- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
  To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

**Academic Progression Requirements for the MAED/TED-E**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-E**

- A candidate must earn a grade of "B" (grades of "I" and "F" are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/TED-E**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514 Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Program: however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Institutional Recommendation for the MAED/TED-E**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Field Experience for the MAED/TED-E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-E**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Course Descriptions for the MAED/TED-E**

- MTE 507: Orientation to Teacher Education
  This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio,
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522 .................................................................................. 3 credits

Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 .................................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 .................................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.
RDG 537 .................................................................................. 4 credits

Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
SEI 500 .................................................................................. 3 credits

Structured English Immersion
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.
SEI 503 .................................................................................. 3 credits

Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.
SPE 514 .................................................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 531 .................................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.
MTE 533 .................................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students...
The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s. Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Elementary Student Teaching Part A**

- **4 credits**

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

**Elementary Student Teaching Part B**

- **4 credits**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem-solving based on classroom experiences.

---

**Curriculum Constructs & Assessment: Visual and Performing Arts**

- **2 credits**

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

---

**Curriculum Constructs & Assessment: Physical Education and Health**

- **2 credits**

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students residing in Tennessee and/or attending University of Phoenix Online must have an undergraduate degree in a content area recognized by the Tennessee State Board of Education. Refer to the Tennessee State Board of Education website for a list of the recognized degree areas for teacher licensure at the secondary level. The campus is responsible for verifying that the student’s undergraduate degree area is the same as the licensure area sought, student teaching placement, and required state subject area exam. The campus verification is not required to be on file at time of admission.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies. The student must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
  - Immunization or TB test results (District specific)
  - Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)

• The University reserves the right to modify the required course of study. In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The diploma awarded for this program will read as: Master of Arts in Education

Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience. Students’ undergraduate degree area must be the same as the licensure area sought, student teaching placement, and required state subject area exam.

• Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S

A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.

• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Requirements for the MAED/TED-S

• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.

• Completion of Field Experience Observation Report (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolios.

• Completion of e-portfolios.

• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The diploma awarded for this program will read as: Master of Arts in Education

Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience. Students’ undergraduate degree area must be the same as the licensure area sought, student teaching placement, and required state subject area exam.

• Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S

A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.

• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 523, MTE 559, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Institutional Recommendation for the MAED/TED-S

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Course Descriptions for the MAED/TED-S

MTE 507 ................................................................. 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be
introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516** ................................................................. 1 credit

**Professional Communications**
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501** ................................................................. 2 credits

**The Art and Science of Teaching**
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**SEC 508** ................................................................. 3 credits

**Models, Theories and Strategies for Secondary Education**
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523** ................................................................. 3 credits

**Maintaining an Effective Learning Climate**
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** ................................................................. 2 credits

**Child and Adolescent Development**
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**MTE 562** ................................................................. 3 credits

**Assessment and Evaluation**
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 542** ................................................................. 3 credits

**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

**SEI 500** ................................................................. 3 credits

**Structured English Immersion**
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

**SPE 514** ................................................................. 2 credits

**Survey of Special Populations**
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 559** ................................................................. 3 credits

**Curriculum Constructs and Assessment: Secondary Methods**
This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

**SEI 503** ................................................................. 3 credits

**Advanced Structured English Immersion Methods**
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

**SEC 598** ................................................................. 4 credits

**Secondary Student Teaching Part A**
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students must consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admission requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
**Candidacy Status for the MAED/TED-E**
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TED-E**

- Completion of a minimum of 41 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- The course must be comparable in content and credits to the course prerequisite requirements.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

**Academic Progression Requirements for the MAED/TED-E**
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Students enrolled at a Utah campus must provide verification of a ‘student teaching license’ and submit a copy of the license prior to the student teaching placement
- Students enrolled at the Utah campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching
- Verification of the completion of 100 hours of field experience Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-E**

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/TED-E**
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-E**
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic
portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-E**

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching**

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Institutional Recommendation for the MAED/TED-E**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

| parent com-
munication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 ................................................................. 4 credits

Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SPE 514 ................................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 553 ................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multilingual curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

MTE 531 ................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ................................................................. 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ................................................................. 2 credits

Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

ELM 598 ................................................................. 4 credits

Elementary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599 ................................................................. 4 credits

Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher
Education (Utah)

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. The University reserves the right to modify the Required Course of Study.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Upon admission, student must have completed all but six (6) semester hours in the required secondary endorsement area. These additional six (6) credits must be completed prior to student teaching. Information regarding endorsement coursework requirements for secondary teacher licensure can be located on the Utah State Office of Education website.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status for the MAED/TED-S**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed: Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TED-S**

• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)

- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Course Descriptions for the MAED/TED-S

MTE 507 ...................................................................................... 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ..................................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ...................................................................................... 2 credits

The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies,
professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 .................................................................................................................. 3 credits

Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 523 ................................................................................................................... 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 ................................................................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 ................................................................................................................... 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.
RDG 542 ................................................................................................................... 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.
SPE 514 .................................................................................................................... 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 553 ................................................................................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
MTE 559 .................................................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Methods
This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.
MTE 564 .................................................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.
MTE 566 .................................................................................................................... 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 567 .................................................................................................................... 3 credits

Curriculum Constructs & Assessment: Secondary History/Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 569 .................................................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the
secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 556 ................................................................................... 3 credits

Curriculum Constructs & Assessment: Distance Education Methods for Secondary Schools

This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557 ................................................................................... 3 credits

Language Development for Secondary Settings

This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504 ................................................................................... 3 credits

Adolescent Psychology

This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced. Previous course description: This course covers adolescent psychology from a historical perspective to present day societal influences and pressures. Current trends and methods of learning in adolescent education will also be covered.

MAT 538 ................................................................................... 3 credits

Middle School Foundations and Philosophy

This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments. Previous description: This is a draft of the description. This course examines the junior high and middle school. The course will evaluate the unique characteristics of the adolescent, diversity among middle school students, structures of middle school, and curriculum and instruction.

CMP 521 ................................................................................... 3 credits

Using Computers in Education

This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598 ................................................................................... 4 credits

Secondary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ................................................................................... 4 credits

Secondary Student Teaching Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (Nevada)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

University of Phoenix, 2013-2014

COLLEGE OF EDUCATION (Online)
University of Phoenix, 2013-2014

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.

  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Academic Progression Requirements for the MAED/TED-E

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)

• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)

• Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.

• Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E

• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Degree Completion Requirements for the MAED/TED-E**

- The completion of a minimum of 46 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

**Institutional Recommendation for the MAED/TED-E**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/TED-E**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Program; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-E**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g., 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Course Descriptions for the MAED/TED-E

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................. 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................. 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ................................................................. 3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................. 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 ................................................................. 4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 586 ................................................................. 3 credits
Children’s Literature
This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied, as well as the application of children’s literature to instruction and assessment in reading. Methods for incorporating the use of children’s literature in all content areas will also be examined.

MTE 529 ................................................................. 2 credits
Reading and Phonological Theory
This course expounds upon the basic premise that systematically
integrated phonics instruction is a fundamental component of effective reading programs. Students will study the relevant research and applications that support principles of sequential phonics instruction and phonological awareness and review traditional and contemporary phonics approaches.

SPE 514 .......................................................... 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 533 ................................................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

MTE 531 ................................................................................... 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................................... 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ................................................................................... 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ................................................................................... 2 credits

Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on scope, sequence, and state and national standards. This course will include framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course will also include framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas will be explored.

ELM 599 .......................................................... 4 credits

Elementary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem-solving based on classroom experiences.

ELM 599 .......................................................... 4 credits

Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education (Nevada)

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified class-

University of Phoenix, 2013-2014

COLLEGE OF EDUCATION (Online)
room teacher. Throughout the program, students are required to
complete a minimum of 100 hours of verified field experiences,
covering a variety of developmental levels. The focus of each
observation will relate to specific course content. Documentation
will be maintained in the student’s professional portfolio.
For more information about our graduation rates, the median debt
of students who completed the program, and other important
information, please visit our website at http://www.phoenix.edu/

The University reserves the right to modify the required course of
Study.
Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions
requirements:
• Students enrolled in this program must have an undergraduate
degree from a nationally accredited college or university or
equivalent undergraduate degree earned at a recognized foreign
institution.
• Upon admission, student must have completed all but six (6)
semester hours in the required subject majors and/or minors.
These additional six (6) credits must be completed prior to
student teaching. Information regarding acceptable majors/
minors and credit requirements for secondary teacher licensure
will be maintained in the student’s professional portfolio.
• Students using foreign credentials when enrolling in a program
leading to initial teacher certification/licensure must use a
foreign credential evaluation service that is on both the
approved University of Phoenix evaluation agency list and the
state regulating board list of approved agencies, for the
particular state in which the student is attending. These require-
ments must be completed within six (6) years of admission.
All applicants must be currently employed or have access to a
suitable work environment for the completion of course
assignments.
• A cumulative grade point average (GPA) of 2.5 on the
undergraduate degree posted transcript is required for
admission.
Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of
Level 1 Candidate Status and Level 2 Candidate Status. Applicants
must meet the requirements for both levels of candidacy status to
continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the
University. Students who are admitted have met the
requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of
12 semester credits of the program. To meet the Candidate
Status Level 2 requirements, the following items must be
completed. Evidence that these requirements have been met
must be entered in IS3 and the student's eXp file.
• Demonstration of basic skills proficiency
• Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
- Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Degree Completion Requirements for the MAED/TED-S**

- The completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

**Institutional Recommendation for the MAED/TED-S**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/TED-S**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-S**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to
Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

• Student teaching can only be repeated one time.

• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Course Descriptions for the MAED/TED-S

MTE 507 ...................................................................................0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .......................................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 .....................................................................................2 credits

The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 .....................................................................................3 credits

Models, Theories and Strategies for Secondary Education

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .....................................................................................3 credits

Maintaining an Effective Learning Climate

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .....................................................................................2 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .....................................................................................3 credits

Assessment and Evaluation

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct
objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 542** ............................................................................................................. 3 credits

### Curriculum Constructs & Assessment: Reading Methods for Secondary Settings

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

**MTE 553 ............................................................................................................. 3 credits**

### Instruction and Assessment of English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**SPE 514 ................................................................. 2 credits**

### Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 564 ............................................................................................................. 3 credits**

### Curriculum Constructs and Assessment: Secondary Math

This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

**MTE 566 ............................................................................................................. 3 credits**

### Curriculum Constructs & Assessment: Secondary English/Language Arts

This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

**MTE 567 ............................................................................................................. 3 credits**

### Curriculum Constructs & Assessment: Secondary History/Social Science

This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

**MTE 569 ............................................................................................................. 3 credits**

### Curriculum Constructs and Assessment: Secondary Science

This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

**MTE 556 ............................................................................................................. 3 credits**

### Curriculum Constructs & Assessment: Distance Education Methods for Secondary Schools

This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

**MTE 557 ............................................................................................................. 3 credits**

### Language Development for Secondary Settings

This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

**MAT 504 ............................................................................................................. 3 credits**

### Adolescent Psychology

This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced.

**MAT 538 ............................................................................................................. 3 credits**

### Middle School Foundations and Philosophy

This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment.
Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments.

**Using Computers in Education**

This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

**Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Secondary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Master of Arts in Education/Special Education (Hawaii)**

The following Master of Arts in Education/Special Education (MAED/ SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

 Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in ISS and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
- Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
  - Immunization or TB test results (District specific)
  - Passing scores on the designated state content knowledge exam.
  - Verification of the completion of 100 hours of field experience
- Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

 Minimum Grade Requirements for the MAED/SPE
- Candidates must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594, SPE 595.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

 Institutional Recommendation for the MAED/SPE
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
- Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 7 years.

 Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/SPE**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/SPE**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
- Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/SPE program and earn a Hawaii credential.

**Course Descriptions for the MAED/SPE**

MTE 507 ....................................................................................0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ....................................................................................1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and
evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ................................................................. 3 credits

Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ................................................................. 3 credits

Models, Theories and Instructional Strategies for SPE
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 ................................................................. 3 credits

Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 ................................................................. 3 credits

Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 ................................................................. 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child's abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 ............................................................. 4 credits

Curriculum Const and Asssmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 553 ................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 574 ................................................................. 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 ................................................................. 3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 ................................................................. 3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 ................................................................. 3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594 ................................................................. 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 ................................................................. 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance.
in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (New Mexico)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/maed-spe.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

706
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  • Students must take and pass a New Mexico assessment of teacher basic skills.
  • Verification of fingerprint clearance
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE
• A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of the Teacher Work Sample (TWS).
• Satisfactory completion of an internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience.
• Immunization or TB test results. (District specific)
• Students must take and pass the New Mexico content knowledge assessment in Special Education.
• Verification of the completion of 100 hours of field experience Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
• Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 7 years.

Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Course Descriptions for the MAED/SPE**

- **MTE 507** .....................................................................................0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

- **COM 516** .....................................................................................1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

- **SPE 513** .....................................................................................3 credits

**Orientation to the Exceptional Child**

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

- **SPE 578** .....................................................................................3 credits

**Models, Theories and Instructional Strategies for SPE**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

- **SPE 546** .....................................................................................3 credits

**Special Education Methods**

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

- **SPE 575** .....................................................................................3 credits

**Inclusion Strategies of the Special Educator**

This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

- **SPE 512** .....................................................................................3 credits

**Special Education Assessment and Interpretation**

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing
his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

RDG 570  ........................................................................................................... 4 credits

Curriculum Const and Assmt: Reading and Lang Arts for SPE

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

RDG 535  ........................................................................................................... 3 credits

Diagnosis & Remediation of Reading Difficulties

This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.

SPE 574  ........................................................................................................... 3 credits

Characteristics of Intellectual/Developmental Disabilities

This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559  ........................................................................................................... 3 credits

Characteristics of Learning Disabilities

This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544  ........................................................................................................... 3 credits

Characteristics of Emotional & Behavioral Disabilities

This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556  ........................................................................................................... 3 credits

Characteristics of Physical & Health Disabilities

This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594  ........................................................................................................... 4 credits

Special Education Student Teaching: Part A

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595  ........................................................................................................... 4 credits

Special Education Student Teaching: Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Colorado)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status for the MAED/SPE**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/SPE**

- Completion of a minimum of 45 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (200 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

**Academic Progression Requirements for the MAED/SPE**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Verification of content knowledge mastery prior to student teaching ((PLACE or PRAXIS)
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/SPE**
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn from the program.

**Institutional Recommendation for the MAED/SPE**
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/SPE**
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 500, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Colorado Students in the CERT/SPE program who have successfully completed all courses and wish to earn a master’s degree will waive SPE 594 and SPE 595 Student Teaching Part A and Part B with credit. These students will be required to complete MTE 553 Instruction and Assessment of English Language Learners and MTE 562 Assessment and Evaluation.

**Field Experience for the MAED/SPE**
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/SPE**
- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 generalist special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 generalist special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 15 weeks of student teaching, including the completion of a Teacher Work Sample project.

**Course Descriptions for the MAED/SPE**

**MTE 507** ................................................................. 0 credits

**Orientation to Teacher Education**
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 .....................................................................................3 credits

Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 .....................................................................................3 credits

Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 .....................................................................................3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 500 .....................................................................................3 credits

Scientifically Based Reading Instruction
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children’s performance in reading and in the language arts are also emphasized.

MTH 506 .....................................................................................3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

MTE 553 .....................................................................................3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 574 .....................................................................................3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 .....................................................................................3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 .....................................................................................3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 .....................................................................................3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to fed-
eral and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594 ..................................................................................... 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

SPE 595 ..................................................................................... 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Utah)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

The University reserves the right to modify the required course of Study.
Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in I53 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE
• A minimum of 41 graduate credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The diploma awarded for this program will read as:
  Master of Arts in Education
  Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam.
• Students enrolled at a Utah campus must provide verification of a ‘student teaching license’ and submit a copy of the license prior to the student teaching placement.
• Verification of the completion of 100 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594, SPE 595
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, SPE 546, SPE 594, SPE 595

Candidates enrolled in the MAED/TED program must student teach in the appropriate cross-categorical special education student teaching setting.

Candidates in the MAED/TED program must complete a minimum of 100 hours of verified field experience, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Course Descriptions for the MAED/SPE

MTE 507 ..................................................................................... 0 credits
Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ..................................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ..................................................................................... 3 credits
Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ..................................................................................... 3 credits
Models, Theories and Instructional Strategies for SPE

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 ..................................................................................... 3 credits
Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/
career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

MTE 506 ........................................................................... 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
SPE 512 ........................................................................... 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.
RDG 535 ........................................................................... 3 credits

Diagnosis & Remediation of Reading Difficulties
This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.
MTH 506 ........................................................................... 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.
SPE 559 ........................................................................... 3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.
SPE 574 ........................................................................... 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.
SPE 544 ........................................................................... 3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.
SPE 575 ........................................................................... 3 credits

Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored.
This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.
SPE 594 ........................................................................... 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SPE 595 ........................................................................... 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Nevada)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. **Additional Admission Requirements for the MAED/SPE**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status for the MAED/SPE**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in ISS and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/SPE**

- A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (cross-categorical [generalist] special education content area specific)
• Verification of the completion of 100 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
• A candidate must earn a grade of “B” (grades of “I” and “D” are not accepted) or better in the following courses: SPE 594 and SPE 595.
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, RDG 570, SPE 546, SPE 557, SPE 558, SPE 591, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpose their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical (generalist) special education student teaching setting.
• Students who are already teaching in an appropriate K-12 cross-categorical (generalist) special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical (generalist) special education setting that meets their state requirements for student teaching.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Institutional Recommendation for the MAED/SPE
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Course Descriptions for the MAED/SPE
MTE 507 .................................................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 .................................................................................... 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix, 2013-2014 orientations with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
SPE 513 .................................................................................... 3 credits
Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.
MTE 523 .................................................................................... 3 credits
Maintaining and Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 546 .................................................................................... 3 credits
Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.
MTE 505 .................................................................................... 3 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
SPE 512 .................................................................................... 3 credits
Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.
RDG 570 .................................................................................... 4 credits
Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
MTH 506 .................................................................................... 3 credits
Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.
MTE 553 .................................................................................... 3 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and
The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, characteristics of exceptionalities, diagnosis and assessment of disabilities, reading and language arts instruction, math instruction, transition planning and collaboration with families. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Instruction and Management for Special Needs Students, 6

The following Master of Arts in Education/Special Education-Cross Categorical (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.
**Academic Progression Requirements for the MAED/SPE**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
- Passing scores on the designated state content knowledge exam (cross-categorical special education content area specific)
- Some schools/districts may require candidates to provide verification of immunization and/or TB test results. Candidates must comply with the requirements of the school/district if they wish to work at that location.
- Verification of the completion of 100 hours of field experience
- Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/SPE**

A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595

- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.
Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previously course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 533, RDG 570, SPE 546, SPE 575, SPE 578, SPE 591, SPE 594, SPE 595

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Course Descriptions for the MAED/SPE

MTE 507 ...................................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .....................................................................................1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 .....................................................................................3 credits
Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans,
Characteristics of Exceptionalities
SPE 578................................................................................... 3 credits

Models, Theories and Instructional Strategies for SPE
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
SPE 546.......................................................... 3 credits

Special Education Assessment and Interpretation
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.
SPE 512.......................................................... 3 credits

Enclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.
SPE 512.......................................................... 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.
RDG 570.......................................................... 4 credits

Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
SPE 591.......................................................... 3 credits

Characteristics of Exceptionalities
This course examines teaching and managing students with mild disabilities. Special emphasis is placed on learning disabilities, mental retardation, and emotional disabilities. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed in depth.
MTE 553.......................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 594.......................................................... 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
SPE 595.......................................................... 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
MTE 533.......................................................... 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

Master of Arts in Education/Special Education
The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and
assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

• Demonstration of basic skills proficiency
• Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

• Completion of a minimum of 46 credits. All but six (6) credits of the major course of study must be completed at the University to meet residency requirements.

• A minimum grade point average (GPA) of 3.0.

• Satisfactory completion and uploading of the Teacher Work Sample (TWS).

• Satisfactory completion of any required internship, student teaching, and/or practicum courses.

• Students must take courses within a sequence specified by course prerequisite requirements.
Courses Waived

- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
- Arizona or Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 10 years.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:

- Arizona Provisional SEI Endorsement (SEI/500)
- Arizona Full SEI Endorsement (SEI/500 and SEI/503)
- Arizona English as a Second Language Endorsement
- Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at: https://www.ade.az.gov/oelas/.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must earn a “B” or better in Student Teaching. Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-termiations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Arizona Teaching Intern Certificate Program

The requirements for initial issuance of the teaching intern certificate are:

- A Bachelor’s degree or higher from an accredited institution
- A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant’s teaching assignment(s)
- Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
- A valid fingerprint clearance card issued by the Arizona Department of Public Safety

Course Descriptions for the MAED/SPE

MTE 507 .....................................................................................0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .........................................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 .....................................................................................3 credits

Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 .........................................................................................3 credits

Models, Theories and Instructional Strategies for SPE

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 .....................................................................................3 credits

Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 .........................................................................................3 credits

Inclusion Strategies of the Special Educator

This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activi-
ties that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 ................................................................. 3 credits
Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 ................................................................. 4 credits
Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SEI 500 ................................................................. 3 credits
Structured English Immersion
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 ................................................................. 3 credits
Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of EL proficiency standards to Arizona’s academic standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 574 ................................................................. 3 credits
Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 ................................................................. 3 credits
Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 ................................................................. 3 credits
Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 ................................................................. 3 credits
Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594 ................................................................. 4 credits
Special Education Student Teaching: Part A
This course focuses on the design and implementation of the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 ................................................................. 4 credits
Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Tennessee)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the online classroom at online rates if the program is available via the online modality in their state. Please contact your enrollment advisor for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and
assessments of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student's electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student's area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidate Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- A minimum of 46 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
Courses Waived

- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

A candidate must earn a grade of "B" (grades of "I" and "B-") are not accepted) or better in the following courses: SPE 594 and SPE 595.

Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.

If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Candidates must pass their state-mandated professional knowledge exam.

- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

<tr>
<td>MAED/SPE</td>
<td>SPE 578</td>
</tr>
</tbody>
</table>

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
 Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.

Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.

Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

SEI 500 ............................................................................................................ 3 credits

Structured English Immersion
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 ............................................................................................................ 3 credits

Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 574 ............................................................................................................ 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 ............................................................................................................ 3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 ............................................................................................................ 3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594 ............................................................................................................ 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 ............................................................................................................ 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Early Childhood Education

The following Master of Arts in Education/Early Childhood Education (MAED/ECH) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Early Childhood Education is a graduate degree program preparing candidates for teacher licensure in the field of early childhood (birth to age eight). Candidates for this program have already earned a bachelors degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming competent and effective early childhood educators. The curriculum is based on state and national standards for early childhood education. It includes theories of early childhood growth and development, the significance of family and cultural diversity for learning, the use of developmentally appropriate practices, assessment techniques, and technology to promote learning. Student teaching is an integral component of the Early Childhood Education Program. It provides students with a field-based experience in two early childhood settings. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor in an early childhood setting that serves children birth through preschool as well as an early childhood setting that serves children in kindergarten through grade three. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified early childhood educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of observations related to specific course...
content will be conducted in an early childhood setting that serves children birth through preschool as well as in an early childhood setting that serves children in kindergarten through grade three. Documentation will be maintained in the students professional portfolio.

This program is an Arizona-approved program designed to meet the academic requirements for Arizona certification.

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at 360-725-6320 or profed@k12.wa.us to determine whether this program may qualify for salary advancement.

For more information about our graduation rates, the median debt, and salary advancement.

Additional Admission Requirements for the MAED/ECCH

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

- Students must be admitted and meet Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/ECCH

- Completion of a minimum of 46 credits.
- A minimum of 46 graduate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma for this program will read as follows: Master of Arts in Education
• Academic Progression Requirements for the MAED/ECH
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Verification of immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam.
• Verification of the completion of 100 hours of field experience

Minimum Grade Requirements for the MAED/ECH
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ECH 598, ECH 599
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/ECH program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/ECH
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
• Arizona or Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 10 years.

Residency Requirements and Course Waivers for the MAED/ECH
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Arizona residents may waive SEI 510 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:
  • Arizona Provisional SEI Endorsement (SEI/500)
  • Arizona Full SEI Endorsement (SEI/500 and SEI/503)
  • Arizona English as a Second Language Endorsement
  • Arizona Bilingual Endorsement
Approved SEI courses/workshops can be found at https://www.ade.az.gov/oelas/.

Field Experience for the MAED/ECH
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of early childhood developmental levels. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/ECH
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.

Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/ECH program must student teach in an early childhood setting (Birth - Age 8). Candidates are required to complete two separate student teaching experiences for a total of twelve (12) weeks. Student teaching must include a minimum of six (6) weeks in a teaching setting serving children birth through preschool/pre-kindergarten and a minimum of six (6) weeks in a teaching setting serving children in kindergarten through Grade 3. The birth through preschool/pre-kindergarten student teaching site must be licensed by the Department of Health Services or regulated by tribal or military authorities.

Candidates in the MAED/ECH program may not student teach in special education.

MAED/ECH candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Course Descriptions for the MAED/ECH

MTE 507 .................................................................................... 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ....................................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

ECH 506 ....................................................................................... 3 credits

Introduction to Early Childhood Education

This course provides an overview of early childhood education for children, birth through age eight. Topics include theories and history of early childhood education, play theories, program types and models, and public policy trends. The course examines the significance of developmentally effective learning experiences throughout early childhood programs.

ECH 508 ....................................................................................... 3 credits

Models, Theories and Instructional Strategies for Early Childhood Education

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

ECH 523 ....................................................................................... 3 credits

Maintaining an Effective Learning Climate

This course examines developmentally effective strategies used in managing a positive classroom environment within the framework of special needs students ages birth to grade three. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, technology integration, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for an early childhood setting.

ECH 513 ....................................................................................... 3 credits

Growth and Development in Early Childhood

This course examines the theories, concepts, and trends related to early childhood growth and development from prenatal development through the early school years. It examines the physical, social, emotional, cognitive, and language and literacy development of children from birth through age eight. The course discusses both typical and atypical development of young children of diverse cultural backgrounds. It includes observation and activities to guide teachers and caregivers in providing opportunities that support the physical, social, emotional, language, and cognitive development of children from birth through age eight.

ECH 548 ....................................................................................... 3 credits

Early Childhood Assessment Strategies

This course provides exposure to a variety of assessment techniques in early childhood education, including children with spe-
survey of special populations

this course addresses structured english immersion (sei) instruction and assessment of k-12 english language learners (ell), and is designed to meet the standards set by the arizona department of education. it examines the legal, historical, and educational reasons for sei, as well as theoretical principles of language acquisition and the role of culture in learning. it also emphasizes the alignment of ell proficiency standards to arizona’s academic standards and their application to lesson planning. the arizona english language learner assessment (azella), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. a final project synthesizes the concepts and instructional strategies taught in the course.

methods of teaching in early childhood: the arts

this course focuses on understanding and using developmentally effective practices to teach and to integrate music, creative movement, dance, drama, and art in early childhood education. curricular content, modifications, development of hands-on learning experiences, and integration of content area standards are explored. a foundation in effective teaching and assessment methodologies in the early childhood setting is provided.

methods of teaching in early childhood: mathematics and science

this course focuses on understanding and using developmentally effective practices to teach and to integrate mathematics and science concepts and skills in early childhood education (birth through age eight). developing meaningful curricular content, modifications, hands-on learning experiences, and integration of early childhood content area standards are explored. a foundation in developmentally effective teaching and assessment of the content area is provided.

methods of teaching in early childhood: social studies

this course provides a solid foundation in program content and methodology for the teaching of social studies. it explores curricular content, modifications, development of hands-on learning experiences, integration of content area standards, and the impact of new technology. effective instructional methodologies for teaching social studies are addressed.

early childhood student teaching part a

this course will focus on the design and implementation of the teacher work sample. the course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

early childhood student teaching part b

this course will focus on the design and implementation of the teacher work sample. it also provides students practical guidance in securing a teaching position. students will examine resumes and cover letters, teaching applications, and interview strategies. assistance in preparing an employment portfolio will be provided. this seminar also provides a forum for open discussion and problem solving based on early childhood student teaching classroom experiences.

master of arts in education/teacher leadership

the following master of arts in education (maed)/teacher leadership program may be offered at these university of phoenix campus locations: online, depending on state of residence. the availability of programs and concentrations depend on student demand and other factors. not all programs may be available to all residents of all states. students may want to consider completing certain courses in the online classroom at online
rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education program with a specialization in Teacher Leadership is intended for P-12 teachers who define themselves as learners, teachers, and leaders. Teachers become servant leaders who empower themselves and others to directly impact school culture as champions of innovation and facilitators of school improvement, professional development, and student achievement. The program provides advanced knowledge in collaboration, coaching and mentoring, decision making, planning, action research, and evaluation. Graduates will be able to serve their students, colleagues, and communities as ethical leaders committed to excellence.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tl.

**Additional Admission Requirements for the MAED/TL**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Degree Completion Requirements for the MAED/TL**

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of the action research proposal.
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read: Master of Arts in Education Teacher Leadership

**Residency Requirements and Course Waivers for the MAED/TL**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of prior graduate level coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, EDD 581.

**Course Descriptions for the MAED/TL**

**COM 516**                          ................................................................. 1 credit

**Professional Communications**
include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

EDL 501 ........................................................................................................ 0 credits

**Orientation to Teacher Leadership**

This course is designed to provide an orientation to the primary components of the Teacher Leadership Program. Students will be introduced to the program’s degree completion requirements. Course overviews, field experience, E-Portfolios, and technology resources will be discussed. Check with your local campus to see if this course is necessary.

EDL 500 ........................................................................................................ 3 credits

**Personal Leadership**

This course focuses on developing a personal philosophy of leadership. Students engage in self-assessment activities that reveal how individual values and beliefs directly influence personal leadership. Students examine their own organization and stakeholders who may play a role in their journey in school leadership. Aspects of effective communication are also addressed as students explore contemporary leadership theorists and popular beliefs behind organizations and school systems that will help build a foundation for personal growth.

EDL 505 ........................................................................................................ 3 credits

**Cultural Competency**

Culturally responsive teachers facilitate and support learning for all students regardless of their diversities. This course deepens candidates’ understanding of teaching and learning through examination of the diverse make-up of today’s communities, schools, and classrooms. Through personal reflection and identification of theoretically sound and culturally responsive pedagogy, this course prepares the candidate to model, mentor, and lead efforts in creating a school climate that effectively addresses the learning needs of all students.

EDL 510 ........................................................................................................ 3 credits

**Teacher Leadership in a Global Society**

This course focuses on contemporary theories of school reform and effective teacher leadership in a global society. Performance indicators and dispositions as related to evaluation or decision making are explored. Candidates examine components of effective teacher leadership, including empowering others, building collaborative organizational cultures, and making informed decisions for strategic planning, while creating a vision of change. They also explore how effective leadership provides them with multiple opportunities to critically analyze and apply various leadership styles. Course content reflects research-based frameworks on leadership and leadership processes that will assist candidates in becoming effective teacher leaders. Candidates participate in a theoretical and applied learning approach, which incorporates research and reflective writing activities, case studies, self-assessment, and collaborative team projects that are closely aligned with the National Board Professional Teaching Standards.

AET 541 ........................................................................................................ 3 credits

**E-Learning**

This course focuses on e-learning for adult learners. Students will apply instructional design techniques, learning theory, and technical tools to propose appropriate e-learning solutions to knowledge gaps and performance challenges.

EDL 515 ........................................................................................................ 3 credits

**Organizational Leadership**

This course focuses on the principles of organizational leadership. It examines the origins and components of effective organizations, as well as frames of leadership. Candidates apply their knowledge of these frames in reflecting on their organization. Additionally, they learn the skills to reframe their organization, provide leadership in turbulent times, and become agents and advocates of change.

EDL 520 ........................................................................................................ 3 credits

**Instructional Leadership**

This course is designed to provide professional teachers an introduction to instructional leadership. Candidates utilize an instrument of self-assessment and explore opportunities for leadership with reference to theoretical and practical aspects of school improvement. Candidates create a leadership plan that outlines long-term and short-term goals for continuous development of their leadership skills. In addition, they evaluate instructional practices, determine the effectiveness of teaching within the school curriculum, and propose appropriate strategies to improve instructional performance as outlined in research and theory as “best practices.”

EDL 525 ........................................................................................................ 3 credits

**Accountability and Evaluation**

This course is designed to provide teacher leaders with an understanding of assessment, evaluation, and accountability components that are necessary to analyze curriculum, educational resources, test data and current accountability regulations. Students will apply procedures for evaluating and recommending strategies for improving the quality and effectiveness of curriculum and assessment as they relate to instruction.

EDL 531 ........................................................................................................ 3 credits

**Mentoring and Coaching**

This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

EDL 535 ........................................................................................................ 3 credits

**Legal and Ethical Issues in Education**

This course provides teacher leaders with the opportunity to examine current legal and ethical issues in the educational setting. Legal and ethical issues will be identified through action research activities covering current laws, policies and politics, moral issues, academic integrity, privacy and confidentiality, legal issues involved in grant writing and discrimination and equal protection. These issues will be analyzed and discussed to determine how teacher leaders will be able to provide support to teachers and students with the purpose of improving current educational practices.

EDD 581 ........................................................................................................ 4 credits

**Action Research and Evaluation**

This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing...
The following Master of Arts in Education/Educational Studies (MAED/ES) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Educational Studies (MAED/ES) degree is a non-teaching degree designed to facilitate the development of professional knowledge, skills and understanding of the teaching and learning process. The program provides students with information across a variety of education topics with an emphasis in the field of education.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

### Program Category Requirements for the MAED/ES

Students must select one course from each Elective category selection below to complete the 6 credit requirement:

- **Elective One, 3 total credits**
  - AET 505 ................................................................. 3 credits
  - Foundations of Adult Education and Training
  - AET 510 ................................................................. 3 credits
  - Critical Issues and Trends in Adult Education and Training
  - AET 545 ................................................................. 3 credits
  - E-Learning Design Technologies

- **Elective Two, 3 total credits**
  - AET 520 ................................................................. 3 credits
  - Personal Leadership
  - EDL 510 ................................................................. 3 credits
  - Teacher Leadership in a Global Society
  - EDL 531 ................................................................. 3 credits
  - Mentoring and Coaching
  - EDL 520 ................................................................. 3 credits
  - Instructional Leadership

The University reserves the right to modify the Program Requirements.

### Additional Admission Requirements for the MAED/ES

Applicants are expected to meet all admissions requirements:
- Applicants enrolling in this program must meet all admission requirements from their University of Phoenix previous pre-licensure program.
- The University of Phoenix previous pre-licensure programs eligible for admission to the MAED/ES are the following: MAED/TED-E, MAED/TEDEE, MAED/TEDEM, MAED/TEDMS, MAED/TEDMG, MAED/TEDMM, MAED/TEDSM, MAED/TEDSS, MAED/TED-S, MAED/SPE, MAED/ECH.
- Note: Some restrictions apply to the MAED/ECH program. Please contact your campus representative for more information.

- Applicants to this program must have completed all coursework from their University of Phoenix previous pre-licensure program with the exception of both Student Teaching courses.
- Students will be eligible for admission to the MAED/ES program provided that the Enrollment Agreement sign date for the previous pre-licensure program is no more than six and a half (6.5) years in the past. Applicants must be able to complete all requirements of the degree within 7 years of the Enrollment Agreement sign date of the previous pre-licensure program.
Degree Completion Requirements for the MAED/ES
- Completion of a minimum of 32 credits to earn a university degree.
- Completion of two (2) MAED/ES Elective courses in addition to all completed coursework from the previous pre-licensure program, with the exception of student teaching.
- A minimum grade point average (GPA) of 3.0.
- MAED/ES graduates will not be permitted to return to complete student teaching and receive a degree in any previous pre-licensure program at the University.
- The diploma awarded for this program will read as: Master of Arts in Education

Educational Studies

Residency Requirement for the MAED/ES
Students must meet the established University residency requirement for degree conferral. The University requires that all six (6) Elective credits must be completed in order to meet residency.

Course Descriptions for the MAED/ES

AET 505...3 credits
Foundations of Adult Education and Training
This course focuses on the principles of adult learning and andragogical theory. It addresses the history of adult learning, the characteristics of adult learners, key adult learning theories, and learning processes and styles. Additionally, the course investigates factors that influence adult education and training environments such as motivation, critical thinking skills, and ethics.

AET 510...3 credits
Critical Issues and Trends in Adult Education and Training
This course explores trends, issues, and innovative programs in adult education and training. It focuses on the demographics of adult learners and on the implications of diversity for instruction. Learners examine political, cultural, social, and ethical issues that impact adult education and training. The course also examines these issues within an historical context.

AET 545...3 credits
E-Learning Design Technologies
This course provides adult learners the opportunity to design a Web-based e-learning tutorial. The focus is on the importance of planning, principles of good Web-page design, storyboarding, and elements of multimedia. Web-based design standards, as well as appropriate use of Web pages and multimedia, are analyzed. It reviews e-learning software, computer-mediated delivery platforms, and learning management systems.

AET 555...3 credits
Overview of the Community College
This course provides an overview of the community college. It examines global, national, and local perspectives of the community college. The course also examines the history and development, mission and purpose, functions, governance and organization, and trends and issues of community colleges.

EDL 500...3 credits
Personal Leadership
This course focuses on developing a personal philosophy of leadership. Students engage in self-assessment activities that reveal how individual values and beliefs directly influence personal leadership. Students examine their own organization and stakeholders who may play a role in their journey in school leadership. Aspects of effective communication are also addressed as students explore contemporary leadership theorists and popular beliefs behind organizations and school systems that will help build a foundation for personal growth.

EDL 510...3 credits
Teacher Leadership in a Global Society
This course focuses on contemporary theories of school reform and effective teacher leadership in a global society. Performance indicators and dispositions as related to evaluation or decision making are explored. Candidates examine components of effective teacher leadership, including empowering others, building collaborative organizational cultures, and making informed decisions for strategic planning, while creating a vision of change. They also explore how effective leadership provides them with multiple opportunities to critically analyze and apply various leadership styles. Course content reflects research-based frameworks on leadership and leadership processes that will assist candidates in becoming effective teacher leaders. Candidate participate in a theoretical and applied learning approach, which incorporates research and reflective writing activities, case studies, self-assessment, and collaborative team projects that are closely aligned with the National Board Professional Teaching Standards.

EDL 520...3 credits
Instructional Leadership
This course is designed to provide professional teachers an introduction to instructional leadership. Candidates utilize an instrument of self-assessment and explore opportunities for leadership with reference to theoretical and practical aspects of school improvement. Candidates create a leadership plan that outlines long-term and short-term goals for continuous development of their leadership skills. In addition, they evaluate instructional practices, determine the effectiveness of teaching within the school curriculum, and propose appropriate strategies to improve instructional performance as outlined in research and theory as “best practices.”

Master of Arts in Education/Curriculum and Instruction

The following Master of Arts in Education/Curriculum and Instruction (MAED/CI) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education program with a specialization in Curriculum and Instruction is intended to afford P-12 educators the opportunity to enhance their curriculum, instruction, and leadership repertoire by expanding their knowledge of assessment,
instructional strategies, integration of technology, professional development, data-driven decision making, and mentoring and coaching. Educators will develop teacher leadership skills by exploring the latest research, trends, and strategies. Graduates will be able to effectively collaborate with all stakeholders and serve their students, colleagues, and communities as ethical leaders committed to excellence.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ci.

Courses requiring prerequisites are identified by a ~ symbol following the course number. In most instances, students must complete Foundation courses prior to the Specialization.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MAED/Ci

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e., JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Completion Requirements for the MAED/Ci

- The completion of a minimum of 35 credits.
- A minimum grade point average (GPA) of 3.0.
- The diploma awarded for this program will read as: Master of Arts in Education

Curriculum and Instruction

Residency Requirements and Course Waivers for the MAED/Ci

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 29 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or a foreign institution recognized/authorized by the country’s Ministry of Education.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516

Course Descriptions for the MAED/Ci

COM 516 .................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

CUR 505 .................................................................3 credits

Social and Global Perspectives of Teacher Leadership

Learners in this course have the opportunity to analyze the field of education from a social and global perspective. Learners investigate the implications of the globalization of knowledge on micro and macro educational systems. Multicultural implications, diversity, and the use of technology as a vehicle of pedagogy are explored. Emphasis is on building collaborative organizational communities and empowering teacher leaders to think strategically about school change.

CUR 506 .................................................................3 credits
Advocating for Learning
This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.
CUR 515 ................................................................................... 3 credits

Critical Thinking and Innovative Skills
Learners in this course explore the development and application of critical thinking skills for all academic content areas in elementary, middle school, and high school settings. Participants identify the educational needs of students by exploring current instructional theories, models, and strategies; and state, local, and national standards as they relate to developing critical thinking skills in classroom teaching. Prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
CUR 520 .................................................................................. 3 credits

Learners examine dispositions and beliefs regarding teaching and learning for all students. This course includes discussions about supportive and engaging learning environments, along with collaboration with other professionals to develop strategies that promote student learning. Using assessment data, learners will differentiate instruction and employ appropriate strategies for students. Learners will explore advocacy through course materials, practical exercises and engaging group activities.
CUR 525 .................................................................................. 3 credits

Ethical Issues in Education
Learners examine the ethical framework and challenges of teachers and teacher leaders in today's schools. The professional educational leader fosters ethical practices and engages in purposeful ethical decision-making. Learners will ethically respond to social and political issues in education through case studies, field experiences, and other readings and interactions. Ethical leadership and decision-making will be analyzed and discussed to determine how educational leaders will be able to provide support to teachers, students, and other constituents with the purpose of improving current educational practices.
CUR 530 .................................................................................. 3 credits

Assessment and Evaluation Models
In this course, learners use assessment data through a systematic process to make informed decisions and to evaluate classroom and school-wide learning outcomes. Emphasis is placed on the design, implementation, and analysis of formative assessments while other types of assessments are explored. Learners will use this assessment knowledge to design and analyze a comprehensive assessment plan in a K-12 setting.
CUR 535 ................................................................................... 4 credits

Research for Improved Practice
Learners examine the process of conducting their own classroom-based or school-based research. The course provides practical experience with action research components in the educational setting for everyday instruction. Learners will use research and data to enhance the instructional environment and to promote lifelong learning.
CUR 540 ................................................................................... 3 credits

Methods of Coaching in the Instructional Setting
This course provides an examination of how systemic processes, experiential learning, and coaching strategies positively affect teaching and learning outcomes. Learners examine the interchangeable competencies of coaching and mentoring including roles, fostering relationships, ethical guidelines, building learning communities, effective communication, self-reflective problem solving, conflict resolution, facilitating learning, and accountability. Learners will be equipped with content knowledge, real life application opportunities, tools, and specific strategies that can be applied in both instructional leadership and coaching situations.
CUR 545 ................................................................................... 3 credits

Using Technology for Teaching and Learning
Learners evaluate technology use and technology integration for teaching and learning while considering the value of current technologies and tools as part of an interactive experience in a 21st century classroom. Learners will review the considerations and responsibilities of using and maintaining technology in today's schools, including safety, ethics, resources, and financial needs. Using the knowledge gained in this course, learners will determine how they will advocate and be change-agents for technology integration within their districts, schools, classrooms, and the community.
CUR 550 ................................................................................... 3 credits

Engaging in Communities of Practice
Learning communities are a method for the organization and operation of schools that will best meet the academic needs of students. In this course, learners examine the components of developing and maintaining school-based communities of practice to improve student achievement and assist with school improvement planning. Learners will identify resources to help them initiate, plan, and maintain communities of practice.
CUR 555 ................................................................................... 3 credits

Professional Learning for Continuous Improvement
Learners will examine the relationship of professional and personal learning to school, teacher, and student need. Learners will gain an array of effective ideas, strategies, plans, methods, and tools on designing and implementing professional development to promote the intellectual and self-reflective development of teachers, as they collaborate to raise student achievement. Topics include components of high-quality staff development and learning networks.

Master of Arts in Education/Curriculum and Instruction-Reading (Arizona)
The following Master of Arts in Education/Curriculum and Instruction-Reading (MAED/CI-RD) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts program in Curriculum and Instruction with a concentration in Reading is intended for P-12 teachers who would like to expand and deepen their theoretical knowledge, instructional expertise, and use of effective digital and print resources for diverse populations in the teaching and learning of reading and li-
eracy. The International Reading Association standards and the College of Education’s Conceptual Framework form the foundation for the focus of this program, which is to support reading professionals in learning and teaching new, research-based methodologies and in becoming advocates for collaborative, positive change in literacy education in their school, their district, and the community.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ci-rd.

**Additional Admission Requirements for the MAED/Ci-RD**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Degree Completion Requirements for the MAED/Ci-RD**

- The completion of a minimum of 35 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Practicum course with a grade of "B" or better.
- Completion of Reading Teacher Work Sample.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record (50 hours).
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Arts in Education
- Curriculum and Instruction Reading

**Minimum Grade Requirements for the MAED/Ci-RD**

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following course: READ 560
- Candidates who earn less than a grade of "B" in this course must complete a remediation plan and repeat the course.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/Ci-RD**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited college or university or candidate for accreditation, candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, EDD 581, READ 560
Practicum Policies for the MAED/CI-RD

- The practicum is a supervised experience that provides candidates an opportunity to apply knowledge and skills acquired in the reading program to reading instruction for one or more students in a public, charter, or parochial school. The required practicum is 12 weeks in length. The minimum requirement for the practicum is 120 hours. Candidates need to log a minimum of 2 hours per day, 5 days a week during the 12-week practicum. Each campus establishes operational policies related to placement and completion of the practicum. Candidates must follow the guidelines in place at their campus.
- Candidates must take the Practicum course concurrently with the practicum experience. If a candidate chooses to postpone the practicum, he/she must postpone their enrollment in the practicum courses.
- Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- The practicum can only be repeated one time.
- Unapproved self-terminations of the practicum will result in the candidate receiving a failing grade for the practicum experience and the associated practicum course. This experience counts as one of their two practicum attempts.
- MAED/CI-RD candidates who are currently employed as the teacher of record in a classroom can complete the practicum or ‘validate’ in their current classroom. Candidates will be supervised and evaluated by a reading teacher/specialist as well as by a faculty supervisor in their classroom and will not have to seek additional placement for the practicum. Students must complete the Practicum course and complete and upload the Reading Teacher Work Sample.
- Candidates should complete the practicum within twelve (12) months from the completion date of their last required course in the program.
- Candidates must complete a minimum of six (6) credit hours of practicum, including the completion of a Reading Teacher Work Sample.

Field Experience for the MAED/CI-RD

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 50 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to Practicum. Candidates must work with their campus to arrange field experience.

Course Descriptions for the MAED/CI-RD

READ 501 ................................................................................ 0 credits
Orientation to the Curriculum and Instr. Reading Program
This course is designed to provide an orientation to the primary components of the Curriculum and Instruction—Reading program. Candidates are introduced to the program’s progression and degree completion requirements. Field experience, the practicum, the teacher work sample, and completion of an e-portfolio are discussed.

COM 516 .................................................................................... 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

CUR 506 ................................................................................... 3 credits
Theories and Best Practices of Curriculum and Instruction
This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.

CUR 508 ................................................................................... 3 credits
Social, Political, and Cultural Contexts of Schools
This course explores the historical, political, social, and cultural constructs of contemporary education. The course includes an investigation of how social, political, and cultural contexts have contributed to the current state of national, state, and local educational settings. Additionally, the course examines how policies influence school decision making and teacher practice. Candidates apply an inquiry-based process to identify individual, social, and cultural contexts in education; explore contemporary issues in diversity and equity in education; and demonstrate an understanding of education in a global community in order to evaluate and determine their individual role in taking action in their local setting.

CUR 510 ................................................................................... 3 credits
Teachers as Leaders
In this course, teachers define, clarify, and reflect on their role as a leader. They explore leadership processes that utilize collaboration, coaching, mentoring, and inclusion. Additionally, they examine broad educational issues, as well as school-based issues and determine possibilities for initiating, sustaining, and building upon systemic change.

READ 504 ................................................................................... 3 credits
Theoretical and Research Foundations of Lang. and Literary
This course provides students with foundational knowledge in the study and application of research into critical issues in the field of literacy. Topics include research on the development and expansion of literacy, sociocultural influences on literacy, how research informs literacy instruction, and models of the reading process.

READ 522 ................................................................................... 3 credits
Reading and Writing Instructional Strategies for Elementary
This course considers the guiding principles of literacy development of children kindergarten through 6th grade. It examines diversity and the role of culture, community, family, and language in children’s growth as readers and writers. In addition, it considers the influence of assessment, technology, and print choices on children’s reading and writing development.

READ 533 ................................................................................... 3 credits
Reading and Writing Instructional Strategies for Adolescents
This course focuses on the most current research for teaching reading and writing to students at the middle and secondary levels. Various comprehension strategies, technology lessons, and assessment techniques are modeled. The connection between reading and writing is analyzed. Critical issues in reading are researched and debated.
READ 545 ................................................................. 3 credits

Culturally Responsive Reading Methods and Materials
This course focuses on reading and writing instructional methods that respond to the needs of culturally and linguistically diverse learners and the selection of materials to support that instruction. Candidates select methods that meet the needs of the school and community, evaluate the materials for suitability, and create a vision for a culturally responsive classroom.
READ 523 ................................................................. 3 credits

Content Area Reading and Writing for Elementary
This course focuses on strategies for teaching reading and writing to 7-12 students in content-area classrooms. Various vocabulary and comprehension strategies, study techniques, and writing to learn techniques are studied. Print and non-print texts are analyzed. Issues in reading and writing in content areas are examined and debated.
READ 534 ................................................................. 3 credits

Content Area Reading and Writing for Adolescents
This course focuses on strategies for teaching reading and writing to 7-12 students in content-area classrooms. Various vocabulary and comprehension strategies, study techniques, and writing to learn techniques are studied. Print and non-print texts are analyzed. Issues in reading and writing in content areas are examined and debated.
EDD 581 ................................................................. 4 credits

Action Research and Evaluation
This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing data are discussed. Students identify ethical issues related to research as well, including a professional code of ethics, confidentiality, and research using human subjects. In addition, they synthesize and apply the content of the course by writing a proposal for an action research study.
READ 555 ................................................................. 3 credits

Diagnosis and Remediation of Rdg. and Writing Difficulties
This course focuses on assessing and addressing students' strengths and needs in the areas of reading and writing. Topics include identifying appropriate assessments, managing implementation of assessments, and communicating assessment results to students and parents. In addition, selecting, planning, and implementing research-based instruction, selecting appropriate instructional materials, and using technology effectively are covered. The course includes a practical application project based on work with a student in a K-12 school setting.
READ 560 ................................................................. 6 credits

Reading Practicum
In this supervised practicum, candidates apply their knowledge of language and literacy theories, research, and best practices to an ongoing assessment-instruction process. Candidates work intensively with one or more primary or intermediate struggling readers at a public, charter, or parochial school daily for six weeks. They create a supportive literacy environment, assess a student’s strengths and needs, develop an individualized instructional plan that utilizes appropriate text and electronic resources, and implement sound instructional practices via their reading and writing lessons. In addition, candidates critically reflect on their practice in a journal, and submit a final report that synthesizes their instruction and their student’s performance, reflects on the process, and makes recommendations for teachers who work with the student and for parents. The seminar also provides a forum for open discussion of goals and problem solving based on practicum experience.

Master of Arts in Education/Curriculum and Instruction-Reading (Florida)

The following Master of Arts in Education/Curriculum and Instruction-Reading (MAED/CI-RD) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts program in Curriculum and Instruction with a concentration in Reading is intended for P-12 teachers who would like to expand and deepen their theoretical knowledge, instructional expertise, and use of effective digital and print resources for diverse populations in the teaching and learning of reading and literacy. The International Reading Association standards and the College of Education’s Conceptual Framework form the foundation for the focus of this program, which is to support reading professionals in learning and teaching new, research-based methodologies and in becoming advocates for collaborative, positive change in literacy education in their school, their district, and the community.

Additional Admission Requirements for the MAED/CI-RD

All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Completion Requirements for the MAED/CI-RD
- The completion of a minimum of 35 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Practicum course with a grade of "B" or better.
- Completion of Reading Teacher Work Sample.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record (50 hours).
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Curriculum and Instruction Reading

Minimum Grade Requirements for the MAED/CI-RD
- A candidate must earn a grade of "B" (grades of "I" and "B-") are not accepted) or better in the following course: READ 560
- Candidates who earn less than a grade of "B" in this course must complete a remediation plan and repeat the course.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/CI-RD

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, EDD 581, READ 560

Practicum Policies for the MAED/CI-RD
- The practicum is a supervised experience that provides candidates an opportunity to apply knowledge and skills acquired in the reading program to reading instruction for one or more students in a public, charter, or parochial school. The required practicum is 12 weeks in length. The minimum requirement for the practicum is 120 hours. Candidates need to log a minimum of 2 hours per day, 5 days a week during the 12-week practicum. Each campus establishes operational policies related to placement and completion of the practicum. Candidates must follow the guidelines in place at their campus.
- Candidates must take the Practicum course concurrently with the practicum experience. If a candidate chooses to postpone the practicum, he/she must postpone their enrollment in the practicum courses.
- Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- The practicum can only be repeated once.
- Unapproved self-terminations of the practicum will result in the candidate receiving a failing grade for the practicum experience and the associated practicum course. This experience counts as one of their two practicum attempts.
- Candidates who do not successfully complete the second practicum experience will be removed from the program and are not eligible for re-entry.
MAED/CRI-RD candidates, who are currently employed as the teacher of record in a classroom can complete the practicum or ‘validate’ in their current classroom. Candidates will be supervised and evaluated by a reading teacher/specialist as well as by a faculty supervisor in their classroom and will not have to seek additional placement for the practicum. Students must complete the Practicum course and complete and upload the Reading Teacher Work Sample.

Candidates should complete the practicum within twelve (12) months from the completion date of their last required course in the program.

Candidates must complete a minimum of six (6) credit hours of practicum, including the completion of a Reading Teacher Work Sample.

Field Experience for the MAED/CRI-RD
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 50 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to Practicum. Candidates must work with their campus to arrange field experience.

Course Descriptions for the MAED/CRI-RD

Orientation to the Curriculum and Instruction
This course is designed to provide an orientation to the primary components of the Curriculum and Instruction-Reading program. Candidates are introduced to the program’s progression and degree completion requirements. Field experience, the practicum, the teacher work sample, and completion of an e-portfolio are discussed.

COM 516 .................................................................................1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

CUR 506....................................................................................3 credits

Theories and Best Practices of Curriculum and Instruction
This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.

CUR 508....................................................................................3 credits

Social, Political, and Cultural Contexts of Schools
This course explores the historical, political, social, and cultural constructs of contemporary education. The course includes an investigation of how social, political, and cultural contexts have contributed to the current state of national, state, and local educational settings. Additionally, the course examines how policies influence school decision making and teacher practice. Candidates apply an inquiry-based process to identify individual, social, and cultural contexts in education; explore contemporary issues in diversity and equity in education; and demonstrate an understanding of education in a global community in order to evaluate and determine their individual role in taking action in their local setting.

CUR 510.................................................................3 credits

Teachers as Leaders
In this course, teachers define, clarify, and reflect on their role as a leader. They explore leadership processes that utilize collaboration, coaching, mentoring, and inclusion. Additionally, they examine broad educational issues, as well as school-based issues and determine possibilities for initiating, sustaining, and building upon systemic change.

READ 504.................................................................3 credits

Theoretical and Research Foundations of Language and Literacy
This course provides students with foundational knowledge in the study and application of research into critical issues in the field of literacy. Topics include research on the development and expansion of literacy, sociocultural influences on literacy, how research informs literacy instruction, and models of the reading process.

READ 522.........................................................3 credits

Reading and Writing Instructional Strategies for Elementary
This course considers the guiding principles of literacy development of children kindergarten through 6th grade. It examines diversity and the role of culture, community, family, and language in children’s growth as readers and writers. In addition, it considers the influence of assessment, technology, and print choices on children’s reading and writing development.

READ 533.................................................................3 credits

Reading and Writing Instructional Strategies for Adolescents
This course focuses on the most current research for teaching reading and writing to students at the middle and secondary levels. Various comprehension strategies, technology lessons, and assessment techniques are modeled. The connection between reading and writing is analyzed. Critical issues in reading are researched and debated.

READ 545.................................................................3 credits

Culturally Responsive Reading Methods and Materials
This course focuses on reading and writing instructional methods that respond to the needs of culturally and linguistically diverse learners and the selection of materials to support that instruction. Candidates select methods that meet the needs of the school and community, evaluate the materials for suitability, and create a vision for a culturally responsive classroom.

READ 523.................................................................3 credits

Content Area Reading and Writing for Elementary
This course focuses on methods and materials for teaching diverse elementary children to read and write well in various content areas. Candidates examine current critical issues affecting content area reading and writing, including state and national assessments. Effective reading and writing strategies, classroom management techniques, technology tools, media, and print materials which enhance children’s reading and writing in content areas are also examined.

READ 534.................................................................3 credits
Content Area Reading and Writing for Adolescents
This course focuses on strategies for teaching reading and writing to 7-12 students in content-area classrooms. Various vocabulary and comprehension strategies, study techniques, and writing to learn techniques are studied. Print and non-print texts are analyzed. Issues in reading and writing in content areas are examined and debated.
EDD 581 ................................................................................... 4 credits

Action Research and Evaluation
This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing data are discussed. Students identify ethical issues related to research as well, including a professional code of ethics, confidentiality, and research using human subjects. In addition, they synthesize and apply the content of the course by writing a proposal for an action research study.
READ 555 ................................................................................ 3 credits

Diagnosis and Remediation of Rdg. and Writing Difficulties
This course focuses on assessing and addressing students’ strengths and needs in the areas of reading and writing. Topics include identifying appropriate assessments, managing implementation of assessments, and communicating assessment results to students and parents. In addition, selecting, planning, and implementing research-based instruction, selecting appropriate instructional materials, and using technology effectively are covered. The course includes a practical application project based on work with a student in a K-12 school setting.
READ 560 ................................................................................ 6 credits

Reading Practicum
In this supervised practicum, candidates apply their knowledge of language and literacy theories, research, and best practices to an ongoing assessment-instruction process. Candidates work intensively with one or more primary or intermediate struggling readers at a public, charter, or parochial school daily for six weeks. They create a supportive literacy environment, assess a student’s strengths and needs, develop an individualized instructional plan that utilizes appropriate text and electronic resources, and implement sound instructional practices via their reading and writing lessons. In addition, candidates critically reflect on their practice in a journal, and submit a final report that synthesizes their instruction and their student’s performance, reflects on the process, and makes recommendations for teachers who work with the student and for parents. The seminar also provides a forum for open discussion of goals and problem solving based on practicum experience.

SCHOOL OF ADVANCED STUDIES

The School of Advanced Studies is home to the University’s doctoral programs and represents a community of professionals who want to make a meaningful social contribution to their communities and influence change in their fields. Diverse in program offerings, the School supports advanced learning in business, management, education, health care administration, nursing, higher education administration, and psychology.

Admission Requirements

Most doctoral programs have additional admission requirements listed within the program specific information. All applicants to doctoral programs must meet the following admission requirements:

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet one of the following exceptions in order to meet the English Language Proficiency Requirement:
  - achieved a minimum score of 213 on the computer-based test (CBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  - or-
  - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  - or-
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  - or-
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  - or-
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  - or-
  - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.
  - The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS; however official documentation may be required:
    - The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
    - The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
    - The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
    - The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
    - Applicants who reside in the United States must meet one of the following requirements:
      - Be a legal resident of the United States
      - Have been granted permanent residency
      - Have a valid visa that does not prohibit educational studies
      - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
      - Have been granted asylum or refugee status.
    - Applicants who reside in Canada must meet one of the following requirements:
      - Be a legal resident of Canada
      - Be a landed immigrant
      - Have a valid visa that does not prohibit educational studies
      - A completed and signed graduate application and application fee
      - A signed current Hardware/Software agreement verifying Internet access and multimedia equipped computer.
      - A signed Research Library Access Agreement.
      - A signed Enrollment/Disclosure Agreement.
      - Completion of any state-specific required documents or forms. Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.
      - Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.
      - Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students attending a local campus in the states listed below are
required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

- Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university. Exemptions from the MMR immunization requirement may be granted for the following reasons:

- A medical exemption may be granted to specific vaccines.
  - A U.S. licensed physician (M.D. or D.O.) must state in writing that giving a specific vaccine would endanger the student's life or health, and specify the reason based on valid medical contraindications.
  - The physician must state the length of time during which the vaccine would endanger the student’s health or life.
  - The exemption certification must be signed by the physician on the physician's printed stationery.
  - A religious exemption may be granted if the student signs a statement certifying that the student's religious beliefs prohibit the practice of immunization.
   - If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.
   - A copy of each exemption must be kept in the student's health record at school.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school.

Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

- The student was born before January 1, 1957 (applicable to MMR vaccine only).
- The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
- The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
- The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
- The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
- The student has submitted a statement that immunization is contrary to his/her religious beliefs.
- The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.
- The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

Educational Specialist

The following Educational Specialist (Ed.S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Educational Specialist program (Ed.S) will prepare learners to become transformational leaders who will strategically manage and lead complex educational organizations. Graduates will be educational practitioners who demonstrate analytical, critical, and innovative thinking to improve the performance of educational
institutions. The Educational Specialist program degree is consistent with the University’s mission to develop the knowledge and skills that will enable learners to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. The program is designed to emphasize leadership and to focus on a specialization in Curriculum and Instruction.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/eds.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the Ed.S**

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, an ABA accredited institution (if coursework was from a graduate level program) or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in an education or related position is required for admission.

**Degree Requirements for the Ed.S**

Educational Specialist students must meet the following degree requirements:

- A minimum of 31 doctorate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Completion of the graduation information packet.
- Students must satisfy all credits and non-credit bearing activities prior to commencement eligibility.

**Academic Progression Requirements for the Ed.S**

Educational Specialist students are subject to the following academic progression requirements:

- Students must earn a grade of “B” or better in COM 705 Communication Strategies. Students who earn less than a “B” will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who miss or must withdraw from a course may complete the course via directed study, if available. All maximum enrollment policies apply. This option will only be available three times (9 credits) and applies only to online courses. However, some courses may not be suitable or available for directed study, and all directed studies must have the approval of the Doctoral Program Chair.
- Any student who earns a course grade of “C+” or below must repeat that course. If a student who is not on academic probation earns a “C+” or below, that student must repeat the course and earn a grade of “B-” or better. If a student who is on academic probation earns a “C+” or below, that student must repeat the course again and earn a grade of “B” or better.
- Any student who does not maintain a minimum GPA of 3.0 will be put on academic probation.
- Academic probation will last for four consecutive courses during which time students must (1) raise their GPA to a minimum of 3.0 and (2) earn at least a grade of “B” in each course.
- Students will be allowed to have only one incomplete grade on their records at a time. Students will have up to 5 weeks to complete a course once an incomplete has been issued.
- Students in the Doctor of Education in Educational Leadership (EdD) program, due to extenuating personal circumstances, may transfer their credits into the Educational Specialist program.
- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.

**Residency Requirements for the Ed.S**

Educational Specialist students must meet the following residency requirements:
• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• Students may not waive any of the following courses: COM 705 and EDS 799

In order to waive a course in the EDS program, students must have completed a previous course that meets the following criteria:
• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be a doctoral-level course. Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the Ed.D

COM 705 ....................................................................................1 credit

Communication Strategies
This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.
CUR 712 ...................................................................................3 credits

Curriculum Theory
This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorist and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.
EDD 721 ...................................................................................3 credits

Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.
EDD 722 ...................................................................................3 credits

The Legal Context of Education
This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory issues, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case law and specific pieces of education legislation are reviewed.
EDD 723 ...................................................................................3 credits

Ethics and Values in Learning Organizations
The ethics and value-based decisions that learning organizations are faced with are explored in depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values education, codes of conduct, and codes of ethics are debated.
CUR 721 ...................................................................................3 credits

Curriculum Design
In this course, learners focus on the creation of systemic models of curriculum development, including consideration of schedule, structure, stakeholder involvement, and end products. Learners will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.
CUR 722 ...................................................................................3 credits

Instructional Models
This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs and staff development are of special focus.
EDD 731 ...................................................................................3 credits

The Economics of Education
The principles and theories of the economics of education are examined. The role that Federal state, and local government play in the economics of education is explored in depth. Key topics include budget management, grants, financial aid, expenditures and revenues, and the rising cost of education. Economic policy analysis is a focus in this course.
EDD 733 ...................................................................................3 credits

Evaluation and Assessment Methods
This course explores the evaluation and assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Accreditation issues, outcomes-based assessment, institutional research, and staff and faculty evaluation are key topics. The influence of leadership style on evaluation and assessment methods also is examined.
CUR 731 ...................................................................................3 credits

Supervision of Curriculum and Instruction
This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.
EDS 799 .....................................................................................3 credits

Educational Specialist Capstone
The capstone course will require learners to integrate their program of study into an in-depth project that explores and inquires into a contemporary problem within the field of educational administration. The project will be based on library research and/or fieldwork and must demonstrate an approach to addressing the problem from a leadership perspective. Additionally, within this course learners will complete a reflective self-assessment of their learning throughout the program.

Doctor of Management in Organizational Leadership

The following Doctor of Management in Organizational Leadership (DM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all
programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Management in Organizational Leadership degree program, offered by University of Phoenix, provides learners who hold a professional Master’s degree a means of exploring their personal readiness to become leaders in their professions or current organizations. Learners gain a mastery of leadership literature and demonstrate their competence by applying what they learn to current organizational environments. They also:

• Recognize leadership as a process promoting action in service of self, organization, community, and the planet.
• Apply leadership models to promote global and social responsibility.
• Critically analyze the validity and value of research.
• Make original scholarly contributions by researching real-world problems and issues in organizational management.
• Critically examine the philosophical foundations of organizations and leadership.
• Identify personal leadership philosophies and philosophies of knowledge and their applications to organizations.
• Create learning organizations outside of contemporary paradigms utilizing optimal design theories.
• Create an environment that produces core competent, inter-culturally sophisticated leaders.
• Create an environment that nurtures effective cross-functional, continually enhanced human capital prepared to meet the demands of strategic organizational success.

The DM program creates a perfect opportunity for mid-career professionals to refresh and recreate their commitment to the tasks required of organizational leaders. Learners will think deeply about the current state of organizations and their leadership; create imaginative, new models from what is learned; and contribute new knowledge to the profession and society.

The DM program has a 68-credit requirement that incorporates both residency and online modalities of instruction. The majority of the program will be delivered in a virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residences to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into the preparation of a final research study. Additionally, in the year three residency, learners will apply their knowledge to a comprehensive, collaborative case study. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DM degree is the successful completion and oral defense of a significant, substantial, and independently completed research study. The study provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and to reflect competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the learner’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing them.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dm.

Doctoral Project IV
Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DM
All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Official transcripts listing a minimum of three (3) college credits in research methods, statistics or scientific reasoning with a grade of “C” or better.
- Current or a record of past employment in leadership of people or processes is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of comparable coursework in research, statistics, quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Academic Progression Requirements for the DM
Students are subject to the following academic progression requirements:
• Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.

• Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).

• Students may have only one incomplete grade on their records at a time.

• Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.

• Successful completion of DOC 731R which serves as a qualifying examination course in the program.

• Quality review of dissertation proposal to advance beyond DOC 732R.

• Committee literature review prior to enrollment in DOC 734.

• Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).

• Quality final Institutional review of dissertation during DOC 734.

• Editorial Review after DOC 734 and prior to graduation.

• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.

• Students who would like to repeat DOC 740R may repeat the course.

Degree Requirements for the DM
Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

• A minimum of 68 doctorate credits.

• A minimum grade point average (GPA) of 3.0.

• Satisfactory completion of all residencies.

• Written approval of the dissertation proposal.

• Satisfactory oral defense and written completion of the dissertation.

• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.

• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

• The diploma awarded for this program will read as: Doctor of Management and will not reflect the specialization. Specializations are reflected on the transcript only.

Course Descriptions for the DM
COM 705.................................................................................... 1 credit
Communication Strategies
This 3-week, online course provides new doctoral learners with an
### Introduction to Advanced Communication Strategies for Academic Success

Within University of Phoenix’s adult learning model, topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and learning team dynamics.

**SEM 700R** .......................... 0 credits

### Doctoral Program Orientation Seminar

**SEM 700R** is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

**LDR 711A** .................................. 3 credits

### Leadership Theory and Practice

This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

**PHL 716** .................................. 3 credits

### Knowledge of Theory and Practice

Upon completion of this course, learners will understand the purpose of inquiry and the wide spectrum of intellectual resources. Learners will clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge. The course provides an overview of the various theoretical frameworks for examining the nature of knowledge and cognition and the applications of knowledge as manifested in various fields of human endeavor. It will orient learners toward identifying their true goals in pursuing the doctoral program, as well as the methods by which they may achieve these goals.

**RES 711** .................................. 3 credits

### Constructing Meaning

The postmodern world is an amalgam of our beliefs, physical sensory interpretations, psychological projections of our wants/needs/fantasies, a cultural interpretation of existence/meaning/purpose, a moral sense of right and wrong, a religious or spiritual interpretation of responsibility, and the sense of the relationship we have to each other. Learners explore the concept of postmodernism through the writings of some of the classic thinkers. Learners will also undertake an examination of the way they personally construct their world - what it means and what is meaningful at a personal level, with some insight into why that is the case for them. This information will be explored and learners will use this to inform their leadership behavior and explain their style.

**ORG 726** .................................. 3 credits

### Organizational Theory and Design

Upon completion of this course, learners will be prepared to analyze and select appropriate paradigms to guide organizational research. Additionally, learners will have the ability to apply organizational theories systematically to enrich existing models or develop new models to increase performance and effectiveness.

**MGT 716** .................................................. 3 credits

### Management Philosophies

Upon completion of this course, learners will be prepared to employ a research-based approach to investigate the body of knowledge relating to scientific management philosophies from their recorded origins to current day applications. Learners will analyze and evaluate the evolution of management theory within historical timeframes with incremental assessments of the success or failures to optimize resources to attain performance excellence in a customer-centered organization.

**RES 722A** .................................................. 3 credits

### Fundamental Principles of Sound Research

**RES 722A** emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

**RES 723** .................................................. 3 credits

### Research Design

This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

**RES 724** .................................................. 3 credits

### Advanced Statistical Research Methods and Design

The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

**RES 725** .................................................. 3 credits

### Qualitative Methods and Design

This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

**LDR 726** .................................................. 3 credits

### The Dynamics of Group and Team Leadership

Upon completion of this course, learners will be prepared to use advanced leadership strategies for group communications, team building, and coaching skills to attain organizational objectives. Learners explore large group and smaller team dynamics and the ways in which the role of a leader is required to affect behavior. Emphasis is placed on the growing dependency on self-directed work teams in the workplace.

**ORG 726** .................................................. 3 credits

### The Impact of Technology on Organizations

Upon completion of this course, learners will be prepared to evaluate the organizational relationship among technology, structure, and behavior. Additionally, learners will be prepared to balance the
advantages and disadvantages of integrating technologies.

MGT 726 .................................................................................. 3 credits

Emerging Managerial Practices
Upon completion of this course, learners will be prepared to implement managerial practices designed to develop organizational agility and responsiveness. Additionally, they will be able to adapt best practices, implement high-performance work teams, and build advanced strategies for effective global communications.

Emphasis is placed on how organizations are encouraged to develop and demonstrate creative, adaptive, and flexible business approaches.

ORG 727 .................................................................................. 3 credits

Organizational Diagnosis and Intervention
Upon completion of this course, learners will be prepared to optimize organizational performance through the judicious implementation of performance interventions utilizing organization theory, organization design, and technology.

PHL 700R .................................................................................. 3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one's assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R .................................................................................. 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner's dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R .................................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization's environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 732R .................................................................................. 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R .................................................................................. 0 credits

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.

PHL 736 .................................................................................. 3 credits

Political Acumen and Ethics
Upon completion of this course, learners will possess an insight into how leaders address current and future impacts on society and how leaders influence organizational commitment toward proactively addressing risk factors as well as legal, regulatory, and governmental requirements. Topics include public responsibility, organizational community involvement, and attaining and maintaining American corporation ethical standards in local and global environments.

MGT 736 .................................................................................. 3 credits

Contemporary Systems Management
Upon completion of this course, learners will be prepared to manage and lead complex organizations through strategic decision making, resulting in business plans. Learners focus on extended systems and theoretical and practical frameworks for systematically managing organizations.

LDR 736 .................................................................................. 3 credits

Architecture of Leadership
Upon completion of this course, learners will be prepared to develop and maintain a strong orientation to the future and a commitment to improvement and innovation in creating and establishing new business models for attaining organizational goals, setting new short-term and long-term directions, and achieving performance excellence. This course includes an assessment of how leaders address current and future impacts on society in a proactive manner and how leaders establish and accomplish ethical practices in all stakeholder interactions.

RES 725 .................................................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoetelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 .................................................................................. 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

RES 727 .................................................................................. 3 credits
Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.
RES 728 ................................................................. 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.
RES 729 ................................................................. 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.
RES 729 ................................................................. 3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.
DOC 722 ................................................................. 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.
DOC 733 ................................................................. 3 credits

Doctoral Project IV
This is the final course in the program’s sequence in which the learner, with the guidance of his or her mentor, completes the formal oral defense of the dissertation and prepares and submits the study for University approval. An approved dissertation is required to complete this class.
DOC 733A ............................................................... 3 credits

Doctoral Project V
This is the second one-on-one chair-guided course for a doctoral learner working to complete a dissertation proposal. Learners enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or IRB approval of ethical treatment within the proposed study. The learner/Chair relationship is the catalyst for completing the Doctoral Project research, findings, recommendations, and conclusions.
DOC 734 ............................................................... 3 credits

Doctoral Project VI
This is the third available dissertation proposal course provides extended time for one-on-one work between a learner and his or her dissertation committee Chair. Learners enroll for this course when a learner has not yet received either IRB approval, Quality Review Methods approval, or Committee/Chair approval of the proposed dissertation. Learners should work in conjunction with the Chair to complete any remaining requirements to achieve all approvals required to begin dissertation work. If all approvals are received during the course, it is appropriate for the candidate to begin working on the dissertation, but not until all approvals have been received. Learners must repeat this course, until the dissertation proposal is approved.

Doctoral of Business Administration

The following Doctor of Business Administration (DBA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Business Administration (DBA) degree program, offered by University of Phoenix, provides learners who hold a professional Master’s degree a means of exploring their personal readiness to become senior leaders in management professions.
Learners gain a mastery of business administration literature and demonstrate their competence by applying this knowledge to current business environments.

Graduates with a Doctorate in Business Administration will be able to:

- Identify, research alternatives to, and solve business problems with the highest value-adding solutions.
- Perform systems-based, financially justified analysis and research operations issues and technology-enabled opportunities in a global, market-based economy.
- Demonstrate business knowledge, and be recognized as a business subject expert.
- Formulate and re-design industry rules and standards.

As the global information economy evolves, organizations are becoming increasingly complex and innovative, with organizational models and practices becoming crucial for successfully addressing this complexity. Consequently, leadership in this environment requires higher, more sophisticated levels of knowledge and skills. The DBA program is designed to serve this need by providing doctoral-level education to professional practitioners in business and management.

The DBA program has a 68-credit requirement that incorporates both residency and online modalities of instruction. The majority of the program will be delivered in a virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into the preparation of a final research study. Additionally, in the Year Three residency, learners will apply their knowledge to a comprehensive, collaborative case study. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DBA degree is the successful completion and oral defense of a significant, substantial, and independently completed research study that adds new information to the body of business management knowledge. The study provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and to reflect competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program's curriculum is designed to develop the learner's ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dba.

- LDR 731 ~ ................................................................. 3 credits
- Contemporary Issues in Leadership
Additional Admission Requirements for the DBA

All applicants are expected to meet the following admissions requirements:

- A graduate degree in business, management or business administration from a nationally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e., JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- Students who do not have a graduate degree in either business, management or administration may be admitted if they meet all other requirements for admission and have official transcripts listing three (3) graduate credits in each of the following subjects from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent recognized foreign institution:
  - Finance for Managerial Decision Making
  - Human Relations and Organizational Behavior
  - Marketing Management
  - Strategy Formulation and Implementation

- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

- Official transcripts listing a minimum of three (3) graduate level credits in research methods, statistics or scientific reasoning with a grade of "C" or better.

- Current or a record of past employment in supervisory or management position is required for admission.

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners:
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Degree Requirements for the DBA

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Business Administration.

**Academic Progression for the DBA**

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDG 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

**Academic Standing and Minimum Grade Requirements for the DBA**

- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
- Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.0 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

**Residency Requirements and Course Waivers for the DBA**

Students must meet the following residency requirements:

- Completion of physical residencies:
  - Five-day residency at the beginning of the program.
  - Three-day residency at the beginning of year two.
  - Eight-day residency at the beginning of year three.
- If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
- Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  - The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  - The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following courses may not be waived: BUS 731, BUS 732, COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
- The dissertation may not be waived.

**Course Descriptions for the DBA**

COM 705 .................................................................................... 1 credit
Communication Strategies
This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

SEM 700R ...................................................................................0 credits

Doctoral Program Orientation Seminar
SEM 700R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

LDR 711A ................................................................................3 credits

Leadership Theory and Practice
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

FIN 711......................................................................................3 credits

Financial Measures of Value Added
This course explores and evaluates research on how businesses measure and could modify their measure of financial value in order to improve decision making. Topics include treatment of non-traditional balance sheet items (e.g. knowledge capital), mergers and acquisitions and how to predict success, conditions for successful joint ventures, marketplace valuation of equity, and small to mid-size business’ access to contemporary capital markets.

ORG 711 ................................................................................3 credits

21st Century Issues in Organizational Behavior I
This course evaluates research on issues that organizations face in optimizing their performance. Topics include how an organization “selects” the form that best fits its mission and culture, organizational learning, and inhibitors to performance.

MKT 711 ................................................................................3 credits

Strategic Opportunities in an Internet-Based Global Economy
This course evaluates models for creating economically viable global businesses using the technology of the Internet. Topics include assessing successful e-business models and the macroeconomic environment that contributes to the success of business strategy.

MKT 711 ................................................................................3 credits

Marketing and Managing the Customer Relationship
This course evaluates how decision makers manage their relationship with their customers and apply their marketing knowledge to the development of products and services. Topics include the prediction of demand in global markets, managing product development, and the role of Internet-based customer information.

RES 711 ................................................................................3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ..................................................................................3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 724 ..................................................................................3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 723 ..................................................................................3 credits

Ethical Leadership and the Legal Landscape
This course evaluates research on how legal environments in the global economy shape decision making and the ethical issues that emerge from disparate legal systems and practices. This course will specifically addresses practices legal in a subsidiary country but in violation of the corporation’s ethical standards.

BUS 721 ................................................................................3 credits

Issues in Optimizing Operations
This course evaluates research on how businesses adopt approaches to optimizing their operations and the conditions under which these lead to success. Topics include how an organization adopts best practices, the predictors for a successful quality management program, and the role of project management.

MKT 721 ................................................................................3 credits

Managing the Risks in a Global Environment
This course evaluates alternative practices to manage risk in a global environment. Topics include measuring risk (economics, financial, political, etc.), creating tools to predict where to invest internationally, financial instruments of global investment, and techniques to mitigate risk.

ORG 721 ..................................................................................3 credits

21st Century Issues in Organizational Behavior II
This course continues research on issues that organizations face in
optimizing their performance. Topics include how organizations develop a culture and set of political rules that define behavior within it, virtual teams, translating culture within a global organization, and conditions that predict success or failure for an organization that expands its mission.

PHL 700R ................................................................. 3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ................................................................. 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 732R ................................................................. 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ................................................................. 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC 728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

LDR 731 ................................................................. 3 credits

Contemporary Issues in Leadership
This course explores the successes and controversial issues surrounding how and why senior leaders set and deploy organizational values, short- and long-term directions, and performance expectations that create a balanced value. The focus is on business results that encompass organizational learning, stakeholder satisfaction, overall budgetary, financial, and market performance.

BUS 731 ................................................................................. 3 credits

Transforming the Business I
This course requires the learner to integrate all previous learning by identifying and solving organizational problems and recommending new business models that will increase organizational performance. The outcome of this course will be delivered in Transforming the Business II.

BUS 732 ................................................................................. 3 credits

Transforming the Business II
This course requires the learner to integrate all previous learning by identifying and solving organizational problems and recommending new business models that will increase organizational performance. The outcome of this course will be a continuation of Transforming the Business I.

RES725 ................................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoetelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ................................................................. 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 ................................................................. 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ................................................................. 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ................................................................. 3 credits
Ethnmethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ................................................................. 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

RES 746 ................................................................. 3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

DOC 722 .................................................................................. 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 .................................................................................. 3 credits

Doctoral Dissertation
This is a mentor-guided course. Learners enroll for this course while finalizing their Doctoral Project with their Committee. The learner/mentor relationship is the catalyst for completing the Doctoral Project research, findings, recommendations, and conclusions.

DOC 734 .................................................................................. 3 credits

Doctoral Project IV
This is the final course in the program’s sequence in which the learner, with the guidance of his or her mentor, completes the formal oral defense of the dissertation and prepares and submits the study for University approval. An approved dissertation is required to complete this class.

DOC 733A .................................................................................. 3 credits

Doctoral Dissertation
This is the second one-on-one chair-guided course for a doctoral learner working to complete a dissertation proposal. Learners enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or IRB approval of ethical treatment within the proposed study. The learner/Chair relationship and the learner earning approval of the dissertation proposal from all three groups is the catalyst for the course.

DOC 733B .................................................................................. 3 credits

Doctoral of Education in Educational Leadership

The following Doctor of Education in Educational Leadership (Ed.D) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Education in Educational Leadership (Ed.D.) will prepare learners to become transformational leaders who will strategically manage and lead complex educational organizations. Graduates will be educational practitioners who demonstrate analytical, critical, and innovative thinking to improve the performance of educational institutions. The Doctor of Education in Educational Leadership degree is consistent with the University’s mission to educate working adults to develop the knowledge and skills that will enable them to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. The program is designed to emphasize leadership and to focus on applied research that improves educational environments.

Program Goals
Graduates of the Doctor of Education in Educational Leadership program will be able to:
- Utilize and conduct research to evaluate and improve instructional and organizational processes.
- Provide instructional leadership to support and enhance the educational process.
- Incorporate knowledge of social, historical, and political theories and processes in educational decision making.
• Lead and manage the educational organization through transformation inherent in contemporary society.

At no time in history has the need for quality education been greater. At the same time, educators face challenges unlike those faced by their predecessors. They must facilitate learning in culturally diverse classrooms; prepare students for jobs in a global, information-based economy; manage their classrooms, schools, and systems effectively and efficiently in the face of severe funding pressures; and produce all the other outcomes traditionally expected from educational institutions. It is clear that as the education system works its way through this period of radical change, leaders are needed who are capable of dealing with complexity in creative ways. Professional practice in this environment will require more sophisticated educational preparation for greater numbers of practitioners.

The Ed.D. program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Additionally, in the Year Three residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ed.D degree is the successful completion and oral defense of a significant, substantial, and independently completed doctoral dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and express their competence in applying learning to actual educational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd.

Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. DOC 733 A and B~ ..............................................................3 credits
Doctoral Dissertation

DOC 734 A and B~ .....................................................3 credits
Doctoral Project IV

Students may be required to complete DOC 733B and DOC 743B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the EdD

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Official transcripts listing a minimum of three (3) graduate level credits in research methods, statistics or scientific reasoning with a grade of "C" or better.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
- Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
- Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
- An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
- An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
- A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Academic Progression Requirements for the EdD

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
Residency Requirements and Course Waivers for the EdD

Students must meet the following residency requirements:

- Completion of physical residencies.
- Five-day residency at the beginning of the program.
- Three-day residency at the beginning of year two.
- Eight-day residency at the beginning of year three.
- If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.

- Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

- In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  - The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university.
  - The course must have been completed within the last ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  - The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R.

- The dissertation may not be waived.

Course Descriptions for the EdD

COM 705 ................................................................. 1 credit

Communication Strategies

This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

SEM 700R ............................................................ 0 credits

Doctoral Program Orientation Seminar

SEM 700R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.
Comparative Models of Educational Environments
This course examines the various models of educational environments available to students today. Discussion topics range from the wealth of options available for P-12 school students to adult learning modalities for learners of all ages.

EDD 712 ................................................................. 3 credits
Leadership in Contemporary Organizations
This course explores organization theory, culture, and change. The influence of leadership on the organization is examined in depth. The different functions of administration, management, and leadership are of focus.

EDD 713 ................................................................. 3 credits
Lifelong Learning: Leadership in the Educational Continuum
The concept of lifelong learning and the impact it has on education providers is the focus of this course. Theories of learning, specifically adult learning, are examined. The role that P-12 education, higher education, corporate education/training, and the military play in instilling a belief in lifelong learning is of focus.

EDD 714................................................................. 3 credits
Comparative Models of Educational Environments
This course examines the various models of educational environments available to students today. Discussion topics range from the wealth of options available for P-12 school students to adult learners to alternative learning environments. Specific focus is placed on distance education modalities for learners of all ages.

RES 711 ................................................................. 3 credits
Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, qualitative and quantitative research basics, and critical issues in conducting research.

RES 722A ................................................................. 3 credits
Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ................................................................. 3 credits
Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ................................................................. 3 credits
Qualitative Methods and Design
This course provides some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

RES 721 ................................................................. 3 credits
Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counter-act resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

EDD 722 ................................................................. 3 credits
The Legal Context of Education
This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory issues, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case law and specific pieces of education legislation are reviewed.

EDD 723 ................................................................. 3 credits
Ethics and Values in Learning Organizations
The ethics and value-based decisions that learning organizations are faced with are explored in depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values in education, codes of conduct, and codes of ethics are debated.

EDD 724 ................................................................. 3 credits
Instructional Leadership
This course analyzes the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating staff and students, and creating dynamic learning environments. The importance of faculty development and their involvement in research and public service are of special focus.

PFL 700R ................................................................. 3 credits
Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ................................................................. 2 credits
Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into...
the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

EDD 731R ................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732R ............................................................... 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ............................................................... 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC 728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

EDD 731 ................................................................. 3 credits

The Economics of Education
The principles and theories of the economics of education are examined. The role that Federal, state, and local government play in the economics of education is explored in depth. Key topics include budget management, grants, financial aid, expenditures and revenues, and the rising cost of education. Economic policy analysis is a focus in this course.

EDD 732 ................................................................. 3 credits

Contemporary Policy Analysis and Development
This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

EDD 733 ................................................................. 3 credits

Evaluation and Assessment Methods
This course explores the evaluation and assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Accreditation issues, outcomes-based assessment, institutional research, and staff and faculty evaluation are key topics. The influence of leadership style on evaluation and assessment methods also is examined.

RES 725 ................................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T², MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 .................................................................................. 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

RES 727 .................................................................................. 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 .................................................................................. 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 .................................................................................. 3 credits

Ethnography and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 .................................................................................. 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data
within a grounded theory context.

RES 746 .................................................................3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues sur-
rounding the use of mixed methods in business, education, nursing
and social science research and the analysis of data using mixed
methods. The course will involve scrutiny of published mixed-
method research throughout, and uses published research for ref-
rence purposes throughout the course. Students are expected to
develop skills in mixed-method research by engaging in actual
analysis of data using mixed methods. Thus, the course will blend
conceptualization, design, and analysis. Content of the course rep-
resents a clear recognition of the importance of mixed methods in
research and the growing importance of a solid knowledge of both
quantitative and qualitative approaches -- and their blending -- to
actually design and conduct meaningful doctoral level research.

DOC 722 .................................................................3 credits

Doctoral Seminar II
This is the second one-on-one chair-guided course for a doctoral
required to complete this class. An approved dissertation is
oral defense of the dissertation and prepares and submits the
study. The learner/chair relationship and the learner earning
approval, or IRB approval of ethical treatment within the proposed
received, Committee/Chair approval, Quality Review Methods
approval, or Committee/Chair approval of the dissertation proposal is approved.

The following Doctor of Education in Educational Leadership/
Curriculum and Instruction program may be offered at these
University of Phoenix campus locations: Online, depending on student demand and other factors. Not all programs may be available to
all residents of all states. Students may want to consider completing
certain courses in the Online classroom at Online rates if the program is
available via the Online modality in their state. Please contact your
enrollment advisor for more information.

The Doctor of Education in Educational Leadership with a special-
ization in Curriculum and Instruction will prepare learners to
become instructional leaders who will strategically manage and
lead processes related to curriculum, instruction, and assessment.
Graduates will demonstrate both practical and scholarly knowl-
edge in their use of analytical, critical, and innovative thinking to
improve the performance of educational institutions.

Historically, education has been a field of constant evolution and
debate, with the pull of philosophical, cultural, and political influ-
ences felt throughout the industry. As such, contemporary educa-
tors face challenges unlike those faced by their predecessors.
Educational leaders must design and facilitate learning in cultur-
ally diverse classrooms; manage the needs of multiple stakehold-
ers; develop their classrooms, schools, and systems effectively and
efficiently in the face of severe funding pressures; address the
demands of regulatory bodies; and meet the outcomes established
by the greater educational community.

As the education system undergoes these radical changes, there
has been a drastic increase in the need for leaders who are capable
of designing innovative curricular models in their institutions and
of consistently improving their students’ outcomes. The Doctor of
Education in Educational Leadership with a specialization in Cur-
rriculum and Instruction is offered by the University of Phoenix to
enable leaders to affect these high levels of performance through
applied scholarship, rigorous analysis, and comprehensive evalua-
tion methods.

The Curriculum and Instruction specialization degree is consistent
with the University’s mission to educate working adults to achieve
their professional goals and to improve the quality of education in
their communities. The program is designed to emphasize curricu-
lar leadership and to focus on applied research that improves
instruction and educational outcomes.

Program Goals
Upon completion of all program requirements of the Doctor of
Education in Educational Leadership with a specialization in Cur-
rriculum and Instruction degree, learners will be able to:

- Evaluate and improve instructional and organizational
processes through research-based decisions.
- Support and enhance the educational process through
instructional leadership.
• Influence policy decisions within educational settings with knowledge of social theories, historical perspectives, and political issues.
• Design, develop, and implement curriculum, instructional strategies, and assessment tools to enhance learning.
• Create and implement sound curricular models by synthesizing research, theory, and experience.

Program Structure
The EdD/CI program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the Third Year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the EdD/CI degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of germainal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues. Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd-ci.

Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the ‘A’ course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the ‘B’ course. DOC 733 A and B~.................................................................3 credits

Doctoral Dissertation  
DOC 734 A and B~.................................................................3 credits

Doctoral Project IV

Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 733: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the EdD/CI

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Official transcripts listing a minimum of three (3) graduate level credits in research methods, statistics or scientific reasoning with a grade of “C” or better.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Academic Progression Requirements for the EdD/CI

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and ED$ 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
• Students must earn a grade of "B" or better in COM 705
• Quality final Institutional review of dissertation during DOC 734.
• Editorial Review after DOC 734 and prior to graduation.
• Institutional Review Board approval prior to enrollment in DOC 734.
• Editorial Review after DOC 734 and prior to graduation.
• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
• Students who would like to repeat DOC 740R may repeat the course.

**Academic Standing and Minimum Grade Requirements for the EdD/CI**

• Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course.
• COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

**Degree Requirements for the EdD/CI**

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

• A minimum of 68 doctoral credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
• The dissertation may not be waive.

**Course Descriptions for the EdD/CI**

**COM 705**

Introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

**SEM 700R**

Doctoral Program Orientation Seminar

SEM 700R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R,
learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

**LDR 711A .................................................................3 credits**

**Leadership Theory and Practice**
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

**EDD 711 .................................................................3 credits**

**Social Contexts and Contemporary Issues**
This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.

**EDD 724 .................................................................3 credits**

**Instructional Leadership**
This course analyzes the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating staff and students, and creating dynamic learning environments. The importance of faculty development and their involvement in research and public service are of special focus.

**CUR 711 .................................................................3 credits**

**Developmental and Learning Theories**
Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.

**CUR 712 .................................................................3 credits**

**Curriculum Theory**
This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorists and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.

**RES 711 .................................................................3 credits**

**Fundamental Principles of Sound Research**
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

**RES 722A .................................................................3 credits**

**Research Design**
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

**RES 723 .................................................................3 credits**

**Advanced Statistical Research Methods and Design**
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

**RES 724 .................................................................3 credits**

**Qualitative Methods and Design**
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students' understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

**EDD 721 .................................................................3 credits**

**Planning and Leading Change**
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

**CUR 721 .................................................................3 credits**

**Curriculum Design**
In this course, learners focus on the creation of systemic models of curriculum development, including consideration of schedule, structure, stakeholder involvement, and end products. Learners will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.

**CUR 722 .................................................................3 credits**

**Instructional Models**
This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs and staff development are of special focus.

**CUR 723 .................................................................3 credits**

**Assessment of Student Learning**
This course explores student assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Among the key topics are outcomes-based assessment - such as standardized achievement and criterion assessment, as well as the influence of leadership styles on these outcomes.

**PHL 700R .................................................................3 credits**

**Creative and Critical Thinking**
This course challenges the learner to become a creative leader / problem-solver and to begin the process of personal transformation by questioning one's assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

**DOC 721R .................................................................2 credits**

**Doctoral Seminar I**
This 3-day residency course begins the formal development of the learner's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at
the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732R ................................................................. 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ................................................................. 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

CUR 731 ................................................................. 3 credits

Supervision of Curriculum and Instruction
This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.

EDD 732 ................................................................. 3 credits

Contemporary Policy Analysis and Development
This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

CUR 732 ................................................................. 3 credits

Program Evaluation
This course explores program evaluation models and methods utilized in learning organizations. Both formative and summative methods are discussed, and their merits and faults are debated. Accreditation issues are among the key topics, and the influence of leadership style on program evaluation methods is examined.

RES 725 ................................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T², MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ................................................................. 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 ................................................................. 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ................................................................. 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ................................................................. 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ................................................................. 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of
theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 .................................................................3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches -- and their blending -- to actually design and conduct meaningful doctoral level research.

DOC 722 .................................................................3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 .................................................................3 credits

Doctoral Dissertation
This is a mentor-guided course. Learners enroll for this course while finalizing their Doctoral Project with their Committee. The learner/mentor relationship is the catalyst for completing the Doctoral Project research, findings, recommendations, and conclusions.

DOC 734 .................................................................3 credits

Doctoral Project IV
This is the final course in the program’s sequence in which the learner, with the guidance of his or her mentor, completes the formal oral defense of the dissertation and prepares and submits the study for University approval. An approved dissertation is required to complete this class.

DOC 733A .................................................................3 credits

Doctoral Dissertation
This is the second one-on-one chair-guided course for a doctoral learner working to complete a dissertation proposal. Learners enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or IRB approval of ethical treatment within the proposed study. The learner/Chair relationship and the learner earning approval of the dissertation proposal from all three groups is the catalyst for the course.

DOC 733B .................................................................3 credits

Doctoral Dissertation
This third available dissertation proposal course provides extended time for one-on-one work between a learner and his or her dissertation committee Chair. Learners enroll for this course when a learner has not yet received either IRB approval, Quality Review Methods approval, or Committee/Chair approval of the proposed dissertation. Learners should work in conjunction with the Chair to complete any remaining requirements to achieve all approvals required to begin dissertation work. If all approvals are received during the course, it is appropriate for the candidate to begin working on the dissertation, but not until all approvals have been received. Learners must repeat this course, until the dissertation proposal is approved.

Doctor of Philosophy in Higher Education Administration

The following Doctor of Education in Higher Education Administration (Ph.D./HEA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Philosophy in Higher Education Administration (Ph.D./HEA) program will prepare learners for scholarship, practice, and leadership in post-secondary educational environments. Throughout the program, learners explore higher education through various lenses, with emphases on the ethical responsibilities of higher education institutions for developing strong communities and a knowledge-oriented workforce, and the role that collaboration and dialogue play in producing meaningful scholarship and effective leadership practice.

The proliferation of institutions of higher learning, along with the diversified student population entering into post-secondary classrooms, has created the need for new models of higher education leadership. These models require leaders to perform strongly in the traditional roles associated with the operation of complex organizations as well as the skills and disposition of an educational researcher. Additionally, leaders in higher education must be able to embody these roles in order to support their institutions’ missions and creatively meet academic and organizational needs.

The Ph.D./HEA program addresses these dual roles by providing opportunities for academic inquiry into education and its historical, philosophical, and sociological premises alongside of depth study of the management and leadership of educational institutions. As such, learners in the Ph.D./HEA program are strongly encouraged to cultivate a rich, nuanced, and holistic understanding of higher education administration, placing them at the forefront of their discipline.

The Ph.D./HEA degree is consistent with the University’s mission to educate students to achieve their professional goals, improve the productivity of educational organizations, and to improve the quality of education in their communities and in the community of scholarship surrounding higher education administration.

Program Goals
The goals of the Ph.D. in higher education program are to:

• Cultivate ethical leaders who possess transferable skills and acumen for a variety of settings and roles

• Encourage a systemic approach to higher education administration
• Foster professionally socialized educational administrators
• Enhance participation in the global higher education community
• Prepare proficient researchers in higher education
Throughout the program, learners will evidence the following competencies to meet these goals:
• Understand the theory and practice related to the major domains of higher education
• Demonstrate adaptability in using that knowledge in a variety of contexts and organizational configurations
• Develop a holistic understanding of higher education constituencies
• Foster models for collaborative relationships with and among individuals and organizations
• Determine a course of professional development and life-long learning
• Engage with professional associations and organizations
• Demonstrate knowledge of the diverse philosophical, social, and historical contexts and ideologies of education (colonialism and educational development)
• Foster programs that incorporate a meaningful regard for and participation in cultural pluralism
• Demonstrate proficiency in various research methodologies
• Contribute substantial and original research to the body of knowledge

Program Structure
The PhD/HEA program has a 65-credit requirement that involves online modalities of instruction, residency requirements, and a comprehensive examination. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 10 days in residency during the 3-year program. Five days near the beginning of the first year and five days prior to the comprehensive exams after the common core of the classes is completed. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ph.D./HEA degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of higher education leadership knowledge.

The dissertation provides the learner an opportunity to demonstrate mastery of germinal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program's curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research methodology for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/phd-hea.

Ethnomethodology and the Study of Culture

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and dissertation defense requirements for the doctoral program. Students have the option to complete the B or B and C courses for either DOC 736 and/or DOC 738 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 736B or DOC 738B must be awarded a letter grade from the faculty member for their final attempt at the "B" course. Students who proceed from DOC 736B or DOC 738B to DOC 736C or DOC 738C, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "C" course.

DOC 736 B and C ~ ...................................................... 3 credits
Dissertation I
DOC 738 B and C ~ ...................................................... 3 credits
Defense

Students may be required to complete DOC 736C and DOC 738C until all programmatic requirements and approvals have been met. The University reserves the right to modify the required course of study.
Additional Admission Requirements for the PHD/HEA

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, an ABA accredited institution (if coursework was from a graduate level program) or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A minimum equivalent of 2 years professional experience in an education setting or 2 years experience in a professional supervisory role within an equivalent (business, social services) setting.
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better.
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Independent Study Requirements for the PHD/HEA

- Students must submit a request for enrollment in an independent study course (IND 701, IND 702 or IND 703) to the Dean of the School of Advanced Studies or the Doctoral Program Chair for approval. Students may not enroll in an independent study course until approval is granted by the Dean or Doctoral Program Chair.
- Within the first week of any independent study, the faculty and student(s) must design, complete, and submit a learning contract and course syllabus to the Program Chair presiding over the Ph.D. program.
- All independent studies must culminate in a substantive project completed by the student(s). The aims and expected outcomes of this project must be clearly illustrated in the learning contract and syllabus. Examples of acceptable projects include publication-quality papers and draft chapters of the dissertation proposal.

Academic Progression Requirements for the PHD/HEA

Doctor of Philosophy in Higher Education Administration students are subject to the following academic progression requirements:

- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- All students must successfully complete each course (except COM 705 and EXAM 799) with a "B" or better grade before proceeding to any subsequent online, residency, or directed study course.
- Any student who does not maintain a minimum GPA of 3.0 will be put on academic probation.
- Academic probation will last for four consecutive courses during which time students must (1) raise their GPA to a minimum of 3.0 and (2) earn at least a grade of "B" in each course.
- Courses cannot be taken as directed studies without permission, obtained via SAC appeal, from the program’s Dean.
- Students will be allowed to have only one incomplete grade on their records at a time. Students will have up to 5 weeks to complete a course once an incomplete has been issued.
- Students may not enroll in EXAM 799 until all other coursework is completed, with the exception of electives/independent studies, dissertation courses (DOC 736A/B/C, DOC 737, and DOC 738A/B/C), and DOC 740R.
- Students must have their dissertation proposals approved by their dissertation committee members, the School’s Review Board, and the Institutional Review Board as a completion requirement for DOC 736A, DOC 736B, or DOC 736C. DOC 736B and DOC 736C have been provided as optional courses to give learners additional time with mentor to meet course and program requirements. Students may not enroll in DOC 737 without an approved proposal.
- Students may be required to complete DOC 736B and DOC 736C until all approvals for the proposal have been received by the committee members, the School’s Quality Review, and the Institutional Review Board.
- Students may not begin data collection until dissertation committee members, the School’s Review Board, and the Institutional Review Board have approved the proposal.
- Proposals may not be submitted for approval until successful completion of EXAM 799.
- Students must have their dissertation approved by their dissertation committee members and the dean to complete DOC 738A, DOC 738B, and DOC 738C. DOC 738B and DOC 738C have been provided as optional courses to give learners additional time with mentor to meet course and program requirements.
- Students may not be enrolled in more than one course at a time.
  - Students may enroll in DOC 740R concurrently with any of the dissertation courses.
  - Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once learners have completed DOC 740R, it does not need to be repeated unless the learner chooses to take it again.
  - Students are not required to attend DOC 740R if their dissertation is approved within 6 months of defense.
• Students may not waive any of the following courses: COM 705.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

Degree Requirements for the PHD/HEA
Doctor of Philosophy in Higher Education Administration students must meet the following degree requirements:
• A minimum of 65 doctorate credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies is required.
• Successful completion of the comprehensive examination is required. Should a student fail to complete the examination at the requisite level of performance (a grade of B or better), he or she will be allowed to repeat EXAM 799 once. If a student fails to earn a B on the second attempt, he or she will be scholastically suspended and will not be able to continue in the program.
• Successful oral defense and approval of the final dissertation by the dean is required.
• Completion of the graduation information packet:
  • The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
  • Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

Residency Requirements for the PHD/HEA
Doctor of Philosophy in Higher Education Administration students must meet the following physical residency requirements: Completion of the following residencies are mandatory:
• Five-day residency at the beginning of the program.
• Five-day residency during year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of completing all coursework except DOC 736A, DOC 736B, DOC 736C, DOC 737, DOC 738A, DOC 738B, and DOC 738C, he or she must attend DOC 740R, a non-credit, three-day weekend residency course.
• Students in this program may waive a maximum of 12 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• Students may not waive any of the following courses: COM 705, DOC 721, EDU 711 DOC 730R, DOC 710R, EXAM 799, DOC 720 Any dissertation courses (DOC 736A, B, and C; DOC 737, or DOC 738A, B, and C)

In order to waive a course in the Ph.D. program, students must have completed a previous course that meets the following criteria:
• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The dissertation will not be waived from the degree program.

Course Descriptions for the PHD/HEA

Communication Strategies
This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

SEM 700R ................................................................................0 credits

Doctoral Program Orientation Seminar
SEM 700R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

EDU 711 ................................................................................3 credits

Core Functions of Higher Education Administration
This course examines the major features of the three core functional areas of modern higher education. The course focuses on the administration of higher education institutions and includes the 1) student experience, including student development and learning; 2) faculty and staff issues, including RPT (retention, promotion, and tenure), faculty and staff development, curriculum, governance; and 3) infrastructure concerns, including planning, technology, and facilities.

DOC 710R ................................................................................3 credits

Doctoral Studies Seminar and Workshop
As an orientation to doctoral learning, this course challenges learners to engage in a transformational learning process by positioning themselves within their cultural context, the emerging doctoral community, and the larger field of interest. Learners will develop their critical consciousness as scholars, practitioners, and leaders. Class activities will include critical reading and writing, dialogic interaction, reflexive practice, and collaborative projects. As an outcome of the course, learners will refine their disposition toward the doctoral process and develop theoretical models and practical skills to succeed in the program.

PHL 713 ................................................................................3 credits

Philosophy of Education
Why educate? This course will commence with basic questions that underlie the purposes of formal and non-formal education. Global perspectives on values, beliefs, cultural referents, and goals of education will be examined from ancient days through current theo-
Higher Education Finance and Economics
This course introduces and examines the major features of the financial functions operative within various kinds of institutions of higher education. Specifically, the financial functions of the following kinds of colleges and universities will be compared and contrasted: types of degree-granting institutions; public and private, non-profit and for-profit entities; small, medium, and large entities; urban, suburban, and rural entities; and unionized and non-unionized entities. In each case, traditional income streams, non-traditional, and emerging income streams will be explored, in conjunction with traditional cost centers, non-traditional cost centers, and emerging cost centers. Traditional, new, and emerging administrative practices being utilized by financial managers to control the economic dynamics engendered by various combinations of the above variables will be discussed.

Proposal Seminar
This course will assist learners in determining their dissertation topic. Learners will work on their own dissertation prospectus/proposal as well as discuss the work of the other learners in the class. Upon completion of this course, learners will develop their problem statement and purpose statement, as well as determine the most effective research tradition to use for their dissertation. At the end of this course, learners will have incorporated this information to form the first chapter of their dissertation proposal.

Legal Aspects of Higher Education
This course provides an analysis of the legal issues prevalent in higher education institutions. Major topics of discussion include accreditation and regulatory issues, federal and state constituents and laws, institutional and individual legal issues, student rights, employment agreements, and the legal aspect of technology. Learners review case laws and specific pieces of education legislation to provide a basis for their legal decisions and policy making.

Planning, Evaluation, & Assessment in Higher Education Administration
This course will explore various concepts, theories, and methodologies underlying program planning, development, and assessment. Focusing on higher education administration, course content will address issues of purpose, goals, activities, outcomes, and evaluation in a variety of higher educational endeavors. Campus and off-campus program development, including feasibility, financial planning, staffing, and report management will provide knowledge and skills to effectively undertake campus initiatives.

Professional Development & Socialization in Higher Education
Administration
This course explores various aspects of daily work in higher education administration with a focus on the professional development of the learner. Topics will include: Grant-writing, program proposal development, scholarship and writing for publication, identifying external funding-sources, involvement in professional associations, and updating or developing a Curriculum Vitae.

EXAM 799 .................................................................................1 credit

Comprehensive Examination
The comprehensive examination is a program requirement for the Doctor of Philosophy degree from University of Phoenix. Examinations are administered online, and a successful grade must be earned for learners to attend the dissertation and elective course work and move to candidacy.

DOC 736A .................................................................3 credits

Dissertation I
The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method and an Institutional Review Board (IRB) review. Quality Review of the research method and IRB approval must be received to progress to DOC 737

DOC 737 .................................................................3 credits

Dissertation II
Learners enroll in this mentor-guided course while collecting and analyzing data for their dissertation. Learners are expected to finalize their dissertation with their committee during this course. In this course learner/mentor agreement serves as the catalyst for completing the study’s research, findings, recommendations, and conclusions.

DOC 738A .................................................................3 credits

Defense
In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

DOC 740R .................................................................0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC 728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

RES 723A .................................................................3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724A .................................................................3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoelting’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 .................................................................3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 .................................................................3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 .................................................................3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 .................................................................3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.
Student Affairs Administration

Understanding the Infrastructure of Higher Education

This course will examine the evolution of the Higher Education Academy from an organizational, political, philosophical, cultural, economic, and policy-oriented point of view. Students will become familiar with the campus culture through the evolution of various campus models that impact how departments function on-campus and work collaboratively to support the institution’s mission and campus culture and climate. Drawing from current topics and research in higher education administration, the behavior of and trend changes related to the needs of this student population will be examined.

COURSE DESCRIPTIONS

EDU 701 .................................................................................. 3 credits
Diversity and Communication
This course explores how the language of leadership can serve to include rather than exclude people. The major content areas of this course will be on not singling people out for race, age, disability, sexual orientation, and on being consistent in their treatment of people within a group. Upon completion of this course, learners will be able to investigate and analyze various aspects of their language for any ways that stereotypes are perpetuated or some groups of people are given less value.

EDU 702 .................................................................................. 3 credits
The Community College

The content and assessment of independent study courses will be determined via a learning contract between the learner and a requested faculty member. This learning contract will be forwarded to the program’s chair for review. Independent studies can be either concept or methods-based, and regardless of content they must culminate with the development of a major project that demonstrates learning at the doctoral level. Examples of major projects include publication-quality papers, complete chapter drafts of the dissertation proposal, or other rigorous demonstrations of learning.

EDU 703 .................................................................................. 3 credits
Independent Study I

This course will examine the evolution of the Higher Education Academy from an organizational, political, philosophical, cultural, economic, and policy-oriented point of view. Students will become familiar with the campus culture through the evolution of various campus models that impact how departments function on-campus and work collaboratively to support the institution’s mission and educate students.

EDU 704 .................................................................................. 3 credits
Independent Study II

This course will explore the history, philosophy, and purposes of student affairs administration, examining both its theoretical and practical foundations. Students will investigate issues and problems currently facing student affairs administration in the ever-changing educational climate and focus on the future of the profession.

EDU 705 .................................................................................. 3 credits
The Inclusive Campus: Addressing Differing Student Needs

This course will provide an overview of the various physical, mental, social, cultural, and economic factors that contribute to the uniqueness of students with individual differing abilities as related to campus culture and climate. Drawing from current topics and research in higher education administration, the behavior of and trends related to the needs of this student population will be examined.

EDU 706 .................................................................................. 3 credits
Leadership, Management, and Supervision

This course investigates building teamwork and commitment, coaching and mentoring, collective bargaining and contract negotiations, and delegating. Upon completion of this course, learners will have the following competencies: the ability to plan work teams and increase the effectiveness of their work, use coaching to improve the work of the underachiever as well as continued
growth of all employees, arrange and participate in collective bargaining and contract negotiations, and delegate work to subordinates.

ORG 707 .................................................................3 credits

Advanced Systems Thinking
With organizational change a certainty and no quick fix the problems of these organizations, this course will assist learners in dealing with uncertainty in the workplace and making decisions when neither the problems nor goals are clear. Upon completion of this course, learners will be able to think and act holistically to see connections among systems and how decisions in one area might affect the rest of the system.

DOC 736B .................................................................3 credits

Dissertation I
The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method. Quality Review of the research method approval must be received to progress to DOC 737.

DOC 736C .................................................................3 credits

Dissertation II
The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method. Quality Review of the research method approval must be received to progress to DOC 737.

DOC 738B .................................................................3 credits

Defense
In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

DOC 738C .................................................................3 credits

Defense
In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

Doctor of Philosophy in Industrial/Organizational Psychology

The following Doctor of Philosophy in Industrial/Organizational Psychology (Ph.D./IO) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Philosophy in Industrial/Organizational Psychology (Ph.D./IO) program will prepare graduates for careers in industrial/organizational psychological research, consulting, and instruction with emphasis on employee issues, organizational development, human resource management, and research expertise.

Competence and effectiveness in any organization find their roots in the people the organization employs and develops. Under this auspice, leaders recognize the significance of critical human resource methods, such as job design and analysis, organizational culture assessments, training and development, and talent management, on the sustainability and prosperity of any organization. Thus, both strategic and tactical decision-making must be based in sound, methodologically rich data gathering and analysis, as well as robust theoretical frameworks for explaining workplace behavior. Possession of this knowledge and these skill sets place industrial/organizational psychologists in a crucial role for organizations, and as either consultants or leaders themselves, these professionals utilize data-driven inquiry and responses to improve efficacy, develop and maintain cultures of high performance, and enrich the workplace lives of employees.

The Ph.D./IO program engages learners in academic inquiry into organizations and human behavior in the world of work, with foundational coursework in the history and functions of I/O psychology as well as an intensive, rigorous research curriculum. Through these dual emphases, the program challenges learners to develop the habits of mind and critical dispositions required to produce complex, yet practical, inquiry aimed at organizational and human development. Furthermore, the program explores the ethical aspects of I/O psychology practice, ensuring that learners respect and work toward enhancing the well being of the people whom they serve.

The I/O Psychology profession is characterized by the theory/practice continuum practitioners embody in every facet of their work, perhaps more so than most organizational workers. As such, the Ph.D./IO degree is consistent with the University’s mission to educate students to achieve their professional goals, improve the productivity of educational organizations, and to improve the quality of their communities as well as the community of scholarship on industrial/organizational psychology.

Mission Statement
The mission of the I/O program is to develop leaders who positively influence the effectiveness of industrial/organizational settings through application of theory, research, assessment, evaluation, and intervention.

Goals and Competencies
The goals of the Ph.D. in Industrial/Organizational Psychology program are to:

• Cultivate interdisciplinary and adaptable inquiry methods and attitudes through a program of foundational industrial/organizational psychology as well as analyses of emergent trends and concepts in organizational study
• Prepare researchers who contribute substantively to the industrial/organizational psychology body of knowledge and who effect organizational development
• Encourage lifelong learning and leadership within the field of Industrial/Organizational Psychology through reflexive, transformational learning principles and practices
• Assist learners in forming sound ethical frameworks for organizational research and practice

Throughout the program, learners will evidence the following competencies to meet these goals:

• Apply and communicate psychological knowledge and research methods within industrial/organizational settings
• Apply critical thinking skills and assessment to theory, research, and practice
• Evaluate the relationship between social influences and human behaviors
• Integrate ethical concepts into the study of industrial/organizational psychology
• Contribute to the body of knowledge in industrial/organizational psychology

Program Structure
The Ph.D./Industrial Organizational Psychology (I/O Psych) program has a 98-credit requirement that involves an in-route master’s, a master’s project, residency, online modalities of instruction, and a Comprehensive Exam. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 10 days in residency during the program. Five days of residency begin the doctoral portion, and a 5-day session follows after immersion in the doctoral courses. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the final residency, learners will apply their knowledge in a collaborative way to learn the process of consulting within the field of I/O. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ph.D./I/O Psych degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of educational leadership knowledge.

The dissertation provides the learner an opportunity to demonstrate mastery of germinal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research methodology for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/phd-io.

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and dissertation defense requirements for the doctoral program. Students have the option to complete the IB or IB and IC courses for either DOC 736 and/or DOC 738 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 736IB or DOC 738IB must be awarded a letter grade from the faculty member for their final attempt at the "B" course. Students who proceed from DOC 736IB or DOC 738IB to DOC 736IC or DOC 738IC, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "C" course. DOC 736 IB and IC | 3 credits |
| Documentation I | 3 credits |
| Documentation I | 3 credits |
| Defense | 3 credits |

Students may be required to complete DOC 736IC and DOC 738IC until all programmatic requirements and approvals have been met. The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the PHD/IO**

- A bachelor’s degree with a cumulative total of nine credit hours in any of the following disciplines: statistics, social science, and/or psychology. Credits must be from a regionally or approved institution accredited, or candidate for accreditation, college or university, an ABA accredited institution. If coursework was completed at a recognized foreign institution, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 3.0 posted on the bachelor’s degree, or one of the following:
  - 3.5 for the last two academic years of coursework posted on the official bachelor’s transcript
  - A cumulative GPA of 3.0 posted on a master’s transcript
  - A cumulative GPA of 3.0 posted on a doctoral transcript
  - A minimum score of at least 150 for verbal, 149 for quantitative sections, and a 4.25 on the analytical section of the GRE is required for admission.

- All students must earn a course grade of "B-" or better or they will be scholastically disqualified and must repeat the course. Each course may be repeated only once. If a student fails to earn a B- on the second attempt, he or she will be scholastically suspended and will not be able to continue in the program. After four course repetitions, if a student earns a course grade of less than a B- in a fifth course, he or she will be scholastically suspended and will not be able to continue in the program.

- Successful completion of the comprehensive examination is required. Should a student fail to complete the examination at the requisite level of performance he or she will be allowed to repeat PSYCH 799 once. If a student fails to earn a B- on the second attempt, he or she will be scholastically suspended and will not be able to continue in the program.

- Courses cannot be taken as directed studies without permission obtained via SAC appeal.

- Any student who does not maintain a minimum GPA of 3.0 will be put on academic probation.

- Academic probation will last for four consecutive courses during which time students must (1) raise their GPA to a minimum of 3.0 and (2) earn at least a grade of "B" in each course.

- Students will be allowed to have only one incomplete grade on their records at a time. Students will have up to 5 weeks to complete a course once an incomplete has been issued.

- Satisfactory completion of PSYCH 710 and its prerequisite course of study is required for enrollment in PSYCH 720R.

- Students must have their dissertation proposals approved by their dissertation committee members, the School’s Review Board, and the Institutional Review Board as a completion requirement for DOC 736IA, DOC 736IB, and/or DOC 736IC. DOC 736IB and DOC 736IC have been provided as optional courses to give learners additional time with the mentor to meet course and program requirements. Dissertation I: Students may not enroll in DOC 737I without an approved proposal.

- Proposals may not be submitted for approval until after successful completion of PSYCH 760R. Students may be required to complete DOC 736IC and DOC 738IC until all approvals have been received by the committee members, the School’s Quality Review, and the Institutional Review Board.

- Students may not begin data collection until dissertation committee members, the School’s Review Board, and the Institutional Review Board have approved the proposal.

- Students must have their dissertation approved by their dissertation committee members and the Dean to complete DOC 738IA, DOC 738IB, or DOC 738IC. DOC 738IB and DOC 738IC have been provided as optional courses to give learners additional time with the mentor to meet course and program requirements.

- Dissertation defenses must take place in DOC 738IA, IB, or IC.

- Students may not be enrolled in more than one course at a time.

- Students may enroll in DOC 740R concurrently with any of the dissertation courses.

- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course RES 770. Once learners have completed DOC 740R, it does not need to be repeated unless the learner chooses to take it again.

- Learners who so choose may repeat DOC 740R.
• Learners must have one dissertation committee member who has earned a doctoral degree from an accredited institution in the discipline of the degree.

Master Degree Requirements for the PhD/IO
As a matriculation benchmark of the PhD/IO program, students will be awarded a Master of Science in Industrial/Organizational Psychology degree by meeting the following requirements:
• A minimum of 49 doctorate credits in the Required Program Category Preferred Sequence.
• Enroll in PSYCH 710 (Master’s Project) within 3 years of completing the first course (PSYCH 700).
• Satisfactory completion of PSYCH 710 (Master’s Project) and its prerequisite course of study.
• A minimum grade point average (GPA) of 3.0.
• Completion of the graduation information packet.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

Doctor Degree Requirements for the PhD/IO
The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• A minimum of 98 doctorate credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 3.0.
• Successful completion of all residencies is required.
• Written endorsement by dissertation committee members, the School’s Review Board, and the Institutional Review Board is required for the dissertation proposal to be approved.
• Successful oral defense and approval of the final dissertation by the dean is required.
• Completion of the graduation information packet.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

Independent Study Requirements for the PhD/IO
• Students must submit a request for enrollment in an independent study course (PSYCH 790) to the Dean of the School of Advanced Studies or the Doctoral Program Chair for approval. Students may not enroll in an independent study course until approval is granted by the Dean or Doctoral Program Chair.
• Within the first week of any independent study, the faculty and student(s) must design, complete, and submit a learning contract and course syllabus to the Program Chair presiding over the Ph.D. program.
• All independent studies must culminate in a substantive project completed by the student(s). The aims and expected outcomes of this project must be clearly illustrated in the learning contract and syllabus. Examples of acceptable projects include publication-quality papers and draft chapters of the dissertation proposal.

Residency Requirements for the PhD/IO
Doctor of Philosophy in Industrial/Organizational Psychology students must meet the following physical residency requirements:
• If a student's dissertation has not been completed and approved by the dean within 12 months of completing all coursework except DOC 736A, DOC 736B, DOC 736C, DOC 737, DOC 738A, DOC 738B, and DOC 738C, he or she must attend DOC 740R, a non-credit, three-day weekend residency course.
• Students in this program may waive the following courses using master's level coursework (500 or 600-level): PSYCH 701, PSYCH 702, PSYCH 703, and ORG 714
• While the University maintains that the majority of coursework in the major course of study must be completed through the University in order to meet overall residency requirements, a certain number of credits may be waived in order to avoid duplication.
• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Doctoral-level courses cannot be waived.

Course Descriptions for the PhD/IO
PSYCH 700 ................................................................. 3 credits
Introduction to I/O
This survey course introduces the domains of the I/O program. The topics include an overview of the four I/O program domains: human resource management, factors influencing employee performance, organization development, and research relevance within the I/O field of study. Furthermore, the learner will gain a firm understanding of the evolution of the I/O field of study from the foundations of the field to the present day, the various ways that I/O psychologists contribute to organizations, broader scientific community, and the main ethical issues likely to be encountered in the field. The course covers a wide variety of topics, ranging from employee selection to organizational development, with the goal of exposing students to the main issues influenced by I/O psychologists.
PSYCH 701 ................................................................. 3 credits
History and Systems of Psychology
In this course learners examine the history of and different systems in psychology, the development of the discipline of psychology, and key factors that guided its evolution into present form. Different aspects of natural science, including rational and paradigmatic approaches, and how these aspects relate to social science are also examined.
PSYCH 702 ................................................................. 3 credits
Social Psychology
This course covers the basic theoretical foundations and recurrent themes in social psychology (including attitudes, stereotyping,
conformity, power, aggression, pro-social behavior, the social self, emotions, group dynamics, and inter-group relations). The emphasis is on recent empirical and theoretical developments and includes models of social cognition that are a focus of contemporary social psychological theories.

PSYCH 703  ................................................................. 3 credits

Personality Theories
This course enables students to differentiate among the primary theoretical models of personality theory, such as psychodynamic, affective, cognitive-behavioral, and humanistic theories. Emphasis is on the importance of learners recognizing belief systems and underlying assumptions inherent in various personality models that accurately reflect their own personal perspectives and to recognize strategies and approaches in psychology that reflect identified personality theories as foundation.

ORG 714  ................................................................. 3 credits

Organizational Theory and Design
The history of organizational theory and design, and the three primary theories used to study organizations - classical, neoclassical, and systems theory - and the application of each theory to modern organizations are examined. Additionally, this course focuses on design issues, including organizational, departmental, and job considerations. Finally, the course examines pressing issues for current organizations, including culture, innovation, and learning.

PSYCH 704  ................................................................. 3 credits

Current and Future Topics
Learners explore current issues facing the I/O professional, such as stress and conflict in the workplace, the impact of technology on employee morale, changing dynamics of the employee, and socioeconomic factors within the globalized work environment. Additional topics will be added based on the current focus of the literature.

RES 731  ................................................................. 3 credits

Research Methods and Statistics in I/O (I)
This course provides learners with a foundation in the design of psychological research. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 732  ................................................................. 3 credits

Research Methods and Statistics in I/O (II)
This course builds on the material covered in Research Methods and Statistics I by elaborating on the various statistical techniques used in the analysis of data generated by empirical research. The course includes both descriptive and inferential statistical methods and spans parametric and non-parametric statistical methods.

RES 733  ................................................................. 3 credits

Criterion Development, Performance evaluation, and Appraisal
This course focuses on key issues related to the development of measurement criterion in organizations. Theoretical and practical issues related to performance evaluation and appraisal are also discussed.

PSYCH 705  ................................................................. 3 credits

Personnel Psychology
Learners gain an appreciation for the processes I/O psychologists use to recruit, select, place, and develop employees/managers/executives, including discussions about tests, assessment centers, and interviews. Furthermore, the course examines the role of the I/O psychologist in awareness, preparedness, and response to behavioral problems or issues in the workplace.

RES 741  ................................................................. 3 credits

Testing and Measurement
A comprehensive examination of the psychometric procedures used to develop and validate educational and psychological instruments is the focus of this course. Building upon Research Methods and Statistics I, this course will discuss norms, standardized samples, reliability, validity, proper interpretation of test scores, and the steps in test development. Descriptive statistical procedures are briefly reviewed to facilitate the understanding of the quantitative aspects of psychological measurement. Professional standards for testing are reviewed at all phases of the course.

PSYCH 706  ................................................................. 3 credits

Human Performance, Assessment, and Feedback
In this course learners are familiarized with basic models of learning, as well as the different approaches to training, design, delivery, and measurement, that are necessary for organizational development programs. A key emphasis of the class concerns designing essential and effective training objectives that are aligned with an organization’s mission.

ORG 730  ................................................................. 3 credits

Organization Development
This course examines theory and research relevant to changing individuals, groups, and organizations to enhance and improve their overall effectiveness. OD interventions are discussed, specifically examining the role of the I/O psychologist, type of change, and focus of intervention (individual, group, or organization). Furthermore, learners will learn how to integrate psychological theories regarding small group theory as related to leadership, motivation, interpersonal influence, group effectiveness, conformity, conflict, role behavior, and group decision making.

PSYCH 707  ................................................................. 3 credits

Leadership Theory and Management Theory
Learners examine major theoretical leadership and management models, distinguish between leadership and management, and assess the impact of each on the work setting. Application of the various perspectives on leadership and management and how these perspectives play a vital role in the achievement of organizational, group, and team goals is discussed.

PSYCH 708  ................................................................. 3 credits

Work Motivation and Job attitudes
This course will allow learners to evaluate various theories of motivation and develop a familiarity and understanding of pertinent research in the field. Learners will be able to relate motivational theories to enhance employee attitudes, effectiveness, and well being in the midst of organizational stressors, health and safety issues, and outsourcing/downsizing.

PSYCH 709  ................................................................. 3 credits

Ethical, Legal, and Professional Contexts of I-O Psychology
Learners will review pertinent legal and ethical issues for I/O psychologists that are related to the different roles that these professionals take in the workplace. Learners will gain the tools necessary to develop an initial ethical framework for making decisions within an organizational structure, and this framework will be expounded upon in future classes.

PSYCH 710  ................................................................. 1 credit
Master's Project
The Master's Project will require learners to integrate their program of study with an in-depth exploration of an interest area that spans all four I/O program domains: human resource management, factors influencing employee performance, organization development, and research relevance. The project will be based on library research and/or fieldwork and must demonstrate a significant contribution to the I/O psychology field.

PSYCH 720R ................................................................. 3 credits

Dissertation Process
Learners will develop a foundational understanding about the composition of the dissertation, including research, analysis, and writing. To facilitate individual interests, learners will develop interest papers about three topics, each of which can be examined as a dissertation, including the general problem to be researched and supporting literature.

RES 750 ................................................................. 3 credits

Approaches to Research: Quantitative/Qualitative I
This course surveys a broad range of quantitative and qualitative research methodologies to prepare learners to apply them to a variety of research questions. Topics include development of problem statements, purpose statements, research questions, and hypotheses; conducting a literature review (with an emphasis on reading and evaluating existing research) and ensuring originality of the contribution; and creating an initial research proposal for each of the three research topics identified during PSYCH 720R.

RES 751 ................................................................. 3 credits

Approaches to Research: Quantitative/Qualitative II
Learners evaluate the three research topics developed into draft concept papers during RES 750, determine which topics are the most effective and feasible to study, and continue refining two of the selected topics while learning about advanced qualitative and quantitative issues (e.g., phenomenology, grounded theory, critical theory, etc.).

RES 752 ................................................................. 3 credits

Research Constructs and Design
This course requires students to synthesize the cumulative knowledge gained from the previous research courses to finalize and submit their dissertation concept paper for final review and evaluation. Students select one of two previously drafted concept papers and expand the concept paper to include clear justification of the chosen research method and design; a description of the study population and sample, including the sampling strategy; the methodological approach for collecting and analyzing data; and a brief review of relevant scholarship, including the theoretical or conceptual framework for the study.

PSYCH 740 ................................................................. 3 credits

Judgment and Decision Making
Learners will develop knowledge about decision theory, judgment, and problem-solving research related to areas such as vigilance behavior, employee selection, choice behavior, and human performance in complex environments. This course examines Brunswik’s lens model, Bayesian inference, subjective expected utility, prospect theory, and the cognitive information-processing paradigm.

PSYCH 750 ................................................................. 3 credits

Consulting and Business Skills
This course focuses on developing business presentation, including the development and presentation of information to a business audience that clearly articulates key messages in terms the audience can understand; skills in presenting and responding to questions; and the ability to deliver ideas, proposals, and requests in a fashion that leads to their acceptance and organizational movement in desired directions.

RES 760 ................................................................. 3 credits

Measurement of Constructs
The purpose of this course is to guide learners in the integration of information learned in previous courses (i.e., residency, research courses, testing and measurement) that relates to measurement and dissertation issues and apply the information to the initial working draft of the dissertation (developed in Research Constructs and Design). The final outcome of this course will be used as an initial draft of the introduction and literature review of the dissertation.

PSYCH 760R ................................................................. 3 credits

Consulting Processes in I/O
The purpose of this residency is for learners to build competencies related to consulting as an internal and external I/O professional.

RES 765 ................................................................. 3 credits

Multivariate Statistics
This course focuses on statistical approaches that simultaneously examine multiple variables. Learners will explore the assumptions, limitations, advantages, and applications of each approach. The approaches will include regression, discriminant function and analysis, multidimensional scaling, MANOVA, factor analysis, and structural equation modeling.

PSYCH 770 ................................................................. 3 credits

Attitude Theory Measurement and Change
Learners will gain an understanding of attitudes, opinions, and beliefs in relation to behavioral intentions and behaviors of individuals in the workplace. Areas include job satisfaction (general and various facets), job involvement, organizational commitment, and perceptions of fairness.

RES 770 ................................................................. 3 credits

Psychometrics
Learners will be exposed to theoretical and applied research issues for three areas of psychometrics: classical test theory, generalizability theory, and item response theory. These three theories will be examined based on I/O topics of interest to the students, such as leadership, individual differences, selection, and teamwork.

PSYCH 799 ................................................................. 1 credit

Comprehensive Examination
The purpose of this exam is for learners to demonstrate that they have acquired the requisite competencies to generate research at the doctoral level by successfully completing two comprehensive papers based on the following four areas: 1) theory, 2) integration, 3) reflection, and 4) application.

DOC 735 ................................................................. 3 credits

Research Proposal
Learners will discuss issues related to ethical research, complete human subjects research training, and complete a draft of the dissertation proposal.

DOC 736IA ................................................................. 3 credits

Dissertation I
The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and sub-
mit the dissertation proposal for a Quality Review of the research method and an Institutional Review Board (IRB) review. Quality Review of the research method and IRB approval must be received to progress to DOC 737.

**DOC 737I** ................................................................. 3 credits

**Dissertation II**

Learners enroll in this mentor-guided course while collecting and analyzing data for their dissertation. Learners are expected to finalize their dissertation with their committee during this course. In this course, learner/mentor agreement serves as the catalyst for completing the study's research, findings, recommendations, and conclusions.

**DOC 738IA** ................................................................. 3 credits

**Defense**

In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

**DOC 740R** ................................................................. 0 credits

**Annual Renewal Residency**

This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC 728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

**DOC 736IB** ................................................................. 3 credits

**Dissertation I**

The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method. Quality Review of the research method approval must be received to progress to DOC 737.

**DOC 736IC** ................................................................. 3 credits

**Dissertation I**

The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method. Quality Review of the research method approval must be received to progress to DOC 737.

**DOC 738IB** ................................................................. 3 credits

**Defense**

In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

**DOC 738IC** ................................................................. 3 credits

**Doctor of Philosophy in Nursing**

The following Doctor of Philosophy in Nursing (Ph.D)/NUR program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This program seeks to improve the delivery of quality health care by developing leaders as researchers, educators, and administrators within diverse global systems. Throughout the program, learners explore nursing through various lenses, with emphases on the ethical responsibilities in the field for developing strong communities and a knowledge-oriented workforce, and the role that collaboration and dialogue play in producing meaningful scholarship and effective leadership practice.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/phd-nur.

Additional Admission Requirements for the PHD/NUR

All applicants to this program must meet the following admission requirements:

- A master’s degree in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 3.0 on the graduate degree completed transcript is required for admission.

- A minimum of three years of full-time, post high school work experience within the past ten years, of which one (1) year must be RN experience, and the remaining two (2) years can be fulfilled with health care experience.

- Current employment in a nursing or health care role or access to an appropriate health care organization environment in which to complete the work related course assignments.

- Applicants must reside in the continental United States or in one of the US Territories with documentation of a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  - Guam
  - American Samoa
  - Northern Mariana Islands
  - US Virgin Islands

- All students residing outside of the United States or approved US Territories, with the exception of students residing in Canada or Puerto Rico, will be required to complete their International Nursing License equivalency by CGFNS (Commission on Graduates of Foreign Nursing Schools) or ICD (International Consultants of Delaware) for RN equivalency.

- All Canadian students must complete the Canadian RN License Acknowledgment Form and submit documentation of a valid, unrestricted, unencumbered RN license.

- Applicants residing in the Commonwealth of Puerto Rico must have an approved appeal on file documenting successful completion of the US NCLEX-RN exam and that all Puerto Rico RN licensing requirements are met to be eligible for admission.

- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.

  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Academic Progression Requirements for the PHD/NUR

Ph.D. in Nursing students are subject to the following academic progression requirements:

- Students must earn a grade of ‘B’ or better in COM 705 Communication Strategies. Students who earn less than a “B” will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
All students must successfully complete each course (except COM 705 and EXAM 799N) with a "B-" or better grade before proceeding to any subsequent online, residency, or directed study course.

Students who miss or must withdraw from a course may complete the course via directed study, if available. All maximum enrollment policies apply. This option will only be available three times (9 credits) and applies only to online courses. However, some courses may not be suitable or available for directed study, and all directed studies must have the approval of the Doctoral Program Chair.

Any student who does not maintain a minimum GPA of 3.0 will be put on academic probation.

Academic probation will last for four consecutive courses during which time students must (1) raise their GPA to a minimum of 3.0 and (2) earn at least a grade of "B" in each course.

Students will be allowed to have only one incomplete grade on their records at a time. Students will have up to 5 weeks to complete a course once an incomplete has been issued.

Students must have their dissertation proposals approved by their dissertation committee members, the School's Review Board, and the Institutional Review Board before dissertation work can begin. Proposals may not be submitted for approval until after students have completed dissertation courses (DOC 736N1, N2, and N3; DOC 737; and DOC 738N1, N2, and N3). DOC 736N1 and DOC 736N3 have been provided as optional courses to give learners additional time with mentor to meet course and program requirements. Dissertation I. Students may not enroll in DOC 737 without an approved proposal.

Proposals may not be submitted for approval until after successful completion of EXAM 799N. Students may be required to complete DOC 736N3 and DOC 738N3 until all approvals have been received by the committee members, the School's Review Board, and the Institutional Review Board.

Students must have their dissertation approved by their dissertation committee members and the Dean to complete DOC 736N1, DOC 736N2, and/or DOC 736N3. DOC 736N1 and DOC 736N3 have been provided as optional courses to give learners additional time with mentor to meet course and program requirements. Dissertation I. Students may not enroll in DOC 737 without an approved proposal.

Dissertation defenses must take place in DOC 738N1, N2, or N3.

Students may be enrolled in more than one course at a time.

Students may enroll in DOC 740R concurrently with any of the dissertation courses.

Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once learners have completed DOC 740R, it does not need to be repeated unless the learner chooses to take it again.

Learners who so choose may repeat DOC 740R.

Learners must have one dissertation committee member, serving as committee chair (mentor), who has earned a Ph.D. in Nursing from an accredited institution.

Students must hold a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program.

**Degree Requirements for the PHD/NUR**

Ph.D. in Nursing students must meet the following degree requirements:

- A minimum of 62 doctorate credits in the Required Program Category Preferred Sequence.
- Up to 74 if additional (optional) dissertation courses taken
- A minimum grade point average (GPA) of 3.0.
- Successful completion of all residencies is required.
- Written approval by dissertation committee members, the School's Review Board, and the Institutional Review Board is required for the dissertation proposal.
- Successful oral defense and approval of the final dissertation by the dean is required.
- Completion of the graduation information packet.

The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.

Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

Successful completion of the comprehensive examination is required. Should a student fail to complete the examination at the requisite level of performance (a grade of B or better), he or she will be allowed to repeat EXAM 799N once. If a student fails to earn a B on the second attempt, he or she will be scholastically suspended and will not be able to continue in the program.

**Residency Requirements for the PHD/NUR**

PhD in Nursing students must meet the following physical residency requirements:

Completion of the following residencies are mandatory:

- Five-day residency at the beginning of the program.
- Five-day residency at the beginning of year three.
- If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except the dissertation courses (DOC 736N1, N2, and N3; DOC 737; and DOC 738N1, N2, and N3).

Students in the Doctor of Philosophy in Nursing program may waive a maximum of 12 credits through transfer for online courses only.
Students may not waive any of the following courses: COM 705, DOC 720N, DOC 721N, EXAM 799N. Any dissertation courses (DOC 736, N2, and N3; DOC 737; or DOC 738N, N2, and N3).

In order to waive a course in the Doctor of Philosophy in Nursing program, students must have completed a previous course that meets the following criteria:

- The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content; equal in credits to the University course it is replacing and must be a doctoral-level course.

The dissertation and comprehensive exam will not be waived from the degree program.

**Course Descriptions for the PHD/NUR**

**Communication Strategies**

This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

**SEM 700R** .......................................................... 0 credits

**Doctoral Program Orientation Seminar**

**SEM 700R** is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies' integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

**NUR 700** .......................................................... 3 credits

**Professional Nursing Leadership**

This course surveys theories, skills, risks, and rewards related to professional nursing leadership and innovation. This course also examines the dynamics of change and how it influences strategic planning.

**DOC 710R** .......................................................... 3 credits

**Doctoral Studies Seminar and Workshop**

As an orientation to doctoral learning, this course challenges learners to engage in a transformational learning process by positioning themselves within their cultural context, the emerging doctoral community, and the larger field of interest. Learners will develop their critical consciousness as scholars, practitioners, and leaders. Class activities will include critical reading and writing, dialogic interaction, reflective practice, and collaborative projects. As an outcome of the course, learners will refine their disposition toward the doctoral process and develop theoretical models and practical skills to succeed in the program.

**NUR 701** .......................................................... 3 credits

**Philosophy of Nursing Science**

This course examines the philosophical underpinnings associated with the science of nursing. The learner will critique philosophical views of science that have influenced the process of knowledge development and discovery.

**NSE 721** .......................................................... 3 credits

**Theories of Nursing Education**

This course examines historical and current theories as a basis for the nursing education curriculum. With a foundation based in major theorists and tenets of the theories, learners analyze select curricula for evidence of the various theories, investigate Implications of the theories applied to nursing education and interpret the interaction of the theories with current and evolving public policy.

**NUR 702** .......................................................... 3 credits

**Theory Construction and Concept Analysis**

Learners will identify phenomena of interest, conduct a concept analysis, and develop components of a theoretical framework.

**DHA 724** .......................................................... 3 credits

**Globalization of Health Care**

This course focuses on global health care systems with the objective of improving U.S. health care systems. Topics include global health issues, advocacy organizations, comparative political processes, and the economics of health financing. Students will understand the role of various international governing structures on health policy development.

**RES 714** .......................................................... 3 credits

**Quantitative Methods and Statistical Analyses**

This course is designed to provide students with an overview of quantitative research approaches and their application to decision making in higher education. Various methodologies for data collection and statistical analyses will be discussed, with an emphasis on the ways in which quantitative analyses are utilized in educational settings.

**RES 715** .......................................................... 3 credits

**Qualitative Methods**

This course is designed to provide students with an overview of qualitative research approaches and the application to work in higher education. Various methods for data collection and analyses will be discussed including: ethnography, grounded theory, case studies, discourse analysis, and phenomenology.

**NUR 703** .......................................................... 3 credits

**Theoretical Applications in Evidence-Based Practice**

This course addresses decision-making processes using evidence-based data. This course examines midrange theories with application of theoretical frameworks to practice. Learners will demonstrate acquired competencies to generate research at the doctoral level by successfully completing a comprehensive paper based on the following four areas: 1) theory, 2) integration, 3) reflection, and 4) application.

**DHA 712** .......................................................... 3 credits

**Risk Management in Complex Organizations**

Managing risk in an organization requires demonstration of an understanding of legal, licensure, certification, and accreditation dynamics, as well as litigation management within the context of corporate compliance. The student will apply concepts from labor law, risk financing, contract law, partnership agreements, and pro-
measurement and evaluation, association, and updating or developing a curriculum vitae.

This course will assist learners in determining their dissertation topic. Learners will work on their own dissertation prospectus/proposal as well as discuss the work of the other learners in the class. Upon completion of this course, learners will develop their problem statement and purpose statement, as well as determine the most effective research tradition to use for their dissertation. At the end of this course, learners will have incorporated this information to form the first chapter of their dissertation proposal.

**Proposal Seminar**

This course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation.

**Instructional Design and Curriculum Development**

This course analyzes the models and processes of instruction in nursing education programs. Effective instructional models explore the relationship of theories, standards, teaching strategies and learner outcomes. The importance of curriculum design, delivery, and evaluation are related to program outcomes. Instructional models for diverse populations, improvement of programs, and staff development are a special focus. Learners synthesize systemic teaching-learning models that include schedule, structure, stakeholder involvement, and curricular outcomes. Explanation of implicit, hidden, cultural, and institutional aspects of curriculum design and delivery inform the learner’s development approach.

**Statistics**

This course provides learners with a foundation in the design of statistical research. This course builds on the material covered in Quantitative Methods and Statistical Analysis by elaborating on the various statistical techniques used in the analysis of data generated by empirical research. The course includes both descriptive and inferential statistical methods and spans parametric and non-parametric statistical methods including multi-variant research designs.

**Professional Development & Socialization in Higher Education Administration**

This course explores various aspects of daily work in higher education administration with a focus on the professional development of the learner. Topics will include: Grant-writing, program proposal development, scholarship and writing for publication, identifying external funding-sources, involvement in professional associations, and updating or developing a Curriculum Vitae.

**Measurement and Evaluation**

This course explores program measurement and evaluation models and methods utilized in nursing education and learning organizations. Both formative and summative methods are discussed along with a debate of the merits and faults that apply to each evaluation method. Accreditation issues for nursing programs are a key topic. The influence of leadership style on program evaluation methods is examined. Assumptions of program evaluation and factors affecting reliability and validity are key topics presented and are integral to the measurement and evaluation processes.

**Evaluation of Health Care Programs**

This course prepares the contemporary health administrator to utilize research methodologies in making decisions regarding the cost effectiveness of specific health programs. Case studies will be used that incorporate disease-specific programs, community- wide health interventions, and population specific care management programs across a variety of health settings.

**Doctor of Philosophy degree from University of Phoenix. Examination of the research method and an Institutional Review Board (IRB) review.**

The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method and an Institutional Review Board (IRB) review. Quality Review of the research method and IRB approval must be received to progress to DOC 737.

**Dissertation I**

This course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation.

**Proposal Seminar**

This course will assist learners in determining their dissertation topic. Learners will work on their own dissertation prospectus/proposal as well as discuss the work of the other learners in the class. Upon completion of this course, learners will develop their problem statement and purpose statement, as well as determine the most effective research tradition to use for their dissertation. At the end of this course, learners will have incorporated this information to form the first chapter of their dissertation proposal.

**Instructional Design and Curriculum Development**

This course analyzes the models and processes of instruction in nursing education programs. Effective instructional models explore the relationship of theories, standards, teaching strategies and learner outcomes. The importance of curriculum design, delivery, and evaluation are related to program outcomes. Instructional models for diverse populations, improvement of programs, and staff development are a special focus. Learners synthesize systemic teaching-learning models that include schedule, structure, stakeholder involvement, and curricular outcomes. Explanation of implicit, hidden, cultural, and institutional aspects of curriculum design and delivery inform the learner’s development approach.

**Statistics**

This course provides learners with a foundation in the design of statistical research. This course builds on the material covered in Quantitative Methods and Statistical Analysis by elaborating on the various statistical techniques used in the analysis of data generated by empirical research. The course includes both descriptive and inferential statistical methods and spans parametric and non-parametric statistical methods including multi-variant research designs.

**Professional Development & Socialization in Higher Education Administration**

This course explores various aspects of daily work in higher education administration with a focus on the professional development of the learner. Topics will include: Grant-writing, program proposal development, scholarship and writing for publication, identifying external funding-sources, involvement in professional associations, and updating or developing a Curriculum Vitae.

**Measurement and Evaluation**

This course explores program measurement and evaluation models and methods utilized in nursing education and learning organizations. Both formative and summative methods are discussed along with a debate of the merits and faults that apply to each evaluation method. Accreditation issues for nursing programs are a key topic. The influence of leadership style on program evaluation methods is examined. Assumptions of program evaluation and factors affecting reliability and validity are key topics presented and are integral to the measurement and evaluation processes.
Dissertation I
The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method. Quality Review of the research method proposal must be received to progress to DOC 737.

DOC 736N3 ................................................................. 3 credits

Defense
In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

DOC 738N3 ................................................................. 3 credits

Defense
In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval. (B and C are if necessary)

Doctor of Management in Organizational Leadership with a Specialization in Information Systems and Technology

The following Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology (DM/IST) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The mission of the Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology (DM/IST) is to enable professionals from any industry to understand and evaluate the scope and impact of information systems and technology (IST) from organizational, industry-wide, and global perspectives. The DM/IST curriculum lays a foundation of knowledge in critical thinking, leadership, and the application of IST content areas. Learners integrate this knowledge with their professional experiences and doctoral-level research to create innovative, positive, and practical contributions to the body of IST knowledge. Graduates will be able to influence their organization and environment positively with transformational IST leadership practices.

This doctoral program in IST management incorporates coursework in fundamental management, organizational, and leadership concepts to engender the development of IST leadership perspectives. As such, learners with a professional leadership background in any discipline will be able to add their unique perspective to the study of the context, breadth, and processes of IST management.

Program Goals
Upon completion of all program requirements of the Doctorate in Management in Organizational Leadership with a specialization in Information Systems degree, learners will be able to:

- Conduct research as a foundation for executive action.
- Demonstrate innovation and creativity in developing new IT models to explain, forecast, support, and improve the strategic, tactical, and operational performance of organizations.
- Integrate and align IT initiatives with organizational strategy.
- Lead the IT decision-making process toward positive outcomes.
- Provide leadership to improve the overall performance of the organization in its industry, community, and global environment.

Program Structure
The DM/IST program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the Third Year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University's vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DM/IST degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of germinal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program's curriculum is designed to develop the student's ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues. Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dm-ist.

- Qualitative Methods and Design

**Information Systems Across Organizations, 12 total credits**
- IST 721 ~ .................................................................3 credits
- Knowledge Worker Information Systems
- IST 722 ~ .................................................................3 credits
- Information Technology for Teams
- IST 723 ~ .................................................................3 credits
- Departmental Information Systems
- IST 724 ~ .................................................................3 credits
- Organizational Information Systems Management

**Doctoral Residencies, 10 total credits**
- PHL 700R ~ .................................................................3 credits
- Creative and Critical Thinking
- DOC 721R ~ .................................................................2 credits
- Doctoral Seminar I
- DOC 731R ~ .................................................................3 credits
- Collaborative Case Study
- DOC 732R ~ .................................................................2 credits
- Doctoral Seminar III
- DOC 740R ~ ................................................................0 credits
- Annual Renewal Residency

**Advanced Inquiry in Information Systems and Technology, 9 total credits**
- IST 731 ~ .................................................................3 credits
- Partnership and Industry Information Systems
- IST 732 ~ .................................................................3 credits
- Global Information Systems Management
- IST 733 ~ .................................................................3 credits
- Information Systems Management Architecture

**Advanced Research Analysis, 3 total credits**
- RES 725 ~ .................................................................3 credits
- Descriptive and Comparative Data Analysis
- RES 726 ~ .................................................................3 credits
- Correlational Methods of Analysis
- RES 727 ~ .................................................................3 credits
- Approaches to Phenomenological Inquiry and Data Analysis
- RES 728 ~ .................................................................3 credits
- Qualitative Case Study
- RES 729 ~ .................................................................3 credits
- Ethnomethodology and the Study of Culture
- RES 745 ~ .................................................................3 credits
- Grounded Theory Methods
- RES 746 ~ .................................................................3 credits
- Mixed Methods

**Dissertation, 9 total credits**
- DOC 722 ~ .................................................................3 credits
- Doctoral Seminar II
- DOC 733 ~ .................................................................3 credits
- Doctoral Dissertation
- DOC 734 ~ .................................................................3 credits
- Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students must complete either DOCTORAL Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule.

**Additional Admission Requirements for the DM/IST**

All applicants are expected to meet the following admissions requirements:
• A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• Official transcripts listing a minimum of three (3) college credits in research methods, statistics or scientific reasoning with a grade of "c" or better.
• Current or a record of past employment in leadership of people or processes is required for admission.
• Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.
• All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  • Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  • Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  • An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  • An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  • A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Academic Progression Requirements for the DM/IST
Students are subject to the following academic progression requirements:
• Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
• Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
• Students may have only one incomplete grade on their records at a time.
• Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
• Successful completion of DOC 731R which serves as a qualifying examination course in the program.
• Quality review of dissertation proposal to advance beyond DOC 732R.
• Committee literature review prior to enrollment in DOC 734.
• Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).
• Quality final Institutional review of dissertation during DOC 734.
• Editorial Review after DOC 734 and prior to graduation.
• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
• Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Scholastic Disqualification for the DM/IST
• Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Residency Requirements and Course Waivers for the DM/IST
Students must meet the following residency requirements:
• Completion of physical residencies.
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
  • If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, IST 710, IST 721, IST 722, IST 723, IST 724, IST 731, IST 732, IST 733, PHL 700R, RES 722A, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, RES 745, SEM 700R.
• The dissertation may not be waived.

Degree Requirements for the DM/IST
Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Satisfactory oral defense and written completion of the dissertation proposal.
• Written approval of the dissertation proposal.
• A minimum of 68 doctorate credits.

The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.

Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

The certificate awarded for this program will read as: Doctor of Management and will not reflect the specialization. Specializations are reflected on the transcript only.

Course Descriptions for the DM/IST

Communication Strategies
This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

Doctoral Program Orientation Seminar
SEM 700R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

Leadership Theory and Practice
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

Organizational Theory and Design
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

Constructing Meaning
This course surveys the major content areas of information systems management that will be examined at various organizational levels of the Information Systems and Technology Specialization of the Doctor of Management program. The major content areas (IST domains) to be surveyed include information technology management, networking, Web, database, programming, and systems development. Upon completion of this course, learners will be prepared to analyze, define, and research the unique management considerations of each domain within various organization levels.

Foundations of Information Systems Management
This course surveys the major content areas of information systems management that will be examined at various organizational levels of the Information Systems and Technology Specialization of the Doctor of Management program. The major content areas (IST domains) to be surveyed include information technology management, networking, Web, database, programming, and systems development. Upon completion of this course, learners will be prepared to analyze, define, and research the unique management considerations of each domain within various organization levels.

Leadership Theory and Practice
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

Organizational Theory and Design
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

Constructing Meaning
This course surveys the major content areas of information systems management that will be examined at various organizational levels of the Information Systems and Technology Specialization of the Doctor of Management program. research, quantitative and qualitative research basics, and critical issues in conducting research.

**RES 722A** 3 credits

**Research Design**

This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

**RES 723**

**Advanced Statistical Research Methods and Design**

The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 3 credits

**Qualitative Methods and Design**

This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students' understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

IST 721 3 credits

**Knowledge Worker Information Systems**

In this course, the learner will research and evaluate the information systems and technology tools necessary to support the individual knowledge worker in today's environment. This analysis of the systems and tools will be conducted from the viewpoint of the program domains and how the individual worker must be supported to create a productive and efficient environment. The scope of this course will include hardware and software product considerations for management.

IST 722 3 credits

**Information Technology for Teams**

Learners in this course will further evaluate the application of the domains studied in IST/721 and how those domains are applied in a team setting. The application of the program domains will be examined in the context of support necessary to implement various organizational team models, ranging from co-located teams to geographically distributed virtual teams. Upon completion of this course, the learner will be prepared to define and analyze issues related to the management and support of information technology necessary for organizational teams' operations.

IST 723 3 credits

**Departmental Information Systems**

This course will continue the analysis of the application of the domains used by individuals and teams studied in IST/721 and IST/722. The learner will evaluate the application of the program domains to departmental operations and strategy. The learner will research and evaluate information systems support techniques, both internal and external to the departmental interfaces.

IST 724 3 credits

**Organizational Information Systems Management**

This course will build upon the considerations examined in the prior IST courses. Upon completion of this course, the learner will be prepared to evaluate and develop integrated strategies for the implementation of the IST domains within an organization.

**IST 722A** 3 credits

**Creative and Critical Thinking**

This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one's assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

**RES 724** 3 credits

**Doctoral Seminar I**

This 3-day residency course begins the formal development of the learner's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner's dissertation. This course will incorporate learners from various doctoral programs/disciplines.

**DOC 721R** 2 credits

**Collaborative Case Study**

This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization's environment. This course will incorporate learners from various doctoral programs/disciplines.

**DOC 722R** 2 credits

**Doctoral Seminar III**

This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

**DOC 723** 0 credit

**Annual Renewal Residency**

This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.

**IST 721** 3 credits

**Partnership and Industry Information Systems**

This course extends the learning from previous intra-company relationships to external IS organizational relationships. Upon completion of this course, the learner will be prepared to define, evaluate, and plan the application of IST domains that must be considered when developing partnerships and common industry
relationships.

**IST 732** ................................................................. 3 credits

**Global Information Systems Management**
This course extends the examination of the IST domains studied throughout the program to the global level. The learner will examine the application of the IST domains in the setting of a global economy and information technology environment. The learner will be prepared to define the common IS management approaches for the development of business systems that support global information systems requirements.

**IST 733** ................................................................. 3 credits

**Information Systems Management Architecture**
In this course, learners will create an innovative model, incorporating the domains and models from previous coursework. In the model building, learners will demonstrate their leadership competencies as related to IST.

**RES 725** ................................................................. 3 credits

**Descriptive and Comparative Data Analysis**
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

**RES 726** ................................................................. 3 credits

**Correlational Methods of Analysis**
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

**RES 727** ................................................................. 3 credits

**Approaches to Phenomenological Inquiry and Data Analysis**
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

**RES 728** ................................................................. 3 credits

**Qualitative Case Study**
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

**RES 729** ................................................................. 3 credits

**Ethnomethodology and the Study of Culture**
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

**RES 745** ................................................................. 3 credits

**Grounded Theory Methods**
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

**RES 746** ................................................................. 3 credits

**Mixed Methods**
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.

**DOC 722** ................................................................. 3 credits

**Doctoral Seminar II**
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

**DOC 733** ................................................................. 3 credits

**Doctoral Dissertation**
This is a mentor-guided course. Learners enroll for this course while finalizing their Doctoral Project with their Committee. The learner/mentor relationship is the catalyst for completing the Doctoral Project research, findings, recommendations, and conclusions.

**DOC 734** ................................................................. 3 credits

**Doctoral Project IV**
This is the final course in the program’s sequence in which the
learner, with the guidance of his or her mentor, completes the formal oral defense of the dissertation and submits the study for University approval. An approved dissertation is required to complete this class.

**DOCTORAL DISSERTATION**

This is the second one-on-one chair-guided course for a doctoral learner working to complete a dissertation proposal. Learners enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or IRB approval of ethical treatment within the proposed study. The learner/chair relationship and the learner earning approval of the dissertation proposal from all three groups is the catalyst for the course.

**Doctoral Dissertation**

This third available dissertation proposal course provides extended time for one-on-one work between a learner and his or her dissertation committee Chair. Learners enroll for this course when a learner has not yet received either IRB approval, Quality Review Methods approval, or Committee/Chair approval of the proposed dissertation. Learners should work in conjunction with the Chair to complete any remaining requirements to achieve all approvals required to begin dissertation work. If all approvals are received during the course, it is appropriate for the candidate to begin working on the dissertation, but not until all approvals have been received. Learners must repeat this course, until the dissertation proposal is approved.

**Doctor of Health Administration**

The following Doctor of Health Administration (DHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Health Administration (DHA) program prepares leaders to respond effectively to the dynamic and ever-changing health care industry. These individuals will have a capacity to critically examine and evaluate issues and trends and feel empowered to influence the destiny of the health systems. Graduates with a Doctor of Health Administration will be able to:

- Conduct, evaluate, and apply research designed to explain, forecast, predict, and/or improve the performance of health systems
- Use theoretical constructs to assess and develop implementation strategies health systems
- Strengthen leadership skills and abilities that foster the evolution of adaptive, high-performing health systems
- Evaluate, develop and implement policies and practices that impact health systems
- Lead organizations in anticipating and meeting challenges in the changing health environment

Graduates of the Doctor of Health Administration program will have enhanced their administrative and leadership skills through the completion of a curriculum that provides students with the latest theories and contemporary practice applications. They are not only able to define their role within the U.S. health system, but understand how to make necessary changes to create a work environment that is team-oriented and motivating to others. Graduates are able to analyze the influence of external and internal environments in order to align their organizations to respond to the ever-changing demands of the health care market place. Sensitivity to individuals and groups and the influence of multicultural diversity are seen as essential to effective leadership.

The curriculum is tailored to the needs of the health leader by providing content in finance, policy, research, technology, quality improvement, economics, leadership, and organizational analysis. The DHA program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both weekday and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Additionally, in the year three residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DHA degree is the successful completion and oral defense of a significant, substantial, and independently completed doctoral dissertation that adds new information to the body of health administration knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of the gereral and current literature in the field and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dha.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

</table>
• A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

• Official transcripts listing a minimum of three (3) graduate level credits in research methods, statistics or scientific reasoning with a grade of "C" or better.

• Current or a record of past employment in supervisory or management position is required for admission.

• Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

• All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners:
  • Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  • Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  • An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  • An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  • A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Degree Requirements for the DHA

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Health Administration.

Academic Progression for the DHA

Students are subject to the following academic progression requirements:

• Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
• Learners may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
• Students may have only one incomplete grade on their records at a time.
• Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
• Successful completion of DOC 731R which serves as a qualifying examination course in the program.
• Quality review of dissertation proposal to advance beyond DOC 732R.
• Committee literature review prior to enrollment in DOC 734.
• Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)
• Quality final Institutional review of dissertation during DOC 734.
• Editorial Review after DOC 734 and prior to graduation.
• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
• Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Minimum Grade Requirements for the DHA

• Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.
Residency Requirements and Course Waivers for the DHA

Students must meet the following residency requirements:

- Completion of physical residencies:
  - Five-day residency at the beginning of the program.
  - Three-day residency at the beginning of year two.
  - Eight-day residency at the beginning of year three.
  - If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.

- Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

- In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  - The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.

- The following courses may not be waived: COM 705, DHA 733, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R

- The dissertation may not be waived.

Course Descriptions for the DHA

COM 705 .................................................................1 credit

Communication Strategies
This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

SEM 700R ..................................................................0 credits

Doctoral Program Orientation Seminar
SEM 700R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 700R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

LDR 711A ...............................................................3 credits

Leadership Theory and Practice
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

DHA 711 ...............................................................3 credits

Administration of Complex Health Care Systems
Students will focus on administration of complex health systems rather than singular organizations. Topics include organizational analysis, strategic planning, multi-organizational management issues, and evolving governance structures. Students are expected to discuss and critically analyze theories and methods in health care administration. This course is intended to serve as an arena for discussion and inquiry regarding both current and historical issues in strategic decision making at the policy and the organizational level.

DHA 712 ...............................................................3 credits

Risk Management in Complex Organizations
Managing risk in an organization requires demonstration of an understanding of legal, licensure, certification, and accreditation dynamics, as well as litigation management within the context of corporate compliance. The student will apply concepts from labor law, risk financing, contract law, partnership agreements, and professional credentialing. Discussion will also include human subject research, data security, and biotechnology.

DHA 713 ...............................................................3 credits

Managing Resources in Health Organizations
Understanding the complexity of managing the vast resources needed to deliver quality health care is essential. Although human resources comprise the majority of needed assets, other resources include facilities and industry suppliers. This course will examine how these resources are interwoven and need to be successfully managed. The course is a combination of theoretical and practical approaches for resource management.

DHA 714 ...............................................................3 credits

Health Care Marketing
Survival of health care institutions is primarily dependent on how well marketing succeeds at acquiring market share. This course examines key marketing concepts within the health care industry. Students will examine the financial success of health care institutions from a market share perspective including pricing, promotion, and distribution of services.

RES 711 ...............................................................3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ...............................................................3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the applica-
tion to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ................................................................. 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ................................................................. 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students' understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

DHA 721 ................................................................. 3 credits

Health Care Economics
This course focuses on the application of economic theory to the amount, organizations, and distribution of health care services in the United States. Students will apply principles such as supply and demand, margin analysis, and cost effectiveness analysis. Students will discuss issues and controversies surrounding the government's role in financing and regulating health services.

DHA 722 ................................................................. 3 credits

Policy and Regulation in Health Care
Contemporary administration requires a thorough understanding of the federal policy and regulatory development process. Students analyze the history of health financing legislation, as well as regulatory implications of both the Medicare and Medicaid programs. This course examines the impact of emerging social, ethical, legal, and political issues on the future of the health care system. Emphasis is on the creation of innovative models of health care delivery.

DHA 723 ................................................................. 3 credits

Executive Information Systems
This course focuses on the use of financial systems, decision modeling programs, and advanced clinical information systems in formulating the strategic direction of modern health care systems. Practical experience using the University’s information technology partners introduces students to the richness of modern data systems. Simulations include quality improvement applications, including statistical process control methodology.

DHA 724 ................................................................. 3 credits

Globalization of Health Care
This course focuses on global health care systems with the objective of improving U.S. health care systems. Topics include global health issues, advocacy organizations, comparative political processes, and the economics of health financing. Students will understand the role of various international governing structures on health policy development.

PHL 700R ............................................................... 3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ................................................................................. 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ................................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732R ................................................................................. 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ................................................................................. 0 credits

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

DHA 731 ................................................................. 3 credits

Population Health and Epidemiology
The science of epidemiology is essential for projecting the population health needs and appropriate allocation of public and private resources. This course focuses on the utilization of epidemiologic studies and techniques as a basis for health care policy and administrative decision making. Students will apply this science in the analysis of emerging health epidemics and diseases.

DHA 732 ................................................................. 3 credits

Evaluation of Health Care Programs
This course prepares the contemporary health administrator to utilize research methodologies in making decisions regarding the cost effectiveness of specific health programs. Case studies will be used that incorporate disease-specific programs, community-wide health interventions, and population specific care management.
programs across a variety of health settings.

DHA 733 ..................................................................................3 credits

**Contemporary Leadership Issues**

This seminar focuses on the applications of new knowledge in creating new policies and models in the administration of health programs. Learners will explore contemporary issues and their impact on emerging leadership and management theory. Learners will demonstrate integration of knowledge.

RES 725 ....................................................................................3 credits

**Descriptive and Comparative Data Analysis**

This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other methods may be covered.

RES 728 ....................................................................................3 credits

**Correlational Methods of Analysis**

This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations, and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 ..................................................................................3 credits

**Approaches to Phenomenological Inquiry and Data Analysis**

This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ....................................................................................3 credits

**Qualitative Case Study**

This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ..................................................................................3 credits

**Ethnomethodology and the Study of Culture**

In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ..................................................................................3 credits

**Grounded Theory Methods**

This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ..................................................................................3 credits

**Mixed Methods**

The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

DOC 722 ..................................................................................3 credits

**Doctoral Seminar II**

This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ..................................................................................3 credits

**Doctoral Dissertation**

This is a mentor-guided course. Learners enroll for this course while finalizing their Doctoral Project with their Committee. The learner/mentor relationship is the catalyst for completing the Doctoral Project research, findings, recommendations, and conclusions.

DOC 734 ..................................................................................3 credits

**Doctoral Project IV**

This is the final course in the program’s sequence in which the learner, with the guidance of his or her mentor, completes the formal oral defense of the dissertation and prepares and submits the study for University approval. An approved dissertation is required to complete this class.

DOC 733A ..................................................................................3 credits

**Doctoral Dissertation**

This is the second one-on-one chair-guided course for a doctoral learner working to complete a dissertation proposal. Learners
enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or IRB approval of ethical treatment within the proposed study. The learner/chair relationship and the learner earning approval of the dissertation proposal from all three groups is the catalyst for the course.

**Doctoral Dissertation**

This third available dissertation proposal course provides extended time for one-on-one work between a learner and his or her dissertation committee Chair. Learners enroll for this course when a learner has not yet received either IRB approval, Quality Review Methods approval, or Committee/Chair approval of the proposed dissertation. Learners should work in conjunction with the Chair to complete any remaining requirements to achieve all approvals required to begin dissertation work. If all approvals are received during the course, it is appropriate for the candidate to begin working on the dissertation, but not until all approvals have been received. Learners must repeat this course, until the dissertation proposal is approved.

**Doctor of Education in Educational Leadership/ Educational Technology**

The following Doctor of Education in Educational Leadership/Educational Technology (EdD/ET) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Educational Technology specialization of the Doctor of Education in Educational Leadership program will prepare learners to become education leaders who strategically manage and lead processes related to the integration of technology in various learning environments. Graduates will demonstrate both practical and scholarly knowledge in their use of analytical, critical, and innovative thinking to improve the performance of educational institutions by utilizing technological innovations to support and enhance the educational process.

Historically, education has been a field of constant evolution, continually shifting to meet the rapidly expanding needs of learners and demands of our society. The correct utilization of educational technology plays a key role in establishing education reform and transformation in the 21st century. Graduates of the Educational Technology specialization will be prepared to take on these challenges and to assume the lead in advocating technological innovation in educational environments. Learners will develop in-depth knowledge of the analytical, planning, implementation, and evaluation processes necessary to implement the new and expanding technologies into the classroom and to promote technological competence in their administrative processes. Graduates will explore germainal and contemporary research in educational technology, instructional design, instructional media, and distance learning.

The Educational Technology specialization is consistent with the University’s mission to educate working adults to achieve their professional goals and to improve the quality of education in their communities. The program is designed to emphasize educational leadership and to focus on applied research that improves the design, development, and integration of appropriate learning technologies in education, industry, and government.

**Program Goals**

Upon completion of all program requirements of the Educational Technology specialization of the Doctorate in Education in Educational Leadership degree, learners will be able to:

- Support and enhance the educational process through technological innovation
- Manage and lead organizational reform and transformation through strategic decision-making
- Design, develop, and implement technology solutions to enhance learning
- Balance the competing priorities of technology and curriculum based on research, theory, and experience
- Demonstrate strategies for life-long learning and continuous improvement of technological competence

**Program Structure**

The Ed.D/ET program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the third year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ed.D/ET degree is the successful completion and oral defense of a significant, substantial, and independently completed dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of germainal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research methodology for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd-et.

Doctoral Dissertation

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. DOC 733A and B- ......................................................... 3 credits
Doctoral Dissertation

DOCTORAL PROJECT IV
Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule.
The University reserves the right to modify the required course of study.
Additional Admission Requirements for the EdD/ET

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e., JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Official transcripts listing a minimum of three (3) graduate level credits in research methods, statistics or scientific reasoning with a grade of "C" or better.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school to research, statistics or quantitative reasoning in one of the following manners.
- Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
- Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
- An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
- An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
- A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years

Academic Progression Requirements for the EdD/ET

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Minimum Grade Requirements for the EdD/ET

- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
- Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Degree Requirements for the EdD/ET

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of all residencies.
- Written approval of the dissertation proposal.
- Satisfactory oral defense and written completion of the dissertation.
- The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Education and will not reflect the specialization. Specializations are reflected on the transcript only.

Residency Requirements and Course Waivers for the EdD/ET
Students must meet the following residency requirements:
• Completion of physical residencies.
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, EDT 721, EDT 732, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
• Students must have completed all coursework except DOC 733 and DOC 734.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

Course Descriptions for the EdD/ET

Communication Strategies
This 3-week, online course provides new doctoral learners with an introduction to advanced communication strategies for academic success within University of Phoenix’s adult learning model. Topics include enhanced communication skills, academic rigor, scholarly practices, APA formatting and style, individual and group presentation techniques, doctoral-level research tools, critical thinking strategies and skills, stress and time management, and Learning Team dynamics.

SE 700R .................................................................................. 0 credits

Doctoral Program Orientation Seminar
SEM 709R is a two-week, online course designed to promote doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 709R, learners participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. On completing SEM 709R, learners are well positioned to transition to their first content-based doctoral course with a vision for successfully completing the remainder of the program.

LDR 711A .................................................................................. 3 credits

Leadership Theory and Practice
This course provides an opportunity for learners to examine leadership from various historical, theoretical, and practical perspectives. Upon completion of this course, learners will develop a reflexive leadership plan that integrates personal approaches to leadership into the scholar/practitioner/leader model.

ED 711 .................................................................................. 3 credits

Social Contexts and Contemporary Issues
This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.

CUR 711 .................................................................................. 3 credits

Developmental and Learning Theories
Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.

EDT 711 .................................................................................. 3 credits

Educational Technology Research
This course explores research on learning with technology. Focal areas include learner control, media preference, motivation, collaborative learning, and computer-mediated communication. Learners formulate conclusions based on refereed studies and consider the relationship between research design and questions.

ED 712 .................................................................................. 3 credits

Leadership in Contemporary Organizations
This course explores organization theory, culture, and change. The influence of leadership on the organization is examined in depth. The different functions of administration, management, and leadership are of focus.

RES 711 .................................................................................. 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A .................................................................................. 3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 .................................................................................. 3 credits
Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.
RES 724 ................................................................. 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students' understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.
EDD 721 ................................................................. 3 credits

Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.
EDT 721 ................................................................. 3 credits

Instructional Design
This course focuses on the principles of instructional design including a survey of instructional design models. Using the overarching ADDIE process learners will relate each of the five design phases to an educational goal. From their analyses, learners will justify the use of an instructional design model and produce a course-level unit.
EDT 722 ................................................................. 3 credits

Distance Learning
This course traces the development of distance learning, including past, present, and future trends. Learners will relate social contexts and educational goals to the evolution of technologies and their intended support of learning. Learners will explore the delivery of instruction over physical distance, focusing on concepts such as transactional distance, cultural considerations, anonymity, privacy, and accountability. Team learning is heavily emphasized and applied in this course.
EDT 723 ................................................................. 3 credits

Instructional Media and Design Techniques
Learners will apply instructional design principles in the development of electronic media. Learners explore delivering instruction through multimedia and/or multiple modalities with a focus on matching appropriate technologies to learning outcomes. Design principles include the effects of contrast, continuity of text and graphics, relevancy of graphics to text, and alignment.
PFL 700R ............................................................... 3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one's assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.
DOC 721R ............................................................. 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner's dissertation. This course will incorporate learners from various doctoral programs/disciplines.
DOC 731R ............................................................... 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization's environment. This course will incorporate learners from various doctoral program/disciplines.
DOC 732R ............................................................... 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.
DOC 740R ............................................................... 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.
EDT 731 ............................................................... 3 credits

System Analysis and Design
This course follows the phases of needs analysis, planning, implementation, and evaluation that are integral to large-scale instructional technology projects. Learners consider vendor selection, organizational constraints, maintenance, and enhancements in an effort to address learners' present and future needs. Learners focus on developing systemic solutions that avoid the pitfalls of piece-meal technology adoptions.
EDD 732 ............................................................... 3 credits

Contemporary Policy Analysis and Development
This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.
EDT 732 ............................................................... 3 credits

Integrating Technology and Curriculum
This course is designed to develop strategies for effective and appropriate integration of digital technology and educational
goals. Learners explore the possibilities enabled by technology, the perceived need to master technologies for vocational readiness, and the design of technological implementations that enhance educational experiences. A running theme of this course is balancing the competing priorities of technology and curriculum decisions.

RES 725 ....................................................................................3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T², MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ....................................................................................3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

RES 727 ....................................................................................3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ....................................................................................3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ....................................................................................3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ....................................................................................3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ....................................................................................3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

DOC 722 ..................................................................................3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ..................................................................................3 credits

Doctoral Dissertation
This is a mentor-guided course. Learners enroll for this course while finalizing their Doctoral Project with their Committee. The learner/mentor relationship is the catalyst for completing the Doctoral Project research, findings, recommendations, and conclusions.

DOC 734 ..................................................................................3 credits

Doctoral Project IV
This is the final course in the program’s sequence in which the learner, with the guidance of his or her mentor, completes the formal oral defense of the dissertation and prepares and submits the study for University approval. An approved dissertation is required to complete this class.

DOC 733A ..................................................................................3 credits

Doctoral Dissertation
This is the second one-on-one chair-guided course for a doctoral learner working to complete a dissertation proposal. Learners enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or IRB approval of ethical treatment within the proposed
study. The learner/chair relationship and the learner earning approval of the dissertation proposal from all three groups is the catalyst for the course.

DOC 733B .............................................................................. 3 credits

**Doctoral Dissertation**

This third available dissertation proposal course provides extended time for one-on-one work between a learner and his or her dissertation committee Chair. Learners enroll for this course when a learner has not yet received either IRB approval, Quality Review Methods approval, or Committee/Chair approval of the proposed dissertation. Learners should work in conjunction with the Chair to complete any remaining requirements to achieve all approvals required to begin dissertation work. If all approvals are received during the course, it is appropriate for the candidate to begin working on the dissertation, but not until all approvals have been received. Learners must repeat this course, until the dissertation proposal is approved.
THIS PAGE WAS LEFT BLANK INTENTIONALLY.
PROFESSIONAL PROGRAMS

CREDIT-BEARING CERTIFICATE PROGRAMS

The University of Phoenix offers Professional Certificate programs to organizations and individuals with professional development or specialized training needs. The programs effectively blend theory and practice, enabling the individual to rapidly become a more effective manager or specialist. Certificate programs are currently available in several fields: technology, education, call center professional, human resource management, health care, and project management. A Credit Bearing Certificate program is one that bears University of Phoenix credits. Credit Bearing Certificate programs are developed and maintained by the Dean of each College.

Admission Requirements

All applicants are expected to meet the following admission requirements:

• Signed Certificate Application

• Applicants whose native language is not English must have either:
  • achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  -or-
  • achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  -or-
  • achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  -or-
  • achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  -or-
  • successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  -or-
  • achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

• The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:

• The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.

• The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.

• The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.

• The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.

• The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.

• The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.

• Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program.

• Applicants who reside in the United States must meet one of the following requirements:
  • Be a legal resident of the United States
  • Have been granted permanent residency
  • Have a valid visa that does not prohibit educational studies
  • Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  • Have been granted asylum or refugee status.

• Applicants who reside in Canada must meet one of the following requirements:
  • Be a legal resident of Canada
  • Be a landed immigrant
  • Have a valid visa that does not prohibit educational studies
  • A signed Enrollment/Disclosure Agreement.
  • Completion of any state-specific required documents or forms.

• Students are subject to all other University policies and procedures and additional requirements may be applied to specific programs at the discretion of the Dean.

Students who begin their studies at campuses located in the states...
listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

- Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

- Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University. Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

- Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

- The student was born before January 1, 1957 (applicable to MMR vaccine only).
- The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
- The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for one or more of the diseases as indicated on the immunization form.
- The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
- The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
- The student has submitted a statement that immunization is contrary to his/her religious beliefs.
- The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.

- If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.
- A copy of each exemption must be kept in the student’s health record at school.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

- A medical exemption may be granted to specific vaccines.
  - A U.S. licensed physician (M.D. or D.O.) must state in writing that giving a specific vaccine would endanger the student’s life or health, and specify the reason based on valid medical contraindications.
  - The physician must state the length of time during which the vaccine would endanger the student’s health or life.
  - The exemption certification must be signed by the physician on the physician’s printed stationary.
  - A religious exemption may be granted if the student signs a statement certifying that the student’s religious beliefs prohibit the practice of immunization.
• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The project management course sequence focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/pm.

The University reserves the right to modify the required course of study.

**General Information**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the PM**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

**En-Route Matriculation Benchmark**

- Students enrolled in the Bachelor of Science in Business Concentration in Project Management (Certificate Track) program may earn a certificate in Project Management en route to completing the bachelors degree.
- To earn the certificate en-route, students must be admitted to the BSB/PMC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

**Certificate Completion Requirements for the PM**

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Project Management

**Residency Requirements and Course Waivers for the PM**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or
approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course in the required course of study may not be waived: CPMG 305

**Course Descriptions for the PM**

**CPMG 300** ................................................................. 3 credits

**Project Management**

This course examines project management roles and environments, the project life cycle, and various techniques of work planning, control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

**CPMG 301** ...................................................................... 3 credits

**Strategic Portfolio and Project Management**

This course provides students with insight into the management of an organization's strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

**CPMG 302** ................................................................. 3 credits

**Procurement and Risk Management**

This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

**CPMG 303** ................................................................. 3 credits

**Project Estimating and Control Techniques**

To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

**CPMG 304** ................................................................. 3 credits

**Leading Projects in Organizations**

This course provides students with an overview of organizational behavior as it relates to project management. It introduces various techniques and processes that will help students develop effective communication and interpersonal skills to successfully manage project teams. In addition, numerous leadership and motivation theories are presented as well as techniques that minimize stress in the project environment. Furthermore, project decision-making processes and techniques that facilitate effective and efficient project change management are addressed in this course. Students will also examine the influence of globalization, technology, and future trends in project management.

**CPMT 305** ................................................................................ 3 credits

**Project Management Capstone**

This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in the prior five courses will be integrated and applied to the class project.

**Sales Management Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Sales Management certificate program provides students with the knowledge and skills necessary to build, retain, and manage a highly effective sales force. This certificate emphasizes the sales development in the sales process, business-to-business sales strategies and best practices, consumer behavior and customer relationship management, and the role of a sales manager in leading a highly productive sales force. Upon completion of this certificate, students will possess the tools needed to manage sales objectives as they relate to achieving organizational success.

Customer Relationship Management
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/SMGT
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/SMGT
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Sales Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/SMGT
- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: MKT 360

Course Descriptions for the CERT/SMGT

MKT 421 ................................................................. 3 credits
Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

MKT 310 .................................................................................. 3 credits

Personal Selling
This course provides students with the tools and techniques necessary to understand the personal sales process. After completion of this course, students will be able to create a personal sales presentation, describe sales negotiations, compare and contrast the categories of prospect objections, summarize the elements of the closing process, and identify ethical frameworks associated with sales professional associations.

MKT 360 .................................................................................. 3 credits

Sales Force Management
This course provides students with an overview of the functions and activities related to managing a sales force. After the completion of this course, students will be able to summarize the responsibilities of a sales manager, evaluate the techniques used to recruit sales force candidates, describe sales territory strategies, examine the methods used in lead generation, and explain the approaches used to forecast sales performance information.

MKT 317 .................................................................................. 3 credits

Critical Skills in Management
This course provides students with fundamental knowledge and skills necessary to make important management decisions. This course places emphasis on general managerial knowledge and skills required for effective personal, interpersonal, and group leadership regarding the direction of daily business affairs in a global business environment.

MKT 320 .................................................................................. 3 credits

Business-to-Business Sales Management
This course provides students with an understanding of the business-to-business selling relationship and the challenges associated with maintaining these relationships. After the completion of this course, students will be able to describe the complexities of business-to-business selling relationships, create numerous presentations to address the variety of audiences in the business-to-business setting, examine legal issues associated with business-to-business selling, and evaluate the ethical considerations of relationship building behavior within a business-to-business sales relationship.

LDR 300 .................................................................................. 3 credits

Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MKT 435 .................................................................................. 3 credits

Consumer Behavior
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 445 .................................................................................. 3 credits
Sales, Tools and Strategies
This course is an examination of the basic principles involved in the sales process, the relationship between sales and marketing, sales force structure, and Customer Relationship Management (CRM). Emphasis is placed on product pricing, managing the sales force, forecasting market demand, and relating sales goals to marketing goals.
MKT 468 .................................................................3 credits

Customer Relationship Management
This course provides students with an understanding of the importance of building and enhancing customer relationships by utilizing best practices and customer relationship management strategies. After completion of this course, students will be able to summarize market segmentation methods, evaluate the strategies of customer acquisition and retention, identify effective customer service techniques, and understand the use of relational databases and customer relationship management software in maintaining customer loyalty.

Human Resource Management
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Certificate Program in Human Resource Management provides education in areas which the human resource professional faces daily; from legal matters to staff recruitment and development. This program is designed for those who have functional responsibility to carry out the duties of an organization’s human resource department; seasoned human resource staff members wishing to keep current; newcomers to the field requiring new knowledge and skills; and specialists wanting to broaden their knowledge.

Major topic areas covered include the role of human resources, employment practices, employee and labor relations, compensation, benefits, safety and health, and employee development. Participants acquire knowledge and skills that are essential in addressing the challenges of the human resource profession.

Strategic Human Resource Management and Emerging Issues
The University reserves the right to modify the required course of study.

General Information for the HRM
This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding “Certificate Track” bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the HRM
All applicants to this certificate program are expected to meet the following additional admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

En-Route Matriculation Benchmark for the HRM
- Students enrolled in the Bachelor of Science in Business Concentration in Human Resource Management (Certificate Track) program may earn a certificate in Human Resource Management en route to completing the bachelors degree.
- To earn the certificate en-route, students must be admitted to the BSB/HRMC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

Certificate Completion Requirements for the HRM
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Human Resource Management.

Residency Requirements and Course Waivers for the HRM
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HRM 498

Course Descriptions for the HRM

HRM 300 ................................................................................. 3 credits

Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 434 .......................................................... 3 credits

Employment Law
This course provides an overview of federal statutes and state regulated areas that impact the personnel function. Among the topics addressed are EEO and Affirmative Action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraph testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

HRM 324 .................................................. 3 credits

Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 420 .................................................. 3 credits

Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 326 .................................................. 3 credits

Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 498 .......................................................... 3 credits

Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

Bookkeeping Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bookkeeping Certificate focuses on the role of accounting in business and management. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bkp.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/BKP
All applicants to this certificate program are expected to meet the following additional admission requirements:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Demonstration of basic skills proficiency in mathematics. Students have the following options to satisfy this requirement:
  - Students must pass the Praxis I exam at the cut score determined by the School of Business (Math - 170).
  - Students must pass the SAT at the cut scores determined by the national benchmark (Mathematics - 480).
  - Students must pass the ACT at the cut scores determined by the national benchmark (Mathematics - 20).
  - Transfer credit may be used by students who have achieved a C- or better in a college algebra or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - Achieve a passing score eligible for credit on an approved mathematics related National Testing Program.

Current Approved National Testing Programs are:

**CLEP Examination**
- College Mathematics
- College Algebra
- Precalculus
- Calculus

**DANTES Examination**
- Principles of Statistics
- Business Mathematics

**Advanced Placement Examination**
- Calculus AB
- Calculus BC
- Statistics
- Achieve a passing score on the School of Business math readiness exam (MyMathTest Assessment - 70%).
- Successful completion (passing grade) of University of Phoenix mathematics course MAT 116, equivalent or higher.
- New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

**En-Route Matriculation Benchmark for the CERT/BKP**
- Students enrolled in the Associate of Arts Concentration in Accounting Foundations/Bookkeeping Certificate Track program may earn a certificate in Bookkeeping en route to completing the associates degree.
- To earn the certificate en-route, students must be admitted to the AAACCFC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

**Certificate Completion Requirements for the CERT/BKP**
Credit Bearing Certificate completion requirements are the following:
- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Bookkeeping
- Students who have completed an associates (A or B Track) or bachelors degree in Accounting may not receive a certificate in the same area of focus. Example: a student may not earn a AAACCFC Certificate Track A or B first and come back to earn a BKP certificate; however, students who have completed a certificate may return to receive an associates or bachelors degree with a concentration in the same area as the completed certificate or another approved concentration.

**Residency Requirements and Course Waivers for the CERT/BKP**
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
The following certificate program may not be waived: BUS 210C

**Course Descriptions for the CERT/BKP**

**BUS 210C** ........................................................................................................... 3 credits

**Foundations of Business**
In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

**XACC 210C** ........................................................................................................... 3 credits

**Accounting Information Systems**
This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

**XBCOM 230C** ........................................................................................................... 3 credits

**Business Communication for Accountants**
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

**XACC 290C** ........................................................................................................... 3 credits

**Principles of Accounting I**
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

**XMGT 230C** ........................................................................................................... 3 credits

**Management Theory and Practice**
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

**XACC 291C** ........................................................................................................... 3 credits

**Principles of Accounting II**
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

**Supply Chain Management Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Supply Chain Management certificate highlights the important role a supply chain plays in organizational performance and efficiency. The program emphasizes the need to develop and maintain a sustainable competitive advantage through the efficient and effective performance of all supply chain activities. Students will be able to examine logistic management processes, determine appropriate purchasing and procurement strategies, identify elements of an effective supply chain information management system, and evaluate lean enterprise processes to improve organizational efficiency.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Completion of a minimum of 18 credits.
A minimum grade point average (GPA) of 2.0.
The certificate awarded for this program will read as:
Supply Chain Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/SCM

• Students must meet established University residency requirement for course conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
• Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following course may not be waived: ISCOM 476

Course Descriptions for the CERT/SCM

ISCOM 370 ...............................................................................3 credits
Strategic Supply Chain Management

This course will provide an overview of the strategic elements and functional relationships within manufacturing and service supply chains. Emphasis is placed on the integration of strategic planning, sourcing, operations, and logistics to achieve a sustainable competitive advantage.

ISCOM 352 ...............................................................................3 credits
Logistics Management

This course provides an overview of logistics management within a supply chain operation. It includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 476 ...............................................................................3 credits
Integrated Supply Chain Applications

This course introduces students to the importance of a strategic plan and its interaction with, and impact on, supply chain applications. Students will understand the processes of supply change creation and improvement, and as a result, the effects it has on competition. Students will be able to select and apply a set of metrics to the supply chain which demonstrate performance standards are achieved.

BS 375 ....................................................................................3 credits
Supply Chain Information Management in Online Environments

This course introduces students to the theory and practice of conducting supply chain functions over the Internet. It addresses various business strategies for buying, selling, or exchanging products, services, and information via computer networks. Legal and ethical requirements for handling supply chain business over the Internet are addressed.

ISCOM 361 ...............................................................................3 credits
Purchasing and Procurement

This course addresses the relationship between supply chain management and procurement. It includes an overview of both the procurement process and commodity markets. Students will address procurement from a strategic perspective as well as at the operational level.

ISCOM 424 ...............................................................................3 credits
End-to-End Supply Chain Management

This course prepares students to be effective managers in end-to-end supply chain management. This refers to tracking all segments of the supply chain beginning with capturing customer requirements to customer consumption and disposal. Special emphasis is placed on enhancing supply chain efficiencies through problem-solving methodologies including Six Sigma, Lean management. Students will also apply the principles of Supplier Relationship Management (SRM) and Customer Relationship Management (CRM) to make effective end-to-end supply chain decisions.

ISCOM 472 ...............................................................................3 credits
Lean Enterprise

This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection, and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

ISCOM 473 ...............................................................................3 credits
Global Sourcing and Procurement

This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.

Small Business Management and Entrepreneurship Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Small Business Management and Entrepreneurship certificate provides students with an understanding of small business planning, financial management, and integrated business topics on entrepreneurship and small business management. Upon comple-
tion of this program students will be able to examine small business marketing opportunities, identify innovative small business strategies, evaluate financial management decisions, and address the challenges and opportunities specific to small business management and entrepreneurship.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the CERT/SBE

provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

LDR 300 ................................................................. 3 credits

Innovative Leadership

This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 418 ................................................................. 3 credits

Evaluating New Business Opportunities

This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

MKT 431 ................................................................. 3 credits

Small Business Marketing

Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.

OI 361 .................................................................... 3 credits

Innovation, Design, and Creativity for a Competitive Advantage

This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.

OI 370 .................................................................... 3 credits

Innovation for the 21st Century

This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

Retail Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Retail Management certificate focuses on the retail management environment. The concentration emphasizes skill development in customer service management, sales and marketing, supply management, retail operations, merchandising, and personnel management unique to the retail industry. Upon completion of this concentration, students will possess the knowledge and skills necessary to be leaders in the retail industry.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Course Descriptions for the CERT/OPS

ISCOM 305 ..............................................................................3 credits

Systems Operations Management
This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.

MGT 420 ..............................................................................3 credits

Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

ISCOM 374 ..............................................................................3 credits

Integrated Logistics Management
This course prepares students to strategically plan, implement, and control the efficient and effective flow and storage of goods, service, and related information from a point-of-origin to a point-of-consumption. This course also focuses on transportation, inventory management, warehousing, and customer services.

BIS 375 ..............................................................................3 credits

Supply Chain Information Management in Online Environments
This course introduces students to the theory and practice of conducting supply chain functions over the Internet. It addresses various business strategies for buying, selling, or exchanging products, services, and information via computer networks. Legal and ethical requirements for handling supply chain business over the Internet are addressed.

ISCOM 361 ..............................................................................3 credits

Purchasing and Procurement
This course addresses the relationship between supply chain management and procurement. This includes overview of both the procurement process and commodity markets. Students will address procurement from a strategic perspective as well as at the operational level.

ISCOM 383 ..............................................................................3 credits

Global Value Chain Management
This course describes value chain activities between buyers and sellers in international business. Emphasis is placed on global sourcing, procurement of materials and services, and on business-to-business cultural differences between countries.

ISCOM 386 ..............................................................................3 credits

Service Operations Management
The course presents structured techniques for evaluating operating efficiency and effectiveness in the service sector. Special emphasis is placed on key service principles. Students learn how to manage service operations through a series of case studies and applications, inventory control, waiting time management, project management, site selection, performance evaluation, and scoring systems.

ISCOM 472 ..............................................................................3 credits

Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection, and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

Marketing Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Marketing certificate addresses how to identify customer
needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The program builds upon the foundational marketing course and allows further study in the areas of consumer behavior, marketing research, public relations, product and brand management, and small business marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University reserves the right to modify the required course of study.

The Hospitality Management Certificate will prepare students for careers in the hospitality industry. The program emphasizes the development of skills in lodging management; service operations management; events and recreation planning; and facilities management. Upon completion of this program students will possess the knowledge and skills needed to become leaders in the hospitality industry.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Required Course of Study for the CERT/HPM**

MGT 312 ~ .................................................................3 credits
Organizational Behavior for Managers

HM 370 ~ .................................................................3 credits
Hospitality Management

HM 475 ~ .................................................................3 credits
Hospitality Decision Analysis

**Students must choose 3 of the following:**

- BIS 303 .................................................................3 credits
  Managing Information Technology in the Hospitality Industry

- HM 486 .................................................................3 credits
  Trends and Emerging Issues in Hospitality

- ISCOM 386 ............................................................3 credits
  Service Operations Management

- MGT 314 .................................................................3 credits
  Hospitality Entrepreneurship

- MGT 455 .................................................................3 credits
  Risk Management in the Hospitality Industry

- MKT 444 .................................................................3 credits
  Hospitality Marketing

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the CERT/HPM**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must have access to a suitable work environment for the completion of course assignments.

**Certificate Completion Requirements for the CERT/HPM**

- Completion of a minimum of 18 credits.

- A minimum grade point average (GPA) of 2.0.

- The certificate awarded for this program will read as: Hospitality Management (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/HPM**

- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
Hospitality Decision Analysis

Organizational Behavior for Managers
This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.
HM 370................................................................. 3 credits

Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.
HM 475................................................................. 3 credits

Hospitality Decision Analysis
This capstone course integrates the principles and concepts of hospitality operations management. Upon completion of this course, students will be able to prepare a service delivery model, conduct financial analyses, and develop sales and marketing strategies within a hospitality organization.
BIS 303................................................................. 3 credits

Managing Information Technology in the Hospitality Industry
This course provides a managerial overview of information technology in the hospitality industry. Special emphasis is placed in utilizing information technology systems such as POS, inventory tracking, and reservation networks to make managerial and strategic decisions for the organization.
HM 486................................................................. 3 credits

Trends and Emerging Issues in Hospitality
This course applies a strategic perspective to assessing new trends and emerging issues in hospitality management. Special emphasis is placed on applying a global perspective to new and emerging markets in the hospitality industry. This includes consideration of changing social and economic groups as well as shifting demand for existing and new products and services.
ISCOM 386.......................................................... 3 credits

Service Operations Management
The course presents structured techniques for evaluating operating efficiency and effectiveness in the service sector. Special emphasis is placed on key service principles. Students learn how to manage service operations through a series of case studies and applications, inventory control, waiting time management, project management, site selection, performance evaluation, and scoring systems.
MGT 314.................................................................. 3 credits

Hospitality Entrepreneurship
This course provides an overview of the managerial and entrepreneurial skills needed to operate and manage a small business in the hospitality industry. Special emphasis is placed on business planning, marketing, financial management, and the regulatory environment.
MGT 455.................................................................. 3 credits

Risk Management in the Hospitality Industry
This course provides a framework for assessing risk from the hospitality management perspective. Students will evaluate various risk evaluation tools as appropriate for different components of the hospitality industry. Special emphasis is placed on the assessing risk, the risk management process, risk evaluation, preventative planning.
MKT 444.................................................................. 3 credits

Hospitality Marketing
This course applies the general tools of marketing to the specific needs of the hospitality management industry. Special emphasis is placed on the global, regional, individual, and ethical considerations when building customer-relationships through marketing.

Human Resource Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Human Resource Management certificate prepares students to develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The program addresses the legal and ethical components of the decision making process involved in the human resources environment. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

Course Descriptions for the CERT/MGT

MGT 312 .................................................................3 credits
Organizational Behavior for Managers
This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.

MGT 498 .................................................................3 credits
Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

ACC 400 .................................................................3 credits
Accounting for Decision Making
This course concentrates on effective decision making as it relates to financial activities in a business enterprise. Course topics will include financial assets, liabilities, equity, business operations, financial management, and financial statement analysis. Students will have the necessary analytical tools to enhance business operations.

BRM 353 .................................................................3 credits
Product and Brand Management
This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

ISCOM 305 .................................................................3 credits
Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

HM 370 .................................................................3 credits
Finance for Decision Making
This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

HRM 300 .................................................................3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human achieving resources in business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 326 .................................................................3 credits
Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

ISCOM 370 .................................................................3 credits
Systems Operations Management
This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.

MGT 317 .................................................................3 credits
Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 401 .................................................................3 credits
Critical Skills in Management
This course provides students with fundamental knowledge and skills necessary to make important management decisions. This course places emphasis on general managerial knowledge and skills required for effective personal, interpersonal, and group leadership regarding the direction of daily business affairs in a global business environment.
The Small Business: Structure, Planning and Funding
This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

MGT 411 ................................................................. 3 credits

Innovative and Creative Business Thinking
This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and practice and draw upon examples from multiple industry sectors.

MGT 418 ................................................................. 3 credits

Evaluating New Business Opportunities
This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

MGT 420 ................................................................. 3 credits

Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

MGT 426 ................................................................. 3 credits

Managing Change in the Workplace
This course provides an overview of methods and techniques required of supervisory and management personnel responsible for managing change. As a result of the course, students will be able to identify and develop strategies for managing the following: organizational aspects of change, including shifts in leadership, reorganizations, working conditions, technologically imposed change and workforce issues. In addition to developing strategies, students will gain expertise in applying communication strategies that effectively deal with change.

MKT 445 ................................................................. 3 credits

Sales, Tools and Strategies
This course is an examination of the basic principles involved in the sales process, the relationship between sales and marketing, sales force structure, and Customer Relationship Management (CRM). Emphasis is placed on product pricing, managing the sales force, forecasting market demand, and relating sales goals to marketing goals.

MKT 448 ................................................................. 3 credits

Web Analytics for Digital Marketing
This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.

OI 361 ................................................................. 3 credits

Innovation, Design, and Creativity for a Competitive Advantage
This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.

OI 370 ................................................................. 3 credits

Innovation for the 21st Century
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

MGT 445 ................................................................. 3 credits

Organizational Negotiations
This course provides an overview of negotiations in an organizational setting. Students will learn negotiation processes and strategies, the role of stakeholder interests in negotiation, and how to apply these concepts to the workplace. Students will also examine conflict management techniques as well as emerging negotiation trends in globalization and technology.

Project Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

Course Descriptions for the CERT/PM:

MGT 312 ................................................................................... 3 credits

Organizational Behavior for Managers
This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.

CPMGT 300 ................................................................................... 3 credits

Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

CPMGT 301 ................................................................................... 3 credits

Strategic Portfolio and Project Management
This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

CPMGT 302 ................................................................................... 3 credits

Procurement and Risk Management
This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

CPMGT 303 ................................................................................... 3 credits

Project Estimating and Control Techniques
To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

CPMGT 305 ................................................................................... 3 credits

Project Management Capstone
This course is the capstone of the project management courses. Students will demonstrate project management skills learned via preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in prior five courses will be integrated and applied to the class project.

Business Administration Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. **Additional Admission Requirements for the CERT/BADM**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

**Certificate Completion Requirements for the CERT/BADM**

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Business Administration (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/BADM**

- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: MGT 448

**Course Descriptions for the CERT/BADM**

- BIS 320 - Information Systems .............................................. 3 credits
- CPMGT 300 - Project Management ......................................... 3 credits

### Additional Admission Requirements for the CERT/BKPN

Applicants must be at least 16 years of age at the time of application.

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Demonstration of basic skills proficiency in mathematics. Students have the following options to satisfy this requirement:
  - Students must pass the Praxis I exam at the cut score determined by the School of Business (Math - 170).
  - Students must pass the SAT at the cut scores determined by the national benchmark (Mathematics - 480).
  - Students must pass the ACT at the cut scores determined by the national benchmark (Mathematics - 20).
  - Transfer credit may be used by students who have achieved a C- or better in a college algebra or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - Achieve a passing score eligible for credit on an approved mathematics related National Testing Program. Current Approved National Testing Programs are:
    - CLEP Examination
      - College Mathematics
      - College Algebra
      - Precalculus
      - Calculus
    - DANTES Examination
      - Principles of Statistics
      - Business Mathematics
    - Advanced Placement Examination
      - Calculus AB
      - Calculus BC
      - Statistics
    - Achieve a passing score on the School of Business math readiness exam (MyMathTest Assessment - 70%).
    - Successful completion (passing grade) of University of Phoenix mathematics course MAT 116, equivalent or higher.
    - New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

### Certificate Completion Requirements for the CERT/BKPN

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Bookkeeping Fundamentals (Undergraduate)

### Residency Requirements and Course Waivers for the CERT/BKPN

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/BKPN

BIS 220 .......................................................... 3 credits
Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

QNT 275 .......................................................... 3 credits
Statistics for Decision Making
This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for statistical inferences, produce tables and charts to organize and display qualitative and quantitative business data, interpret numerical business data using measures of central tendency and dispersion, apply fundamental concepts probability theory for inferential decision making for business, and perform a linear regression for trend analysis.

BCOM 230 .......................................................... 3 credits
Business Communication for Accountants
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

ACC 290 .......................................................... 3 credits
Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

MGT 230 .......................................................... 3 credits
Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

ACC 291 .......................................................... 3 credits
Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

Digital Marketing Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

With the emergence of social media, businesses are recognizing the need to enhance their marketing mix by connecting through digital channels. The digital marketing certificate emphasizes an understanding of digital marketing, social media, Internet marketing, consumer behavior, web analytics, search engine optimization, and advertising and creativity strategy. Upon completion of this certificate students will possess the knowledge and skills necessary to identify demand for products and services and digital marketing strategies.

- The following course may not be waived: MKT 498

Course Descriptions for the CERT/DMKT

MKT 421 ..................................................................................3 credits
Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

MKT 440 ..................................................................................3 credits
Fundamentals of Digital Marketing
This course provides a high-level view of the impact of technology on the marketing of goods and services. After completion of this course, students will be able to understand the structure of the Internet, compare and contrast strengths and weaknesses of various digital marketing tools, identify common terminology used in digital marketing, analyze ethical issues in public presentation of information, and evaluate the integration of digital media into a marketing plan.

MKT 448 ..................................................................................3 credits
Search Engine Optimization
This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.
This course examines the impact of the Internet on traditional marketing methods and how it has transformed the contemporary marketing landscape. Emphasis will be placed upon the uses of the Internet for the marketing of goods, services, information, and the impact of Internet technology on marketing strategy and practices. The course examines strategies for Internet marketing and analyzes customer relationship management models and applications in the B2B (business to business) and B2C (business to consumer) environments.

Financial Planning Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. • The following course may not be waived: FIN 486

Course Descriptions for the CERT/FINP

FIN 370 ................................................................. 3 credits
Finance for Business

This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial Planning, working capital management, capital budgeting, long term financing, and international finance.

FIN 420 ................................................................. 3 credits
Personal Financial Planning

This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on invest-
ment risk and returns, markets, and analysis tools useful in assessing financial situations.
FIN 486 ........................................................................................................3 credits

**Strategic Financial Management**
This course gives students the opportunity to integrate previously learned finance and accounting concepts and practices to contemporary business strategies, while improving financial decision-making and problem-solving skills. In addition, students will examine real-world financial management scenarios in order to apply best practices resulting in increased value for various types of organizations.
FIN 366 ........................................................................................................3 credits

**Financial Institutions**
This course will cover financial institutions such as insurance companies, commercial banks, investment banks and savings and loan associations. The risks facing financial institutions and how to measure and manage those risks are analyzed.
FIN 402 ........................................................................................................3 credits

**Investment Fundamentals and Portfolio Management**
This course covers the theories and practices of investments including financial markets, risk and return, securities, asset allocation and diversification. Students will utilize analytical techniques available in the investment planning and selection process in the environment in which investment decisions are made. Students will apply finance models and investment strategies to analyze and manage investments for various types of organizations.
FIN 467 ........................................................................................................3 credits

**Real Estate Investment**
This course involves the study of the techniques of real estate investment analysis, including financing, taxes, and decision-making criteria in today’s investment environment.
FIN 422 ........................................................................................................3 credits

**Retirement and Benefit Planning**
This course provides students with the tools necessary to create a retirement plan. After completion of this course, students will be able to identify the types of retirement plans, understand the implications of federal law on retirement plans, identify retirement plans and participation requirements, calculate tax deduction ad contribution limits, and create a full financial plan, including retirement, for an individual.
FIN 428 ........................................................................................................3 credits

**Insurance for Financial Planning**
This course will prepare students to make insurance policy recommendations as part of a financial plan. After completion of this course, students will be able to apply concepts of medical, life, and property insurance to financial planning, and understand concepts underlying risk and insurance management for financial plans.

**Additional Admission Requirements for the G-HRM**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
Certificate Completion Requirements for the G-HRM
Credit Bearing Certificate completion requirements are the following:
• Completion of a minimum of 15 credits.
• All students must meet residency requirements.
• A minimum grade point average (GPA) of 3.0.
• The certificate awarded for this program will read as: Graduate Human Resource Management.

Residency Requirements and Course Waivers for the G-HRM
Completion of a minimum of 12 credits of the required course of study to meet University residency requirements.
Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
Students who have completed graduate University of Phoenix course work that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HRM 595

Course Descriptions for the G-HRM

HRM 546 ................................................................................. 3 credits
Human Resource Law
This course prepares human resource managers to comply with human resource laws and regulations across all jurisdictions. Students learn how to manage human resource functions within a regulatory environment. Other topics include laws and regulations related to the following: workforce planning and employment, human resource development activities, compensation and benefits, labor relations, and workplace safety.

HRM 548 ................................................................................. 3 credits
Recruitment and Retention Practices
This course prepares students to evaluate and develop a workforce to attain organizational goals. Students learn to develop total reward strategies that attract and retain the best employees. Other topics include recruitment strategies, workforce planning and assessment, relocation practices, right sizing, negotiation, employment policies, and global compensation practices.

HRM 552 .......................................................... 3 credits
Organizational Training and Development
This course applies development and training concepts to enhance organizational performance. Students develop an employee engagement strategy. Other topics include training program development & delivery, employee relations, organizational development theories and applications, behavioral issues, and performance management.

HRM 558 .......................................................... 3 credits
Research in Human Resource Management
This course applies research methods to human resource functions. Students learn to use quantitative analysis and secondary research to recruit and select employees to meet organizational goals. Other topics include forecasting, evaluation of selection tests, application of selection techniques, techniques to assess training program effectiveness, job evaluation methods, and external labor market analysis.

HRM 595 .......................................................... 3 credits
Human Resource Capstone Course
This content area capstone course applies human resource concepts to improve organizational effectiveness within the framework of employment laws and regulations. Students apply existing professional standards and theories to human resource management. Other topics include the alignment of human resource strategy with the organization, global workforce planning, career and leadership development, and performance analysis and appraisal.

Graduate Accounting Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Students in the Graduate Accounting Certificate will develop an understanding of accounting concepts and applications. Students will also become competent in the use of appropriate analytical tools and technologies. They will be sensitive to legal, ethical, and social values in the conduct and communication of accounting practice and decisions. In addition, students will have an understanding of a portion of the topics required in preparation for the CPA exam: Audit & Attestation, Financial Accounting & Reporting, Regulation, and Business Environment & Concepts.
The Graduate Accounting Certificate is designed for students who want to enhance their accounting management skills, enter the accounting profession, or complete additional coursework required for the CPA exam.

While completing this certificate program, students who may be planning to take the CPA exam will utilize CPA Test Preparation software in conjunction with their course work.

Note: Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful
student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine if this program, combined with their undergraduate degree and any other specific criteria, meets the requirements to qualify for examination in that specific jurisdiction. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-acc.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the G-ACC**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, or comparable undergraduate bachelor’s degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

**Certificate Completion Requirements for the G-ACC**

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 3.0.
- Students who complete the Graduate Accounting Certificate and wish to enroll in the MSA program can apply courses towards the MSA program requirement.

The certificate awarded for this program will read as: Graduate Accounting

**Residency Requirements and Course Waivers/Competency for the G-ACC**

Completion of a minimum of 12 credit of the required course of study to meet University residency requirements. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students who have completed graduate UOPX course work that meets the requirements for the Graduate Accounting Certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to waive a course in the required course of study, the student must have completed a previous course that meet the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a "B" (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Accounting Theory & Research (ACC 541) may not be waived.

**Competency Course Satisfaction for the G-ACC**

Eligible students may satisfy the two competency courses: (ACC 537, COM 530) using one of the following methods:

- Six (6) semester credits of upper-division undergraduate coursework or three (3) semester credits of graduate coursework in financial accounting that meets the following requirements will satisfy ACC 537:
  - The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university,
  - The coursework must have been completed with a C- or better, within the past ten (10) years of application to the University.
• A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in this certificate program.

• Six (6) semester credits of upper-division undergraduate coursework or three (3) semester credits of graduate coursework in communications that meets the following requirements will satisfy COM 530:
  • The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university,
  • The coursework must have been completed with a C- or better, within the past ten (10) years of application to the University.
  • A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in this certificate program.

Course Descriptions for the G-ACC

COM 530 .................................................................................. 3 credits

Communications for Accountants
In this course, students examine principles and practices of group communication in the context of the organization. Topics include an overview of group communication, culture and conflict, group formation, influence in organizational communication, organizational change, formal communications, and public communications.

ACC 537 ................................................................................... 3 credits

Financial Accounting
In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders’ equity, statement of cash flows, and error correction and accounting changes.

ACC 541 .................................................................................. 3 credits

Accounting Theory & Research
This is the first core course in the Master of Science in Accounting (MSA). In this course, students apply accounting research tools to current accounting issues. Other topics include research of accounting questions related to: inventory, fixed assets, leases, derivative instruments, debt, contingencies, segment reporting, pensions, business combinations, consolidations, stockholder’s equity, and a program overview.

ACC 542 .................................................................................. 3 credits

Accounting Information Systems
In this course, students examine the fundamentals of accounting systems design. Topics include business information systems, business processes and data flows, database concepts and tools, internal control and risks, auditing the information system, and using the information system to perform audit functions.

ACC 543 .................................................................................. 3 credits

Managerial Accounting & Legal Aspects of Business
In this course, students examine managerial accounting as part of the business’s accounting information system and legal aspects of the business enterprise. Topics include managerial accounting and capital budgeting, cost analysis; management planning and control, negotiable instruments, secured transactions, debtor/creditor relationships, property and insurance, and legal aspects of employment and environment.

ACC 544 .................................................................................. 3 credits

Internal Control Systems
In this course, students gain a broad perspective of accounting and control that considers attainment of all goals of the organization, including those concerned with financial objectives. Topics include an overview of control, risk management, internal control systems, controls for current asset functions, controls for other accounting classifications, controls for information technology systems, and reporting on controls.

ACC 545 .................................................................................. 3 credits

Financial Reporting
This course prepares students to address concepts of financial reporting for roles as CPAs. Students learn important criteria for calculating capital changes, applying concepts of fixed assets and cost determination, and preparing consolidated financial statements. Other topics include the professional responsibilities of CPAs, deferred taxes, cash flow statements, balance sheet preparation, restructuring of troubled debt, and the intricacies of comprehensive income.

ACC 546 .................................................................................. 3 credits

Auditing
In this course, students focus on the auditing practice performed by public accountants. Topics include the CPA profession and the auditor’s role, planning the audit, audit reporting and required communications, evaluating internal controls, audit programs for current assets and liabilities, and audit programs for other business cycles.

ACC 547 .................................................................................. 3 credits

Taxation
In this course, students develop an understanding of the taxation of business entities and the individuals who own those entities. Topics include tax entities, property transactions, calculating basis, gains and losses, alternative minimum tax, S-corporations and partnerships.

ACC 548 .................................................................................. 3 credits

Not-for-Profit & Government Accounting
In this course, students receive an overview of the budgeting, accounting, financial reporting, and auditing required of government and not-for-profit organizations. Topics include the governmental accounting, accounting records in government, fund allocation, government-wide reporting, not-for-profit accounting, and governmental performance measures.

ACC 556 .................................................................................. 3 credits

Forensic Accounting
In this course, students are introduced to the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind these procedures. Topics include an overview of fraud and abuse, forensic evidence, substantive procedures for cash outflow irregulari-
ties, substantive procedures for asset irregularities, financial statement fraud, and examination reporting.

ACC 557 ................................................................. 3 credits

Accounting Ethics
In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.

ETH 557 ........................................................................... 3 credits

Accounting Ethics
In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.

Graduate Marketing Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Students in the Marketing Certificate program will develop an understanding of marketing concepts and applications. Students will develop and communicate innovative approaches to stakeholders in a socially responsible manner and will be well positioned for several professionally recognized marketing certification exams. The Marketing Certificate is designed for students who want to enhance their marketing skills, enter the marketing profession, or complete additional coursework required for several professionally recognized marketing certification exams.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-mkt.

Product Design and Development

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the GMKT

All applicants to this program are expected to meet the following additional admission requirements:

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• Applicants must have access to a suitable work environment for the completion of course assignments.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Certificate Completion Requirements for the GMKT

Credit Bearing Certificate completion requirements are the following:

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 3.0.

• The certificate awarded for this program will read as: Graduate Marketing.

Residency Requirements and Course Waivers for the GMKT

Completion of a minimum of 12 credit of the required course of study to meet University residency requirements. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Students who have completed graduate University of Phoenix course work that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course in the Required Course of Study may not be waived: MKT 593

Course Descriptions for the GMKT

MKT 571 ................................................................. 3 credits
Marketing

This course prepares students to apply marketing concepts to cre-
ate and sustain customer value. Students learn to solve marketing problems in a collaborative environment. Topics include market research, customer relationships, branding, market segmentation, product development, pricing, channels, communications, and public relations.

MKT 544 .................................................................................. 3 credits

**Integrated Marketing Communications**

This course prepares students to apply integrated marketing communications as part of a strategic marketing plan. Students evaluate how marketing communication tools build brand value. Topics include advertising, promotions, public relations, sales, and direct marketing.

MKT 554 .................................................................................. 3 credits

**Consumer Behavior**

This course prepares students to apply buyer behavior theories in the marketplace. Students evaluate how demographic, psychological, and socio-cultural issues contribute to buyer behavior. Topics include consumer preference, brand perception, attitude formation, persuasion, motivation, and consumer protection.

MKT 552 .................................................................................. 3 credits

**Technology Applications and e-Marketing**

This course prepares students to integrate technology in marketing functions. Students design the organization and content of a website to accomplish one or more marketing objectives. Topics include basics of the World Wide Web, bandwidth, servers and storage, e-Marketing, e-Commerce, and targeting customers.

MKT 562 .................................................................................. 3 credits

**Advanced International Marketing**

This course prepares students to develop and manage a marketing strategy in an international business environment. Students evaluate case studies of previous product launches and current research to create a launch strategy for a specific country. Topics include distribution systems, socio-cultural perspectives, business customs, product and service adaptations, and pricing issues.

MKT 593 .................................................................................. 3 credits

**Project Management Capstone**

In this content area capstone course students design an innovative product or service that satisfies an unmet consumer need. Students use research methods to identify opportunities or new product features that reflect the latest market trends. Topics include market environmental analysis, marketing strategy, the marketing process, product development, ethics and social responsibility, innovation and diffusion, pricing strategy, and strategic marketing issues.

**Graduate Project Management Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Students in the Graduate Project Management Certificate program will develop an understanding of project management concepts, applications, and the five processes that define project management. Students will collaboratively create an organizational project plan using Microsoft Project® software. The concentration is based on standards as tested by the Project Management Professional (PMP) certification examination. The Graduate Project Management Certificate program is designed for students who want to enhance their project management skills, become project managers, or complete additional coursework in preparation for Project Management Professional (PMP) certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

The University reserves the right to modify the required course of study.

**General Information for the G-PM**

The Certificate Track graduate program is designed to be an option for students to earn a certificate en-route to earning the graduate degree.

Students who completed a certificate in its entirety and who later choose to enroll in a graduate program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the graduate program.

**Additional Admission Requirements for the G-PM**

A Credit Bearing Certificate program is one that bears University of Phoenix credits. Credit Bearing Certificate programs are developed and maintained by the Dean of each College.

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
En-Route Matriculation Benchmark for the G-PM

- Students enrolled in the Master of Business Administration Concentration in Project Management (Certificate Track) program may earn a certificate in Project Management en route to completing the graduate degree.
- To earn the certificate en-route, students must be admitted to the MBA/PMC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

Certificate Completion Requirements for the G-PM
Credit Bearing Certificate completion requirements are the following:
- Completion of a minimum of 18 credits.
- All students must meet residency requirements.
- A minimum grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as: Graduate Project Management

Residency Requirements and Course Waivers for the G-PM
Completion of a minimum of 12 credits of the required course of study to meet University residency requirements.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Students who have completed graduate University of Phoenix coursework that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: MGT 521, PM 598

Course Descriptions for the G-PM

MGT 521 ..............................................................................................................3 credits
Project Management
This course applies the tools available to University of Phoenix graduate students and the competencies of successful managers to understand the functions of business. Students learn their own perceptions and values to communicate more effectively with others. Other topics include MBA program goals, argument construction, decision making, collaboration, and academic research.

PM 571 ..............................................................................................................3 credits
Project Leadership
This course prepares students to lead a project to successful conclusion. Students will create a plan to lead change during project execution. Other topics include integrated change control, work breakdown structures, human resource planning, performance reporting, managing stakeholders, negotiation, conflict resolution, and cultural diversity.

PM 582 ..............................................................................................................3 credits
Project Risk Management
This course applies risk management concepts to project execution. Students will create contingency plans for a project. Other topics include risk identification, qualitative analysis, quantitative analysis, response planning, monitoring & control, and proactive planning.

PM 584 ..............................................................................................................3 credits
Project Quality Management
This course applies quality control techniques to project development and implementation. Students will create a continuous quality improvement plan for projects within an organization. Other topics include scheduling, quality planning, quality assurance, scope management, schedule control, and quality control.

PM 598 ..............................................................................................................3 credits
Project Management Capstone
In this concentration capstone course, students will design a project to meet an organizational need. Students will collaboratively create a project plan using Microsoft® Project software. Other topics include Project Management Professional (PMP) certification preparation.

Online modality in their state. Please contact your enrollment advisor for more information.

This certificate provides an overview of sustainable practices and applications from the environmental science perspective. Current and historical environmental issues are evaluated by examining the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of

Environmental Sustainability Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the
action for environmental management. This certificate program is comprised of five categories: energy, business, agriculture, architecture and green materials, and sustainable ecosystems.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Required Course of Study for the SUS**

- SUS 300 ~ Environmental Sustainability ..................................................... 3 credits
- ENV 340 ~ Energy and the Environment ......................................................... 3 credits
- SUS 330 ~ Introduction to Sustainable Agriculture ......................................... 3 credits
- SUS 310 ~ Industrial Ecology ......................................................................... 3 credits
- SUS 350 ~ Green Building and Urban Planning ................................................ 3 credits

*Students must choose one of the following:*  

- SUS 370 ~ Sustainable Ecosystems ................................................................. 3 credits
- SUS 380 ~ Sustainable Planning and Land Use ................................................ 3 credits
- SUS 385 ~ Sustainable Ocean Use .................................................................. 3 credits

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the SUS**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

**Certificate Completion Requirements for the SUS**

- Completion of the Required Course of Study.
- A minimum grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded will read as: Environmental Sustainability

**Residency Requirements and Course Waivers for the SUS**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 18 credits in the Required Course of Study, must be completed at University of Phoenix.

Students enrolled in this certificate program may not waive any courses within the Required Course of Study.

**Course Descriptions for the SUS**

**SUS 300** .................................................................................................................. 3 credits

**Environmental Sustainability**

Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.

**ENV 340** ................................................................................................................. 3 credits

**Energy and the Environment**

This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.

**SUS 330** .................................................................................................................. 3 credits

**Introduction to Sustainable Agriculture**

This course introduces students to the principles of sustainable agriculture as it relates to environmental and socioeconomic issues. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.

**SUS 310** .................................................................................................................. 3 credits

**Industrial Ecology**

This course introduces students to the field of industrial ecology. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.

**SUS 350** .................................................................................................................. 3 credits

**Green Building and Urban Planning**

This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.

**SUS 370** .................................................................................................................. 3 credits

**Sustainable Ecosystems**

In this course, students examine the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and
Additional Admission Requirements for the G-MDT

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.
- No work experience is required for this program.

Certificate Completion Requirements for the G-MDT

- The completion of a minimum of 12 credits.
- A minimum grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as: Mediation

Minimum Grade Requirements for the G-MDT

- Students will be placed on Scholastic Disqualification if a minimum grade of “B-” (2.67) is not attained in the following courses: MDT 520, MDT 521, MDT 522
- Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension (SS status). Appeals through SAC for readmission to the program will not be accepted by the College of Social Sciences.

Residency Requirements and Course Waivers for the G-MDT

Students must meet established University residency requirements for certificate conferral. The University requires that 12 credits in the Required Course of Study must be completed at University of Phoenix. Students in this program may not waive any courses.

Course Descriptions for the G-MDT

MDT 520 ................................................................................... 3 credits

MDT 520 ................................................................................... 3 credits
Foundations of Mediation I

This is the first part of the foundation course for the Mediation/Conflict Management program that is designed to provide students with knowledge of the basic standards, principles, and skills needed for the practice of mediation. This course focuses on personal communication skills and the impact of conflict, emotions, and diversity on individual perceptions as they relate to the prac-
tice of mediation. This course combines lecture with a variety of application exercises in dyads and small groups, including mediation role-plays and related assessments.

**MDT 521** .................................................................................. 3 credits

**Foundations of Mediation II**
This is the second segment of the foundation course for the Mediation/Conflict Management program that is designed to provide students with knowledge of the basic standards, principles, and skills needed for the practice of mediation. This course focuses on specific stages in the mediation process including the opening statement, storytelling, issue identification, agenda setting, negotiation techniques, dealing with impasse, and creating a mediation agreement. In addition, ethics in mediation is addressed. This course combines lecture with a variety of application exercises in dyads and small groups, including mediation role-plays and related assessments.

**MDT 522** .................................................................................. 3 credits

**Cultural and Gender Dynamics in Mediation**
This course is an introduction to the complex ways in which cultural and gender issues impact mediation practice. Students will increase their understanding of cultural and gender-based challenges in the field of peacemaking and conflict resolution. They will enhance their communication and mediation skills to more effectively facilitate dispute resolution processes.

**MDT 523** .................................................................................. 3 credits

**Legal and Ethical Issues in Mediation**
Students will examine the differences and similarities between practicing mediation and other professions, such as law and psychological counseling. Students will focus on the legal and ethical issues in mediation, especially conflicts of interest, mediator neutrality, confidentiality, mediator liability, and enforceability of mediation agreements. The course will address state licensing and certification requirements, statutes, and case law as they pertain to the professional and community-based volunteer mediators. Additionally, students will examine mediation codes of conduct and standards of practice.

**Human Services Management Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Social Services Management is comprised of 4 fundamental courses that provide a foundation for the more specialized courses in management within the social services arena and an additional 4 courses focused on organizational management and grant writing. Students will learn the components of indirect services associated with systematic delivery of direct social services, and to employ management practices to inspect, distinguish, and measure the important attributes of program management and supervision. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.

**General Information for the CERT/HSM**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate on-route must be enrolled in the corresponding "Certificate Track" bachelors program. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the CERT/HSM**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student's official transcripts.
Applicants must demonstrate competency in College Writing. Students have the following options to satisfy this requirement:

- Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.
- Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
- Achieve a passing score on the College Composition CLEP exam.

En-Route Matriculation Benchmark for the CERT/HSM

- Students enrolled in the Bachelor of Science in Human Services Concentration in Management (Certificate Track) program may earn a certificate in Human Services Management en route to completing the bachelors degree.
- To earn the certificate en-route, students must be admitted to the BSHS/MC Certificate Track program and have satisfactorily completed the prescribed 24 credits of certificate required courses.

Certificate Completion Requirements for the CERT/HSM

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Human Services Management

Residency Requirements and Course Waivers for the CERT/HSM

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345

Course Descriptions for the CERT/HSM

**BSHS 305** ................................................................. 3 credits  
**BSHS 325** ................................................................. 3 credits  
**BSHS 335** ................................................................. 3 credits  
**BSHS 345** ................................................................. 3 credits  

**Historical Development of Human Services: An Introduction**

In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

**BSHS 325** ................................................................. 3 credits  

**Human Systems and Development**

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

**BSHS 335** ................................................................. 3 credits  

**Ethics and Values for Human Service Professionals**

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

**BSHS 345** ................................................................. 3 credits  

**Diversity and Special Populations**

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

**BSHS 425** ................................................................. 3 credits  

**Administration & Management of Human Service Programs**

Administration and management involve components of indirect services associated with systematic delivery of direct human ser-
services. Students will learn theories of strategic planning, human resource management, strategies for evaluation and planning the development of human service organizations, elements of agency operations, risk management, budgeting, and fiscal acquisition through grant writing and contract negotiation. The emphasis of this course is on leadership development, and managing professional and volunteer staff. Additional content areas addressed in the course involve advocacy efforts and grass roots movements focused on constituency building.

BSHS 426 ........................................................................................................................................... 3 credits

**Human Services Management: Theory & Practice**

This course traces the historical context of human services management as it relates to current theory and practice. Students will examine strategies for managing an integrated, diverse workforce and prepare to be generalists, understanding the scope of leading an organization with commonly encountered agency pressures. Students will employ learned management practices to inspect, distinguish, and measure the important attributes of program management and supervision. By demonstrating a basic understanding of organizational behavior and the challenges of embracing workforce diversity, dynamic systems change, performance evaluation and effective communication with a range of Para-professional and professionals, students will explore their roles as managers in the growing human services field.

BSHS 427 ........................................................................................................................................... 3 credits

**Critical Thinking Skills in Management Decision Making**

This course will familiarize students with strategies related to making sustainable decisions. Techniques used to make decisions, solve problems and lead environments will be explored. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Specific details to human services are considered and methods for service delivery to needs-based populations and the workers who serve in this capacity. Students are introduced to, and will demonstrate understanding of, the Six Sigma elements and five-step approach for process improvement.

BSHS 428 ........................................................................................................................................... 3 credits

**Human Services Program Design & Proposal Writing**

This course introduces students to the purposes, challenges and benefits of program design and grant writing. Students will review components of each and conduct a needs assessment and develop a business case for implementation on program design. Special attention will be given to research for finding available funding sources and how to form important partnerships. Students explore the methods of research using quantitative, qualitative and mixed-method program design concepts. Students will examine concepts of logic models and their impact on people, processes, and conditions related to program design. Using a specific framework, learners will uncover funding possibilities and use tools to prepare for the rigor related with grant writing. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.

**Gerontology Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Human Services Gerontology is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

**BSHS 305**

In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

**BSHS 325**

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of
the MHF training.

BSHS 335 ................................................................................. 3 credits

Ethics and Values for Human Service Professionals

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 ................................................................................. 3 credits

Diversity and Special Populations

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BSHS 345 ................................................................................. 3 credits

Research & Statistics in Human Services

This course provides an overview of research methods and appropriate use of statistics in the social sciences. A component of program development and evaluation involves knowledge of theory related to understanding research and statistics in the human services arena. The scientific method, research tools, data collection, and analysis will be reviewed. Understanding research and developing the ability to critically evaluate published research reports will be emphasized. Statistical concepts will be reviewed, and students will gain a conceptual understanding of underlying principles of research and statistical analysis. Statistical software will be introduced, and students will compute descriptive and inferential statistical data. Students will practice developing research designs and conducting statistical analyses.

BSHS 347 ................................................................................. 3 credits

Social Systems and Aging

This course traces the origins of social systems for the aging around the world, followed by an examination of program types, the effects on retirement, demographic changes, political sustainability of social programs for the aging, institutional settings and labor supply. Students will define and measure population aging by comparing and contrasting U.S. data with other countries by exploring elderly dependency and age-dependency ratios. Additional topics for discussion and demonstrated understanding by students include: the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology.

BSHS 438 ................................................................................. 3 credits

Care for Aging Populations

The course is an exploration of various living environments for aging and elderly including retirement communities, living with relatives and/or children, independency, assisted living, the goodness-of-fit between lifestyle and housing, and managing long-term care. Students will demonstrate knowledge of segregated versus age-integrated residential settings and the impact on residents. An in-depth investigation of care-related issues across the growing aging population will include topics such as chronic illness, subsidized and un-subsidized healthcare related expenses, and needs assessment protocol. The basic model and principles of integrative, interdisciplinary healthcare is presented as the foundation for a team approach to the development of intervention plans, strategies of care, and implementation.

BSHS 439 ................................................................................. 3 credits

Grief, Loss and End of Life Issues

In this course students will learn strategies for facilitating the transition from curative measures to palliative care for the relief of emotional/psychological distress, pain, and a range of physical symptoms. Core competencies involve demonstrated learning of methods for anticipating the demands of end-of-life caregiving including advanced directives, 24/7 services, hospice care management, care and placement options, and easing the common challenges as individuals and families move from care and grief modalities to acceptance and healing. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

Family and Child Services Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Human Services Family and Child Services is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on developing competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems, and will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases.

gation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

**BSHS 325** ................................................................................. 3 credits

**Human Systems and Development**
Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

**BSHS 335** ................................................................................. 3 credits

**Ethics and Values for Human Service Professionals**
In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHSS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

**BSHS 345** ................................................................................. 3 credits

**Diversity and Special Populations**
The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families, and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

**BSHS 405** ................................................................................. 3 credits

**Intervention, Direct Service Delivery & Case Management**
This course provides an overview of the role of the human service worker as a change agent with a focus on the application of theory and skills necessary for providing interventions and direct service delivery to individuals and groups. Specifically, students will develop competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Additionally, students will learn how to access resources, use consultation, and make referrals. Students will complete Module 16 of the MHF training.

**BSHS 406** ................................................................................. 3 credits

**Family and Social Systems: Contemporary Trends and Issues**
Theories of public and private families, as differentiated by societal interaction, are explored with a focus on family systems as they exist within social systems. Micro and macro family environments are investigated. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems. Topics include the family, the state, and social policy with historical perspectives from federal and state legislation. Students will debate current trends in social policy, the efficacy of social welfare systems on a global scale, and demonstrate an understanding of the concept of practical compromise. Roles of the human service worker as advocate and service provider in the family systems context will be addressed.

**BSHS 407** ................................................................................. 3 credits

**Family Violence Across the Lifespan: A Multi-Strata Problem**
This course explores the phenomenon and social problem of family violence with both macro- and micro-theory explanations and an in-depth literature review. Students will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Attention is focused on professional and social responses that include clinical interventions, educational initiatives within schools, and responses to the disclosure of family violence in agency and private settings. Skills to develop a human services approach to preventing family violence are enhanced in this course; students are required to outline their own personal and professional roles in the movement to end family violence.

**BSHS 408** ................................................................................. 3 credits

**Childhood Abuse and Neglect**
This course focuses on the segment of family violence involving physical child abuse, child sexual abuse and exploitation, child neglect and psychological maltreatment of children. Students will examine the scope of these problems and the characteristics of both victims and perpetrators while conducting a search for patterns and dynamics of each distinction. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases. Areas of focus involve various forms of each category including indicators for the range of abuses on an international scale with child labor, slavery, and child prostitution issues.

**Addictions Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Human Services Addic-
tions is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on the roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

The University reserves the right to modify the required course of study.

**General Information for the CERT/ADD**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the CERT/ADD**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student’s official transcripts.

- Applicants must demonstrate competency in College Writing. Students have the following options to satisfy this requirement:
  - Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.
  - Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - Achieve a passing score on the College Composition CLEP exam.

**En-Route Matriculation Benchmark for the CERT/ADD**

- Students enrolled in the Bachelor of Science in Human Services Concentration in Addictions (Certificate Track) program may earn a certificate in Addictions en-route to completing the bachelors degree.

- To earn the certificate en-route, students must be admitted to the BSHS/ADDC Certificate Track program and have satisfactorily completed the prescribed 24 credits of certificate required courses.

**Certificate Completion Requirements for the CERT/ADD**

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Addictions

**Residency Requirements and Course Waivers for the CERT/ADD**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
Human Systems and Development

The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345

Course Descriptions for the CERT/ADD

BSHS 305 ......................................................................................... 3 credits

Historical Development of Human Services: An Introduction

In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

BSHS 325 ......................................................................................... 3 credits

Human Systems and Development

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes affecting both developmental and social change. Students will complete Module 8 of the MHF training.

BSHS 335 ......................................................................................... 3 credits

Ethics and Values for Human Service Professionals

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 ......................................................................................... 3 credits

Diversity and Special Populations

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BSHS 455 ......................................................................................... 3 credits

Working With Addictions

This course introduces students to the biology of addiction, including brain reward mechanisms, the role of environment and genetics, psychodynamics, and the impact of addiction on individuals, families, and communities. The roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis are emphasized in the course. The course examines major models of conceptualizing and integrating prevention, intervention, rehabilitation and maintenance/relapse prevention. Students will learn strategies for accessing supportive measures and case management processes for developing wrap-around action plans for service delivery to individuals and groups with addiction and chemical dependence related issues.

BSHS 456 ......................................................................................... 3 credits

Addiction Interventions for Human Service Workers

This course has a focus on familiarizing students with fundamental interventions used in drug and alcohol treatment settings. Students will conduct an investigation of 12-step, alternative support group, secular organization, therapeutic community, and structured inpatient/outpatient approaches to intervention and treatment. Students will be prepared to apply basic skills for assessing and evaluating client needs, making referrals, and working as a colleague in groups of professional service providers. An exploration of common tools used evaluation instruments for assessing level of care is underscored along with tenets of co-facilitation of treatment groups and assessing special population needs. Students will demonstrate foundational knowledge and understanding of guidelines for treatment as outlined by the Substance Abuse and Mental Health Services Administration and the American Society of Addiction Medicine’s Patient Placement Criteria.

BSHS 457 ......................................................................................... 3 credits

Codependence & Working with Families

In this course students will demonstrate an understanding of the impact of controlling behaviors and supporting dysfunction in relation to addictions and families. Theories of codependency are explored as a disease of loss of selfhood and an addiction resulting from an imbalance of inner and outer self-awareness. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate understanding and skill in case management and referral for treatment in addition to assisting clients with recovery goals, self-awareness, self-acceptance, self-responsibility and self-reflection with a focus on prevalence, and consequences of codependency in families.

BSHS 458 ......................................................................................... 3 credits

Action Planning, Relapse Prevention & Aftercare

This course provides advanced skills development for the addiction and chemical dependency human service worker. Students
will conduct an in-depth evaluation of various treatment approaches employed when preparing action plans with clients. An investigation of comprehensive treatment programs, community action programs, school-based programs, and public health approaches to relapse prevention and aftercare strategies will pro-vide students an opportunity to develop and present an individ-
ualized program for a fictional client. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

CERTIFICATE PROGRAMS FOR THE COLLEGE OF HEALTH SCIENCES AND NURSING

Academic Progression Requirements for all Current Nursing Programs (excluding BSN/I)

Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a "for-cause" 10 panel, plus alcohol drug test.

- For purposes of this policy, the following definitions apply:
  - Drug testing means the scientific analysis of urine, blood, breath, saliva, hair, tissue, and other specimens from the human body for the purpose of detecting the use of drugs or alcohol.
  - Reasonable suspicion means evidence which forms a reasonable basis for concluding that it is more likely than not that a person is impaired by alcohol or drugs or has engaged in substance abuse. Facts which could give rise to reasonable suspicion include, but are not limited to: the odor of alcohol or drugs, impaired behavior such as slurred speech, decreased motor coordination, difficulty in maintaining balance, marked changes in personality or job performance, and unexplained accidents, without reasonable justification. Such evidence may come from a professional or expert opinion, layperson opinion, scientific tests, or other sources or methods.
  - Illegal drug means any drug which is not legally obtainable; any drug which is legally obtainable but has not been legally obtained; any prescribed drug not legally obtained; any prescribed drug not being used for the prescribed purpose or by the person for whom it was prescribed; any over-the-counter drug being used at a dosage level other than that recommended by the manufacturer, or being used for a purpose other than the purpose intended by the manufacturer; and any drug being used for a purpose or by a person not in accordance with bona fide medical therapy. Examples of illegal drugs include, but are not limited to, stimulants; depressants; narcotic or hallucinogenic drugs; cannabis substances, such as marijuana and hashish; cocaine; heroin; methamphetamine; phencyclidine (PCP); and so-called designer drugs and look-alike drugs.

- Impaired means that a person’s mental or physical capabilities are reduced below his or her normal levels without reasonable justification. An impaired student manifests deterioration in the level of function as compared to that previously observed, or the student does not function at a level normally expected under the prevailing circumstances. Impairment may exist in one or more multiple domains, including psychomotor activity and skills, conceptual or factual recall, integrative or synthetic thought processes, judgment, attentiveness, demeanor and attitudes as manifested in speech or actions. Impairment will include addiction to and/or physical dependence upon alcohol or illegal drugs.

- Substance abuse means:
  - the consumption, possession, or distribution of alcohol or illegal drugs by any nursing student while on University or affiliated clinical site premises or while participating in any University (or affiliated clinical site) sponsored or related activity, including any nursing-related course or clinical training activity.
  - a nursing student's use of alcohol or any drug in such a way that the student's performance in any nursing course, including activities at any clinical site, is impaired.

- Prior to being assigned to a clinical placement and as a prerequisite for placement at any agency or health care facility the nursing student shall sign an agreement:
  - to abide by the drug policies and drug testing policies of the University and each agency or health care facility in which a student is assigned as applicable,
  - to submit to any "for cause" drug testing required by the University and testing required by each agency or health care facility the nursing student obtains clinical hours, and
  - to release a copy of any and all drug test results to the University of Phoenix, Dean/Associate Dean of Nursing, other appropriate University officials, and to any State Board(s) of Nursing in which the student holds a nursing license or certificate, where required by the relevant State Board(s) of Nursing.

Failure to sign such agreement is grounds for refusal for student admission and progression in the program.

- The College of Nursing requires students to obtain a 10 panel, plus alcohol drug test if the student's behavior in the clinical, classroom or laboratory setting creates facts that give rise to a reasonable suspicion of substance abuse, or indicates they are impaired by alcohol or drugs.

- If the results of the 10 panel, plus alcohol drug test is negative for alcohol or illegal drugs:
  - The student shall meet with their Campus College Chair, Director of Nursing, or NP Program Manager within 24 hours or by the first business day following the test results to discuss the circumstances surrounding suspected behavior.
• The Campus College Chair, Director of Nursing, or NP Program Manager will counsel the student regarding return to the classroom and clinical agency. The preliminary investigation will cease and the student will be released from further action at that time.
• The Campus College Chair, Director of Nursing, or NP Program Manager will arrange for the student to make up the missed clinical hours.
• If the results of the 10 panel, plus alcohol drug test is positive for alcohol or illegal drugs:
  • A full review by the Office of Dispute Management and Apollo Ethics and Compliance shall be conducted. Students who test positive for alcohol or illegal drugs will not be permitted to return to any clinical setting pending conclusion of the review. The findings may result in student dismissal from the nursing program and expulsion from the University.
  • The results of the positive test for alcohol or illegal drugs shall be reported to the applicable State Board(s) of Nursing, if required by the applicable State Board(s), by the Campus College Chair, Director of Nursing, or NP Program Manager.
  • If the results of the 10 panel, plus alcohol drug test(s) are positive for a prescribed drug(s) but not those that would be defined as illegal in the definitions above:
    • The student shall, within three (3) business days, obtain a written statement from their treating, licensed health care provider (MD, DO, HMD, ND/NMD, NP or PA) stating that:
      • the drug level is within prescribed limits.
      • the level does not indicate abuse.
      • the student’s use of the drug as prescribed will not interfere with safe practice in the clinical area.
  • The failure of a student to provide the above statement or a health care provider’s inability to provide a statement meeting the requirements above shall be treated as a positive test for an illegal drug.
• Students who refuse to submit to a “for-cause” drug test will not be allowed to return to any clinical setting pending conclusion of a full review by the Office of Dispute Management and Apollo Ethics and Compliance. The findings may result in dismissal from the nursing program and expulsion from the University. The results of a positive test for illegal drugs as defined herein or a refusal to undergo a required drug test will be reported to the applicable State Board of Nursing where required by the applicable State Board(s) of Nursing’s statute(s) or regulation(s).
• Students must also adhere to any other additional policies prescribed by the clinical agency. It is the sole responsibility of the student to read and acknowledge the requirements of the clinical health care facility in addition to University policy.
• All costs associated with the drug test, including any transportation costs to or from the drug testing facility, will be the responsibility of the student.
• University of Phoenix, College of Nursing, campus officials may be required to report all failed drug tests to each State Board of Nursing in which the student holds a nursing license or certificate. Campus officials shall report test results to all applicable State Boards of Nursing as described in the applicable Board’s statutes and/or regulations.

Graduate Health Care Informatics Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate program is designed for health care and nurse professionals interested in pursuing or advancing in careers associated with health care informatics and technology. Individuals with little or no background in Informatics receive an overview of informatics as it relates to delivery within a health care facility. The program is designed to provide the learner with current knowledge in concepts of health care informatics, systems life cycle, and data management. The 10 credit-bearing specialization is available as a certificate program for post-baccalaureate students. The four courses in the informatics specialization certificate program are available at campuses offering nursing or health care degree programs using a variety of delivery methods.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/hci.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the HCI

HCS 504 ................................................................. 1 credit
Introduction to Graduate Study in Health Sciences/Nursing
HCS 500 ~ ................................................................. 3 credits
Concepts of Health Care Informatics
HCI 510 ~ ................................................................. 3 credits
Systems Life Cycle
HCI 520 ~ ................................................................. 3 credits
Data Management and Design

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the HCI
All applicants to this certificate program are expected to meet the following additional admission requirements:
• Completion of an undergraduate degree or the entire University of Phoenix BSN, BSHCS or BSHA Required Course of Study with a minimum GPA of 2.5 or better verified by providing an official transcript.

Certificate Completion Requirements for the HCI
Credit Bearing Certificate completion requirements are the following:
• Completion of a minimum of 10 credits
• A minimum University program grade point average (GPA) of 3.0.

**Residency Requirements and Course Waivers for the HCI**

Students must meet established University residency requirements for degree conferral. The University requires that the majority of coursework, 7 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to waive a course in a HCI Certificate Program, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course will not be waived from the certificate program: HCS 504.

**Course Descriptions for the HCI**

This course will provide an overview of the understanding of how data, information and knowledge provides the foundation for healthcare information systems. The course will focus on the concepts of information and knowledge in relation to databases, systems operations and information systems.

**Gerontology Health Care Certificate Program**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This program is designed to provide health care professionals with diverse interdisciplinary backgrounds with the knowledge and process of aging. Content is designed to provide students with relevant information related to the physical, mental, and social aspects of gerontology as well as human services, economic and legal factors that influence elders.

With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for well elders as well as those elders compromised by chronic illnesses or disabilities. Career opportunities are increasing and are not limited to just long term care. Business, industry, community health, federal and local governments and professional organizations will look to include workers prepared to understand the needs of this population as a major consumer of their products and services.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ghc.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the GHC**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- A minimum of one year full-time post-high school work experience.

**Certificate Completion Requirements for the GHC**
Credit Bearing Certificate completion requirements are the following:
• Completion of a minimum of 12 credits.
• All students must meet residency requirements as set by the Dean for each Certificate program.
• A minimum certificate program grade point average (GPA) of 3.0.
• Upon successful completion of HCS 548, HCS 551, HCS 557, and HCS 565, the student can submit a certificate application for GHC, as well as use these courses towards their MHA/GER program requirements. University residency applies with both programs, but students will be considered to have met program residency.
• Students enrolled in the courses as part of their degree will not be able to then request these courses as an additional certificate.

Course Waivers for the GHC
MHA/GER students may dual enroll in this program and submit a certificate application upon successful completion of HCS 548, HCS 551, HCS 557, and HCS 565. The courses may apply to both, the GHC and MHA/GER required course of study. University residency applies to both programs, but students will be considered to have met program residency.
Students in the Gerontology Health Care Certificate Program may waive a maximum of three (3) credits from their program. In order to waive a course in a Professional Certificate Program, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better; and
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the GHC
HCS 548 ................................................................. 3 credits
Foundations of Gerontology
This course introduces students to the field of gerontology and focuses on the aspect of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older adults.
HCS 551 ................................................................. 3 credits
Biological and Psychological Aspects of Aging
This course examines the physical process of aging and the effects on physical and mental health. These topics are applied to disease prevention, health maintenance, and selected disorders that effect health and independent living. Public policy and program development issues will also be addressed to promote the health of the aging population.
HCS 557 ................................................................. 3 credits
Social and Cultural Aspects of Aging
This course examines the social and cultural perspectives on aging. Public and personal aspects of aging will be addressed through historical, theoretical, cultural, and social venues. Topics will include work and retirement, social policy, older people as social and political forces, care needs, diversity, economics, social support, and disability.
HCS 565 ................................................................. 3 credits
Organization and Management of Aging Services
• This course examines a variety of services currently available for aging adults and their families. Students will learn the basic principles for planning, organizing, implementing, and coordinating programs and services intended for maturing adults. Topics include community programs, policy, institutional services, religious-based and other nonprofit resources, contracted service providers, and residential facilities.

Long Term Care Certificate Program
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for elders as well as for adults compromised by severe injuries or disabilities. The long term care certificate focuses on increasing the knowledge and skills essential to work with these various populations. Courses focus on aging, legal issues and perspectives, programs and services, as well as alternative living environments for these populations.

LTC 315 ~ ................................................................. 3 credits
Alternative Living Environments
LTC 328 ~ ................................................................. 3 credits
Legal Perspectives in Aging
The University reserves the right to modify the required course of study.

General Information
This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding “Cer-
tificate Track’ bachelors program.
Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the LTC
All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• Applicants must be currently employed or have access to a work environment.

En-Route Matriculation Benchmark
• Students enrolled in the Bachelor of Science in Health Administration Concentration in Long Term Care (Certificate Track) program may earn a certificate in Long Term Care en route to completing the bachelors degree.
• To earn the certificate en-route, students must be admitted to the BSHA/LTCC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

Certificate Completion Requirements for the LTC
• Completion of a minimum of 18 credits.
• A minimum grade point average (GPA) of 2.0.
• All students must complete the minimum number of credits required by their certificate program.
• The certificate awarded for this program will read as: Long Term Care

Residency Requirements and Course Waivers for the LTC
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200

Course Descriptions for the LTC

GEN 200 ...................................................................................3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

HCS 433 ...................................................................................3 credits
Dimensions of Health and the Older Adult
Basic principles and concepts of the aging process; including the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.

LTC 310 ...................................................................................3 credits
Social and Community Related Programs and Services
This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.

HCS 437 ...................................................................................3 credits
Long-term Care Administration
This course examines the organization and management of long-term care and assisted living facilities. The impact of state and federal regulations are analyzed, as well as issues surrounding funding services are discussed. Students will examine the health services needed for current and future populations needing long-term care.
LTC 315 .................................................................................. 3 credits

Alternative Living Environments
This course focuses on the various formats of care and living environments for the older adult. The cultural and socioeconomic demographics of our current aging population provide different expectations and needs from previous generations. With the changing needs of this population and their families, students will focus on understanding the multidisciplinary continuum of factors to be considered when determining the living and care options available.
LTC 328 .................................................................................. 3 credits

Legal Perspectives in Aging
This course will look at the diverse legal issues related to today’s older adult. Topics will include age discrimination, advocacy and autonomy, elder and fraud abuse, major life transitions, and end of life decision making.

Health Management Certificate Program

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to complete certain courses in the Online classroom at Online rates if the program is available via the Online modulus in their state. Please contact your enrollment advisor for more information.

This certificate is designed to provide a framework in health care management concepts. The courses will provide perspectives related to health care delivery services, health care management and human resources, financial accounting concepts, as well as an introduction to the legal and regulatory aspects in health care.

• Applicants must be currently employed or have access to a work environment.

En-Route Matriculation Benchmark
• Students enrolled in the Bachelor of Science in Health Administration Concentration in Health Management (Certificate Track) program may earn a certificate in Health Management en route to completing the bachelors degree.
• To earn the certificate en-route, students must be admitted to the BSHA/HMC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

Certificate Completion Requirements for the HM
• Completion of a minimum of 18 credits.
• A minimum grade point average (GPA) of 2.0.
• All students must complete the minimum number of credits required by their certificate program.
• The certificate awarded for this program will read as: Health Management

Residency Requirements and Course Waivers for the HM
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be
completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver request in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credit, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.

• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.

• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200

Course Descriptions for the HM

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies to achieve desired goals and achieve academic success. HCS 235 ...................................................................................3 credits

Health Care Delivery in the United States

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 325 ...................................................................................3 credits

Health Care Management

The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

HCS 335 ...................................................................................3 credits

Health Care Ethics and Social Responsibility

This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

HCS 341 ...................................................................................3 credits

Human Resources in Health Care

This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.

HCS 405 ...................................................................................3 credits

Health Care Financial Accounting

This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

HCS 430 ...................................................................................3 credits

Legal Issues in Health Care: Regulation and Compliance

This course covers the broad range of topics affected by law and regulation ranging from patient rights to corporate responsibilities. Health care regulatory agencies and state and federal agencies are examined as well as their impact on the operation healthcare as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 446 ...................................................................................3 credits

Facility Planning

This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss further health care consumer utilization trends, and as well as examining the regulatory compliance requirements.

HCS 457 ...................................................................................3 credits

Public and Community Health

This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environ-
ment of disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.

HCS 483 .................................................................................. 3 credits

**Health Care Information Systems**
The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.

**Health and Wellness Administration Certificate**
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate will provide an introductory overview of concepts such as an introduction to health care delivery, communication skills, medical terminology, health care information systems, the regulatory environment, and patient records. These concepts are needed to work in an entry level aspect of the health and wellness industry, such as a medical spa, weight management clinic, physician front office or clinic.

**Additional Admission Requirements for the CERT/HWA**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

**En-Route Matriculation Benchmark for the CERT/HWA**

- Students enrolled in the Associate of Arts Concentration in Health Care Administration/Health and Wellness Administration Certificate Track program may earn a certificate in Health and Wellness Administration en route to completing the associates degree.
- To earn the certificate en-route, students must be admitted to the AAHCA/HWA Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

**Certificate Completion Requirements for the CERT/HWA**

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Health and Wellness Administration

- Students who have earned an Associate (A or B Track) or undergraduate degree in Health Administration may not receive a certificate in the same area of focus. Example: a student may not earn an AAHCA/HWA Track A or B first and come back to earn an HWA certificate; however, students who have completed a certificate may return to receive an Associates or bachelors in Health Administration with a concentration in the same area as the completed certificate or another approved concentration.

**Residency Requirements and Course Waivers for the CERT/HWA**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previ-
ous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HCA 210C, HCA 260C

**Course Descriptions for the CERT/HWA**

**HCA 210C** ................................................................. 3 credits

**Introduction to Health Care**

This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 230C ................................................................. 3 credits

**Business Communication Skills for Health Care Professionals**

This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

HCA 220C ................................................................. 3 credits

**The Language of Health Care**

This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care.

HCIS 245C ................................................................. 3 credits

**Fundamentals of Information Systems for Health Care**

This course introduces the fundamentals of computer systems and the role of information processing in today’s health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.

HCA 260C ................................................................. 3 credits

**The Regulatory Environment**

This course is an introduction to the regulatory aspects of providing health care services. Students will become familiar with state and federal health regulations. Emphasis is placed on various contemporary characteristics regarding the laws and ethics of health care delivery and the rules that impact health care employment.

HCR 210C ................................................................. 3 credits

---

**Patient Records**

Documenting patients’ health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records in a variety of settings. Students are introduced to uses of health data and legal aspects of records management.

**Electronic Health Records Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate will provide a foundation of content needed to become an Electronic Health Records (EHR) specialist. While duties may vary, they will include entering data related to diagnostic procedures, diseases, and general health history information. EHR specialists ensure a patient’s health information is correct and assist with daily office operations. Students will be introduced to a current electronic health records system application in the certificate program. The concepts learned in this program align to national electronic health record specialist certification exam content.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ehr.

- Emergency Preparedness and Planning

The University reserves the right to modify the required course of study.

**General Information**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the EMC**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed in or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

**En-Route Matriculation Benchmark**

- Students enrolled in the Bachelor of Science in Health Administration Concentration in Emergency Management (Certificate Track) program may earn a certificate in Emergency Management en route to completing the bachelors degree.
- To earn the certificate en-route, students must be admitted to the BSHA/EMC Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

**Certificate Completion Requirements for the EMC**

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Emergency Management

**Residency Requirements and Course Waivers for the EMC**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without
University of Phoenix, 2013-2014
PROFESSIONAL PROGRAMS
CERTIFICATE PROGRAMS FOR THE COLLEGE OF HEALTH SCIENCES AND NURSING

credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200

Course Descriptions for the EMC

GEN 200................................................................................... 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
EMC 310 .................................................................................. 3 credits
Principles of Emergency Management
This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.
EMC 330 .................................................................................. 3 credits
Political and Policy Issues for Emergency Management
This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law affecting emergency operations will be studied.
EMC 340 .................................................................................. 3 credits
Emergency Services and the Community
This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.
EMC 350 .................................................................................. 3 credits
Managing Emergency Response Operations
This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.
EMC 320 .................................................................................. 3 credits
Emergency Preparedness and Planning
This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

Graduate Nursing/Health Care Education Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This course series is designed for nursing and health care professionals interested in pursuing or advancing in careers as faculty in higher educational settings. Those with no background in higher education receive a strong foundation for the many dimensions of the faculty role. Current educators can update or expand their knowledge in curriculum development, assessment and evaluation, and instructional strategies.

This credit-bearing certificate program is for post-baccalaureate students. The four courses in the education specialization/certificate program are available at campuses offering nursing or health care degree programs using on ground and/or Flexnet delivery, as well as through the online campus.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/nhce.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the NHCE
HSN 548 .................................................................................. 3 credits
Role of the Health Care/Nursing Educator
HSN 540 .................................................................................. 3 credits
Using Effective Teaching Strategies
HSN 544 .................................................................................. 3 credits
Design and Process of Curriculum Development
HSN 552 .................................................................................. 3 credits
Assessment and Evaluation of Learning

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the NHCE
All applicants to this certificate program are expected to meet the following additional admission requirements:

• Completion of an undergraduate degree or the entire University of Phoenix BSN or BSHCS Required Course of Study with a minimum GPA of 2.5 or better verified by providing an official transcript.
• A minimum of one year full-time post-high school health care work experience.
• Current employment in a nursing or health care role or access to an appropriate healthcare organization environment in which to complete the work related course assignments.

Certification Completion Requirements for the NHCE
Credit Bearing Certificate completion requirements are the following:
• Completion of a minimum of 12 credits.
• A minimum program grade point average (GPA) of 3.0.

Minimum Grade Requirements for the NHCE
• Students in this program are required to achieve a minimum grade of “C” (2.0) in the following courses: HSN 540, HSN 544, HSN 548 and HSN 552. A “C-” grade is not acceptable. Students who fail to receive a minimum grade of “C” in any of the following courses will be scholastically disqualified from the University.
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

Residency Requirements and Course Waivers for the NHCE
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 6 credits in the Required Course of Study, must be completed at University of Phoenix.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the NHCE
HSN 548 ........................................................................................3 credits
Role of the Health Care/Nursing Educator
Responsibilities of faculty within various higher education settings are explored. Trends and issues that impact the educator role within changing health care and educational environments are discussed. Topics such as technological, legal, ethical, and professional dynamics are included.

HSN 544 ........................................................................................3 credits
HSN 552 ..................................................................................3 credits
Teaching and Learning Strategies
This course will focus on the concepts of learning, cognitive, and psychomotor learning, and the principles of adult learning. Selection and development of teaching strategies that enhance and facilitate learning will be explored.

Design and Process of Curriculum Development
Development of curriculum for programs in higher education settings are examined. This course focuses on curriculum planning and design, as well as development of individual courses and their relationship to program mission, objectives, and outcomes.

Assessment and Evaluation of Learning
Methods of assessing learning in higher education are analyzed and applied in different learning situations. Processes and problems related to course learning assessments as well as evaluating programmatic outcomes are examined. Designing measures to evaluate learner and curricular outcomes are addressed.

CERTIFICATE PROGRAMS FOR THE COLLEGE OF EDUCATION

Administration and Supervision Certificate Program (California)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Administration and Supervision Certificate Program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative practicum is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/asc.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements and Course Selections
Orientation, 0 Total Credits
ADMIN 501 ..................................................................................0 credits
Orientation to Administration and Supervision
Applicants must possess one of the following California credentials:

- A valid clear or life California teaching credential requiring a baccalaureate degree and a program of professional preparation, including student teaching.
- A valid clear or life California Designated Subjects Teaching Credential provided the applicant also possesses a baccalaureate degree.
- A valid clear services prerequisite credential, California Pupil Personnel Services Credential, Teacher Librarian Services Credential, Speech-Language Pathology Services Credential, Clinical or Rehabilitative Services Credential, or a School Nurse Services Credential (Clear or Professional Clear level only), requiring a baccalaureate degree and a program of professional preparation, including field practice or the equivalent.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

**Completion Requirements for the ASC**

- Completion of a minimum of 31 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Field Experience Observation Record (30-40 hours).
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- Completion of e-portfolio.
- The certificate awarded for this program will read as: Administration and Supervision

**Academic Progression Requirements for the ASC**

Candidates must complete and provide verification of the following academic progression requirements prior to practicum placement:

- Proof of passing score on the CBEST exam

**Residency Requirements and Course Waivers for the ASC**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 594A, ADMIN 594B, ADMIN 594C.
A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ADMIN 594A, ADMIN 594B, ADMIN 594C.

Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the ASC

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR). Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Verification of employment in an administrative position prior to issuance of a Preliminary Administrative Credential. Those students who do not have an offer of employment in an administrative position may apply for a Certificate of Eligibility to seek employment.

Practicum Policies for the ASC

- The Administrative Practicum is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the practicum. Candidates must follow the guidelines in place at their campus.
- Candidates must take the practicum courses concurrently with the practicum experience. If a candidate chooses to postpone the practicum, he/she must postpone their enrollment in the practicum courses.
- Candidates must pass each Administrative Practicum course with a grade of "B" or better in order to avoid Scholastic Disqualification.
- Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Field Experience for the ASC

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Note: The field experience hours are hours completed outside of the 240 hour Administrative Practicum experience.

Course Descriptions for the ASC

ADMIN 501 ............................................................................... 0 credits

Orientation to Administration and Supervision

This course is designed to provide an orientation to the primary components of the Master of Arts in Education / Administration and Supervision program in California. Students will be introduced to the program's progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative practicum will be discussed. ADMIN 516 ................................................................. 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes. ADMIN 594A ................................................................. 1 credit

Administrative Practicum Part I: Instructional Leadership

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed. ADMIN 594B ................................................................. 1 credit

Administrative Practicum Part II: Organizational Management

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed. ADMIN 594C ................................................................. 1 credit

Administrative Practicum Part III: Professional Practice

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed. ADMIN 518 ................................................................. 3 credits

Leadership and Collaborative Processes

This course provides students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and on how educational leaders can create high performing teams. ADMIN 570 ................................................................. 3 credits

Equity, Diversity, and Access in Education

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership. ADMIN 555 ................................................................. 3 credits

School Policy and Law for Principals

This course examines legal theory and practice in the context of the educational setting. The United States Constitution, federal and state court systems, legal issues, and their impact on schools are discussed, analyzed, and applied to current educational practices.
Principal Licensure Certificate Program (Utah)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Principal Licensure professional certificate program is designed for educators interested in obtaining a license as a P-12 school principal. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/plc.

Additional Admission Requirements for the PLC

All applicants are expected to meet the following admissions requirements:
• A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
  • The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
  • Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  * Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week

Utah students in the MAED/ADM program can have experience as a licensed school counselor.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• A signed PLC New Student Checklist

Certificate Completion Requirements for the PLC
• Completion of a minimum of 28 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of the Administration Internship courses ADMIN 591A, ADMIN 591B, and ADMIN 591C.
• Completion of e-portfolio.
• Completion of Field Experience Observation Record.
• Students may need to meet additional requirements set forth by their State Department of Education.
• The certificate awarded for this program will read as: Principal Licensure Certificate.

Residency Requirements and Course Waivers for the PLC
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 591A, ADMIN 591B, ADMIN 591C

Minimum Grade Requirement for the PLC
A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: ADMIN 591A, ADMIN 591B, ADMIN 591C
Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the PLC
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for principal certification). Refer to the New Student Checklist and your state certification agency for specific requirements.
• Passing scores on state exam(s) for principal licensure.
• Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Family, Community and Media Relations
This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

ADMN 555 ............................................................................. 3 credits

School Policy and Law for Principals
This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

ADMN 524 ............................................................................. 3 credits

Supervision of Curriculum, Instruction and Assessment
This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

ADMN 591A ............................................................................. 1 credit

Principal Internship Part I: Instructional Leadership
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

ADMN 535 ............................................................................. 3 credits

Business and Facilities Management
This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

ADMN 560 ............................................................................. 3 credits

Human Resources Management in Education
This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

ADMN 591B ............................................................................. 1 credit

Principal Internship Part II: Organizational Management
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

ADMN 575 ............................................................................. 3 credits

Family, Community and Media Relations
This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

ADMN 565 ............................................................................. 3 credits

School Improvement Processes
This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

ADMN 591C ............................................................................. 1 credit

Principal Internship Part III: Professional Practice
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

Principal Licensure Certificate Program (Colorado)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

ADMN 555 ............................................................................. 3 credits

The Principal Licensure professional certificate program is designed for educators interested in obtaining a license as a P-12 school principal. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/plc.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

877
All applicants must be currently employed or have access to a licensed or certified professional including school social worker and programs can have experience in public or non-public P-12 schools as Colorado students in the Principal Licensure Certificate (PLC).

• A minimum grade point average (GPA) of 3.0 on the graduate study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the PLC
All applicants are expected to meet the following admissions requirements:

- A masters degree from a regionally accredited college or university or equivalent graduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
- The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  * Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week

Colorado students in the Principal Licensure Certificate (PLC) programs can have experience in public or non-public P-12 schools as a licensed or certified professional including school social worker and school nurse.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A signed PLC New Student Checklist

Certificate Completions Requirements for the PLC

- Completion of a minimum of 28 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of the Administration Internship courses ADMIN 591A, ADMIN 591B, and ADMIN 591C.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record.

- Students may need to meet additional requirements set forth by their State Department of Education.
- The certificate awarded for this program will read: Principal Licensure Certificate.

Residency Requirements and Course Waivers for the PLC
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 591A, ADMIN 591B, ADMIN 591C

Minimum Grade Requirement for the PLC
A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: ADMIN 591A, ADMIN 591B, ADMIN 591C

Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the PLC

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for principal certification). Refer to the New Student Checklist and your state certification agency for specific requirements.
- Colorado: Students must verify three (3) years licensed experience in P-12 grades in order to obtain their principal certification and will need to provide verification of this. Acceptable licensed experience includes the following:
  * Teacher
  * School Counselor
  * School Nurse
  * School Social Worker
  * School Psychologist
- Passing scores on state exam(s) for principal licensure.
Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Course Descriptions for the PLC

**Orientation to Administration and Supervision**
This course is designed to provide an orientation to the primary components of the Master of Arts in Education/Administration and Supervision program. Students will be introduced to the program's progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.

**Professional Communications**
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**Leadership and Collaborative Processes**
This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

**Equity, Diversity, and Access in Education**
This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, it focuses on the equitable participation of students, families, teachers, and staff in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

**School Policy and Law for Principals**
This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

**Supervision of Curriculum, Instruction and Assessment**
This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

**Human Resources Management in Education**
This course is designed to provide students with an overview of the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

**Business and Facilities Management**
This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school's vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

**School Improvement Processes**
This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

**Principal Internship Part I: Instructional Leadership**
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

**Principal Internship Part II: Organizational Management**
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

**Family, Community and Media Relations**
This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school's vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.
cipals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

**California Teachers of English Learners Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate program is aligned directly to the Candidate Competency Standards and the Knowledge, Skills, and Abilities for California Teachers of English Learners (CERT/CTEL). The curriculum is designed around the Knowledge, Skills, and Abilities for California Teachers of English Learners (CERT/CTEL), and provides candidates with a depth of knowledge regarding current research-based theories and research in the specialized instruction of English language development (ELD).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Course work requiring prerequisites are identified by a ~ symbol following the course number.

**Required Course of Study for the CERT/CTEL**

- MTE 502 ....................................................................................0 credits
- Orientation to the California Teachers of English Learners (CTEL) Program

The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

**Additional Admission requirements for the CERT/CTEL**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- The Commission can only accept course work and degrees completed at regionally accredited institutions or an equivalent undergraduate degree earned at a recognized foreign institution. Degrees and course work must have been completed while the institution was regionally accredited in order for the Commission to consider them for Credentialing purposes.
- Students using foreign credentials when enrolling in a local campus program or Online program in the State of California must use a foreign credential evaluation service that is approved by the California state regulating board.
- A minimum equivalent of three (3) years post-high school work or volunteer experience.
- Candidates entering this program must possess a valid California teaching credential, Speech-Language Pathology or Clinical or Rehabilitative Services Credential with a Special Class Authorization, School Nurse Services Credential with a Special Teaching Authorization in Health, Visiting Faculty Permit, Children’s Center Permit (excluding emergency), or Child Development Permit (excluding Assistant and Associate Permits) that authorizes the holder to provide instruction to pupils.
- The following are not appropriate prerequisite credentials or permits: Emergency Permits, Provisional Internship Permits, Short-Term Staff Permits, District Intern Credentials, University Intern Credentials, Exchange Credentials, Sojourn Certified Employee Credentials, Services credentials without a special class authorization
- Access to an educational setting with English language learners.
- A signed CERT/CTEL New Student Checklist
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

**Certificate Completion Requirements for the CERT/CTEL**

- Completion of a minimum of 32 credits.
- A minimum program grade point average (GPA) of 3.0.
- Completion of the e-portfolio.

**Residency Requirements and Course Waivers for the CERT/CTEL**

Students may waive only three (3) credits from the program. Courses may only be waived with California Commission-approved CERT/CTEL course work.

**Institutional Recommendation for the CERT/CTEL**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their program. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

The University reserves the right to modify the required course of study. Program requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the CERT/T2T-E  
All applicants are expected to meet the following admissions requirements:  
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Degrees from nationally accredited institutions will not be accepted. All coursework for the Undergraduate degree must have been taken from a regionally accredited institution. Coursework taken during an institution’s candidacy period is not acceptable for admission.  
• A cumulative grade point average (GPA) of 3.0 on the undergraduate degree posted transcript.  
• Demonstration of basic skills proficiency  
• T2T-Elementary applicants must have passing scores on the designated state content knowledge exam (Praxis II: elementary content area specific)  
• A signed Indiana Transition to Teaching New Student Checklist.  
• Students who reside outside of the US or US Territory are not eligible to apply.

Candidacy Status for the CERT/T2T-E  
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1. Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be uploaded to the Transition to Teaching DRF in the e-portfolio and the student’s eXp file.  
• Verification of current criminal background check.  
• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Minimum Grade Requirements for the CERT/T2T-E

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 585
- Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course.
- Candidates must earn a "B" or better in student teaching in order to complete the Transition to Teaching program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from this program.

Certificate Completion Requirements for the CERT/T2T-E

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required practicum/student teaching courses.
- Completion of Field Experience Observation Record (50 hours).
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The certificate awarded for this program will read as: Elementary Education

Institutional Recommendation for the CERT/T2T-E

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).

Out-of-state institutional recommendations cannot be issued for graduates of this program. The Transition to Teaching Certificate program is only eligible for an in-state (Indiana) institutional recommendation. Candidates with out-of-state institutional recommendations may obtain a letter of verification that they completed an alternative route program recognized by the Indiana Department of Education for initial licensure.

Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.
- Indiana candidates must provide verification of current CPR/AED/Heimlich certification prior to being recommended for their credential.
- Indiana candidates must complete a basic or in-service course of study on the basis of prior graduate-level college coursework.
- Student teaching may not be waived. However, candidates may be eligible to complete their student teaching in the classroom where they are currently employed as a full-time teacher. Students who are already teaching in an appropriate environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must be teaching in the grade level and content area that corresponds with the certification they are pursuing. Students must complete the student teaching course and complete and upload the Teacher Work Sample.

Student Teaching and Field Experience for the CERT/T2T-E

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Students must complete student teaching hours as noted below:
  - Elementary candidates must complete three (3) semester hours of supervised student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry and are not eligible for admission to the MAED/TED pre-licensure programs.
- Candidates may be eligible to complete their student teaching in the classroom where they are currently employed as a full-time teacher. Students who are already teaching in an appropriate environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must be teaching in a grade level and content area that corresponds with the certification they are pursuing. Students must complete the student teaching course and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Course Descriptions for the CERT/T2T-E
MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
MTE 518 ........................................................................ 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522 ........................................................................ 3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 514 ........................................................................ 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
RDG 537 ........................................................................ 4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
RDG 535 ........................................................................ 3 credits
Diagnosis & Remediation of Reading Difficulties
This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.
MTE 531 ........................................................................ 2 credits
Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessment of K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.
MTE 533 ........................................................................ 4 credits
Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
ELM 585 ........................................................................ 3 credits
Elementary Student Teaching
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
Transition to Teaching Certificate/Secondary Education (Indiana)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.
The Transition to Teaching program with specializations in elementary and secondary is designed for individuals interested in gaining the knowledge and expertise required in the field of teaching. The program is an alternative route program designed to meet the academic requirements established for state licensure. The program curriculum is focused on educational foundations, classroom management, instructional methods, assessment, and diversity. This program also includes field experiences and a full-time student teaching experience. Course work requiring prerequisites are identified by a ~ symbol following the course number.

Additional Admission Requirements for the CERT/T2T-S

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Degrees from nationally accredited institutions will not be accepted. All coursework for the Undergraduate degree must have been taken from a regionally accredited institution. Coursework taken during an institution’s candidacy period is not acceptable for admission.

• A cumulative grade point average (GPA) of 3.0 on the undergraduate degree posted transcript.

• Demonstration of basic skills proficiency

• T2T-Secondary applicants must have passing scores on the designated state content knowledge exam (Praxis II: secondary content area specific)

• A signed Indiana Transition to Teaching New Student Checklist.

• Students who reside outside of the US or US Territory are not eligible to apply.

Candidate Status for the CERT/T2T-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be uploaded to the Transition to Teaching DRF in the e-portfolio and the student’s eXp file.

• Verification of current criminal background check.

• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Minimum Grade Requirements for the CERT/T2T-S

• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 585

• Candidates who earn less than a grade of “B” in any of these courses must complete a remediation plan and repeat the course.

• Candidates must earn a “B” or better in student teaching in order to complete the Transition to Teaching program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.

• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from this program.

Certificate Completion Requirements for the CERT/T2T-S

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 3.0.

• Satisfactory completion and uploading of the Teacher Work Sample (TWS).

• Satisfactory completion of any required practicum/student teaching courses.

• Completion of Field Experience Observation Record (50 hours).

• Completion of e-portfolio.

• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The certificate awarded for this program will read as: Secondary Education

Institutional Recommendation for the CERT/T2T-S
Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) request for their teaching credential.

Out-of-state institutional recommendations cannot be issued for graduates of this program. The Transition to Teaching Certificate program is only eligible for an in-state (Indiana) institutional recommendation. Candidates with out-of-state institutional recommendations may obtain a letter of verification that they completed an alternative route program recognized by the Indiana Department of Education for initial licensure.

- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.
- Indiana candidates must provide verification of current CPR/AED/Heimlich certification prior to being recommended for their credential.
- Indiana candidates must complete a basic or in-service course of education and training on suicide prevention and the recognition of signs that a student may be considering suicide prior to receiving an initial teaching license.

Residency Requirements and Course Waivers for the CERT/T2T-S

- Students may not waive any credits from the required course of study on the basis of prior graduate-level college coursework.
- Student teaching may not be waived. However, candidates may be eligible to complete their student teaching in the classroom where they are currently employed as a full-time teacher. Students who are already teaching in an appropriate environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must be teaching in a grade level and content area that corresponds with the certification they are pursuing. Students must complete the student teaching course and complete and upload the Teacher Work Sample.
- Students must complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Course Descriptions for the CERT/T2T-S

MTE 507 .......................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

SEC 508 .......................................................... 3 credits
Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan design, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .......................................................... 3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

SPE 514 .......................................................... 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

RDG 542 .......................................................... 3 credits
Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements. SEC 585 .......................................................... 4 credits

Secondary Student Teaching
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
MTE 543 .......................................................... 3 credits

Curriculum Constructs and Assessment: Secondary English/Performing Arts
This course explores the application of basic instructional methods in content areas and strategies of teaching the visual and performing arts in middle school and high school. Participants identify the educational needs of secondary students by exploring current instructional theory, National and state standards, assessment practices, and social issues that impact the arts in the classroom. The course also helps prospective educators develop skills in adapting delivery methods and behavior management plans for individual students and diverse populations. The course will also emphasize classroom management skills as they relate to visual and performing arts instruction.
MTE 551 .......................................................... 3 credits

Curriculum Constructs and Assessment: Physical Education
This course explores the secondary physical education classroom, professionalism, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, national and state standards including the developing motor skills through activities, developing levels of physical fitness, understanding principles of human movement, and developing and practicing social skills and the value of fair play in games and sports. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom and sport/field management skills and safety as they relate to physical education instruction.
MTE 560 .......................................................... 3 credits

Curriculum Constructs & Assessment: Secondary Health Science
This course explores the application of instructional methods to the content area of Health Science in middle school and high school settings. Participants explore the contexts of societal issues, and of state, local, and national standards for the teaching of health science. They also examine current instructional theory, models, and strategies as they relate to instruction, assessment, and accountability. The course helps prospective educators to identify the educational needs of middle level and secondary students, and to develop skills in selecting and adapting delivery methods, external resources, and behavior management plans for diverse students.
MTE 564 .......................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessing strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.
MTE 566 .......................................................... 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 567 .......................................................... 3 credits

Curriculum Constructs & Assessment: Secondary Science
This course explores the application of basic instructional methods and strategies of teaching science in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 569 .......................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Social Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.
MTE 570 .......................................................... 3 credits

Curriculum Constructs and Assessment: Global Languages
This course explores the application of basic instructional methods to the content area of Global Languages in middle school and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and cultural issues in the teaching of foreign languages. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse
individual students and student populations.

MTE 580 ................................................................. 3 credits

**Curriculum Constructs and Assessment: Secondary Business & Marketing**

This course focuses on instruction and assessment strategies to provide secondary students background and knowledge in business/marketing content and careers, employment and workplace skills, applied academics, and leadership skills through participation in career and technical student organizations (CTSOs). This course will provide teacher candidates the opportunity to develop the ability to evaluate and use appropriate instructional methods, curricular materials and resources, and assessment strategies.

**Certificate in Special Education (Nevada)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Certificate in Special Education (CERT/SPE) prepares current certified teachers working in a K-12 regular education environment as special education teachers. This program is designed to provide them with the additional coursework required for certification as a K-12 special education. Coursework in this program includes special education methods, special education assessment and interpretation, characteristics of exceptionalities, scientifically based reading instruction, methods of teaching mathematics, and inclusion strategies for the special educator. Throughout the program, students are required to complete a minimum of 30-40 hours of verifiable field experiences, covering a variety of special education settings.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-spe.

**Course work requiring prerequisites are identified by a ~ symbol following the course number.**

Collaboration with Families of Students with Disabilities

The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

**Additional Admission Requirements for the CERT/SPE**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Degrees from nationally accredited institutions will not be accepted. All coursework for the undergraduate degree must have been taken from a regionally accredited institution. Coursework taken during an institution's candidacy period is not acceptable for admission.

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.

- A minimum equivalent of three (3) years post-high school work or volunteer experience.

- All applicants must be currently employed as a special education teacher in a Nevada school.

- Students enrolling in the CERT/SPE must have a valid elementary, secondary, or special (K-12, Art, Music, PE or special education) license excluding Business and Industry.

**Certificate Completion Requirements for the CERT/SPE**

- Completion of a minimum of 32 credits.

- A minimum grade point average (GPA) of 3.0.

- Completion of Field Experience Observation Record (25 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.

- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

- Completion of e-portfolio.

- The certificate awarded for this program will read as: Special Education Generalist

**Residency Requirements and Course Waivers for the CERT/SPE**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, RDG 537, SPE 512, SPE 546, SPE 591

### Institutional Recommendation for the CERT/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework as required by the state certification agency.

### Field Experience for the CERT/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 25 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

### Course Descriptions for the CERT/SPE

#### MTE 505 ...........................................................................................................0 credits

**Orientation to the Special Education Certification Program**

This course is designed to provide an orientation to the primary components of the Special Education Certificate Program. Students will be introduced to the program’s certificate completion requirements. Field Experience, É-Portfolio, and technology resources will be discussed.

**COM 516 .........................................................................................................1 credit**

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 505 ...........................................................................................................3 credits**

### Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**SPE 513 .............................................................................................................3 credits**

### Institutional Recommendation for the CERT/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework as required by the state certification agency.

### Field Experience for the CERT/SPE

The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**SPE 513 .............................................................................................................3 credits**

### Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

**SPE 512 .............................................................................................................3 credits**

### Special Education Assessment and Interpretation

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

**SPE 591 .............................................................................................................3 credits**

### Characteristics of Exceptionalities

This course examines teaching and managing students with mild disabilities. Special emphasis is placed on learning disabilities, mental retardation, and emotional disabilities. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed in depth.

**RDG 537 .........................................................................................................4 credits**

### Curriculum Constructs & Assessment: Reading and Language Arts

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8
school setting, is incorporated into the course requirements.

MTH 506 ................................................................. 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in preschool through eighth-grade mathematics. Topics include an overview of mathematics content and process standards, developmentally effective instructional strategies, assessment, and classroom and materials management.

MTE 522 ............................................................................. 3 credits

Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their target grade levels and needs.

SPE 558 ............................................................................. 3 credits

Transition Planning for Adolescents with Disabilities
This course focuses on the role of the special education teacher as he/she transitions adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Students will learn skills and concepts in working with students with special needs, parental involvement, and the community.

SPE 557 ............................................................................. 3 credits

Collaboration with Families of Students with Disabilities
This course focuses on the interrelationships of varied services for students with disabilities. Emphasis is placed on meeting the academic and social-emotional needs of students with disabilities by working with parents, professionals, and community services to develop collaborative and productive professional relationships.

Certificate in Special Education (Colorado)

Orientation to the Special Education Certification Program
This course is designed to provide an orientation to the primary components of the Special Education Certification Program. Students will be introduced to the program’s certificate completion requirements. Field Experience, E-Portfolio, and technology resources will be discussed.

COM 516 ..........................................................1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ..........................................................3 credits

Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 546 ..........................................................3 credits

Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 512 ..........................................................3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

SPE 559 ..........................................................3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed,
and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 574 .................................................................................. 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 544 .................................................................................. 3 credits

Characteristics of Emotional & Behavioral Disabilities
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 .................................................................................. 3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

RDG 500 .................................................................................. 3 credits

CERTIFICATE PROGRAMS FOR THE COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

Visual Communication Certificate Program
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Visual Communication Certificate is available to undergraduates not enrolled in the BSIT program who wish to expand their technical knowledge using software tools for Visual Communication. Student enrolling in the Visual Communication Certificate will learn the graphic design and technology tools to create visual communications that are relevant to organizations. Students in the Visual Communication Certificate will develop a diverse portfolio of rich media that can be used in Web sites, advertising, corporate reports, business presentations, instructional materials, animated movies and electronic publications that fulfill business and training needs.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-vc.

VCT 420 ~ .......................................................... 3 credits
Multimedia Development

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the VC
All applicants to this certificate program are expected to meet the following additional admission requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- All applicants must be currently employed or have access to a suitable work environment.

Certificate Completion Requirements for the VC
Certificate completion requirements for the CERT/VC program are as follows:
- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.

Residency Requirements and Course Waivers for the VC
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of ‘C’ (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the VC

CIS 319...................................................................................3 credits
Computers and Information Processing
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet. This course is designed to provide the student with a thorough introduction to information processing and management, via computers, in a business environment. This course looks at the computer as a tool for use in the control of business information.

VCT 300 .....................................................................................3 credits
Image Editing
This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on file formats, composition, color, text design, retouching and manipulation of graphic and photographic images.

VCT 310 .....................................................................................3 credits
Web Design
This course focuses on the principles of good web design and the essential role of the web designer in today’s business environment. Topics covered include layout, style, artistic quality, navigation, performance, communication, community, e-commerce and marketing.

VCT 320 .....................................................................................3 credits
Electronic Publishing
This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

VCT 410 .....................................................................................3 credits
Instructional Design
This course presents principles of instructional design. An instructional design methodology is presented that includes requirements analysis, performance objectives, performance measures, instructional strategies, storyboarding, design specifications, development, implementation and evaluation.

VCT 420 .....................................................................................3 credits
Multimedia Development
This course introduces the fundamentals of developing interactive, multimedia enhanced content for delivery across alternative platforms such as the Internet, CD’s and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.

A+ Fundamentals Certificate
The following certificate program may be offered at these University of
Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This program is designed to help students become competent in the areas of computer hardware installation, configuration, maintenance, networking, file management, security, and troubleshooting.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aplus.

Required Course of Study for the CERT/APLUS
Course work requiring prerequisites are identified by a ~ symbol following the course number.

Note: Although the completion of courses for this certificate program does not result in A+ certification, there are course materials available including simulations, hands-on exercises, and video lectures which the student can use for certification preparation if they choose to take the certification exam.

CIS 290 ~ ............................................................................... 3 credits
Personal Computer Hardware Support
CIS 292 ~ ............................................................................... 3 credits
Personal Computer OS Support

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/APLUS
All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

• No work experience is required.

Certificate Completion Requirements for the CERT/APLUS
Credit Bearing Certificate completion requirements are the following:

• Completion of the 6 credits in the Required Course of Study.

• All students must meet residency requirements as set by the Dean for each Certificate program. Students who have completed the courses required for this certificate program as part of a University of Phoenix degree program are not eligible to enroll in and earn this certificate.

• A minimum program grade point average (GPA) of 2.0.

• The certificate awarded for this program will read as: A+ Fundamentals

Residency Requirements and Course Waivers for the CERT/APLUS
• Students may not waive any credits in this certificate program.

• The following courses in the required course of study may not be waived: CIS 290, CIS 292

Course Descriptions for the CERT/APLUS
CIS 290 .................................................................................. 3 credits
Personal Computer Hardware Support
This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair.
CIS 292 .................................................................................. 3 credits
Personal Computer OS Support
This course is an introduction to the fundamentals of personal computer operating systems for computer software configuration, file management, performance monitoring, optimization, maintenance, recovery, and security.

Health Care Information Technology Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Health Care IT certificate offers coursework focused on technical knowledge and IT skills applied to health care business operations. This certificate covers the body of knowledge for the CompTIA HIT technician exam by focusing on technical skills and interactive, hands-on experience in Information Systems (IS) fundamentals, personal computer hardware and operating systems support, and Health Care Information Technology (HIT).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the CERT/HIT
CIS 208 .................................................................................. 3 credits
Information Systems Fundamentals in Health Care
CIS 290 .................................................................................. 3 credits
Personal Computer Hardware Support
CIS 296 ~ ............................................................................... 3 credits
Computer Systems Maintenance
HCS 208 ................................................................................ 3 credits
Introduction to Health Care Industry Terms
HCS 235 ~ ............................................................................... 3 credits
Health Care Delivery in the U.S.
CIS 298 ~ ............................................................................... 3 credits
Healthcare IT
The University reserves the right to modify the required course of study.

**General Information for the CERT/HIT**

This certificate program may be taken on its own or may be earned en-route to earning an associate's degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" associate's program. Students who completed a certificate in its entirety and who later choose to enroll in an associate's program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.

**Additional Admission Requirements for the CERT/HIT**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**En-Route Matriculation Benchmark for the CERT/HIT**

- Students enrolled in the Associate of Arts Concentration in Information Technology/Health Care Information Technology Certificate Track program may earn a certificate in Health Care Information Technology en route to completing the associates degree.
- To earn the certificate en-route, students must be admitted to the AAIT/HIT Certificate Track program and have satisfactorily completed the prescribed 18 credits of certificate required courses.

**Certificate Completion Requirements for the CERT/HIT**

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Health Care Information Technology
- Students who have earned an Associate (A or B Track) or undergraduate degree in Information Technology may not receive a certificate in the same area of focus. Example: a student may not earn an AAIT/HIT Track A or B first and come back to earn an HIT certificate; however, students who have completed a certificate may return to receive an Associates or bachelors in Information Technology with a concentration in the same area as the completed certificate or another approved concentration.

**Residency Requirements and Course Waivers for the CERT/HIT**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course(s) in the Required Course of Study may not be waived: CIS 298

**Course Descriptions for the CERT/HIT**

**CIS 208** .................................................................3 credits

**Information Systems Fundamentals in Health Care**

This course introduces the fundamentals of computer systems and the role of information processing in today's health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

**CIS 290** .................................................................3 credits

**Personal Computer Hardware Support**

This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair.

**CIS 296** .................................................................3 credits

**Computer Systems Maintenance**

This course is an introduction to computer hardware and software maintenance and troubleshooting. This course will focus on typical problem scenarios, diagnostics, procedures and solutions.

**HCS 208** .................................................................3 credits

**Introduction to Health Care Industry Terms**

This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems.

**HCS 235** .................................................................3 credits

**Health Care Delivery in the U.S.**

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
CIS 298 ................................................................. 3 credits

Healthcare IT
This course is an introduction to the technical knowledge and IT skills applied to health care business operations. This course will focus on the application of regulatory requirements, medical business and IT operations, and IT security. In addition, students will also explore medical business and technology applications in health care.

Information Systems Security Certificate Program

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Information Systems Security Certificate (CERT/ISS) is available to undergraduate students not enrolled in the BSIT program who wish to expand their technical knowledge using software tools for Information Systems Security. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-iss.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the ISS
CIS 319 ~ ................................................................. 3 credits
Computers & Information Processing

CMGT 442 ~ ................................................................. 3 credits
Information Systems Risk Management

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the ISS
All applicants to this certificate program are expected to meet the following additional admission requirements:

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must be currently employed or have access to a work environment.

Certificate Completion Requirements for the ISS
Certificate completion requirements for the CERT/ISS program are as follows:

- Completion of a minimum of 24 credits.
- A minimum program grade point average (GPA) of 2.0.
- All students must complete the minimum number of credits required by their certificate program.

Residency Requirements and Course Waivers for the ISS
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

This course introduces cryptography and encryption concepts and how they are applied in real-world situations in order to implement strong and reliable security safeguards. This course will survey the various cryptography and encryption methods used in today’s information technology and communications environments as well as to review the considerations for selecting commercial products that support encryption technology.

**Network+ Technologies Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This program is designed to help students become competent in the areas of managing, maintaining, troubleshooting, installing, and configuring basic network infrastructure. The program covers local area networks (LAN), wireless networking systems (W-LAN), and wide area networks (WAN).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/netplus.

**Required Course of Study for the NETPLUS**

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Note: Although the completion of courses for this certificate program does not result in Network + certification, there are course materials available including simulations, hands-on exercises, and video lectures which the student can use for certification preparation if they choose to take the certification exam.

**Additional Admission Requirements for the NETPLUS**

All applicants are expected to meet the following admissions requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• No work experience is required.

Certificate Completion Requirements for the NETPLUS
• Completion of a minimum of 9 credits of the required course of study to meet University residency requirements.
• All students must meet residency requirements as set by the Dean for each Certificate program. Students who have completed the courses required for this certificate program as part of a University of Phoenix degree program are not eligible to enroll in and earn this certificate.
• A minimum grade point average (GPA) of 2.0.
• The certificate awarded for this program will read as:
  Network+ Technologies

Residency Requirements and Course Waivers for the NETPLUS
Students may not waive any credits in this certificate program. The following courses in the required course of study may not be waived: NTC 245, NTC 247 and NTC 249

Course Descriptions for the NETPLUS

NTC 245 ................................................................................... 3 credits
Foundation of Local Area Networks
This foundational course covers local area network topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

NTC 247 .................................................................................. 3 credits
Wireless Networking Concepts
This course explores concepts of wireless networking systems, including wireless networking and topologies; hardware protocols; hardware selection and implementation; interfaces with local-area network (LAN), metropolitan area network (MAN), and wide-area network (WAN) networks; basic wireless security; and network integration concepts.

NTC 249 ................................................................................... 3 credits
Wide Area Networking Concepts
This course covers Wide Area Networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

Cisco Networking Fundamentals
The following Cisco Networking Fundamentals (CCNA) certificate may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Cisco Networking Fundamentals certificate offers coursework designed to help students acquire the knowledge to install, configure and operate Local Area Network (LAN), Wide Area Network (WAN) as well as routing and switching implementations and management. This certificate covers the body of knowledge for the Cisco® Certified Network Associate (CCNA®) exam in preparing the student to install and configure Cisco® switches and routers in multiprotocol internetworks using LAN and WAN interfaces.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Preferred Sequence for the CCNA

CIT 245 .................................................................................. 3 credits
Local Area Networking Fundamentals

CIT 249 .................................................................................. 3 credits
Wide Area Network Environment

CIT 274 .................................................................................. 3 credits
Routing and Switching Implementations

CIT 276 .................................................................................. 3 credits
Routing and Switching Management

The University reserves the right to modify the required course of study.

**Note: Students enrolled in this certificate program are ineligible to receive Federal Student Financial Aid.

Additional Admission Requirements for the CCNA
All applicants are expected to meet the following admissions requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• No work experience is required.

Certificate Completion Requirements for the CCNA
• Completion of 12 credits in the Required Course of Study
• All students must meet residency requirements as set by the Dean for each Certificate program.
• A minimum grade point average (GPA) of 2.0.
The certificate awarded for this program will read as:
Cisco Networking Fundamentals

Residency Requirements and Course Waivers for the CCNA
- Students may not waive any credits in this certificate program.
- The following courses in the required course of study may not be waived: CIT 245, CIT 249, CIT 274, CIT 276

Course Descriptions for the CCNA

CIT 245 ...................................................................................... 3 credits
Local Area Networking Fundamentals
This course addresses the fundamentals of local area networking (LAN). Students will learn about Ethernet LANs, wireless LANs (WLAN), and LAN connections. This will include securing the network, transmission control protocol / internet protocol (TCP/IP), troubleshooting switches, WLAN security, and constructing a network address scheme.

CIT 249 ...................................................................................... 3 credits
Wide Area Network Environment
This course provides students with the knowledge and skills necessary to implement and support a small to medium size network using wide area networking technologies. This course covers wide area networks (WAN) connections, network environment management, small network implementation, and medium sized switched network construction. It includes enabling the internet connection, router startup and configuration, and securing the expanded network.

CIT 274 ..................................................................................... 3 credits
Routing and Switching Implementations
This course provides students with the knowledge and skills necessary to design, build, and maintain routing and switching technologies. Instruction covers constructing medium-sized routed networks, implementing Single-Area Open Shortest Path First (OSPF) routing protocol, Enhanced Interior Gateway Routing Protocol (EIGRP), and applying Access Control Lists (ACLs). It includes a review of routing operations and implementing Variable Length Subnet Masking (VLSM).

CIT 276 ..................................................................................... 3 credits
Routing and Switching Management
This course provides the knowledge and skills necessary for routing and switching management. The course covers address space management and local area network (LAN) extension into a wide area network (WAN). This includes network address translation (NAT) and port address translation (PAT), virtual private network (VPN) solutions and frame relay connectivity.

Certificate Awards
Upon completion of all courses in a certificate program and submission of the Request for Certificate form, a certificate of completion and a certificate posted transcript will be processed.

Accreditation and Affiliations
The following agencies have supported the development of the certificate program that relates to their specific field:
- The Society for Human Resource Management (SHRM)
- Project Management Institute (PMI), Globally Registered Education Provider (R.E.P)
- Call Center Industry Advisory Council (CIAC)
