public and Community Health
This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.

HCS 430 ............................................................... 3 credits
Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 475 ............................................................... 3 credits
Leadership and Performance Development
This course provides students with an overview of leadership theories to assist in the development of effective leadership skills. Students will discuss workplace change and the leader’s role in the change process as well as examining and analyzing effective performance indicators for staff and organizational goals.

HCS 455 ............................................................... 3 credits
Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

HCS 446 ............................................................... 3 credits
Facility Planning
This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss future health care consumer utilization trends, and as well as examine the regulatory compliance requirements.

HCS 449 ............................................................... 3 credits
Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Concentration in Emergency Management
EMC 310 ............................................................... 3 credits
Principles of Emergency Management
This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.

EMC 330 ............................................................... 3 credits
Political and Policy issues for Emergency Management
This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

EMC 340 ............................................................... 3 credits
Emergency Services and the Community
This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 ............................................................... 3 credits
Managing Emergency Response Operations
This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.
Emergency Preparedness and Planning
This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

HCS 449 ................................................................................... 3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Concentration in Long Term Care

Dimensions of Health and the Older Adult
Basic principles and concepts of the aging process; includes the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.

LTC 310 ................................................................. 3 credits

Social and Community Related Programs and Services
This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult to support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.

HCS 437 ................................................................................... 3 credits

Long-term Care Administration
This course examines the organization and management of long-term care and assisted living facilities. The impacts of state and federal regulation are analyzed, as well as issues surrounding funding services are discussed. Students will examine the health services needed for current and future populations needing long term care.

LTC 315 ................................................................. 3 credits

Alternative Living Environments
This course focuses on the various formats of care and living environments for the older adult. The cultural and socioeconomic demographics of our current aging population provide different expectations and needs from previous generations. With the changing needs of this population and their families, students will focus on understanding the multidisciplinary continuum of factors to be considered when determining the living and care options available.

LTC 328 ................................................................................... 3 credits

Legal Perspectives in Aging
This course will look at the diverse legal issues related to today’s older adult. Topics will include age discrimination, advocacy and autonomy, elder and fraud abuse, major life transitions, and end of life decision making.

HCS 449 ................................................................................... 3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Concentration in Health Information Systems

Project Planning and Implementation in Health Care
This course provides the foundation for understanding the broad concepts of successful planning, organization, and implementation within the realm of health care information technology. This course uses real-world examples to support and expand a student’s skills in project management. Topics covered include project scoping, estimating, budgeting, scheduling, tracking and controlling.

DBM 381 .................................................................................. 3 credits

Database Concepts
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.

NCT 361 .................................................................................. 3 credits

Network and Telecommunications Concepts
This course provides an overview of telecommunication systems in a business environment. Topics covered include voice communications, standards, transmission, networks, and internetworking.

BSA 376 .................................................................................. 3 credits

Systems Analysis and Design
This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. The Systems Development Life Cycle will be fundamental to the course.

HCIS 420 .................................................................................. 3 credits

Information Systems Risk Management in Health Care
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of health care information systems. This course will survey remedies and prevention techniques available to address risk and security management. Health care organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.

HCS 449 ................................................................................... 3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.
COLLEGE OF CRIMINAL JUSTICE AND SECURITY

The College of Criminal Justice and Security prepares students for professional and management-related careers in criminal justice and security by applying a multidisciplinary comparative management approach to criminal justice theory and application. Students will be prepared to understand, explain, and predict criminal justice and security concepts and to contribute to the development of public and private policy within communities. Our mission is to enhance the academic preparation and professionalism of the nation’s criminal justice and security communities through access to quality criminal justice and security higher education. The College of Criminal Justice and Security provides innovative, respected, relevant, affordable, and student-focused programs, designed to prepare students for service and leadership in a diverse, global society. Curriculum is delivered by experts who relate both theory and practice in this evolving field. The College has earned respect through continuous improvement driven by a combination of innovation in the field and empirical evidence of learning outcomes, all of which is accomplished through the integrity, teamwork, and creativity of college faculty and staff. We are a respected criminal justice and security college, known for its distinctive strengths in providing superior and relevant educational programs to its students.

It is the student’s responsibility to ascertain whether their past history and conduct may prohibit their placement or participation in the criminal justice and security field. The University makes no guarantee or representation that the student will meet all qualifications for such employment or licensure for the occupation or profession related to the chosen program.

Associate of Arts/Concentration in Criminal Justice

The following Associate of Arts/Concentration in Criminal Justice (AACJ) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AACJ

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AACJ

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)
Concentration 18 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

**Degree Requirements for AACJ**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Academic Progression Requirements for the AACJ**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

**Residency Requirements for the AACJ**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Course Descriptions for the AACJ

CJS 200 ................................................................................................. 3 credits

Foundations of the Criminal Justice System
This course is an introduction to the foundational elements of the criminal justice system. Students examine this system from its influence on law enforcement and the roles and functions of the professionals interacting within the court while outlining the impact and roles in American society. Other topics include crime causation, terrorism, and cyber crime related issues.

CJS 210 ................................................................................................. 3 credits

Fundamentals of Policing
This course provides students with the opportunity to gain a basic understanding of policing in the United States. It examines the history of the police, the emerging role of private security, and the organizational concepts of police departments. This course also discusses the relationships between the police department and their respective communities. Other topics include recruitment processes, diversity, culture, and laws that govern policing. Students will have the opportunity to research their local police department for a closer look at policing in their community.

CJS 220 ................................................................................................. 3 credits

Introduction to Criminal Court System
This course is an introduction to the fundamental elements of the courts in our criminal justice system. Students will examine the many complexities affecting the court system, from the theory behind the creation of laws to the implementation of such laws. This course provides an in-depth look into the roles and functions of the professionals interacting within the court while outlining the courtroom process. Other topics include punishments, appeals, and plea bargains.

CJS 230 ................................................................................................. 3 credits

Introduction to Corrections - A World Apart
This course introduces students to the fundamental elements of the corrections system within the criminal justice field. Students will examine the early implementations of punishment as well as evolving philosophies of sentencing. Students will gain insight into the purpose and functions of jails and prisons, while establishing a connection between prison life and prisoner’s rights. Students will also take an in-depth look into how parole and probation affect our communities. Other topics include correctional management, rehabilitation, and correctional systems in other countries.

CJS 240 ................................................................................................. 3 credits

Introduction to Juvenile Justice
This course is a general orientation to the concept of delinquency and the field of juvenile justice. Students will examine the nature of delinquency, as well as a variety of theories and suspected causes of delinquent behavior. Students will study factors related to delinquency and/or prevention including gender, youth behavior, family, peers, drug use, school, and community. This course will also familiarize students with the evolution of juvenile justice and key players in the juvenile justice process. Additionally, students will develop an understanding of the juvenile court process, as well as juvenile detention, restitution, prevention and treatment.

CJS 250 ................................................................................................. 3 credits

Introduction to Security
This course is an introduction to contemporary security practices and programs. Students will study the origins of private security, its impact on our criminal justice system, and the roles of security personnel. Students will also examine the growth and privatization of the security industry, and study the elements of physical security including surveillance and alarm systems. The course will cover legal and liability issues, which determine the extent of private security authority as well as its limitations. This course will also focus on the current and future integration of private security services in law enforcement agencies.

COM 150 ................................................................................................. 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................................................. 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................................................. 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................................................. 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................................................. 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Concentration in Criminal Justice (Maryland-Online)

The following Associate of Arts/Emphasis in Criminal Justice (AACJ) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Criminal Justice concentration focuses on policing practices, corrections, the comprehensive court system, and juvenile justice. Students take a comprehensive look at these topics through interactive assignments that not only develop their critical thinking skills, but also enable them to recognize the functions of the criminal justice professions within their community. Students are required to formulate conclusions, evaluate decisions, and develop opinions based on learned topics. Students analyze relationships between the citizens, the police, and the court systems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/student-data.

General Education Requirements for the AACJ for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220
College Algebra. The MAT 220 requirement may be satisfied with College
Algebra transfer coursework or math transfer coursework requiring
College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Must include: BIO 100 and CHM 109
The BIO 100 and CHM 109 requirements may also be satisfied with any
science transfer coursework with a lab component.
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework
with US History or Government content.
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

General Education Requirements for the AACJ for Minnesota Students

Degree Requirements for the AACJ

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the
  minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AACJ

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AACJ
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AACJ

CJS 200 ..................................................................................... 3 credits

Foundations of the Criminal Justice System

This course is an introduction to the foundational elements of the criminal justice system. Students examine this system from its influential past to its multi-faceted present to its theorized future. This course gives the student an interactive pathway through the laws that protect the system, through the people that enforce the system, and through the courts that govern this system. It also provides an overview of the correctional systems and their impact and roles in American society. Other topics include crime causation, terrorism, and cyber crime related issues.

CJS 210 ..................................................................................... 3 credits

Fundamentals of Policing

This course provides students with the opportunity to gain a basic understanding of policing in the United States. It examines the history of the police, the emerging role of private security, and the organizational concepts of police departments. This course also discusses the relationship between the police department and their respective communities. Other topics include recruitment processes, diversity, culture, and laws that govern policing. Students will have the opportunity to research their local police department for a closer look at policing in their community.

CJS 220 ..................................................................................... 3 credits

Introduction to Criminal Court System

This course is an introduction to the fundamental elements of the courts in our criminal justice system. Students will examine the many complexities affecting the court system, from the theory behind the creation of laws to the implementation of such laws. This course provides an in-depth look into the roles and functions of the professionals interacting within the court while outlining the courtroom process. Other topics include punishments, appeals, and plea bargains.

CJS 230 ..................................................................................... 3 credits

Introduction to Corrections - A World Apart

This course is an introduction to the fundamental elements of the corrections system within the criminal justice field. Students will examine the early implementations of punishment as well as evolving philosophies of sentencing. Students will gain insight into the purpose and functions of jails and prisons, while establishing a connection between prison life and prisoner's rights. Students will also take an in-depth look into how parole and probation affect our communities. Other topics include correctional management, rehabilitation, and correctional systems in other countries.

CJS 240 ..................................................................................... 3 credits

Introduction to Juvenile Justice

This course is a general orientation to the concept of delinquency and the field of juvenile justice. Students will examine the nature of delinquency, as well as a variety of theories and suspected causes of delinquent behavior. Students will study factors related to delinquency and/or prevention including gender, youthful behavior, family, peers, drug use, school, and community. This course will also familiarize students with the evolution of juvenile justice and key players in the juvenile justice process. Additionally, students will develop an understanding of the juvenile court process, as well as juvenile detention, restitution, prevention and treatment.

COM 150 ..................................................................................... 3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
COM 220 .........................................................................................3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
MAT 219 .........................................................................................3 credits

Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.
MAT 220 ...................................................................................3 credits

College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
BIO 100 .........................................................................................4 credits

Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.
CHM 109 ..................................................................................3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
HIS 135 .........................................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.
ETH 125 .........................................................................................3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.
CRT 205 ...................................................................................3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media including television, Internet, and print to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.
GEN 105 ...................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Bachelor of Science in Criminal Justice Administration
(Maryland-Online)

The following Bachelor of Science in Criminal Justice Administration (BSCJA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The mission of the Bachelor of Science in Criminal Justice Administration is to provide students with a strong foundation in criminal justice principles, concepts, and theories, as well as a practice orientation to justice administration. The degree offers a global perspective, as well as specific emphasis areas of criminal justice services delivery. Students will receive core instruction in criminal justice as it is represented in the domains of police, courts, and corrections and then advance to emphases related to specific areas of criminal justice within those domains.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Students must select one emphasis in a particular area of study at the time of enrollment. Students may also complete an additional emphasis. Please contact your academic representative for more information.

### Emphasis in Management

**Emphasis in Management**

The BSCJA Management emphasis is designed to give learners a depth of understanding concerning the management and administrative skills necessary to effectively run organizations in the various domains of criminal justice system. The courses included in this degree emphasis focus primarily on the management and administration skill sets associated with the police, the courts, and with corrections. The theories and principles behind criminal justice are also examined. Students learn about policies, procedures associated with management functions, as well as many administrative practices and factors impacting criminal justice agency operations. This will not only give you the insight into what these specific departments are and what they do, but how to maintain and evaluate organizational operations from an administrative viewpoint.

### Emphasis in Institutional Healthcare

**Emphasis in Institutional Healthcare**

The BSCJA Institutional Health Care emphasis addresses the basic body of knowledge, understanding, and skills identified as relevant to criminal justice based health care services. This includes such areas as management, policy, legal and ethical parameters, health and disease factors, and health care service delivery. The reshaping of contemporary criminal justice health care requires workers to have a broad range of knowledge associated with the functions of health care in detention and correctional institutions, as well as various other areas represented in the greater criminal justice system.

CJA 484 ~ ................................................................. 3 credits
Criminal Justice Administration Capstone
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSCJA
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Applicants must be currently employed or have access to a work environment.
• Signed Criminal Conviction Prohibition Acknowledgement Form

General Education Requirements for the BSCJA
A minimum of 54 credits of the 120 credits in the following general education areas approved by the University:
Communication Arts, 6 credits
Mathematics, 6 credits
Science and Technology, 6 credits
Must include at least three credits in physical or biological sciences
Humanities, 6 credits
Social Science, 6 credits
Additional Liberal Arts, 6 credits
Interdisciplinary Requirements, 18 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Degree Requirements for the BSCJA
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 45 upper division credits.
  • A minimum of 54 credits of the 120 credits must be in the general education areas approved by the University.
  • A minimum program grade point average (GPA) of 2.0.
• Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
• Students will declare an emphasis at the time of enrollment.
• The diploma awarded for this program will read as: Bachelor of Science in Criminal Justice Administration and will not reflect the emphasis. Emphases are reflected on the transcript only.

Academic Progression Requirements for the BSCJA
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Course Sequence must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSCJA
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
Students in this program may waive a maximum of 15 upper division credits from their required course of study on the basis of regionally or nationally accredited transferable coursework. Students may also waive twelve (12) lower division credits from the required course of study.
In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years (5 years for Information Security and Technology courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to 30 credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the required course of study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution in which the University has entered into an approved articulation agreement with.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved Articulation Agreement.
• The course must be comparable in content and credits to the University course it is replacing and be approved through the Articulation Agreement.

The following courses in the required course of study may not be waived: GEN 200, CJA 484

Course Descriptions for the BSCJA

GEN 200................................................................................... 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

CJA 204.................................................................................... 3 credits
Introduction to Criminal Justice
This course is an introductory overview of the organization and jurisdictions of local, state, and federal law enforcement, judicial and corrections agencies, and processes involved in the criminal justice systems. It examines the historical aspects of the police, the courts, and the correctional system, as well as the philosophy. Additionally, career opportunities and qualifying requirements, terminology and constitutional limitations of the system will also be covered.

CJA 214.................................................................................... 3 credits
Introduction to Policy Theory and Practices
This course is an introductory overview which provides students with the opportunity to gain an understanding of policing in the United States. It surveys the basics of police functions, form individual and organizational roles to the issues faced on a daily basis. This course also examines the procedures and methods of operation of police and critical issues in law enforcement.

CJA 224.................................................................................... 3 credits
Introduction to Criminal Court Systems
This course is an introduction and overview of the legal system, the participants, the courtroom process, and post conviction process of the course system. It demonstrates the connection among all participants and how they relate to each other. Additionally, the course covers the history of the court system and the different types of court at the state and federal levels.

CJA 234.................................................................................... 3 credits
Introduction to Corrections
This course is an introduction to the various components of the corrections system within the criminal justice system. It provides an overview of corrections, including corrections history, the persons, agencies, and organizations that manage convicted offenders. Other topics that are covered include; policy and procedure, sentencing, probation, and rehabilitations of prisoners.

CJA 304.................................................................................... 3 credits
Interpersonal Communications
This course prepares the student to communicate effectively in both written and verbal form. It covers best practices in investigative reporting and interpersonal verbal communication with victims, suspects, and civilians, in a criminal justice setting. Emphasis is placed on practical application of the skills and theories introduced.

CJA 314.................................................................................... 3 credits
Criminology
Criminology is an introductory course in the study of crime and criminal behavior, focusing on the various theories of crime causation. This course highlights the causes of crime, criminal behavior systems, societal reaction to crime, and criminological methods of inquiry.

CJA 324.................................................................................... 3 credits
Ethics in Criminal Justice
This course explores the standards and codes of professional responsibility in criminal justice professions (e.g., Law Enforcement Code of Ethics, ABA Standards of Professional Responsibility, American Jail Association Code of Ethics for Jail Officers, and the American Correctional Association Code of Ethics). It also explores analysis and evaluation of ethical dilemmas, roles of professional organizations and agencies, ethics and community relations, ethics in criminal justice laws and procedures and civil liability in law enforcement and correctional environments.

CJA 334.................................................................................... 3 credits
Research Methods in Criminal Justice
Students learn and demonstrate knowledge of research methodology within the criminal justice system and become acquainted with the range and scope of quantitative and qualitative tools available to the criminal justice researcher.

CJA 344.................................................................................... 3 credits
Cultural Diversity Issues in Criminal Justice
This course offers a comprehensive, critical and balanced examination of the issues of crime and justice with respect to race and ethnicity. Procedures and policy in a pluralistic and multicultural society are examined relative to law enforcement, courts and corrections environments.
CJA 354.....................................................................................3 credits
Criminal Law
This is an introductory course in the study of criminal law, general legal principles, and how the criminal law functions in and affects modern society. This course highlights a variety of key topics, including the concept of crime and the development of criminal law, defenses to criminal charges, and a number of specific types of crimes, including personal crimes, property crimes, public order crimes, and offenses against public morality. Legal issues affecting punishment will also be discussed, as will ways the criminal law impacts victims of crime.

CJA 364.....................................................................................3 credits
Criminal Procedure
This course explores the basic core knowledge of constitutional criminal procedure. Emphasis is placed on the Fourth, Fifth and Sixth Amendments, searches and seizures, interrogations and confessions, identifications, pre-trial and trial processes. In addition, the United States Constitution as interpreted by the U.S. Supreme Court is examined along with philosophical policy considerations. Application of core knowledge is developed through simulation exercises and examination of homeland security issues.

CJA 374.....................................................................................3 credits
Juvenile Justice Systems and Processes
This course is a general orientation to the field of juvenile justice, including causation theories and the development of system responses to delinquent behavior. The problems facing juveniles today are compared to those of adults, and a number of specific types of crimes, including chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.

CJA 384.....................................................................................3 credits
Criminal Organizations
This course is a survey of the origins and development of organized crime in the United States. It examines the structure and activities of organized criminal enterprises, considers different models that have been employed to describe organized crime groups, and explores theories that have been advanced to explain the phenomenon. Major investigations of organized crime and legal strategies that have been developed to combat it are also considered.

CJA 394.....................................................................................3 credits
Contemporary Issues and Futures in Criminal Justice
This course examines both the principle issues in contemporary criminal justice as well as the extrapolation of such issues toward possible futures within the criminal justice field. Students will focus upon relevant research in policing, courts, and corrections that reflects key elements of current conditions and what may be expected in the years to come. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.

COMM 215 ..................................................................................3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 101 ....................................................................................3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ....................................................................................3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 220...................................................................................3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ..................................................................................3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ....................................................................................3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
Course Descriptions for the Emphasis in Human Services

**Models of Effective Helping**
This course presents an exploration of the major theoretical areas in the helping professions: cognitive, behavioral, affective/humanistic, and systems. Students learn the theoretical basis for each of the major theories, the approach to change, and the techniques and interventions used by practitioners of these theories. The course emphasizes the development of a personal theory and approach to human services and the creation of a resource file containing practical applications of theory-based techniques for use by the human service worker.

**Case Management**
This course covers principles, practices, and issues in case management. The diagnosis and treatment of developmental, psychological, and psychiatric problems and treatment resources in least restrictive and most cost-effective settings will be examined.

**Advocacy and Mediation**
This course is designed to explore the potential use and benefits of alternative dispute resolution in human services as a part of the advocacy process. Students will explore the role of the advocate, learn about various dispute resolution models, and identify and practice mediation skills. Attention to overcoming barriers to effective service delivery will be examined. Students will experience the roles of mediator, advocate, and agency representative through role-plays in dyads and small groups.

**Mental Health and Crisis Intervention Practices**
Students will learn about the history and current status of the human services delivery system and the mental health services system. Appropriate protocols for assessing strategies will be examined and explored. Students will explore the skills, techniques, and uses of crisis intervention.

**State and Local Political Processes**
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Course Descriptions for the Emphasis in Human Services**

**HIS 145** ................................................................. 3 credits
*The American Experience Since 1945*
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

**POL 215** ................................................................. 3 credits
*State and Local Political Processes*
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Course Descriptions for the Emphasis in Management**

**CJA 444** ................................................................. 3 credits
*Organizational Behavior and Management*
This course in organizational behavior encompasses the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.

**CJA 464** ................................................................. 3 credits
*Managing Criminal Justice Personnel*
This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.

**CJA 484** ................................................................. 3 credits
*Criminal Justice Administration Capstone*
This capstone course is designed for criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected emphasis area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.
Course Descriptions for the Emphasis in Institutional Healthcare

HCS 310....................................................................................3 credits
Health Care Delivery in the US
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 330....................................................................................3 credits
Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 430....................................................................................3 credits
Introduction to Health and Disease Trends
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 455....................................................................................3 credits
Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

CJA 484....................................................................................3 credits
Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected emphasis area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Bachelor of Science in Criminal Justice Administration

The following Bachelor of Science in Criminal Justice Administration (BSCJA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The mission of the Bachelor of Science in Criminal Justice Administration is to provide students with a strong foundation in criminal justice principles, concepts, and theories, as well as a practice orientation to justice administration. The degree offers a global perspective, as well as specific concentration areas of criminal justice services delivery. Students will receive core instruction in criminal justice as it is represented in the domains of police, courts, and corrections and then advance to concentrations related to specific areas of criminal justice within those domains.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSCJA Foundation Courses

GEN 200 ...................................................................................3 credits
Foundations for General Education and Professional Success

CJA 204 ~ .................................................................3 credits
Introduction to Criminal Justice

CJA 214 ~ .................................................................3 credits
Introduction to Police Theory and Practices

CJA 224 ~ .................................................................3 credits
Introduction to Criminal Court Systems

CJA 234 ~ .................................................................3 credits
Introduction to Corrections

BSCJA Required Course of Study

CJA 304 ~ .................................................................3 credits
Interpersonal Communications

CJA 314 ~ .................................................................3 credits
Criminology

CJA 324 ~ .................................................................3 credits
Ethics in Criminal Justice

CJA 334 ~ .................................................................3 credits
Research Methods in Criminal Justice

CJA 344 ~ .................................................................3 credits
Cultural Diversity Issues in Criminal Justice

CJA 354 ~ .................................................................3 credits
Criminal Law

CJA 364 ~ .................................................................3 credits
Criminal Procedure

CJA 374 ~ .................................................................3 credits
Juvenile Justice Systems and Processes

CJA 384 ~ .................................................................3 credits
Criminal Organizations
CJA 394 ~ ................................................................. 3 credits
Contemporary Issues and Futures in Criminal Justice
Students must select one concentration in a particular area of study at the time of enrollment.
Students may also complete an additional concentration. Please contact your academic representative for more information.

Concentration in Human Services
The BSCJA Human Services concentration is intended to give graduates knowledge and basic skills to work in the human services and helping areas of the criminal justice system. This particular concentration represents an integrated program combining academic instruction in criminal justice with applied skills for students whose goal is a career in the areas of the system where basic skills in interviewing, case management, mental health interventions, advocacy and mediation are required. Human Services graduates are prepared to provide services in a variety of institutional and community settings within the criminal justice domains of policing, the courts, institutional and community corrections.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja-hs.

BSHS 311 ~ ................................................................. 3 credits
Models of Effective Helping

BSHS 401 ~ ................................................................. 3 credits
Case Management

BSHS 441 ~ ................................................................. 3 credits
Advocacy and Mediation

BSHS 471 ~ ................................................................. 3 credits
Mental Health and Crisis Intervention Practices

CJA 484 ~ ................................................................. 3 credits
Criminal Justice Administration Capstone

Concentration in Management
The BSCJA Management concentration is designed to give learners a depth of understanding concerning the management and administrative skills necessary to effectively run organizations in the various domains of criminal justice system. The courses included in this degree concentration focus primarily on the management and administration skill sets associated with the police, the courts, and with corrections. The theories and principles behind criminal justice are also examined. Students learn about policies, procedures associated with management functions, as well as many administrative practices and factors impacting criminal justice agency operations. This will not only give you the insight into what these specific departments are and what they do, but how to maintain and evaluate organizational operations from an administrative viewpoint.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja-m.

CJA 444 ~ ................................................................. 3 credits
Organizational Behavior and Management

CJA 454 ~ ................................................................. 3 credits
Criminal Justice Management Theory and Practice

CJA 464 ~ ................................................................. 3 credits
Criminal Justice Policy Analysis

CJA 474 ~ ................................................................. 3 credits
Managing Criminal Justice Personnel

CJA 484 ~ ................................................................. 3 credits
Criminal Justice Administration Capstone

Concentration in Institutional Healthcare
The BSCJA Institutional Health Care concentration addresses the basic body of knowledge, understanding, and skills identified as relevant to criminal justice based health care services. This includes such areas as management, policy, legal and ethical parameters, health and disease factors, and health care service delivery. The reshaping of contemporary criminal justice health care requires workers to have a broad range of knowledge associated with the functions of health care in detention and correctional institutions, as well as various other areas represented in the greater criminal justice system.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja-ih.

HCS 310 ~ ................................................................. 3 credits
Health Care Delivery in the United States

HCS 330 ~ ................................................................. 3 credits
Legal Issues in Health Care: Regulation and Compliance

HCS 430 ~ ................................................................. 3 credits
Health Care Policy: The Past and the Future

CJA 484 ~ ................................................................. 3 credits
Criminal Justice Administration Capstone

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSCJA
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
• Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• Applicants must be currently employed or have access to a work environment.
• Signed Criminal Conviction Prohibition Acknowledgement Form

General Education Requirements for the BSCJA
A minimum of 54 credits of the 120 credits in the following general education areas approved by the University:
Communication Arts, 6 credits
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts
Puerto Rico students may not use conversational English to satisfy Communication Arts
Mathematics, 6 credits
Science and Technology, 6 credits
Must include at least three credits in physical or biological sciences
Humanities, 6 credits
Social Science, 6 credits
Nevada students must complete 3 credits in Nevada Constitution
Additional Liberal Arts, 6 credits
Puerto Rico students must complete six (6) credits of Spanish.
Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish 1 or higher will satisfy the Spanish requirement.
Interdisciplinary Requirements, 18 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSCJA for Arkansas Students
A minimum of 54 credits of the 120 credits in the following general education areas approved by the University:
Communication Arts, 6 credits
Mathematics, 6 credits
Must include MTH 220
Science and Technology, 9 credits
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.
Humanities, 9 credits
Social Science, 9 credits
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.
Additional Liberal Arts, 6 credits
Interdisciplinary Requirements, 9 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for the BSCJA
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 45 upper division credits.
  • A minimum of 54 credits of the 120 credits must be in the general education areas approved by the University.
  • A minimum program grade point average (GPA) of 2.0.
  • Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  • Students will declare a concentration at the time of enrollment.
  • The diploma awarded for this program will read as: Bachelor of Science in Criminal Justice Administration and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the BSCJA
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSCJA
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 15 upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students may also waive twelve (12) lower division credits from the required course of study.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years (5 years for Information Security and Technology courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to 30 credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the required course of study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or nationally accredited institution in which the University has entered into an approved articulation agreement with.

• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved Articulation Agreement.
• The course must be comparable in content and credits to the University course it is replacing and be approved through the Articulation Agreement.

The following courses in the required course of study may not be waived: GEN 200, CJA 484

Course Descriptions for the BSCJA
GEN 200 ........................................................................................................ 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
CJA 204 ........................................................................................................ 3 credits
Introduction to Criminal Justice
This course is an introductory overview of the organization and jurisdictions of local, state, and federal law enforcement, judicial and corrections agencies, and processes involved in the criminal justice systems. It examines the historical aspects of the police, the courts, and the correctional system, as well as the philosophy. Additionally, career opportunities and qualifying requirements, terminology and constitutional limitations of the system will also be covered.
CJA 214 ........................................................................................................ 3 credits
Introduction to Policy Theory and Practices
This course is an introductory overview which provides students with the opportunity to gain an understanding of policing in the United States. It surveys the basics of police functions, from individual and organizational roles to the issues faced on a daily basis. This course also examines the procedures and methods of operation of police and critical issues in law enforcement.
CJA 224 ........................................................................................................ 3 credits
Introduction to Criminal Court Systems
This course is an introduction and overview of the legal system, the participants, the courtroom process, and post conviction process of the court system. It demonstrates the connection among all participants and how they relate to each other. Additionally, the course covers the history of the court system and the different types of court at the state and federal levels.
CJA 234 ........................................................................................................ 3 credits
Introduction to Corrections
This course is an introduction to the various components of the corrections system within the criminal justice system. It provides an overview of corrections, including corrections history, the persons, agencies, and organizations that manage convicted offenders. Other topics that are covered include; policy and procedure, sentencing, probation, and rehabilitations of prisoners.
CJA 304.....................................................................................3 credits

Interpersonal Communications
This course prepares the student to communicate effectively in both written and verbal form. It covers best practices in investigative reporting and interpersonal verbal communication with victims, suspects, and civilians, in a criminal justice setting. Emphasis is placed on practical application of the skills and theories introduced.

CJA 314.....................................................................................3 credits

Criminology
Criminology is an introductory course in the study of crime and criminal behavior, focusing on the various theories of crime causation. This course highlights the causes of crime, criminal behavior systems, societal reaction to crime, and criminological methods of inquiry.

CJA 324.....................................................................................3 credits

Ethics in Criminal Justice
This course explores the standards and codes of professional responsibility in criminal justice professions (e.g., Law Enforcement Code of Ethics, ABA Standards of Professional Responsibility, American Jail Association Code of Ethics for Jail Officers, and the American Correctional Association Code of Ethics). It also explores analysis and evaluation of ethical dilemmas, roles of professional organizations and agencies, ethics and community relations, ethics in criminal justice laws and procedures and civil liability in law enforcement and correctional environments.

CJA 334.....................................................................................3 credits

Research Methods in Criminal Justice
Students learn and demonstrate knowledge of research methodology within the criminal justice system and become acquainted with the range and scope of quantitative and qualitative tools available to the criminal justice researcher.

CJA 344.....................................................................................3 credits

Cultural Diversity Issues in Criminal Justice
This course offers a comprehensive, critical and balanced examination of the issues of crime and justice with respect to race and ethnicity. Procedures and policy in a pluralistic and multicultural society are examined relative to law enforcement, courts and corrections environments.

CJA 354.....................................................................................3 credits

Criminal Law
This is an introductory course in the study of criminal law, general legal principles, and how the criminal law functions in and affects modern society. This course highlights a variety of key topics, including the concept of crime and the development of criminal law, defenses to criminal charges, and a number of specific types of crimes, including personal crimes, property crimes, public order crimes, and offenses against public morality. Legal issues affecting punishment will also be discussed, as will ways the criminal law impacts victims of crime.

CJA 364.....................................................................................3 credits

Criminal Procedure
This course explores the basic core knowledge of constitutional criminal procedure. Emphasis is placed on the Fourth, Fifth and Sixth Amendments, searches and seizures, interrogations and confessions, identifications, pre-trial and trial processes. In addition, the United States Constitution as interpreted by the U.S. Supreme Court is examined along with philosophical policy considerations. Application of core knowledge is developed through simulation exercises and examination of homeland security issues.

CJA 374.....................................................................................3 credits

Juvenile Justice Systems and Processes
This course is a general orientation to the field of juvenile justice, including causation theories and the development of system responses to delinquent behavior. The problems facing juveniles today are addressed, and adult and juvenile justice systems are compared, including initial apprehension, referral, and preventive techniques. Specific issues examined include chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.

CJA 384.....................................................................................3 credits

Criminal Organizations
This course is a survey of the origins and development of organized crime in the United States. It examines the structure and activities of organized criminal enterprises, considers different models that have been employed to explain such phenomena. Specific issues examined include chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.

CJA 394.....................................................................................3 credits

Contemporary Issues and Futures in Criminal Justice
This course examines both the principle issues in contemporary criminal justice as well as the extrapolation of such issues toward possible futures within the criminal justice field. Students will focus upon relevant research in policing, courts, and corrections that reflects key elements of current conditions and what may be expected in the years to come. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.

COMM 215 .................................................................3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 101 ................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 220 ................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................. 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................. 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Concentration in Human Services

BSHS 311 ................................................................. 3 credits
Models of Effective Helping
This course presents an exploration of the major theoretical areas in the helping professions: cognitive, behavioral, affective/humanistic, and systems. Students learn the theoretical basis for each of the major theories, the approach to change, and the techniques and interventions used by practitioners of these theories. The course emphasizes the development of a personal theory and approach to human services and the creation of a resource file containing practical applications of theory-based techniques for use by the human service worker.

BSHS 401 ................................................................. 3 credits
Case Management
This course covers principles, practices, and issues in case management. The diagnosis and treatment of developmental, psychological, and psychiatric problems and treatment resources in least restrictive and most cost effective settings will be examined.

BSHS 441 ................................................................. 3 credits
Advocacy and Mediation
This course is designed to explore the potential use and benefits of alternative dispute resolution in human services as a part of the advocacy process. Students will explore the role of the advocate, learn about various dispute resolution models, and identify and practice mediation skills. Attention to overcoming barriers to effective service delivery will be examined. Students will experience the roles of mediator, advocate, and agency representative through role-plays in dyads and small groups.

BSHS 471 ................................................................. 3 credits
Mental Health and Crisis Intervention Practices
Students will learn about the history and current status of the human services delivery system and the mental health services system. Appropriate protocols for assessing strategies will be examined and explored. Students will explore the skills, techniques, and uses of crisis intervention.

CJA 484 ................................................................. 3 credits
Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.
Course Descriptions for the Concentration in Management

CJA 444..........................................................3 credits
Organizational Behavior and Management
This course in organizational behavior encompasses the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.

CJA 454..........................................................3 credits
Criminal Justice Management Theory and Practice
This course applies management and financial principles to criminal justice systems in our rapidly changing society. Well as others, will allow students to examine their role in criminal justice organizations - court systems, law enforcement, and corrections. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

CJA 464..........................................................3 credits
Criminal Justice Policy Analysis
This course examines the history of federal- and state-level crime control initiatives and explores the development of effective antimicrobial policies. The analysis of contemporary crime control policies is included.

CJA 474..........................................................3 credits
Managing Criminal Justice Personnel
This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.

CJA 484..........................................................3 credits
Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Concentration in Institutional Healthcare

HCS 310..........................................................3 credits
Health Care Delivery in the US
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 330..........................................................3 credits
Introduction to Health and Disease Trends
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 340..........................................................3 credits
Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 350..........................................................3 credits
Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

HCS 360..........................................................3 credits
Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

CJA 484..........................................................3 credits
Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.
The Bachelor of Science in Organizational Security and Management

The following Bachelor of Science in Organizational Security and Management (BS/OSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Organizational Security and Management degree is designed to address an increasing national and international need for greater technical competence and professionalism in the security industry. The distinctions between the roles of criminal justice agencies and private security organizations are recognized and the degree program provides the required knowledge for a student to develop competency and management skills in organizational security. While the program includes courses in Terrorism and Homeland Security, it also recognizes the depth and breadth of the discipline and provides a variety of courses designed to expose students to the entire spectrum of the security profession.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bs-osm.

Required Course of Study for the BS/OSM

Courses requiring prerequisites are identified by a ~ symbol following the course number. Courses requiring a minimum grade of "C-" for successful completion are identified by a + symbol following the course number.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BS/OSM

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body; GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.

- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must be currently employed or have access to a work environment.
• Signed Criminal Conviction Prohibition Acknowledgement Form

**General Education Requirements for the BS/OSM**

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

**Communication Arts, 6 credits**

Oregon campus students must use writing courses to complete the 6 credits of Communication Arts.

Puerto Rico students must not use conversational English to satisfy credits of Communication Arts.

**Mathematics, 6 credits**

Science and Technology, 6 credits

Must include at least 3 credits in the physical or biological sciences

**Humanities, 6 credits**

Social Science, 6 credits

Nevada students must complete 3 credits in Nevada Constitution

Additional Liberal Arts, 3 credits

Puerto Rico students must complete 6 credits of Spanish. Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish 1 or higher will satisfy the Spanish requirement.

Interdisciplinary Requirements, 15 credits

 savoir means Interdisciplinary requirement due to the 6 credit Spanish requirement in Liberal Arts.

Professional Development, 3 credits

**GEN 300 is completed as part of the required course of study Integrating, 3 credits**

**SEC 480 is completed as part of the required course of study**

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**General Education Requirements for the BS/OSM for Arkansas Students**

All students must complete 54 general education credits from the following areas:

**Communication Arts, 6 credits**

**Mathematics, 6 credits**

Must include MTH 220

Science and Technology, 9 credits

Must include CHM 110 and PHY 101

**Humanities, 9 credits**

Social Science, 9 credits

Must include HIS 145 or POL 215

Additional Liberal Arts, 3 credits

Interdisciplinary Requirements, 6 credits

Professional Development, 3 credits

**GEN 300 is completed as part of the required course of study Integrating, 3 credits**

**SEC 480 is completed as part of the required course of study**

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Degree Requirements for the BS/OSM**

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 57 upper division credits.
  • A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.0.
  • A minimum of 120 total credits that include a minimum of 57 upper division credits. Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  • If student fails to complete SEC 480 with a “C-” or better, the student must retake the course to satisfy the degree requirement.

**Academic Progression Requirements for the BS/OSM**

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.

• Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance. Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 57 upper division credits.
  • A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.0.
  • A minimum of 120 total credits that include a minimum of 57 upper division credits. Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  • If student fails to complete SEC 480 with a “C-” or better, the student must retake the course to satisfy the degree requirement.

• General Education Requirements for the BS/OSM

• Signed Criminal Conviction Prohibition Acknowledgement Form

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 57 upper division credits.
  • A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.0.
  • A minimum of 120 total credits that include a minimum of 57 upper division credits. Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  • If student fails to complete SEC 480 with a “C-” or better, the student must retake the course to satisfy the degree requirement.

• Academic Progression Requirements for the BS/OSM

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 57 upper division credits.
  • A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.0.
  • A minimum of 120 total credits that include a minimum of 57 upper division credits. Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  • If student fails to complete SEC 480 with a “C-” or better, the student must retake the course to satisfy the degree requirement.
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Residency Requirements and Course Waivers for the BS/OSM**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program completion agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the required course of study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the required course of study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: GEN 300, SEC 480

### Course Descriptions for the BS/OSM

**GEN 300 ............................................................................................................. 3 credits**

**Skills for Professional Development**

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

**SEC 310 .................................................................................................... 3 credits**

**Introduction to Organizational Security and Management**

This course is an overview of the principles of security management and the consequences of failure to adequately protect business assets. The course includes an introduction to loss prevention and risk management. It provides an overview of the contingencies that influence modern security management, e.g., technology, legal issues, ethics, vulnerability assessments, criminal and terrorist activity, and interagency cooperation. The course also introduces various security operation specializations and programs such as Corporate, Academic, Transportation, Government, and others.

**SEC 320 .................................................................................................... 3 credits**

**Survey of Security Specializations**

This course identifies and contrasts the benefits of proprietary and contract security operations and introduces the student to a variety of security specializations. It also examines the purposes, objectives, procedures, risks, and types of organizations associated with the respective specializations.

**CIS 319 ............................................................................................................. 3 credits**

**Computers and Information Processing**

This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

**MGT 431 ............................................................................................................. 3 credits**

**Human Resources Management**

This course focuses on the strategic role of human resources management, personnel planning and job analysis, personnel selection, performance appraisal, compensation, training and development from the vantage point of the manager.

**SEC 340 ............................................................................................................. 3 credits**

**Criminology and the Criminal Justice System**

This course identifies various types of criminal activity and provides the student with an understanding of the causes of criminal behavior and the societal response to crime. It also identifies and discusses the various elements of the American criminal justice system.

**SEC 360 ............................................................................................................. 3 credits**

**Interpersonal Communications**

This course prepares the student to communicate effectively in written and verbal form. It provides principles for effective investigative reporting and incident documentation as well as techniques for interviewing and understanding verbal and non-verbal communication.
**Organizational Behavior and Management**  
This course encompasses the study of individual and group behavior in organizational settings. Management methods for organizational processes and change are presented along with leadership applications.

**Skills for Lifelong Learning**  
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
MTH 220 .................................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................................. 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................................... 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145..................................................................................... 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215.................................................................................... 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Associate Programs Pathways Program**
Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:
- Pathways Non-degree Application
- High School Junior or Senior Standing
- Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
- Parent or guardian consent
- $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
Undergraduate Business and Management works closely with other academic colleges to provide and administer academic courses in other business related fields. In cooperation with the College of Information Systems and Technology (IS&T), the College of Undergraduate Business and Management provides select IS&T courses in the e-Business and Information Systems major. The college also works cooperatively with the Colleges of Arts and Sciences to give breadth to the undergraduate learning experience through the integration of general education and professional course work.

Associate of Arts/Concentration in Accounting

The following Associate of Arts/Concentration in Accounting (AAACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associates of Arts in Accounting concentration focuses on the role of accounting in business strategy, financial statements, cost information, economics, management, and ethical issues. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaacc.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAACC

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAACC

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Concentration 18 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Degree Requirements for AAACC

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum program grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAACC
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training).
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track and are required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAACC
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferrable coursework.
In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAACC
ACC 220 ..................................................................................3 credits
Survey of Accounting: The Maze of Numbers
Every business depends on its accountants to organize and maintain financial information. Accountants translate the maze of numbers most people see into valuable information that keeps a company going. This course introduces students to the accounting profession. It covers the role accounting plays in business and career options in accounting. Students learn the fundamentals of accounting principles and the accounting cycle.
ACC 225 ..................................................................................3 credits
Financial Accounting
Financial accounting communicates economic information and serves as a tool for business decision making. Through financial accounting, accountants track how money circulates in an organization. This course provides an understanding of the fundamental principles of double entry accounting as applied to practical business situations. Emphasis is given to the following: debit and credit rules of accounting, T-accounts, journalizing transactions, adjusting entries for revenue and expense items, inventories, internal control with emphasis on cash, and accounting information systems. Students will be able to prepare and use the income statement, balance sheet, and statement of cash flows.
### Financial Reporting: Peeking Under the Financial Hood

Businesses’ accounting practices are under heightened scrutiny following corporate scandals in recent years. Accountants have a legal and ethical responsibility to follow the law and standard accounting practices as they document their companies’ finances. The course is an introductory level course in ethics, focusing on the types of situations that pose ethical problems in business. An attempt will be made to help the student develop an ethical framework which will allow the student to address ethical issues in the business world. Current trends in accounting ethics, including the Sarbanes Oxley regulations and the ethical requirements for certified public accountants are emphasized.

### Introduction to Finance: Harvesting the Money Tree

This course gives students an overview of finance concepts, terminology, and principles. It is an introduction to the role of finance in the business world. Topics covered include the relationship between finance and accounting, careers in finance, basic financial analysis and planning techniques, financial ratios, profit, cash flow, and sources of business financing.

### Financial Reporting: Peeking Under the Financial Hood

In this course, students will study how to analyze financial statements and methods used to value companies. Financial reports help managers choose between business paths. They also help investors and analysts evaluate the financial health of companies. This course is a practical means of discovering how financial data are generated and their limitations; techniques for analyzing the flow of business funds; and methods for selecting and interpreting financial ratios. It also presents analytical tools for predicting and testing assumptions about a firm’s performance.

### Accounting Information Systems

Accountants today have put aside paper and pencil and taken advantage of advances in technology. Specialized software has made accounting transactions and reporting more dynamic and efficient. In this course, students will understand the role of accounting information systems in organizations. The course covers the different types of accounting systems used for the collection, organization, and presentation of information. Using accounting software, the students will explore how accounting information systems are used to assist management in decision-making processes. Emphasis will also be placed on the internal controls that should be included in an accounting information system.

### Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

### Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

### Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

### Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

### Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Concentration in Accounting Foundations

The following Associate of Arts/Concentration in Accounting Foundations (AAACCF) program may be offered at these University of Phoenix campus locations: Online, depending on state residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts curriculum provides a foundation and overview within the academic disciplines of communication arts, social sciences, mathematics, life sciences, and the humanities. Instruction focuses on the development of student skills in writing, critical thinking, and information utilization, as well as foundational competencies in the selected discipline. The completion of an Associate of Arts degree represents an important milestone for many students as they pursue their educational goals.

The Associates of Arts in Accounting Foundations concentration focuses on the role of accounting in business strategy, accounting communications, accounting information systems, management, financial statements, and cost information. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAACCF

- BUS 210 ................................................................. 3 credits
  Foundations of Business
  In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.
- XBCOM 230 .......................................................... 3 credits
  Business Communication for Accountants
  This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.
- XACC 210 ............................................................. 3 credits
  Accounting Information Systems
  This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.
- XMGT 230 ............................................................ 3 credits
  Management Theory and Practice
  This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.
- XACC 290 ............................................................. 3 credits
  Principles of Accounting I
  This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.
XACC 291 ......................................................... 3 credits
Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

COM 150 .................................................................................. 3 credits
Effective Essay Writing
Students focus on gathering research, evaluating and documenting verb and pronoun-antecedent agreement, and pronoun case. fact and opinion. Grammar exercises focus on verb tense, subject-verb and pronoun-antecedent agreement, and pronoun case.

- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

Residency Requirements and Course Waivers for the AAACCF

Students must meet the established University residency requirement for degree conferment. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.

The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of 'C' (2.0) or better (five years for information technology courses).

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAACCF

XACC 210 ................................................................................. 3 credits

This course introduces the foundations of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XACC 290 ................................................................................. 3 credits

This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

XACC 210 ................................................................................. 3 credits

This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

XMG 230 .................................................................................. 3 credits

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

XACC 290 ................................................................................. 3 credits

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

XACC 291 .................................................................................. 3 credits

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

COM 150 .................................................................................. 3 credits

Effective Essay Writing

Students develop academic writing skills. The emphasis is on coherence and correctness in written communication as students use the writing process to craft an expository essay. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense, subject-verb and pronoun-antecedent agreement, and pronoun case.

COM 220 .................................................................................. 3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

CRT 205 .................................................................................. 3 credits

Critical Thinking

In this course, students will develop the ability to think both clearly and critically. Practice includes developing writing skills that will enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students will be given the opportunity to analyze and discuss various types of media—including television, cinema, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

ETH 125 .................................................................................. 3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

GEN 105 .................................................................................. 3 credits

Skills for Learning in an Info Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Online modality in their state. Please contact your enrollment advisor for more information.

The Hospitality, Travel, and Tourism concentration provides content and practical application in an array of food service, lodging management, and tourism industry careers. The courses emphasize the leadership competencies and knowledge that provide the foundation of management practices valued in the hospitality arena. The Hospitality, Travel, and Tourism associate degree program is also planned to prepare the student for further study in hospitality or related programs at the undergraduate level.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahtt.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Hospitality, Travel and Tourism - Track A and B**

- HTT 200 ~ ................................................................. 3 credits
- Hospitality
- HTT 210 ~ ................................................................. 3 credits
- Travel and Tourism: Work, Pleasure, Forever Enriching
- HTT 220 ~ ................................................................. 3 credits
- Information Technology in Hospitality, Travel and Tourism
- HTT 230 ~ ................................................................. 3 credits
- Food and Beverage Management: Eat, Drink and Be Healthy
- HTT 240 ~ ................................................................. 3 credits
- Lodging and Resort Operations
- HTT 250 ~ ................................................................. 3 credits
- Communication Arts Requirement 6 credits
- (B Track must include: COM 150 and COM 220)
- (A Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
- Science & Technology Requirement 6 credits
- (A Track must include: 3 credits in the physical or biological sciences)
- (B Track must include: SCI 162)
- Social Science Requirement 6 credits
- (A Track must include: ETH 125)
- (B Track must include: PSY 201 and ETH 125)
- Humanities Requirement 6 credits
- (A Track must include: CRT 205)
- (B Track must include: HUM 111)
- Additional Liberal Arts Requirement 3 credits
- (A Track must include: GEN 105)
- (B Track must include: LIS 101)
- Interdisciplinary Requirement 9 credits
- (B Track must include: FP 101)
- Concentration 18 credits
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

**Degree Requirements for AAHTT**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D” or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Additional Admission Requirements for AAHTT**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**General Education Requirements for the AAHTT**

- Communication Arts Requirement 6 credits
- (A Track must include: COM 150 and COM 220)
- (B Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
- Science & Technology Requirement 6 credits
- (A Track must include: 3 credits in the physical or biological sciences)
- (B Track must include: SCI 162)
- Social Science Requirement 6 credits
- (A Track must include: ETH 125)
- (B Track must include: PSY 201 and ETH 125)
- Humanities Requirement 6 credits
- (A Track must include: CRT 205)
- (B Track must include: HUM 111)
- Additional Liberal Arts Requirement 3 credits
- (A Track must include: GEN 105)
- (B Track must include: LIS 101)
- Interdisciplinary Requirement 9 credits
- (B Track must include: FP 101)
- Concentration 18 credits
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
Academic Progression Requirements for the AAHTT

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher degree),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAHTT

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAHTT

HTT 200..........................................................................................3 credits
Hospitality: Food, Shelter, and Fun Away From Home

This course is an overview of the history, current trends, and general organizational structure of the hospitality industry. Additionally, the course covers topics such as recreational entertainment, economic impact of hospitality, and service standards. The course also gives students the opportunity to examine careers in tourism, foodservice, and lodging industries.

HTT 210..........................................................................................3 credits
Travel & Tourism: For Work, For Pleasure, Forever Enriching

This course introduces the tourism industry and its major components such as the travel mart, surface travel, air travel, business travel, cruises, and recreation. It covers current issues in tourism and their effect on the hospitality industry as a whole including economic, political, and cultural forces, and quality of life impacts on host locals. Career opportunities within travel and tourism are also discussed.

HTT 220..........................................................................................3 credits
Information Technology in Hospitality, Travel and Tourism: When Distribution Joins Automation

This course explores the impact of information and communications technology on the structure and operations of the hospitality, travel, and tourism industry. It covers topics dealing with the interaction between consumers, intermediaries, operatives, and management through rapidly changing technologies. Effects on service quality, productivity, efficiency, and profitability will be examined.

HTT 230..........................................................................................3 credits
Finance for Hospitality Professionals: Bed & Balance Sheets

This course focuses on conceptual awareness and practice of financial management as it applies to hospitality, travel, and tourism industries. It covers the basics of accounting, budgets and budgeting systems, performance measures creation, and financial statement evaluation for the purpose of cost analysis and planning. Aspects of setting prices, funding, and risk management are also covered.

HTT 240..........................................................................................3 credits
Food & Beverage Management: Eat, Drink, & Be Healthy

This course integrates the basic concept and practical skills related to foodservice operations, from the front office to the kitchen. It covers basic principles of purchasing and cost management of food and beverage, as well as menu planning, institutional food service, and quality control.
HTT 250 ................................................................. 3 credits
Lodging and Resort Operations: There’s Room In the Inn
This course studies the lodging industry, its history, growth, development, and future direction. It covers front office procedures and interpersonal dynamics from reservations through the night audit. The course also examines career opportunities in lodging and resorts.

COM 150 ................................................................. 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................. 3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

GEN 105................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Hospitality, Travel and Tourism (Maryland-Online)

The following Associate of Arts/Emphasis in Hospitality, Travel and Tourism (AAHTT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Hospitality, Travel, and Tourism emphasis provides content and practical application in an array of food service, lodging management, and tourism industry careers. The courses emphasize the leadership competencies and knowledge that provide the foundation of management practices valued in the hospitality arena. The Hospitality, Travel, and Tourism associate degree program is also planned to prepare the student for further study in hospitality or related programs at the undergraduate level.

- **Applicants must be at least 16 years of age at the time of application.**
- **High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.**
- **Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.**

**Degree Requirements for AAFB**

The following Associate of Arts/Concentration in Foundations of Business (AAFB) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Foundations of Business focuses on a variety of business essentials including economics, information systems, managerial ethics, financial accounting, business research and effective managerial communications. Students will explore business principles and learn to apply problem-solving strategies to real-life scenarios. In addition, students will also discuss the effects of culture and ethics in current global and domestic business environments.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aafb.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

### Concentration in Foundations of Business - Track A and B

**BUS 210 ~** Foundations of Business 3 credits

**XECO 212 ~** Principles of Economics 3 credits

**XBIS 219 ~** Business Information Systems 3 credits

**XMGT 216 ~** Organizational Ethics and Social Responsibility 3 credits

**XACC 280 ~** Financial Accounting Concepts and Principles 3 credits

**XCOM 285 ~** Essentials of Managerial Communication 3 credits

The degree requirements for this program are the following:

- **Completion of a minimum of 60 credits.**
- **All undergraduate students are required to complete the minimum general education credits required by their program version.**
- **Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.**
- **Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.**
- **A minimum grade point average (GPA) of 2.0.**
- **Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.**

**Additional Liberal Arts Requirement 3 credits**

- **A Track must include: GEN 105**
- **B Track must include: US 101**

**Interdisciplinary Requirement 9 credits**

- **A Track must include: CRT 205**
- **B Track must include: HUM 111**

**Concentration 18 credits**

- **A Track must include: FP 101**
- **B Track must include: US 101**

**General Education Requirements for the AAFB**

- **Communication Arts Requirement 6 credits**
  - **A Track must include: COM 150 and COM 220**
  - **B Track must include: COM 155 and COM 156**

- **Mathematics Requirement 6 credits**
  - **A Track must include: 3 credits in the physical or biological sciences**
  - **B Track must include: SCI 162**

- **Social Science Requirement 6 credits**
  - **A Track must include: ETH 125**
  - **B Track must include: PSY 201 and ETH 125**

- **Humanities Requirement 6 credits**
  - **A Track must include: CRT 205**
  - **B Track must include: HUM 111**

- **Additional Liberal Arts Requirement 3 credits**
  - **A Track must include: GEN 105**
  - **B Track must include: US 101**

**Communication Arts Requirement 6 credits**

- **A Track must include: COM 150 and COM 220**
- **B Track must include: COM 155 and COM 156**

**Mathematics Requirement 6 credits**

- **A Track must include: 3 credits in the physical or biological sciences**
- **B Track must include: SCI 162**

**Social Science Requirement 6 credits**

- **A Track must include: ETH 125**
- **B Track must include: PSY 201 and ETH 125**

**Humanities Requirement 6 credits**

- **A Track must include: CRT 205**
- **B Track must include: HUM 111**

**Additional Liberal Arts Requirement 3 credits**

- **A Track must include: GEN 105**
- **B Track must include: US 101**

**Interdisciplinary Requirement 9 credits**

- **A Track must include: CRT 205**
- **B Track must include: HUM 111**

**Concentration 18 credits**

- **A Track must include: FP 101**
- **B Track must include: US 101**

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

The degree requirements for this program are the following:

- **Completion of a minimum of 60 credits.**
- **All undergraduate students are required to complete the minimum general education credits required by their program version.**
- **Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.**
- **Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.**
- **A minimum grade point average (GPA) of 2.0.**
- **Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.**
- **The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.**
Academic Progression Requirements for the AAFB

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General Education selective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAFB

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAFB

BUS 210 ................................................................. 3 credits

Foundations of Business

In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XECO 212 ............................................................... 3 credits

Principles of Economics

This course introduces the fundamental theories of microeconomics and macroeconomics. The economic principles studied in this course apply to everyday life as students research an industry, debate issues with trade agreements, discuss the effects of a shift in labor supply and demand, and discuss the strengths and weaknesses of the Consumer Price Index calculation. In particular, students research an industry affected by the economy and perform an economic analysis of the chosen industry.

XBIS 219 .............................................................. 3 credits

Business Information Systems

This course provides an overview of Business Information Systems. This includes a broad foundation for both technical and non-technical business professionals. Special emphasis is placed on how information is used by different types of businesses across different industries.

XMGT 216 .............................................................. 3 credits

Organizational Ethics and Social Responsibility

This course provides a foundational perspective for socially responsible management practices in business. Special emphasis is placed on the inter-related nature of ethics, moral, legal, and social issues in managing individuals, groups, and the organization within a business environment.

XACC 280 ............................................................. 3 credits

Financial Accounting Concepts and Principles

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on the enterprise. Financial information is examined from the perspective of effective management decision making with special emphasis on the planning and controlling responsibilities of practicing managers.
XCOM 285 ................................................................. 3 credits
**Essentials of Managerial Communication**
This course introduces students to the foundations of communication in a business setting. Students are exposed to various topics related to interpersonal and group communication with an eye toward applications in an office or virtual office setting. Students will develop skills in various forms of written communication, including memos, emails, business letters, and reports. Communication ethics and cross-cultural communications are also explored. Upon completing the course, students will have an awareness of their personal communication style and be able to identify areas for further exploration of communication as a business skill.

COM 150 ................................................................. 3 credits
**Effective Essay Writing**
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................. 3 credits
**Research Writing**
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................. 3 credits
**Cultural Diversity**
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits
**Critical Thinking**
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits
**Skills for Learning in an Information Age**
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**XACC 290** ................................................................. 3 credits

**Principles of Accounting I**

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

**XACC 291** ................................................................. 3 credits

**Principles of Accounting II**

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.
Effective Essay Writing
Students develop academic writing skills. The emphasis is on coherence and correctness in written communication as students use the writing process to craft an expository essay. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense, subject-verb and pronoun-antecedent agreement, and pronoun case.

Critical Thinking
In this course, students will develop the ability to think both clearly and critically. Practice includes developing writing skills that will enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students will be given the opportunity to analyze and discuss various types of media—including television, cinema, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

Skills for Learning in an Info Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Accounting (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Accounting (AAACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associates of Arts in Accounting concentration focuses on the role of accounting in business strategy, financial statements, cost information, economics, management, and ethical issues. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaacc-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaacc-mn.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Accounting - Track A and B

- ACC 220 ~ 3 credits
- ACC 225 ~ 3 credits
- ACC 230 ~ 3 credits
- ACC 260 ~ 3 credits
- ACC 235 ~ 3 credits
- FIN 200 ~ 3 credits
- FIN 210 ~ 3 credits
- FIN 220 ~ 3 credits
- FIN 230 ~ 3 credits
- FIN 240 ~ 3 credits

Additional Admission Requirements for AAACC

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
General Education Requirements for the AAACC for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Must include: BIO 100 and CHM 109
The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

General Education Requirements for the AAACC for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for the AAACC

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAACC

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAACC
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAACC

ACC 220 .................................................................................. 3 credits
Survey of Accounting: The Maze of Numbers
Every business depends on its accountants to organize and maintain financial information. Accountants translate the maze of numbers most people see into valuable information that keeps a company going. This course introduces students to the accounting profession. It covers the role accounting plays in business and career options in accounting. Students learn the fundamentals of accounting principles and the accounting cycle.

ACC 225 .................................................................................. 3 credits
Financial Accounting
Financial accounting communicates economic information and serves as a tool for business decision making. Through financial accounting, accountants track how money circulates in an organization. This course provides an understanding of the fundamental principles of double entry accounting as applied to practical business situations. Emphasis is given to the following: debit and credit rules of accounting, T-accounts, journalizing transactions, adjusting entries for revenue and expense items, inventories, internal control with emphasis on cash, and accounting information systems. Students will be able to prepare and use the income statement, balance sheet, and statement of cash flows.

ACC 230 .................................................................................. 3 credits
Introduction to Finance: Harvesting the Money Tree
This course gives students an overview of finance concepts, terminology, and principles. It is an introduction to the role of finance in the business world. Topics covered include the relationship between finance and accounting, careers in finance, basic financial analysis and planning techniques, financial ratios, profit, cash flow, and sources of business financing.

ACC 260 .................................................................................. 3 credits
Financial Reporting: Peeking Under the Financial Hood
In this course, students will study how to analyze financial statements and methods used to value companies. Financial reports help managers choose between business paths. They also help investors and analysts evaluate the financial health of companies. This course is a practical means of discovering how financial data are generated and their limitations; techniques for analyzing the flow of business funds; and methods for selecting and interpreting financial ratios. It also presents analytical tools for predicting and testing assumptions about a firm’s performance.

COM 150 ................................................................................. 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
**COM 220** ................................................................. 3 credits
**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammatical exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**MAT 219** ................................................................. 3 credits
**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**BIO 100** ................................................................. 4 credits
**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

**CHM 109** ................................................................. 3 credits
**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**HIS 135** ................................................................. 3 credits
**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

**ETH 125** ................................................................. 3 credits
**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

**CRT 205** ................................................................. 3 credits
**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**GEN 105** ................................................................. 3 credits
**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Concentration in Hospitality, Travel and Tourism (Minnesota/Arkansas)**

The following Associate of Arts/Concentration in Hospitality, Travel and Tourism (AAHTT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

**The Hospitality, Travel, and Tourism concentration provides content and practical application in an array of foodservice, lodging management, and tourism industry careers. The courses emphasize the leadership competencies and knowledge that provide the foundation of management practices valued in the hospitality arena. The Hospitality, Travel, and Tourism associate degree program is also planned to prepare the student for further study in hospitality or related programs at the undergraduate level. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at [http://www.phoenix.edu/programs/aahtt](http://www.phoenix.edu/programs/aahtt). Courses requiring prerequisites are identified by a ~ symbol following the course number.**
Concentration in Hospitality, Travel and Tourism - Track A and B

HTT 200 ~ ................................................................................ 3 credits
Hospitality: Food, Shelter and Fun Away from Home
HTT 210 ~ ................................................................................ 3 credits
Travel and Tourism: Work, Pleasure, Forever Enriching

Course Descriptions for the AAHTT

Hospitality: Food, Shelter, and Fun Away From Home
This course is an overview of the history, current trends, and general organizational structure of the hospitality industry. Additionally, the course covers topics such as recreational entertainment, economic impact of hospitality, and service standards. The course also gives students the opportunity to examine careers in tourism, foodservice, and lodging industries.

Travel & Tourism: For Work, For Pleasure, Forever Enriching
This course introduces the tourism industry and its major components such as the travel mart, surface travel, air travel, business travel, cruises, and recreation. It covers current issues in tourism and their effect on the hospitality industry as a whole including economic, political, and cultural forces, and quality of life impacts on host locals. Career opportunities within travel and tourism are also discussed.

Information Technology in Hospitality, Travel and Tourism: When Distribution Joins Automation
This course explores the impact of information and communications technology on the structure and operations of the hospitality, travel, and tourism industry. It covers topics dealing with the interaction between consumers, intermediaries, operatives, and management through rapidly changing technologies. Effects on service quality, productivity, efficiency, and profitability will be examined.

Finance for Hospitality Professionals: Bed & Balance Sheets
This course focuses on conceptual awareness and practice of financial management as it applies to hospitality, travel, and tourism industries. It covers the basics of accounting, budgets and budgeting systems, performance measures creation, and financial statement evaluation for the purpose of cost analysis and planning.

Food & Beverage Management: Eat, Drink, & Be Healthy
This course integrates the basic concept and practical skills related to foodservice operations, from the front office to the kitchen. It covers basic principles of purchasing and cost management of food and beverage, as well as menu planning, institutional food service, and quality control.

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
COM 220 ................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Exercises address common pitfalls, such as confused words, modifiers, parallel structure, and sentence variety.

MAT 219 ........................................................................... 3 credits
Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 ............................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100 ............................................................................. 4 credits
Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 ........................................................................... 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ............................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Foundations of Business (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Foundations of Business (AAFB) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Foundations of Business focuses on a variety of business essentials including economics, information systems, managerial ethics, financial accounting, business research and effective managerial communications. Students will explore business principles and learn to apply problem-solving strategies to real-life scenarios. In addition, students will also discuss the effects of culture and ethics in current global and domestic business environments.

(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for the AAFB

The degree requirements for this program are the following:

• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAFB

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:

254
The course must be comparable in content and credits to the University coursework, Regionally or nationally accredited coursework (C- or higher grade), University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training), National Testing Programs, and ACE evaluated Military credits.

The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.

All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAFB

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAFB

XECO 212 ............................................................................... 3 credits
Principles of Economics
This course introduces the fundamental theories of microeconomics and macroeconomics. The economic principles studied in this course apply to everyday life as students research an industry, debate issues with trade agreements, discuss the effects of a shift in labor supply and demand, and discuss the strengths and weaknesses of the Consumer Price Index calculation. In particular, students research an industry affected by the economy and perform an economic analysis of the chosen industry.

XBIS 219 ............................................................................... 3 credits
Business Information Systems
This course provides an overview of Business Information Systems. This includes a broad foundation for both technical and non-technical business professionals. Special emphasis is placed on how information is used by different types of businesses across different industries.

XMGT 216 ............................................................................... 3 credits
Organizational Ethics and Social Responsibility
This course provides a foundational perspective for socially responsible management practices in business. Special emphasis is placed on the inter-related nature of ethics, moral, legal, and social issues in managing individuals, groups, and the organization within a business environment.

XACC 280 ............................................................................... 3 credits
Financial Accounting Concepts and Principles
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on the enterprise. Financial information is examined from the perspective of effective management decision making with special emphasis on the planning and controlling responsibilities of practicing managers.

XBIS 219 ............................................................................... 3 credits
Essentials of Managerial Communication
This course introduces students to the foundations of communication in a business setting. Students are exposed to various topics related to interpersonal and group communication with an eye toward applications in an office or virtual office setting. Students will develop skills in various forms of written communication, including memos, emails, business letters, and reports. Communication ethics and cross-cultural communications are also explored. Upon completing the course, students will have an awareness of their personal communication style and be able to identify areas for further exploration of communication as a business skill.

COM 150 ............................................................................... 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
COM 220 .................................................................3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .................................................................3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

XMGT 230 ~ ..........................................................3 credits
Management Theory and Practice

XMGT 275 ~ ..........................................................3 credits
Business Communications and Critical Thinking

XBS 220 ~ .............................................................3 credits
Introduction to Computer Applications and Systems

XBCOM 275 ~ ........................................................3 credits
Business Communications and Critical Thinking

The following Associate of Arts/Concentration in Business Foundations (AABF) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Business Foundations focuses on a variety of business essentials including management theory and practice, information systems, financial accounting, critical thinking and effective managerial communications. Students will explore business principles and learn to apply problem solving strategies to real-life scenarios. In addition, students will also discuss the effects of culture and ethics in current global and domestic business environments.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Business Foundations - A Track and B Track

XBCOM 275 ~ ........................................................3 credits
Business Communications and Critical Thinking

XBS 220 ~ .............................................................3 credits
Introduction to Computer Applications and Systems

XMG 230 ~ ............................................................3 credits
Management Theory and Practice
Applicants must be at least 16 years of age at the time of application.

Additional Admission Requirements for AABF

Applicants who meet the following admission requirements will be considered for admission to the Axia College Associate Degree programs:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants (including re-entry students) attending the Puerto Rico campus must meet the English language proficiency requirement for admission.

General Education Requirements for the AABF

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(A Track must include: SCI 162)
(B Track must include: SCI 201 and ETH 125)
Must include: BIO 100 and CHM 109
The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Concentration 15 credits
All undergraduate students are required to complete the minimum general education credits required by their program version.

Degree Requirements for AABF

The degree requirements for this program are the following:

- Students transferring from Western International University to AXIA College of University of Phoenix or any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AABF

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - Axia College of the University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements and Course Waivers for the AABF
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AABF

XCOM 275 ~ ................................................................. 3 credits
Business Communications and Critical Thinking

This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organization's strategic direction.

XBIS 220~................................................................. 3 credits
Introduction to Computer Applications and Systems

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office™ tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

XMGT 230 ~ ................................................................. 3 credits
Management Theory and Practice

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

XACC 290 ~ ................................................................. 3 credits
Principles of Accounting I

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

XACC 291 ~ ................................................................. 3 credits
Principles of Accounting II

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

Associate of Arts/Concentration in Accounting Foundations (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Accounting Foundations (AAACCF) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts curriculum provides a foundation and overview within the academic disciplines of communication arts, social sciences, mathematics, life sciences, and the humanities. Instruction focuses on the development of student skills in writing, critical thinking, and information utilization, as well as foundational competencies in the selected discipline. The completion of an Associate of Arts degree represents an important milestone for many students as they pursue their educational goals.

The Associates of Arts in Accounting Foundations concentration focuses on the role of accounting in business strategy, accounting communications, accounting information systems, management, financial statements, and cost information. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Concentration 15 credits

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Degree Requirements for the AAACCF
- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum program grade point average (GPA) of 2.0.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAACCF
- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
Residency Requirements and Course Waivers for the AAACF

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAACF

XBCOM 230 ~ ................................................................. 3 credits

Business Communication for Accountants

This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, e-mails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

XACC 210 ~ ................................................................................. 3 credits

Accounting Information Systems

This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

The Bachelor of Science in Business

The following Bachelor of Science in Business (BSB) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking, and decision-making, finance, business law, management, marketing, organizational behavior, research and evaluation, and technology. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

### Business Capstone, 3 total credits

- BUS 475 ~ ................................................................. 3 credits
- Integrated Business Topics

Students must select one concentration in a particular area of study at the time of enrollment.

Students may also complete an additional concentration. Please contact your academic representative for more information.

### Accounting Concentration

The Accounting Concentration promotes identification with and orientation to the accounting profession and is designed to provide knowledge skills, and abilities necessary for a career in accounting. Core competencies in technology, critical thinking, and communication are emphasized throughout the curriculum. The program also utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. Students have broad exposure to varied business disciplines, including management, organizational behavior, economics, and finance, and learn how the general manager integrates these disciplines to meet the strategic goals of the organization.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-acc.

- ACC 349 ~ ................................................................. 3 credits

- Intermediate Financial Accounting III
- ACC 497 ~ ................................................................. 3 credits
- Advanced Topics in Accounting Research

The BSB/ACC may not educationally qualify graduates to sit for the CPA exam in some states. To the extent that a student intends to sit for the CPA examination, the student should consult with the applicable board of examiners in the state or states in which the individual intends to sit for the examination to determine the precise educational and other requirements, including the acceptability of the University’s BSB/ACC.

### Administration Concentration

The Business Administration concentration is designed for the working professional employed in a business or public organization. The major coursework emphasizes quantitative skills and is designed to enable graduates to deal effectively with an increasingly complex business environment. The administration concentration examines the areas of operations management, project management, economics, accounting, finance, and strategic management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-a.

- ACC 400 ~ ................................................................. 3 credits
- Accounting for Decision Making
- MGT 448 ~ ................................................................. 3 credits
- Global Business Strategies

Students must choose three of the following courses:

- ACC 340 ~ ................................................................. 3 credits
- Accounting Information Systems I
- BSA 375 ~ ................................................................. 3 credits
- Fundamentals of Business Systems Development
- EBUS 405 ~ ................................................................. 3 credits

- MGT 437 ~ ................................................................. 3 credits
- Project Management
- ETH 355 ~ ................................................................. 3 credits
- Understanding Ethics
- OI 370 ~ ................................................................. 3 credits
- Innovation for the 21st Century
- PHL 410 ~ ................................................................. 3 credits
- Classical Logic
Finance Concentration

The Finance Concentration emphasizes fundamental and advanced financial concepts, theories, and practices to promote well-informed financial decision making. The Finance Concentration allows students to examine the areas of finance for decision making, financial risk management, mergers, acquisitions, and corporate restructuring, investment analysis and portfolio management, and global finance. Students will integrate advanced topics in financial management through real-world business application. Financial managers need many different skills. Interpersonal skills are important because these jobs involve managing people and working as part of a team to solve problems. Financial managers must have excellent communication skills to explain complex financial data. Since financial managers work extensively with various departments in their firm, a broad understanding of business is essential. Financial managers should be creative thinkers and problem-solvers, applying their analytical skills to business. They must be comfortable with the latest computer technology. Financial managers must have knowledge of international finance because financial operations are increasingly being affected by the global economy.

Global Management Concentration

The Global Business concentration emphasizes fundamental principles and practices of conducting global business activities. Components include: international marketing, international trade and investment, global finance, global human resource management, and global value-chain management. Students will integrate advanced topics in global business through real-life applications. The program promotes the development of a "global mindset" and reflects the dynamic nature of global business realities.

Students must choose three of the following courses:  
BUS 327 ~ .................................................................3 credits  
The Sustainable Organization  
BUS 372 ~ .................................................................3 credits  
Business Sustainability Standards  
ECO 370 ~ .................................................................3 credits  
Environmental Economics  
MGT 380 ~ .................................................................3 credits  
Organizational Change Management  
MGT 403 ~ .................................................................3 credits  
Environmental Management Systems
Human Resource Management Concentration

The Human Resource Management Concentration helps students develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The concentration addresses the legal and ethical components of the decision making process involved in the human resources environment. The Human Resource Management Concentration introduces students to the basic concepts of human resource management, and allows further study in the areas of employment law, risk management, recruitment and selection of employees, international HR, change management, compensation and benefits, employee development, and performance management. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

Students must choose three of the following courses:

- HRM 300 ~ Fundamentals of Human Resource Management
- HRM 324 ~ Total Compensation
- HRM 326 ~ Employee Development
- HRM 420 ~ Human Resource Risk Management
- MKT 411 ~ Marketing
- MGT 441 ~ Business Models in Early-stage Enterprises
- MGT 442 ~ Market Discovery and Validation in Early-stage Enterprises
- BUS 443 ~ Implementing Entrepreneurship in Early-stage Enterprises

Management Concentration

The Management Concentration emphasizes managing human and fiscal resources within the structure, culture, and missions of any organization. The Management Concentration allows students the opportunity to examine the areas of innovation, design, and creativity in business, global business, quality management and productivity, human resource management, employment law, and organizational negotiations. Students will integrate advanced topics in management through real-world business application.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-m.

Students must choose three of the following courses:

- HRM 300 ~ Fundamentals of Human Resource Management
- HRM 324 ~ Total Compensation
- HRM 326 ~ Employee Development
- HRM 498 ~ Strategic Management

- HRM 498 ~ Strategic Management

Management Concentration
Marketing Concentration

The Marketing Concentration addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The concentration builds upon the foundational marketing course, which allows further study in the areas of consumer behavior, advertising, marketing research, public relations, promotion measurement and analysis, and international and global marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

MKT 435 ~ .................................................................3 credits
Consumer Behavior

MKT 498 ~ .................................................................3 credits
Integrated Marketing Strategies

Students must choose three of the following courses:

COM 340 ~ .................................................................3 credits
Mass Communication

COM 400 ~ .................................................................3 credits
Media and Society

MKT 438 ~ .................................................................3 credits
Public Relations

Project Management Concentration

The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-pm.

BPA 303 ~ ........................................................................3 credits
Public Programs: Implementation and Evaluation in a Dynamic Environment

BPA 406 ~ ........................................................................3 credits
The Public Leader: Integration and Application

Students must choose three of the following courses:

BPA 301 ~ ........................................................................3 credits
Foundations of Public Administration

HRM 330 ~ ........................................................................3 credits
Human Resources and Labor Relations in Public Service

FIN 380 ~ ........................................................................3 credits
Financial Management of Non-Profit Organizations

ACC 460 ~ ........................................................................3 credits
Government and Non-Profit Accounting

MKT 438 ~ ........................................................................3 credits
Public Relations

Small Business Management & Entrepreneurship Concentration

The Small Business Management concentration provides students with a course framework built around small business planning, financial management, and integrated business topics on entrepreneurship and small business management. Within the concentration, students can elect to study advanced concepts in small business marketing, leadership, family business management, operations management, and business law for entrepreneurs. They may also elect to explore in more depth either small business management or entrepreneurship studies as a function of their concentration electives. Students graduating with the Small Business Management concentration will be prepared to address the challenges and opportunities specific to small business management and entrepreneurship.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sbe.

MGT 401 ~ .................................................................3 credits
The Small Business: Structure, Planning and Funding

Small Business and Entrepreneurial Planning
**Service Sector Concentration**

The Service Sector concentration focuses the student on the service environment. The program emphasizes skill development in strategic management, marketing, supply management, product and brand management, service operations, merchandising, and personnel management unique to the service industry, which includes retail, hospitality, lodging, restaurant, and gaming management. Upon completion of this program students will possess the knowledge and skills necessary to be leaders in the service industry.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-svc.

**Students must choose three of the following courses:**

- BRM 353 ~ ................................................................. 3 credits
- Product and Brand Management
- MGT 356 ~ ................................................................. 3 credits
- Retail Personnel Management
- HM 322 ~ ................................................................. 3 credits
- Gaming Management
- HM 370~ ................................................................. 3 credits
- Hospitality Management
- HM 486 ~ ................................................................. 3 credits
- Trends and Emerging Issues in Hospitality
- ISCOM 354 ~ ........................................................... 3 credits
- Retail Operations: Supply Management
- MGT 371 ~ ................................................................. 3 credits
- Lodging Management
- MGT 372 ~ ................................................................. 3 credits
- Food and Beverage Management
- MGT 373 ~ ................................................................. 3 credits
- Events and Recreation Management

**Environmental Sustainability Concentration**

This Environmental Sustainability concentration provides an overview of current and historical environmental issues and explores the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of action for environmental management. This concentration is comprised of five categories: energy, business, agriculture, architecture and green materials, and sustainable ecosystems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sus.

**Students must choose one of the following courses:**

- SUS 370 ~ ................................................................. 3 credits
- Sustainable Ecosystems
- SUS 380 ~ ................................................................. 3 credits
- Sustainable Planning and Land Use
- SUS 385 ~ ................................................................. 3 credits
- Sustainable Ocean Use

The University reserves the right to modify the required course of study. Please note that within each state, concentration availability may vary by campus location.

**Additional Admission Requirements BSB**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution's student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**Degree Requirements for the BSB**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- The diploma awarded for this program will read as: Bachelor of Science in Business and will not reflect the concentration. Concentrations are reflected on the transcript only.
General Education Requirements for the BSB

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
A Track must include: COMM 215, equivalent or higher
B Track must include: COM 170 and COM 172
Puerto Rico students may not use conversational English to satisfy Communication Arts.

Oregon campus students, enrolled in the A Track, must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus. B Track students will meet this requirement by completing COM 170 and COM 172.

Mathematics Requirement(s) 6 credits
Must include MTH 209 or higher

Science & Technology Requirement(s) 6 credits
B Track must include: SCI 163
Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement(s) 6 credits
B Track must include: HUM 114

Social Science Requirement(s) 6 credits
B Track must include: PSY 211
Nevada students must complete three (3) credits in Nevada Constitution

Additional Liberal Arts Requirement(s) 6 credits
Puerto Rico students must complete 6 credits of Spanish. Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish 1 or higher will satisfy the Spanish requirement.

Interdisciplinary Requirement(s) 18 credits
B Track must include: FP 120
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSB for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
A Track must include: COMM 215 or higher
B Track must include: COM 170 and COM 172

Mathematics Requirement(s) 6 credits
Must include MTH 220

Science & Technology Requirement(s) 9 credits
B Track must include: SCI 163
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
B Track must include: HUM 114

Social Science Requirement(s) 9 credits
B Track must include: PSY 211
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits
Interdisciplinary Requirement(s) 9 credits
B Track must include: FP 120
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.
Academic Progression Requirements for the BSB

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSB

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study.

Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: ACC 497, BCOM 275, BPA 406, BUS 475, CPMGT 305, FIN 486, GBM 489, GEN 195, GEN 200, HRM 498, MGT 420, MGT 465, MGT 470, MGT 488, MGT 498, MKT 498, OI 466, SUS 300
Course Descriptions for the BSB

GEN 200 ...................................................................................3 credits
Foundations of General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 195 ...................................................................................3 credits
Foundations of University Studies
The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. Practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

BCOM 275 ................................................................................3 credits
Business Communications and Critical Thinking
This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

BIS 220 ...................................................................................3 credits
Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including work processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

MGT 230 ...................................................................................3 credits
Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

MGT 311 ...................................................................................3 credits
Organizational Development
This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

ACC 290 ...................................................................................3 credits
Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291 ...................................................................................3 credits
Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

ETH 316 ...................................................................................3 credits
Ethics and Social Responsibility
This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

ECO 372 ...................................................................................3 credits
Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ECO 365 ...................................................................................3 credits
Principles of Macroeconomics
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

LAW 421 ...................................................................................3 credits
Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

FIN 370 ...................................................................................3 credits
Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
MKT 421 ................................................................. 3 credits
Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.
RES 351 .............................................................. 3 credits
Business Research
This course evaluates the process of conducting business research for improving decision making within an organization. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.
QNT 351 ............................................................... 3 credits
Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.
BUS 475 ............................................................ 3 credits
Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
COMM 215 ....................................................... 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 200 ............................................................ 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 101 ............................................................ 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 ............................................................ 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.
MTH 209 ........................................................... 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.
MTH 220 ........................................................... 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
CHM 110 ............................................................ 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
PHY 101 ................................................................. 3 credits

Fundamentals of Physics

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

The American Experience Since 1945

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying a historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

State and Local Political Processes

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Accounting Concentration

ACC 349 ................................................................. 3 credits

Intermediate Financial Accounting I

This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.

ACC 421 ................................................................. 3 credits

Intermediate Financial Accounting II

This course is the second of the three part series of courses related to intermediate accounting. This course introduces cost terminology and flows, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

ACC 422 ................................................................. 3 credits

Intermediate Financial Accounting III

This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner’s equity, investments, income taxes, pensions and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Interwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 400 ................................................................. 3 credits

Cost Accounting

This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

ACC 340 ................................................................. 3 credits

Advanced Topics in Accounting Research

This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

ACC 497 ................................................................. 3 credits

Accounting Information Systems I

This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.

BSA 375 ................................................................. 3 credits

Fundamentals of Business Systems Development

This course introduces the logical and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. Systems Development Life Cycle (SDLC) will be fundamental to the course.

EBUS 405 ................................................................. 3 credits

e-Business Technologies

This course examines the Internet and provides an integration of information technology subjects. Topics include the facilities, services, and trends of the Internet. The functions of information technology that support e-business are emphasized.
ISCOM 472..................................................................................... 3 credits

Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

MKT 441..................................................................................... 3 credits

Marketing Research
This course covers basic research methodology applied to marketing issues. Students study methods and techniques for collection, analysis, and interpretation of primary and secondary data for customer and business marketing.

MGT 437..................................................................................... 3 credits

Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work, planning, control, and evaluation for project success.

ETH 355..................................................................................... 3 credits

Understanding Ethics
This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g. cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).

OI 370 ..................................................................................... 3 credits

Innovation for the 21st Century
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

PHL 410..................................................................................... 3 credits

Classical Logic
This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.

Course Descriptions for the Finance Concentration

FIN 419..................................................................................... 3 credits

Finance for Decision Making
This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

FIN 466..................................................................................... 3 credits

Financial Institutions
This course will cover financial institutions such as insurance companies, commercial banks, investment banks and savings and loan associations. The risks facing financial institutions and how to measure and manage these risks are analyzed.

FIN 366..................................................................................... 3 credits

Financial Management in the Small Business
This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

FIN 402..................................................................................... 3 credits

Investment Fundamentals and Portfolio Management
This course covers the theories and practices of investments including financial markets, risk and return, securities, asset allocation and diversification. Students will utilize analytical techniques available in the investment planning and selection process in the environment in which investment decisions are made. Students will apply finance models and investment strategies to analyze and manage investments for various types of organizations.

FIN 410..................................................................................... 3 credits

Working Capital Management
Working Capital Management This course covers the basics of working capital management with emphasis on how firms manage current assets and liabilities to ensure the organization has sufficient cash to pay day-to-day bills and meet short-term obligations. The balance between risk and return is emphasized. Some of the basic techniques of financial forecasting, accounts receivable and inventory management will also be explored.

FIN 415..................................................................................... 3 credits

Corporate Risk Management
This course will provide students with the elements of corporate risk management in a competitive business environment. Emphasis will be placed upon the identification, measurement, management, and planning aspects of risk management, as well as trends and developments in the business environment. Insurance considerations in corporate risk management will also be addressed. Students will utilize newly acquired knowledge and techniques to develop a corporate risk management plan that will maximize value for the organization and stakeholders.

FIN 420..................................................................................... 3 credits

Personal Finance
This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on investment risk and returns, markets, and analysis tools useful in assessing financial situations.

FIN 444..................................................................................... 3 credits

Mergers, Acquisitions, and Corporate Restructuring
This course prepares students to analyze merger and acquisition (M&A) opportunities in ways that will maximize corporate value and shareholder wealth in a competitive market environment. Special emphasis is placed on the identification, screening, selection, evaluation, and financing of M&A activities. Additionally, the course examines business failures and restructuring strategies.
FIN 467 .................................................................3 credits

Real Estate Investment
This course explores the techniques of real estate investment analysis, including financing, taxes, and decision making criteria in today’s real estate investment environment.

Course Descriptions for the Global Management Concentration

GBM 380 .................................................................3 credits

Global Business
This course addresses major forces in the global environment and the impact upon business strategies, operations, and decision making. Special emphasis is placed on developing a global mindset and the intricacies of the global business environment.

GBM 381 .................................................................3 credits

International Trade
This course examines the concepts and components of international trade. Emphasis is placed on applying current theories, concepts, and practices in conducting global business transactions.

HRM 350 ........................................................................3 credits

International Human Resource Management
This course is an overview of international human resources management practices with emphasis on human resources challenges and opportunities facing global business enterprises. Students will examine human resources management in the global business environment. Upon completion of this course, students will be able to identify, and evaluate global HR strategies and practices to increase organizational effectiveness and efficiency.

ISCOM 383 ........................................................................3 credits

Global Value Chain Management
This course describes value chain activities between buyers and sellers in international business. Emphasis is placed on global sourcing, procurement of materials and services, and on business-to-business cultural differences between countries.

GBM 489 ........................................................................3 credits

Strategic Topics in Global Business Management
This course applies the principles of international trade, global monetary systems, international organizations, and economic development to make effective strategic business decisions. Emphasis is placed on utilizing improved strategic thinking and decision-making capabilities in the global environment.

Course Descriptions for the Sustainable Enterprise Management Concentration

MGT 360 ........................................................................3 credits

Green and Sustainable Enterprise Management
This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.

MGT 470 ........................................................................3 credits

Sustainable Enterprise Planning
This course provides an integrative discussion on sustainable enterprise planning. Special emphasis is placed on applying environmental science, systems analysis, environmental economics, resource allocation, and the regulatory environment to developing a sustainable business plan for the future.

BUS 327 ........................................................................3 credits

The Sustainable Organization
This course focuses on the business practices and tools that add economic, social, and ethical value to the business resources of a sustainable enterprise. Emphasis is placed on the general science of sustainability, consumptive calculations of manufacturing, and the impact of business decisions on the environment.

BUS 372 ........................................................................3 credits

Business Sustainability Standards
This course provides a regulatory and compliance overview the local, state, and federal business sustainability standards. Special emphasis is placed on ISO requirements, LEED certification, and emerging sustainability standards for business. Students will also address compliance as a competitive advantage and the ethical responsibility of businesses to employees, the community, and the environment.

ECO 370 ........................................................................3 credits

Environmental Economics
This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

MGT 380 ........................................................................3 credits

Organizational Change Management
This course prepares students to be effective agents for change in the business community. This includes a step-wise framework for understanding, designing, and implementing change successfully. Special emphasis is placed on organizational change, program design, change processes, and successfully implementing both short-term and long-term change within the organization.

MGT 403 ........................................................................3 credits

Environmental Management Systems
This course provides a framework for managing Environmental Management Systems (EMS). This includes continuous improvement through environmental management; facilities and supply chain management; systems integration; environmental considerations; and operational utilization of environmental management systems.

MKT 411 ........................................................................3 credits

Green Marketing
This course applies the principles of sustainability and the philosophy of being environmentally green to the area of marketing. Special emphasis is placed on sustainable product design; awareness and cause marketing; public relations and green-washing; and emerging going-green marketing trends.

MKT 441 ........................................................................3 credits

Business Models in Early-stage Enterprises
This course provides an overview of business models for early-stage entrepreneurial ventures in all industries, including those in green industries and clean technology. Emphasis is placed on designing a competitive early-stage enterprise business model, the competing interests of stakeholders, the use of triple bottom line measures to guide enterprise design, forms of ownership, intellectual property, and exploring financing options—both private and public.
**Change Management**
This course examines both the human and organizational aspects of change. Topics include identifying the types and sources of change, human and organizational resistance to change, theories of managing change, and developing skills that will enable the student to lead, implement, and sustain change.

**MKT 442**...............................................................3 credits

**Market Discovery and Validation in Early-stage Enterprises**
This course applies entrepreneurial approaches to the discovery and validation of markets in all industries for early-stage entrepreneurial ventures, including those in green Industries and clean technology. Emphasis is placed on iterative approaches for product design; validation of customer needs in an early-stage entrepreneurial setting; and early-stage enterprise marketing needs and trends.

**BUS 443**...............................................................3 credits

**Implementing Entrepreneurship in Early-stage Enterprises**
This course focuses on the implementation of lean business models in entrepreneurial ventures in all industries, including those in green industries and clean technology. This includes the strategic application of financial planning, capital management, marketing, people management, and leadership as a means to reduce start-up risk. Emphasis is placed on adapting the business plan to the realistic needs of an early-stage owner and entrepreneur.

**Course Descriptions for the Human Resource Management Concentration**

**HRM 300**...............................................................3 credits

**Fundamentals of Human Resource Management**
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

**HRM 498**...............................................................3 credits

**Strategic Human Resource Management and Emerging Issues**
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

**HRM 310**...............................................................3 credits

**Change Management**
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

**HRM 324**...............................................................3 credits

**Total Compensation**
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

**HRM 326**...............................................................3 credits

**Employee Development**
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

**HRM 420**...............................................................3 credits

**Human Resource Risk Management**
This course introduces students to risk management in a human resource department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

**MGT 434**...............................................................3 credits

**Employment Law**
This course provides an overview of federal statutes and state-regulated areas that impact the personnel function. Among the topics addressed are EEO and affirmative action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraph testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

**Course Descriptions for the Management Concentration**

**PHL 458**...............................................................3 credits

**Creative Minds and Critical Thinking**
In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

**MGT 498**...............................................................3 credits

**Strategic Management**
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.
HRM 300  ....................................................................................3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 326  ....................................................................................3 credits
Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

LDR 300  ....................................................................................3 credits
Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 360  ....................................................................................3 credits
Green and Sustainable Enterprise Management
This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.

MGT 411  ....................................................................................3 credits
Innovative and Creative Business Thinking
This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and practice and draw upon examples from multiple industry sectors.

MKT 435  ....................................................................................3 credits
Consumer Behavior
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 498  ....................................................................................3 credits
Integrated Marketing Strategies
This course provides students with an in-depth study of Integrated Marketing Communications (IMC). Emphasis will be placed on the strategic roles and integration of marketing communication elements including advertising, public relations, sales promotion, event management, media selection, and sales management.

COM 340  ....................................................................................3 credits
Mass Communication
This course delves into the processes and technology of communication on societal and global levels accomplished through the print and electronic media. Content of communication studied ranges from journalism, entertainment, commerce, and advocacy to personal communication on the Internet. The dynamic changes that have taken place and are evolving today in mass media and mass communication will be considered along with predictions about the role of mass communication.
COM 400........................................................................................................... 3 credits

Media and Society

The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.

MKT 438........................................................................................................... 3 credits

Public Relations

This course provides an introduction to the field of public relations. Areas covered are media relations; promotion; tools used in developing public relations and publicity, and improving customer satisfaction; relationship-building strategies; and ethics and public relations.

Course Descriptions for the Project Management Concentration

CPMGT 300........................................................................................................... 3 credits

Project Management

This course examines project management roles and environments, the project life cycle, and various techniques of work planning, control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

CPMGT 301........................................................................................................... 3 credits

Strategic Portfolio and Project Management

This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

CPMGT 302........................................................................................................... 3 credits

Procurement and Risk Management

This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

CPMGT 303........................................................................................................... 3 credits

Project Estimating and Control Techniques

To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

CPMT 305........................................................................................................... 3 credits

Project Management Capstone

This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in the prior five courses will be integrated and applied to the class project.

Course Descriptions for the Public Sector Concentration

BPA 303........................................................................................................... 3 credits

Public Programs: Implementation and Evaluation in a Dynamic Environment

This course focuses on the implementation of public policy decisions through the identification and development of specific methods for servicing the public good. It incorporates an emphasis on intergovernmental relations and the increasing use of private resources in the service delivery system. A strong emphasis is placed on evaluating both the delivery processes and service outcomes as a means to continuously improve service delivery effectiveness.

BPA 406........................................................................................................... 3 credits

The Public Leader: Integration and Application

This course is intended to synthesize the concepts and theories covered in previous public administration courses and deepen the student’s understanding of the challenges and complexities facing and public leader. Student will explore the leadership styles of successful national, state, and local leaders to integrate and apply the principles and practices of public administration in a real world setting.

BPA 301........................................................................................................... 3 credits

Foundations of Public Administration

This course serves as an introduction to the study of public administration. During this course, the student will review the political and social theories of public administration. Students will review leadership, human resources, finance, and ethics within a public policy-making environment. Students will become familiar with the complex issues facing local, state, and federal public administrators today.

HRM 330........................................................................................................... 3 credits

Human Resources and Labor Relations in Public Service

This course explores the changing civil service system within the rich, varied and pluralistic public service of today. Course topics will include recruiting, staffing, employee retention, performance management, compensation, benefits, and promotion. Labor relations, with and without a collective bargaining agreement will be studied. Students will study the resolution of disagreements using alternative dispute resolution systems designed to advance the public purpose.

FIN 380........................................................................................................... 3 credits

Financial Management of Non-Profit Organizations

Financial Management of Non-Profit Organizations This course emphasizes the utilization of key financial concepts to effectively obtain desired goals and objectives by non-profit organizations in the private, public, and the international arenas. While profit-oriented entities focus on maximizing shareholder’s wealth, non-profit organizations are concerned with deriving maximum benefit for each dollar expended on a charitable endeavor. The centrality of finance to achieve such goal will be thoroughly explored.

ACC 460........................................................................................................... 3 credits

Government and Non-Profit Accounting

This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.
Course Descriptions for the Small Business Management & Entrepreneurship Concentration

**MKT 438** ................................................................. 3 credits
Public Relations
This course provides an introduction to the field of public relations. Areas covered are media relations; promotion; tools used in developing public relations and publicity, and improving customer satisfaction; relationship-building strategies; and ethics and public relations.

**Course Descriptions for the Small Business Management & Entrepreneurship Concentration**

**MGT 401** ................................................................. 3 credits
The Small Business: Structure, Planning and Funding
This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

**MGT 418** ................................................................. 3 credits
Evaluating New Business Opportunities
This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

**FIN 375** ................................................................. 3 credits
Financial Management in the Small Business
This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

**MKT 415** ................................................................. 3 credits
Small Business Marketing
Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.

**MGT 451** ................................................................. 3 credits
Small Business and Entrepreneur Planning
This course focuses on the development of a strategic business plan applicable for the needs of a small business or entrepreneurial venture. This will include the strategic and integrative application of financial planning, capital management, marketing, people management, and leadership. Special emphasis is placed on adapting business planning requirements to the realistic needs of small business owners and entrepreneurs.

**Course Descriptions for the Service Sector Concentration**

**OIE 365** ................................................................. 3 credits
Knowledge Management and Intellectual Capital
In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today's increasingly innovative and global business environment. Students will be asked to consider a variety of topics critical to an organization's long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational partnerships, and organizational culture.

**OIE 466** ................................................................. 3 credits
Organizational Innovation Integrated Project
This project-based course integrates knowledge and skills from previous organizational innovation coursework and requires business students to demonstrate their innovative, creative, and inspirational capacity to solve a real life business problem or opportunity. Using design principles, practices, and theory, students will be asked to create innovative solutions to problems or opportunities in the areas of strategy, process, product, and service.

**BRM 355** ................................................................. 3 credits
Product Brand Management
This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

**MGT 356** ................................................................. 3 credits
Retail Personnel Management
This course focuses on the personnel management aspects of retail management. Students will be prepared to utilize recruiting and staffing, motivating, training, and ethics concepts to effectively lead retail personnel.

**HM 322** ................................................................. 3 credits
Gaming Management
This course provides an overview of the business practices and principles unique to the gaming industry. This includes an overview of the history and evolution of gaming, different venues, and the business implications of the economic and social impact of the industry. Special emphasis is placed on legal, ethical, and social issues related to gaming entertainment as a business entity.

**HM 370** ................................................................. 3 credits
Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

**HM 486** ................................................................. 3 credits
Trends and Emerging Issues in Hospitality
This course applies a strategic perspective to assessing new trends and emerging issues in hospitality management. Special emphasis is placed on applying a global perspective to new and emerging markets in the hospitality industry. This includes consideration of changing social and economic groups as well as shifting demand for existing and new products and services.

**ISCOM 354** ............................................................. 3 credits
Retail Operations: Supply Management
This course encompasses an examination of the supply side of the retail value chain including logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.

**MGT 371** ................................................................. 3 credits
Lodging Management
This course provides students with the opportunity to examine various lodging options within the hospitality industry from a managerial perspective. Special emphasis will be placed on guest services and on room division management.
MGT 372 .................................................................................... 3 credits
Food and Beverage Management
This course focuses on operating and strategic challenges facing managers in the food and beverage industry. Topics include cost control, forecasting, food safety, service standards, and staffing. Students will learn to utilize managerial tools to make sound business decisions in a food and beverage organization.

Course Descriptions for the Environmental Sustainability Concentration
SUS 300 .................................................................................... 3 credits
Environmental Sustainability
Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.
ENV 340 ................................................................................... 3 credits
Energy and the Environment
This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.
SUS 310 .................................................................................... 3 credits
Industrial Ecology
This course introduces students to the field of industrial ecology. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.
SUS 350 .................................................................................... 3 credits
Green Building and Urban Planning
This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.

Students must choose one of the following courses:
SUS 370 .................................................................................... 3 credits
Sustainable Ecosystems
In this course, students evaluate the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and manage habitats and populations.
SUS 380 .................................................................................... 3 credits
Sustainable Planning and Land Use
In this course, students evaluate strategies that lead to the promotion of sustainable development, planning, and land use. Students develop a sustainable land use plan for natural and human-dominated landscapes and its impact on socioeconomic issues. Upon completion of the course, students are able to apply management strategies and relevant land use practices to achieve sustainability.

SUS 385 .................................................................................... 3 credits
Sustainable Ocean Use
In this course, students evaluate the principles of sustainable ocean use. Students analyze the environmental and economic role of the oceans. The sources and impact of ocean environmental degradation are examined. Topics include fisheries, aquaculture, natural resources and uses, and pollution. Sustainable management practices are analyzed by examining global environmental policies and regulations.

The Bachelor of Science in Business (Maryland-Online)

The following Bachelor of Science in Business (BSB) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking and decision-making, finance, business law, management, marketing, organizational behavior, research and evaluation, and technology. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSB Program Category Requirements - A Track and B Track

Introductory Course, 3 total credits
GEN 200(For A Track only) .................................................. 3 credits
Foundations for General Education and Professional Success
GEN 195 (For B Track only) .................................................. 3 credits
Foundations of University Studies

Communications, 3 total credits
BCOM 275 ~ ............................................................................ 3 credits
Business Communications and Critical Thinking

Business Information Systems, 3 total credits
BIS 220 ~ ............................................................................. 3 credits
Introduction to Computer Applications and Systems
Management, 6 total credits

Business Capstone, 3 total credits
BUS 475~.................................................................3 credits
Integrated Business Topics

Students must select one emphasis in a particular area of study at the time of enrollment.
Students may also complete an additional emphasis. Please contact your academic representative for more information.

Accounting Emphasis

The Accounting Emphasis promotes identification with and orientation to the accounting profession and is designed to provide knowledge skills, and abilities necessary for a career in accounting. Core competencies in technology, critical thinking, and communication are emphasized throughout the curriculum. The program also utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. Students have broad exposure to varied business disciplines, including management, organizational behavior, economics, and finance, and learn how the general manager integrates these disciplines to meet the strategic goals of the organization.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-acc.

ACC 349 ~.................................................................3 credits
Cost Accounting

Intermediate Financial Accounting I
ACC 421 ~.................................................................3 credits
Intermediate Financial Accounting II
ACC 422 ~.................................................................3 credits
Intermediate Financial Accounting III
ACC 423 ~.................................................................3 credits
Advanced Topics in Accounting Research

The BSB/ACC may not educationally qualify graduates to sit for the CPA exam in some states. To the extent that a student intends to sit for the CPA examination, the student should consult with the applicable board of examiners in the state or states in which the individual intends to sit for the examination to determine the precise educational and other requirements, including the acceptability of the University’s BSB/ACC.

Administration Emphasis

The Business Administration emphasis is designed for the working professional employed in a business or public organization. The major coursework emphasizes quantitative skills and is designed to enable graduates to deal effectively with an increasingly complex business environment. The administration emphasis examines the areas of operations management, project management, economics, accounting, finance, and strategic management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-a.

ACC 400 ~.................................................................3 credits
Accounting for Decision Making
MGT 448 ~.................................................................3 credits
Global Business Strategies

Students must choose three of the following courses:

ACC 340 ~.................................................................3 credits
Accounting Information Systems I
BSA 375 ~.................................................................3 credits
Fundamentals of Business Systems Development

ETH 355 ~.................................................................3 credits
Understanding Ethics
OI 370 ~.................................................................3 credits
Innovation for the 21st Century
PHL 410 ~.................................................................3 credits
Classical Logic
Finance Emphasis

The Finance Emphasis emphasizes fundamental and advanced financial concepts, theories, and practices to promote well-informed financial decision making. The Finance Emphasis allows students to examine the areas of finance for decision making, financial risk management, mergers, acquisitions, and corporate restructuring, investment analysis and portfolio management, and global finance. Students will integrate advanced topics in financial management through real-world business application. Financial managers need many different skills. Interpersonal skills are important because these jobs involve managing people and working as part of a team to solve problems. Financial managers must have excellent communication skills to explain complex financial data. Since financial managers work extensively with various departments in their firm, a broad understanding of business is essential. Financial managers should be creative thinkers and problem-solvers, applying their analytical skills to business. They must be comfortable with the latest computer technology. Financial managers must have knowledge of international finance because financial operations are increasingly being affected by the global economy.

Global Management Emphasis

The Global Business emphasis emphasizes fundamental principles and practices of conducting global business activities. Components include: international marketing, international trade and investment, global finance, global human resource management, and global value-chain management. Students will integrate advanced topics in global business through real-life applications. The program promotes the development of a “global mindset” and reflects the dynamic nature of global business realities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-gm.

Implementing Entrepreneurship in Early-stage Enterprises
Human Resource Management Emphasis

The Human Resource Management Emphasis helps students develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The emphasis addresses the legal and ethical components of the decision making process involved in the human resources environment. The Human Resource Management Emphasis introduces students to the basic concepts of human resource management, and allows further study in the areas of employment law, risk management, recruitment and selection of employees, international HR, change management, compensation and benefits, employee development, and performance management. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

HRM 300 ~ .................................................................3 credits
Fundamentals of Human Resource Management

HRM 498 ~ .................................................................3 credits
Strategic Human Resource Management and Emerging Issues

Students must choose three of the following courses:

HRM 310 ~ .................................................................3 credits
Change Management

HRM 324 ~ .................................................................3 credits
Total Compensation

HRM 326 ~ .................................................................3 credits
Employee Development

HRM 420 ~ .................................................................3 credits
Human Resource Risk Management

MGT 434 ~ .................................................................3 credits
Employment Law

Management Emphasis

The Management Emphasis emphasizes managing human and fiscal resources within the structure, culture, and missions of any organization. The Management Emphasis allows students the opportunity to examine the areas of innovation, design, and creativity in business, global business, quality management and productivity, human resource management, employment law, and organizational negotiations. Students will integrate advanced topics in management through real-world business application.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-m.

Marketing Emphasis

The Marketing Emphasis addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The marketing emphasis builds upon the foundational marketing course, which allows further study in the areas of consumer behavior, advertising, marketing research, public relations, promotion measurement and analysis, and international and global marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-mkt.

Small Business and Entrepreneurial Planning

Service Sector Emphasis

The Service Sector emphasis focuses the student on the service environment. The program emphasizes skill development in strategic management, marketing, supply management, product and brand management, service operations, merchandising, and personnel management unique to the service industry, which includes retail, hospitality, lodging, restaurant, and gaming management. Upon completion of this program students will possess the knowledge and skills necessary to be leaders in the service industry.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-svc.

OL 365 ~ ................................................................. 3 credits
Knowledge Management and Intellectual Capital

OL 466 ~ ................................................................. 3 credits
Organizational Innovation Integrated Project

Students must choose three of the following courses:

BRM 353 ~ ................................................................. 3 credits
Product and Brand Management

MGT 356 ~ ................................................................. 3 credits
Retail Personnel Management

HM 322 ~ ................................................................. 3 credits
Gaming Management

HM 370~ ................................................................. 3 credits
Hospitality Management

HM 486 ~ ................................................................. 3 credits
Trends and Emerging Issues in Hospitality
Students must choose one of the following courses:

- Green Building and Urban Planning
  - SUS 350 ~ .................................................................................3 credits
- Industrial Ecology
  - SUS 310 ~ .................................................................................3 credits
- Energy and the Environment
- Environmental Sustainability
- Sustainable Ecosystems
- Sustainable Planning and Land Use
- Sustainable Ocean Use

Additional Admission Requirements BSB

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants must be currently employed or have access to a work environment.

Degree Requirements for the BSB

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
  - The diploma awarded for this program will read as: Bachelor of Science in Business and will not reflect the emphasis. Emphases are reflected on the transcript only.

General Education Requirements for the BSB

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
- A Track must include: COMM 215, equivalent or higher
- B Track must include: COM 170 and COM 172

Mathematics Requirement(s) 6 credits
- Must include MTH 209 or higher

Science & Technology Requirement(s) 6 credits
- Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement(s) 6 credits
- B Track must include: HUM 114

Social Science Requirement(s) 6 credits
- B Track must include: PSY 211

Additional Liberal Arts Requirement(s) 6 credits

Interdisciplinary Requirement(s) 18 credits
- B Track must include: FP 120

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSB

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in credit to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

Events and Recreation Management
- The University reserves the right to modify the required course of study. Please note that within each state, emphasis availability may vary by campus location.

Environmental Sustainability Emphasis

This Environmental Sustainability emphasis provides an overview of sustainable practices and applications from the environmental science perspective. Current and historical environmental issues are evaluated by examining the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of action for environmental management. This emphasis is comprised of five categories: energy, business, agriculture, architecture and green materials, and sustainable ecosystems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sus.

- SUS 300 ~ .................................................................3 credits
- Environmental Sustainability
- ENV 340 ~ .............................................................3 credits
- Energy and the Environment
- SUS 310 ~ .................................................................3 credits
- Industrial Ecology
- SUS 350 ~ .................................................................3 credits
- Green Building and Urban Planning

Students must choose one of the following courses:

- SUS 370 ~ .................................................................3 credits
- Sustainable Ecosystems
- SUS 380 ~ .................................................................3 credits
- Sustainable Planning and Land Use
- SUS 385 ~ .................................................................3 credits
- Sustainable Ocean Use

The University reserves the right to modify the required course of study. Please note that within each state, emphasis availability may vary by campus location.

General Education, elective, or emphasis courses.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Residency Requirements and Course Waivers for the BSB**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited transferable coursework.

• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.

• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.

• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: ACC 497, BCOM 275, BPA 406, BUS 475, CPMGT 305, FIN 486, GBM 489, GEN 195, GEN 200, HRM 498, MGT 420, MGT 465, MGT 470, MGT 488, MGT 498, MKT 498, OI 466, SUS 300

**Course Descriptions for the BSB**

GEN 200 ................................................................. 3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 195 ................................................................. 3 credits

**Foundations of University Studies**

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

BCOM 275 ............................................................. 3 credits

**Business Communications and Critical Thinking**

This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

BIS 220 ................................................................. 3 credits

**Introduction to Computer Applications and Systems**

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office™ tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.
MGT 230 ...................................................................................3 credits

Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

MGT 311 ...................................................................................3 credits

Organizational Development
This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

ACC 290 ...................................................................................3 credits

Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291 ...................................................................................3 credits

Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

ETH 316...................................................................................3 credits

Ethics and Social Responsibility
This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

ECO 372...................................................................................3 credits

Principles of Macroeconomics
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ECO 365...................................................................................3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

LAW 421 ...................................................................................3 credits

Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

FIN 370 ...................................................................................3 credits

Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

MKT 421 ...................................................................................3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

RES 351 ...................................................................................3 credits

Business Research
This course evaluates the process of conducting business research for improving decision making within an organization. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.

QNT 351 ...................................................................................3 credits

Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.

BUS 475 ...................................................................................3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.

COMM 215 ..............................................................................3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 200: Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101: Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300: Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 209: College Mathematics I
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220: College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110: Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101: Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145: The American Experience Since 1945
This is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215: State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Accounting Emphasis

ACC 349: Cost Accounting
This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.

ACC 422: Intermediate Financial Accounting II
This course is the second of the three part series of courses related to intermediate accounting. This section examines the balance sheet in more detail, including intangible assets, current liabilities and contingencies, long-term liabilities, stockholder’s equity, and earnings per share. The course finishes with a look at investments and revenue recognition. Interwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.
ACC 423 ................................................................. 3 credits
Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner’s equity, investments, income taxes, pensions and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 497 ........................................................................ 3 credits
Advanced Topics in Accounting Research
This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

Course Descriptions for the Administration Emphasis

ACC 400 ................................................................. 3 credits
Accounting for Decision Making
This course concentrates on effective decision making as it relates to financial activities in a business enterprise. Course topics will include financial assets, liabilities, equity, business operations, financial management, and financial statement analysis. Students will have the necessary analytical tools to enhance business operations.

MGT 448 ........................................................................ 3 credits
Global Business Strategies
The manager’s perspective in the fields of international payments, international trade, and investments are analyzed. Emphasis is given to the materials and concepts that illuminate the strategies, structure, practices, and effects of multinational enterprises.

ACC 340 ................................................................. 3 credits
Accounting Information Systems I
This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.

BSA 375 ........................................................................ 3 credits
Fundamentals of Business Systems Development
This course introduces the logical and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. Systems Development Life Cycle (SDLC) will be fundamental to the course.

EBUS 405 ........................................................................ 3 credits
e-Business Technologies
This course examines the Internet and provides an integration of information technology subjects. Topics include the facilities, services, and trends of the Internet. The functions of information technology that support e-business are emphasized.

ISCOM 472 ........................................................................ 3 credits
Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

MKT 441 ........................................................................ 3 credits
Marketing Research
This course covers basic research methodology applied to marketing issues. Students study methods and techniques for collection, analysis, and interpretation of primary and secondary data for customer and business marketing.

MGT 437 ........................................................................ 3 credits
Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work, planning, control, and evaluation for project success.

ETH 355 ........................................................................ 3 credits
Understanding Ethics
This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g. cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).

OI 370 ........................................................................ 3 credits
Innovation for the 21st Century
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

PHL 410 ........................................................................ 3 credits
Classical Logic
This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.

Course Descriptions for the Finance Emphasis

FIN 419 ........................................................................ 3 credits
Finance for Decision Making
This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

FIN 486 ........................................................................ 3 credits
Strategic Financial Management
This course gives students the opportunity to integrate previously learned finance and accounting concepts and practices to contemporary business strategies, while improving financial decision-making and problem-solving skills. In addition, students will examine real-world financial management scenarios in order to apply best practices resulting in increased value for various types of organizations.
FIN 366. Financial Institutions. 3 credits
This course will cover financial institutions such as insurance companies, commercial banks, investment banks and savings and loan associations. The risks facing financial institutions and how to measure and manage those risks are analyzed.

FIN 375. Financial Management in the Small Business. 3 credits
This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

FIN 402. Investment Fundamentals and Portfolio Management. 3 credits
This course covers the theories and practices of investments including financial markets, risk and return, securities, asset allocation and diversification. Students will utilize analytical techniques available in the investment planning and selection process in the environment in which investment decisions are made. Students will apply finance models and investment strategies to analyze and manage investments for various types of organizations.

FIN 410. Working Capital Management. 3 credits
Working Capital Management This course covers the basics of working capital management with emphasis on how firms manage current assets and liabilities to ensure the organization has sufficient cash to pay day-to-day bills and meet short-term obligations. The balance between risk and return is emphasized. Some of the basic techniques of financial forecasting, accounts receivable and inventory management will also be explored.

FIN 415. Corporate Risk Management. 3 credits
This course will provide students with the elements of corporate risk management in a competitive business environment. Emphasis will be placed upon the identification, measurement, management, and planning aspects of risk management, as well as trends and developments in the business environment. Insurance considerations in corporate risk management will also be addressed. Students will utilize newly acquired knowledge and techniques to develop a corporate risk management plan that will maximize value for the organization and stakeholders.

FIN 420. Personal Finance. 3 credits
This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on investment risk and returns, markets, and analysis tools useful in assessing financial situations.

FIN 444. Mergers, Acquisitions, and Corporate Restructuring. 3 credits
This course prepares students to analyze merger and acquisition (M&A) opportunities in ways that will maximize corporate value and shareholder wealth in a competitive market environment. Special emphasis is placed on the identification, screening, selection, evaluation, and financing of M&A activities. Additionally, the course examines business failures and restructuring strategies.
BUS 327 ..................................................................................3 credits

The Sustainable Organization
This course focuses on the business practices and tools that add economic, social, and ethical value to the business resources of a sustainable enterprise. Emphasis is placed on the general science of sustainability, calculations of manufacturing, and the impact of business decisions on the environment.

BUS 372 ..................................................................................3 credits

Business Sustainability Standards
This course provides a regulatory and compliance overview of the local, state, and federal business sustainability standards. Special emphasis is placed on ISO requirements, LEED certification, and emerging sustainability standards for business. Students will also address compliance as a competitive advantage and the ethical responsibility of businesses to employees, the community, and the environment.

ECO 370 ...................................................................................3 credits

Environmental Economics
This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

MGT 380 ..................................................................................3 credits

Organizational Change Management
This course prepares students to be effective agents for change in the business community. This includes a step-wise framework for understanding, designing, and implementing change successfully. Special emphasis is placed on organizational change, program design, change processes, and successfully implementing both short-term and long-term change within the organization.

MGT 403 ..................................................................................3 credits

Environmental Management Systems
This course provides a framework for managing Environmental Management Systems (EMS). This includes continuous improvement through environmental management; facilities and supply-chain management; systems integration; environmental considerations; and operational utilization of environmental management systems.

MKT 411 ..................................................................................3 credits

Green Marketing
This course applies the principles of sustainability and the philosophy of being environmentally green to the area of marketing. Special emphasis is placed on sustainable product design; awareness and cause marketing; public relations and green-washing; and emerging going-green marketing trends.

MGT 441 ..................................................................................3 credits

Business Models in Early-stage Enterprises
This course provides an overview of business models for early-stage entrepreneurial ventures in all industries, including those in green industries and clean technology. Emphasis is placed on designing a competitive early-stage enterprise business model, the competing interests of stakeholders, the use of triple bottom line measures to guide enterprise design, forms of ownership, intellectual property, and exploring financing options—both private and public.

MKT 442 ...................................................................................3 credits

Market Discovery and Validation in Early-stage Enterprises
This course applies entrepreneurial approaches to the discovery and validation of markets in all industries for early-stage entrepreneurial ventures, including those in green Industries and clean technology. Emphasis is placed on iterative approaches for product design; validation of customer needs in an early-stage entrepreneurial setting; and early-stage enterprise marketing needs and trends.

BUS 443 .....................................................................................3 credits

Implementing Entrepreneurship in Early-stage Enterprises
This course focuses on the implementation of lean business models in entrepreneurial ventures in all industries, including those in green industries and clean technology. This includes the strategic application of financial planning, capital management, marketing, people management, and leadership as a means to reduce start-up risk. Emphasis is placed on adapting the business plan to the realistic needs of an early-stage owner and entrepreneur.

Course Descriptions for the Human Resource Management Emphasis

HRM 300 ..................................................................................3 credits

Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 498 ..................................................................................3 credits

Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

HRM 310 .....................................................................................3 credits

Change Management
This course examines both the human and organizational aspects of change. Topics include identifying the types and sources of change, human and organizational resistance to change, theories of managing change, and developing skills that will enable the student to lead, implement, and sustain change.
HRM 324 ................................................................. 3 credits
Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 326 ................................................................. 3 credits
Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 420 ................................................................. 3 credits
Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

MGT 434 ................................................................. 3 credits
Innovative and Creative Business Thinking
In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

MGT 498 ................................................................. 3 credits
Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

HRM 300 ................................................................. 3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 326 ................................................................. 3 credits
Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

LDR 300 ................................................................. 3 credits
Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 360 ................................................................. 3 credits
Green and Sustainable Enterprise Management
This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.

MGT 411 ................................................................. 3 credits
Innovative and Creative Business Thinking
This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and practice and draw upon examples from multiple industry sectors.

MGT 426 ................................................................. 3 credits
Managing Change in the Workplace
This course provides an overview of methods and techniques required of supervisory and management personnel responsible for managing change. As a result of the course, students will be able to identify and develop strategies for managing the following: organizational aspects of change, including shifts in leadership, reorganizations, working conditions, technologically imposed change and workforce issues. In addition to developing strategies, students will gain expertise in applying communication strategies that effectively deal with change.
OI 361 ................................................................. 3 credits
Innovation, Design, and Creativity for a Competitive Advantage
This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.
ETH 355 ................................................................. 3 credits
Understanding Ethics
This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g., cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).
COM 340 ............................................................. 3 credits
Media and Society
The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.
MKT 438 ............................................................... 3 credits
Public Relations
This course provides an introduction to the field of public relations. Areas covered are media relations; promotion; tools used in developing public relations and publicity, and improving customer satisfaction; relationship-building strategies; and ethics and public relations.

Course Descriptions for the Project Management Emphasis

CPMGT 300 .......................................................... 3 credits
Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.
CPMGT 301 .......................................................... 3 credits
Strategic Portfolio and Project Management
This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.
CPMGT 302 .......................................................... 3 credits
Procurement and Risk Management
This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.
CPMGT 303 .......................................................... 3 credits
Project Estimating and Control Techniques
To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.
CPMGT 305 .......................................................... 3 credits
Project Management Capstone
This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in the prior five courses will be integrated and applied to the class project.
## Course Descriptions for the Public Sector Emphasis

**BPA 303** ................................................................. 3 credits  
**Public Programs: Implementation and Evaluation in a Dynamic Environment**  
This course focuses on the implementation of public policy decisions through the identification and development of specific methods for servicing the public good. It incorporates an emphasis on intergovernmental relations and the increasing use of private resources in the service delivery system. A strong emphasis is placed on evaluating both the delivery processes and service outcomes as a means to continuously improve service delivery effectiveness.

**BPA 406** ................................................................. 3 credits  
**The Public Leader: Integration and Application**  
This course is intended to synthesize the concepts and theories covered in previous public administration courses and deepens the student’s understanding of the challenges and complexities facing public leader. Student will explore the leadership styles of successful national, state, and local leaders to integrate and apply the principles and practices of public administration in a real world setting.

**BPA 401** ................................................................. 3 credits  
**Foundations of Public Administration**  
This course serves as an introduction to the study of public administration. During this course, the student will review the political and social theories of public administration. Students will review leadership, human resources, finance, and ethics within a public policy-making environment. Students will become familiar with the complex issues facing local, state, and federal public administrators today.

**HRM 330** ................................................................. 3 credits  
**Human Resources and Labor Relations in Public Service**  
This course explores the changing civil service system within the rich, varied and pluralistic public service of today. Course topics will include recruiting, staffing, employee retention, performance management, compensation, benefits, and promotion. Labor relations, with and without a collective bargaining agreement will be studied. Students will study the resolution of disagreements using alternative dispute resolution systems designed to advance the public purpose.

**FIN 380** ................................................................. 3 credits  
**Financial Management of Non-Profit Organizations**  
Financial Management of Non-Profit Organizations This course emphasizes the utilization of key financial concepts to effectively obtain desired goals and objectives by non-profit organizations in the private, public, and the international arenas. While profit oriented entities focus on maximizing shareholder’s wealth, non-profit organizations are concerned with deriving maximum benefit for each dollar expended on a charitable endeavor. The centrality of finance to achieve such goal will be thoroughly explored.

**ACC 460** ................................................................. 3 credits  
**Government and Non-Profit Accounting**  
This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.
OI 466 .......................................................................................3 credits
Organizational Innovation Integrated Project
This project-based course integrates knowledge and skills from previous organizational innovation coursework and requires business students to demonstrate their innovative, creative, and inspirational capacity to solve real-life business problems or opportunities in the areas of strategy, process, product, and service.

BRM 353 .....................................................................................3 credits
Product Brand Management
This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

MGT 356....................................................................................3 credits
Retail Personnel Management
This course focuses on the personnel management aspects of retail management. Students will be prepared to utilize recruiting and staffing, motivating, training, and ethics concepts to effectively lead retail personnel.

HM 322 .....................................................................................3 credits
Gaming Management
This course provides an overview of the business practices and principles unique to the gaming industry. This includes an overview of the history and evolution of gaming, different venues, and the business implications of the economic and social impact of the industry. Special emphasis is placed on legal, ethical, and social issues related to gaming entertainment as a business entity.

HM 370 .....................................................................................3 credits
Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

HM 486.....................................................................................3 credits
Trends and Emerging Issues in Hospitality
This course applies a strategic perspective to assessing new trends and emerging issues in hospitality management. Special emphasis is placed on applying a global perspective to new and emerging markets in the hospitality industry. This includes consideration of changing social and economic groups as well as shifting demand for existing and new products and services.

ISCOM 354 ...............................................................................3 credits
Retail Operations: Supply Management
This course encompasses an examination of the supply side of the retail value chain including logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.

MGT 371 .....................................................................................3 credits
Lodging Management
This course provides students with the opportunity to examine various lodging options within the hospitality industry from a managerial perspective. Special emphasis will be placed on guest services and on room division management.

MGT 372 .....................................................................................3 credits
Food and Beverage Management
This course focuses on operating and strategic challenges facing managers in the food and beverage industry. Topics include cost control, forecasting, food safety, service standards, and staffing. Students will learn to utilize managerial tools to make sound business decisions in a food and beverage organization.

Course Descriptions for the Environmental Sustainability Emphasis

SUS 300 .....................................................................................3 credits
Environmental Sustainability
Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.

ENV 340 .....................................................................................3 credits
Energy and the Environment
This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.

SUS 310 .....................................................................................3 credits
Industrial Ecology
This course introduces students to the field of industrial ecology. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.

SUS 350 .....................................................................................3 credits
Green Building and Urban Planning
This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.

Students must choose one of the following courses:

SUS 370 .....................................................................................3 credits
Sustainable Ecosystems
In this course, students evaluate the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and manage habitats and populations.
A Bachelor of Science in Management (BSM) degree program is designed to develop the professional knowledge and skills of cross functional managers in any organization. The BSM degree enhances skills necessary for improved organizational effectiveness in a dynamic and evolving workplace. The curriculum focuses on the development of management roles. It emphasizes skills necessary to align resources, and to improve communication, productivity, and effectiveness. Through a participative learning environment structured for adult learners, students are taught to manage innovation and apply professional skills and knowledge. Special emphasis can be placed on key management areas, including, leadership, general management, or human resource management based on student preference.

For more information about our graduation rates, the median debt for those who completed the program, and other important information, please visit our website at http://www.phoenix.edu/graduation-rates.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

### Additional Admission Requirements for the BSM

- **High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.**
  - South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
  - Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the BSM
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 45 upper division credits.
  • A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  • A minimum program grade point average (GPA) of 2.0.
  • Students holding an associate degree from the University or a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent undergraduate degree earned at a recognized foreign institution will have that associate degree emphasis(es) noted on the student’s University of Phoenix transcript when the BSM degree is conferred.
  • Students with an associate degree in business, management, arts, general studies, liberal arts, nursing or pre-medicine are not eligible for an emphasis.
  • The diploma awarded for this program will read as follows: Bachelor of Science in Management

General Education Requirements for the BSM
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits
(A Track must include: COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)
Puerto Rico students may not use conversational English to satisfy Communication Arts.

Oregon campus students, enrolled in the A Track, must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus. B Track students will meet this requirement by completing COM 170 and COM 172.

Mathematics Requirement 6 credits
(Must include: MTH 209, equivalent, or higher)

Science & Technology Requirement 6 credits
(Must include: SCI 163)

Additional Liberal Arts Requirement 6 credits
(Must include: FP 120)

Humanities Requirement 6 credits
(Must include: HUM 114)

Social Science Requirement 6 credits
(B Track must include: GEN 195)

Interdisciplinary Requirement 18 credits
(B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSM for Arkansas Students
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
(A Track must include: COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)

Mathematics Requirement(s) 6 credits
Must include MTH 220

Science & Technology Requirement(s) 9 credits
(B Track must include: SCI 163)

Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
(B Track students must include: HUM 114)

Social Science Requirement(s) 9 credits
(B Track must include: PSY 211)

Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits
(B Track must include: GEN 195)

Interdisciplinary Requirement(s) 9 credits
(B Track students must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSM
• All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence (B Track).
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
• ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take BCOM 275 Business Communications and Critical Thinking as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSM

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of 'C' (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework).
- Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The 15 credit upper division BSM Business/Management Elective requirement may be satisfied by any of the following means:

- Upper division University of Phoenix Business/Management coursework.
- Upper division Business/Management transfer coursework that is acceptable for transfer and was completed within the past ten (10) years from current program enrollment agreement sign date with a grade of C- or better.

- Upper division Business/Management National Testing Program exams that are acceptable for transfer and were completed within the past ten (10) years from current program enrollment agreement sign date.
- Upper division Business/Management military credits that are acceptable for transfer and were completed within the past ten (10) years from current program enrollment agreement sign date.
- Upper division Business/Management Prior Learning Assessment (PLA) credits awarded to activities completed within the past ten (10) years from current program enrollment agreement sign date.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of 'C' (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the Required Course of Study may not be waived:

- BCOM 275
- BCOM 346
- BCOM 401
- BCOM 495
- BCOM 175
- BCOM 275
- BCOM 300
- BCOM 380
- BCOM 475
- BCOM 495

Course Descriptions for the BSM

BCOM 275 ................................................................. 3 credits
Business Communications and Critical Thinking

This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

PHL 458 ................................................................. 3 credits
Creative Minds and Critical Thinking

In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

ETH 316 ................................................................. 3 credits
Ethics and Social Responsibility

This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.
LAW 421 ................................................................. 3 credits
Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.
RES 320 ........................................................................3 credits
Foundations of Research
This is a course introducing the foundations of research. Research principles and the scientific method are applied to professional situations. The course is designed to equip students with an understanding of commonly employed research methodologies that can be utilized to improve productivity and increase customer satisfaction.
PSY 322 ......................................................................3 credits
Consumer Psychology and Research
This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.
BIS 320 ......................................................................3 credits
Business Information Systems
This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.
ECO 365 ......................................................................3 credits
Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ACC 300 ......................................................................3 credits
Principles of Accounting
This course focuses on principles of accounting for the non-accounting student. Emphasis will be placed on the accounting equation and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and global business implications.
FIN 370 ......................................................................3 credits
Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
MGT 498 ......................................................................3 credits
Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.
COMM 215 ...............................................................3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 200 ......................................................................3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 101 ......................................................................3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 ......................................................................3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.
MTH 209 ......................................................................3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.
MTH 220 ................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................. 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................. 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science in Management Concentration in Manufacturing Sector
The following Bachelor of Science in Management Concentration in Manufacturing Sector (BSM/MAN) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Management (BSM) degree program is designed to develop the professional knowledge and skills of cross functional managers in any organization. The BSM degree enhances skills necessary for improved organizational effectiveness in a dynamic and evolving workplace. The curriculum focuses on the development of management roles. It emphasizes skills necessary to align resources, and to improve communication, productivity, and effectiveness. Through a participative learning environment structured for adult learners, students are taught to manage innovation and apply professional skills and knowledge. Special emphasis can be placed on key management areas, including, leadership, general management, or human resource management based on student preference.

The Manufacturing Sector (MAN) concentration focuses on strategic performance improvement of all business planning, global sourcing and procurement, production, and logistical activities that make up an organization’s operations and supply chain. The program highlights the important role that operations and supply chain play in satisfying customer demands and expectations. The program also emphasizes a company’s need to develop and maintain a sustainable competitive advantage through the efficient and effective performance of all operations. The program provides the most current content in the manufacturing field as outlined by various specialized manufacturing and supply chain organizations and experts. In addition to courses in the BSB foundation and courses specific to manufacturing, the degree concentration has coursework that stresses key business related knowledge and skill development in the areas of computers and information processing, business law, macro-economics, financial analysis, and marketing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsm-man.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSM/MAN Program Category Requirements - A Track and B Track

Communications, 3 total credits
BCOM 275 ~ ................................................................. 3 credits
Business Communications and Critical Thinking
(The prerequisite requirement only applies to B Track students)

Management, 3 total credits
PHL 458 ~ ................................................................. 3 credits
Creative Minds and Critical Thinking

297
Students must choose three of the following BSM/MAN Concentration Electives:

- Manufacturing Sector Concentration, 15 total credits
  - OI 361 ~ ................................................................. 3 credits
  - ISCOM 352 ~ .......................................................... 3 credits
  - ISCOM 472 ~ .......................................................... 3 credits
  - Lean Enterprise
  - ISCOM 471 ~ .......................................................... 3 credits
  - Operations Management
  - ISCOM 473 ~ .......................................................... 3 credits
  - Global Sourcing and Procurement

- Business Information Systems, 3 total credits
  - BIS 320 ~ ................................................................. 3 credits
  - Business Information Systems

- Economics, 3 total credits
  - ECO 365 ~ ................................................................. 3 credits
  - Principles of Microeconomics

- Accounting, 3 total credits
  - ACC 300 ~ ................................................................. 3 credits
  - Principles of Accounting

- Finance, 3 total credits
  - FIN 370 ~ ................................................................. 3 credits
  - Finance for Business

- Management Capstone, 3 total credits
  - MGT 498~ ................................................................. 3 credits
  - Strategic Management

- Research and Statistics, 3 total credits
  - RES 320 ~ ................................................................. 3 credits
  - Foundations of Research

- Marketing, 3 total credits
  - PSY 322 ~ ................................................................. 3 credits
  - Consumer Psychology and Research

- Ethics and Social Responsibility, 3 total credits
  - ETH 316 ~ ................................................................. 3 credits
  - Ethics and Social Responsibility

- Business Law, 3 total credits
  - LAW 421 ~ ................................................................. 3 credits
  - Contemporary Business Law

- Strategic Management

Additional Admission Requirements for the BSM/MAN
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.
- Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.

Degree Requirements for the BSM/MAN

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - Students holding an associate degree from the University or a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent undergraduate degree earned at a recognized foreign institution will have that associate degree emphasis(es) noted on the student’s University of Phoenix transcript when the BSM degree is conferred, if applicable.
  - The diploma awarded for this program will read as follows: Bachelor of Science in Management. Concentrations are reflected on the transcript only.
General Education Requirements for the BSM/MAN
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits
(A Track must include COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)
Puerto Rico students may not use conversational English to satisfy Communication Arts.

Oregon campus students, enrolled in the A Track, must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus. B Track students will meet this requirement by completing COM 170 and COM 172.

Mathematics Requirement 6 credits
(Must include MTH 209, equivalent, or higher)
Science & Technology Requirement 6 credits
(B Track must include: SCI 163)
Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement 6 credits
(B Track must include: HUM 114)
Social Science Requirement 6 credits
(B Track must include: PSY 211)
Nevada students must complete three (3) credits in Nevada Constitution

Additional Liberal Arts Requirement 6 credits
(B Track must include: GEN 195)
Puerto Rico students must complete 6 credits of Spanish. Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish 1 or higher will satisfy the Spanish requirement. B Track students will have 3 credits applied to the Additional Liberal Arts category and 3 credits applied to the Interdisciplinary component.

Interdisciplinary Requirement 18 credits
(B Track must include: FP 120)
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSM/MAN for Arkansas Students
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
(A Track must include: COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)
Mathematics Requirement(s) 6 credits
Must include MTH 220
Science & Technology Requirement(s) 9 credits
(B Track must include: SCI 163)
Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
(B Track must include: HUM 114)

Social Science Requirement(s) 9 credits
(B Track must include: PSY 211)
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits
(B Track must include: GEN 195)
Interdisciplinary Requirement(s) 9 credits
(B Track students must include: FP 120)
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSM/MAN
• All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence (B Track).
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take BCOM 275 Business Communications and Critical Thinking as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Residency Requirements and Course Waivers for the BSM/MAN**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the Required Course of Study may not be waived: BCOM 275, MGT 420, MGT 498

**Course Descriptions for the BSM/MAN**

**BCOM 275** ................................................................. 3 credits

**Business Communications and Critical Thinking**

This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports.

Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organization's strategic direction.

**PHL 458** .................................................................. 3 credits

**Creative Minds and Critical Thinking**

In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

**ETH 316** ..................................................................... 3 credits

**Ethics and Social Responsibility**

This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

**LAW 421** ................................................................. 3 credits

**Contemporary Business Law**

This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

**RES 320** ................................................................. 3 credits

**Foundations of Research**

This is a course introducing the foundations of research. Research principles and the scientific method are applied to professional situations. The course is designed to equip students with an understanding of commonly employed research methodologies that can be utilized to improve productivity and increase customer satisfaction.

**PSY 322** ................................................................. 3 credits

**Consumer Psychology and Research**

This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.
BIS 320 .................................................................................. 3 credits
**Business Information Systems**
This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including work processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.

ECO 365 .................................................................................. 3 credits
**Principles of Microeconomics**
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ACC 300 .................................................................................. 3 credits
**Principles of Accounting**
This course focuses on principles of accounting for the non-accounting student. Emphasis will be placed on the accounting equation and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and global business implications.

FIN 370 .................................................................................. 3 credits
**Finance for Business**
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

MGT 498 .................................................................................. 3 credits
**Strategic Management**
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

COMM 215 ................................................................................ 3 credits
**Essentials of College Writing**
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 .................................................................................. 3 credits
**Foundations for General Education and Professional Success**
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving, and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 .................................................................................. 3 credits
**Skills for Lifelong Learning**
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .................................................................................. 3 credits
**Skills for Professional Development**
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.

MTH 209 .................................................................................. 3 credits
**College Mathematics II**
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220 .................................................................................. 3 credits
**College Algebra**
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................................. 3 credits
**Introductory Chemistry**
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
PHY 101 .......................................................................................... 3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 .......................................................................................... 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 .......................................................................................... 3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Course Descriptions for the Manufacturing Sector**

**Concentration**

OL 365 .......................................................................................... 3 credits

**Knowledge Management and Intellectual Capital**

In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today’s increasingly innovative and global business environment. Students will be asked to consider a variety of topics critical to an organization’s long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational partnerships, and organizational culture.

MGT 420 .......................................................................................... 3 credits

**Managing Quality in the Supply Chain**

This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

HRM 420 .......................................................................................... 3 credits

**Human Resource Risk Management**

This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

ISCOM 352 .......................................................................................... 3 credits

**Logistics Management**

This course provides an overview of logistics management within a supply chain operation. This includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 471 .......................................................................................... 3 credits

**Lean Enterprise**

This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

ISCOM 472 .......................................................................................... 3 credits

**Operations Management**

This course provides an overview of operations management. Students will analyze the planning, organizing, controlling, and general management of productive resources in manufacturing and service organizations. This course also addresses the design and control of systems that are responsible for the efficient use of raw materials, labor, equipment, and facilities in the production of customer satisfying products and services.

ISCOM 473 .......................................................................................... 3 credits

**Global Sourcing and Procurement**

This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.
Bachelor of Science in Management Emphasis in Manufacturing Sector (Maryland-Online)

The following Bachelor of Science in Management Emphasis in Manufacturing Sector (BSM/MAN) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Management (BSM) degree program is designed to develop the professional knowledge and skills of cross functional managers in any organization. The BSM degree enhances skills necessary for improved organizational effectiveness in a dynamic and evolving workplace. The curriculum focuses on the development of management roles. It emphasizes skills necessary to align resources, and to improve communication, productivity, and effectiveness. Through a participative learning environment structured for adult learners, students are taught to manage innovation and apply professional skills and knowledge. Special emphasis can be placed on key management areas, including leadership, general management, or human resource management based on student preference.

The Manufacturing Sector (MAN) emphasis focuses on strategic performance improvement of all business planning, global sourcing and procurement, production, and logistical activities that make up an organization’s operations and supply chain. The program highlights the important role that operations and supply chain play in satisfying customer demands and expectations. The program also emphasizes a company’s need to develop and maintain a sustainable competitive advantage through the efficient and effective performance of all operations. The program provides the most current content in the manufacturing field as outlined by various specialized manufacturing and supply chain organizations and experts. In addition to courses in the BSB foundation and courses specific to manufacturing, the degree emphasis has coursework that stresses key business related knowledge and skill development in the areas of computers and information processing, business law, macro-economics, financial analysis, and marketing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsm-man.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSM/MAN Program Category Requirements - A Track and B Track

Communications, 3 total credits
BCOM 275 ~ .................................................. 3 credits

Business Communications and Critical Thinking
(The prerequisite requirement only applies to B Track students)

Management, 3 total credits
PHL 458 ~ .................................................. 3 credits

Creative Minds and Critical Thinking

Ethics and Social Responsibility, 3 total credits
ETH 316 ~ .................................................. 3 credits

Ethics and Social Responsibility

Business Law, 3 total credits
LAW 421 ~ .................................................. 3 credits
Contemporary Business Law

Research and Statistics, 3 total credits
RES 320 ~ .................................................. 3 credits
Foundations of Research

Marketing, 3 total credits
PSY 322 ~ .................................................. 3 credits
Consumer Psychology and Research

Business Information Systems, 3 total credits
BIS 320 ~ .................................................. 3 credits
Business Information Systems

Economics, 3 total credits
ECO 365 ~ .................................................. 3 credits
Principles of Microeconomics

Accounting, 3 total credits
ACC 300 ~ .................................................. 3 credits
Principles of Accounting

Finance, 3 total credits
FIN 370 ~ .................................................. 3 credits
Finance for Business

Management Capstone, 3 total credits
MGT 498~ .................................................. 3 credits
Strategic Management

Manufacturing Sector Emphasis, 15 total credits
OI 361 ~ .................................................. 3 credits
Innovation, Design, and Creativity for a Competitive Advantage
MGT 420 ~ .................................................. 3 credits
Managing Quality in the Supply Chain

Students must choose three of the following BSM/MAN Emphasis Electives:

HRM 420 ~ .................................................. 3 credits
Human Resource Risk Management

ISCOM 352 ~ ........................................... 3 credits
Logistics Management

ISCOM 472 ~ ........................................... 3 credits
Lean Enterprise

ISCOM 471 ~ ........................................... 3 credits
Operations Management

ISCOM 473 ~ ........................................... 3 credits
Global Sourcing and Procurement

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSM/MAN

All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
Degree Requirements for the BSM/MAN

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
- Students holding an associate degree from the University or a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent undergraduate degree earned at a recognized foreign institution will have that associate degree emphasis(es) noted on the student’s University of Phoenix transcript when the BSM degree is conferred, if applicable.
- The diploma awarded for this program will read as follows: Bachelor of Science in Management. Emphases are reflected on the transcript only.

General Education Requirements for the BSM/MAN

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts Requirement 6 credits
  (A Track must include COMM 215, equivalent, or higher)
  (B Track must include: COM 170 and COM 172)
- Mathematics Requirement 6 credits
  (Must include MTH 209, equivalent, or higher)
- Science & Technology Requirement 6 credits
  (B Track must include: SCI 163)
- Must include at least three (3) credits in the physical or biological sciences

- Humanities Requirement 6 credits
  (B Track must include: HUM 114)
- Social Science Requirement 6 credits
  (B Track must include: PSY 211)
- Additional Liberal Arts Requirement 6 credits
  (B Track must include: GEN 195)
- Interdisciplinary Requirement 18 credits
  (B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSM/MAN

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence (B Track).
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade).
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take BCOM 275 Business Communications and Critical Thinking as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSM/ MAN

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of 'C' (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be at an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the Required Course of Study may not be waived: BCOM 275, MGT 420, MGT 498

**Course Descriptions for the BSM/MAN**

**BCOM 275**

This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organization’s strategic direction.

**PHL 458**

In this course, students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

**ETH 316**

This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

**ACC 300**

This course focuses on principles of accounting for the non-accounting student. Emphasis will be placed on the accounting equation and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and global business implications.

**FIN 370**

This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

**MGT 498**

This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

**RES 320**

This course is a survey introducing the foundations of research. Research principles and the scientific method are applied to professional situations. The course is designed to equip students with an understanding of commonly employed research methodologies that can be utilized to improve productivity and increase customer satisfaction.

**PSY 322**

This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

**BIS 320**

This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.

**ECO 365**

This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

**ACC 300**

This course focuses on principles of accounting for the non-accounting student. Emphasis will be placed on the accounting equation and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and global business implications.

**FIN 370**

This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

**MGT 498**

This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.
COMM 215 ......................................................... 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 .............................................................. 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 300 .............................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.
HRM 420: Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

ISCOM 352: Logistics Management
This course provides an overview of logistics management within a supply chain operation. This includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 472: Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

ISCOM 471: Operations Management
This course provides an overview of operations management. Students will analyze the planning, organizing, controlling, and general management of productive resources in manufacturing and service organizations. This course also addresses the design and control of systems that are responsible for the efficient use of raw materials, labor, equipment, and facilities in the production of customer satisfying products and services.

ISCOM 473: Global Sourcing and Procurement
This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.

Bachelor of Science in Accounting
The following Bachelor of Science in Accounting (BSACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Accounting (BSACC) promotes identification with, and orientation to, the accounting profession and is designed to provide knowledge and skills necessary to an accounting career. In addition to the key accounting course work at the introductory and intermediate levels, critical areas of study including auditing and taxation are required in the program. The importance of ethics and international issues are emphasized throughout the curriculum, along with core competencies in technology and communication. The program utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. The program also addresses the goals of professional values, communications and leadership skills, strategic and critical thinking skills, and technology skills of the professional accounting environment and provides additional coverage on the International Financial Reporting Standards (IFRS). Students are also exposed to varied business disciplines including economics, statistics, business law, corporate finance, and marketing to provide the general business overview and context necessary for accounting studies. This program is consistent with generally accepted accounting principles, including the accounting processes and knowledge areas that lead to professional certification.

At the conclusion of the BSACC program:
- Graduates will be able to apply financial accounting principles to record and communicate business activities to stakeholders.
- Graduates will be able to analyze accounting financial statements to support effective fiscal decision making.
- Graduates will be able to evaluate various accounting activities in relation to ethical, legal, and professional standards.
- Graduates will be able to demonstrate an understanding of issues in the areas of government and not-for-profit accounting, international transactions, taxation, and auditing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsacc.

Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine requirements. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.
This program does not meet the Minnesota State Board of Accountancy requirements to sit for the CPA examination, additional coursework is required.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements - A Track and B Track

Communications, 3 total credits
BIS 220 ~ .................................................................3 credits
Communication for Accountants
(The prerequisite requirement only applies to B Track students)

Business Information Systems, 3 total credits
BIS 220 ~ .................................................................3 credits
Introduction to Computer Applications and Systems
(The prerequisite requirement only applies to B Track students)

Business Communication for Accountants
BCOM 230 ~ ..........................................................3 credits

Management, 6 total credits
MGT 230 ~ ...............................................................3 credits
Management Theory and Practice
MGT 311 ~ ...............................................................3 credits
Organizational Development

Accounting Principles, 6 total credits
ACC 290 ~ ...............................................................3 credits
Principles of Accounting I
ACC 291 ~ ...............................................................3 credits
Principles of Accounting II

Ethics, 3 total credits
ETH 376 ~ ..............................................................3 credits
Accounting Ethics and Professional Regulations

Law, 3 total credits
LAW 421 ~ ..............................................................3 credits
Contemporary Business Law

Economics, 6 total credits
ECO 365 ~ ..............................................................3 credits
Principles of Microeconomics
ECO 372 ~ ..............................................................3 credits
Principles of Macroeconomics

Marketing, 3 total credits
MKT 421 ~ ...............................................................3 credits
Marketing

Finance, 3 total credits
FIN 370 ~ ..............................................................3 credits
Finance for Business

Quantitative Studies, 3 total credits
QNT 351 ~ ..............................................................3 credits
Quantitative Analysis for Business

Strategy, 3 total credits
BUS 475 ~ ..............................................................3 credits
Integrated Business Topics

Accounting Information Systems, 3 total credits
ACC 340 ~ ..............................................................3 credits
Accounting Information Systems I

Cost Accounting, 3 total credits
ACC 349 ~ ..............................................................3 credits
Cost Accounting

Intermediate Accounting, 9 total credits
ACC 421 ~ ..............................................................3 credits
Intermediate Financial Accounting I
ACC 422 ~ ..............................................................3 credits
Intermediate Financial Accounting II
ACC 423 ~ ..............................................................3 credits
Intermediate Financial Accounting III

Tax, 3 total credits
Students must choose one of the following courses:

Corporate Taxation
ACC 455 ~ ..............................................................3 credits

Individual/Estate Taxation
ACC 456 ~ ..............................................................3 credits

Government & Non-Profit Accounting, 3 total credits
ACC 460 ~ ..............................................................3 credits
Government and Non-Profit Accounting

Auditing, 6 total credits
ACC 491 ~ ..............................................................3 credits
Contemporary Auditing I
ACC 492 ~ ..............................................................3 credits
Contemporary Auditing II

Accounting Research, 3 total credits
ACC 497 ~ ..............................................................3 credits
Advanced Topics in Accounting Research

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSACC

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• South Carolina: Applicants attending a local campus in South Carolina must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit an Associate Degree posted transcript in lieu of the high school documentation. This may include a copy of a transcript or degree verification information from the institution’s student website.

• Nevada: Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
Completion of a minimum of 120 credits that include the Degree Requirements for the BSACC

• A minimum program grade point average (GPA) of 2.0.

• Applicants must be currently employed or have access to a work environment.

Degree Requirements for the BSACC

• Completion of a minimum of 120 credits that include the following distribution:
  
  • A minimum of 57 upper division credits.
  
  • A minimum of 48 of the 120 credits must be in the general education areas approved by the University.
  
  • A minimum program grade point average (GPA) of 2.0.
  
  • The diploma awarded for this program will read as follows: Bachelor of Science in Accounting

General Education Requirements for the BSACC

A minimum of 48 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits

(A Track must include: COMM 215, equivalent, or higher)

(B Track must include: COM 170 and COM 172)

Puerto Rico students may not use conversational English to satisfy Communication Arts.

Oregon campus students, enrolled in the A Track, must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus. B Track students will meet this requirement by completing COM 170 and COM 172.

Mathematics Requirement 6 credits

Must include MTH 209, equivalent, or higher

Science & Technology Requirement 6 credits

(B Track must include: SCI 163)

Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement 6 credits

(B Track must include: HUM 114)

Social Science Requirement 6 credits

(B Track must include: PSY 211)

Nevada students must complete three (3) credits in Nevada Constitution

Additional Liberal Arts Requirement 3 credits

(B Track must include: GEN 195)

Puerto Rico students must complete 6 credits of Spanish. Conversational Spanish may not be used. Only Introduction to Spanish, Basic Spanish 1 or higher will satisfy the Spanish requirement.

Interdisciplinary Requirement 15 credits

(B Track must include: FP 120)

Puerto Rico students have a 12 credit Interdisciplinary requirement

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSACC for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits

(A Track must include COMM 215, equivalent, or higher)

(B Track must include: COM 170 and COM 172)

Mathematics Requirement(s) 6 credits

Must include MTH 220

Science & Technology Requirement(s) 9 credits

(B Track must include: SCI 163)

Must include CHM 110 and PHY 101 or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits

(B Track must include: HUM 114)

Social Science Requirement(s) 9 credits

(B Track must include: PSY 211)

Must include: HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits

(B Track must include: GEN 195)

Interdisciplinary Requirement(s) 9 credits

(B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSACC

• All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• HUM 114 will be required as the last course in the First-Year Sequence. All other FYS requirements must be satisfied prior to enrolling in any other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  
  • University of Phoenix coursework,
  
  • Regionally or nationally accredited coursework (C- or higher grade),
  
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  
  • National Testing Programs, and
  
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take BCOM 230 Business Communication for Accountants as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSACC

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may complete a maximum of 30 credits from their required course of study on the basis of regionally approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credit, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.

• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.

• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: ACC 497 and BCOM 230.

Course Descriptions for the BSACC

BCOM 230 ...................................................................................3 credits

Business Communication for Accountants

This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

BIS 220 ......................................................................................3 credits

Introduction to Computer Applications and Systems

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

MGT 230 ...................................................................................3 credits

Management Theory and Practice

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

MGT 311 .....................................................................................3 credits

Organizational Development

This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.
ACC 290 ................................................................. 3 credits
**Principles of Accounting I**
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.
ACC 291 ................................................................. 3 credits
**Principles of Accounting II**
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.
ETH 376 ................................................................. 3 credits
**Accounting Ethics and Professional Relations**
This course provides a foundation in the nature of ethics, moral, legal, and social issues in the accounting and business environments. Students learn topics including ethical reasoning, dealing with controversial issues, and the roles and responsibilities of accounting and auditing professionals. Other topics include a discussion of the AICPA Code of Professional Conduct and the Sarbanes-Oxley Act.
LAW 421 ................................................................. 3 credits
**Contemporary Business Law**
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.
ECO 365 ................................................................. 3 credits
**Principles of Microeconomics**
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 372 ................................................................. 3 credits
**Principles of Macroeconomics**
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
MKT 421 ................................................................. 3 credits
**Marketing**
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.
FIN 370 ................................................................. 3 credits
**Finance for Business**
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
QNT 351 ................................................................. 3 credits
**Quantitative Analysis for Business**
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.
BUS 475 ................................................................. 3 credits
**Integrated Business Topics**
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
ACC 340 ................................................................. 3 credits
**Accounting Information Systems I**
This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.
ACC 349 ................................................................. 3 credits
**Cost Accounting**
This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.
ACC 421 ................................................................. 3 credits
**Intermediate Financial Accounting I**
This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.
ACC 422 ................................................................. 3 credits
**Intermediate Financial Accounting II**
This course is the second of the three part series of courses related to intermediate accounting. This section examines the balance sheet in more detail, including intangible assets, current liabilities and contingencies, long-term liabilities, stockholder’s equity, and earnings per share. The course finishes with a look at investments and revenue recognition. Interwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.
Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner’s equity, investments, income taxes, pensions and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

3 credits

Corporate Taxation
This course is a basic introduction to federal corporate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

3 credits

Government and Non-Profit Accounting
This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.

3 credits

Individual/Estate Taxation
This course is a basic introduction to federal individual and estate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

3 credits

Data Processing (EDP) systems. Topics include the personnel and payroll system, inventory, capital acquisition cycle, selected balance sheet and income statement accounts, audit reports, assurances and other services, professional ethics, and legal responsibilities.

3 credits

Advanced Topics in Accounting Research
This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
CHM 110 ................................................................. 3 credits

Introductory Chemistry

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................. 3 credits

Fundamentals of Physics

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

The American Experience Since 1945

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

State and Local Political Processes

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science/Concentration in Accounting (Ohio)

The following Bachelor of Science/Concentration in Accounting (BSACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Accounting (BSACC) promotes identification with, and orientation to, the accounting profession and is designed to provide knowledge and skills necessary to an accounting career. In addition to the key accounting course work at the introductory and intermediate levels, critical areas of study including auditing and taxation are required in the program. The importance of ethics and international issues are emphasized throughout the curriculum, along with core competencies in technology and communication. The program utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. The program also addresses the goals of professional values, communications and leadership skills, strategic and critical thinking skills, and technology skills of the professional accounting environment and provides additional coverage on the International Financial Reporting Standards (IFRS). Students are also exposed to varied business disciplines including economics, statistics, business law, corporate finance, and marketing to provide the general business overview and context necessary for accounting studies. This program is consistent with generally accepted accounting principles, including the accounting processes and knowledge areas that lead to professional certification.

At the conclusion of the BSACC program:

- Graduates will be able to apply financial accounting principles to record and communicate business activities to stakeholders.
- Graduates will be able to analyze accounting financial statements to support effective fiscal decision making.
- Graduates will be able to evaluate various accounting activities in relation to ethical, legal, and professional standards.
- Graduates will be able to demonstrate an understanding of issues in the areas of government and not-for-profit accounting, international transactions, taxation, and auditing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsacc.

Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine requirements. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

- ACC 460 ~ ....................................................................... 3 credits

**Government and Non-Profit Accounting**

**Auditing, 6 total credits**
- ACC 491 ~ ....................................................................... 3 credits

**Contemporary Auditing I**
- ACC 492 ~ ....................................................................... 3 credits

**Contemporary Auditing II**

**Accounting Research, 3 total credits**
- ACC 497 ~ ....................................................................... 3 credits

**Advanced Topics in Accounting Research**

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the BSACC**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- Applicants must be currently employed or have access to a work environment.

**Degree Requirements for the BSACC**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 57 upper division credits.
  - A minimum of 48 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- The diploma awarded for this program will read as follows: Bachelor of Science in Accounting

**General Education Requirements for the BSACC**

A minimum of 48 of the 120 credits must be in the general education areas approved by the University.

**Communication Arts Requirement 6 credits**

(A Track must include: COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)

**Mathematics Requirement 6 credits**

(Must include MTH 209, equivalent, or higher)

**Science & Technology Requirement 6 credits**
Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.

- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

- Students may not complete any of the First-Year Sequence courses via Directed Study.

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSACC

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

(A Track).
• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the required course of study may not be waived: ACC 497 and BCOM 230.

**Course Descriptions for the BSACC**

**Business Communication for Accountants**
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office™ tools including work processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

**MGT 230** ................................................................. 3 credits

**Management Theory and Practice**
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

**MGT 311** ................................................................. 3 credits

**Organizational Development**
This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

**ACC 290** ................................................................. 3 credits

**Principles of Accounting I**
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

**ACC 291** ................................................................. 3 credits

**Principles of Accounting II**
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

**ETH 376** ................................................................. 3 credits

**Accounting Ethics and Professional Relations**
This course provides a foundation in the nature of ethics, moral, legal, and social issues in the accounting and business environments. Students learn topics including ethical reasoning, dealing with controversial issues, and the roles and responsibilities of accounting and auditing professionals. Other topics include a discussion of the AICPA Code of Professional Conduct and the Sarbanes-Oxley Act.

**LAW 421** ................................................................. 3 credits

**Contemporary Business Law**
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

**ECO 365** ................................................................. 3 credits

**Principles of Microeconomics**
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

**ECO 372** ................................................................. 3 credits

**Principles of Macroeconomics**
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

**MKT 421** ................................................................. 3 credits

**Marketing**
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

**FIN 370** ................................................................. 3 credits

**Finance for Business**
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.

Accounting Information Systems I
This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.

Cost Accounting
This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

Intermediate Financial Accounting I
This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.

Intermediate Financial Accounting II
This course is the second of the three part series of courses related to intermediate accounting. This section examines the balance sheet in more detail, including intangible assets, current liabilities and contingencies, long-term liabilities, stockholder's equity, and earnings per share. The course finishes with a look at investments and revenue recognition. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner's equity, investments, income taxes, pensions and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Intertwined in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

Corporate Taxation
This course is a basic introduction to federal corporate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

Individual/Estate Taxation
This course is a basic introduction to federal individual and estate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

Government and Non-Profit Accounting
This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.

Contemporary Auditing I
This course is the first in a two-part series that deals with auditing a company’s financial reports, internal controls, and Electronic Data Processing (EDP) systems. Topics include auditing standards, evidence, audit planning and documentation, materiality and risk, internal control, statistical tools, and the overall audit plan and program.

Contemporary Auditing II
This course is the second in a two-part series that deals with auditing a company’s financial reports, internal controls, and Electronic Data Processing (EDP) systems. Topics include the personnel and payroll system, inventory, capital acquisition cycle, selected balance sheet and income statement accounts, audit reports, assurances and other services, professional ethics, and legal responsibilities.

Advanced Topics in Accounting Research
This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
MTH 209................................................................................... 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

GEN 200 ................................................................................... 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ................................................................................... 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................................... 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

Associate Programs Pathways Program
Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:
• Pathways Non-degree Application
• High School Junior or Senior Standing
• Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
• Parent or guardian consent
• $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.
COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

Associate of Arts/Concentration in Information Technology

The following Associate of Arts/Concentration in Information Technology (AAIT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Information Technology focuses on basic understanding of programming practices, web design and the creation of web pages, local and wide area networking and information systems security. Courses build upon the fundamentals of information technology to give students the skills needed to address and solve real-world IT problems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology

IT 210 ~ 3 credits
Fundamentals of Programming with Algorithms and Logic

IT 236 ~ 3 credits
Intro to Web Design I

IT 237 ~ 3 credits
Intro to Web Design II

IT 240 ~ 3 credits
Introduction to LAN Technologies

IT 242 ~ 3 credits
Introduction to WAN Technologies

IT 244 ~ 3 credits
Introduction to IT Security

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAIT

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAIT

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: LIS 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for AAIT

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-“ or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Academic Progression Requirements for the AAIT**
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track and must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class has been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

**Residency Requirements for the AAIT**
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the AAIT**

**Fundamentals of Programming with Algorithms and Logic**
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 210 .................................................................3 credits

**Intro to Web Design I**
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

IT 237 .................................................................3 credits

**Intro to Web Design II**
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

IT 240 .................................................................3 credits

**LAN Technologies**
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

IT 242 .................................................................3 credits

**Introduction to WAN Technologies**
This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocols, hardware selection and usage, and basic W N security considerations and planning.
IT 244 ~ Intro to IT Security
General concepts of information systems security will be introduced. Content includes governmental views, positions and processes of national security. Other concepts include contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.

COM 150 ~ Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

IT 220 ~ Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ~ Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ~ Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media including television, Internet, and print to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ~ Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

IT 244 ~ Introduction to IT Security
The following Associate of Arts/Emphasis in Information Technology (AAIT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with an emphasis in Information Technology focuses on basic understanding of programming practices, web design and the creation of web pages, local and wide area networking and information systems security. Courses build upon the fundamentals of information technology to give students the skills needed to address and solve real-world IT problems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait.

Degree Requirements for AAIT

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Academic Progression Requirements for the AAIT

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class has been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

Residency Requirements for the AAIT

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAIT

IT 210 ........................................................................................3 credits
Fundamentals of Programming with Algorithms and Logic

This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.
IT 236 ............................................................................................ 3 credits

Intro to Web Design I
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

IT 237 ............................................................................................ 3 credits

Intro to Web Design II
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

IT 240 ............................................................................................ 3 credits

LAN Technologies
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

IT 242 ............................................................................................ 3 credits

Introduction to WAN Technologies
This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

IT 244 ............................................................................................ 3 credits

Intro to IT Security
General concepts of information systems security will be introduced. Content includes governmental views, positions and processes of national security. Other concepts include contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.

COM 220 ........................................................................................ 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ........................................................................................ 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ........................................................................................ 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ........................................................................................ 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Concentration in Information Technology/Networking

The following Associate of Arts/Concentration in Information Technology/Networking (AAIT/N) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts in Information Technology/Networking concentration focuses on information systems and the analysis, design, and security of modern computer networks. Courses emphasize Local Area Networks, Wireless Local Area Networks, Wide Area Networks, and network security. Students will be able to simulate network administration tasks through remote access to real hardware and software commonly used in the IT industry. Additionally, courses include scenario-based activities, placing students in real-world situations that allow them to apply foundational knowledge and skills.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-n.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology/Networking - Track A and B

IT 244 ~ ..........................................................3 credits
Intro to IT Security

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAIT/N

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAIT/N

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CTR 205)
(B Track must include: HUM 311)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for AAIT/N

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.
Academic Progression Requirements for the AAIT/N

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class has been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAIT/N

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAIT/N

IT 205.......................................................... 3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 210.......................................................... 3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 240.......................................................... 3 credits
LAN Technologies
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

IT 241.......................................................... 3 credits
Introduction to W-LAN Technologies
Concepts of wireless networking systems include wireless networking topologies, hardware protocols, hardware selection and implementation, interfaces with MAN, LAN and WAN networks, basic wireless security and integration concepts.

IT 242.......................................................... 3 credits
Introduction to WAN Technologies
This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.
IT 244 .................................................................3 credits

Intro to IT Security

General concepts of information systems security will be introduced. Content includes governmental views, positions and processes of national security. Other concepts include contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.

COM 150 .................................................................................3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................................3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ...................................................................................3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ...................................................................................3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. • The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAIT/PRG
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAIT/PRG
IT 205 ........................................................................................3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.
IT 210 ........................................................................................3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.
IT 236 ........................................................................................3 credits
Intro to Web Design I
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.
IT 237 ........................................................................................3 credits
Intro to Web Design II
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.
IT 215 ........................................................................................3 credits
JAVA Programming
JAVA has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming in particular. The syntax and semantics of the JAVA language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java2 Software Development Kit, Student Edition V, 1.4.2_02 2003.
IT 218 ........................................................................................3 credits
Introduction to C/C++
This course introduces the student to C/C++ programming. The syntax and semantics of the C/C++ programming language are used to produce simple computer programs.
COM 150 ................................................................. 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................. 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................................... 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................................... 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Information Technology/Programming (Maryland-Onlne)

The following Associate of Arts/Emphasis in Information Technology/Programming (AAIT/PRG) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

A concentration in Programming offers coursework in computer scripting and programming.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-prg.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology/Programming - Track A and B

IT 205 ~ ................................................................. 3 credits
Management of Information Systems

IT 215 ~ ................................................................. 3 credits
Java Programming
IT 218 ~ ................................................................. 3 credits
Introduction to C/C++

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAIT/PRG
- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
General Education Requirements for the AAIT/PRG

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for AAIT/PRG

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAIT/PRG

- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

### Course Descriptions for the AAIT/WD

#### IT 205
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

**3 credits**

#### IT 210
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

**3 credits**

#### IT 235
Image Editing and Implementation
Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

**3 credits**

#### IT 236
Intro to Web Design I
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe© Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

**3 credits**

#### IT 237
Intro to Web Design II
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

**3 credits**

#### Web Systems
This course builds upon a foundational understanding of Web design and examines professional Web development technologies. Topics include dynamic hypertext markup language (DHMTL), interactive technologies, advanced use of presentational technologies and Web 2.0. Emphasis is placed upon the appropriate use of Web programming tools and professional development standards.
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

Residency Requirements for the AAIT/WD
Students must meet the established University residency requirements for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcribed from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAIT/WD

IT 205 .................................................................3 credits

Management of Information Systems

This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 210 .................................................................3 credits

Fundamentals of Programming with Algorithms and Logic

This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 235 .................................................................3 credits

Image Editing and Implementation

Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

IT 236 .................................................................3 credits

Intro to Web Design I

Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

IT 237 .................................................................3 credits

Intro to Web Design II

This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

IT 238 .................................................................3 credits

Web Systems

This course builds upon a foundational understanding of Web design and examines professional Web development technologies. Topics include dynamic hypertext markup language (DHMTL), interactive technologies, advanced use of presentation technologies and Web 2.0. Emphasis is placed upon the appropriate use of Web programming tools and professional development standards.

COM 150 ..........................................................3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ..........................................................3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ..........................................................3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ..........................................................3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ..........................................................3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Concentration in Information Technology/Information Technology Support

The following Associate of Arts/Concentration in Information Technology/Information Technology Support (AAIT/ITS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree with a concentration in Information Technology/Information Technology Support covers theory and practice to provide a foundation in hardware and software computer support. Online labs give students hands on experience in hardware, software, networking and security fundamentals.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ait-its.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology/Information Technology Support - Track A and B

IT 205 ~ ................................................................. 3 credits
Management of Information Systems
IT 206 ~ ................................................................. 3 credits
PC Applications Support
IT 280 ~ ................................................................. 3 credits
Computer Hardware Fundamentals
IT 282 ~ ................................................................. 3 credits
Computer Software Fundamentals
IT 284 ~ ................................................................. 3 credits
Enterprise Computer Support
IT 286 ~ ................................................................. 3 credits
Computer Maintenance and Troubleshooting

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAIT/ITS

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAIT/ITS

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
 Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Degree Requirements for AAIT/ITS

The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .6 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

Academic Progression Requirements for the AAIT/ITS

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions applications, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAIT/ITS
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

IT 205 ........................................................................................3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.
IT 206 ........................................................................................3 credits
PC Applications Support
This course will prepare students to support Microsoft Office applications. The student will learn the product features of Word, Excel, PowerPoint, Outlook and Access. This course is based on the requirements of the Microsoft Office Specialist certification.
IT 280 ........................................................................................3 credits
Computer Hardware Fundamentals
This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.
IT 282 ........................................................................................3 credits
Computer Software Fundamentals
This course is an introduction to the fundamentals of the Vista and legacy Windows Operating Systems (98/ME, 2000/XP) for computer software configuration, file management, performance monitoring, optimization, maintenance, recover and security. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.
IT 284 ........................................................................................3 credits
Enterprise Computer Support
This course is an introduction to the roles, responsibilities, and skills required to become a professional computer support PC Technician and provide exceptional computer support service. This includes the fundamentals of customer service, effective questioning, verbal and non-verbal communication, on-site support, telephone support, remote e-commerce support, and dealing with difficult customers. This course includes remote access to hands-on, real-world customer support issues and Scenarios.
IT 286 ........................................................................................3 credits
Computer Maintenance and Troubleshooting
This course is an introduction to computer hardware and software maintenance and troubleshooting. Each Module of the course will focus on typical problem scenarios, diagnostics, procedures and solutions. The final Module of this course provides you with a problem scenario to demonstrate your understanding of diagnostic skills and solution implementation. This course includes remote access to hands-on LiveLabs and Scenarios.
Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. - Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Academic Progression Requirements for the AAIT/DBD**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework.
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Residency Requirements for the AAIT/DBD
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of "C" (2.0) or better (five years for information technology courses).
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the AAIT/DBD

IT 205........................................................................................ 3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: computer hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 210........................................................................................ 3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 260........................................................................................ 3 credits
Introduction to Desktop Databases
This course will cover the use desktop database software to create small database applications. Emphasis will be placed on creating databases and forms. Hands-on experience in the installation, design, and debugging of desktop database software will be included in this course.

IT 261........................................................................................ 3 credits
Advanced Desktop Databases
This course is a continuation in the study of desktop database software. Emphasis will be placed on database design, reporting, queries and data analysis using desktop database software.

IT 264........................................................................................ 3 credits
Introduction to SQL
This course provides an introduction to the Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.

IT 265........................................................................................ 3 credits
Managing the Database Environment
This course provides an introduction to the installation, configuration, support, availability and recovery databases. The considerations for database administration addressing the requirements for user access, security, backup and recovery will be covered in this course.
COM 150 .................................................................3 credits  
**Effective Essay Writing**
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................3 credits  
**Research Writing**
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .................................................................3 credits  
**Cultural Diversity**
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .................................................................3 credits  
**Critical Thinking**
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .................................................................3 credits  
**Skills for Learning in an Information Age**
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Emphasis in Information Technology/Database Development Emphasis (Maryland-Online)**

The following Associate of Arts/Emphasis in Information Technology/Database Development Emphasis (AAIT/DBD) degree program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state.

Please contact your enrollment advisor for more information.

This emphasis focuses on the installation and programming of database applications in the business environment. The development of queries and reports from a database are addressed in this program as well as the backup, recovery, and security of databases. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aa-it-dbd.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAIT/DBD**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
General Education Requirements for the AAIT/DBD
Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for AAIT/DBD
The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• All undergraduate students are required to complete the minimum general education credits required by their program version.
• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
• The diploma awarded for this program will read as: Associate of Arts and will not reflect the emphasis. Emphases are reflected on the transcript only.

Academic Progression Requirements for the AAIT/DBD
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. Associate of Arts/Concentration in Information Technology (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Information Technology (AAIT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Information Technology focuses on basic understanding of programming practices, web design and the creation of web pages, local and wide area networking and information systems security. Courses build upon the fundamentals of information technology to give students the skills needed to address and solve real-world IT problems. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-mn.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-ar.

Additional Admission Requirements for AAIT

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAIT for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Arkansas residents must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
Must include: BIO 100 and CHM 109

Students in the AAIT and AAIT/WD programs must complete IT 205 as a required Science course as this course is a prerequisite to courses in the concentration.

The BIO 100 and CHM 109 requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Must include: HIS 135

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

General Education Requirements for the AAIT for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete IT 205 as a required Science course as this course is a prerequisite to courses in the concentration.

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

**Degree Requirements for the AAIT**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All undergraduate students are required to complete the minimum general education credits required by their program version.
- Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- The diploma awarded for this program will read as: Associate of Arts and will not reflect the concentration. Concentrations are reflected on the transcript only.

**Academic Progression Requirements for the AAIT**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- HUM 111 will be required as the last course in the First-Year Sequence and may be taken concurrently with non-FYS or FYS courses. All other FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (15 credit limit on experiential learning; 15 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

**Residency Requirements for the AAIT**
