UNIVERSITY OF PHOENIX
ONLINE
ACADEMIC CATALOG
Volume 47
July 1, 2013 through June 30, 2014 catalog
With Updates Added:
October 1, 2013
(see addenda pages for a summary of updates added by month)

“As we move to meet the educational needs of working adults in a mobile society, our conception of the university must extend beyond place and embrace process. An adult university cannot be campus bound, rather its borders must be defined by the lives of its students.”

Dr. John G. Sperling
Founder and
Chairman of the
Board
Information contained in this catalog is subject to change at the discretion of the University of Phoenix without prior notification. Unless specifically stated otherwise in a particular Catalog policy, in the event of any inconsistency or conflict between the information contained in this catalog and any other material, the information contained in the catalog shall take precedence.

The University of Phoenix is not responsible for information or claims made by individuals not affiliated with the University that is contrary to University of Phoenix published material.

Annual Security Report Notice

The University of Phoenix annual security report includes statistics for the previous three years concerning reported crimes that occurred on campus, in certain off-campus buildings or property owned or controlled by the University, and on public property within, or immediately adjacent to and accessible from, the campus. The report also includes the sex offender registry, institutional policies concerning alcohol and drug use, crime prevention, the reporting of crimes, sexual assault, and other related matters. You can obtain a copy of this report by contacting your local Campus Security Authority or by accessing the following Web site: http://www.phoenix.edu/safety.

University of Phoenix is authorized by the Washington Higher Education Coordinating Board (HECB) and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree Authorization Act. This authorization is subject to periodic review and authorizes University of Phoenix to advertise and recruit for the following degree programs offered via distance learning: Associate of Arts; Bachelor of Science in Business; Bachelor of Science in Accounting; Bachelor of Science in Communication; Bachelor of Science in Criminal Justice Administration; Bachelor of Science in Health Administration; Bachelor of Science in Health Administration/Health Information Systems; Bachelor of Science in Health Administration/Long Term Care; Bachelor of Science in Human Services; Bachelor of Science in Human Services/Management; Bachelor of Science in Information Technology; Bachelor of Science in Management; Bachelor of Science in Nursing; Bachelor of Science in Organizational Security and Management; Bachelor of Science in Psychology; Master of Arts in Education/Administration and Supervision; Master of Arts in Education/Adult Education & Training; Master of Arts in Education/Curriculum & Instruction; Master of Arts in Education/Curriculum & Instruction/Computer Education; Master of Arts in Education/Curriculum & Instruction/English and Language Arts Education; Master of Arts in Education/Curriculum & Instruction/English as a Second Language; Master of Arts in Education/Curriculum & Instruction/Mathematics Education; Master of Arts in Education/Early Childhood Education; Master of Arts in Education/Elementary Teacher Education; Master of Arts in Education/Secondary Teacher Education; Master of Arts in Education/Special Education; Master of Arts in Education/Teacher Leadership; Master of Business Administration; Master of Health Administration; Master of Health Administration/Education; Master of Health Administration/Gerontology; Master of Health Administration/Informatics; Master of Information Systems; Master of Public Administration; Master of Management; Master of Management/Human Resources Management; Master of Management/Public Administration; Master of Science in Accountancy; Master of Science in Administration of Justice and Security; Master of Science in Nursing; Master of Science in Nursing/Health Care Education; Master of Science in Nursing/Informatics; Master of Science in Nursing/Master of Business Administration/Health Care Management; Master of Science in Nursing/Master of Health Administration; Master of Science in Nursing/Nurse Practitioner; Master of Science in Psychology; Doctor of Business Administration; Doctor of Education in Educational Leadership; Doctor of Education in Educational Leadership/Curriculum and Instruction; Doctor of Education in Educational Leadership/Educational Technology; Doctor of Health Administration; Doctor of Management in Organizational Leadership; Doctor of Management in Organizational Leadership/Information Systems and Technology; Doctor of Philosophy in Higher Education Administration; and Doctor of Philosophy in Industrial/Organizational Psychology. Authorization by the HECB does not carry with it an endorsement by the board of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the HECB at P.O. Box 43430, Olympia, WA 98504-3430.

For the Master of Arts in Education/Early Childhood Education; Master of Arts in Education/Elementary Teacher Education; Master of Arts in Education/Secondary Teacher Education; and Master of Arts in Education/Special Education programs: Eligibility for initial educator certification in Washington is based on completion of a state approved educator preparation program. This program is approved in Arizona and is authorized for field placements in Washington by the Professional Educators Standards Board. Even though you may be residing in Washington while in this program, your application for educator certification
in Washington will be processed as an out-of-state application. Go to http://pathway.pesb.wa.gov/out of state for more information. Teachers are advised to contact their individual school districts as to whether this program may qualify for teacher advancement.

For the Associate of Arts/Elementary Education; Master of Arts in Education/Adult Education & Training; Master of Arts in Education/Teacher Leadership; Doctor of Education in Educational Leadership; Doctor of Education in Educational Leadership/Curriculum & Instruction; Doctor of Education in Educational Leadership/Educational Technology; and Doctor of Philosophy in Higher Education Administration programs:

This program is not intended to lead to teacher certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

University of Phoenix is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

University of Phoenix is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Registration does not mean that credits earned at the institution can be transferred to all other institutions. Minnesota residents may enroll in the following programs: Associate of Arts/Concentration in General Studies, Associate of Arts/Concentration in Communications, Associate of Arts/Concentration in Accounting, Associate of Arts/Concentration in Hospitality, Travel and Tourism, Associate of Arts/Concentration in Foundations of Business, Associate of Arts/Concentration in Accounting, Associate of Arts/Concentration in Hospitality, Travel and Tourism, Associate of Arts/Concentration in Human Services Management, Associate of Arts in Psychology, Associate of Arts/Concentration in Health Care Administration, Associate of Arts/Concentration in Health Care Administration/Medical Records, Associate of Arts/Concentration in Criminal Justice, Associate of Arts/Concentration in Information Technology, Associate of Arts/Concentration in Information Technology/Networking, Associate of Arts/Concentration in Information Technology/Programming, Associate of Arts/Concentration in Information Technology/Web Design, Associate of Arts/Concentration in Information Technology/Support, Bachelor of Science in Communication, Bachelor of Arts in English, Bachelor of Science in Environmental Science, Bachelor of Science in Psychology, Bachelor of Science in Health Administration, Bachelor of Science in Criminal Justice Administration, Bachelor of Science in Organizational Security and Management, The Bachelor of Science in Business, Bachelor of Science in Management, Bachelor of Science in Management Concentration in Manufacturing Sector, Bachelor of Science in Accounting, Bachelor of Science in Information Technology, Bachelor of Science in Nursing, Master of Science in Psychology, Master of Health Administration, Master of Health Administration Bridge, Master of Health Administration/Education, Master of Health Administration/Education Bridge, Master of Health Administration/Gerontology, Master of Health Administration/Gerontology Bridge, Master of Health Administration/Informatics, Master of Health Administration/Informatics Bridge, Master of Science/Administration of Justice and Security, Master of Science/Administration of Justice and Security Bridge, Master of Business Administration, Master of Public Administration, Master of Management, Master of Science in Accountancy, Master of Science in Nursing, Master of Science in Nursing/Specialization in Nursing/Health Care Administration, Master of Science in Nursing/Specialization in Informatics, Master of Science in Nursing and Master of Health Administration, Doctor of Management in Organizational Leadership, Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology, Doctor of Health Administration, Visual Communication Certificate, Information Systems Security Certificate, APLUS Fundamentals Certificate, Information Systems Security Minor, Multimedia and Visual Communication Minor, Graduate Health Care Informatics Certificate, Gerontology Health Care Certificate, Graduate Certificate in Human Resources Management, Graduate Accounting Certificate, Graduate Marketing Certificate
ADDENDUM - SUMMARY OF POLICY UPDATES ADDED TO THE CATALOG ON OCTOBER 1, 2013

GENERAL POLICY UPDATES

• The Course Statuses section was updated. (see ACADEMIC POLICIES)
• The Grading Procedures section was updated. (see ACADEMIC POLICIES)
• The Consumer Information section was updated. (see CONSUMER INFORMATION)
• The Student Organization section was added. (see STUDENTS’ RIGHTS AND RESPONSIBILITIES)
• The Student Code of Conduct section was updated. (see STUDENTS’ RIGHTS AND RESPONSIBILITIES)

CAMPUS POLICY UPDATES

• The Tuition and Fees section was updated. (see TUITION AND FEES)
• The Admission Requirements section was updated. (see UNDERGRADUATE PROGRAMS)
• The Admission Requirements section was updated. (see GRADUATE PROGRAMS)
• The Admission Requirements section was updated. (see PROFESSIONAL PROGRAMS)
• The Admission Requirements section was updated. (see SCHOOL OF ADVANCED STUDIES)
• The Admission Requirements section was updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF EDUCATION)
• The Admission Requirements section was updated. (see GRADUATE PROGRAMS - COLLEGE OF EDUCATION)
• The General Education for Arkansas students sections were updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF HUMANITIES AND SCIENCES)
• The General Education for Arkansas students sections were updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF CRIMINAL JUSTICE AND SECURITY)
• The Field Experience for the BSCJA section was updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF CRIMINAL JUSTICE AND SECURITY)
• The General Education for Arkansas students sections were updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF SOCIAL SCIENCES)
• The General Education for Arkansas students sections were updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The General Education for Arkansas students sections were updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF HEALTH SCIENCES AND NURSING)
• The General Education for Arkansas students sections were updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY)

PROGRAM POLICY UPDATES

The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states.

• The Residency Requirement and Course Waivers section was updated for the DM/IST program. (see SCHOOL OF ADVANCED STUDIES)
• The program description was updated for the G-MDT certificate. (see PROFESSIONAL PROGRAMS)
• The Course Descriptions for the LPN/LVN to BSN section was updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF HEALTH SCIENCES AND NURSING)
• The Additional Admission Requirements for the LPN/LVN to BSN section was updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF HEALTH SCIENCES AND NURSING)
• The Degree Requirements for the BSED section was updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF EDUCATION)
• The General Information for the AAACCT section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The General Information for the AAACCTC section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The General Information for the AARETM section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The General Information for the AARETMC section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The General Information for the AABFN section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The General Information for the BSB section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Degree Requirements for the AAACCT section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Degree Requirements for the AAACCTC section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Degree Requirements for the AARETM section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Degree Requirements for the AARETMC section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Degree Requirements for the AABFN section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Degree Requirements for the BSB section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Academic Progression Requirements for the AAACCT section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Academic Progression Requirements for the AAACCTC section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Academic Progression Requirements for the AARETM section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Academic Progression Requirements for the AARETMC section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Academic Progression Requirements for the AABFN section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Academic Progression Requirements for the BSB section was updated. (see UNDERGRADUATE PROGRAMS - UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS)
• The Field Experience for BSHS section was updated. (see UNDERGRADUATE PROGRAMS- COLLEGE OF SOCIAL SCIENCES)
• The Additional Admission Requirements for the DBA section was updated. (see SCHOOL OF ADVANCED STUDIES)

• The General Education for the AAIT/WA section was updated. (see UNDERGRADUATE PROGRAMS - COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY)

• The Program Requirements for the MAED/AET were updated. (see GRADUATE PROGRAMS - COLLEGE OF EDUCATION)

• The Program Category Requirements and Course Selections for the MAED/TED-E were updated. (see GRADUATE PROGRAMS - COLLEGE OF EDUCATION)

• The Additional Admission Requirements for the MAED/CI section was updated. (see GRADUATE PROGRAMS - COLLEGE OF EDUCATION)

• The Academic Progression Requirements section for the MAED/TED-E and MAED/TED-S (Indiana) was updated. (see GRADUATE PROGRAMS - COLLEGE OF EDUCATION)

• The Candidacy Status section for the MAED/TED-E and MAED/TED-S (Indiana) was updated. (see GRADUATE PROGRAMS - COLLEGE OF EDUCATION)

• The Candidacy Status section for the CERT/T2T-E and CERT/T2T-S (Indiana) was updated. (see PROFESSIONAL PROGRAMS)

• The Additional Admission Requirements section for the CERT/T2T-E and CERT/T2T-S (Indiana) was updated. (see PROFESSIONAL PROGRAMS)

• The Additional Admission Requirements section for the CERT/CTEL was updated. (see PROFESSIONAL PROGRAMS)

Beginnings -- A Brief History

In 1976, the leading edge of the Baby Boom generation was just turning 30. That same year saw the introduction of the first personal computer, the Apple I -- an event that signaled the birth of a new economic system in which intellectual capital would eventually supplant industrial might as the dominant economic force. These milestones marked the beginning of a sea of change in higher education, though many (perhaps even most) within that system did not recognize it at the time.

Considered together, these phenomena suggested that the jobs that would make up the workforce of the future were only just beginning to be created or imagined. In order to fill those jobs, the bulk of the new workforce would require higher-level knowledge and skills than those needed in a manufacturing economy. At the same time, the largest-ever age cohort of the population, adult learners, would be going through the stages of life during which they would be most affected by the coming economic dislocation and would need advanced education to adapt to these changes.

It was in this historical context in 1976 that Dr. John Sperling, a Cambridge-educated economist and professor-turned-entrepreneur, founded University of Phoenix. Sperling anticipated the confluence of technological, economic, and demographic forces that would in a very short time herald the return of ever larger numbers of adult learners to formal higher education.

In the early 1970s, at San Jose State University in San Jose, California, Sperling and several associates conducted field-based research in adult education. The focus of the research was to explore teaching/learning systems for the delivery of educational programs and services to adult learners who wished to complete or further their education in ways that complemented both their experience and current professional responsibilities. At that time colleges and universities were organized primarily around serving the needs of the 18-22-year-old undergraduate student. That is not all that is surprising, given that the large majority of those enrolled were residential students of traditional college age, just out of high school. According to Sperling adult learners were invisible on the traditional campus and were treated as second-class citizens.

Other than holding classes at night (and many universities did not even do this), no efforts were made to accommodate their needs. No university offices or bookstores were open at night. Students had to leave work during the day to enroll, register for classes, buy books or consult with their instructors and advisors. Classes were held two or three nights per week and parking was at the periphery of a large campus. The consequence, according to Dr. Sperling was that most adult learners were unable to finish a four-year program in less than eight years, or a two-year program in less than four years (Tucker, 1996, p. 5).

Sperling’s research convinced him not only that these underserved learners were interested in furthering their educational goals, but also that this group differed from their more traditional counterparts in significant ways. He saw a growing need for institutions that were sensitive to and designed around the learning characteristics and life situations of a different kind of learner population. He suggested ways for institutions to pioneer new approaches to curricular and program design, teaching methods, and student services. These beliefs eventually resulted in the creation of University of Phoenix, and they continue to this day to inspire the University’s mission, purpose, and strategies.

As an institution, University of Phoenix is unique in its single-minded commitment to the educational needs of non-traditional students, who in fact today make up the majority (73 percent) of all college enrollees. This focus informs the University’s teaching and learning model approach to designing and providing student services, and academic and administrative structure. It also guides the institution as it plans and prepares to meet the needs of the next generation of learners.

Over the last three and a half decades, the University of Phoenix has been cause-driven working to build an institution with the agility to address directly the shifting economic and academic challenges that many students face. Dr. Sperling’s predictions concerning the innovations higher education would be required to make have come to pass. Today roughly 45 percent of all college students work at least part-time and approximately one quarter of all students have dependent children. The educational tenets set forth by Dr. Sperling in 1976 now apply to the majority of college students in the United States.

The University’s growth has been fueled by constant innovation, and ongoing efforts to improve the learning experience through advanced technology. The University has grown from a degree-completion institution serving an audience of mostly middle managers wishing to complete their education and excel in the workplace, to a comprehensive university serving students of all ages from the associate through the doctoral degree levels.

Official School Colors

University of Phoenix Official School Colors are University of Phoenix Red and University of Phoenix Platinum.

These are custom colors and proprietary to the University.

Ownership Information

University of Phoenix, Inc. is a wholly-owned subsidiary of Apollo Group, Inc. (the “Parent”). The Parent’s voting stock (Class B Common Stock) is 100 percent held by management. The Parent has one class of non-voting stock (Class A Common Stock) which is publicly traded on the NASDAQ Stock Exchange under the symbol “APOL”. The Parent files quarterly and annual financial statements with the Securities and Exchange Commission and these are available to the general public. The University’s central administration offices are located in Phoenix, Arizona.

Mission

The Mission of University of Phoenix is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities.

Purpose

1. To facilitate cognitive and affective student learning-knowledge, skills, and values - and to promote use of that knowledge in the student’s workplace.
2. To develop competence in communication, critical thinking, collaboration, and information utilization, together with a commitment to lifelong learning for enhancement of students’ opportunities for career success.
3. To provide instruction that bridges the gap between theory and practice through faculty members who bring to their classroom not only advanced academic preparation, but also the skills that come from the current practice of their professions.

4. To provide General Education and foundational instruction and services that prepare students to engage in a variety of university curricula.

5. To use technology to create effective modes and means of instruction that expand access to learning resources and that enhance collaboration and communication for improved student learning.

6. To assess student learning and use assessment data to improve the teaching/learning system, curriculum, instruction, learning resources, counseling and student services.

7. To be organized as a for-profit institution in order to foster a spirit of innovation that focuses on providing academic quality, service, excellence, and convenience to the working student.

8. To generate the financial resources necessary to support the University’s mission.

Accreditation and Affiliations

Regional Accreditation

University of Phoenix is accredited by The Higher Learning Commission and is a member of the North Central Association. University of Phoenix was placed on Notice by The Higher Learning Commission, effective June 27, 2013. Notice is a Commission sanction indicating that an institution is pursuing a course of action that, if continued, could lead it to be out of compliance with one or more Criteria for Accreditation. An institution on Notice remains accredited. At the end of the Notice period, The Higher Learning Commission Board of Trustees may remove the sanction, place the institution on Probation if the identified concerns have not been addressed, or take other action. For additional information, contact The Higher Learning Commission, ncahlc.org

College of Nursing Programs

The Bachelor of Science in Nursing and Master of Science in Nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE).

CCNE
One Dupont Circle, NW, Suite 530
Washington, DC 20036
(202) 887-6791
http://www.aacn.nche.edu/accreditation/

College of Education and Education Programs

The Master of Arts in Education program with options in Elementary Teacher Education and Secondary Teacher Education has been approved for initial accreditation by the Teacher Education Accreditation Council (TEAC) for a period of five years, from December 20, 2007 to December 20, 2012.

Teacher Education Accreditation Council (TEAC)
One Dupont Circle NW, Ste. 320
Washington, DC 20036-0110
202.466.7236
tead.org

In addition, the College of Education has approval for education programs through the following state agencies:
- Arizona Department of Education
- California Commission on Teacher Credentialing
- Colorado Department of Education
- Hawaii Teacher Standards Board
- Idaho State Department of Education
- Indiana Department of Education
- Missouri Department of Elementary and Secondary Education
- New Mexico Public Education Department
- Nevada Department of Education
- Oregon Teacher Standards and Practices Commission
- Puerto Rico Department of Education
- Texas Education Agency
- Utah State Office of Education

Programs vary by state. Not all programs are approved in all states.
The University also maintains voluntary memberships with numerous educational organizations, including the American Council on Education, the Association of American Colleges, the American Association for Adult and Continuing Education, the American Association for Higher Education, National Association of Schools of Public Affairs and Administration, the Council for Adult and Experiential Learning, the College and University Personnel Association, the Arizona Association of Collegiate Registrars and Admissions Officers, the American Association of Collegiate Registrars and Admissions Officers, the Independent Colleges and Universities of Arizona, the American Association of Colleges of Nursing, National League for Nursing, the National Board for Certified Counselors, the National Association for Foreign Student Admissions, Association of International Educators, the National Association of Veterans Program Administrators, the Service Members Opportunity College, and Defense Activity for Non–Traditional Support. Additionally, the University maintains memberships in various professional, program specific organizations.

**Academic Programs**

Undergraduate and graduate programs at University of Phoenix are offered in business and management, nursing and health sciences, education, criminal justice, social sciences, natural sciences, humanities, and information technology. Undergraduate students are required to complete general education requirements that are distributed across traditional liberal arts categories and interdisciplinary components. General Education requirements are described in greater detail in the Undergraduate Programs section of the catalog. Not all programs are offered at all campuses. Specific programs offered are listed later in this catalog.

**Enrollment and Student Profile**

As of the second quarter ending February 28, 2013, University of Phoenix had an enrollment of 300,800 students and had expanded to in excess of 245 campuses and learning centers in 40 U.S. States as well as locations in the District of Columbia and Puerto Rico. Additionally, University of Phoenix offers degree programs globally through its online delivery system.

According to students responding to a registration survey during fiscal year 2012, the average student is in his or her mid-thirties. Gender of entering students is approximately 67 percent female and 33 percent male. Approximately 44 percent of entering students reporting belonged to an ethnic minority.

**University Library**

The University of Phoenix Approach to Library Services

As busy working professionals, our students and faculty members know how difficult it can be to travel to a distant library and match their schedules to library building hours. To accommodate student and faculty needs, University of Phoenix offers its library services online. This online distribution of information is well suited to the needs of today’s “knowledge workers” and offers a functional version of the types of information systems University of Phoenix students and faculty will be expected to use throughout their careers.

The core of our library web site is the University Library, a collection of resources available to all students and faculty at any time and from virtually any location where an Internet connection is available. In addition to our University Library, the library maintains selected links to other worthwhile sites on the web and provides user education and research assistance.

The online distribution of information is not only optimally matched to the needs of working professionals, but also allows for equitable sharing of library resources among students and faculty members at all University of Phoenix learning centers and in our distance education programs. Instead of encountering disparities in library resources between large and small learning centers and between on-campus and online students, University of Phoenix library patrons enjoy access to the same broad spectrum of resources regardless of where and how they attend class.

University of Phoenix provides a comprehensive digital library for students at all locations. For more information, please see your Library Handbook or contact the University Library at library@phoenix.edu.

**What is in the University Library?**

Thousands of scholarly journals and periodicals holding full-text articles relevant to each University of Phoenix degree program are contained in the University Library’s resources. Financial reports on over 10,000 public companies and a variety of directories and other reference publications are also available. In addition, the University Library has a collection of multimedia available, including videos, images, and audio files, on a variety of topics. Many of the resources found in the University Library are commercial products held by the University through license agreements with content providers and are not accessible to the general public like web pages found through an Internet search engine.

**Getting Started with the University Library**

To get started using the University Library, students and faculty members should follow these steps:

- Visit the student and faculty website https://ecampus.phoenix.edu/. This is the same website used to obtain course modules, grades, and other University of Phoenix resources and services.
- After logging into the student and faculty website, select the Library tab and then the University Library link to enter the University Library.
- Select an appropriate resource and begin research.

**Electronic Reserve Readings**

In addition to the University Library resources for research by topic, University Library staff members also maintain Electronic Reserve Readings for individual courses. These pages provide links to materials relevant to the course curriculum. Links to Electronic Reserve Readings, when available, are listed on course pages within eCampus.

**Additional Resources for Help**

- The Library Handbook includes detailed information and helpful tips on conducting research.
- Ask a Librarian is a service found in the University Library that allows users to direct specific reference or research strategy questions to University Library staff.
- Request a Specific Document is a service found in the University Library that allows users to request a document or book that is not available in the University Library. Specific timelines and rules apply to this service.
- View the Research Tutorials is a feature in the University Library that allows users to learn research skills by viewing web-based video tutorials.
- Choose Resources by Subject and Subject Guides on the homepage of the University Library website contain overviews of and information on research recommendations for specific subject areas.
• Search FAQs on the homepage of the University Library contains a searchable form to obtain answers to “Frequently Asked Questions” received by the library.

**How to Contact the University Library**

Student Technical Support 1-877-832-4867
Email library@phoenix.edu

International students and faculty can reach Tech Support at 1-602-387-2222. Callers should identify themselves as international students or faculty and give a call back number. Tech Support will call back to minimize phone charges.

**Current Resources of the University Library**

For a current list of resources in the University Library, please refer to the Library Handbook. Students, staff, and faculty can also view the full listing of the University Library’s resources by clicking the View All Resources Alphabetically link on the University Library homepage.
THE UNIVERSITY’S TEACHING AND LEARNING MODEL

The mission of University of Phoenix is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals. As a result, the University’s teaching and learning model is grounded in the theoretical and empirical literature of learning and cognitive psychology. The University employs best practice from recent education literature, as well as best service practices that enhance the academic experience for students who are new to higher education. This combination increases student retention and successful degree completion.

Active Learning

The model is based first on the assumption that the learner’s active involvement in the learning process is essential to good practice. Thus, in all modalities University of Phoenix classrooms are intended to be dynamic learning spaces. Instructors are expected to serve as facilitators of learning who manage the learning process by engaging learners in a variety of activities (lectures being but one) that lead students to an understanding of course content and the development of academic and professional competence. By involving students in a variety of learning activities, respect is demonstrated for diverse ways of learning and knowing. Interaction and participation in classes and Learning Teams is expected of those students in the bachelor and master degree programs. Students pursuing an associate degree at the Online Campus (excluding AACR & AAPF) are involved in collaborative learning activities, but are not required to participate in formal Learning Teams.

Collaboration

The effectiveness of cooperation and collaboration in enhancing learning is well and widely documented. Structures that encourage and facilitate collaboration are central to the University’s teaching and learning model. Working students frequently come to formal learning activities with greater life and work experience. This means that learners themselves can be invaluable resources in enhancing their own and others’ learning. Traditional pedagogy emphasizes a top-down, vertical transfer of information. Students with rich and varied experience find benefit in instructional practices that encourage collaboration. This adds a robust horizontal dimension to the learning exchange as students teach and learn from one another. Good practice in education capitalizes on this dimension to the students’ advantage.

Emphasis on Application and Relevance

There is wide agreement in the literature that students learn best when bridges are built between new knowledge and the learners’ experience. Practices that encourage reflection and application are based on the recognition that a learner’s experience provides a context through which he or she is more able to construct meaning from new information. It also makes learning relevant to the learners. In University of Phoenix courses, students’ experiences and current circumstances are interwoven with subject matter in class discussions as well as in individual, team and other collaborative assignments. Real-world relevance is critical to basic comprehension as well as to maintaining student interest. Students very often say they are able to apply at work the next day what they learned in class the night before.

University-Wide Learning Goals

The University’s faculty leadership has established five broad learning goals that guide curriculum development, instruction, learning assessment, and program evaluation and improvement. The University Learning Goals are:

1. Professional Competence and Values
2. Critical Thinking and Problem Solving
3. Communication
4. Information Utilization
5. Collaboration

The intent is to help all University graduates attain levels of theoretical and practical disciplinary knowledge appropriate to the levels of degrees or credentials they are earning, while developing competence in essential intellectual and social processes that will enable graduates to practice their professions successfully.

Curriculum

The University’s curriculum is faculty-developed and centrally managed by a team of college staff and instructional designers with objectives and outcomes that are carefully defined. Individual instructors have the responsibility to expand and enhance the basic curriculum by augmenting it with current resources and practices. The curriculum is under continual content and quality review.

Convenience of Time and Place

University of Phoenix classroom programs are offered at times and in places that are convenient to adult learners. Classes are held primarily in the evening and on weekends when learners are most likely to need access. The University’s goal is to make access to programs and services convenient to its student population. Wherever possible, campuses and learning centers are located at strategic locations near major freeways and thoroughfares that permit convenient access.

Access

Access in the 21st Century means many different things. To the student in rural America or the working parent with children at home, access may be possible only through an Internet connection. Those students usually work toward their degrees through the Online Campus or through courses offered via FlexNet®, a combination of classroom and online learning. The University’s goal is to make access to programs and services available to all those who wish to avail themselves of them and to work to completion of a degree program.
Program Format

University of Phoenix is a non-term institution and does not operate according to a traditional academic calendar. New student cohorts can begin at any time. Typically, graduate courses at University of Phoenix meet for six consecutive weeks and undergraduate courses meet for five weeks. Classes meet once per week for four (4) hours. When a course ends, the next course usually begins the following week. This intensive calendar allows students to achieve their educational goals in a more time-efficient manner. The University's low student/faculty ratio and class size that averages 13-15 students facilitate active learning and collaboration and encourage time-on-task. As a rule, bachelor and graduate degree seeking students take only one course at a time. This allows them to focus attention and resources on one subject, a structure that enhances learning and helps students balance ongoing professional and personal responsibilities.

Associate degree students enrolled at the Online Campus (excluding AACR & AAPF) enroll in two courses concurrently for nine consecutive weeks. The longer course length allows students to complete two courses concurrently and keeps the weekly workload at a manageable level.

Learning Teams

In addition to regular course instructional sessions, bachelor's and master's level students meet weekly in Learning Teams. Learning Teams are small groups of three to six students drawn from within the larger cohort. Learning Teams are an essential design element in the University's teaching and learning model through which students develop the ability to collaborate -- an ability expected of employees in information-age organizations and one of the University’s primary learning goals. Due to the unique teaching and learning model and objectives, students enrolled in an associate degree program at the Online Campus (excluding AACR & AAPF) do not participate in Learning Teams, but are encouraged to collaborate and participate in classroom assignments.

All students enrolled in degree programs and/or designated certificate programs using the learning team model must meet learning team attendance policies. Learning teams are required to meet weekly. Teams may meet in person or via teleconference, real-time electronic conferencing, or asynchronous meeting in the classroom team forums. Students must indicate participation in the learning team meetings and/or assignment deliverables. Students are expected to actively participate in the team's activities. Students attending a local campus must acknowledge participation in their learning team each week in the Assignments section of eCampus. At the end of each course, students are given the opportunity to evaluate the contributions of each team member to the accomplishment of team goals.

Faculty

University of Phoenix faculty members are accomplished managers, technology leaders, professionals educators, corporate executives, financial officers, healthcare and human services professionals and leaders in other professional arenas. A listing of faculty may be obtained at each local campus and/or in the appendix pages at the end of this catalog. Current contact information for each campus may be found at http://www.phoenix.edu.

Staff Screening

All external candidates must have a new background check submitted each time they are being considered for a position with the University. The background check must be completed prior to the start date.

Student Technology Recommendations and Competencies

In an effort to assist students with adequate preparation for their course work at the University of Phoenix, technology recommendations and competencies have been established. These recommendations and competencies are in effect for the School of Advanced Studies, School of Business, College of Education, College of Information Systems and Technology, Colleges of Arts and Sciences, College of Nursing, College Extension, and the School of Continuing Education. To that end, students will need to access and use the hardware and software as described below. Additional recommendations and competencies may be required for particular courses/programs. Students using software and hardware other than that recommended must still meet the technology competencies. Please note that due to the rapid rate of change in information technology, hardware and software competencies will be updated on a regular basis. Some courses in the College of Information Systems and Technology may require additional software.

Technology Recommendations

Hardware and Peripherals

You are required to have access to a computer with the following:

- A processor of 2 GHz or faster
- 4GB RAM or greater
- 80GB hard drive or greater
- Cable/DSL connection or better
- Monitor and video card with 1024x768 or greater resolution
- Inkjet or laser printer
- Microphone
- A web camera capable of video web conferencing and web editing software
- A DVD/CD-ROM drive may be needed to install software

Students should review manufacturer’s system requirements for any additional software or devices they plan on using.

Software and Applications

You need access to and competence in the following applications:

- Operating system
  - Microsoft® Windows® 7 or later
  - Mac OS 10.6 or later, with a Microsoft® Windows® partition required for some courses.
- Microsoft® Office 2010 or later for a personal computer (PC), Microsoft® Office 2011 for a Mac.
- Microsoft® Access (for selected courses)
- Microsoft® Project (for selected courses)
- A current Internet Browser such as Microsoft® Internet Explorer, Mozilla® Firefox, Google® Chrome, Apple® Safari 5.0
- Adobe® Reader 9.0 or later
• Adobe Flash plug-in 10.0 or later
• System is enabled to allow installation of browser plug-ins as required
• Local administrative privileges to Operating System may be required
• A current anti-virus application (updated regularly)
• E-mail address
• Internet service provider (ISP) account with broadband access

For the College of Information Systems and Technology, access to additional software is required. Please look for updated software requirements on your resource page. The following software is currently used:

University of Phoenix provides access to the following software through the student website for specific courses:

• Microsoft® Visual Studio.NET
• Microsoft® Visio
• Microsoft® SQL Server
• Red Hat® Enterprise LINUX®
• Adobe® Flash Professional
• Adobe® Dreamweaver
• Adobe® Photoshop
• Adobe® Acrobat Standard
• Autodesk 3ds Max

You will need access to the following Microsoft®/Windows®/free applications for specific courses:

• Alice Software
• Citrix® Online Plug-in (latest version)
• JAVA™ Runtime Environment, Java™ Development Kit (JDK)
• VisualLogic

For the Master of Science in Nursing/Family Nurse Practitioner and the Post Masters Family Nurse Practitioner programs, the University requires the following:

• Handheld computing devices (i.e. PDA, Smartphone, Ipad)

The College of Information Systems and Technology may require access to additional software. Software currently provided by the University on the student website is subject to change and may require students to purchase or obtain access to the software. Please look for updated software requirements on your student website.

Students must have access to a Mac computer to complete iOS mobile coursework or the latest Windows operating system to complete Windows mobile coursework. These courses are options in the BSIT/Mobile Development concentration and the Advanced Mobile Development Certificate and as individual courses as electives.

The School of Advanced Studies requires doctoral learners to bring a laptop computer to residencies.

All trademarks are the property of their respective owners.

The technology skills and the hardware and software requirements may be updated at any time because of the rapid rate of change in information technology.

Technology Competencies

Students attending the University of Phoenix are expected to have the ability to complete the following activities:

• Access course and program material on the Web.
• Correspond with University of Phoenix staff, students, and faculty using e-mail and the Web.
• Complete, send, and receive assignments to faculty or other students using e-mail and attachments/files.
• Read/print e-mail and attachments/files from students, staff, and faculty.
• Use the University of Phoenix Electronic Library also known as the Learning Resource Center (LRC) and/or Internet for research and completion of course assignments.
• Prepare and conduct presentations in the classroom using presentation equipment.
• Use the appropriate software for the course. (The University uses as standards Microsoft® Office products including MS® Word, MS® Project, MS® Excel, MS® Power Point, etc.)
• Use CD ROMs when required as part of course assignments.
• Use an appropriate anti-virus application to insure the files transmitted and received are virus free.

eCampus: Student and Faculty Portal

eCampus is a secure multifunctional electronic gateway to student services, the University Library, class schedules, course materials, the electronic class environment, assignment feedback and grade reports, as well as transcripts. eCampus is accessible 24/7 and requires no special software. Students can login to eCampus from any computer and Internet Service Provider. Student resources on eCampus include the University Library, eBooks, Media Library, Center for Writing Excellence, Center for Mathematics Excellence, student workshops, Life Resource Center, and Phoenix Career Services.

When students are admitted to a program, they are provided with all the information needed to connect to eCampus. Each student's eCampus login credentials are unique; students must not share their login credentials with anyone.

University of Phoenix students attend class on-campus, online, or in a hybrid modality known as FlexNet®. Regardless of modality, all students use the same materials for a specific course, have access to all student resources available on eCampus, and turn in assignments by accessing assignment links on eCampus.

Discussions and participation during online class weeks are asynchronous, so there is no need to be online at a specific time during each online class week. Class discussions are private, limited to members of the class.

University of Phoenix authorizes Directors of Academic Affairs, Campus College Chairs, and certain university administrators as well as certain faculty to review submissions to the electronic class environment and to assignment links to assist in the resolution of grade disputes, grievances, and charges of academic dishonesty, as well as to confirm and/or investigate other academic-related issues as necessary.

UNIVERSITY POLICIES

Calendar

The educational mission of the University of Phoenix is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. A student could begin a degree program in virtually any month of the year. This calendar allows the adult student to balance the demands of career, family, and education.

Students qualifying for financial aid may receive a new award each academic year. An academic year is defined as the period of time in which a student completes at least 24 credit hours and 30 weeks of instructional time. Therefore, students may have their eligibility assessed for grants and/or loans several times during their program of study. The average processing time for financial aid is 90 days. Students should reapply for financial aid prior to the start of each new academic year.

Course Cancellation

The University of Phoenix may be required to cancel courses or programs when necessary. In addition, courses or programs may not begin on their scheduled start dates in the event of certain circumstances, such as faculty unavailability or insufficient enrollment. In such situations, the University will work with students to provide them with the opportunity to reschedule or to transfer to a comparable University course or program if available. Any payments made for canceled courses that have not started or are currently in process will be refunded or applied to another University course or program. All attempts will be made to address such cancellations with registered students as early as possible.

Directed Study

Under certain circumstances students may need to complete a course via directed study. Students should contact their campus for information about availability, requirements, or additional fees that may apply. A maximum of twelve credits completed via directed study may be applied to degree requirements.

Concurrent Enrollment

Because of the intensive nature of the University’s courses, students are not encouraged to concurrently enroll in courses at the University of Phoenix or to enroll in courses at other institutions while enrolled in University courses. However, students are given the opportunity to concurrently enroll in a limited number of courses. Under no circumstances may an associate degree student enrolled at the Online Campus (excluding AACR & AAPF) be concurrently enrolled in more than three (3) courses at any given time. Concurrent enrollment in a third course is prohibited for new students in the first two blocks. Enrollment is considered from the start date of any course through the end date of the course. Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence. Under no circumstances may an undergraduate or graduate student be concurrently enrolled in more than two (2) courses at any given time. Concurrent enrollment is prohibited for new students in the first two courses of any University of Phoenix program. Enrollment is considered from the start date of any course through the end date of the course. Under no circumstances may BSN clinical nursing courses be taken concurrently with any other courses. Courses taken concurrently with other institutions will not be limited.

Dual Enrollment

Any student planning to complete both an associate of arts degree and a baccalaureate degree must complete all 60 required credits of the associates degree and meet admission requirements for their
chosen degree before enrolling in any University baccalaureate degree program. There is no dual enrollment between Degree Seeking Students from University of Phoenix and Online Associate programs with the exception of AAPF.

**Multiple University Degrees**

Students may earn additional undergraduate or additional graduate degrees from the University of Phoenix. These students are treated the same as if they held a degree from another regionally accredited, or approved nationally, accredited institution and must meet residency requirements toward the additional degree. The following requirements must be met to complete degree programs:

- Students must complete an application for each program. (Another application fee is not required).
- Only one degree in a specific discipline may be earned (i.e. only one AA degree, MBA degree, or one BSB degree may be earned, but additional specializations within those degrees may be earned). In most cases additional MAED degrees may be earned due to the unique specializations. Students may not earn both an MAED/TED-E & MAED/TED-S.
- The required course of study for each program must be completed as approved by the University. Residency must be met for each degree. Graduate students must complete a minimum of 18 credits toward an additional degree as outlined by each College. Undergraduate students must complete a minimum of 30 unique credits of the additional degree’s required course of study in order to meet residency. A student holding one University of Phoenix undergraduate degree (e.g. BSB) may earn a different degree (e.g. BSIT) by applying the credits earned from the first degree toward the additional degree; however, students must still meet all additional residency requirements (30 credits), along with the general education and minimum credit requirements in effect for the additional degree at the time of enrollment.
- Students must successfully complete any project required for each program.
- A diploma application must be completed for each program. Students may earn only one certificate per program (i.e. one HRM, Mediation, PM, etc).

**Guidelines for Additional Degrees by College**

**School of Business- Graduate**

- Students who have earned a graduate degree in Business or Management may not receive a certificate or concentration in the same area of focus. Example: a student may not earn an MBA/PM and a PM certificate; however, students who have completed a certificate may return to receive an MBA degree with a concentration in the same area as the completed certificate or another approved concentration.

**School of Business- Undergraduate**

- Students who have earned an undergraduate degree in Bachelor of Science in Business may not receive a certificate or concentration in the same area of focus. Example: a student may not earn a BSB/PM and a PM certificate; however, students who have completed a certificate may return to receive a Bachelor of Science (BSB) degree with a concentration in the same area as the completed certificate or another approved concentration.

**College of Education**

- Students who earn a MAED/TED-E cannot earn a second degree with MAED/TED-S and vice versa.

**College of Health Sciences and Nursing**

- Students who have earned an undergraduate degree in Bachelor of Science in Health Administration may not receive a certificate in the same area of focus. Example: a student may not earn a BSHA/HM and a HM certificate; however, students who have completed a certificate may return to receive a Bachelor of Science in Health Administration (BSHA) Degree with a concentration in the same area as the completed certificate or another approved concentration.
- Students who have earned a graduate degree in Health Administration (MHA) may not receive a certificate in the same area of focus. Example: a student may not earn an MHA/GER degree and a GER certificate; however, students who have completed a certificate may return to receive a Master of Health Administration (MHA) degree with a concentration in the same area as the completed certificate or another approved concentration.
- Students may earn only one MSN degree at University of Phoenix. Students who have completed an MSN degree with University of Phoenix who wish to complete coursework in Health Care Informatics, Nursing/Health Care Education, and/or Family Nurse Practitioner are encouraged to enroll in one of the university’s graduate level certificate programs.

**College of Social Sciences**

- Students who have earned an undergraduate degree in Bachelor of Science in Human Services may not receive a certificate in the same area of focus. Example: a student may not earn a BSHS/FCS and a FCS certificate; however, students who have completed a certificate may return to receive a Bachelor of Science in Human Services (BSHS) Degree with a concentration in the same area as the completed certificate or another approved concentration. Students may only complete one certificate from the list below prior to enrolling in the BSHS program: CERT/ADD, CERT/FCS, CERT/GER, CERT/HSM.

**College of Criminal Justice and Security**

- Students who are currently enrolled in or have completed the BS/OSM degree program are not eligible to earn an undergraduate certificate in Global and Homeland Security, Organizational Security, or Security Administration.
- Students who have completed a certificate in Global and Homeland Security, Organizational Security, or Security Administration and who later enroll in the BS/OSM degree program may apply a maximum of one certificate’s coursework towards the BS/OSM degree requirements. The certificate must be completed prior to enrolling in the BS/OSM degree program.
- Students may complete a maximum of two undergraduate certificates.

**School of Advanced Studies**

- Students may not complete more than one program from the School of Advanced Studies.

**Maximum Credit Load**

Undergraduate students may earn a maximum of 39 credits in a twelve (12) month period.

Graduate students may earn a maximum of 33 credits in a twelve (12) month period.

Credits attempted and earned beyond the maximum allowable limits will be transcripted but will not apply toward degree completion requirements. Courses taken concurrently at other institutions will not be counted towards this total and will not be limited
Course Credits

All credits issued for successfully completed University of Phoenix course work are in semester credits. Courses numbered 100-299 carry undergraduate, lower division credit. Courses numbered 300-499 carry undergraduate, upper division credit. Courses numbered 500-599 carry graduate credit. Professional courses numbered 600-699 may be applied to either undergraduate or graduate credit requirements. Courses numbered 700-799 carry doctoral credit.

Most courses are three semester credits. Each three-credit course in a five-week session shall consist of 45 hours of student class work. This includes 20 hours of classroom instruction. Required learning team hours constitute the remaining class work requirement. Please note: Hours at University of Phoenix are based on a full 60 minutes, compared with the traditional 50-minute clock hour.

In addition to the class work requirement, students typically complete at least two hours of individual student work out of class for each hour of class work. This time typically consists of individual study time, reading, research and writing.

Student Identification Numbers

All students are assigned a unique student identifier called an Individual Record Number (IRN). This is the primary number students use to obtain campus, web and voice response services. A letter and ID card will be mailed upon request.

Name and Social Security Number Changes

The University requires documentation of legal name and social security number changes. The following primary forms of identification will be accepted: passport, signed Social Security Card, Certificate of Naturalization, or Permanent Resident Card. These forms must illustrate the name exactly how it is requested on the Name Change form. A signed social security card issues by Social Security Administration is required for changed in social security numbers.

Duplication of Credit

Duplication occurs when students take the same course more than once or take a course that duplicates the content of a satisfactorily completed course. The grade and credit earned for the most recently completed course will apply toward academic standing and the total number of credits required for degree completion. The previously completed course will remain on the permanent transcript, but will not be applied toward academic standing or the total number of credits required for degree completion.

Course Audit Policy

At some campuses, and upon approval of the campus Director of Academic Affairs, a student may choose to audit a course. Courses that have been audited will be transcripted with the grade of "AU" and will not earn the student any credit. Students auditing a course are considered passive participants and will not be held responsible for study group work or class assignments. They must follow all other University policies for non-auditing students, including class attendance. Audited courses do not qualify the student for financial aid. Students will be required to pay a one (1) credit hour tuition charge consistent with the program rate for each audited course. The Online campus does not allow external auditing due to the unique nature of an Online classroom environment.

Re-Entry Students

Students who have been out of attendance for a period of more than one (1) year from the last date of positive recorded class attendance in a program applicable course are considered re-entry students and are subject to the following policies:

- Re-entry students who re-enter into the most current program/program version offered in their state or jurisdiction do not require submission of an appeal for re-entry.
- Re-entry students whose original program/program version is still the most current in their state or jurisdiction and who can complete their program within the original program completion deadline, may re-enter into the most current program offered in their state or jurisdiction without appeal. If the student will not be able to complete their program within the original program completion deadline, the student may appeal to the Student Appeals Center.
- Re-entry students not re-entering into the most current program offered in their state or jurisdiction may submit an appeal to the Student Appeals Center to re-enter any program that is not yet expired.
- No appeals will be accepted for re-entry to an expired program.
- Re-entry students are subject to all admission, academic and University policies in place at the time of re-entry.
- Re-entry students are required to submit an admission application, enrollment agreement and any other updated documentation based on specific program requirements.
- Re-entry students who have been academically disqualified (AD) from the University or disqualified for admission (DA) to the University must appeal to the Students Appeals Center for re-entry.
- Re-entry students who update to a different program/program version upon re-entry will be placed on academic probation (AP) for a period of four (4) program applicable courses if their program grade point average (GPA) does not meet the minimum requirement for the new program/program version. The four course sequence will begin from the grade posting date of the first program applicable course that causes the student’s GPA to fall below the minimum requirement for the new program/program version. If the student was on academic probation prior to being out of attendance for more than one year, and re-entry to the university does not result in a program/program version change, the student must complete the original AP sequence.
- Re-entry students who have been scholastically suspended (SS) or scholastically disqualified (SD) must submit an appeal to the Student Appeals Center for re-entry into any program.
- Graduate re-entry students provisionally admitted (PV) at the time of initial enrollment shall remain on PV status in their new program/program version upon re-entry if they have not successfully completed the four (4) course provisional admission period.

Transfer of Credit

Academic credit earned for degree level courses appearing on an official transcript from an institution that offers associate degrees or higher, which was accredited, or a candidate for accreditation at the time the student attended, by a regional or national accrediting body, or a foreign institution recognized/authorized by the country’s Ministry of Education, will be reviewed for transfer into the University with a minimum grade of C-. For program specific
transfer requirements see individual program descriptions as additional conditions may apply for the transfer of credit towards specific program degree requirements. Transfer credit will be evaluated according to University policies and accepted subject to the approval of the University’s Central Office of Admissions & Evaluation.

Graduate level coursework from institutions that hold accreditation through the American Bar Association or that have been provisionally approved for accreditation may also be reviewed for transfer into the University. Coursework from ABA accredited institutions that are not from a Graduate level program (i.e. JD, LLB, LLM) will not be accepted. Paralegal degrees are not considered Graduate level programs.

Transfer credits that are based on a different unit of credit or calendar year than the one prescribed by University of Phoenix are subject to conversion before being transferred. Only course evaluations performed by the University’s Central Office of Admissions & Evaluation or Prior Learning Assessment division are final. Any preliminary reviews by campus personnel are unofficial and not binding, and subject to change.

The acceptable regional accreditation bodies are:
- Middle States Association of Colleges and Schools
- New England Association of Schools and Colleges
- Higher Learning Commission of North Central Association of Colleges and Schools
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools
- Western Association of Schools and Colleges

The acceptable national accreditation bodies are:
- Association of Biblical Higher Education (formerly Accrediting Associate of Bible Colleges)
- American Academy of Liberal Arts
- Association of Advanced Rabbinical and Talmudic Schools
- Accrediting Council for Independent Colleges and Schools
- Accrediting Bureau of Health Education Schools
- Accrediting Commission of Career Schools and Colleges
- Association of Theological Schools
- Council on Occupational Education
- Distance Education and Training Council
- Transnational Association of Christian Colleges and Schools
- National Accrediting Commission of Cosmetology Arts & Science
- Accrediting Council for Continuing Education and Training

Students transferring from Meritus University will have earned credit totals for Prior Learning and Canadian Forces credit assessments honored at University of Phoenix. Applicability of assessed credits in transfer for Meritus University students will still be defined by the program requirements of the chosen program that the student is entering at University of Phoenix.

For all new students who have never attended University of Phoenix before, students transferring to University of Phoenix into specified undergraduate bachelor degree programs with a previously completed regionally accredited Associate of Arts degree from a Community College will be considered as having satisfied their lower division elective and general education requirements (up to the amount of credits earned in the Associate of Arts degree), which will make the student ready to begin their Required Course of Study at University of Phoenix. Students who take advantage of this policy will still need to meet all pre-requisite or state specific content requirements as outlined in the Academic Progression and General Education Requirements sections of the catalog for their chosen program.

For all new students who have never attended University of Phoenix before, students transferring to University of Phoenix into an undergraduate baccalaureate degree program (excluding BSN, LPN/BSN, LVN/BSN, P/VN/BSN, BSLS, BS/ED/E, BS/BIO, BA/ENG, BS/EVS, BS/HIS, and BSIT [all concentrations] or students residing in Arkansas, Nevada, Oregon, Puerto Rico) with a previously completed CSU (California State University) or IGEC (Intersessional General Education Transfer Curriculum) certification from a regionally accredited California College or University will be considered as satisfying their General Education liberal arts component for their degree program. Students utilizing this policy will still need to meet all pre-requisite or state specific content requirements as outlined in the Academic Progression and General Education Requirements policy sections for their chosen program.

For all new students who have never attended University of Phoenix before, students transferring to University of Phoenix into a program that is not eligible for this policy will have courses individually evaluated for applicability towards degree requirements as the policy will not carry forward into the new degree program.

NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION

The transferability of credits you earn at University of Phoenix is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, diploma, or certificate you earn is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree, diploma, or certificate that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending University of Phoenix to determine if your credits or degree, diploma or certificate will transfer.

Nondiscrimination Policy

The University of Phoenix is guided by the principle of equal opportunity and respect for others. The University is firmly committed to providing equal opportunity in its educational programs, activities, and employment practices and will not tolerate any discrimination or harassment of any kind with regard race, color, reli-
Discrimination Grievance Procedures:

1. Students, faculty, or staff alleging discrimination should present their grievance as soon as possible after the incident(s) that gave rise to the allegation(s). In most cases a student must present the grievance within six weeks after the alleged incident(s).
   a. The following is an exception to the six-week limitations period:
      - If the alleged discrimination occurs in the context of a student’s involvement in a particular course, the student may file a grievance within six weeks after the student’s grade in that particular course has been issued, even if the last act of alleged discrimination within that course occurred more than six weeks prior to the presenting of the grievance.
   2. Additionally, an exception to the six-week limitation period will be granted upon a showing of good cause, including: (i) the existence of extenuating circumstances that prevented the student from filing the grievance (e.g., incapacitation); (ii) the student could not have reasonably known that the alleged act was discriminatory; and (iii) in the case of inaction, the student will be permitted to file a grievance up to 6 weeks from the date the inaction, with reasonable diligence, should have been discovered.
   a. Allegations of sex discrimination must be presented to Camie Pratt, Associate Vice President and Title IX Coordinator, Office of Dispute Management, 4025 S. Riverpoint Parkway, Mailstop CF-SX01, Phoenix, AZ 85040, 602.557.3391, TitleIX@phoenix.edu or designee.
      i. The Title IX Coordinator or their designee will manage efforts to conduct a prompt, thorough and impartial investigation and make a determination on whether the party presented a factual connection between the allegation of discrimination and the alleged actions. If the allegations presented lack sufficient clarity for the Title IX Coordinator to make this determination, the Title IX Coordinator will seek clarification from the individual filing the grievance regarding the allegations.
      ii. If the Title IX Coordinator finds that there is a factual connection between the allegation of discrimination and the alleged actions then one of the following procedures will be followed:
         1. If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.
         2. If the accusation is against a student then the Student Code of Conduct procedures apply.
         3. If the accusation is against an employee then the appropriate campus director or their designee will contact Human Resources and human resources policies for processing claims of discrimination will be followed.
      4. In the event that the University finds that the discrimination was not caused by an individual’s actions, but rather by a discriminatory policy or practice, the University will take steps to remedy the discrimination and prevent its recurrence. These steps may include revising a policy or practice that has resulted in discrimination, eliminating the policy or practice, and/or addressing any effects of the discrimination on the individual filing the grievance.

Harassment Policy

It is the policy of the University of Phoenix that the educational environment at each of its campuses be free of all forms of improper or unlawful harassment including sexual harassment or sexually offensive conduct. Conduct on the part of faculty, staff, or students which would violate this policy includes, but is not limited to:

- Unwelcome or unwanted sexual advances,
- Requests for sexual favors,
- Any suggestion, whether overt or subtle, that a grade or other academic achievement is dependent upon the granting of sexual favors or submission to sexual requests,
- Unwelcome physical contact, including patting, pinching, hugging, kissing, fondling, etc.,
- Offensive verbal conduct, including sexually explicit jokes, comments, innuendo, or other tasteless action that would offend a reasonably sensitive person,
- The display of sexually offensive pictures, posters, illustrations, or objects,
- Slurs, jokes, or ridicule based on race, ethnic or national origin, religion, gender, sexual orientation, gender identity or disability. Conduct deemed to be in violation of this policy is prohibited and will not be tolerated by the University of Phoenix.
any form, against the person raising such a concern will also not be tolerated by the University of Phoenix.

Harassment Grievance Procedures

1. Students, faculty, or staff alleging harassment should present their grievance as soon as possible after the incident(s) that gave rise to the allegation(s). In most cases a grievance must be presented within six weeks after the alleged incident(s).

   a. The following is an exception to the six-week limitations period:

      • If the alleged harassment occurs in the context of a student's involvement in a particular course, the student may file a grievance within six weeks after the student's grade in that particular course has been issued, even if the last act of alleged harassment within that course occurred more than six weeks prior to the presenting of the grievance.

2. Additionally, an exception to the six week limitation period will be granted upon a showing of good cause, including the existence of extenuating circumstances that prevented the student from filing the grievance (e.g., incapacitation).

   a. Allegations of sexual harassment must be presented to Camie Pratt, Associate Vice President and Title IX Coordinator, Office of Dispute Management, 4025 S. Riverpoint Parkway, Mailstop CF-SX01, Phoenix, AZ 85040, 602.557.3391, TitleIX@phoenix.edu or designee.

      i. The Title IX Coordinator or their designee will manage efforts to conduct a prompt, thorough and impartial investigation and make a determination on whether the party presented a factual connection between the allegation of sexual harassment and the alleged actions. If the allegations presented lack sufficient clarity for the Title IX Coordinator to make this determination, the Title IX Coordinator will seek clarification from complainant regarding the allegations.

      ii. If the Title IX Coordinator finds that there is a factual connection between the allegation of sexual harassment and the alleged actions then one of the following procedures will be followed:

         1. If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.

         2. If the accusation is against a student then the Student Code of Conduct procedures apply.

         3. If the accusation is against an employee then the appropriate campus director or their designee will contact Human Resources and human resources policies for processing claims of harassment will be followed.

      iii. In instances where it is determined that a formal process is not appropriate the student, faculty or employee may be warned or counseled regarding the allegation.

   b. All other harassment claims must be presented to the Campus Director of Academic Affairs, Campus Director of Operations, Campus Director of Student Services, or their respective designee.

   i. Campus Director of Academic Affairs, Director of Operations, or Director of Student Services, or their respective designee will conduct a prompt, thorough and impartial investigation and make a determination on whether the student presented a factual connection between the allegation of harassment and the alleged actions.

   ii. If the appropriate director or designee finds that there is a factual connection between the allegation of harassment and the alleged actions then one of the following procedures will be followed:

      1. If the accusation is against a faculty then the Faculty Code of Conduct procedures apply.

      2. If the accusation is against a student then the Student Code of Conduct procedures apply.

      3. If the accusation is against an employee then the appropriate campus director or their designee will contact Human Resources and human resources policies for processing claims of harassment will be followed.

      iv. Timeframe for Conducting Title IX complaints:

         1. Investigation - a prompt, thorough, and impartial investigation will be conducted within 60 days barring any unusual complexity.

         2. Opposing parties will receive notice of the outcome of the complaint within 30 days of the close of the investigation barring any unusual complexity.

         3. Opposing parties shall be afforded the opportunity to appeal within 10 days of receiving notice of the outcome.

   b. All other harassment claims must be presented to the Campus Director of Academic Affairs, Campus Director of Operations, Campus Director of Student Services, or their respective designee.

Disability Services

The University recognizes and accepts its obligations under the Americans with Disabilities Act of 1990, the Rehabilitation Act of 1974 and the ADA Amendments Act of 2008, prohibiting discrimination on the basis of a disability and requiring the University to provide reasonable accommodations to qualified disabled students in all University programs and activities.

Determination of reasonable accommodations and compliance with the ADA and Rehabilitation Act for students are managed by the Disability Services Office with oversight by the University Office of Compliance. No student shall be retaliated against for seeking accommodation under this policy or for participating in any complaint procedures brought against the University for its noncompliance with the policy.

Disability Services Office Contact Information

The Disability Services Office provides students with the opportunity to determine the advisor associated with the campus location they attend and how to contact the advisor, via e-mail, 24 hours a day. To find your advisor, please visit: http://www.phoenix.edu/students/disability-services/advisors.html.

Acceptable Use of University Computing and Communication Resources

The University’s computing and communication resources are the property of the University. Use of University computing and communication resources is a privilege and is provided as a service to the University’s users. Among other purposes, these resources are provided for the delivery of curriculum and related materials; for conducting online classes; for conducting educational research; for communication between and among students, faculty, and staff; and, for accessing and obtaining the University’s services.
Students and faculty using these resources without authorization, or in excess of their authorization, will be subject to appropriate review processes and sanctions. In addition, all activity and information, including personal activity and information, on University systems may be monitored and recorded. Any individual accessing University computing and communication resources expressly consents to such monitoring and is advised that if such monitoring reveals unauthorized or criminal activity, Information Security Personnel will provide the evidence from monitoring to the appropriate University officials for investigation and possible release to law enforcement authorities.

General Requirements of Users

Users of University computing and communication resources must:

- Comply with this policy and all applicable local, state, and federal laws and regulations.
- Not intentionally compromise the confidentiality, integrity or availability of University computing and communication resources.
- Not attempt to circumvent the University’s physical, technical, or administrative security measures.
- Abide by the provisions of the Student Code of Conduct (for students) or the provisions of the Faculty Standards (for faculty members).
- Be truthful and accurate in personal identification.
- Respect the rights and privacy of others.
- Maintain the security of their user resource accounts.
- Comply with the terms of use of any University or third-party service provider website(s).

Intellectual Property

Users must adhere to applicable intellectual property law, and the terms and conditions of any and all software licensing agreements and/or copyright laws as specified by the vendor or licensor. Explicitly:

- Unauthorized use of University trademarks or logos and other protected trademarks and logos is prohibited.
- Infringing upon the copyright, trademark, patent, or other intellectual property rights of others in computer programs or electronic information (including plagiarism and unauthorized use or reproduction) is prohibited.
- The unauthorized storing, copying or use of audio files, images, graphics, computer software, data sets, bibliographic records and other protected property is prohibited except as permitted by law.

Privacy & Security

The University strives to maintain the confidentiality, integrity, and availability of its systems, networks, and data. The University implements policies to ensure that access to sensitive data is restricted to those individuals who have a need-to-know. The following sections describe how Information Security Personnel may monitor computing and communication resources for violations of this acceptable use policy.

Monitoring

System and network activities of users are routinely logged and monitored. These activities include:

- Use of accessed accounts
- Time and duration of network activity
- Web pages accessed and duration of access
- Network software accessed

In the case of a suspected violation of this policy, University officials may authorize Information Security Personnel to conduct a more detailed investigation to gather evidence on the suspected violation.

Restriction of Access to Computing and Communication Resources

Access to University computing and communication resources is a privilege that may be wholly or partially restricted without prior notice and without consent of users:

- If required by applicable law or policy.
- If a reasonable suspicion exists that there has been or may be a violation of law, regulation, or policy.
- If required to protect the confidentiality, integrity, or availability of computing and communication resources.
- Conditions for Permitting Inspection, Monitoring, or Disclosure

The University may permit the inspection, monitoring, or disclosure of e-mail, computer files, and network transmissions when:

- Required or permitted by law, including public records law, or by subpoena or court order
- The University or its designated agent reasonably believes that a violation of law or policy has occurred
- Necessary to protect the confidentiality, integrity, or availability of computing and communication resources.

Confidentiality

Confidentiality of e-mail and other network transmissions can not be completely assured. Therefore, all users should exercise caution when sending personal, financial, confidential, or sensitive information by e-mail or across the Internet.

Responsibility to Inform User of Unauthorized Access or Disclosure

If the University believes unauthorized access to or disclosure of private user information has occurred, the University will make reasonable efforts to inform the affected user, except when notification is impractical or when notification would be detrimental to an investigation of a violation of law or policy.

Violations and Enforcement

Reporting Violations

Any actual or suspected violation of this policy should immediately be brought to the attention of the system administrator of the equipment or facility most directly involved. Alternatively, a report may be made directly to Apollo Internal Audit or Apollo Information Security and Compliance.

Apollo Group Internal Audit
M/S AA-B309
1625 W. Fountainhead Parkway
Tempe, AZ 85282
FAX: (480) 929-7499
e-mail: internalaudit@apollogrp.edu

Apollo Group Information Security & Compliance
M/S AA-B103
1625 W. Fountainhead Parkway
Tempe, AZ 85282
FAX: (480) 379-3555
e-mail: infosec@apollogrp.edu

Response to a Reported Violation

Upon receiving notice of a violation, the University may temporarily suspend a user’s privileges or move or delete the allegedly...
offending material pending further investigation.
A person accused of a violation will be notified of the charge and have an opportunity to respond before the University imposes a permanent sanction. Appropriate cases will be referred to the University disciplinary process appropriate to the violator’s status (i.e., faculty member or student) or to appropriate law enforcement authorities.

In addition to sanctions available under applicable law and University policies, the University may impose a temporary or permanent reduction or elimination of access privileges to computing and communication resources.

The University may temporarily suspend any account, whether or not the account user is suspected of any violation, if it is believed to be necessary to preserve the integrity of University computing and communication resources. The University will provide appropriate notice to the account user. Servers and computers that threaten the security of University systems will be removed from the network and allowed to reconnect only with the approval of Information Security Personnel.

In the event of any inconsistency or conflict between this policy and any other terms or conditions students may be subject to, the University reserves the right to resolve such conflicts in its sole discretion.

Violation Examples
This list below contains examples of actions considered to be a violation of this policy. It is not intended to be all-inclusive, nor does it represent all possible violations in a particular circumstance or the applicability of any other law or policy to those facts.

• Unlawful communications, including threats of violence, obscenity, pornography, and harassing communications.

• Unauthorized, anonymous communication is prohibited. (All users are required to cooperate with appropriate University personnel or other authorized personnel when investigating the source of anonymous messages.)

• Misrepresenting or forging the identity of the sender or the source of electronic communication.

• Altering the content of a message originating from another person or computer with intent to deceive.

• Use of University computing and communication resources for private business or commercial activities.

• Fund-raising or advertising on behalf of non-University organizations.

• The unauthorized reselling of University computing and communication resources.

• Unauthorized acquisition attempts to acquire and use the user id or passwords of others.

• Interference with or disruption of the computer or network accounts, services, or equipment of others.

• The intentional propagation of computer “worms” and “viruses,” the sending of electronic chain mail, denial of service attacks, and inappropriate “broadcasting” of messages to large numbers of individuals or hosts.

• Failure to comply with requests from appropriate University officials to discontinue activities that threaten the operation or integrity of computers, systems or networks, or otherwise violate this policy.

• Revealing passwords or otherwise permitting the use by others (by intent or negligence) of personal accounts for computer and network access without authorization is prohibited.

• Altering or attempting to alter files or systems without authorization.

• Unauthorized scanning of networks for security vulnerabilities.

• Attempting to alter any University computing or networking components (including, but not limited to, bridges, routers, and hubs) without approval or beyond one’s level of authorization.

• Negligent or intentional conduct leading to disruption or damage of University data, systems or networks.
CONSUMER INFORMATION

All institutions participating in federal financial aid programs are required to provide enrolled and potential students and current and prospective employees available consumer information. This guide provides you with important information and institutional policies. Where applicable, each section lists specific locations where additional information is available. To request and receive this information in writing, contact the campus director or designee at each University of Phoenix location during regular business hours. A list of campus locations is available at http://www.phoenix.edu/campus-locations.html.

Accreditation, Licensures, Reviews, and Approvals

University of Phoenix is accredited, reviewed and/or approved by federal, state and international agencies, as well as private accreditation bodies.

Federal
U.S. Department of Education, Certificate of Eligibility

State and International Licensures
University of Phoenix is approved to operate in most U.S. states, territories and possessions, either through licensure, registration, general or specific approvals or annual extension of exemption.

Regional Accreditation

University of Phoenix is accredited by The Higher Learning Commission and is a member of the North Central Association of Colleges and Schools (HLC/NCA). University of Phoenix was placed on Notice by The Higher Learning Commission, effective June 27, 2013. Notice is a Commission sanction indicating that an institution is pursuing a course of action that, if continued, could lead it to be out of compliance with one or more Criteria for Accreditation. An institution on Notice remains accredited. At the end of the Notice period, The Higher Learning Commission Board of Trustees may remove the sanction, place the institution on Probation if the identified concerns have not been addressed, or take other action. For additional information, contact The Higher Learning Commission, ncahlc.org

HLC/NCA

Additional Information

A student can view additional information at http://www.phoenix.edu/about_us/accreditation.html. To obtain a copy of University accreditation and licensure documents, or information on how to contact any of the agencies that regulate the University, contact the Apollo Legal Department at 602.557.8232.

Academic Programs, Facilities and Instructional Personnel Information

Academic program offerings and instructional facilities vary according to geographic area and delivery mode at the local campus or online campus. Not all programs are available at all loca-

Academic Programs

University of Phoenix offers undergraduate and graduate programs in business and management, information systems and technology, criminal justice and security, human services, nursing and health care, social and behavioral sciences, natural sciences, the humanities and education. Detailed information regarding academic programs offered at specific instructional facilities is located at http://www.phoenix.edu/programs/degree-programs.html and the appropriate Academic Catalog at http://www.phoenix.edu/programs/degree-programs/academic-catalog.html. Admissions and program requirements vary by state. Please refer to the Academic Catalog for state and/or program-specific information.

Academic Program Improvement

University of Phoenix pursues a strategy of continuous quality improvement in relation to its academic programs. This strategy is implemented through assessment programs designed to measure student learning at various levels within the University. Multiple types of assessment are utilized to create as comprehensive a picture as possible of the strengths and potential challenges to student learning. Resulting data can be used to improve academic programs and enhance the overall academic experience.

During each fiscal year from September 1 to August 31, the colleges and schools within the University follow pre-established plans to conduct programmatic assessments. Plan progress is monitored quarterly through the fiscal year. The process for assessment of academic programs uses the following four phases:

1. Assessment Planning
2. Collecting Evidence and Analyzing Data
3. Implementing Improvement
4. Monitoring Effectiveness of Improvements

By utilizing this assessment process, the colleges and schools are able to evaluate academic programs, identify areas for potential change, modify assessment plans as needed, communicate changes in academic programs to faculty and students, and pursue continuous quality improvement.

Students or potential students may obtain a copy of the improvement plan for a specific program by contacting:

University of Phoenix
Office of Academic Administration
1625 W. Fountainhead Parkway
Mail Stop: AA-S402

Articulation Agreements

A list of institutions that University of Phoenix has established articulation agreements with can be viewed at http://www.phoenix.edu/admissions/transfer_information/articulation.html.

Corporate Articulations

A list of corporations that University of Phoenix has established articulation agreements can be viewed at http://www.phoenix.edu/admissions/transfer_information/transfer_credit.html.

Credit Transfer

Information regarding criteria used to evaluate the transfer of credits earned at another institution is located at http://www.phoenix.edu/admissions/transfer_information/previous_college_education.html.
The University Credit Transfer Policy and be viewed at http://www.phoenix.edu/tuition_and_financial_options/policies/credit_transfer_policy.html.

Reverse Transfer Agreements
University of Phoenix has established reverse transfer agreements with partnering institutions. With a reverse transfer agreement in place, University of Phoenix will notify the partner transfer institution and provide directory information for students meeting certain credit requirements that indicate the student may be eligible to earn an associate degree from the transfer institution. The transfer institution may pursue communication with the student to discuss requirements and may award the associate degree to the student per its discretion.

Disability Services
The University recognizes and accepts its obligations under the Americans with Disabilities Act of 1990, the Rehabilitation Act of 1974 and the ADA Amendments Act of 2008, prohibiting discrimination on the basis of a disability and requiring the University to provide reasonable accommodations to qualified disabled students in all University programs and activities.

Determination of reasonable accommodations and compliance with the ADA and Rehabilitation Act for students are managed by the Disability Services Office with oversight by the University Office of Compliance. No student shall be retaliated against for seeking accommodation under this policy or for participating in any complaint procedures brought against the University for its noncompliance with the policy.

Disability Services Office Contact Information
The Disability Services Office provides students with the opportunity to determine the advisor associated with the campus location they attend and how to contact the advisor, via e-mail, 24 hours a day. To find your advisor, please visit: http://www.phoenix.edu/students/disability-services/advisors.html.

Faculty
University faculty members are accomplished managers, technology leaders, professional educators, corporate executives, financial officers, human services professionals and leaders in other professional areas who also possess advanced degrees. A list of faculty may be obtained at each local campus. To find a local campus, go to http://www.phoenix.edu/campus-locations.html. Faculty profiles can be found at http://www.phoenix.edu/faculty/our_faculty.html.

Graduation Rates
In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must publish information regarding graduation rates as defined by the National Center for Education Statistics (NCES). This graduation measure includes only undergraduate degree- and/or certificate-seeking students who have never attended another institution of higher learning, and graduate within 150% of the normal time to completion. Data are collected on the number of students entering the institution as first-time, full-time (FTFT) degree- and/or certificate-seeking undergraduate students in a particular cohort year. Graduation rates are disaggregated by race and ethnicity, gender and federal financial aid grant or loan funds. The graduation rates shown below represent students from the 2006-2007 cohort and the percentages of those students who graduated by Aug. 31, 2012. For the graduation rates, please go to http://www.phoenix.edu/about_us/regulatory/consumer-information.html.

Retention Rates
In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must make available information regarding retention rates of degree- and/or certificate-seeking first-time, full-time (FTFT) undergraduate students entering the institution. Retention rate is a measure of the rate at which students persist in their educational program at an institution, expressed as a percentage. The table shown below is the percentage of FTFT bachelor’s degree-seeking students from the previous fall who were still enrolled in the next fall. For the retention rates, please go to http://www.phoenix.edu/about_us/regulatory/consumer-information.html.

Student Diversity
In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must make available information regarding student diversity as defined by the IPEDS. Data reported are for enrolled full-time students. For further details please go to http://www.phoenix.edu/about_us/regulatory/consumer-information.html.

Types of Education Graduates Enroll
In accordance with the Higher Education Act (HEA) of 1965, as amended, each postsecondary educational institution must make available information regarding the types of graduate and professional education in which graduates of the institution’s four-year degree programs enrolled. Approximately 16% of students who completed a bachelor’s degree from University of Phoenix between July 1, 2011, to June 30, 2012, went on to enroll in a graduate or professional program at the University of Phoenix. The majority of these students enrolled in
the following programs:
- Master of Business Administration
- Master of Science in Psychology
- Master of Science in Accountancy
- Master of Science in Administration of Justice and Security
- Master of Information Systems

The data is derived from the IPEDS Completions Survey (July 1, 2011, to June 30, 2012 data) and the IPEDS Fall Enrollment Survey (August 1, 2012, to October 31, 2012, data).

Alumni Attending Graduate School
Forty-three percent of University of Phoenix alumni indicated they are attending, or plan to attend, graduate school.
- Of this 43%, 71% are currently pursuing a graduate degree at the University of Phoenix
- Of this 43%, 20% plan to pursue a graduate degree at the University of Phoenix

Thirty-two percent of University of Phoenix master program graduates indicated they planned to attend a doctoral level program.
- Of this 32%, 6% are currently pursuing a doctoral degree at University of Phoenix.

Sixty-three percent of University of Phoenix bachelor program graduates indicated they planned to attend a master level program.
- Of this 63%, 27% are currently pursuing a master degree at University of Phoenix.

Question #40: In what industry do you work? Bases: Respondents that are employed; 25,214

Title II of the Higher Education Act-Academic Year 2009-2010 Report

In compliance with Title II of the Higher Education Act (HEA), University of Phoenix has submitted institutional questionnaires that detail the University’s program offerings, student demographics and student performance in those states where the University has teacher education programs that have produced program completers, also known as graduates. University of Phoenix provides professional preparation for teachers in multiple states. This is an overview of the information contained in the Institutional Report for University of Phoenix.

Federal Financial Aid Application Process
A student can apply for federal financial aid after submitting an
application for admission to the local campus or via MyApply at https://myapply.phoenix.edu/Apply/Login.aspx and registering for courses in an eligible degree program. Admissions and program requirements vary by state. Please refer to the Academic Catalog for state and/or program specific information at http://www.phoenix.edu/programs/degree-programs/academic-catalog.html.

During the application process, the following forms may be completed for federal financial aid grants and loans:
- Free Application for Federal Student Aid (FAFSA)
- University of Phoenix Financial Aid Application
- Federal Direct Loan Master Promissory Note (MPN)
- Entrance counseling
- Authorization to Apply to Future Charges form if, and only if, a student chooses this option
- Student Financial Agreement form

The University highly recommends using the online financial aid application process at https://faw.phoenix.edu/. This web page allows a student to complete and electronically sign University required financial aid documents, and directs them to complete the FAFSA and MPN.

Students interested in utilizing financial aid programs should complete all required application materials each academic year. An academic year is defined as the period of time a student successfully completes a minimum of 24 credit hours and 30 weeks of instructional time. A student should reapply for financial aid prior to the start of each new academic year. The average processing time for financial aid awards is 90 days.

### General Eligibility Requirements

Degree-seeking students who are U.S. citizens or eligible noncitizens enrolled in an eligible academic program can apply for federal financial aid as a means of assisting with financing their education. Certificate programs may also be eligible for federal financial aid. Depending on the program, student eligibility may be need-based, non-need-based, credit-based or dependent on other specific conditions.

Students may also be eligible to receive funding through state grant or scholarship programs in their states where available. Students should contact a local campus or an online Finance Advisor at 866.766.0766 for additional information on the financial aid programs available at each campus. A list of campuses is available at http://www.phoenix.edu/campus-locations.html.

#### General Eligibility Requirements

General eligibility requirements for federal financial aid are as follows:
- Demonstrate financial need (for most programs).
- Be a U.S. citizen or an eligible noncitizen.
- Have a valid Social Security number (with the exception of students from the Republic of the Marshall Islands, Federated States of Micronesia, or the Republic of Palau).
- Be registered with Selective Service, if you’re a male (you must register between the ages of 18 and 25).
- Be enrolled or accepted for enrollment as a regular student in an eligible degree or certificate program.
- Be enrolled at least half-time to be eligible for Direct Loan Program funds.
- Maintain satisfactory academic progress in college or career school.
- Sign statements on the Free Application for Federal Student Aid (FAFSASM) stating that:
  - You are not in default on a federal student loan and do not owe money on a federal student grant and
  - You will use federal student aid only for educational purposes.
  - Show you are qualified to obtain a college or career school education by having a high school diploma or
    - Final high school transcript that shows the date a diploma was awarded
    - A recognized equivalent such as a General Educational Development (GED) certificate
    - California High School Proficiency Examination (CHSPE) Certificate
    - Completed homeschooling at the secondary level in a state that confers high school diplomas

For additional eligibility requirements, go to http://studentaid.ed.gov/eligibility/basic-criteria.

### Federal Grant Programs

University of Phoenix participates in the following federal grant programs:

- **Statement of Educational Purpose**
  - The parent or student signing a Free Application for Federal Student Aid (FAFSA) certifies the following: (1) use federal and/or state student financial aid only to pay the cost of attending an institution of higher education, (2) is not in default on a federal student loan or has made satisfactory arrangements to repay it, (3) does not owe money back on a federal student grant or has made satisfactory arrangements to repay it, (4) will notify college if defaulting on a federal student loan and (5) will not receive a Federal Pell Grant from more than one college for the same period of time.
  - The parent or student signing the FAFSA agrees, if asked, to provide information that will verify the accuracy of the completed form. This information may include federal or state income tax forms filed or are required to file. In addition, the parent or student certifies and understands that the Secretary of Education has the authority to verify information reported on this application with the IRS and other federal agencies. If the parent or student signs any document related to the federal student aid programs electronically using a personal identification number (PIN), that person certifies that he or she is the person identified by the PIN and has not disclosed that PIN to anyone else. If the parent or student purposefully gives false or misleading information, you may be fined up to $20,000, sent to prison, or both.

- **Referrals to the Office of Inspector General**
  - University of Phoenix is required by law to make referrals to the Office of Inspector General any time there is credible information or evidence that an applicant (student) may have engaged in fraud or other criminal misconduct in connection with the application involving federal financial aid programs.
Federal Pell Grant
A Federal Pell Grant, unlike a loan, does not have to be repaid. Pell Grants are awarded usually only to undergraduate students who have not earned a bachelor’s or a professional degree. Effective on July 1, 2012, you can receive the Federal Pell Grant for no more than 12 semesters or the equivalent: http://studentaid.ed.gov/types/grants-scholarships/pell/calculate-eligibility
For more detailed information on eligibility and how to apply for the federal Pell Grant, visit http://studentaid.ed.gov/types/grants-scholarships/pell.

Federal Supplemental Educational Opportunity Grant (FSEOG)
The FSEOG program is for undergraduates with exceptional financial need. Pell Grant recipients with the lowest expected family contributions (EFCs) will be considered first for a FSEOG. The FSEOG does not have to be repaid.
For more detailed information on eligibility and how to apply for the FSEOG, visit http://studentaid.ed.gov/types/grants-scholarships/FSEOG.

Iraq and Afghanistan Service Grant (IASG)
A student whose parent or guardian was a member of the U.S. Armed Forces and died as a result of service performed in Iraq or Afghanistan after September 11, 2001, may be eligible to receive the Iraq and Afghanistan Service Grant.
For more detailed information on eligibility and how to apply for the IASG, visit http://studentaid.ed.gov/types/grants-scholarships/iraq-afghanistan-service.

Teacher Education Assistance for College and Higher Education (TEACH) Grant Program
The Teacher Education Assistance for College and Higher Education (TEACH) Grant Program that provides grants of up to $4,000 per year to students who intend to teach in a public or private elementary or secondary school that serves students from low-income families. For more detailed information on eligibility and how to apply for the TEACH Grant, visit http://studentaid.ed.gov/types/grants-scholarships/teach. For a list of TEACH eligible programs please visit http://www.phoenix.edu/about_us/regulatory/consumer-information.html.

State Grant Programs
Students may also be eligible to receive funding through state grant or scholarship programs in their states where available. Depending on the program, student eligibility may be need-based, non-need-based, credit-based or dependent on other specific conditions. Contact a Finance Advisor at 866.766.0766 for additional information on state grant and/or scholarship programs. A list of campuses is available at http://www.phoenix.edu/campus-locations.html.
The actual amount of state grants awarded to any student is contingent on the availability of funds. The University cannot guarantee any funding from the state grant sources listed, as the list is subject to change without notice based upon changes in state budgetary constraints, state law or regulation, and/or University participation. Where a work or other requirement is included in order to preclude the conversion of a scholarship or grant to a loan, the University makes no representation or warranty as to whether a graduate will be able to obtain such employment or fulfill such other requirement.
For information regarding the grants offered by the University - how to apply, eligibility, deadlines, etc., visit http://www.phoenix.edu/about_us/regulatory/consumer-information.html. For additional specific eligibility information, the institution may contact you directly when determining grant eligibility.

Institutional Grant Programs
University of Phoenix is committed to providing financial assistance opportunities through institutional grant programs for potential and current students. Various institutional grants are offered throughout the year. For a complete list of current institutional grant offerings, please visit http://www.phoenix.edu/institutionalgrants.

Scholarships
The Center for Scholarship Excellence (CSE) is a department of University of Phoenix. The CSE is committed to assisting with financial support through institutional and external scholarship programs. The CSE encourages students to borrow responsibly as they work toward their educational goals.
University of Phoenix has a comprehensive scholarship website at http://www.phoenix.edu/tuition_and_financial_options/scholarships.html to meet the needs of students. This website features scholarships offered, scholarship resources, tips, suggestions, articles, an external scholarship search engine and much more.

Institutional Scholarships
University of Phoenix offers a number of institutional scholarships http://www.phoenix.edu/tuition_and_financial_options/scholarships/institutional-scholarships.html. The University often partners with nonprofit organizations to promote scholarship programs. These scholarships are available to potential students, current students or alumni. The CSE website, http://www.phoenix.edu/tuition_and_financial_options/scholarships/institutional-scholarships.html, is updated regularly for institutional scholarships, qualifications, and selection criteria specific to University of Phoenix current and potential students as opportunities become available.

External Scholarships
Private outside entities develop and fund external scholarships, some of which are listed at http://www.phoenix.edu/tuition_and_financial_options/scholarships/external-scholarships.html. External scholarships are available to the general public, which may include University of Phoenix students. Your eligibility for external scholarships depends on qualifying requirements that vary from scholarship to scholarship. The Center for Scholarship Excellence (CSE) evaluates external scholarship programs, determines applicability to the University student populations, and communicates these opportunities to students and campuses. The website is updated regularly as opportunities become available.

Loans
Students should contact a Finance Advisor at 866.766.0766 for additional information on financial aid programs available at your campus. A list of campuses is available at http://www.phoenix.edu/campus_locations.html.

Federal Perkins Loan Program
A Federal Perkins Loan is a low-interest (5 %) loan for both undergraduate and graduate students with exceptional financial need. The University is the lender, and the loan is made with government funds. Students receiving Federal Perkins Loans must repay this loan to the University.
Due to limited funds, not everyone who qualifies for a Perkins loan to the University.

University of Phoenix, 2013-2014
Loan will receive one.

The University maximum lending amount is $4,000 per award year, with a federal lifetime maximum borrowing limit of $27,500 for an undergraduate. For a graduate, the University maximum lending amount is $4000 per award year, with a federal lifetime maximum borrowing limit of $60,000 (including amounts borrowed as an undergraduate).

Terms and Conditions - Students who receive a Federal Perkins Loan are subject to the terms and conditions disclosed on the Federal Perkins Loan Master Promissory Note (MPN), visit http://ifap.ed.gov/dpletters/attachments/GEN1219PNAttach.pdf

Borrower's Rights and Responsibilities - Students receiving federal financial aid have varying rights and responsibilities in accordance with the Borrower's Rights and Responsibilities Statement. For more detailed information on eligibility and how to apply for the Perkins Loan Program, visit http://studentaid.ed.gov/types/loans/perkins

Federal Direct Loan (DL) Program

Direct Loans, from the William D. Ford Federal Direct Loan Program, are low-interest loans for eligible students to help cover the cost of higher education. Eligible students borrow directly from the U.S. Department of Education at participating schools.

Direct Subsidized Loans - Direct Subsidized Loans are for students with financial need. The University will review the results of the FAFSA and determine the amount a student can borrow. The student is not charged interest while enrolled in school at least half-time.

New for 2013-2014 Award Year

On July 6, 2012, the Moving Ahead for Progress in the 21st Century Act (MAP-21) (Public Law 112-141) was enacted. MAP-21 added a new provision to the Direct Loan statutory requirements that limits a first-time borrower's eligibility for Direct Subsidized Loans to a period not to exceed 150 percent of the length of the borrower's educational program. Under certain conditions, the provision also causes first-time borrowers who have exceeded the 150 percent limit to lose the interest subsidy on their Direct Subsidized Loans. Only first-time borrowers on or after July 1, 2013 are subject to the new provision. Generally, a first-time borrower is one who did not have an outstanding balance of principal or interest on a Direct Loan or on a FFEL Program Loan on July 1, 2013.

Beginning June 28, 2013, entrance counseling materials on https://studentloans.gov/myDirectLoan/index.action will, as a temporary measure, include a link to information regarding the 150 percent limit in the attached documents.

Direct Unsubsidized Loans - The student is not required to demonstrate financial need to receive a Direct Unsubsidized Loan. Like subsidized loans, the University will determine the amount a student can borrow. Interest accrues (accumulates) on an unsubsidized loan from the time it is first paid out. The student can pay the interest while in school and during grace periods and deferment or forbearance periods, or can allow it to accrue and be capitalized (that is, added to the principal amount of the loan). If a student chooses not to pay the interest as it accrues, this will increase the total amount to be repaid because the student will be charged interest on a higher principal amount.

Terms and Conditions -Students who receive a Direct Loan are subject to the terms and conditions disclosed on the Federal Direct Loan Master Promissory Note (MPN) http://www2.ed.gov/offices/OSFAP/DirectLoan/pubs/dlmpnlabel.pdf and the Direct Loan Disclosure Statement http://www2.ed.gov/offices/OSFAP/DirectLoan/pubs/dlplain.pdf

Borrower's Rights and Responsibilities - Students receiving federal financial aid have varying rights and responsibilities in accordance with the Borrower's Rights and Responsibilities Statement, http://www2.ed.gov/offices/OSFAP/DirectLoan/pubs/dlrights.pdf, attached to the Master Promissory Note (MPN). For more detailed information on eligibility and how to apply for the federal Direct Loan Program, visit http://www.studentaid.ed.gov/types/loans/subsidized-unsubsidized

Federal Direct PLUS loan for parent(s)

Parents of dependent students may apply for a Direct Parent Loan for Undergraduate Student (PLUS) to help pay their child’s education expenses as long as certain eligibility requirements are met.

Terms and Conditions - Students whose parent(s) receive a PLUS loan are subject to the terms and conditions disclosed on the Federal Direct PLUS Loan Application and Master Promissory Note (MPN) at http://www.direct.ed.gov/mpn.html.

Federal Direct PLUS loan for Graduate and Professional Degree Students

Graduate and professional degree students can borrow a Direct PLUS Loan to help cover education expenses. The terms and conditions applicable to PLUS Loans for parents also apply to PLUS Loans for graduate and professional students. These terms and conditions include: (1) a determination that you (the applicant) do not have an adverse credit history and (2) a fixed interest rate of 7.9% for Direct PLUS Loans.

Terms and Conditions - Students who receive a PLUS Loan for Graduate and Professional students are subject to the terms and conditions disclosed on the Federal Direct PLUS Loan Application and Master Promissory Note (MPN) at http://www.direct.ed.gov/ mpn.html.

Borrower's Rights and Responsibilities - Students receiving federal financial aid have varying rights and responsibilities in accordance with the Borrower’s Rights and Responsibilities Statement, http://www2.ed.gov/offices/OSFAP/DirectLoan/pubs/plusrights.pdf, attached to the Master Promissory Note (MPN). For more detailed information on eligibility and how to apply for the Direct PLUS loan for Graduate and Professional students, visit http://studentaid.ed.gov/types/loans/plus

Loan Origination Fee Changes

The loan fee for Direct Subsidized Loans and Direct Unsubsidized Loans with a first disbursement after March 1, 2013, is increased from 1.0 percent to 1.051 percent. For example, the fee on a $5,500 loan will increase by $2.80 from $55.00 to $57.80.

The loan fee for Direct PLUS Loans (for parent borrowers and graduate and professional student borrowers) with a first disbursement after March 1, 2013, is increased from 4.0 percent to 4.204 percent. For example, the fee on a $10,000 PLUS Loan will increase by $20.40 from $400.00 to $420.40.

For more information regarding Federal Student Loan Fees, please visit http://studentaid.ed.gov/types/loans/interest-rates.

Federal Direct Subsidized and Unsubsidized Annual Loan
### Limits

Federal Direct Subsidized and Unsubsidized Annual and Aggregate Loan Limits are as follows:

<table>
<thead>
<tr>
<th>Grade Level</th>
<th>Dependent Undergraduate Student</th>
<th>Independent Undergraduate Student</th>
<th>Graduate/Professional Student</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Freshman</td>
<td>$5,500 - No more than $3,500 of this amount can be subsidized loan</td>
<td>$9,500 - No more than $3,500 of this amount can be subsidized loan</td>
<td>$20,500</td>
</tr>
<tr>
<td>2 Sophomore</td>
<td>$6,500 - No more than $4,500 of this amount can be subsidized loan</td>
<td>$10,500 - No more than $4,500 of this amount can be subsidized loan</td>
<td></td>
</tr>
<tr>
<td>3 &amp; 4 Senior</td>
<td>$7,500 - No more than $5,500 of this amount can be subsidized loan</td>
<td>$12,500 - No more than $5,500 of this amount can be subsidized loan</td>
<td></td>
</tr>
</tbody>
</table>

Maximum Total Debt from Stafford Loans

| aggregate loan limits | $31,000 - No more than $23,000 of this amount may be in subsidized loans. | $57,500 - No more than $23,000 of this amount may be in subsidized loans. | $138,500 - No more than $65,500 of this amount may be in subsidized loans. |

Undergraduate certificate programs - Loan limits are based on the length of the program. For certificates that are less than an academic year, the $9,500 loan limits would be prorated by the lesser fraction of the weeks or credits in the program, divided by the University academic year definition of weeks or credits. For students in undergraduate certificate programs that are greater than an academic year, the maximum amount borrowed is $9,500 per academic year. For final academic years less than 24 credits (graduating students in undergraduate degree or certificate programs that are greater than an academic year) - loan limits will be prorated based on the number of credits in the final academic year divided by 24. Please note students may also receive less funding if they receive other financial aid used to cover a portion of cost of attendance.

A student whose parent cannot obtain a Parent Loan for Undergraduate Student (PLUS) Loan is allowed to borrow additional unsubsidized federal Direct amounts. Student dependency status will be determined based on answers to questions on the FAFSA.

### Education Loan Interest Rates

For information regarding Federal Student Loan Interest Rates, including those in effect as of July 1, 2013, please visit http://studentaid.ed.gov/types/loans/interest-rates.

### Interest Rate Cap for Military Members

During military service, students who qualify under the Service Members Civil Relief Act may have a 6% interest rate cap on the loans the interest rate on loans you obtained before entering military service. Qualifying students must contact their loan servicer to request this benefit.

In addition, no interest is charged (for a period of no more than 60 months) on Direct Loans first disbursed on or after October 1, 2008, while a borrower is serving on Active Duty or performing qualifying National Guard duty during a war or other military operation or other emergency, and serving in an area of hostilities qualifying for special pay.

### Prior Federal Loans and Financial Aid History

Current federal financial aid borrowers can check the interest rate, servicer information and other financial aid history, via the National Student Loan Data System (NSLDS) at http://www.nslds.ed.gov/.

### Private Student Loans

Private student loans may be available to both students and parents who are not eligible for federal financial aid or who need assistance beyond their financial aid eligibility. These loans are made privately through lenders and other financial institutions and are subject to a credit review and individual lender terms and conditions. The lender determines eligibility and amounts are limited to the cost of education minus other aid. These loans are not subsidized or guaranteed by the federal government. The University recommends private loans only be considered after applying for federal financial aid. More information is available at http://www.phoenix.edu/tuition_and_financial_options/financial_options/private-student-loans.html.

To assist with finding the right lender for a private loan, visit the Student Lending Analytics website, http://www.studentlendinganalytics.com/alternative_loan_options.html. Student Lending Analytics has developed a list of private loan options to serve schools and their students who need a focused resource for help in finding a private student loan. A student may choose any eligible lender; the University will process the request accordingly. Contact the lender for specific terms and conditions.
**Financial Aid Awarding**

For students who have completed all required financial aid application materials, the University will evaluate student eligibility for federal, state and institutional aid programs. If a student is eligible, Student Financial Services - Operations calculates an estimated financial aid award and provides notification to the student. The notification includes eligibility information for each financial aid program awarded, as well as the amount and anticipated disbursement dates. This notification may be electronic. Generally, financial aid awards are divided into two payment periods. Each payment period requires at least 12 credits successfully completed and at least 15 instructional weeks. Payment periods are based on individual course schedules and follow academic year requirements (a minimum of 24 credit hours and 30 weeks of instructional time).

Federal Pell Grant eligibility for an undergraduate student is estimated before originating a Direct subsidized or unsubsidized loan. In addition, a Direct unsubsidized loan is not originated without first determining the need for a Direct subsidized loan. However, if the amount of the Direct subsidized loan is $200 or less, the amount can be included as part of a Direct unsubsidized loan, the University is not required to originate a separate subsidized loan. For a dependent student, the University may originate and disburse Parent PLUS funds without determining federal Pell Grant and Direct subsidized loan eligibility. For a graduate student, the University must determine graduate/professional maximum Direct unsubsidized loan eligibility before originating a Graduate/Professional PLUS Loan.

Federal Supplemental Educational Opportunity Grant (FSEOG) eligibility for undergraduate students is determined by the expected family contribution (EFC) for the current award year. Awards are made beginning with the lowest EFC until program funds are obligated.

Federal Perkins Loan eligibility for undergraduate and graduate students is determined by the EFC for the current award year. Awards are made beginning with the lowest EFC until program funds are obligated.

State grant program eligibility is determined by each state authority. The University is notified of student eligibility by the state authority. Institutional grant and scholarship eligibility determination will vary.

**Schedule Requirements**

An academic year is defined as a minimum of 24 credits and 30 weeks of instructional time. The academic year begins with the first eligible course of a degree program and ends when a student successfully completes the credits and weeks of instructional time requirements. An academic year has no calendar time constraints and continues through periods of nonattendance that are less than 180 days until both the credit and weeks requirement are met. A week of instructional time includes at least one academic-related activity for federal financial aid.

Students who overlap courses more than twice within an academic year, or associate degree students who take more than two courses concurrently, may need to complete more than 24 credits to complete 30 weeks of instructional time. In addition, the academic policy of the University prohibits a student from taking more than two courses concurrently without written approval from the Campus Director of Academic Affairs. Due to overlapping courses, there will be more credit hours included in the academic year, and federal financial aid may not completely cover the cost of attendance and related charges.

Federal regulations prohibit payment for auditing a course or payment for any course an assigned grade is not used in computing requirements for graduation. This includes repeats of grades D or better, unless a higher grade is required, withdrawals and courses that are not applicable to the declared degree objective. This does not apply to repeats of required courses that a student has failed.

**Verification**

A federal financial aid student may be chosen to participate in the verification process by the U.S. Department of Education Central Processing System. The Central Processing System prints an asterisk next to the expected family contribution (EFC) on the Institutional Student Information Report (ISIR), Student Aid Report (SAR) or SAR Acknowledgement to identify the student has been selected for verification. The purpose of verification is to maintain the integrity of federal financial aid programs by verifying the information provided by students and parents on financial aid applications. Federal regulations require verification be completed. Verification is not required to be completed in cases where the student is awarded only non-need-based aid such as Direct unsubsidized loans and PLUS Loans. If a student is selected for verification, the University will request the student to provide all applicable documentation, which may include, but is not limited to, the following:

- IRS-issued federal tax return transcript(s)
- Verification worksheet
- Verification of household member(s) receiving Supplemental Nutrition Assistance Program (SNAP) benefits
- Verification of child support paid
- Documentation of high school completion
- Government-issued photo identification
  - To comply with 18 USC § 701, the University is unable to make or accept photo copies of military identification cards. Copies of military identification cards will not be accepted.
- Statement of Educational Purpose

Additional documents may be required by the University to complete the verification process. A student will receive written notification from the University of verification requirements, required documentation, and the timelines for completion of the process. Failure to comply with a request for verification documents within 30 days of receiving written notification from the University can result in the deactivation of the federal financial aid application. A Pell Grant applicant selected for verification must complete the process by the published deadline, September 26, 2014, or 120 days after the last day of the student’s enrollment, whichever is earlier.
Cost of Attendance Policy

A student’s cost of attendance (COA) is established solely for use in calculating federal financial aid eligibility and awarding for a specific period of enrollment. The University reviews and, if necessary, updates each component annually, referencing the College Board website at http://professionals.collegeboard.com/higher-ed, the National Retail Federation Survey and actual institutional data. The University uses estimated monthly living expenses, and an average cost of tuition, electronic course materials and books. Amounts used in the cost of attendance (COA) are as follows:

<table>
<thead>
<tr>
<th>Cost of Attendance Components</th>
<th>Ground Campuses*</th>
<th>Online Campus*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grade Level</td>

</tbody>
</table>

* Note: Housing expense for Military Basic Allowance for Housing (BAH) is reduced by 72%. Living expenses include allowances for room and board, transportation and miscellaneous educational expenses.

**Military is assumed as all active for average weighting of tuition.

For detailed information regarding actual tuition fees for programs and locations, contact a Finance Advisor or visit the tuition and fees calculator web page at http://www.phoenix.edu/tuition_and_financial_options/tuition_and_fees.html.

Policy

The University uses an average monthly cost of living expense, based on the following:
- Nine months for associate’s degree-seeking students
- Ten months for bachelor’s degree-seeking students
- Twelve months for graduate students

The University COA consists of the following components:
- Tuition
- Electronic Course Materials and Books (eResource Fees)
- Living Expense
- Housing
- Transportation (excluding Online students)
- Miscellaneous (school supplies and personal expenses)
- Loan Fees

Tuition

Average tuition rates are obtained annually for online programs, and programs for each certificate and degree level. The tuition expense for the COA is an average based on modality and certificate and degree level. The University documents how averages are calculated and makes this information available upon request. Exceptions include professional judgment decisions and elimination of an overaward using actual tuition costs. If a student’s period of enrollment is less than a full academic year, costs are adjusted to match the period of enrollment.

Electronic Course Materials and Books

The University charges a flat eResource fee for each enrolled course for the period of enrollment.

Living Expense

The monthly living expense component is based on the low budget for a 12-month academic year, as published by the College Board at http://professionals.collegeboard.com/higher-ed/financial-aid/living-expense. This is used to calculate a monthly living expense amount used for students of all regions and states. The monthly living expense is multiplied by the months in the loan period, based on the degree level. Students receiving military housing assistance will have a reduction in living expenses in the amount of the housing allowance.

End of Program Periods

The end of program (EOP) COA is based on the credits required to
complete the program and the weeks of instructional time, converted to months, needed to complete those credits. The months are rounded up and multiplied by the monthly living expense amount to determine the EOP COA. The COA will not increase if a remaining period needs to be extended due to the student failing or withdrawing from a course(s) in the prorated period.

**Loan Fees**
The University calculates an average loan fee by performing a separate calculation for undergraduate and graduate students.

**Tribal Budget**
The University prepares a separate tribal budget for students who receive tribal funding. The tribal budget consists of actual tuition rates for the tuition component and may include a child/dependent care average component obtained from the National Association of Childcare Resource and Referral Agency (NACCRRA). The University averages each childcare type for weekly and hourly cost for each state. Documentation is available for review, upon request.

**Minnesota Child Care Budget**
For students who are receiving the Minnesota Postsecondary Child Care Grant, the University will add actual childcare costs to the cost of attendance before computing financial need. This amount will be captured in the application process.

**Grade Level Determination**

Determination of grade level is an important part of calculating eligibility for federal and state financial aid. The University bases grade levels on credits completed at the start of an academic year. An academic year is defined as a minimum of 24 credits and 30 weeks of instructional time.

<table>
<thead>
<tr>

</tbody>
</table>

*Note: A student in a two-year program or certificate program cannot receive more than a grade level 2 (GL2) annual loan limit in any given year, no matter how long it takes to complete the program or certificate.*

**Conflicting Information**

If the University has conflicting information concerning a student’s eligibility or has any reason to believe a student's application information is incorrect, the University will resolve such discrepancies before disbursing student financial aid funds. If discrepancies are discovered after disbursing student financial aid funds, the University will reconcile the conflicting information and require the student to repay any funds for which he or she was ineligible, unless the student is no longer enrolled for the award year. Examples of conflicting information may include, but are not limited to, the following:

- Social security numbers
- Date of birth
- Legal name
- Discrepant tax data (including whether or not the student/parent was required to file a tax return)
- Household size or marital status
- Citizenship status

**Other Resources**

Students are required to disclose financial assistance that will be paid by a third party on their behalf. When a portion of a student’s cost of attendance is waived or paid by another source, other than federal financial aid, this is considered other resources. Examples of other resources include, but are not limited to, the following:

- External grants and scholarships
- University grants and scholarships
- Tuition assistance
- Military tuition benefits
- University tuition discounts and waivers
- University administration tuition and/or student account adjustments
- Income from insurance programs that pay for the student’s education
- Private loans
- Private and State grants
- Tribal aid
- Other financial assistance paid directly to the University

*Note: Adjustments to tuition due to an approved Leave of Absence, early payment discounts and cash payments made by the student will not count as other resources.*

A student must have financial need to receive all federal financial aid funds except for Direct unsubsidized and PLUS loans under the Direct Loans program. As such, a student’s expected family contribution and other resources will be subtracted from the cost of attendance when determining eligibility for federal financial aid (Title IV). All awards, including need and non-need based aid, cannot exceed a student’s annual cost of attendance.

If the University receives additional other resources that causes the student to exceed the cost of attendance, it will adjust the awards appropriately to eliminate the overaward. This may include reducing future disbursements for a second or subsequent payment period or returning awards to the funding source. Funds will be returned in the order most beneficial to the student.

**Satisfactory Academic Progress**

Information regarding University academic progress standards for individual programs may be found in the program specific sections of this catalog.

**Satisfactory Academic Progress (SAP) for DVA Education Benefits**

To receive Department of Veterans Affairs (DVA) education benefits, a student must maintain satisfactory academic progress (SAP)
and conduct. Accordingly, benefits will be terminated for individuals who are disqualified, suspended or expelled from the University.

**Academic Probation**

Academic probation (AP) shall occur when a grade point average (GPA) falls below acceptable levels for the program. Probation lasts for a period of four consecutive program-applicable courses. Concurrent enrollment is prohibited during the four-course AP sequence.

Associate degree students enrolled at the online campus should continue traditional block scheduling format with concurrent enrollment in two courses (excluding AACR & AAPF). In graduate programs, the four-course sequence excludes any undergraduate prerequisite courses. Financial aid students will continue to receive funds during the probationary period.

Veteran students will continue to receive DVA education benefits during the probation period. The veteran will be notified of the disqualification. To reapply, a formal application for re-establishment must be submitted in accordance with University admission procedures. In addition, applicants should explain the reasons for the scholastic deficiencies; the manner in which the intervening time has been spent; and why they should be given favorable consideration for readmission. The readmission file will be reviewed by the Student Appeals Center and a decision reached regarding readmission. If approved, the student will be placed on financial aid disqualification (FD) status.

**Academic Disqualification**

Academic disqualification (AD) will result if a student fails to clear an academic probation status within four courses from the onset of probation. Veteran students will not be eligible for DVA educational benefits after disqualification. The DVA and student will be notified of the disqualification. To reapply, a formal application for admission must be submitted in accordance with University admission procedures. In addition, applicants should explain the reasons for the scholastic deficiencies; the manner in which the intervening time has been spent; and why they should be given favorable consideration for readmission.

**Federal Financial Aid Satisfactory Academic Progress**

**Purpose**

Federal regulations require institutions to establish a reasonable satisfactory academic progress (SAP) policy for determining whether an otherwise eligible student is making satisfactory academic progress in an educational program and may receive financial aid under the Title IV, HEA programs. The policy must be at least as strict as the policy the institution applies to a student who is not receiving federal financial aid under the Title IV, HEA programs.

**Policy**

Students must maintain SAP throughout the duration of their academic program to be eligible for federal financial aid. SAP is assessed by qualitative and quantitative measures and is evaluated at the end of each completed payment period in the student’s academic program.

**Quantitative Measure**

**Grade Point Average**

Undergraduate students must have a cumulative program grade point average (GPA) of 2.0 at the end of each completed payment period, unless otherwise defined by academic policy. Graduate students must have a program GPA of 3.0 at the end of each completed payment period.

A student’s cumulative program GPA is calculated using only those grades earned at the University for the current program of study. The program GPA is computed by adding the program-applicable cumulative grade quality points earned (calculated by multiplying the credit hours and the weight of the grade earned in the course) and dividing it by the program-applicable cumulative total number of credit hours completed.

Courses from which the student withdraws are not included in the program GPA calculation for the qualitative measurement.

**Qualitative Exclusions**

The following are excluded from the qualitative computation:

- Waivers
- National Testing Programs
- COCA (Comprehensive Outcomes of Cognitive Assessment)
- Courses with the following grades:
  - IN PROGRESS EXTENSION (IX) (provided there is no formal grade)
  - AUDIT (AU)
  - Incomplete (I)
  - In Progress (IP)
  - No grade awarded (QC)
  - Passing (P)
  - Withdrawal (W)
  - Withdrawal/Failing (WF)
  - Waived with Credit (WC)
  - No Credit (NC)
- Orientations with the following completion statuses:
  - Orientation Complete (OC)
  - Orientation Not Complete (ON)
  - Orientation Extension (OX)
- Assessed Credits

**Quantitative Measure**

Each academic program has a published standard credit load for completion. Incremental progression will automatically be evaluated for all periods of attendance at the University, including periods the student did not receive federal financial aid.

**Maximum Timeframe**

The maximum timeframe to complete the program cannot exceed 150% of the published length of the program measured in credit hours attempted for undergraduate and graduate students. Progress is evaluated cumulatively at the completion of each payment period for a student’s primary program of study to ensure completion of the program within the 150% maximum timeframe.

If a student cannot complete the program of study within the maximum timeframe (as determined at the end of the payment period), the student will be placed on financial aid disqualification (FD) status and will not have the ability to appeal. (See exception under Student Financial Aid Appeals for students with 12 credits or less remaining in their program of study.)

**Pace of Completion**

The quantitative measure for the pace of completion is calculated using the following formula:

\[
\text{Cumulative number of credit hours the student successfully completed divided by}
\]

\[
\text{Cumulative number of credit hours the student attempted}
\]

At the end of each payment period, the student’s pace of completion is evaluated. Students must earn at least 67% of the credit
hours attempted toward completion of the primary program of study. Credit hours taken at other institutions and accepted toward a student’s primary program of study at the University are included in both attempted and completed credit hours when measuring pace of completion. Courses from which the student withdraws are counted as attempted credit hours when calculating the quantitative measurement or program pace.

**Included in Pace of Completion**

The following are included as attempted in the pace of completion calculation:
- Courses that are waived with credit (WC)
- Assessed Credits
- Withdrawal (W)
- Withdrawal/Failing (WF)
- Courses completed with the following grades: A, B, C, D, and F (+/-)
- In Progress (IP)
- Incompletes (I and IF)
- No grade awarded (QC)

**Evaluation**

The University evaluates SAP for the student's primary program of study, based on a completed payment period (generally, at least 12 credit hours and 15 weeks of instruction). As a result of the evaluation, a student is assigned a SAP status.

**Financial Aid Warning**

Undergraduate students who have less than a cumulative 2.0 GPA, or otherwise minimum as stated in policy, and graduate students who have less than a 3.0 OR who do not earn 67% of the credits they attempt (cumulatively) at the end of a completed payment period, are automatically placed on financial aid warning (FW) status. The University can disburse federal financial aid funds to students on financial aid warning (FW) status for one payment period.

**Financial Aid Disqualification**

If a student on financial aid warning (FW) status does not meet SAP at the end of the subsequent completed payment period, the student is not eligible for additional federal financial aid and will be placed on a financial aid disqualified (FD) status. Students who are placed on financial aid disqualified (FD) status are ineligible for federal financial aid.

**Financial Aid Probation**

Students who are granted an appeal will be placed on financial aid probation (FP) status and will have their financial aid eligibility reinstated based on the appeal. The University can disburse federal financial aid funds to students on financial aid probation (FP) status for one probationary payment period, provided all other eligibility requirements are met. The student must meet the University’s SAP standards to maintain federal financial aid eligibility.

**Student Notification**

The University will notify students at any point during their enrollment if they are placed on or taken off the Financial Aid Warning (FW), Financial Aid Probation (FP), Financial Aid Disqualification (FD) or Regular Student (RG) statuses, as these affect student eligibility to receive federal financial aid.

**Student Financial Aid Appeals**

Students placed on financial aid disqualification (FD) status due to a violation of the qualitative and/or quantitative standards during the financial aid warning period may appeal the disqualification to regain eligibility for federal financial aid. Students may do so by submitting an appeal to the Student Financial Services - Operations Professional Judgment (SFS-O PJ) Team. The SFS PJ form is located on the financial aid website (FAW) at http://www.faw.phoenix.edu/. If there are unusual circumstances that should be considered during the appeal process, federal financial aid reinstatement may be possible during a financial aid probation period. Approval and/or reinstatement of federal financial aid eligibility is not guaranteed. The Professional Judgment Team reviews all appeals on a case-by-case basis. Approval is only granted when there are significant extenuating circumstances. All decisions made by the Professional Judgment Team are final.

The University will allow a student to have a maximum of two approved appeals during their time at the University. These appeals cannot be consecutive and will only be considered if unusual circumstances exist. Examples of unusual circumstances may include, but are not limited to, the following:
- Death of a relative
- An injury or illness of the student
- Other special circumstances

Students must explain in the appeals process why the nature and timing of their unusual circumstance(s) directly prohibited them from maintaining SAP, and what has changed in their situation that would allow them to demonstrate SAP at the next evaluation. If students have more than 12 credits remaining in their program of study, they must demonstrate they will be able to graduate within the maximum timeframe allowed. If students have 12 or less credits remaining, they must demonstrate the ability to complete the remaining credits successfully.

**Regaining Eligibility after Payment Period of Ineligibility**

A student who is not making SAP regains eligibility only when the student is in compliance with the University’s SAP requirements. Therefore, if a student loses eligibility for federal financial aid as a result of not meeting SAP requirements, the student must pay for the ineligible payment period using non-federal financial aid funds. If, after the ineligible payment period, the student meets all SAP criteria, the student’s borrower-based academic year (BBAY) will start at the beginning of the eligible payment period following the period of ineligibility. The BBAY will be packaged for a full 24 credits and 30 weeks of instructional time.

If the ineligible payment period is the second payment period of an academic year/loan period already established, any federal financial aid awarded for the second payment period will be canceled and, if necessary, returned to the funding source.

**Maximum Timeframe**

If at any time during the evaluation period it is determined a student is not going to complete the program of study within the maximum timeframe of 150% of the length of the educational program, the student becomes ineligible for federal financial aid. This determination cannot be appealed.

**Transfer Credits - Qualitative**

A student’s program GPA is calculated using only grades earned at the University in courses that are applicable to the program. Therefore, transfer credits will not apply when calculating the student’s GPA at the University. Transfer credits include credits for all courses not completed at the University that are applied toward the completion of the student’s degree program.

**Transfer Credits - Quantitative**

Credits taken at other institutions and applied toward the student’s program/version at the University are included in both attempted
and completed hours when measuring the student’s pace toward completion. Students who change program/versions at the University will be re-evaluated to determine which credits apply to the new program/version.

**Program Changes**
Students who change program/versions at the University will be re-evaluated to determine which credits apply to the new program/version. SAP is assessed by qualitative and quantitative measures and is evaluated at the end of each completed payment period in the student’s new program/version.

**Repeat Courses**
Grades for prior attempts are excluded when calculating the qualitative component. However, credits from all attempts are included when assessing if the student meets the quantitative component. Although a student may successfully complete a course more than once, only the first passing grade is counted as a completion when calculating the quantitative component.

**Concurrent Enrollment**
The University will evaluate SAP for the primary program based on completed weeks and credits of a payment period, regardless of whether or not the student is enrolled concurrently. All credits completed at the University that are applicable to the primary program will apply toward the primary program’s GPA.

**Academic Probation**
Information regarding University academic progress standards for individual programs may be found in the appropriate University Academic Catalog at http://www.phoenix.edu/programs/degree-programs/academic-catalog.html.

**Professional Judgment**
The University may exercise discretion to accommodate special circumstances, with respect to some aspects of eligibility, using professional judgment. Professional judgment allows the University to treat a student individually when the student has special circumstances not sufficiently addressed by standard procedures. The University uses professional judgment on a case-by-case basis. Special circumstances will include conditions that differentiate an individual student from a whole class of students. The University will not accept professional judgments made for a student by another school, but will independently review the circumstances and, if appropriate, document the professional judgment decision. The decision of the University regarding professional judgment is final and cannot be appealed to the U.S. Department of Education. A student should contact a Finance Advisor if interested in submitting a professional judgment request.

**Attendance**
In classes at the Online campus, a class "session" is defined as 12 am (MST) Tuesday to 11:59 pm (MST) the following Monday. If a student posts a message to a class newsgroup on any two days during that week, the student is in attendance for that class session. In Associate degree courses at the Online Campus, a class "session" is defined as 12 am (MST) Monday to 11:59 pm (MST) the following Sunday. If a student posts a message to a class newsgroup on any two days during that week, the student is in attendance for that class session.

**Local Campus**
Most local campus classes meet four (4) hours per week. Students are in attendance at the local campus workshops if they physically attend the local campus workshop meeting at any time during the scheduled class hours and sign the attendance roster. Attendance at the scheduled campus class meetings is mandatory.

**Directed Study**
Attendance in Directed Study courses is tracked in the same manner for both the local campus and online modalities. A Directed Study student receives automatic attendance for a class week if she or he posts one (1) message to any of the course forums during the scheduled class week. Deadlines for attendance are based on Mountain Standard Time.

**FlexNet®**
FlexNet® students are in attendance at the local campus workshops if they physically attend the local campus workshop meeting during the scheduled class hours and sign the attendance roster. They are in attendance during online class weeks if they post to any of the class forums on two separate days based on Mountain Standard Time within the online class week. Attendance for the online weeks of a FlexNet® course is tracked automatically.

**School of Advanced Studies**
In order to be in attendance during a week, a student/learner must post at least one (1) message to any of the course forums on two separate days during the online week. Deadlines for attendance are based on Mountain Standard Time (MST). Attendance is tracked automatically in all online courses.

**Online**
In order to be in attendance during a week, a student must post at least one message to any of the course forums on two separate days during the online week. Deadlines for attendance are based on Mountain Standard Time (MST). Attendance is tracked automatically in all online courses.

The University's unexcused absence policy allows unexcused absence(s) to be granted based on the number of workshops within a course (refer to the chart below). An unexcused absence may affect the final course grade due to the missed opportunity to earn participation points. Unexcused absences will result in an automatic withdrawal (W) grade if students miss more than
the maximum allowed absences. Refer to the chart below:

<table>
<thead>
<tr>
<th>Number of workshops</th>
<th>Allowed Absences</th>
<th>Absences resulting in withdrawal (W) grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>0</td>
<td>1</td>

</tr>
<tr>
<td>Associate</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>10-50+</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>

Faculty requests for a withdrawal/failing (WF) grade will be approved for extenuating circumstances only and will be administered by the Registrar’s Office. Requests should be submitted to the Registrar’s Office by sending the approved Official Grade/Attendance Change Form.

**Academically Related Activities**

To maintain continuous attendance and financial aid eligibility, the following activities that occur on or after the course start date and on or before the course end date will be considered academically related activities. Academically related activities (ARAs) determine a student’s enrollment status with the University. Students can maintain continuous enrollment by ensuring no more than 14 days elapse between posting attendance at an academically related activity.

**For online/directed study courses:**
- All OLS Postings in a course (includes discussions, assignments, and quizzes, learning team activities)

**For local campus courses:**
- Physical Attendance; verified by a signed attendance roster
- Assignments posted via the assignment link
- Learning Team Acknowledgements via assignment link

**For local campus FlexNet® courses:**
- Online Learning System (OLS) posts occurring during Online workshop week will be counted as an academic related activity

Note: A student must be considered enrolled and attending the University to maintain financial aid eligibility.

**Leave of Absence**

**Purpose**
The University must have a written formal leave of absence (LOA) policy. The University and students must comply with the stated policy as well as governing regulations when requesting, approving, and processing LOAs.

**Policy**
This policy is applicable to all students enrolled in degree programs at the University of Phoenix. Students may be approved by the University for multiple LOAs in a 12-month period. The total of all LOAs may not exceed 180 calendar days in the 12-month period. During an LOA, the student is not considered withdrawn and no Return to Title IV (R2T4) calculation is required for financial aid recipients. The University will not impose additional charges when the approved LOA ends and the students resume their program of study.

**Required Documentation**

A leave of absence (LOA) may be approved if the University determines there is a reasonable expectation the student will return. Students must follow the University LOA Policy when requesting the LOA, by providing to the finance advisor (on or before the start of the LOA) a written, signed, and dated request, including the reason for the LOA to the finance advisor. All requests must be forwarded to Student Financial Services - Operations (SFS-O).

If unforeseen circumstances prevent a student from providing a request to the campus on or before the start of the LOA, the University may grant the LOA if the campus has documented the reason and decision. The campus must collect the signed LOA request form from the student at a later date and provide it to SFS-O within a reasonable amount of time from the last date of attendance. Unforeseen circumstances may include, but are not limited to, medical and family emergencies, military, jury duty, business travel, University course cancellation and/or facility closure, and natural disasters.

If a student is out of attendance due to an unforeseen circumstance and considered an unofficial withdrawal and the campus can document the reason and decision for the LOA prior to the Return of Title IV (R2T4) Calculation being performed, the student will be placed on an approved LOA and no calculation will be required. However, if the student is an unofficial withdrawal and the campus does not document the reason prior to the calculation being performed, the student will be considered an unofficial withdrawal.

An LOA will not be approved if a student requests an LOA after 14 consecutive days of nonattendance, is in an unofficial withdrawal (UW) status and the request is not due to unforeseen circumstances that occurred prior to the UW status.

If a student requests an LOA start date in the future and is officially withdrawn, unofficially withdrawn, or administratively withdrawn from the University prior to the start date of the LOA, the LOA is not valid and will be negated.

**Length**
In determining the length of the LOA, the LOA start date is the first day of the LOA and the LOA end date is the day before the student’s re-entry date. The first day of the student’s initial LOA is used when determining the start date for the 12-month period. If a student is granted an LOA due to unforeseen circumstances, the beginning date of the approved LOA is the date the student was unable to attend class because of the unforeseen circumstance. If the student posts an academically related activity (ARA) after the LOA start date but prior to the end date on the LOA request form, the student’s enrollment status will be updated to “active” and the student will be considered to have returned from the LOA. A new LOA request form will be required for any additional LOAs.

**Extending an LOA**
A student may request an LOA extension as long as the request is made before the scheduled return date. Students must follow the University LOA Policy when requesting the LOA extension, by providing, on or before the scheduled return date, a written, signed, and dated request, including the reason for the LOA extension to the finance advisor. All requests must be forwarded to Student Financial Services - Operations (SFS-O).

**Institutionally Scheduled Breaks**
If a student submits an LOA request with a start date being the same day as the start of an institutionally scheduled break or a start date that falls within an institutionally scheduled break, the Uni-
University will update the LOA start date to the first day after the institutionally scheduled break ends.

If a student’s LOA is scheduled to end on or within an institutionally schedule break, the University will update the LOA end date to the day prior to the start date of the institutionally scheduled break as long as the student is registered for a course set to begin when the institutionally scheduled break ends.

If a student's LOA request completely overlaps an institutionally scheduled break, all days of the institutionally scheduled break along with the LOA days will count toward the length of the LOA and apply toward the maximum of 180 days in a 12-month period. The University will not allow a student to take two consecutive LOAs separated by an institutionally scheduled break.

**Disbursements during an LOA**

The University may disburse Pell, IASG, FSEOG and Perkins loan funds to a student on an LOA during certain times of the year. Federal financial aid funds that are part of a credit balance created before a student began an LOA may be paid to a student, since those funds were disbursed before the student went on the LOA.

**Completion of Coursework upon Return**

If a student takes an approved LOA in the middle of a course, the University must ensure no additional charges are incurred when the student returns. To ensure no additional charges are incurred, the University will issue the student an LOA Credit (LOAC). This LOAC will be applied to the course the student is returning.

**Failure to Return**

The University will advise the student, prior to granting the leave of absence, the affect that failure to return from an LOA may have on the student’s loan repayment terms, including the expiration of the grace period. If a student does not return from an approved LOA, the withdrawal date and beginning of the grace period will be the student's last date of attendance.

If the student reenters, after withdrawing from the University, the previously approved LOA days will count toward the student LOA maximum of 180 days in a 12-month period.

**Financial Aid Disbursements**

**Federal Funds**

Provided the student has met all eligibility requirements, a student may be eligible to receive the first disbursement of federal financial aid funds at the start of the program or academic year. The student becomes eligible to receive a disbursement of federal financial aid funds for the second payment period when the student successfully completes one-half of the weeks of instructional time and one-half the credit hours in the academic year.

First-time, first-year undergraduate borrowers will not have the first installment of the Direct Loan disbursed until 30 calendar days after the program of study academic year begins.

---

**Application of Funds**

Federal financial aid and/or state assistance funds are retained at the time of disbursement to pay allowable academic year or payment period charges owed to the University. Allowable charges are defined as tuition (including independent study and state sales tax) and electronic course material. Federal financial aid funds may only be used to pay for costs the student incurs for the period for which the federal financial aid funds are provided. However, the University may use current-year federal financial aid funds to satisfy prior award year allowable charges for a total of not more than $200.

**Authorization to Apply Federal Financial Aid Funds**

The University may obtain a student (or parent) written, voluntary authorization through the University financial aid application process to retain a federal financial aid credit balance. The University will not require or coerce the authorization and will notify the student (or parent) that the authorization may be canceled at any time. If the student (or parent) chooses to cancel the authorization, the cancellation is not retroactive. Funds retained for incurred allowable charges and prior year charges retained prior to the University receiving the authorization cancellation, will remain on account. At any time, the University will accept a signed statement from a student (or parent), canceling or modifying the authorization initially provided. The Authorization to Apply to Future Charges form is available to students on the University’s financial aid web (FAW) site.

The University will accept an authorization provided by the student (or parent) orally, rather than in writing if the student (or parent) has been affected by a Federally-declared disaster and is prevented from providing a written authorization based on status. If a student (or parent) cancels an authorization to apply a federal financial aid credit balance, the funds will be paid directly to the student (or parent in the case of a PLUS loan, or student if authorized by the parent) as soon as possible, but no later than 14 days after the University receives the notice. If the student (or parent) chooses to cancel the authorization, the cancellation is not retroactive. Funds retained for incurred allowable charges and prior year charges retained prior to the University receiving the authorization cancellation, will remain on account.

At any time, the University will accept a signed statement from a student (or parent), canceling or modifying the authorization initially provided. The Authorization to Apply to Future Charges form is available to students on the University’s financial aid web (FAW) site.

The University may obtain a student (or parent) written, voluntary authorization through the University financial aid application process to retain a federal financial aid credit balance. The University will not require or coerce the authorization and will notify the student (or parent) that the authorization may be canceled at any time. If the student (or parent) chooses to cancel the authorization, the cancellation is not retroactive. Funds retained for incurred allowable charges and prior year charges retained prior to the University receiving the authorization cancellation, will remain on account.

At any time, the University will accept a signed statement from a student (or parent), canceling or modifying the authorization initially provided. The Authorization to Apply to Future Charges form is available to students on the University’s financial aid web (FAW) site.

There are three options to notify the University regarding Authorization to Apply to Future Charges form:

1. **Initial notification**
   - The student is prompted to answer authorization to apply funds questions when completing the financial aid application process on the Financial Aid website (FAW) at https://faw.phoenix.edu/.
   - When a student signs and submits the Authorization to Apply to Future Charges form, they no longer have access to make corrections.

2. **Update/Change Authorization to Apply to Future Charges**
   - If a student or parent wants to update or change the original authorization to apply funds, he or she may submit an updated Authorization to Apply to Future Charges form at any time.
   - This form is available for print from the Financial Aid website (FAW) at https://faw.phoenix.edu/.
   - The student or parent completes and faxes form to finance advisor for processing.
   - When an update is submitted, it is only in effect for future disbursements and the authorizations are not retroactive.

3. **Signed statement**
   - The student or parent submits a signed statement to the University's financial aid office.
• The University will accept a signed statement from a student or parent outlining any changes to the Authorization to Apply to Future Charges form at any time.
• Student Financial Services - Operations (SFS-O) processes the request accordingly.
• When an update is submitted, it is only in effect for future disbursements and authorizations are not retroactive.

Retaining Funds with Authorization
The University will automatically retain, from each federal financial aid disbursement, unpaid estimated future charges that are owed to the University for the loan period/academic year. (Refer to the Allowable Charges Policy for additional information)
If charges have not been charged to the student’s account at the time funds are disbursed, the University will retain funds for the estimated future charges for the loan period/academic year. These estimated charges will be based on original certified credits for the loan period/academic year.
If both the first and second disbursements are received simultaneously or separately, in the second payment period, allowable charges may be withheld for both disbursements. Notwithstanding any authorization, the University will pay any remaining balance on loan funds by the end of the loan period and any remaining other federal financial aid program funds by the end of the last payment period in the award year for which they were awarded.

Application of Funds
The University will withhold for allowable charges using the following order:
• Outstanding unpaid charges for the loan period, payment period or award year
• Authorized future charges less funds already on account
• Remaining funds will be disbursed to the student

Retaining Funds without Authorization
The University will automatically retain funds for allowable charges for the loan period/academic year that have been charged to the student account. If both the first and second disbursements are received simultaneously, allowable charges may be withheld for both payment periods provided those charges have been charged to the student account.
If, after allowable charges have been satisfied, there are excess funds remaining and the student owes the University for a prior academic year, the University will automatically retain federal financial aid funds to satisfy the prior academic year charges for tuition, electronic course material fees and directed study for a total of not more than $200.

Application of Funds
The University will withhold for allowable charges using the following order:
• Invoiced unpaid charges for the individual payment period
• Prior year charges for tuition and fees
• Remaining funds will be disbursed to the student (or parent in the case of a PLUS loan, or student if authorized by the parent)

Disbursement for Books and Supplies
Pell-eligible students may use Pell funds to purchase books if those funds could have been disbursed 10 days prior to the beginning of the payment period. Disbursed funds would create a federal financial aid credit balance. The student should contact a finance advisor for eligibility. The student will be provided with the lesser of the presumed credit balance or amount. The student will be notified of eligibility and provided instructions to redeem the book voucher from EdMap.

Students receiving funds through this method do not need to provide written authorization and may opt out of receiving a book voucher. If a student opts out of receiving the book voucher, the credit balance will be sent approximately two weeks after all federal financial aid funds have been disbursed.

Cancellation of Federal Financial Aid
The student (or parent in the case of a Parent PLUS Loan) must inform the University if all or a portion of federal financial aid funds are to be canceled. The student or parent must submit a signed and dated statement or complete a Financial Aid Change form, located on the Financial Aid website (FAW) at https://faw.phoenix.edu/
The University may return the loan funds; cancel the loan or both, provided the cancellation request is received within the required timeframes. If the University receives a student or parent request for cancellation after these dates, the University may, but is not required to, honor the request. Regardless of when the request is received, the University informs the student or parent in writing of the outcome of the request.

When processing a loan cancellation request, the University must return the funds (if received) and/or cancel the loan or both as appropriate. The University is not responsible for returning any portion of a loan that was disbursed to a student or parent directly before the request for cancellation was received.

State Funds
A payment period is defined according to individual state requirements. The payment period determines when funds are disbursed and the exact amount to be disbursed.

Federal Financial Aid Loan Counseling

Federal Direct Loan Entrance Counseling
The University ensures loan entrance counseling is conducted online at the U.S. Department of Education website (https://studentloans.gov/myDirectLoan/index.action) for students/parents borrowing federal subsidized/unsubsidized student loans or PLUS loans for the first time. Entrance counseling generally includes the following:
• An explanation of the use of a Master Promissory Note (MPN)
• Importance of repayment obligation
• Description of consequences of default
• Sample repayment schedules
• Information in reference to a borrower's rights and responsibilities
• Information on the National Student Loan Data System (NSLDS), http://www.nslds.ed.gov/nslds_SA/
• Other terms and conditions

The goal of entrance counseling is to help the borrower understand what it means to borrow federal student loans. More details about entrance counseling can be viewed online at the Federal Student Aid website, http://studentaid.ed.gov/fafsa/next-steps/entrance-counseling.

Beginning June 28, 2013, entrance counseling materials on https://studentloans.gov/myDirectLoan/index.action will, as a temporary measure, include a link to information regarding the 150 percent limit in the attached document: https://webmkt.s3.amazonaws.com/phoenix.edu/financialaids150percent.pdf.

Federal Direct Loan Exit Counseling

The University ensures loan exit counseling is conducted online at the U.S. Department of Education website (https://studentloans.gov/myDirectLoan/index.action) shortly before the student ceases at least half-time enrollment, within 30 days of completion of a program or withdrawal from the University. Exit counseling generally includes the following:

- An explanation of the use of a master promissory note (MPN)
- Importance of repayment obligation
- Description of consequences of default
- Sample repayment schedules
- Information in reference to a borrower's rights and responsibilities
- Information on the National Student Loan Data System (NSLDS), http://www.nslds.ed.gov/nslds_SA/
- Other terms and conditions

Beginning October, 2013, exit counseling materials on https://studentloans.gov/myDirectLoan/index.action will include information regarding the 150 percent limit.

Federal Perkins Loan Counseling

The University ensures Perkins loan counseling is conducted online at the Mapping Your Future website at http://mappingsyourfuture.org/oslc/. Perkins loan counseling generally includes the following:

- Importance of repayment obligation
- Explanation of repayment terms
- Consequences of delinquency and default
- Sample repayment schedules
- Information in reference to a borrower's rights and responsibilities
- Other terms and conditions

Federal Teacher Education Assistance for College and Higher Education Grant Counseling

The University ensures initial and subsequent Teacher Education Assistance for College and Higher Education (TEACH) Grant counseling is conducted online at the National Student Loan Data System (NSLDS) student access site at http://www.nslds.ed.gov/nslds_SA/.

Federal Loan Repayment

Prior Loan Deferments (Postponing Payments)

A student who is registered and attending classes at the University may have federal financial aid loans from previous colleges deferred. Deferment forms can be obtained from the lender if the loan is from another school. Return all deferment forms to a Finance Advisor, who forwards the forms to the Registrar's Office for processing to the holder of the loan. The loan holder makes the final determination to grant a deferment request.

Students receiving federal financial aid funds may also obtain deferments while serving in the Peace Corps, under the Domestic Volunteer Service Act and as a volunteer for a tax-exempt organization of demonstrated effectiveness in the field of community service.

Receiving a deferment is not automatic; therefore, the student or parent(s) must apply for it. Borrowers must formally request a deferment through the procedures established by the holder of their loan(s). Detailed information regarding deferments may be viewed at http://studentaid.ed.gov/PORTALSWebApp/students/english/difficulty.jsp or http://www2.ed.gov/offices/OSFAP/DirectLoan/postpone.html

Loan Payment Calculator

Loan payment calculators may be used by students or potential students to calculate monthly payments under the different student loan repayment plans available.

Separate Income-Contingent Repayment Plan (ICR) calculator and Income-Based Repayment Plan (IBR) calculator are available for use to get estimates for repaying federal student loans.

Income-Based Repayment Calculator http://studentaid.ed.gov/repay-loans/understand/plans/income-based/calculator

Federal Student Loan Consolidation

A Direct Loan consolidation allows a borrower to combine multiple federal student loans into one, which results in one bill, and one lender. It can also lower monthly payments by giving borrowers up to 30 years to repay their loans; however, by increasing the length of the repayment period, you will also make more payments, and pay more in interest. Most federal student loans, including the following, are eligible for consolidation:

- Direct Subsidized Loans
- Direct Unsubsidized Loans
- Subsidized Federal Stafford Loans
- Unsubsidized Federal Stafford Loans
- Direct PLUS Loans
- PLUS loans from the Federal Family Education Loan (FFEL) Program
- Supplemental Loans for Students (SLS)
- Federal Perkins Loans
- Federal Nursing Loans
- Health Education Assistance Loans
- Some existing consolidation loans

When considering consolidation, it is important to consider the pros and cons. Consolidation could give borrowers access to alternative repayment plans, which they did not have had before, and enable them to switch from a variable interest rate loan to a fixed interest rate. Consolidation may also cause borrowers to lose benefits offered with the original loans such as interest rate discounts, principal rebates, or some loan cancellation benefits, which can significantly reduce the cost of repaying loans.

More information regarding loan consolidation is located at http://studentaid.ed.gov/repay-loans/consolidation

Federal Student Loan Forgiveness, Cancellation, and Discharge

In certain situations, borrowers can have their federal student loans forgiven, canceled or discharged. Below is a list of the type of forgiveness, cancellation, and discharges available.

- Total and Permanent Disability Discharge
- Death Discharge
- Discharge in Bankruptcy (in rare cases)
- Closed School Discharge
- False Certification of Student Eligibility or Unauthorized Payment Discharge
- Unpaid Refund Discharge
University of Phoenix, 2013-2014

• Teacher Loan Forgiveness
• Public Service Loan Forgiveness
• Perkins Loan Cancellation and Discharge (includes Teacher Cancellation)

Detailed information on these options is available at http://studentaid.ed.gov/repay-loans/forgiveness-cancellation

Veterans Educational Benefits

Students who are entitled to U.S. Department of Veterans Affairs (DVA) education benefits must make initial contact with a campus veterans affairs certifying official. A formal application for admission to the University should be completed before applying for DVA education benefits. Applications for veteran education benefits should be sent to a local campus-certifying official for submission to the DVA.

Each University of Phoenix program segregated by instructional modality (classroom-based or distance education) requires separate State Approving Agency (SAA) approval for the training of veterans or eligible persons. A student should contact a local campus for information on current approvals.

DVA education benefit eligibility and payment rates vary depending on each individual’s military history and the educational program being pursued. Only the DVA can determine eligibility of DVA education applications. For information, a student should contact a DVA representative at 888.GIBILL.1 (888.442.4551) or review http://www.gibill.va.gov

Directed study courses have Defense Activity for Non-Traditional Education Support (DST-DANTES) approval for tuition reimbursement. For more information on this program, a student should contact the Educational Service Officer on the military base. University of Phoenix does not participate in the DVA education advanced payment program.

More information about veterans’ benefits can be reviewed at http://www.phoenix.edu/colleges_divisions/military.html

Visit the Department of Veterans Affairs website, http://www.gibill.va.gov, for additional information on educational entitlements.

Credit for Prior Education and Training

Credit for prior education or training must be evaluated and reported to the U.S. Department of Veterans Affairs (DVA) prior to the start of week 25 of enrollment. The DVA may not always pay DVA education benefits after week 24 if the DVA records indicate the student has a large amount of transfer credits.

Please ensure all prior education transcripts and Joint Services Transcripts (JST) (Army, Navy, Marine), Coast Guard Institute transcripts, or DD-295 and DD-214 forms are submitted for evaluation in a timely manner. The student is responsible for ensuring all transcripts are submitted to the University. Academic credits earned for courses appearing on an official transcript from a regionally accredited or candidate-for-accreditation college or university will be evaluated according to University policies, and accepted subject to the approval of the University Office of Admissions and Evaluation.

Transfer credits based on a different unit of credit than the one prescribed by University of Phoenix are subject to conversion before being transferred. Only the official transcript and course evaluations performed by the University Office of Admissions and Evaluation or Prior Learning Assessment Center are final. Any preliminary reviews by campus personnel are unofficial, not binding and subject to change.

Military Tuition Assistance

To obtain federal military tuition assistance, visit your education or Navy College Office to receive college counseling and develop an education plan. From that point, a student can submit a military tuition assistance request; for more information, visit http://www.phoenix.edu/colleges_divisions/military/military-financial-options/tuition-assistance.html

A student can currently receive 100% of federal tuition assistance from military service, with a $250 cap per semester hour, and a $4,500 annual limit. If a student wants to apply for military tuition assistance, that student will need to submit a completed authorization form to a Military Advisor at least two weeks before a course start date.

DVA Tuition Assistance Top-Up Benefit

Active Duty students who request to use the Tuition Assistance Top-Up (TATU) benefit program should direct all questions or concerns to the DVA at 1.888.GIBILL.1 (1.888.442.4551) or online at http://www.gibill.va.gov/

For more information about VA Tuition Assistance and financial options, go to http://www.phoenix.edu/colleges_divisions/military/military-financial-options/tuition-assistance.html

Military Deployment and Readmission

The Higher Education Opportunity Act (HEOA) provides that an institution may not deny admission or readmission to a servicemember of the uniformed services for reasons relating to that service. An affected servicemember is any individual who is a member of, applies to be a member of, or performs, has performed, applies to perform, or has the obligation to perform, service in the uniformed services. This applies to service in the uniformed services, whether voluntary or involuntary, on active duty in the Armed Forces, on active duty for training, and full-time National Guard duty under Federal authority for a period of more than 30 consecutive days. A call or order to active duty includes state-side deployment of active duty military personnel and deployment outside of the country. This does not include National Guard service under authority of State law.

In addition to the above definition of affected servicemember, the Military Deployment Policies and Procedures will also apply to residents of the state of Iowa who meet the following criteria:

• A student who is an Iowa resident and is a member of the Iowa National Guard or reserve force of the United States who has been ordered to National Guard duty under state authority without such unit being federalized or ordered to Federal active duty, and

To a student who is an Iowa resident and is the spouse of a member of an Iowa National Guard or reserve force of the United States who has been ordered to National Guard duty under state authority without such unit being federalized or ordered to Federal active duty, provided the member of the Iowa National Guard or reserve force of the United States has a dependent child.

The policies outlined below support and assist University of Phoenix with the deployment and readmission of students who are servicemembers.

Military Deployment Policies and Procedures

Upon receipt of deployment orders, students should be advised to notify the University’s Military Division either orally or in writing. It is recommended that a copy of the military deployment paperwork or a signed official letter from the commanding officer be submitted to the student’s campus. Although this formal
documentation is not required at the time of deployment, students should be advised that it will be necessary in order to be readmitted. If documentation is provided, the campus must fax the documents to eXp for inclusion in the student’s file for future reference.

Note: If documentation is provided at the time of deployment, the campus may place the student in the military forbearance status. The military forbearance status ensures students do not continue to incur tuition charges and that current tuition charges are placed on hold for payment until the student returns from deployment.

Note: No advance notice by the student is required if the giving of such notice is precluded by military necessity (e.g. a mission, operation, exercise, or requirement that is classified, or a pending or ongoing mission, operation, exercise or requirement that may be compromised or otherwise adversely affected by public knowledge). In addition, any student (or appropriate officer of the Armed Forces or official of the Department of Defense) who did not give advance notice of service to the appropriate official at the University may meet the notice requirements by submitting, at the time the student seeks readmission, signed documentation (i.e. deployment paperwork or a letter from the student’s commanding officer) to confirm that military duty was the reason for the student’s absence.

Prior to deployment, students should be advised of FERPA policies as the University is unable to coordinate decisions regarding the student’s record or take action on the student’s record through a third party without appropriate authorization granted through a Power of Attorney. The Power of Attorney form must be housed in the student’s eXp file.

Students enrolled in a course at the time of deployment are eligible to receive excused absences in accordance with the excused absences policy. Campuses should use discretion and take such action only if the excused absences would benefit the student by allowing the student the opportunity to complete the course instead of being automatically dropped from the course for not meeting the University course attendance requirement.

Note: Points normally deducted for participation requirements when a student has an absence from class should not be deducted if the cause of the absence is military deployment.

If the student will be unable to complete the course due to military deployment, the student may drop from the course and receive a full refund of tuition and mandatory fees for the course and a withdrawal “W” grade may be issued.

If the student would like an opportunity to complete the course while deployed, an incomplete ‘I’ grade can be issued instead of a ‘W’ grade. The ‘I’ grade may be issued with an initial extension of six (6) weeks beyond the traditional five (5) week extension. The campus practice of requiring final grades to be lowered by one full letter grade as a result of the incomplete ‘I’ grade shall be waived for deployed students.

Note: Additional incomplete extensions beyond the six (6) week period can be requested as needed and would be reviewed for approval by the campus Director of Academic Affairs.

Students scheduled to be deployed for active military duty should be advised to contact their campus Financial Representative regarding the status of their account and/or financial aid.

Program completion deadline and re-entry policies will be suspended to cover deployment time provided the student’s cumulative absence from the University does not exceed five years.

Readmission of Servicemembers

Any student whose absence from the University is necessitated by reason of service in the uniformed services is entitled to readmission if the following criteria are met:

• The student (or an appropriate officer of the Armed Forces or official of the Department of Defense) gives verbal or written notice to the University’s Military Division verifying that the student’s absence from the University was necessitated by service in the uniformed services.

• The cumulative length of the absence and of all previous absences from the University by reason of service in the uniformed services does not exceed five years.

Note: A student who submits an application for readmission to the University must provide documentation to establish that the student has not exceeded the specified service limitations and that the student’s eligibility for readmission has not been terminated. Examples of documentation to verify that the student is still within the acceptable service limitations include the student’s deployment paperwork or a letter from the commanding officer that includes the student’s dates of service. Exception: The University may not delay or attempt to avoid readmission of a student under this section by demanding documentation that does not exist, or is not readily available, at the time of readmission.

• The student submits verbal or written notification of intent to re-enroll.

Note: If the student’s last date of attendance with the University is more than 365 days in the past, the student must complete an updated admissions application and Enrollment Agreement in accordance with the University re-entry policy. The Military Division should then submit these completed documents along with the servicemember’s readmission form. The student may remain in the original program/version without appeal, provided the cumulative length of absence does not exceed five years and that the program has not been expired.

A student’s eligibility for readmission under this section by reason of such student’s service in the armed services terminates upon the occurrence of any of the following events:

• A separation of such person from the Armed Forces (including the National Guard and Reserves) with a dishonorable or bad conduct discharge, or

• A dismissal of such person permitted under section 1161(a) of Title 10, USC, or

• A dropping of such person from the roles pursuant to section 1161(b) of Title 10, USC, http://uscode.house.gov/download/title_10.shtml

Note: If the student does not submit a notification of intent to re-enroll within the time limits, the student is subject to the University-established leave of absence policy and general practices.

Re-entry Policy for Servicemembers Opportunity Colleges (SOC)

Students out for a period of more than one year, with current, active or prior military experience in the Army, Coast Guard, Marine Corps and Navy are covered under the Servicemembers Opportunity Colleges (SOC) guidelines, and therefore will be permitted to continue in their original program/version of study. These students are required to complete all degree requirements within the graduation deadline period. Students are granted five (5) years to complete an associate degree and seven (7) years to complete an undergraduate degree from the first date of positive attendance with the University. If the student is unable to complete
his or her degree requirements within the deadline, the University is not obligated to uphold the agreement of the SOC Degree Network. Note: A student with a SOC agreement who changes program, major or concentration is required to update to the most current program/version offered in his or her state or jurisdiction. A new SOC agreement will be created for the student when the student is admitted to the new program/version, and the student will be given a new five (5) year (associate) or seven (7) year (undergraduate) timeframe in which to complete the degree.

**Student Financial Responsibilities, Policies, and Options**

- **Student Financial Responsibilities**
  The student is responsible to ensure all tuition and electronic course materials fees are paid whether in attendance or not. The student must indicate how tuition and electronic course materials fees will be paid on the Student Finance Agreement. The student is responsible for knowing the account balance. Student account information is available on the student website.
  When the student is considered administratively, officially or unoffically withdrawn from his or her program, the University may cancel any federal financial aid in process. The student may receive a refund for or may owe payment to the University depending upon the student’s account balance.

- **Changing Finance Plans**
  The student can change a finance plan if in compliance with the current finance plan. To change a finance plan, the student must contact a Finance Advisor and complete all necessary documents. All changes must be approved by University of Phoenix to become effective.

- **Meeting Financial Plan Obligations**
  Students who primarily attend a physical University of Phoenix campus are subject to finance approval by their primary campus prior to enrolling in a course. Tuition and all applicable fees for each course must be paid according to the terms and conditions outlined in the primary financial option selected on the Student Financial Agreement form. Students who do not comply with the primary financial option term will not be allowed to attend classes. Students are required to clear any indebtedness to the University before grades and transcripts will be issued or the degree awarded. A student may be administratively withdrawn for failure to make payment in a timely manner, preventing the student from attending future class sessions, until the amount owed is paid in full or satisfactory payment arrangements are made. All costs of collection, court costs and reasonable attorneys’ fees will be added to delinquent accounts collected through third parties. University of Phoenix may obtain a current credit report as needed to support decisions to defer tuition payment or to assist in the collection of amounts owed.

- **Electronic Course Materials and Books Fees**
  Electronic course materials and books for each course must be paid at the time they are ordered or in accordance with a student’s stated payment option. Electronic course materials fees are nonrefundable, unless prohibited by law. The student who drops a course will be granted access to the electronic course materials for that course without additional charge if the course is retracted within six months of the course’s original start date.

- **State Tax**
  Various states require universities to collect a tax on tuition, fees, digital goods or access to digital information. The University will collect the appropriate tax on tuition, fees and electronic course materials fees charged to the student in these states. Contact a Finance Advisor for the current list of states requiring tax be collected.

**Financial Policies**

- **Multiple Tuition Discount Policy**
  For instances in which a student may qualify for multiple tuition discounts, the discount that provides the greatest benefit to the student will be applied to the tuition amount.

- **General Refund Policy**
  A tuition refund may be granted to those who qualify, based on the state refund policy. A complete list of state refund policies is located in the Academic Catalog and the Consumer Information Guide. All other fees are nonrefundable, unless prohibited by law.

- **Tuition Credit Policy**
  The student may request a tuition credit from University of Phoenix when he or she drops a course due to extenuating circumstances. If the student earns a W grade, he or she may be eligible for a tuition credit. The credit is nontransferable to other students and may be used at any University of Phoenix campus.

**Payment Policies**

- **Payments**
  Payments are accepted on the student website (https://ecampus.phoenix.edu/portal/portal/public/login.aspx) by check, credit card or debit card. Finance Advisors can also process credit card or debit card payments. The student can mail a check, certified check or money order payment to the following address: Apollo Group/Corporate Processing P.O. Box 29887 Phoenix, AZ 85038-9887

- **Late Payment Fees**
  If a credit card or a debit card is provided with a completed Authorization to Charge form, tuition and electronic course materials fees will be charged to that card. Automatic payments are set prior to each course upon request.

- **Returned Check Fee**
  Returned checks will result in an additional processing fee of $25, unless prohibited by law.

**Notice**

The University may report information about student accounts to credit bureaus. Late payments, missed payments or other defaults on student accounts may be reflected in a credit report. If payment for tuition and electronic course materials fees is not received in accordance with the Student Finance Agreement, the student may be withdrawn from the program and official transcripts withheld.

**Financial Options**

Understanding and choosing the right finance plan is critical to the successful completion of the student’s selected program. University of Phoenix offers a number of finance plan options to assist the student in managing financial obligations. The student can utilize...
There are two ways a student can provide official notification of the intent to withdraw from the University to be considered an Official Withdrawal:

2. Notify the designated campus offices of Enrollment Services, Academic Services and Financial Services.

Withdrawal Date
The withdrawal date for an official withdrawal is the last date of academic attendance or attendance at an academically related activity determined from University attendance records.

Date of Determination
The date of determination (DOD) for students who officially withdraw from the University is the latter of either the student's withdrawal date or the date of notification. The University will return the amount of federal financial aid for which it is responsible no later than 45 days after the date the University determines the student has withdrawn.

Rescission of Official Withdrawal
Students may rescind the intent to withdraw by completing the Official Withdrawal Rescind request via the University eCampus website at https://ecampus.phoenix.edu/portal/portal/public/login.aspx. The student may also submit an electronic or written statement to the University stating their intent to participate in academically related activities and complete the payment period.

If the student subsequently withdraws after rescinding the intent to withdraw, the withdrawal date is the latter of the date the student first provided notification to the University or the last date of academic attendance or academically related activity determined from University attendance records.

The date of determination (DOD) for students who rescind their intent to withdraw and subsequently withdraw from the University, without official notification, is no greater than 15 days after the student's official last date of academic attendance or attendance at an academically related activity.

Unofficial Withdrawals
Students who do not provide official notification to the University of their intent to withdraw are considered unofficial withdrawals after 14 consecutive days of nonattendance at an academically related activity.

Withdrawal Date
The withdrawal date for a student who ceases attendance at the University, including a student who does not return from an approved leave of absence, is the last date of academic attendance or attendance at an academically related activity determined from University attendance records.

The University will allow the following exceptions when counting the 14 days of consecutive nonattendance at an academically related activity:
- The extension period of a course where an Incomplete (I), Incomplete Progress (IP), or In Progress Extension (IX) grades are issued
- Institutionally scheduled holiday breaks
- Emergency closures

In the case of a student who has received an approved leave of absence, the University will review the student record on or after the original approved return date. The University review determines if the student reentered as scheduled, or did not reenter as scheduled and must be withdrawn for the purposes of the Return of Title IV (R2T4) calculation and deferment processing.

Date of Determination
The date of determination (DOD) for students who unofficially withdraw from the University is no greater than 15 days after the official last date of attendance or when a student fails to return tuition and fees calculator web page at http://www.phoenix.edu/tuition_and_financial_options/tuition_and_fees.html or contact a Finance Advisor with any questions regarding financial options and scholarships.

Cash Plan
The Cash Plan requires all tuition and electronic course materials fees to be paid in full prior to the start of each course. For more information, please visit http://www.phoenix.edu/tuition_and_financial_options/cash-plan.html.

Federal Financial Aid Plan
The Federal Financial Aid Plan is available to students receiving federal grants, federal loans or both to pay for tuition in an eligible degree or a certificate program. To learn more, please visit http://www.phoenix.edu/tuition_and_financial_options/federal_financial_aid.html.

Military or Government Billing Plan
Under the Military or Government Billing Plan, University of Phoenix directly bills the military or other government agency for a student's tuition. For more information, please visit http://www.phoenix.edu/colleges_divisions/military/military-financial-options.html.

Third-Party Billing Plan
Under the Third-Party Billing Plan, University of Phoenix directly bills an approved employer for a student's tuition. To learn more, please visit http://www.phoenix.edu/tuition_and_financial_options/third_party_billing.html.

Tuition Deferral Plan
The Tuition Deferral Plan is available for students whose employers offer to repay some or all of their employees' tuition. The plan is also available to students receiving benefits from the U.S. Department of Veterans Affairs or U.S. Department of Defense. For more information, please visit http://www.phoenix.edu/tuition_and_financial_options/tuition-deferral-plan.html.

Tribal Funding
Several American Indian tribal nations provide funding for the tuition of a student who is a recognized member. For more information, please contact tribalrelations2@phoenix.edu

Circumstances may necessitate withdrawal from the University. A student who has withdrawn is subject to a Return of Title IV (R2T4) Calculation as required by federal regulations.

Policy

Official Withdrawals
There are two ways a student can provide official notification of the intent to withdraw from the University to be considered an Official Withdrawal:
from an approved leave of absence. The University will return the amount of federal financial aid funds for which it is responsible no later than 45 days after the date the University determines the student has withdrawn.

**Administrative Withdrawals**

Students who are withdrawn from the University for failure to meet admission, academic, candidacy, financial or code of conduct policies are considered administrative withdrawals.

**Withdrawal Date**

The withdrawal date for students who are administratively withdrawn is the last date of academic attendance or attendance at an academically related activity determined from University attendance records.

**Date of Determination**

The date of determination (DOD) for students who are administratively withdrawn from the University is the date the University determines the withdrawal. The University will return the amount of federal financial aid for which it is responsible no later than 45 days after the date of the administrative withdrawal.

**Return of Federal Financial Aid**

A federal financial aid (Title IV) recipient who withdraws from the University is subject to a Return of Title IV (R2T4) calculation. For the purpose of R2T4 calculation requirements, a recipient is a student who has actually received Title IV funds or has met the conditions that entitled the student to a late disbursement of Title IV funds. The University is required to review the amount of federal loan and grant aid a student received for the payment period, to determine what percentage of federal financial aid the student earned prior to withdrawal. The percentage of federal financial aid determined to be unearned for the payment period must be returned to the appropriate federal financial aid program(s).

**Policy**

When a federal financial aid recipient withdraws from the University prior to the end of a payment period, a R2T4 calculation must be performed to determine the amount of federal financial aid funds earned as of the date of withdrawal. If the total amount of federal financial aid funds earned is less than the amount federal financial aid funds disbursed to the student or on behalf of the student in the case of a parent PLUS loan the difference between these amounts will be returned to the applicable federal financial aid programs. If federal financial aid funds earned is greater than federal financial aid funds disbursed, the difference between these amounts will be treated as a post withdrawal disbursement. A R2T4 calculation will not be performed if the federal financial aid recipient withdraws after successfully completing the payment period and all funds awarded for that period have been disbursed.

**Return Calculation**

The amount of federal financial aid earned is calculated by determining the percentage of aid earned and applying this percentage to the total amount of aid disbursed and that could have been disbursed for the payment period. The payment period is defined as the period of time it takes the student to complete at least one-half of the weeks and credits in the student’s academic year. For purposes of determining earned federal financial aid, a student’s aid is considered disbursed if it is disbursed as of the student’s last date of attendance. As long as conditions for a late disbursement (described below) are met prior to the date the student became ineligible (the student’s last date of attendance), any undisbursed federal financial aid will be counted as aid that could have been disbursed.

**Conditions for a Late Disbursement**

- The Department of Education (ED) processed a Student Aid Report (SAR) or Institutional Student Information Record (ISIR) with an official Expected Family Contribution (EFC) for the student (except in the case of a parent PLUS loan)
- The University originated a Direct Loan (DL)
- The University made the award to the student for a Federal Perkins loan or Federal Supplemental Educational Opportunity Grant (FSEOG)
- The University originated the award to the student for the TEACH Grant program

The University will not include as a post withdrawal disbursement any funds the University was prohibited from disbursing on or before the date the student withdrew, which would apply to the following:

- Second or subsequent disbursements of DL funds unless the student has graduated or successfully completed the loan period.
- Second disbursements of DL for the period that the University is prohibited from making until the student successfully completes one-half of the weeks of instructional time and one-half the credit hours in the academic year.
- Disbursements of DL or Perkins loan funds for which the borrower has not signed a promissory note.
- Disbursements of Federal Pell Grant, Iraq Afghanistan Service Grant, and TEACH Grant funds to a student for whom the University did not receive a valid SAR or a valid ISIR by the deadline date established by the Secretary in the Federal Register.
- Federal Pell Grant, Iraq Afghanistan Service Grant, and TEACH Grant funds for a subsequent payment period when the student has not successfully completed the earlier payment period for which the student has already been paid.
- Disbursements of DL funds to a first-year, first-time borrower who withdraws before the 30th day of the student’s program of study.

**Inadvertent Overpayments**

An inadvertent overpayment occurs when the University disburses funds to a student no longer in attendance but prior to the date the University determines the student withdrew from the program. This would include any federal financial aid fund disbursements made after the student’s last date of attendance but prior to the University’s determination that the student was withdrawn. These inadvertent overpayments are included in the R2T4 calculation as aid that could have been disbursed.

Only students who meet late disbursement criteria are entitled to keep federal financial aid funds disbursed as an inadvertent overpayment. If an inadvertent overpayment could not have been made as a late disbursement, the University will return the entire amount of the federal financial aid funds disbursed. If the inadvertent overpayment could have been made as a late disbursement, the University will return only the unearned portion of the inadvertent overpayment within 45 days of the University’s date of determination that the student withdrew. Unearned inadvertent overpayments will be returned according to the requirements for the return of unearned funds.

**Verification and the Return Calculation**

If a student provides required verification documents after withdrawing from the University, but within 30 days of the date of the
notification informing the student of the requirements, and in time for the University to meet the 30-day Return deadline, the University will perform the R2T4 calculation based on all federal financial aid the student had established eligibility prior to the withdrawal. For the Federal Pell Grant Program, if the student provides the verification documents after the 30-day deadline but before the earlier of 120 days after the student’s last date of attendance or the deadline established by ED each award year, the University will review and address eligibility as required.

If a student does not provide all verification documents in time for the University to complete verification and meet the R2T4 deadlines, the University will include in the R2T4 calculation only the federal financial aid that was not subject to verification (unsubsidized and PLUS loan funds) and for which the conditions of a late disbursement were met prior to the withdrawal.

Institutionally Scheduled Breaks
Excluded from the R2T4 calculation are: institutionally scheduled breaks five consecutive days or more which occur between the start and end dates of the payment period; student-scheduled breaks of five consecutive days or more between courses in the payment period; days during which the student was on an approved LOA; and/or any other periods of non-attendance five (5) or more consecutive days long.

When Funds are Disbursed Using Different Payment Periods
When the University disburses different types of aid using different payment periods, e.g., one payment period for disbursing grant funds and another payment period for disbursing DL, only one payment period is used in determining earned funds. The payment period ending later is used for the R2T4 calculation.

Percentage of Federal Financial Aid Earned
The calculation of Percentage of Federal Financial Aid Earned includes all financial aid disbursed or that could have been disbursed to a student. This percentage is equal to the percentage of the payment period completed by the student as of the student’s last date of attendance in the payment period. This percentage is determined using the University rate of progression calculation. If the student withdraws after successfully completing the payment period, 100% of the federal financial aid funds are earned and no calculation is required. If the withdraw date occurs after the student completes more than 60% of the payment period, the student earns 100% of the federal financial aid funds.

Note: The University changed the rate of progression calculation used in completing the required Return to Title IV (R2T4) Refund calculation for students who have withdrawn from the University. The rate of progression calculations and the respective effective dates for each calculation are noted below.

Rate of Progression Calculation - Effective December 1, 2012
The rate of progression calculation provided below will be used for all R2T4 Refund calculations completed on or after December 1, 2012.

The percentage of the period completed is calculated as follows:

\[
\text{Percentage Earned} = \left( \frac{\text{Number of calendar days completed in the payment period}}{\text{Total number of calendar days in the payment period}} \right) \times 100
\]

Total Calendar Days in the Payment Period
The total number of calendar days in a payment period (denominator) is determined based upon the number and type (credential level and modality) of credits awarded in the payment period. Institutional scheduled breaks and student selected breaks of five (5) calendar days or more are not counted.

Required Adjustments to Calendar Days Completed in the Payment Period
Calendar days will be removed from calendar days completed in the payment period if any of the following have occurred from the payment period start date and the student’s last date of attendance:

- Institutionally scheduled breaks of five (5) consecutive calendar days or more
- Student scheduled or selected breaks of five (5) consecutive calendar days or more between courses
- All Leave of Absence calendar days
- Any other periods of non-enrollment of five (5) consecutive calendar days or more
• Last date of attendance is 7/15/20XX
• Payment Period is 06/07/20XX to 10/24/20XX

Return of Unearned Aid

In the R2T4 calculation, the total Amount Disbursed plus Amount That Could Have Been Disbursed to the student or on the student’s behalf, minus the Amount of Federal Financial Aid Earned by the Student determines the amount of federal financial aid funds unearned and required to be returned to the funding source. When a return of federal financial aid is required, the University and the student may both need to return funds. The University will
Timelines for Return of Funds

- TEACH Grants
- National SMART Grant
- Academic Competitiveness Grant (ACG)
- Federal Pell Grants
- Federal Direct Parent PLUS
- Federal Direct Graduate/Professional PLUS
- Subsidized FFEL/Direct Subsidized Loan
- Unsubsidized FFEL/Direct Unsubsidized Loan

The amount equal to the total University charges incurred by the student for the payment period multiplied by the percentage of unearned aid.

University (institutional) charges incurred by the student include tuition, fees, books and directed study (including state sales tax) initially assessed the student for the entire payment period. Initial charges will only be adjusted for changes the University makes prior to the student’s withdrawal. The amounts of institutional charges included in the R2T4 calculation are those charged or anticipated to be charged to the student’s account. Although institutional charges may not have actually been charged due to the student’s withdrawal, the University will use the actual charges to date, to include full tuition, fees, books and directed study (including sales tax) for each course in the payment period, and estimate remaining charges based on the students’ primary campus.

Charges should not reflect Withdrawn (W) grade tuition adjustments.

Tuition waivers, excluding those for military students, are counted as Estimated Financial Aid (EFA) and will not be subtracted from institutional charges in the R2T4 calculation.

If after the student withdraws, the University changes the amount of institutional charges it assessed, or decides to eliminate all institutional charges, those changes will not impact the charges or aid earned in the calculation.

The University will return federal financial aid funds to programs in the following order up to the net amount disbursed from each:

- Unsubsidized FFEL/Direct Unsubsidized Loan
- Subsidized FFEL/Direct Subsidized Loan
- Federal Perkins Loans
- Federal Direct Graduate/Professional PLUS
- Federal Direct Parent PLUS
- Federal Pell Grants
- Academic Competitiveness Grant (ACG)
- National SMART Grant
- FSEOG
- TEACH Grants
- Iraq & Afghanistan Service Grant (IASG)

After the University allocates its portion of unearned funds, the student must return federal financial aid owed in the same order specified above for the University. The amount of federal financial aid the student is responsible for returning is calculated by subtracting the amount returned by the University from the total amount of unearned federal financial aid funds to be returned. The student (or parent in the case of funds due to a parent PLUS Loan) must return or repay, as appropriate, the calculated amount to any federal financial aid loan program in accordance with the terms of the loan; and any federal financial aid grant program as an overpayment of the grant. The amount of a grant overpayment due from a student is limited to the amount by which the original grant overpayment exceeds one-half of the total federal financial aid grant funds received by the student.

The University may round final repayment amounts, for which the University and student are responsible, to the nearest dollar.

Tuition Refund Policy

Institutional

The following provisions pertain to all refund policies applied by the University unless specifically stated otherwise. When a student who begins a program under Registered (R) status, pending the completion of the student admission file, and is subsequently denied admission, the student is eligible for a full tuition refund. The University does not refund tuition for any completed course. A tuition refund can be requested in writing from a local campus.

Students who withdraw from a course prior to the start date will receive a 100% refund for that course. Students who have completed 60% or less of the course are eligible for a pro-rata refund. Example of a refund on attendance for a 5-week course:

- Attend 1 week 80% refund due
- Attend 2 week 60% refund due
- Attend 3 week 40% refund due
- Attend 4 week no refund due

Example of a refund on attendance for a 6-week course:

- Attend 1 week 83% refund due
- Attend 2 week 67% refund due
- Attend 3 week 50% refund due
- Attend 4 week no refund due

Example of a refund on attendance for a 9-week course:

- Attend 1 week 89% refund due
- Attend 2 week 78% refund due
- Attend 3 week 67% refund due
- Attend 4 week 56% refund due
- Attend 5 week 44% refund due
- Attend 6 week no refund due

State

If a student attends a class in one of these states, the specific state refund policy will be applied in addition to the University Institutional Refund Policy. In the event that there is a conflict in the policies, the state policy will supersede the general University policy, unless the University policy is better for the student's situation. These policies are outlined below.

Arizona

Students in the state of Arizona will have tuition refunded using the University Institutional Refund Policy except students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw within three business days after signing the Enrollment Agreement.

California

Southern California Region

Students in the state of California will have tuition refunded using the University Institutional Refund Policy with the following exception:

- Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the 7th day after enrollment, whichever is later.
- To cancel enrollment, the student must submit a written request postmarked on or before the applicable time period to the campus Director of Finance, University of Phoenix, 3090 Bristol Street, Suite 500, Costa Mesa, CA. 92526.

Bay Area Region

Students in the state of California will have tuition refunded using
the University Institutional Refund Policy with the following exception:

- Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the 7th day after enrollment, whichever is later.

- To cancel enrollment, the student must submit a written request postmarked on or before the applicable time period to the campus Director of Finance, University of Phoenix, 45 River Park Place W, Suite 101, Fresno, CA. 93720.

Sacramento Valley Region

Students in the state of California will have tuition refunded using the University Institutional Refund Policy with the following exception:

- Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the 7th day after enrollment, whichever is later.

- To cancel enrollment, the student must submit a written request postmarked on or before the applicable time period to the campus Director of Finance, University of Phoenix, 2860 Gateway Oaks Drive, Suites 100 and 200, Sacramento, CA. 95833.

Central Valley Region

Students in the state of California will have tuition refunded using the University Institutional Refund Policy with the following exception:

- Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the 7th day after enrollment, whichever is later.

- To cancel enrollment, the student must submit a written request postmarked on or before the applicable time period to the campus Director of Finance, University of Phoenix, 45 River Park Place W, Suite 101, Fresno, CA. 93720.

San Diego Region

Students in the state of California will have tuition refunded using the University Institutional Refund Policy with the following exception:

- Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the 7th day after enrollment, whichever is later.

- To cancel enrollment, the student must submit a written request postmarked on or before the applicable time period to the campus Director of Finance, University of Phoenix, 9645 Granite Ridge Drive, Suite 200, San Diego, CA. 92123.

Online

Students in the state of California will have tuition refunded using the University Institutional Refund Policy with the following exception:

- Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the 7th day after enrollment, whichever is later.

- To cancel enrollment, the student must submit a written request postmarked on or before the applicable time period to the campus Director of Finance, University of Phoenix, 875 W. Elliot Road, Tempe, AZ. 85284.

Florida

Students in the state of Florida will have tuition refunded using the University Institutional Refund Policy with the following exceptions:

- Students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw within three business days after signing the Enrollment Agreement.

- The University will retain $45 of the application fee for students who withdraw from the University prior to the start of their program and after the three-day cancellation period.

- Refunds will be paid within 30 days of a student’s official withdrawal.

Georgia

Students in the state of Georgia will have tuition refunded using the University Institutional Refund Policy with the following exceptions:

- Students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw within three business days after signing the Enrollment Agreement.

- Students providing written notification of withdrawal prior to the first class session or have been out-of-attendance for more than 14 days will receive a full refund of tuition paid for the unattended course.

- Refunds are paid within 30 days of a student’s official withdrawal.

- A student who is out-of-attendance for more than 14 days is considered withdrawn.

Indiana

Indiana has established refund policies that differ from the University Institutional Refund Policy. If a student attends a class in Indiana, the Indiana state refund policy will be applied. The University must make the proper refund no later than 31 days of the request for cancellation or withdrawal.

A student is entitled to a full refund if one or more of the following criteria are met:

- The student cancels the Enrollment Agreement within six business days after signing.

- The student does not meet the University minimum admission requirements.

- The student’s enrollment was procured as a result of a misrepresentation in the written materials utilized by the University.

If the student has not visited the University prior to enrollment and, upon touring the University or attending the regularly scheduled orientation or classes, the student withdrew from the program within three days.

A student withdrawing from an instructional program after starting the instructional program at the University and attending one week or less, is entitled to a refund of 90 percent of the cost of the financial obligation, less an application or enrollment fee of 10 percent of the total tuition, not to exceed $100.

A student withdrawing from an instructional program, after attending more than 25 percent but equal to or less than 50 percent of the duration of the instructional program, is entitled to a refund of 50 percent of the cost of the financial obligation, less an application or enrollment fee of 10 percent of the total tuition, not to exceed $100.

A student withdrawing from an instructional program, after attending more than 50 percent but equal to or less than 60 percent of the duration of the instructional program, is entitled to a refund of 40 percent of the cost of the financial obligation, less an application or enrollment fee of 10 percent of the total tuition, not to exceed $100.

A student withdrawing from an instructional program, after attending more than 60 percent but equal to or less than 75 percent of the duration of the instructional program, is entitled to a refund of 30 percent of the cost of the financial obligation, less an application or enrollment fee of 10 percent of the total tuition, not to exceed $100.

A student withdrawing from an instructional program, after attending more than 75 percent but equal to or less than 90 percent of the duration of the instructional program, is entitled to a refund of 10 percent of the cost of the financial obligation, less an application or enrollment fee of 10 percent of the total tuition, not to exceed $100.
A student withdrawing from an instructional program, after attending more than 60 percent of the duration of the instructional program, is not entitled to a refund.

Example of a refund on attendance for a 5-week course:
- Attend 1 week 90% refund due
- Attend 2 weeks 50% refund due
- Attend 3 weeks 40% refund due
- Attend 4 weeks no refund due

Example of a refund on attendance for a 6-week course:
- Attend 1 week 90% refund due
- Attend 2 weeks 50% refund due
- Attend 3 weeks 50% refund due
- Attend 4 weeks no refund due
- Attend 5 weeks 40% refund due
- Attend 6 weeks 0% refund due

Iowa
Students in the state of Iowa who withdraw from a course prior the start date will receive a Pro-Rata Refund of Tuition for the course until they have attended 100 percent of the course. Refunds will be paid within 30 days of a student's official withdrawal.

Kansas or Missouri
Students in the states of Kansas or Missouri will have tuition refunded using the University Institutional Refund Policy with the following exceptions:
- Students have the right to a full refund of all monies paid if they withdraw within three business days after signing the Enrollment Agreement.
- To cancel enrollment, a student must notify the local campus in writing on or before the three-day period (excluding Saturdays, Sundays, and holidays). After the three-day period, all fees, including application fees, assessment fees, and book fees, are non-refundable.
- A tuition refund must be requested in writing to the student's local campus.

Kentucky
Students in the state of Kentucky will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
- A student who cancels enrollment anytime before the start of the first class session will receive a full refund of all monies paid.
- The University may retain 10 percent of the tuition agreed upon in the Enrollment Agreement or $100, whichever is less, for students who fail to attend in the enrollment period for which advanced payment was made.
- Refunds will be paid within 30 days of a student's official withdrawal.
- A student who is out-of-attendance for more than 14 days is considered withdrawn.

Louisiana
Students in the state of Louisiana will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
- Students who cancel enrollment anytime before the start of the first class session will receive a full refund of all monies paid, except the application fee, which is non-refundable.
- Refunds will be paid within 30 days of a student's official withdrawal.
- The University may retain an administrative fee, not to exceed 15 percent of total tuition and fees paid.

Minnesota
Students in the state of Minnesota will have tuition refunded using the University Institutional Refund Policy with the following exception:
- If a student withdraws following the expiration of the three-day cancellation period, but prior to the first class, the University may retain up to $200.

New Mexico
Students in the state of New Mexico will have tuition refunded using the University Institutional Refund Policy with the following exceptions:
- Students who fail to attend in the enrollment period for which advanced payment was made.
- To cancel enrollment, a student must provide written notice to the University or appear personally at the University.
- Refunds must be made within 30 calendar days of the University's receipt of written notice of withdrawal or the University's termination of the student's enrollment, whichever is earlier.

Ohio
Students in the state of Ohio will have tuition refunded using the University's Institutional Refund Policy with the following exceptions:
- Students who cancel enrollment anytime before the start of the first class session will receive a full refund of all monies paid, except the application fee, which is non-refundable.
- Refunds will be paid within 30 days of a student's official withdrawal.
- A student who withdraws before the first class and after the five-day cancellation period is obligated for the registration fee.
- To cancel enrollment, a student must notify the local campus in writing on or before the five-day cancellation period after signing the Enrollment Agreement.
- Refunds will be paid no later than 30 days after cancellation.

Oregon
Students in the state of Oregon will have tuition refunded using the University Institutional Refund Policy except all fees, including application fees, assessment fees, student service fees, and book fees are non-refundable.

South Carolina
Students in the state of South Carolina will have tuition refunded using the University Institutional Refund Policy including the following exceptions:
• Students have the right to a full refund of all monies paid, including application and materials fees, if they withdraw within 72 hours excluding weekends and legal holidays after signing the Enrollment Agreement.
• A full refund of all monies will be made to any applicant not accepted by the University.
• After the 72-hour cancellation period, the University may retain up to a $100 if the student does not attend a course.
• The University may retain an administrative fee up to $100.
• Refunds will be paid within 40 days of a student's official withdrawal.

Wisconsin
Students in the state of Wisconsin will have tuition refunded using the University Institutional Refund Policy including the following exceptions:

CONSUMER POLICIES AND CODES OF CONDUCT

University of Phoenix Family Educational Rights and Privacy Act

University student records are confidential for all schools receiving funding under programs administered by the U.S. Department of Education in accordance with the Family Educational Rights and Privacy Act (FERPA) of 1974. Generally, information pertaining to a student record is not to be released to a third party without written or authorized electronic consent via a FERPA release form, judicial order or lawfully issued subpoena. The University is required to provide students a copy of its FERPA policy annually and upon written request from students. Current students can obtain a copy of the FERPA policy in the appropriate online Academic Catalog at https://www.phoenix.edu/programs/degree-programs/academic-catalog.html

Under FERPA, a student is defined as an individual who is or has attended an educational institution. Students with at least one academically related activity (or one positive attendance “Y” posted, whichever happens sooner) in a university course are considered students.

Note: University Orientation Workshops are not considered university courses.

Access to Education Records

University student records are confidential for all schools receiving funding under programs administered by the U.S. Department of Education in accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA). Generally, information pertaining to students' records shall not be released to a third party without written or authorized electronic consent, via a FERPA Release form, judicial order or a lawfully issued subpoena. Education records are defined as all records, files, documents and materials that contain information directly related to a student, and maintained by an educational institution.

The following are not interpreted as education records:
• Personal records maintained by an individual; must be kept in the sole possession of the individual and are not accessible to others.
• Records of the law enforcement unit of an educational institution.

• Students have the right to cancel enrollment until midnight of the third business day after receipt of notice of acceptance and is entitled to a full refund of any tuition paid.
• Refunds will be paid within 30 days of a student's official withdrawal.
• If the University cancels or discontinues a course or educational program stated in the Enrollment Agreement, the University will refund all monies paid for that course or program. The refund policy of the state where Online students reside will be used to calculate their refund amount. The refund policy of the state where local campus students attend class will be used to calculate their refund amount.

Online
The refund policy of the state where online campus students reside will be used to calculate their refund amount. The refund policy of the state where Ground students attend class will be used to calculate their refund amount.

Releasable Information - Directory

In compliance with FERPA, a University-designated representative without prior written or authorized electronic consent of the student can release the following educational record information, provided the student does not have a FERPA Hold Request form on record.
• Student name
• Home address
• Email address
• Home telephone number
• Year of birth
• Dates of attendance at the University
• Dates of admission to the University
• University programs of study
• University degree completion dates and type of degrees earned
• Current enrollment status (full-time and withdrawn)
• Most recent previous institutions attended and degree(s) earned
• Grade level (freshman, sophomore, junior or senior)
• Photographs
• Honors and awards received
• Participation in officially recognized activities

If a student submits written or authorized electronic requests via a FERPA Hold Request form that directory information not be released to a third party, no information can be released, absent a judicial order or a lawfully issued subpoena. A FERPA Hold Request is valid throughout the student's enrollment.
To add a FERPA Hold Request, the student must complete and submit a FERPA Hold Request form to the Registrar’s Office. For a student to remove a FERPA Hold from their record, the student will need to fill out a FERPA Hold Release form. For a student to remove previously authorized parties from their record, the student would complete a FERPA Release Rescind form listing any/all parties that information should no longer be released.

Mass Distribution of Student Information

Anyone wanting to release mass distribution of directory student information must first request approval from the Vice President of the Office of Admissions & Records. Campus Personnel must send an email to the Vice President of the Office of Admissions & Records requesting approval to release student information.

Information Not Released - Non-Directory

In compliance with FERPA, the following student information shall not be released by the University without prior written or authorized electronic consent of the student, a judicial order or a lawfully issued subpoena. The student’s signature on the written requests shall be verified before acting upon the request.

- Place of birth*
- Month and day of birth*
- Social Security Number (SSN), Individual Record Number (IRN) or Personal Identification Number (PIN)**
- Grades or grade point averages
- Course schedules
- Employment information including: employer, position held, work address or work telephone number
- Academic performance information, such as academic suspension, probation disqualification or academic dishonesty charges
- Admission information including test scores or entry grade point averages
- Financial and accounting information
- Gender*
- Race*
- Ethnicity*
- Citizenship*
- Country of origin*

*Although this information may be disclosed without prior written consent according to FERPA, the University policy is to maintain the confidentiality of this student information. The University will notify students to provide this information directly to a third party when this information is requested.

**Student IRN, SSN or PIN numbers generally should not be released to a third party, unless necessary to perform a required task (e.g., Student Financial Agreement, FBI request, etc.).

Note: Non-directory information can only be released to third parties via telephone or in person if the student has provided written or authorized electronic consent including a security word. If the student does not complete the release information, including security word, information is not released via telephone or in person.

Note: All third-party inquiries, including parents, require a FERPA signed release or authorized electronic consent including a security word. If the student has not signed the release or does not provide a security word, the inquiry is denied.

For a third party to provide this information directly to a third party when this information is requested.

To add a FERPA Hold Request, the student must complete and submit a FERPA Hold Request form to the Registrar’s Office. For a student to remove a FERPA Hold from their record, the student will need to fill out a FERPA Hold Release form. For a student to remove previously authorized parties from their record, the student would complete a FERPA Release Rescind form listing any/all parties that information should no longer be released.

The University can release information to school officials with legitimate educational interest. The University may release information under the following condition:

- School officials with legitimate educational interest
- Person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials such as Apollo Group, Western International University, Neten Scholarship Management, Aptimus, Protiviti, ACS, ECMS Solutions, National Student Clearinghouse, iParadigms, LLC, Taylor Corporation, Education Sales Management, Double Positive, Hills Consulting Group, SCRIP-SAFE, Student Outreach Solutions, i3, Inside Track, Salesforce, Iron Mountain, Outsell Y-Connecting, Ceneo, IntraEdge, ITC InfoTech, iGrad, Sogeti, Vocado, and other services.

- Other schools to which a student seeks or intends to enroll
- Specified officials for audit and evaluation purposes
- Appropriate parties in connection with financial aid to a student
- Accrediting organizations
- To comply with a judicial order or lawfully issued subpoena
- Appropriate officials in cases of health and safety emergencies
- State and local authorities, pursuant to state law
- The U.S. Immigration and Customs Enforcement, in compliance with the Student Exchange Visitor
- Information System (SEVIS) program
- Under “Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (USA PATRIOT ACT) of 2001,” Section 507 amends FERPA and allows institutions to disclose without consent or knowledge of the student personally identifiable information from the student’s education records to the Attorney General of the United States or to his designee in response to an ex parte order in connection with their investigation or prosecution of terrorism crimes specified in 2332(b)(3)(B) or an act of domestic or international terrorism as defined in Section 2331 of Title 18 United States Code. Institutions that, in good faith, produce information from education records in compliance with an ex parte order issued under this amendment “shall not be liable to any person for that production”

Under the Campus Sex Crime Prevention Act, institutions are permitted to disclose information concerning registered sex offenders who are required to register under the Violent Crime Control & Law Enforcement Act.

The institution may disclose the results of a disciplinary proceeding if the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and he or she has been found to have violated the institution’s policies and procedures with respect to the allegation. Disclosures may only be made if the institution determines the student did violate its policies and such disclosures must only include the name of the student, violation committed and any sanction imposed by the institution against the student.
The institution must, upon written request, disclose to the alleged victim of a crime of violence, or a nonforcible sex offense, the results of any disciplinary hearing conducted by the institution against the student who is the alleged perpetrator of the crime or offense. If the alleged victim is deceased as a result of the crime or offense, the institution must provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.

The disclosure is to organizations conducting studies for, or on behalf of, educational agencies or institutions.

If a student initiates legal action against an educational institution, the institution may disclose to the court, without a court order or subpoena, the student’s education records that are relevant for the institution to defend itself.

The disclosure is to parents of a dependent student as defined in Section 152 of the Internal Revenue Code of 1986.

A school official has a legitimate educational interest if:

- Performing a task specified in his or her job description or contract
- Performing a task related to a student’s education
- Providing a service or benefit relating to a student or a student’s family
- Representing a school in which a student seeks to enroll
- Disclosing information to federal and state authorities auditing compliance of federal or state support programs
- Disclosing information in connection with financial aid, to determine financial aid eligibility, amount of aid, conditions for the aid, or to enforce the terms of conditions of the aid
- Disclosing information to state and local officials to whom this information is specifically allowed to be disclosed pursuant to state laws if the allowed disclosure concerns the juvenile justice system and the system’s ability to effectively serve the student whose records are released
- Performing studies on behalf of educational institutions
- Disclosing information to accrediting organizations carrying out their accrediting functions
- Complying with a judicial order or lawfully issued subpoena provided notification to the student is made before complying with the subpoena

The University can disclose personally identifiable information, directory, and non-directory, without student consent if the disclosure meets one of the following conditions:

- This disclosure is to other school officials whom the University determines have legitimate educational interest
- The disclosure is to officials of other schools where the student seeks or intends to enroll
- The disclosure is subject to requirements of 34 CFR §99.35, to authorized representatives of the Comptroller General of the United States, Secretary, or state and local educational authorities
- The disclosure is in connection with financial aid the student has applied for or received, if the information is necessary for such purposes as to determine the following:
  - Eligibility for aid
  - Amount of aid
  - Conditions for aid
  - Enforce terms and conditions of the aid

Students requesting demographic or personally identifiable information on other University of Phoenix students for survey or research purposes must contact the Campus Director of Operations and Academic Affairs when approved through the Human Subjects Committee in the Office of the Provost.

The University shall retain a record of student information disclosed to a third party if the disclosure does not fall under a FERPA exception. This information is kept on the University’s computer system containing dates, names and reasons for release. Students shall have reasonable access to their educational records and may request to review and challenge the contents, which they feel to be inaccurate, misleading, or otherwise in violation of their privacy or other rights.

FERPA regulations require the University to comply with the students’ right to inspect and review their academic records by responding within 45 days from the time the University receives a written request to access their records. However, Office of Admissions & Records will respond to students’ requests to review their records within 14 days from receipt of the request. Students should submit their request to the University Registrar and specify the record or records they wish to receive copies of or inspect.

Student Right to Access

Students wishing to review their educational records shall submit a written request to the Registrar specifying the records to be reviewed. Only records covered by FERPA will be made available. If necessary, the Registrar’s Office will work with a campus designee so that the student can review the record.

FERPA regulations require the University to comply with the students’ right to inspect and review their academic records by responding within 45 days from the time the University receives a written request to access their records. However, the Office of Admissions & Records will respond to students’ requests to review their records within 14 days from receipt of the request. Students should submit their request to the University Registrar and specify the record or records they wish to have a copy of or to inspect.

Students who wish to review their records at a campus location must present photo identification before access to educational records is allowed. For copies of records from a student’s file, the student must fill out and submit the Student Request for Information From Files form. Distance education students must submit a written request specifically outlining which record they would like to review. Upon verification of the student’s signature, the records will be released.

A designated University official must be present when a student wishes to review his or her records at a campus location. This includes documents on file or student history notes that do not reference other student information. Printed files requested by the student and mailed from the Registrar’s Office will not include history notes from any record systems.

Procedure

Students alleging that their University records are inaccurate or misleading, or who allege violations of FERPA, may present their challenges to the University Registrar.

Students have the right to correct record-keeping errors, but not to seek to overturn administration decisions and assessments. The Registrar shall review students’ challenges and, when appropriate, amend students’ records accordingly. Students will be notified within 14 days of the Registrar’s actions and, based on the action, may request a formal hearing.

A student must submit a request for amendment in writing to the Registrar identifying the specific portion of his or her record he or she wants changed and why he or she believes it’s inaccurate or in violation of his or her privacy. The Registrar will respond to the request within 14 days.

If the University denies the request to change the record, the Registrar will notify the student within 14 days of the decision and
advise the student of his or her right to challenge the information. A student’s request for a formal hearing must be made in writing and submitted to the Office of Admissions & Records. The Registrar will arrange for a hearing, and notify the student within 14 days from the receipt of the request of the date, place and time of the hearing. Students may present relevant evidence and may be assisted or represented at the hearings by one or more persons of their choice, including an attorney, at the student’s expense.

The University shall be represented by a hearing panel appointed by the Registrar. The panel will be comprised of individuals that do not have a direct interest in the outcome of the hearing. The panel shall consider all relevant evidence supporting students' allegations of inaccurate or misleading information in students' records. Decisions of the panel will be final.

The University will provide a written decision within 14 days of the hearing based on evidence presented at the hearing, and will include a summary of evidence presented and the rationale for the decision.

If the University decides that the challenged information is not misleading, inaccurate or in violation of the student’s privacy rights, it will notify the student within 14 days of his or her right to place in the record a statement commenting on the challenged information or a statement of reasons for disagreeing with the decision.

The statement will be maintained as a part of the student’s record as long as the contested portion is maintained. If the University discloses the contested portion of the record, it must also disclose the statement.

If the University decides the information is inaccurate or in violation of the student’s right of privacy, it will amend the record and notify the student within 14 days, in writing, that the record has been amended.

**Exception:** Students may not inspect and review the following absent a judicial order or legally issued subpoena:

- Confidential letters and recommendations for which they have waived their rights of inspection
- Educational records containing information about more than one student (access is permitted only to that part of the record concerning the inquiring student).
- Records of instructional, supervisory, administrative and certain educational personnel, which are in the possession of the originator
- Records connected with an application to attend the University if the application was denied (e.g., a student is enrolled in an undergraduate program and applies for admission to a graduate program but is denied.)

University of Phoenix cannot deny students access to their records. Copies do not need to be provided, unless not by providing copies, the students’ rights are denied.

**Exception:** The University may release foreign transcripts to students. The University reserves the right to deny transcripts or copies of records not required to be made available by FERPA in any of the following situations, absent a judicial order or legally issued subpoena:

- Student has an unpaid financial obligation with the University.
- The University issues transcripts for students who have filed for bankruptcy, provided University of Phoenix obtains a copy of the bankruptcy petition filed with the courts.

Students have the right to file a complaint with the FERPA office in Washington, D.C. Inquiries should be directed to:

Family Policy Compliance Office

For a period of 25 years following the death of a student, education records of deceased students may only be released to the executor of the estate (written authorization required) or immediate family members (notarized affidavit required) defined as: spouse or legally recognized domestic partner, parents, children (over the age of 18) and siblings. Beyond this time, requests for these records may be released to anyone after review and approval from the Registrar’s Office.

The University is required to provide students a copy of its FERPA policy annually and upon written request from the student. The Student Verification Process (SVP) is required for inbound and internally transferred phone calls in which a request for the release of or update to any student record information is made. The Student Verification Process is not required for outbound phone calls, provided those calls are to contact numbers in our student academic systems and the student verifies his or her identity. A government-issued photo ID or University of Phoenix-issued photo ID can be used in place of the SVP for in-person requests.

**Solomon Act**

University of Phoenix complies with the Solomon Act, which provides certain information to military recruiters. Information that may be released includes the following:

- Student name
- Home address
- Email address*
- Telephone listing
- Age (date of birth)
- Place of birth*
- Level of education
- Academic major
- Degrees received*
- Most recent educational institution attended*

*This information may be released only when available. No information will be released if the student has a FERPA hold on record.

**Gainful Employment Disclosures**

Disclosures regarding University programs related to gainful employment are provided for each eligible program at http://www.phoenix.edu/programs/gainful-employment.html

**Student Loan Code of Conduct**

The University protects students with established loan policies. University of Phoenix follows federal regulations that govern student loan requirements. The Student Loan Code of Conduct (http://www.phoenix.edu/tuition_and_financial_options/student_loan_code_of_conduct.html) creates and maintains uniform student loan practices that focus on the best interest of student borrowers. It also manages relationships between school employees, learning institutions, lender advisory board members and student loan organizations.

University of Phoenix encourages students to review the Student Loan Code of Conduct at http://www.phoenix.edu/tuition_and_financial_options/student_loan_code_of_conduct.html to learn about loan regulations. Students should contact the University by email at PLL@phoenix.edu with any questions about the information in this
Consumer Privacy Policy

Summarized below are key elements of the University Privacy Policy. The full version of the policy is available at http://www.phoenix.edu/copyright-legal/privacy_policy.html

Scope of Privacy Policy
This policy applies to website visitors, current and prospective students, and any other user of services offered through Apollo Group, Inc. and University of Phoenix (“Apollo” or ‘we”), including any websites or mobile applications operated by or on their behalf.

Information Collected
We collect various types of information through our sites and other websites where you can express interest in our services, through our mobile applications, over the phone and in person where print materials may be used to collect information from you. Some information is collected automatically through various web and Internet technologies, including social networking tools used by your University to foster communication and collaboration among members of our community. Other information is collected when you provide it in response to an advertisement, a survey or a request for information; apply for admission or financial aid; register for classes; order educational or other products and services; set up a social network or other site profile; or use one of our career resources, learning assessments, or other interactive tools. We may also obtain information from other sources and combine that with information we collect about you.

Information Uses
We will not sell, rent, or lease your Personal Information to others except as provided in this policy. We may collect, use, and disclose Personal Information for the following purposes:

- to determine your admissibility and to register you for your selected educational programs
- to provide requested products and services
- to respond to your inquiries and provide customer support
- to administer promotions in which you have indicated an interest
- for our internal marketing purposes, which includes, but is not limited to, sending you material about products, services, updates, etc. that we think may be of interest to you
- for fostering communication and collaboration among members of your University community through Social Networks
- for sharing with our Educational Partners who may contact you with respect to their educational or other services
- for sharing with our Educational Partners or Business Associates who are performing services on our behalf
- to analyze how Sites and services are being accessed and used
- for Online Behavioral Advertising purposes
- to improve Site and service performance and delivery
- to prevent potentially illegal activities (including illegal downloading of copyrighted materials in accordance with our Copyright Infringement policy)
- to analyze academic and learning outcomes and preferences
- to analyze risk and business results
- to obtain payment for services that we provide to you
- to provide you with information concerning arrangements and other options for the repayment of funds loaned to you for your education
- to maintain business records for reasonable periods
- to enforce our Terms of Use
- to provide to Educational Partners, Business Associates or Unrelated Entities in connection with the contemplated or actual reorganization, merger, acquisition, financing, securitization, insuring, sale or other disposal of all or part of our business or assets, including for the purposes of determining whether to proceed with such transaction or fulfilling any records or other reporting requirements to such parties. In the event of any actual reorganization, merger, or acquisition such Information may be transferred as part of the transaction to the acquirer
- and/or as may be required or permitted by legal, regulatory, industry self-regulatory, insurance, audit, or security requirements applicable to Apollo, our Educational Partners, or our Business Associates.

Your Rights and Choices
Marketing Communications
If you do not wish to receive marketing email communications from us, you may express your choice where indicated on the applicable email or other communication, or cut and paste this link into a browser: http://mailout.universityofphoenix.com/web-docs/UnsubscribeEmail.html

If you do not wish to receive marketing telephone calls or mailings, you may express your choice to opt out by emailing Privacy@apollogrp.edu

Under California’s Shine the Light law, Cal. Civ. Code § 1798.83, we provide California residents the ability to opt out of disclosures to Educational Partners for direct marketing purposes. To opt out of these disclosures at no cost, email Privacy@apollogrp.edu

Online Behavioral Advertising
We or our Business Associates may use data collected on this site for Online Behavioral Advertising purposes, e.g. to customize ads to you on other web sites as you browse the Web. If you do not want your browsing behavior on the Sites to be collected for Online Behavioral Advertising purposes, visit http://info.evidon.com/pub_info/1847v=1.

Other Collection, Use, and Disclosure
You may be able to opt out of our collection, use and disclosure of your personal information in other situations subject to applicable contractual, academic, legal or technical restrictions and reasonable notice. Note that if you opt out of certain uses of your personal information, we may no longer be able to provide certain products or services. For more information on your ability to opt out, email Privacy@apollogrp.edu

Other Important Information
We will take commercially reasonable measures to secure and store your information to protect against the loss, misuse and alteration of the information under our control. We utilize industry-standard security measures when accepting your credit card information during your registration or other transaction you have initiated with us, as well as whenever we ask you to log in to any of our sites.

If you become a student, your educational records are subject to the U.S. federal Family Education Rights and Privacy Act (FERPA), state laws and your University policies. To obtain a copy of the "Students' Rights to Privacy and Access to Educational Records"
The copyright law states, "anyone who violates any of the exclusive rights of the copyright owner is an infringer of the copyright or right of the author." Generally, under the law, one who engages in any of these activities without obtaining the copyright owner’s permission may be liable for infringement.

**Peer to Peer File Sharing**

Peer-to-Peer (P2P) file sharing is a general term that describes software programs that allow computer users, utilizing the same P2P software, to connect with each other and directly access digital files from one another’s hard drives. Many copyrighted works may be stored in digital form, such as software, movies, videos, photographs, etc. Through P2P file sharing it has become increasingly easy to store and transfer these copyrighted works to others thus increasing the risk that users of P2P software and file-sharing technology will infringe the copyright protections of content owners.

If P2P file-sharing applications are installed on your computer, you may be sharing someone else’s copyrighted materials without realizing they are doing so. As a user of the University network, recognizing the legal requirements of the files that you may be sharing with others is important. You should be careful not to download and share copyrighted works with others.

The transfer and distribution of these works without authorization of the copyright holder is illegal and prohibited.

**Violations and Penalties under Federal Law**

In addition to University sanctions under its policies as more fully described below, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or statutory damages affixed at not less than $750 and not more than $30,000 per work infringed. For willful infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504, 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

**University Plans to Effectively Combat Unauthorized Distribution of Copyrighted Material; Student Sanctions**

A student’s conduct in the University classrooms and websites is subject to and must fully conform to the University Student Code of Conduct policy, its Acceptable Use policy and any other applicable University policies.

The University may monitor traffic or bandwidth on the networks utilizing information technology programs designed to detect and identify indicators of illegal P2P file sharing activity. In addition to, or as an alternative, the University may employ other technical means to reduce or block illegal file sharing and other impermissible activities.

The University will also provide for vigorous enforcement and remediation activities for those students identified through the University Digital Millennium Copyright Act policy as potential violators or infringers of copyright.

Disciplinary sanctions will be based on the seriousness of the situation and may include remediation based on a comprehensive system of graduated responses designed to curb illegal file sharing and copyright offenses through limiting and denial of network access or other appropriate measures. These sanctions may be in conjunction with additional sanctions through the University Student Code of Conduct, its Acceptable Use Policy and any other University policy applicable to the particular situation.
Students who are subject to professional codes of conduct that apply to their enrollment at the University shall be sanctioned according to the requirements of the respective code.

**Education and Awareness**

The University uses a variety of means to inform students, faculty, and other network users about copyright laws and the response to copyright infringement claims by the University. The University informs its campus community through the Consumer Information Guide and other periodic communications that unauthroized distribution of copyrighted material, including unauthorized P2P files sharing, may subject students and faculty to civil and criminal liabilities and the extent of the possible liabilities. The Consumer Information Guide, http://www.phoenix.edu/about_us/regulatory/consumer-information.html, is available on the University website, is provided to potential students and employees, and is sent by email on a yearly basis to current students, faculty, and employees.

**Legal Sources for Online Music and Videos**

The following links are online sources that provide information on legal access to copyrighted music and videos:

- **EDUCAUSE** is an association of colleges and universities, which maintains a list of legal media sources: http://www.educause.edu/legalcontent
- **Motion Picture Association of America (MPAA)** provides a list of legal motion picture and video sources: http://www.mpaa.org/contentprotection/get-movies-tv-shows
- **The Recording Industry Association of America (RIAA)** provides a list of legal music sources: http://www.riaa.com/toolsforparents.php?content_selector=legal-music-services

The Legal Sources for online music and videos is reviewed annually by the Vice President of IT Security; the most recent review was completed in April 2012.

**Digital Millennium Copyright Act Policy**

The University computer networks, including its online library and classroom environment are critical assets. Accordingly, University of Phoenix respects the rights of the copyright owners and expects its faculty, staff, students, and other network users to comply with U.S. copyright laws. Federal law prohibits the reproduction, distribution, public display or performance of copyrighted materials over the Internet without permission of the copyright owner, except in compliance with fair use or other copyright applicable statutory exceptions. For more information on copyright law, please refer to the University’s Copyright Infringement and Peer-to-Peer File Sharing Policy.

In addition to sanctions that may be applicable under the University Student Code of Conduct Policy, the Acceptable Use of Computing Resources Policy or other policies, University of Phoenix may terminate the network accounts or access to users who have repeatedly infringed on the copyrights of others. University of Phoenix, in compliance with the federal Digital Millennium Copyright Act (DMCA), has established a mandated process for receiving and tracking alleged incidents of copyright infringement. The University has designated an agent who will investigate notices of alleged copyright infringement and take appropriate actions. Such actions may include terminating repeat infringers accounts under the Digital Millennium Copyright Act (DMCA). The copyright infringement notices must be given in writing, preferably by email, or by U.S. mail to the agent listed below:

**University of Phoenix, Inc.**

Attn: Copyright Agent
Subject: Copyright Compliance
4025 S. Riverpoint Parkway, CF-K612
Phoenix, AZ 85040
Email: CopyrightAgent@apollogrp.edu

If a valid DMCA notification is received, the University will respond under this process by taking down the infringing content found on our networks. On taking down content under the DMCA the University will take reasonable steps to contact the owner of the removed content so that a counter notification may be filed. Upon receiving a valid counter notification, the University will generally restore the content in question, unless the University receives notice from the notification provider that a legal action has been filed seeking a court order to restrain the alleged infringer from engaging in the infringing activity.

Please note that the DMCA provides that you may be liable for damages including costs and attorneys fees if you falsely claim that someone is infringing on your copyright. Alternatively, you can also be liable for damages including attorneys’ fees if you materially misrepresent that an activity is infringing on the copyright of another. Therefore, the University recommends contacting an attorney if you are unsure whether your work or the work of another is protected by copyright laws.

**Filing Notice of Alleged Infringement**

Following is the process for filing a notification under the DMCA. Notice must be given in writing to the designated agent as specified above and contain the following information:

- **Identify** the copyrighted work that you believe has been infringed upon; for example, provide the link to the infringing material.
- **Identify** the material that you claim is infringing on your copyright as set forth in number 1 and provide detailed information reasonably sufficient to locate the infringing item; for example, provide the link to the infringing material.
- **Provide** a reasonably-sufficient method of contacting you: phone number, address and email address.
- **If** possible, please provide any information that you allow the University to notify the alleged infringing party of notice of the alleged infringement.
- **The following statement** must be included in your notice: “I have a good faith belief that the use of the copyrighted materials described above and contained on the service is not authorized by the copyright owner, its agent, or by protection of law.”
- **The following statement** must be included in your notice: “I swear, under penalty of perjury, that the information in the notification is accurate and that I am the copyright owner or authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.”
- **The notice must be signed.**

**Filing Counter Notification of Alleged Infringement**

The person or provider of the alleged infringing material may present a counter notification pursuant to the DMCA. Upon proper counter notification, the University may reinstate the removed content. Notice must be given in writing to the designated copyright agent as specified above and contain the following information:

- **Identify** the material that has been removed. This may include providing the location or the URL when possible.
- **Provide** your name, address telephone number and email address if available.
• Provide a statement that you consent to the jurisdiction of Federal District Court for the judicial district in which you reside, or for any address outside the United States, for any judicial district, in which the service provider may be found and that you will accept service of process from the person who provided notification to the University of the alleged infringement or an agent of such person.
• Provide the following statement: "I swear, under penalty of perjury, that I have a good faith belief that the material identified above was removed or disabled as a result of a mistake or misidentification of the material to be removed or disabled."
• The notice must be signed.

CAMPUS SAFETY AND SECURITY

Campus Safety Policies
The University Campus Safety policies have been prepared to increase University of Phoenix community’s awareness of current programs that exist to protect its members’ safety and well-being and to satisfy the requirements of the Safe and Drug Free Schools and Communities Act and Clery Act. The information included relates to the following:
• Annual crime statistics
• Available counseling programs
• Crime prevention
• Drug and alcohol abuse
• Emergency Mass Notification
• Health risks
• Information related to campus safety
• Legal affects of drug and alcohol use
• Prohibited use or distribution of drugs and alcohol
• Safety and awareness

The information is intended to provide a general description of University of Phoenix campus safety policies; however, it is not intended to serve as a contractual agreement between the University and the recipient. Additionally, the University will disseminate and publicize, for each of its campus locations, crime statistics from the most recent calendar year and two preceding calendar years. Please visit http://www.phoenix.edu/about_us/campus_safety/campus_safety_policies.html or http://cdn.assets-phoenix.net/content/dam/altcloud/doc/about_uopx/Campus-Safety-Policies.pdf to access a PDF file of University of Phoenix Campus Safety Policies.

Campus Crime Statistics
This report is compiled in conjunction with University of Phoenix Campus Safety Policies. The following statistics are in accordance with definitions used in the Uniform Crime Reporting System of the Department of Justice and FBI, as modified by the Hate Crime Statistics Act. The data includes all crimes reported to the University of Phoenix campus security authority. If a crime has occurred and has not been reported, it cannot be reflected in the following statistics. For this reason, University of Phoenix encourages everyone to report all crimes to their designated campus security authority and local law enforcement agency.

Upon receiving a valid counter notification, the University will provide the person who filed the original notification with a copy of the counter notice and inform them that the material will be reinstated or access to it restored between 10 and 14 business days following receipt of the counter notice, pursuant to the DMCA unless the University receives notification that legal action to seek a court order restraining the alleged infringer from further engaging in the infringing activity has been filed.

Vaccinations and Immunizations
Information regarding program admissions requirements, including immunization requirements for designated states is located at http://www.phoenix.edu/admissions/admission_requirements.html.

University of Phoenix, 2013-2014
CONSUMER INFORMATION
CAMPUS SAFETY AND SECURITY

Specific campus location statistics are available electronically at http://www.universityofphoenix.com/about_us/campus_crime_statistics.aspx or by requesting a printed copy from your local campus security authority, http://www.phoenix.edu/about_us/campus_safety/campus_safety_contact_list.html. University of Phoenix expressly reserves the right to modify or to adopt additional campus policies and procedures relating to campus safety, at anytime without notice.

Statement of Policy On Sex Offender Registration
The Federal Campus Sex Crimes Prevention Act requires colleges and universities to issue a statement advising the campus community where state law enforcement agency information concerning registered sex offenders may be obtained. The Act also mandates that sex offenders who are already required to register in a state to provide notice of each institution of higher education in that state at which the offender is employed or is a student.

To learn the identity of registered sex offenders on or near a campus, or anywhere in the United States, visit the Sex Offender databases at http://www.sexoffender.com or http://nsopr.gov. You can search by city, county, or zip code. This information is collected by other agencies and this institution cannot guarantee this information is correct or complete. The information provided here is intended to be in compliance with the Clery Act and for campus safety purposes only. It should not be used to intimidate, threaten, or harass. Misuse of this information may result in prosecution.

Emergency Mass Notification Policy
Apollo Group, Inc., and University of Phoenix have established an emergency mass notification process that includes emergency escalation processes, mass notifications and supporting systems. These processes enable Apollo, and its subsidiary educational institutions to contact or send notices, alerts or warnings without delay to employees for Apollo, and University of Phoenix faculty, and students in an emergency, dangerous or otherwise high-risk situation at a University site.

Apollo and University of Phoenix maintain emergency management policies, procedures and systems to protect lives and property, and to continue necessary critical functions and essential services.

An emergency is defined as a situation that poses an immediate threat to the health or safety of someone in the University community at a University site or that significantly disrupts Apollo programs and activities.
Drug abuse affects all aspects of American life. It threatens the workplace, our homes, our schools and our community. The U.S. Department of Education requires institutions of higher education to implement a drug prevention and awareness program for their students and employees through the Safe and Drug Free Schools and Communities Act. All students are expected to conduct themselves as mature adults and as members of an academic community. The consumption of alcohol or other drugs while attending class or meeting with campus personnel is prohibited and may be subject to disciplinary action. All alcohol and other drug abuse policies, prevention and referrals can be found in the Campus Safety Policies Manual located at http://www.phoenix.edu/about_us/campus_safety/campus_safety_policies.html.

Standards of Conduct

The University community must adhere to a code of conduct that recognizes the unlawful manufacture, sale, delivery, unauthorized possession or use of any illicit drug is prohibited on property owned or otherwise controlled by University of Phoenix. If an individual associated with the University is apprehended for violating any alcohol- or drug-related law when on University property, or participating in a University activity, the University will fully support and cooperate with federal and state law enforcement agencies. Underage possession or consumption of alcoholic beverages is not permitted on property owned or controlled by the University, and the state laws will be enforced. Also, intentionally or knowingly selling, or intentionally or knowingly furnishing alcoholic beverages to persons under the age of 21, or to persons obviously inebriated, is not permitted on property owned or controlled by the University.

Pell Grant

Federal guidelines state the grantee must certify that he or she will not engage in unlawful activities related to controlled substances during the period covered by the grant.

Federal Financial Aid Penalties for Drug Convictions

Federal guidelines focus strongly on illicit drug use and distribution. The Higher Education Opportunity Act states students convicted for an illicit drug violation can be denied federal financial aid for a specific period, in addition to other legal penalties. The Free Application for Federal Student Aid (FAFSA®) asks students if they have been convicted of a drug-related offense. “Have you ever been convicted of possessing or selling illegal drugs?” If you answer “yes,” complete and submit this application, and we will send you a worksheet in the mail for you to determine if your conviction affects your eligibility for aid.” Failure to answer the question automatically disqualifies students from receiving federal financial aid. Answering this question falsely could result in fines, imprisonment or both. More information about federal penalties and sanctions is located at http://www.justice.gov/dea/druginfo/ftp3.shtml. If the student was convicted of both possessing and selling illegal drugs, and the periods of ineligibility are different, the student will be ineligible for the longer period.

Possession of Illegal Drugs:

• First offense, a student loses eligibility for federal financial aid for one year from the date of conviction.
• Second offense, a student loses eligibility for federal financial aid for two years from the date of conviction.
• Third offense and subsequent offenses, a student is indefinite ineligible for federal financial aid from the date of conviction.

Sale of Illegal Drugs:

• First offense, a student loses eligibility for federal financial aid for two years from the date of conviction.
• Second offense and subsequent offenses, a student is indefinite ineligible from the date of conviction.

How to Regain Eligibility

A student can regain eligibility for federal student aid funds the day after the period of ineligibility ends or upon successful completion of a qualified drug rehabilitation program or passes two unannounced drug tests given by such a program. A student can regain eligibility for federal student aid funds the day after the period of ineligibility ends or upon successful completion of a qualified drug rehabilitation program that must
• Include at least two unannounced drug tests; and
• Have received or be qualified to receive funds directly or indirectly under a federal, state, or local government program.

Students denied eligibility for an indefinite period can regain it after successfully completing a rehabilitation program, passing two unannounced drug tests from such a program, or if a conviction is reversed, set aside or removed from the student’s record so that fewer than two convictions for sale or three convictions for possession remain on the record.

In such cases, the nature and dates of the remaining convictions will determine when the student regains eligibility. The student is responsible to certify that a rehabilitation program was successfully completed. As with the conviction question on the FAFSA®, the University is not required to confirm the reported information unless conflicting information is determined.

Convictions During Enrollment

Federal regulations require enrolled students convicted of a drug offense after receiving federal financial aid to notify Student Financial Services - Operations (SFS-O) immediately, become ineligible for further federal financial aid and repay federal financial aid received after the conviction.

Institutional Sanctions for Alcohol and Drug Violations

Any member of the University community found consuming or selling alcohol or drugs on University property shall be subject to discipline on a case-by-case basis.
• Discipline will be based on the seriousness of the situation.
• A case may result in dismissal from the University.
• In all cases, the University will abide by local, state and federal sanctions regarding unlawful possession of drugs and the consumption of alcohol.
• Additional state penalties and sanctions may also apply.
• The University has adopted a zero tolerance policy regarding underage drinking.
School Organizations

It is the policy of University of Phoenix (UOPX) to provide our students with opportunities to form student organizations that are recognized under the University’s Conditions of Recognition for Student Organizations.

Conditions of Recognition for Student Organizations

The University has established the following minimum criteria that each student organization must meet to be recognized by, and to function within, the University of Phoenix community:

- Recognized Student Organizations are independently installed, organized, and managed by students enrolled and actively attending at the University.
- All members of a University Recognized Student Organization must be enrolled and actively attending the University and in good standing.
- Recognized Student Organizations are recognized by, but not as official units of University of Phoenix or Apollo Group, Inc.
- Recognized Student Organizations must have a published purpose/mission, operate under a formal leadership/governance structure, and maintain membership rosters, financial statements, meeting minutes, etc. Said items shall be submitted upon initial application and upon annual review or more frequently, as required or requested.
- Recognized Student Organizations must have a University-approved Campus Liaison. The role of the Campus Liaison is voluntary and intended to serve as a liaison between the campus-based student organization and the University and to provide general guidance related to installing, organizing, leading, managing, and sustaining a healthy and productive student organization. If it becomes necessary for a student organization to be dissolved, the Campus Liaison will provide guidance/support to ensure a seamless exit strategy for the participating students, student organization, and the University. (Information pertaining to the minimum University of Phoenix Campus Liaison criteria is provided on pages 11-12).
- Recognized Student Organizations may not possess any financial ties or result in any financial impact to University of Phoenix or any other subsidiaries of Apollo Group, Inc. All expenses related to installing, organizing, leading, managing, and/or sustaining a student organization are the sole responsibility of the student organization.
- The tax status of the University does not extend to student organizations. Student organizations must follow all local, state, and federal guidelines. Student organizations have sole responsibility for securing, maintaining, or demonstrating that they operate under the appropriate nonprofit tax exemptions (i.e., 501(c)(7)) or tax employer identification numbers, as appropriate. Under no circumstances are student organizations allowed to utilize the federal tax numbers or designations of University of Phoenix or any other subsidiaries of Apollo Group, Inc.
- Consistent with the University of Phoenix Mission, Recognized Student Organizations must strive to enhance the student experience, the University culture, and their communities as demonstrated with the organization’s purpose/mission and charter.
- Recognized Student Organizations must meet all Conditions of Recognition and agree to abide by all University of Phoenix regulations, policies, and procedures. This includes, but is not limited to, all academic catalog policies, campus safety policies, consumer information policies, public relations policies, marketing/advertising guidelines, privacy policies, and the student, faculty, and staff codes of conduct.
- Recognized Student Organizations must be open to all students who meet the membership requirements. Recognized Student Organizations may not limit membership based on race, color, gender, age, religion, disability or perceived disability, veteran status, sexual orientation, gender identity, national origin, or any other category protected by federal, state, or local law.
- Student organizations must submit a Student Organization Recognition application to the University of Phoenix Office of Academic Administration and be approved by the University to receive formal recognition status and recognition-related benefits. Formal recognition and access to the recognition-related benefits will not be granted until an application is reviewed and approved.
- Recognized Student Organizations must submit for affiliation renewal 30 days prior to the anniversary of their initial recognition approval date. Upon approval, recognition status and benefits will be renewed for one year. This ensures proper maintenance of each student organization recognition and continued compliance with regulatory, policy, and procedural changes.
- All members of a University recognized Student Organization must be actively enrolled in the University and in good standing.
- Student Organizations that are academically oriented or request to install an institutional-level chapter/charter must receive approval from the appropriate Institutional Sponsor (i.e., College/School Dean or Director-level representative in University of Phoenix Central Administration), as appropriate.
- Recognized Student Organizations must meet one of the University’s approved Student Organization Types and Recognition Statuses as defined below.

Approved Recognized Student Organization “Types”

- Academic excluding Honor Societies - Academic organizations are generally intended for students with common academic interests, pursuing a particular field of study, and/or students who are interested in academic engagement and support beyond the classroom.
- Honor Societies - Honor Societies are generally geared toward students who demonstrate a high level of academic achievement. Membership in honor societies (e.g., Delta Mu Delta) is typically by invitation and criteria-based.
- Professional -Established professional associations are generally intended for students with a specific program, interest area, and possibly occupational aspirations in a professional field (e.g., Project Management Institute [PMI], Society for Human Resource Management [SHRM]).
- Service - Service organizations are generally intended for students seeking opportunities to participate in community service and/or philanthropic activities.

Approved Recognized Student Organization Recognition
“Statues”

- **University-Level Recognition** - Student organizations, which have been approved by the University and the participating student organization's corporate office to install an institutional-level charter/chapter under which all local campus sites would operate. For example, University of Phoenix installed the Delta Mu Delta Lambda Sigma institutional charter in 2009, under which all campus sites are eligible to apply to install a local area co-chapter.

- **Local Campus-Level Recognition** - Additional local campus sites that have been approved by the University to operate under the governance/oversight of the University-Level recognized charter/chapter. For example, the Boise Campus has been approved to install a “co-chapter” which operates under University’s Delta Mu Delta Lambda Delta institutional-level charter.

- **Single Site Recognition** - Student organizations which have been approved by the University and the participating student organization’s corporate office to install a charter/chapter to operate separately and independently at one of the University’s local campus sites.

- **Non-Standard Recognition** - Student organizations, which do not fit any of the other recognized affiliation statuses, may apply for affiliation under this status. These requests are considered on a case-by-case basis.

**University of Phoenix Supplemental Standards for Candidates in the College of Health Sciences and Nursing**

Candidates in a College of Health Sciences and Nursing programs leading to certification or licensure in nursing and/or healthcare at University of Phoenix are subject to greater scrutiny because of their anticipated interactions with students, families, patients and clients in the community. These degree candidates participate in one or more clinical rotations, practicum, and/or preceptorships as part of their academic program. As prospective nurses, nurse practitioners and/or healthcare providers, College of Health Sciences and Nursing candidates are expected to represent the University as professionals and adhere to the ethics and standards of their profession as well as the University’s Student Code of Conduct.

The following Supplemental Standards for Candidates in College of Health Sciences and Nursing programs (“Supplemental Standards”) apply to these degree candidates before, during, and after their field placements. The Supplemental Standards address a candidate’s affective attributes and disposition to be nurses, nurse practitioners and/or healthcare providers. A corresponding Professional Dispositions Rubric provides additional guidance.

A candidate’s ability to satisfactorily meet the Supplemental Standards is a matter of ongoing academic judgment made by faculty, campus staff, and campus management.

1. The candidate contributes to a positive climate in the University classroom and all clinical rotations, practicum, and/or preceptorships.
2. The candidate demonstrates mastery of written and spoken language for self-expression, as well as for effective interaction in all settings.
3. The candidate is a thoughtful and responsive listener.
4. The candidate is committed to reflection, assessment, and learning as an ongoing process.
5. The candidate is willing to give and receive help.
6. The candidate is sensitive to community and cultural norms for nursing, the University classroom, and clinical rotations, practicum, and/or preceptorships.
7. The candidate appreciates and values human diversity and shows respect for others’ varied talents and perspectives.
8. The candidate values the development of critical thinking, independent problem solving, and performance capabilities in himself/herself and those with whom he/she interacts.
9. The candidate demonstrates a commitment to keeping abreast of new ideas and understanding in the nursing and/or healthcare field.
10. The candidate demonstrates a level of responsibility and ethical judgment consistent with professional guidelines developed for these fields and appropriate for professional nurses, nurse practitioners and/or healthcare providers.
11. The candidate maintains the highest ethical standards in interactions with faculty, students, staff, clients, and patients as well as in preparation and submission of required course work, and the completion of tests.
12. The candidate maintains a pattern of consistently meeting academic and professional standards in courses and clinical rotations, practicum, and/or preceptorships.

When it is determined by faculty, campus staff, or campus management that a candidate falls short of meeting any of the above Supplemental Standards, they may file a “Referral Form” with the Campus College Chair, Campus Director of Academic Affairs, or designee. Any candidate who receives one or more referral(s) shall be counseled, remediated, or withdrawn from their program, as appropriate.

Candidates who are separately charged with violating the Student Code of Conduct shall be subject to the policies, procedures, and sanctions for processing such charges. However, a charge under the Student Code of Conduct may also be the basis for a referral on separate academic grounds under these Supplemental Standards. Similarly, an observation under the Referral Process may be the basis for a Student Code of Conduct charge.

**University of Phoenix Supplemental Standards for Candidates in College of Social Sciences Counseling and Human Services Programs**

Candidates in College of Social Sciences programs leading to certification or licensure in Counseling and/or Human Services at University of Phoenix are subject to greater scrutiny because of their anticipated interactions with clients and others in the community. These degree candidates participate in one or more field placements, practicums, and/or internships as part of their academic program. As prospective human services workers or counselors, College of Social Sciences candidates are expected to represent the University as professionals and adhere to the ethics and standards of their profession as well as the University’s Student Code of Conduct.

The following Supplemental Standards for Candidates in College of Social Sciences Programs (“Supplemental Standards”) apply to these degree candidates before, during, and after their field placements, practicums, and internships. The Supplemental Standards address a candidate’s affective attributes and disposition to be a human services worker or counselor. A corresponding Professional Dispositions Rubric provides additional guidance.
A candidate's ability to satisfactorily meet the Supplemental Standards is a matter of ongoing academic judgment made by faculty, campus staff, and campus management.

1. The candidate contributes to a positive climate in the University classroom and all field placements, practicums, and internships.
2. The candidate demonstrates mastery of written and spoken language for self-expression, as well as for effective interaction in all settings.
3. The candidate is a thoughtful and responsive listener.
4. The candidate is committed to reflection, assessment, and learning as an ongoing process.
5. The candidate is willing to give and receive help.
6. The candidate is sensitive to community and cultural norms of the counseling and/or human service industry, the University classroom, and all field placements, practicums, and internships.
7. The candidate values human diversity and shows respect for others' varied talents and perspectives.
8. The candidate values the development of critical thinking, independent problem solving, and performance capabilities in himself/herself and those with whom he/she interacts.
9. The candidate demonstrates a commitment to keeping abreast of new ideas and understanding in the human services and/or counseling field.
10. The candidate demonstrates a level of responsibility and ethical judgment consistent with professional guidelines developed for these fields and appropriate for a professional human services worker and/or counselor. These guidelines are outlined in the National Organization for Human Services (NOHS) Code of Ethics, the American School Counselor Association (ASCA) Ethical Standards for School Counselors, and the American Counselors Association (ACA) Code of Ethics.

The following Supplemental Standards for Candidates in College of Education Programs ("Supplemental Standards") apply to these degree candidates before, during, and after their field placements. The Supplemental Standards address a candidate's affective attributes and disposition to be an educator/administrator. A corresponding Professional Dispositions Rubric provides additional guidance. A candidate's ability to satisfactorily meet the Supplemental Standards is a matter of ongoing academic judgment made by faculty, campus staff, and campus management, and external placement constituents.

1. The candidate contributes to a positive climate in the University classroom and all field placements.
2. The candidate demonstrates mastery of written and spoken language for self-expression, as well as for effective interaction in all settings.
3. The candidate is a thoughtful and responsive listener.
4. The candidate is committed to reflection, assessment, and learning as an ongoing process and believes that all students can learn.
5. The candidate is willing to give and receive help.
6. The candidate is sensitive to community and cultural norms in the University classroom and in clinical experience.
7. The candidate appreciates and values human diversity and shows respect and fairness for others' varied talents and perspectives.
8. The candidate values the development of critical thinking, independent problem solving, and performance capabilities in him-
A. First Referral

1. Upon receipt of a Notification of a Referral, the Campus College Chair or designee will review the information presented, as well as gather any additional information relevant to the notification. The Campus College Chair or designee will then notify the candidate by letter of the referral, identifying the candidate’s deficiencies in meeting the above Supplemental Standards. Notification shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the Candidate Retention Committee.

2. Upon receipt of the Notification of Referral letter, the candidate must respond in writing within ten (10) calendar days. Failure to respond will result in the candidate being suspended indefinitely at the conclusion of his/her current course. A candidate suspended solely for failure to respond will be reinstated to attendance upon receipt of his/her written response.

3. The Campus College Chair and candidate will agree to a time/date when the candidate must meet with the Campus College Chair or designee to discuss why the referral occurred and whether or not a formal remediation plan or other corrective action is needed.

4. The candidate must meet with the Campus College Chair or designee.

5. Failure by the candidate to meet with the Campus College Chair within thirty (30) calendar days will result in the candidate being indefinitely suspended at the conclusion of his/her current course. A candidate suspended solely for failure to meet with the Campus College Chair will be reinstated to attendance following the meeting with the Campus College Chair or in accordance with the Remediation Plan.

NOTE: The Campus College Chair or designee may convene a meeting of the Candidate Retention Committee if the reported conduct is deemed serious enough to warrant possible recommendation options available to the Candidate Retention Committee. (See below for Candidate Retention Committee process.)

6. The Campus College Chair and candidate will meet for the purpose of discussing the referral and developing a remediation plan to assist the candidate in correcting identified deficiencies. The Campus College Chair will have final authority over the terms of the remediation plan. The candidate will be provided a written copy of the remediation plan.

7. The candidate will not be permitted to have representation by an attorney or any other third party in this academic meeting.

8. The candidate is expected to maintain contact with the Campus College Chair or designee regarding progress in completing the remediation plan or challenges with completing the remediation plan. Failure to complete the remediation plan in the time prescribed may result in an additional referral under the Supplemental Standards.

9. The candidate will be notified in writing of successful completion of the remediation plan.

B. Two or More Referrals

1. Upon receipt of a Notification of a Referral, the Campus College Chair or designee will review the information presented, as well as gather any additional information relevant to the notification. The Campus College Chair or designee will then notify the candidate in writing of the referral and the convening of a Candidate Retention Committee, identifying the candidate’s deficiencies in meeting the above Supplemental Standards. Notification shall specifically describe the issue(s) to be discussed and the possible recommendation options available to the Candidate Retention Committee.

2. Upon receipt of the Notification of Referral with Candidate Retention Committee letter, the candidate must respond in writing within ten (10) calendar days. Failure to respond will result in the candidate being suspended indefinitely at the conclusion of his/her current course. A candidate suspended solely for failure to respond will be reinstated to attendance upon receipt of his/her written response.

3. After the candidate has responded, the Campus College Chair or designee shall convene a meeting of the Candidate Retention Committee as described below.

4. The candidate will be notified in writing of the decision of the Candidate Retention Committee, including any right of appeal.

Candidate Retention Committee

1. The Candidate Retention Committee is comprised of the Campus College Chair or designee and at least two faculty members within the candidate's College.

2. The Campus College Chair or designee and candidate will agree to a time/date that the candidate must meet with the Candidate Retention Committee.

3. Failure by the candidate to meet with the Candidate Retention Committee within thirty (30) calendar days of receipt of the notification will result in the candidate being indefinitely suspended at the conclusion of his/her current course. A candidate suspended solely for failure to meet with the Candidate Retention Committee will remain suspended pending the outcome of the Candidate Retention Committee.

4. The candidate must participate in a dialogue with the Candidate Retention Committee to discuss why the referral occurred, whether a formal remediation plan or other corrective action is
needed, including possible withdrawal from the program. The Candidate Retention Committee members shall discuss with the candidate the issues or problems that appear to be hindering his/her academic progress and the candidate is expected to provide insight regarding the referral and possible solutions.

5. The candidate will not be permitted to have representation by an attorney or any other third party in this academic meeting.

6. After meeting with the candidate, the Candidate Retention Committee members shall dismiss the candidate from the meeting prior to their deliberations on a recommendation. The Candidate Retention Committee shall make one of the following recommendations:
   a. Take no action;
   b. Institute a formal remediation plan; or
   c. Withdraw the student from the program.

7. The Candidate Retention Committee shall issue a summary report, generally containing findings and recommendations, to the Director of Academic Affairs or designee, who has the ultimate authority to accept, reject, or modify the recommendations of the Candidate Retention Committee and render the decision.

Decision

1. Take No Action
   a. Upon a decision to take no action, the candidate will be notified in writing of the decision.
   b. A decision to take no action may be taken into consideration should the candidate receive any future referral.
   c. A decision to take no action is final and cannot be appealed.

2. Institute a Formal Remediation Plan
   a. Upon the decision that a formal remediation plan be instituted, the candidate will be notified in writing of this decision and directed to contact the Campus College Chair or designee.
   b. Upon notification, the candidate is expected to contact the Campus College Chair or designee within thirty (30) calendar days for the purpose of scheduling a meeting to develop a remediation plan to assist the candidate in correcting identified deficiencies. Failure by the candidate to meet with the Campus College Chair within thirty (30) calendar days of notification may result in an additional referral under the Supplemental Standards.
   c. The candidate will not be permitted to have representation by an attorney or any other third party in this academic meeting.
   d. The Campus College Chair will have final authority over the terms of the remediation plan. The candidate will be provided a written copy of the remediation plan.
   e. The candidate is expected to maintain contact with the Campus College Chair or designee regarding progress in completing the remediation plan or challenges with completing the remediation plan. Failure to complete the remediation plan within the prescribed time may result in an additional referral under the Supplemental Standards.
   f. A recommendation decision by the Candidate Retention Committee to institute a Formal Remediation Plan is final and cannot be appealed.

3. Program Withdrawal
   a. Upon decision that the candidate be withdrawn from the program, the candidate will be notified in writing.
      i. A student who does not successfully complete his/her student teaching, practicum, internship or field experience within two attempts will be withdrawn from the program without going through the Candidate Retention Committee.
   b. The candidate notification of program withdrawal will inform the student s/he has the right to appeal this decision to the Central Administration Appeals Committee by filing a written statement within ten (10) calendar days of receipt of the decision. The notification will provide the candidate with information on submitting such appeal.
   c. If no appeal is filed within ten (10) calendar days of receipt of the decision, the program withdrawal becomes a final decision and there is no further appeal.

NOTE: A student who does not successfully complete his/her student teaching, practicum, internship or field experience within two attempts will be withdrawn from the program without going through the Candidate Retention Committee.

Central Administration Appeal Committee

1. The Central Administration Appeals Committee is generally comprised of the Dean from the appropriate college, an Assistant or Associate Dean from the appropriate college or designee, and a Regional Director of Academic Affairs.

2. The Central Administration Appeals Committee will review information provided by the campus, which shall consist of any information considered by the Candidate Retention Committee and the student’s statement of appeal. The Central Administration Appeals Committee meeting is facilitated by the Office of Dispute Management.

3. The Central Administration Appeals Committee shall make one of the following decisions:
   a. Reject the withdrawal and remand back to the campus to reinstate into the program and remediate if applicable; or
   b. Uphold the program withdrawal.

4. The candidate will be notified in writing of the Central Administration Appeals Committee decision.

5. The decision of the Central Administration Appeals Committee is final.

Policy on Nursing Ethics and Professional Competence

The University of Phoenix Policy on Nursing Ethics and Professional Competence is defined as compliance with the following nursing guidelines:

University of Phoenix Professional Nursing Responsibilities.
American Nurses Association Code for Nurses.

The policy sets forth expectations and regulations for professional and ethical conduct by students enrolled in the Bachelor of Science in Nursing and Master of Science in Nursing degree programs. The policy states that all forms of unethical behavior or professional incompetence are to be reported and reviewed. Reported violations will be addressed through a formal process to the Campus Ethics Committee.
Expectations for conduct and the standards are discussed in the beginning classes for either the baccalaureate or graduate degree programs. Content supporting this information is provided to students in their program handbooks.

**Students' Right to Privacy**

The University of Phoenix maintains compliance with the Family Educational Rights and Privacy Act of 1974 (FERPA), as amended. FERPA defines requirements which are designed to protect the privacy of student records maintained by the University. The law requires that:

1. Students should be provided access to official records directly related to them. Students who wish to see their records must make an appointment or submit a written request through the University Registrar’s Office or local campus office.
2. Students may not remove any materials, but are entitled, at their expense, to one copy of any materials contained in their file, unless a disclaimer appears on the document indicating that the student is not to be given a copy, or if the student waived the rights to the document.
3. Students be given the opportunity for a hearing to challenge such records on the grounds that they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under the law does not include any right to challenge the appropriateness of a grade as determined by the faculty member.
4. Students’ written consent must be received prior to releasing personally identifiable student data from their records to other than a specified list of exceptions.

**STUDENT CODE OF CONDUCT**

The Student Code of Conduct of University of Phoenix supports the University’s mission to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. Students are expected to conduct themselves ethically, honestly, and with integrity as responsible members of the University’s academic community. This requires the demonstration of mutual respect and civility in academic and professional discourse.

A University is a marketplace of ideas and, in the search for truth, it is essential that freedom exists for contrary ideas to be expressed. Accordingly, students are expected to respect the rights and privileges of others and to foster an environment conducive to learning. Students are accountable for their actions and are required to work independently, as well as collaboratively with teams, in achieving learning goals and objectives.

By virtue of membership in the University’s academic community, students accept an obligation to abide by this Student Code of Conduct. Conduct, either on or off-campus, that is determined to impair, interfere with, or obstruct the opportunities of others to learn or that disrupts the mission, processes, or orderly functions of the University will be deemed misconduct and shall be subject to appropriate disciplinary action. Misconduct for which students are subject to disciplinary action includes, but is not limited to, the following enumerated violations:

1. Actions, oral statements, and written statements which threaten or violate the personal safety of any member of the faculty, staff, or other students.
2. Harassment that has the effect of creating a hostile or offensive educational environment for any student, faculty, or staff member.
3. Sex discrimination/sexual harassment that has the effect of creating a hostile or offensive educational environment for any student, faculty, or staff member. This includes, but is not limited to, sex discrimination, sexual harassment, unwelcome conduct of a sexual nature, unwelcome sexual advances, requests for sexual favors, and other verbal and nonverbal, or physical conduct of a sexual nature including sexual violence.
4. Stalking or persistently pursuing another person that has the effect of imposing unwelcomed contact and/or communication.
5. Disruptive behavior that hinders or interferes with the educational process.
6. Violation of any applicable professional codes of ethics or conduct.
7. Failure to promptly comply with any reasonable directive from faculty or University officials.
8. Failure to cooperate in a University investigation.
9. Carrying of weapons on campus, at campus-sanctioned events, or when meeting with campus personnel. (This policy is not applicable to students who are law enforcement officers required by law to carry firearms at all times).
10. Using, dealing in, or being under the influence of alcohol, other substances or illegal drugs while in class, at campus-sanc-
tioned events, or when meeting with campus personnel.
11. Failure to maintain confidentiality and respect the privacy of personal or professional information communicated about clients, one's employer, other students or their employers.
12. Falsification, alteration or invention of information, including, but not limited to, any third party document used to apply for financial aid, or lying during a University investigation.
13. Violation of the Student Code of Academic Integrity.
14. Violation of the policy on Acceptable Use of University Computing and Communication Resources for Students and Faculty.
15. Hazing (any action which recklessly or intentionally endangers the mental health or physical health or safety of a student for the purpose of initiation or admission into or affiliation with any University-sanctioned organization).
16. Violation of University regulations and policies (in addition to those regulations and policies covered by items 1-15 above).
17. Violation of federal, state, or local laws or regulations that impacts the University's educational environment.

**Student Code of Academic Integrity**

University of Phoenix is an academic community whose fundamental mission is the pursuit of intellectual growth. Achievement of this mission is dependent upon the development of autonomous thought and respect for the ideas of others. Academic dishonesty threatens the integrity of individual students as well as the University's academic community.

By virtue of membership in the University’s academic community, students accept a responsibility and obligation to abide by this Student Code of Academic Integrity, which is a part of the Student Code of Conduct. Academic integrity violations include all forms of academic dishonesty, including but not limited to the following:

1. Plagiarism - Intentional or unintentional representation of another’s words or ideas as one’s own in an academic exercise.

   Examples of plagiarism include but are not limited to:
   
a. The exact copy of information from a source without proper citation and without use of quotation marks or block quotation formatting. If any words or ideas used in a class posting or assignment submission do not represent the student’s original words or ideas, the student must distinguish them with quotation marks or a freestanding, indented block quotation (for a quotation of 40 or more words), followed by the appropriate citation in accordance with the Publication Manual of the American Psychological Association. When a student copies information from a source, he or she must acknowledge the source with quotation marks or block quotes irrespective of whether or not the source has been formally published.

b. Paraphrasing statements, paragraphs, or other bodies of work without proper citation using someone else’s ideas, data, language, and/or arguments without acknowledgement.

c. Presenting work as the student’s own that has been prepared in whole or part by someone other than that particular student. This includes the purchase and/or sharing of work.

d. Failure to properly cite and reference statistics, data, or other sources of information that are used in one’s submission.

2. Self-plagiarism, double dipping, or dovetailing - Submission of work that has been prepared for a course without fair citation of the original work and prior approval of faculty. Students who submit assignments that were previously submitted in any prior course are subject to the same consequences they would face if they plagiarized these assignments. The use of one’s previous work in an assignment requires prior approval from the current faculty member and citation of the previous work.

3. Fabrication - Falsification or invention of any information, citation, data, or document.
   
a. This includes the invention or alteration of data or results, or relying on another source’s results in any assignment without proper acknowledgement of that source. Fabrication includes citing sources that the student has not actually used or consulted.

4. Unauthorized Assistance - Use of materials or information not authorized by the faculty member to complete an academic exercise, or the completion of an academic exercise by someone other than the student. This includes the purchasing of services to partially or fully complete academic work.
   
a. Students must rely upon their own abilities and refrain from obtaining assistance in any manner that faculty does not explicitly allow. This includes but is not limited to providing or receiving answers to an exam, use of faculty materials or answer keys, or a student having someone take his or her exam.

5. Copyright infringement - Acquisition or use of copyrighted works without appropriate legal license or permission which includes peer-to-peer file sharing.
   
a. Any unauthorized distribution of copyrighted material, including peer-to-peer file sharing, including illegal downloading or unauthorized distribution of copyrighted materials using the University information technology system may subject a student to civil and criminal liabilities. Refer to: http://www.copyright.gov/title17/92chap5.pdf for information on federal copyright infringement and remedies.

6. Misrepresentation - Falsely representing the student’s situation to faculty when (1) justifying an absence or the need for an incomplete grade; or (2) requesting a makeup exam, a special due date, or extension of a syllabus or class deadline for submitting a course requirement.

7. Collusion - Helping or allowing another student to commit any act of academic dishonesty.

**Procedure for Processing Alleged Violations of the Student Code of Conduct:**

Please note there are three separate procedures under the Student Code of Conduct: campus code of conduct, student records, and Title IX.

1. Campus Code of Conduct - all violations unless related to student records or sex discrimination/sexual harassment.
   
a. Alleged Violations are subject to a fair and impartial process and may result in a warning or charge.
      
i. Investigation - alleged violations will be investigated in a prompt, thorough, and impartial manner. The investigation will gather relevant evidence, including, but not limited to, pertinent documents and statements from witnesses.
      
ii. During an investigation a student may be removed from class, campus-sanctioned events, and other University
functions after review and consultation with the Office of Dispute Management.

b. Notification - A student who is charged will be notified of the specific charge(s) in writing and will be given ten (10) days to submit a written response to the designated University official.

i. Failure of a student to respond to the Charging Letter will result in suspension from the University following completion of the current course if the student is actively attending classes and is not subject to immediate suspension.

ii. In those instances where it is determined the conduct does not warrant a Charging Letter, a Warning Letter and/or counseling to the student will be provided. Note: A Warning Letter is not appealable.

iii. If this is a drug and/or alcohol related offense the campus must also notify the Office of Dispute Management.

c. Student Response

i. A student response acknowledging guilt will be sent to the Campus Director of Academic Affairs, the Campus Director of Operations, or their designee who will determine the appropriate sanction(s).

ii. A student response denying the charge(s) will follow the committee process outlined below.

d. Ethics Committee:

i. After the campus investigation is completed and the student has responded to the Charging Letter, an Ethics Committee will be convened to review the file, make findings of facts and recommendations to the Campus Director of Academic Affairs or the Campus Director of Operations (or designee).

ii. The Ethics Committee will be facilitated by an impartial University administrator and composed of at least three impartial individuals who have no prior involvement with the student or the investigation: a campus administrator, a faculty member, and a student representative.

iii. The preponderance of the evidence standard of proof (more likely than not) will be used to weigh the evidence and make a recommendation to the Director of Academic Affairs, Director of Operations, or designee about whether a violation occurred and what sanction, if any, is warranted.

iv. Students will be afforded the opportunity to address the Committee via teleconference to make a statement in their defense.

v. Students are not entitled to representation by an attorney or any other third party at any point in the process.

vi. Tape, digital, or other electronic recording of the committee meeting is not permitted.

vii. The Committee members are given a Case Packet with all relevant information for the committee meeting, including any written response received from the student.

viii. The Committee members sign a Confidentiality Statement for Committee Members and, after the Committee’s deliberations, the Case Packets are required to be destroyed in order to maintain confidentiality.

e. Decision - the facilitator delivers a summary report, generally containing findings of fact and recommendations, to the Campus Director of Academic Affairs or the Campus Director of Operations (or designee), who has the ultimate authority to accept, reject, or modify the recommendations of the Ethics Committee and render the decision. All tasks related to the Student Code of Conduct procedure must be completed in the appropriate system by the Campus Director of Academic Affairs or the Campus Director of Operations within 45 days.

i. The decision will be communicated to the student by the decision maker.

ii. In accordance with the requirements under the Higher Education Opportunity Act (HEOA), upon written request, the University of Phoenix will disclose to an alleged victim of a crime of violence, or a non-forcible sex offense, the results of any disciplinary hearing conducted by the institution against the student(s) who is/are the alleged perpetrator(s) of the crime or offense. If the alleged victim is deceased as a result of the alleged crime or offense, the University of Phoenix will provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.

iii. Any decision which affects a student’s enrollment or academic status will be communicated to the Registrar’s Office for records update.

f. Sanctions:

i. If a violation is found, disciplinary sanctions will be based on the seriousness of the situation and may include, but are not limited to, documented counseling by a University staff member, loss of academic credit, suspension and/or expulsion.

ii. A recommendation of expulsion by the decision maker will be automatically reviewed by the Student Discipline Review Committee (SDRC) in the Office of Dispute Management (ODM) and must be endorsed before the campus communicates that sanction to the student.

g. Appeals:

i. Where a student is found to be in violation of the Student Code of Conduct after receiving a Charging Letter, they may appeal the decision to the SDRC in the ODM within ten (10) days of receiving the campus decision.

ii. The SDRC is comprised of a senior manager from the University, a Regional Director of Academic Affairs, and an Associate or Assistant Dean from the accused student’s college (or their respective designee). The decision of the SDRC is final and shall be communicated directly to the student and the campus, except in the case of a decision by the SDRC supporting a campus recommendation of expulsion (see f.ii. above).

iii. If the student is sanctioned with expulsion, the review of the appeal will be conducted by the Senior Management Review Committee (SMRC) in the Office of Dispute Management. The SMRC is comprised of the Provost, the Vice President of Office of Admissions & Records, and the Dean of the accused student’s college (or their respective designee). The decision of the SMRC is final and will be communicated directly to the student and the campus.

2. An alleged violation of the Student Code of Conduct that relates to student records will be forwarded in writing to the Registrar.

a. Alleged Violations are subject to a fair and impartial process
and may result in a warning or charge.

b. Investigation - alleged violations will be investigated in a prompt, thorough, and impartial manner.
   i. The investigation will gather relevant evidence, including, but not limited to, pertinent documents and statements from witnesses.
   ii. During an investigation a student may be removed from class, campus-sanctioned events, and other University functions after review and consultation with the Office of Dispute Management.

c. Notification - A student who is charged will be notified of the specific charge(s) in writing and will be given ten (10) days to submit a written response to the designated University official.
   i. Failure of a student to respond to the Charging Letter will result in suspension from the University following completion of the current course if the student is then actively attending classes and is not subject to immediate suspension.
   ii. In those instances where it is determined the conduct does not warrant a Charging Letter, a Warning Letter and/or counseling to the student will be provided. Note: A Warning Letter is not appealable.

d. Student Response
   i. A student response acknowledging guilt will be sent to the Registrar, or their designee who will determine the appropriate sanction(s).
   ii. A student response denying the charge(s) will follow the committee process outlined below.

e. Registrar’s Committee:
   i. After the Apollo Ethics and Compliance Department’s investigation is completed and the student has responded to the Charging Letter, a Registrar’s Committee will be convened to review the file, make findings of fact and recommendations to the Registrar (a designee may be appointed if the Registrar has recused himself/herself).
   ii. The Registrar’s Committee will be facilitated by a Manager or Senior Investigator from Apollo Ethics and Compliance. The facilitator must be impartial and have had no prior involvement with the investigation or student.
   iii. The Registrar’s Committee composition will be at least three impartial individuals who have no prior involvement with the student or the investigation: an Associate Registrar (or designee); a Director or Operations Manager from the Registrar’s Office (or designee), and a Director from Office of Admissions & Records or a Director of Finance.
   iv. The Registrar’s Committee will use the preponderance of the evidence standard of proof (more likely than not) to weigh the evidence and make a recommendation to the Registrar or designee about whether a violation occurred and what sanction, if any, is warranted.
   v. Students will be afforded the opportunity to address the Registrar’s Committee via teleconference to make a statement in their defense.
   vi. Students are not entitled to representation by an attorney or any other third party at any point in the process.
   vii. Tape, digital, or other electronic recording of the committee meeting is not permitted.
   viii. The Registrar’s Committee members are given a Case Packet with all relevant information for the committee meeting, including any written response received from the student.
   ix. The Registrar’s Committee members sign a Confidentiality Statement for Committee Members and, after the Committee’s deliberations, the Case Packets are required to be destroyed in order to maintain confidentiality.

f. Decision - the facilitator delivers a summary report, generally containing findings of fact and recommendations, to the Registrar (or designee), who has the ultimate authority to accept, reject, or modify the recommendations of the Registrar’s Committee and render the decision.
   i. The decision will be communicated to the student by the decision maker.
   ii. In accordance with the requirements under the HEOA, upon written request, the University of Phoenix will disclose to an alleged victim of a crime of violence, or a non-forcible sex offense, the results of any disciplinary hearing conducted by the institution against the student(s) who is/are the alleged perpetrator(s) of the crime or offense. If the alleged victim is deceased as a result of the alleged crime or offense, the University of Phoenix will provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.

g. Sanctions:
   i. If a violation is found, disciplinary sanctions will be based on the seriousness of the situation and may include, but are not limited to, documented counseling by a University staff member, loss of academic credit, suspension and/or expulsion.
   ii. A recommendation of expulsion by the decision maker will be automatically reviewed by the SDRC in the ODM and must be endorsed before the Registrar communicates that sanction to the student.

h. Appeals:
   i. Where a student is found to be in violation of the Student Code of Conduct after receiving a Charging Letter, they may appeal the decision to the SDRC in the ODM within ten (10) days of receiving the Registrar’s decision.
   ii. The SDRC is comprised of a senior manager from the University, a Regional Director of Academic Affairs, and an Associate or Assistant Dean from the accused student’s college (or their respective designee). The decision of the SDRC is final and will be communicated directly to the student and the Registrar, except in the case of a decision by the SDRC supporting a Registrar recommendation of expulsion (see g.ii. above).
   iii. If the student is sanctioned with expulsion, the review of the appeal will be conducted by the Senior Management Review Committee (SMRC) in the Office of Dispute Management. The SMRC is comprised of the Provost, the Vice President of Office of Admissions & Records, and the Dean of the accused student’s college (or their respective designees). The decision of the SMRC is final and will be communicated directly to the student and the campus.
3. An alleged violation of the Student Code of Conduct that relates to sex discrimination, sexual harassment, or sexual violence will be forwarded to the University’s Title IX Coordinator, Cammie Pratt, Associate Vice President, Office of Dispute Management, 4025 S. Riverpoint Parkway, Mailstop CF-SX01, Phoenix, AZ 85040, 602.557.3391, TitleIX@phoenix.edu.

a. Alleged Violations are subject to a fair and impartial process and may result in a warning or charge.

i. Alleged violations will be investigated in a prompt, thorough, and impartial manner. The investigation will gather relevant evidence, including, but not limited to, pertinent documents and statements from witnesses.

ii. Investigations will be conducted within 60 days barring any unusual complexity.

iii. During an investigation a student may be removed from class, campus-sanctioned events, and other University functions after review and consultation with the Office of Dispute Management.

b. Notification - A student who is charged will be notified of the specific charge(s) in writing and will be given ten (10) days to submit a written response to the designated University official.

i. Failure of a student to respond to the Charging Letter will result in suspension from the University following completion of the current course if the student is then actively attending classes and is not subject to immediate suspension.

ii. In those instances where it is determined the conduct does not warrant a Charging Letter, a Warning Letter and/or counseling to the student will be provided. Note: A Warning Letter is not appealable.

iii. The complainant(s) shall be notified when and if a Charge Letter or warning is sent to the respondent(s).

c. Student Response

i. A student response acknowledging guilt will be sent to the Title IX Coordinator (or designee), who will determine the appropriate sanction(s).

ii. A student response denying the charge(s) will follow the committee process outlined below.

d. Title IX Committee:

i. After the investigation is completed and the student has responded to the Charging Letter, opposing parties will be afforded the opportunity to present written witness statements for inclusion in the Title IX Case Packet.

ii. The Title IX Committee will be convened to review the file and make findings and recommendations to the Title IX Coordinator or Deputy Coordinator (a designee may be appointed if the Coordinator has recused himself/herself).

iii. The Title IX Committee will be facilitated by an impartial administrator from the Office of Dispute Management.

iv. The Title IX Committee composition will be at least three impartial individuals who have no prior involvement with the parties or the investigation: a director (or designee), a faculty member, and a student.

v. The Title IX Committee will use the preponderance of the evidence standard of proof (more likely than not) to weigh the evidence and make a recommendation to the Title IX Coordinator, Deputy Coordinator, or designee about whether a violation occurred and what sanction, if any, is warranted.

vi. Students and complainants will be afforded the opportunity to separately address the Title IX Committee to make a statement in their defense. This may be done via teleconference.

vii. Students are not entitled to representation by an attorney or any other third party at any point in the process. However, in accordance with the HEOA, opposing parties are entitled to have third parties present during the committee process. (Note: The third party cannot be an attorney).

viii. Tape, digital, or other electronic recording of the committee meeting is not permitted.

ix. The Title IX Committee members are given a Case Packet with all relevant information for the committee meeting, including any written response received from the student, opposing parties’ statements, all evidence discovered during the investigation, and any written witness statements the parties have submitted.

x. The Title IX Committee members sign a Confidentiality Statement for Committee Members and, after the Title IX Committee’s deliberations, the Case Packets are required to be destroyed in order to maintain confidentiality.

e. Decision - the facilitator delivers a summary report, generally containing findings of fact and recommendations, to the Title IX Coordinator or Deputy Coordinator (or designee), who has the ultimate authority to accept, reject, or modify the recommendations of the Title IX Committee and render the decision.

i. The decision will be communicated to the student and the complainant by the Title IX Coordinator or designee.

ii. In accordance with the requirements under the HEOA, upon written request, the University of Phoenix will disclose to an alleged victim of a crime of violence, or a non-forcible sex offense, the results of any disciplinary hearing conducted by the institution against the student(s) who is/are the alleged perpetrator(s) of the crime or offense. If the alleged victim is deceased as a result of the alleged crime or offense, the University of Phoenix will provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.

iii. In accordance with the requirements under the HEOA, opposing parties will be informed of the committee determination, including any sanction that is imposed.

iv. Any decision which affects a student’s enrollment or academic status shall be communicated to the Registrar’s Office for records update.

f. Sanctions:

i. If a violation is found, disciplinary sanctions will be based on the seriousness of the situation and may include, but are not limited to, documented counseling by a University staff member, loss of academic credit, suspension and/or expulsion.

ii. A recommendation of expulsion by the decision maker will be automatically reviewed by the Student Discipline Review Committee in the Office of Dispute Management and must be endorsed before the Title IX Coordinator
communicates that sanction to the student.

g. Appeals:

i. Where a student is found to be in violation of the Student Code of Conduct after receiving a Charging Letter, they may appeal the decision to the Student Discipline Review Committee (SDRC) in the Office of Dispute Management (ODM) within ten (10) days of receiving the Title IX Coordinator’s decision. Additionally, the complainant has the right to file an appeal.

ii. The SDRC is comprised of a senior manager from the University, a Regional Director of Academic Affairs, and an Associate or Assistant Dean from the accused student’s college (or their respective designee). The decision of the SDRC is final and will be communicated directly to the student, complainant, and the Registrar, except in the case of a decision by the SDRC supporting a Registrar recommendation of expulsion (see f.i.i. above).

iii. If the student is sanctioned with expulsion, the review of the appeal will be conducted by the Senior Management Review Committee (SMRC) in the Office of Dispute Management. The SMRC is comprised of the Provost, the Vice President of Office of Admissions & Records, and the Dean of the accused student’s college (or their respective designees). The decision of the SMRC is final and will be communicated directly to the student and the campus.

DISPUTE RESOLUTION

The following policy and procedures are to be used to resolve disputes by both current and former students of the University. Students are encouraged to bring the concerns outlined below to the attention of the appropriate individual/department, as set forth in Step One below. These individuals/departments will investigate and resolve such concerns accordingly. A covered dispute is subject to the conditions below and may be submitted to the formal Dispute Resolution Procedures set forth in this section if not satisfactorily resolved through the prior intervention of Step One.

In connection with the University policies identified in Step One below, this policy is intended to address disputes between a student and the University and create a framework by which students and the University can resolve all such disputes arising from a student’s interactions with the University. Although the University strongly recommends utilization of the resources identified in Step One to resolve such disputes, the only dispute resolution policy that is mandatory is the arbitration policy. Arbitration is the exclusive means by which all covered disputes asserted by either a student (whether current or former) or the University, involving justiciable disputes and/or any justiciable matter arising from the student’s interactions with the University, shall be decided and justiciable disputes and/or any justiciable matter arising from the student’s interactions with the University, shall be decided and finally resolved.

Claims and/or disputes covered by this policy fall into one of two levels:

• Level One disputes involve alleged violations of state or federal law, any statutory or common law tort claim or alleged breach of contract claim, claims of discrimination or harassment pursuant to state or federal law, or any other issue of a substantial nature. If not resolved sooner, Level One disputes may be processed through all three steps of the following Dispute Resolution Procedures.

• Unless such issue involves a violation of law, issues of a lesser nature, for example, Student Code of Conduct violations, general student grievances, academic issues and grade disputes, etc. are considered Level Two disputes and if not resolved sooner may be processed only through Step One of the following Dispute Resolution Procedures.

Step One: Internal Resolution

Students should first attempt to resolve any dispute or issue related to the following subject matters, or like subject matters, by contacting the following individuals/department, and utilizing the process set forth in the corresponding section(s) of the Academic Catalog, as referenced below. Please note that the information provided below represents only the initial contact with whom such disputes should be reported. Students should carefully consult the Academic Catalog to gain a fuller understanding of the processes associated with reporting and resolving disputes related to these subject matters.

• Allegations of sex discrimination or sexual harassment: Camie Pratt, Associate Vice President and Title IX Coordinator, Office of Dispute Management ("ODM"). See Nondiscrimination Policy and Harassment Policy in Academic Catalog.

• Allegations concerning all other forms of discrimination: Campus Director of Academic Affairs, Campus Director of Operations, Campus Director of Student Services, or their respective designee. See Nondiscrimination Policy and Harassment Policy in Academic Catalog.

• Student Code of Conduct Violations, other than sex discrimination and sexual harassment: Registrar. See Student Code of Conduct section in Academic Catalog.

• General Student Grievances (other than sex discrimination and sexual harassment): Office of Dispute Management. See General Student Grievances section in Academic Catalog.

• Allegations of sex discrimination or sexual harassment: Office of Dispute Management. See General Student Grievances section in Academic Catalog.

• Allegations of sex discrimination or sexual harassment: Registrar. See Student Code of Conduct section in Academic Catalog.

• Academic Issues: Student Appeals Center in ODM. See Student Appeals Center Section in Academic Catalog.

• Grade Disputes: Director of Academic Affairs or designee. See Grade Disputes section in Academic Catalog.

Step Two: Mediation

If a Level One dispute is not resolved as a result of Step One, then prior to proceeding to Arbitration, all parties are encouraged to participate in a formal mediation session facilitated by a professional, neutral mediator. Mediation is not mandatory but is strongly encouraged as an effective way to resolve disputes. Mediation is not a mandatory prerequisite to arbitration. The physical location for the mediation shall be mutually selected by the parties. If the parties elect mediation, the student is required to pay the sum of $100 towards the mediation costs, which amount shall be paid directly to the mediator. Any other costs associated with the mediation shall be paid by the University. Both the student and the University shall submit in writing to the other the name(s) of one or more professional, neutral mediators as a poten-
Step Three: Binding Arbitration

1. This Binding Arbitration provision ("Arbitration Agreement") is governed by the Federal Arbitration Act, 9 U.S.C. § 1 et seq. and evidences a transaction involving commerce. This Arbitration Agreement is a condition of becoming enrolled with the University. This Arbitration Agreement applies to any covered dispute arising out of or related to the student's interactions with the University. Nothing contained in this Arbitration Agreement shall be construed to prevent or excuse the student from utilizing the University's existing internal procedures for resolution of complaints, as set forth in Step One above, and this Arbitration Agreement is not intended to be a substitute for the utilization of such procedures. Except as it otherwise provides, this Arbitration Agreement is intended to apply to the resolution of disputes that otherwise would be resolved in a court of law, and therefore this Arbitration Agreement requires all such disputes to be resolved only by an arbitrator through final and binding arbitration and not by way of court or jury trial. Such disputes include without limitation claims for violation of the Arbitration Agreement, including the enforceability, revocability or validity of the Arbitration Agreement or any portion of this Arbitration Agreement. Regardless of any other terms of this Arbitration Agreement, claims may be brought before an administrative agency if applicable law permits access to such an agency notwithstanding the existence of an agreement to arbitrate. Such administrative claims include without limitation claims or charges brought before the U.S. Department of Education, State Boards of Education, or the Office of Federal Contract Compliance Programs.

2. Notwithstanding any other language in this Arbitration Agreement, a student's Enrollment Agreement, the Academic Catalog or any other University policy or practice, this Arbitration Agreement will not be unilaterally revised, modified or eliminated by the University with respect to any covered dispute after that dispute has been submitted to arbitration pursuant to this Arbitration Agreement. The University will not revise, modify or eliminate this Arbitration Agreement without giving at least thirty (30) days written notice to Students.

3. The parties shall select the neutral arbitrator and/or arbitration sponsoring organization by mutual agreement. If the parties cannot mutually agree to an arbitrator and/or arbitration sponsoring organization, the arbitration will be held and the arbitrator selected under the auspices of the American Arbitration Association ("AAA"). Except as provided in this Arbitration Agreement, the arbitration shall be held in accordance with the then current Commercial Arbitration Procedures of the AAA. The AAA rules are available at (www.adr.org). However, nothing in said rules or procedures and/or any modification thereto shall affect the enforceability and validity of the Class Action Waiver, including but not limited to, the provision that the enforceability of the Class Action Waiver may be determined only by a court and not by an arbitrator. Unless the parties jointly agree otherwise, the arbitrator shall be either an attorney who is experienced in the subject matter at issue and licensed to practice law in the state in which the arbitration is convened, or a retired judge.

4. The party bringing the claim must demand arbitration in writing and deliver the written demand by hand or first class mail to the other party within the applicable statute of limitations period. Any demand for arbitration made to the University shall be provided to the Legal Department, at 4025 S. Riverpoint Parkway, Mail Stop: CF-KX01, Phoenix, Arizona 85040. The arbitrator shall resolve all disputes regarding the timeliness or propriety of the demand for arbitration. A party may apply to a court of competent jurisdiction for temporary or preliminary injunctive relief in connection with an arbitrable controversy, but only upon the ground that the award to which that party may be entitled may be rendered ineffectual without such provisional relief.

5. In arbitration, the parties will have the right to conduct adequate civil discovery, bring dispositive motions, and present witnesses and evidence as needed to present their cases and defenses, and any disputes in this regard shall be resolved by the arbitrator.

6. CLASS ACTION WAIVER: There will be no right or authority for any dispute to be brought, heard or arbitrated as a class, collective or representative action or as a class member in any purported class, collective action or representative proceeding ("Class Action Waiver"). Notwithstanding any other clause contained in this Arbitration Agreement, the preceding sentence shall not be severable from this Agreement in any case in which the dispute to be arbitrated is brought as a class, collective or representative action. Notwithstanding any other clause contained in this Arbitration Agreement, any claim that all or part of the Class Action Waiver is unenforceable, unconscionable, void or voidable may be determined only by a court of competent jurisdiction and not by an arbitrator.

7. Each party will pay the fees for his, her or its own attorneys, subject to any remedies to which that party may later be entitled under applicable law. The University shall initially bear the administrative costs associated with the conduct of the Arbitration, subject to: (1) a one-time payment by the student toward these costs equal to the filing fee then required by the court of general jurisdiction in the state where the student in question attended the University; and (2) any subsequent award by the Arbitrator in accordance with applicable law.

8. The Federal Rules of Evidence shall apply. The arbitrator shall have jurisdiction to hear and rule on pre-hearing disputes and is authorized to hold pre-hearing conferences by telephone or in person, as the arbitrator deems necessary. The arbitrator shall have the authority to entertain a motion to dismiss and/or a motion for summary judgment by any party and shall apply the standards governing such motions under the Federal Rules of Civil Procedure and applicable federal common law.

9. Within 30 days of the close of the arbitration hearing, any party will have the right to prepare, serve on the other party and file with the arbitrator a brief. The arbitrator may award any party any remedy to which that party is entitled under applicable law, but such remedies shall be limited to those that would be available to a party in his or her individual capacity in a court of law for the claims presented to and decided by the arbitrator, and no reme-
dies that otherwise would be available to an individual in a court of law will be forfeited by virtue of this Arbitration Agreement. The arbitrator will issue a decision or award in writing, stating the essential findings of fact and conclusions of law. Except as may be permitted or required by law, as determined by the arbitrator, neither a party nor an arbitrator may disclose the existence, content, or results of any arbitration hereunder without the prior written consent of all parties. A court of competent jurisdiction shall have the authority to enter a judgment upon the award made pursuant to the arbitration.

10. It is against University policy for any student to be subject to retaliation if he or she exercises his or her right to assert claims under this Arbitration Agreement. If any student believes that he or she has been retaliated against by anyone at the University, the student should immediately report this to ODM.

11. This section entitled "Binding Arbitration" is the full and complete agreement relating to the formal resolution of student-related disputes in arbitration. Except as stated in paragraph 6, above, in the event any portion of this Arbitration Agreement is deemed unenforceable, the remainder of this Arbitration Agreement will be enforceable. If the Class Action Waiver is deemed to be unenforceable, the University and the student agree that this Arbitration Agreement is otherwise silent as to any party's ability to bring a class, collective or representative action in arbitration.
THIS PAGE WAS LEFT BLANK INTENTIONALLY.
ACADEMIC POLICIES

Academic Advisement

All students are provided the opportunity to communicate with a representative throughout the duration of their program. This advisement can provide students with a preliminary evaluation of their academic status prior to admission and the requirements they must satisfy for both admission to and the completion of their degree program. All students are notified of their official transfer of credits at the time of matriculation and may view their official transfer credit evaluation and progress toward degree completion at any time on their student website. Student services available on the student website include transfer credit summaries, official grades, program GPA, access to update demographic information, and the ability to request transcripts. Guidance on degree completion progress and options may also be discussed at any time with a representative.

Registration

Registration and payment of tuition are required prior to the start of each course. A new application fee is not required for students transferring from WIU. Students who register in a financial aid eligible program may qualify for financial aid in accordance with federal regulations.

Students must sign an Enrollment or Disclosure Agreement for the degree program which they intend to pursue. Students who change programs or who reenter after an absence of one year or more must sign a new Enrollment or Disclosure Agreement.

The student’s enrollment agreement defines the student’s curriculum and degree requirements. The executed enrollment agreement will be effective for a one year time period from the date signed. If the student has not started their program within this timeframe, the student will be required to submit new admissions paperwork (application and Enrollment/Disclosure Agreement) and update to the most recent version available at their campus.

Admission Statuses

There are twelve types of admission statuses at the University of Phoenix representing a student’s standing: Registered, Registered with International Credentials, Admission Deadline Exceeded, Conditional, Orientation Pending, Graduate Provisional, Admitted, Deferred, Non-Degree, Denied for Cause, Denied, and Re-entry. Applicants to begin their course of study under Registered, Registered with International Credentials and Provisional statuses, but are not considered unconditionally admitted until the Office of Admissions and Evaluation grants a status of Admitted and all transfer credits are reviewed for applicability to the degree program.

Official decisions regarding admission and academic statuses may be delivered to students via the student website or US Mail.

Admitted (AM) Status

The Office of Admissions and Evaluation in Office of Admissions & Records grants a student Admitted status after all documents have been received, the applicant’s admission file has been officially reviewed, and all admission requirements have been met. Students in all programs must attain admitted status and be officially evaluated by the completion of their fourth University course. This provides the University the necessary information to develop individualized program schedules for each student and provides an opportunity for an admission decision to be made early in the program. Students who are unable to obtain an official admission status by the completion of their fourth University course will be administratively withdrawn from the University and placed on Admission Deadline Exceeded (DE) admission status.

Graduate Provisional (PV) Status

Students who meet all admission requirements in graduate programs except the minimum GPA requirement of 2.50 or 3.00 (see program specific admissions requirements) may be admitted on Provisional status if their entrance GPA is between 2.0 and 2.49 or 2.50 and 2.99 depending on the program of interest. Students admitted on provisional status must achieve a GPA of 3.0 in their University of Phoenix course work at the end of their fourth completed program applicable course to be unconditionally admitted and placed on Admitted status. Failure to meet the minimum grade point average (GPA) of 3.0 by the fourth completed program applicable course will result in a DA (Disqualified for Admission) student academic status.

Registered (RR) Status

Students qualify for registered status upon completion of the application for admission and payment of the application fee (if applicable). Qualified degree-seeking students in the business, human services, management, education, counseling, computer information systems, psychology or nursing programs may attend a maximum of four courses under registered status. The University makes no guarantees of a favorable admission to students enrolled in course work under registered status.

Registered International Credentials (RI) Status

Students using copies of international academic credentials qualify for registered with international credentials status upon completion of the application for admission and payment of the application fee (if applicable). Students will not be granted unconditional admission using copies of international credentials until verification of the credentials or an original international academic record is received. Qualified degree-seeking students in the business, human services, management, education, counseling, computer information systems, psychology or nursing programs may attend a maximum of four courses under registered status. The University makes no guarantees of a favorable admission to students enrolled in course work under registered with international credentials status.

Orientation Pending (OP) Status

Undergraduate degree applicants with less than 24 credits of previous college credit/experience as listed on their admissions application will be granted Orientation Pending (OP) admitted status after all admission documents have been received, the admission file has been reviewed, and all admission requirements for the chosen program have been met. As a condition of admission, students on Orientation Pending (OP) admitted status must satisfactorily complete the University Orientation prior to gaining unconditional admission status.

Deferred Admission (DF) Status

Students will be granted deferred admission (DF) if documents or information required for admission (AM) are missing from the file. Students will remain on DF status until the required documents or information is received. Students on DF status cannot attend class and will be administratively withdrawn from the university until
the status is resolved.

Conditional (CD) Status

Students who are high school seniors who have not yet graduated may be granted conditional status upon completion of the admission application and payment of any required fees. Scheduling for students is not permitted under this status, and upon completion of high school, students may apply for admission to a specific associate degree program.

Non-Degree (ND) Status

Individuals interested in taking coursework at the University, but not interested in pursuing a degree, may register as non-degree students. Non-degree students enrolling in single courses within a degree or certificate program must meet the admissions requirements for the respective college or school. An approved list of courses is available on www.phoenix.edu under Individual Courses.

Students may also register for single courses for credit that are not currently part of a degree program or for non-credit bearing courses resulting in Continuing Education Units (CEU), Professional Development Units (PDU), or Contact Hours. Non-degree status may be granted upon completion of the application. Placement on this status for a student is determined by the campus in which the student seeks to complete non-degree coursework.

Admission Deadline Exceeded (DE) Status

Students who are unable to attain admitted status by the completion of their fourth university course will be placed on Admission Deadline Exceeded (DE) status and be administratively withdrawn from the University.

Denied for Cause (DC) Status

Applicants for admission who have violated a University policy or procedure or committed some other act which, if he or she were already a student, would subject him or her to sanctions for violating the Student Code of Conduct will be placed on denied for cause status (DC) and will be administratively withdrawn from the university.

The University will not admit applicants who show by their actions that they are unable to meet the University’s expectations for adherence to the Student Code of Conduct.

Denied Admission (DN) Status

Applicants who do not meet the minimum requirements for admission to a program will be placed on denied admission status and be administratively withdrawn from the university.

Re-entry Required (RE) Status

Students who were previously admitted (AM, PV, IV, OP) into a program but have not posted positive attendance in a course for 365 days will be placed on Re-entry Required (RE) admission status. Students placed on Re-entry Required (RE) status will be required to re-enter the most current program/version in their state or jurisdiction and submit an admission application, enrollment agreement and any other documents as required by the new program.

Admitted with Condition (AC) Status

Undergraduate degree applicants participating in a university sponsored trial period will be granted Admitted with Condition admission status after all admission documents have been received, the admission file has been reviewed, and the minimum admission requirements for the chosen program have been met. As a condition of admission, students on Admitted with Condition (AC) admission status must meet class attendance requirements in the fourth week of their first course (or after) and have all transfer credits evaluated prior to being unconditionally admitted.

The following statuses are applicable to students regardless of degree program they are pursuing. Official decisions regarding your admissions and academic statuses may be delivered to you through your student website or US Mail.

**Regular**

The student is in compliance with applicable academic standing and progression based on program requirements.

**Academic Disqualification**

Academic Disqualification results when students on academic probation fail to achieve the minimum grade point average at the conclusion of the probationary period of four (4) consecutive courses. Students who have been Academically Disqualified will be administratively withdrawn from the university and are not eligible for readmission until the lapse of six months from the date of disqualification. The date of disqualification will be the course end date of the final course completed within the AP sequence. No exceptions to the 6 month disqualification will be granted by the Student Appeals Center (SAC). Upon the conclusion of the 6 month disqualification students can petition the Student Appeal Center to return. The student may be required to retake or replace the course(s) with the lowest grade(s) earned. Students on Academic Disqualification may not transfer to another degree program or major until they have fulfilled the requirements for reentry as determined by a SAC appeal. The University will note the date a student is placed on and removed from Academic Disqualification on the permanent transcript. The existing schedule will be deleted and scheduling will be restricted for students placed on Academic Disqualification.

**Scholastic Disqualification**

Each degree program may have specific Progression Requirements. Failure to meet those Progression Requirements will result in Scholastic Disqualification. For example, Scholastic Disqualification results when a student fails to earn a specified minimum grade in a required progression course. Students who have been Scholastically Disqualified will not be allowed to continue in their degree program until they have fulfilled the requirements for progression as determined by University policy. The University will note the date a student is placed on and removed from Scholastic Disqualification on the permanent transcript. The course that placed the student on Scholastic Disqualification, or its equivalent, may be scheduled, but all other scheduling will be restricted. Students that fail their second attempt of a course for progression in their degree program will be placed on Scholastic Suspension. Students may appeal to the Student Appeal Center to petition to have the Scholastic Suspension removed. The University will note the date a student is placed on and removed from Scholastic Suspension on the permanent transcript.

For details about the Progression Requirements in your degree program, you should carefully review your Program Handbook. If you have any questions about Progression Requirements or Scholastic Disqualification, you should talk to your Academic Representative or College Campus Chair.

**NOTE:** Students who have been placed on Scholastic Disqualification may not transfer to another degree program or major until they have fulfilled the requirements for progression unless otherwise determined by the Campus Director of Academic Affairs and the Dean of the College for the new program/version.
Scholastic Suspension

Scholastic Suspension occurs when a student is suspended for a period of time or indefinitely from the University as determined by appropriate campus officials and/or Central Administration. The student will be administratively withdrawn from the university if placed on Scholastic Suspension. A student may be placed on Scholastic Suspension due to a violation of the Student Code of Conduct or for the failure to meet the minimum grade requirement after the second attempt of a course required for progression in their degree program. The University will note the permanent transcript with the date a student is placed on and removed from Scholastic Suspension. A student may appeal to the Student Appeals Center to have the Scholastic Suspension removed if it is based on a violation of the Student Code of Conduct. A student may appeal to the Central Administration Appeals Committee to have the Scholastic Suspension removed if it is based on a violation of the Student Code of Conduct. A student may appeal to the Central Administration Appeals Committee to have the Scholastic Suspension removed if it is based on a Supplemental Standards Withdrawal from the program.

Expulsion (EX)

Expulsion occurs when a student is administratively withdrawn from the university and not allowed to return under any circumstances. The date of expulsion is noted on the official transcript. Any courses on the existing student schedule are deleted and future scheduling is restricted.

Disqualified for Admission (DA) Academic Status

Disqualified for Admission or DA academic status results when students who are admitted provisionally fail to achieve the minimum grade point average (3.0 graduate) at the conclusion of the provisional period of four completed program applicable courses. Students who have been Disqualified for Admission (placed on DA academic status) will be administratively withdrawn from the university and are not eligible to re-enroll until the lapse of six months from the date of disqualification. Approval must be granted by the Student Appeals Center in order to re-enroll into any program with the University. Students placed on Disqualified for Admission (DA) status may not appeal to return before the end of the six month disqualification period. There will be no exceptions.

Students who have been Disqualified for Admission (placed on DA academic status) may not transfer to another degree program or major until they have fulfilled the six month disqualification period and have received approval through a student appeal.

Program Academic Statuses

The following statuses are applicable to the specific degree programs students are pursuing. If the student changes degree programs, statuses can be adjusted depending on new program requirements and course applicability. Official decisions regarding your admissions and academic statuses may be delivered to you via your student website or US Mail.

Regular

Student is in compliance with applicable academic standing and progression based on program requirements.

Academic Probation

Academic probation shall occur when a grade point average (GPA) falls below acceptable levels for the program. Probation lasts for a period of four consecutive program applicable courses. Concurrent enrollment is prohibited during the four course AP sequence.

Associate degree students enrolled at the Online Campus should continue traditional block scheduling format with concurrent enrollment in two courses (excluding AACR & AAPF). Financial Aid students will continue to receive funds during the probationary period. Veteran students will continue to receive DVA education benefits during the probation period. The veteran will be informed of the probation, and a notation to the student DVA file will record when the probationary period commenced.

Course Statuses

Administrative Withdrawal (AW)

Student withdrawn from course as a result of an Administrative Withdrawal from the university and/or program.

Audit (AU)

Student observes the course but does not participate in course. No grade will be issued for course in AU status.

Completed (CO)

Student has completed the course and attended enough workshops to receive a letter grade.

Dropped (DR)

The DR status is only used under rare and certain circumstances. The DR status should not be used to "drop" a student from class. Rather, the attendance "Y" / "N" should be posted and based on the attendance rules a "W" grade will potentially be granted. The DR status is also used to designate future courses that will be waived.

Enrolled (EN)

Student is enrolled in course and positive attendance has been posted for at least one workshop.

Obsolete (OB)

Student has been scheduled for a course that has been retired. Student will need to be scheduled for the course prior to the retirement date or be scheduled to take an equivalent course for degree completion.

Scheduled (SC)

Student is registered/scheduled for course but no attendance is posted.

Insufficient Attendance (TA)

Student has not attended enough course workshops to be eligible for a grade other than "W" or "WF".

Waived with Credit (WC)

University of Phoenix required course waived with credit. WI (Withdrawn for Admissions) Student not matriculated or student has been removed from admissions (AM) status after completing five courses.

Waived with Credit (WO)

Student has processed a waiver request through the Office of Admissions & Records.

Withdrawn for Prerequisite (WP)

Student withdrawn from course for failure to meet the course and/or program prerequisite requirement.

Withdrawn for Non-Payment (WT)

Student withdrawn from course due to non-payment.
Exemption (WV)
Campus has applied an exemption for the course. Course fulfills proficiency or has been waived without credit as a prerequisite.

Candidacy Statuses

Level 1 Candidate Status
Level 1 Candidate status is determined at the time of matriculation and is based on the admissions requirements for the desired program. Not all programs have a candidate status requirement.

1S: Level 1 Candidate Status Satisfied: Student has met the admissions requirements and has been admitted.
1N: Level 1 Candidate Status has not been satisfied: Student has not met the admissions requirements, has been denied admission, and therefore does not meet the requirements to achieve Level 1 Candidate Status. Students in a 1N Candidate Status should not attend class.

Level 2 Candidate Status
Level 2 Candidate status is a review of additional requirements needed for the student to progress in their program past a certain point, as designated in program policy.

2S: Level 2 Candidate Status Satisfied: Student has met the additional requirements by the specified deadline indicated in the program requirements.
2N: Level 2 Candidate Status Not Satisfied: Student has not met the additional requirements by the specified deadline indicated in the program requirements. A candidate status of 2N restricts the student from attending any future courses until the requirements are met and the student will be administratively withdrawn from the university.

Student Falsification of Information
All students applying for admission to the University have the responsibility to submit a complete and accurate application package including all academic and professional credentials required. Submitting incomplete, false, or misleading information may be grounds for dismissal at any time.

General Student Grievances
The University has a responsibility to protect the rights of students and ensure compliance with its nondiscrimination policy by providing a process for those who desire to file a grievance against the University, including any claim of discrimination. Students who are alleging discrimination or harassment, please refer to the Nondiscrimination Policy section or Harassment Policy sections of this catalog.

Other grievances must be submitted in writing to ODM, which will determine the appropriate course of action or render a decision. Grievances relating to financial aid, account balances, or collections must be reviewed by campus management before being submitted to ODM. When such a grievance is received by ODM, the student will be provided guidance to file an appeal to be reviewed by the Financial Grievance Committee (FGC) for a final decision if it cannot be resolved informally.

Student Appeals Center (SAC)
The Student Appeals Center (SAC) is an avenue by which students may request exceptions to academic policy via an appeal. Upon receipt, a SAC appeal is routed to the appropriate decision maker; these individuals have the authority to make exceptions to University policy based upon a student’s individual circumstances. Decisions are based upon maintaining the academic integrity of the institution. It is incumbent upon the student to provide their Academic Representative with an appeal letter and all relevant documents and statements of support. The Academic Representative will submit all of this information to SAC electronically.

State Boards
The University of Phoenix is regulated by a large number of state regulatory bodies across the country. The following is a list of those regulatory bodies, with contact information.

- In Alabama, the student may contact the Alabama Department of Postsecondary Education, PO Box 302130, Montgomery, AL 36130-2130; telephone (334) 242-2959.
- In Arizona, the student may contact the Arizona State Board for Private Postsecondary Education, 1400 W. Washington, Room 260, Phoenix, AZ 85007, telephone (602) 542-2399, website: www.azppsre.gov.
- In Arkansas, the student may contact the Arkansas Department of Higher Education, 114 East Capitol, Little Rock, AR 72201-3818; telephone (501) 371-2065.
- In California, a student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the bureau’s Internet Web site http://www.bppe.ca.gov/. Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at PO Box 980818, W. Sacramento, CA 95798-0818, http://www.bppe.ca.gov/, (916) 431-6959, (888) 370-7589.
- In Colorado, the student may contact the Department of Higher Education, Commission on Higher Education, 1300 Broadway Road, Second Floor, Denver, CO 80203; telephone (303) 866-2723, (303) 866-4209.
- In Connecticut, the student may contact the Connecticut Office of Higher Education, 61 Woodland Street Hartford, CT 06105-2326; telephone (860) 947-1800, (860) 947-1310.
- In Delaware, the student may contact the Delaware Department of Education, The Townsend Building, 401 Federal St., Suite 2, Dover, DE 19901-3639; telephone (302) 735-4000.
- In Florida, the student may contact the Commission for Independent Education, 325 West Gaines Street, Suite 1414, Tallahassee, Florida 32399-0400; telephone (850) 245-3200 or (888) 224-6684.
- In Georgia, the student may contact the Nonpublic Postsecondary Education Commission, 2082 East Exchange Place, Suite 220, Tucker, GA 30084; telephone (770) 414-3306.
- In Hawaii, the student may contact the Business Registration Division of the Hawaii Department of Commerce and Consumer Affairs, P.O. Box 40, Honolulu, HI 96810; telephone 808-586-2744.
- In Idaho, the student may contact the Idaho State Board of Education, P.O. Box 83720, Boise, ID 83720-0037; telephone (208) 332-1587.
- In Illinois, the student may contact the Illinois Board of Higher Education, 431 East Adams Street, Second Floor, Springfield, IL 62701-1418; telephone (217) 557-7339, website: www.ibhe.org.
• In Indiana, the student may contact the Indiana Board for Proprietary Education, Board for Proprietary Education Indiana Commission for Higher Education, 101 West Ohio Street, Suite 670, Indianapolis, IN 46204; telephone (317) 464-4400, (317) 232-1324.

• In Iowa, the student may contact the Iowa College Student Aid Commission, 603 E. 12th Street, 5th Floor, Des Moines, IA 50319; telephone (515) 725-3400.

• In Kansas, the student may contact the Board of Regents, 1000 SW Jackson, Suite 520, Topeka, KS 66612-1368; telephone (785) 296-4936, 785-296-4917.

• In Kentucky, the student may contact the Kentucky Council on Postsecondary Education, 1024 Capital Center Drive, Suite 320, Frankfort, KY 40601-8204; telephone (502) 573-1555 ext. 390.

• In Louisiana, the student may contact the State of Louisiana Board of Regents, P.O. Box 3677, Baton Rouge, LA 70821; telephone (225) 342-4253.

• In Maine, the student may contact the Maine State Board of Education (MSBE), 23 State House Station, Augusta, ME 04333-0023; telephone (207) 624-6616.

• In Maryland, the student may contact the Maryland Higher Education Commission, 6 N. Liberty St., Baltimore, MD 21201; telephone (800) 974-0203.

• In Maryland, the student may also contact the Maryland Office of the Attorney General, 200 St. Paul Place, Baltimore, MD 21201; telephone (410) 576-6300 or (888) 743-0023; TDD (410) 576-6372; www.oag.state.md.us.

• In Massachusetts, the student may contact the Massachusetts Board of Higher Education, One Ashburton Place, Suite1401, Boston, MA 02108-1696; telephone (617) 994-6937.

• In Michigan, the student may contact the Michigan Department of Education, P.O. Box 30008 (or) 608 W. Allegan, Lansing, MI 48909; telephone (517) 373-9235.

• In Minnesota, the student may contact the Minnesota Office of Higher Education, 1450 Energy Park Drive, Suite 350, St. Paul, MN 55108; telephone (651) 259-3975, (800) 637-3866.

• In Mississippi, the student may contact the Mississippi Commission on College Accreditation, 3825 Ridgewood Road, Jackson, MS 39211, Telephone (601) 432-6372.

• In Missouri, the student may contact the State of Missouri Coordinating Board for Higher Education, 205 Jefferson Street, Jefferson City, MO 65101; telephone (573) 751-2361.

• In Nebraska, the student may contact the Coordinating Commission for Postsecondary Education, P.O. Box 95005, Lincoln, NE 68509-5005; telephone (402) 471-0020, (402) 471-2847.

• In Nevada, the student may contact the Nevada Commission on Postsecondary Education, 3663 E. Sunset Road, Suite #202, Las Vegas, NV 89120; telephone (702) 486-7330.

• In New Jersey, the student may contact the New Jersey Secretary of Higher Education, 20 W. State Street, PO Box 542 Trenton, NJ 08625-0542; telephone (609) 292-4310, (609) 984-2709.

• In New Mexico, the student may contact the New Mexico Higher Education Department, 2048 Galisteo Street, Santa Fe, NM 87505-2100; telephone (505) 476-8400; website: www.hed.state.nm.us/Complaint_3.aspx.

• In North Carolina, the student may contact the Board of Governors of the University of North Carolina, General Administration, 910 Raleigh Road Chapel Hill, NC 27515-2688; telephone (919) 962-4538.

• In Ohio, the student may contact the Ohio Board of Regents, registration number 1154320, 25 South Front Street, Columbus, OH 43215; telephone (614) 466-6000.

• In Oklahoma, the student may contact the Oklahoma State Regents of Higher Education, 655 Research Parkway, Suite 200, Oklahoma City, OK 73104-3603; telephone (405) 225-9100, (405) 225-9142.

• In Oregon, the student may contact the Oregon Office of Degree Authorization, 1500 Valley River Dr. Suite 100, Eugene, OR 97401; telephone (541) 687-7478.

• In Pennsylvania, the student may contact the Pennsylvania Department of Education, 333 Market Street, Harrisburg, PA 17126-0333; telephone (717) 783-6785.

• In Puerto Rico, the student may contact the Consejo de Educacion Superior de Puerto Rico / Puerto Rico Council on Higher Education, PO Box 19900, San Juan, Puerto Rico 00910-1900; telephone (787)-724-7100 ext 2022 or ext 2016.

• In South Carolina, the student may contact the Nonpublic Postsecondary Institution Licensing, 1333 Main Street, Suite 200, Columbia, SC 29201; telephone (803) 737-2281.

• In Tennessee, the student may contact the Tennessee Higher Education Commission, Parkway Towers, Suite 1700, 404 James Robertson Pkwy, Nashville, Tennessee 37243-0830; telephone (615) 741-3605.

• In Texas, the student may contact the Texas Higher Education Coordinating Board, P.O. Box 12788, Capitol Station, Austin, TX 78711; telephone (512) 427-6520.

• In Utah, the student may contact the Utah System of Higher Education State Board of Regents, 60 South 400 West, Salt Lake City, UT 84101-1284; telephone (801) 321-7103.

• In Virginia, the student may contact the Commonwealth of Virginia Council of Higher Education, James Monroe Building, 101 North Fourteenth Street, Richmond, VA 23219; telephone (804) 225-2600.

• In Washington, the student may contact the Washington Student Achievement Council, PO Box 43430, Olympia, WA 98504-3430; telephone (360) 753-7869; 360.753.7866.

• In Washington DC, the student may contact the Government of the District of Columbia Education Licensure Commission, 810 1st Street, NE, 2nd FL, Washington, DC 20002; telephone (202) 727-2824.

• In West Virginia, the student may contact the West Virginia Higher Education Policy Commission, 1018 Kanawha Boulevard East, Suite 700, Charleston, West Virginia, 25301, telephone (304) 558-2101.

• In Wisconsin, the student may contact the Wisconsin Educational Approval Board, 201 W. Washington Ave., 3rd Floor, Madison, WI 53703; telephone (608) 266-1996, (608) 266-1996.

• In Wyoming, the student may contact the Wyoming Department of Education, Hathaway Bldg., 2Floor, 2300 Capitol Avenue, Cheyenne, WY 82002-0050; telephone (307) 777-5712. You may obtain a copy of the University’s accreditation and/or license documents, or information on how to contact any of the agencies that regulate the University, by contacting Apollo Legal Services at (602) 557-8119.

**Grading Procedures**

Formal grade reports are available through the Student and Faculty Portal upon completion of each course. Grade reports indicate the course taken, credits received, and grade assigned. A student
who has failed to make payment for tuition of a course will have the grade withheld until payment is made. Faculty members are required to post final grades within seven days of completion of the course. The University has established the following grading guidelines to be complied with by all faculty.

Note: D- is the minimum passing grade for a University course; however, some University programs and courses require higher minimum grades. Minimum grade requirements are documented within policy for those specific programs. Students who receive a grade below the minimum passing grade established for a course will not earn quality points as the grade is considered a failing grade.

A = Outstanding achievement. Student demonstrates intellectual initiative in accomplishing course goals and objectives through high level of originality and creativity.

B = Very good work. Student performance meets designated course goals and objectives by demonstrating understanding of the course materials at an acceptable level.

C = Average work. Student performance demonstrates average comprehension and satisfactory achievement of the course goals and objectives.

D = Unacceptable work. Student performance demonstrates minimum acceptable performance in accomplishing course goals and objectives.

*F = Failing. Student performance demonstrates unsatisfactory or below minimally acceptable achievement in accomplishing course goals and objectives.

Plus or minus grades indicate a high or low end grade that has been assigned.

*I = INCOMPLETE
- Student granted extension to complete assignments. A student who receives an incomplete is given up to five (5) weeks, at the discretion of the faculty, from the scheduled course completion date to complete the course requirements and receive a grade. The student’s final grade will be reduced by one full letter grade by the faculty member, regardless of the circumstances under which the Incomplete was granted. Students who do not complete any additional course requirements prior to the new deadline will be awarded the grade earned for the entire course, as though an incomplete grade had not been requested. Faculty members are required to produce completed Incomplete Grade Contracts as needed to enforce the new course completion deadline date.

- Incomplete grades shall be granted for active duty military personnel, regardless of component and including reserve and National Guard personnel who are deployed in operational war zones or in adjacent geographic areas in support of operational war zones. An “operational war zone” is, for purposes of this policy, defined as an area of operations where military personnel are engaged in active conflict or in post-conflict activities. If the student would like an opportunity to complete the course while deployed, an incomplete ‘I’ grade can be issued instead of a “W” grade. The ‘I’ grade may be issued with an initial extension of six (6) weeks beyond the traditional five (5) week extension. The practice of requiring final grades to be lowered by one full letter grade as a result of the incomplete ‘I’ grade shall be waived for deployed students.

*IP = IN PROGRESS
An IP grade may be awarded in the following instances:
- IP grade can only be awarded in qualified courses by the instructor and are allowed additional time to complete requirements.
- IP grade will default to a QC or F, depending on the course, if a letter grade is not posted by the instructor by the end of the IP timeframe.
- Faculty are not required to subtract one letter grade for IP grade awards.
- An IP grade is not calculated into the GPA.

*IX = IN PROGRESS EXTENSION
An IX grade may be awarded in the following instances:
- This grade is only awarded to eligible students who require reasonable accommodations under American Disabilities Act (ADA).
- A new IX course completion date must be determined by the Disability Services Advisor.
- Students who require reasonable accommodations will not be penalized one letter grade after completing the course to comply with an academic adjustment granted by the University in accordance with the ADA.
- IX grade will default to an F when the course exceeds its expiration date and no grade has been submitted.
- An IX grade is not calculated into the GPA.

*QC = No grade awarded.
A QC is awarded in the following instances:
- This grade may be used for zero credit courses once the attendance requirement has been satisfied.
• A QC grade may automatically post for certain Doctoral and Counseling courses when the IP period expires and no formal grade has been submitted.
• A QC grade is not calculated into the GPA
• This grade allows students to repeat a course (doctoral dissertations, etc.) without penalizing their GPA.

AU = AUDIT
• Students may register for and audit selected University courses upon campus approval and payment of an audit fee.
• Students who audit a course must meet the following conditions:
  • Students must obtain the campus Director of Academic Affairs approval to enroll in the course.
  • Auditing students are passive participants in the class and are not held accountable for Study Group Task/Team work nor for assignment submission unless otherwise negotiated with the faculty member.
  • Auditing students are governed by all University policies and procedures that apply to non-auditing students.
  • Department chairs determine which courses within their department are appropriate for audit.
  • Auditing students will receive a designation of “AU” on their permanent record which will not carry any academic credit.
  • Auditing students may not change their auditing status after attending one night of the course.

*W = WITHDRAWAL
Student withdrew due to exceeding the maximum allowable absences from the course or has been administratively withdrawn by the university. A "W" grade will be issued in the following scenarios:
• The student recorded positive class attendance in at least one scheduled class and failed to meet the class attendance requirements due to exceeding the maximum allowable absences.
• The student recorded positive class attendance in at least one scheduled class and has been administratively withdrawn from the university and/or program during the course.

*WF = WITHDRAWAL/FAILING
Student withdrew from the course and the faculty member determined that the student was failing the course at the time of the withdrawal. The student attended at least one (1) night of a course and reaches the maximum allowable number of absences. Quality points are 0.00; the grade is not calculated in the GPA.

P = PASSING
Student satisfactorily completed the course.

NC = NO CREDIT
Student withdrew from the course; no grade was issued.

WC = WAIVED WITH CREDIT
University of Phoenix required course, waived with credit.

* In order for a student to move forward within a Student Financial Aid academic year and/or meet the standards for satisfactory academic progress, he or she must successfully complete the required credit hours within prescribed timelines. Courses completed with 0 credits and/or grades that are not calculated in the GPA will not qualify as successfully completed courses. Therefore, students receiving a F, W, WF, I, IP or QC as a final grade will be required to successfully complete additional courses to make up for credit deficiency(ies) within their academic year. A Student Financial Aid academic year consists of a minimum of 24 credits and 30 weeks.

Grade Reports and Transcripts
At the end of each course, the faculty member submits and posts grades for each student. Students can view their course information including grades, GPA, program information and scheduled courses online at https://ecampus.phoenix.edu. Students who require grade verification must request an Official Grade Card or may print a grade summary from the student website. University of Phoenix students may also request a grade verification letter through Office of Admissions & Records Support Center. The student’s official transcript is prepared by the Registrar’s Office. The transcript will show the courses, grades, credits, and dates of instruction for each course. Credits awarded from the Prior Learning Assessment will be recorded on the transcripts as the credits are awarded and assessment fees are paid. Only a summary of credits transferred by institution will be included on the transcript. If you need itemized information for these credits the student must contact the school where the credits were completed.

NOTE: Students may repeat courses. Only the grade and credit for the most recent repetition is used in calculating total hours earned and total cumulative grade-point averages. However, the original and repeated grades remain on the transcript bearing a symbol to show that a particular course has been repeated.

Transcripts will be released only to students who are in good financial standing with the University.

Transcript Request Forms are available at any University of Phoenix campus. Completed forms should be mailed to the Office of the Registrar, University of Phoenix, 4025 S Riverpoint Parkway CF-L201, Phoenix, AZ 85040. The Family Education Rights and Privacy Act of 1974 requires that all mail-in transcript requests be submitted in writing and be signed by the student.

Students may request official transcripts from the student website (https://ecampus.phoenix.edu) by selecting the Services menu and following the directions for requesting a transcript.

The University cannot release transcripts received from other institutions. Copies of these transcripts must be obtained from the original institution. All official transcripts submitted to University of Phoenix become the property of the University and will not be returned to the student.

All student academic records are retained, secured, and disposed of in accordance with local, state, and federal regulations. All student record information is maintained on the University computer system, paper and/or microfiche, microfilm, disc or electronic imaging system.

Grade Disputes and Grade Corrections
Students should raise concerns or questions about perceived assignment and course grading errors directly with faculty promptly after receiving feedback and grades. No one other than the faculty member teaching the course may determine assignment or course grades for a student. Students are not allowed to submit extra work to raise their grade. Students' grades represent the work and knowledge level attained within the regularly scheduled course dates.

Grades on individual assignments may be changed by the faculty at anytime while the course is in session. Students’ grades may not be changed by the faculty member after final grades have been submitted unless the student initiates the grade dispute process or the faculty member determines the original grade was improperly
calculated.

Students disputing a grade received may contact their Academic Representative, who will assist the student with initiating a grade dispute. However, the decision regarding whether to change the grade rests solely with the faculty member. A grade dispute must be initiated within six (6) weeks of the grade posting date.

**Program Changes**

Students wishing to change their program/version must enter into the most current program or version offered in their state or jurisdiction. Students must do this through consultation with appropriate campus personnel. Students changing into a new program must have documentation on file that meets all admission requirements for the new program being entered. Students who are changing programs to a new program that has employment/work experience/access to work environment requirements must submit a Program Change Addendum. Previously transferred or completed University of Phoenix coursework may not apply to the new program requirements due to differences in degree and content requirements for the new program being entered.

**Diploma Application and Degree Conferral**

Students must submit a Diploma Application in order for their degree to be conferred. Once students have completed all degree requirements, a Diploma/Certificate Application link will be posted on their student web site at https://ecampus.phoenix.edu under the Important Messages section. If for some reason the link does not appear, students may contact their Academic Representative for a paper copy of the Diploma Application. Once the Registrar’s Office receives the Diploma Application and the student has satisfied all financial obligations to the University, an official audit of the student’s record will be conducted. If all degree requirements have been met, the student will be degree conferred and a Diploma and degree posted transcript will be ordered and mailed to the student.

**Posthumous Degrees**

The University may present posthumous degrees to the executor of the estate (written authorization required) or immediate family members (notarized affidavit required) of deceased students who were actively enrolled and in good academic and financial standing in a University program at the time of their death. Immediate family members include: spouse, legally recognized domestic partner of the deceased, parents, legal guardians (court document required), children (over the age of 18), and siblings.

**Degree Posting**

Degrees are posted to students’ academic record and transcript on a monthly basis. A student’s degree will be posted on his or her academic record and transcript with the last day of the month in which all degree requirements are completed. Degree requirements are considered to be met when all credit has been posted to the academic record. The student’s individual degree completion date is recorded on the academic record and transcript, indicating that all academic requirements for the degree were fulfilled on that date. Diplomas are ordered bearing the date the degree was posted for all students who have completed degree requirements and who have paid all tuition and fees.

Students who are not eligible for graduation are notified by their Academic Representative of their degree deficiencies.

**Graduation with Honors**

Bachelor degree students who complete their degree program with a Program Grade Point Average of 3.85 or higher will graduate with Honors distinction. The Honors designation will appear on the University Diploma and permanent transcript.

**Participation in Commencement Ceremony**

Commencement ceremonies are held at each University campus. Students must also be in good academic and financial standing to be eligible for commencement participation. Associate students who have completed all but 6 credits required for their degree will be permitted to participate in the commencement ceremony. Undergraduate and Graduate students who have completed all but 9 credits required for their degree will be permitted to participate in the commencement ceremony. Doctoral students must satisfy all credit and non credit bearing degree requirements, including a completed dissertation approved by the Dean, prior to commencement eligibility. Certificate students should refer to their local campus for commencement eligibility.

All Bachelors level students who have met the University Honors requirements, and have been degree conferred, will be recognized at commencement ceremonies with the University honor cord. (Students must be degree conferred before the ceremony date.)

Per the Massachusetts Board of Higher Education, Online students are restricted from participating in commencement ceremonies held in Massachusetts.

Per the Puerto Rico Council on Higher Education, students enrolled in programs that are not approved for enrollment at the Puerto Rico campus are restricted from participating in commencement ceremonies held in Puerto Rico.

**Program Completion Deadlines**

Program completion deadlines have been established for all programs offered by the University and are applicable to all continuously enrolled students. Program completion deadlines are calculated based on the first date of positive recorded attendance in the first program applicable course and are listed below:

<table>
<thead>
<tr>
<th>Program</th>
<th>Years for Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Certificate</td>
<td>within 5 years</td>
</tr>
<tr>
<td>Associate of Arts</td>
<td>within 5 years</td>
</tr>
<tr>
<td>Associate of Arts (Credit Recognition)</td>
<td>within 2 years</td>
</tr>
<tr>
<td>Bachelors</td>
<td>within 8 years</td>
</tr>
<tr>
<td>Masters</td>
<td>within 5 years</td>
</tr>
<tr>
<td>Doctoral except for PHD/IO &amp; EdS</td>
<td>within 6 years</td>
</tr>
<tr>
<td>PHD/IO</td>
<td>within 9 years</td>
</tr>
<tr>
<td>EdS</td>
<td>within 3 years</td>
</tr>
</tbody>
</table>

**Disclaimer on Job Placement**

The purpose of the degree programs offered by the University of Phoenix is to extend the nature and range of careers available to its
students by providing a quality education that integrates theory with practical application. However, the University cannot offer guarantees of job placement, advancement, or continued employment.

Academic Quality and Outcomes Assessment - Ensuring Consistent Quality

Ensuring Consistent Quality
Over the last three decades, University of Phoenix has made significant investments in developing and maintaining systems to ensure academic quality. These systems enable the institution to measure and evaluate the University’s effectiveness in meeting its mission and purposes and to use the evidence to continuously improve students’ educational experiences and institutional processes. The comprehensive nature of the academic quality systems and the data produced, provide the University with significant and meaningful input that is used to review and improve every aspect of the institution. Data gathered from course evaluations and student learning assessment, are used in the curriculum development process, as well as in the creation of faculty development tools. Data gathered from the continuous evaluation of institutional processes and systems are used to streamline processes and to make administrative support systems more user-friendly, continuously building on the analysis of information gathered.

Academic Quality Improvement and Outcomes Assessment
Academic quality improvement is an integral part of the organizational culture at University of Phoenix. The University’s focus on academic quality improvement ensures that the institution is meeting its mission and purposes through continuous assessments based on a comprehensive array of quality control and assurance instruments. One major component of this process is the assessment of student learning.

Assessment of Student Learning
The University’s search for the best ways to assess student learning and to use the resulting evidence to guide continuous quality improvement, led to the adoptions of an academic assessment process. The process is comprised of four ongoing and iterative steps. These include:

• Prepare annual assessment plan for academic programs
• Collect and analyze student learning data
• Implement improvements based on assessment results
• Monitor effectiveness of implemented improvements

The academic assessment process provides the means for governing and monitoring the educational experience of our students, and gathering evidence of student learning. The University’s academic assessment process includes an ongoing combination of cognitive measures, such as course embedded assignments, portfolios, and exams, and affective measures that gather information from students, alumni, and employers. The instruments and measures are designed to provide reliable evidence to support continuous improvement of academic programs.

Assessment of Students Educational Experiences and Institutional Processes
Another major component of ensuring academic quality improvement is the assessment of students’ educational experiences and institutional processes. A cadre of instruments and measures are used to monitor the day-to-day educational systems involving student, faculty, curricular, and administrative services.

By performing interim program diagnoses, evaluating faculty adherence to program standards and practices, and making small-scale resource decisions, information from academic quality improvement resources is used formatively for assessing quality and compliance.

Measures and Instruments
Student End-of-Course Surveys
At the end of every course, Student End-of-Course Surveys provide an ongoing evaluation of the University’s support services, curriculum, individual class experience, and more. Students are prompted to complete these surveys electronically through eCampus. Results of student surveys are shared with the faculty member after the end of each course to help him or her become more effective. Student End-of-Program Surveys are also administered just before students graduate.

Faculty End-of-Course Surveys
Faculty End-of-Course Surveys are administered electronically at the end each course through eCampus. These surveys provide the campus and the University with the faculty member’s assessment of the curriculum. Feedback from faculty is critical to the curriculum development and revision processes.

Alumni Surveys
Alumni Surveys are administered electronically at least every two years. The purpose of Alumni Surveys is to gather information from University alumni about their perceptions of the educational and professional value of a University of Phoenix degree. Specifically, the surveys solicit information such as:

• Overall satisfaction with their University of Phoenix education
• Perceptions of how well University of Phoenix helped them obtain the knowledge, skills, and abilities most important to them and to their professional success
• Benefits of a University of Phoenix degree in attaining professional goals
• Perception of the University’s commitment to lifelong learning and community involvement

Classroom Performance Review
The University is committed to providing excellent instructors, which necessarily calls for an ongoing system of faculty evaluation. Faculty members receive periodic Classroom Performance Reviews and feedback from Student End-of-Course Surveys. Faculty members also have an opportunity to provide the University with input about course curriculum, University services, and other related topics at the end of each course. Campus staff review and follow up on all input and feedback from students and faculty. A periodic Classroom Performance Review is completed for each active faculty member at least once every two years. The review represents one method of faculty evaluation based on a class observation. Each review is conducted with a standardized form by a trained reviewer. Based on the observation, campus academic leadership and the faculty member discuss strengths and areas for improvement related to the faculty member’s facilitation skills, assessment and feedback practices, coverage of course objectives, and overall class management.

UNIVERSITY OF PHOENIX ALUMNI ASSOCIATION

Whether you are a recent graduate or a long-time University of Phoenix alumnus, the Alumni Association is an exclusive benefit of University of Phoenix. Update your profile with the association and benefit from this complimentary membership and the valuable services it offers to help transform your future.

Complete your profile today by logging on to your alumni website at alumni.phoenix.edu. Begin connecting with the association and your classmates, and start exploring the benefits available to you:

**Career Resources**
- The Alumni Association Career Workshops series offers an opportunity for alumni to receive career tips in-person at local campus location. Currently there are four workshops focusing on Informational Interviewing, Resume Building, Managing Up and Your Brand. More workshops will be coming soon. The workshops are taught by University of Phoenix faculty and alumni are invited to participate.
- Alumni Career Center - Phoenix Career Services and the Alumni Association have teamed up to provide you with a career portal that will help you make contact with recruiters looking to hire University of Phoenix graduates. The job portal is located under the Career Resources tab on the Alumni Association website at alumni.phoenix.edu. In addition to searching the job banks, alumni can take advantage of resume assistance, peruse sample cover letters and network with professional networking associations.

**Alumni Services**
- **Alumni Directory** - The Alumni Directory connects graduates of University of Phoenix in the same industries or geographical locations and builds a foundation that promotes communication and networking.
- **Mentor Program** - One person can make a huge difference in someone’s career. Be the one. Be a mentor. The program connects students and alumni in the same field of study, industry or location. You can sign up to become a mentor today on the Alumni Association website.
- **Alumni Chapters** - Currently there are 29 Alumni Chapters across the country in cities such as Sacramento, Chicago, Phoenix, Seattle, Denver, Houston, Philadelphia and Orlando. Join a local alumni chapter to connect and network with alumni in your area. To learn more, visit alumni.phoenix.edu or email alumni@phoenix.edu.
- **Benefits & Savings** - University of Phoenix has partnered with numerous businesses to offer benefits and savings to alumni. Registered members of the Alumni Association can take advantage of the many businesses that offer special rates through the University Marketplace available through the Alumni Association website.
- **Scholarships** - Throughout the year University of Phoenix offers a variety of scholarship opportunities for prospective and current students. The Center for Scholarship Excellence and Alumni Association also have scholarship specifically designed for alumni. The Alumni Association will make announcements when alumni specific scholarship opportunities are available. The CSE website, http://www.phoenix.edu/tuition_and_financial_options/scholarships/institutional-scholarships.html, is updated regularly as opportunities become available.
- **Get Connected** - When our network grows, so does yours. Start connecting and networking with fellow graduates by join the Alumni Association on Facebook, LinkedIn, and Twitter.
- **Homecoming** - The Alumni Association hosts more than 80 homecoming events across the country each fall. From sporting events, to exclusive receptions, homecoming offers something for everyone. To see albums from the Homecoming 2013 events visit the Alumni Association Facebook page.
- **Phoenix Focus** - The University of Phoenix alumni electronic magazine helps you learn about fellow alumni who are making strides in their careers, offers monthly articles on career tips and advice and reports the latest on industry trends. Admission Procedures

Application Process
Potential students applying for admission to the University’s undergraduate degree programs begin the admission process by submitting a complete and accurate application. An application which is later verified to contain incomplete, false or misleading information may be grounds for dismissal and administrative withdrawal. Once the application has been received by the University, applicants are responsible for ensuring the completion of their admission file. No applicant will be formally accepted for admission until their admission file is complete and officially evaluated. Formal written notice is provided by the central Office of Admissions & Evaluation upon formal acceptance. The University will advise students which admission file documents are required in order to begin a program of study. Students may attend their first four courses under Registered status. Students, however, must submit all admission documentation and gain unconditional admission status prior to the start of their fifth course. Students failing to submit all documentation prior to the end of the required time frame will be administratively withdrawn until formally admitted by the central Office of Admissions & Evaluation. The University cannot guarantee that a student who begins course work under Registered status will be admitted to the degree program. Undergraduate students who have served in the military service must submit their Army American Council on Education Registry Transcript System (AARTS) or Sailor/Marine American Council on Education Registry Transcript (SMART), Coast Guard Institute (CGI) or discharge papers (DD214) for review for potential transfer credits. This is a requirement if students will be applying for VA educational assistance. Applications of individuals who have not gained admission to, or enrolled in the University, will be kept on file for one year. After that time, the applicant is required to submit a new application and materials for admission review.

Transcript Requests of Other Institutions
Because institutions vary in the time they take to respond to transcript requests, all transcripts should be requested immediately upon submission of an application. University staff will process all requests for transcripts on behalf of the student. However, it remains the student’s responsibility to ensure that all transcripts are submitted to the University. Students must sign a “Transcript Request Form” for each transcript being requested from educational institutions and national testing programs.

Official Transcript Time Limits
All official transcripts must show an issuance date not more than one year prior to receipt by the University. This is to ensure that all prior course work is reflected on the transcript. Official foreign records do not have the same time limit issuance requirements, as these documents may be difficult to obtain. This exception does not apply to Canada or U.S. territories.

General Undergraduate International Admissions Information
Students applying to the University with foreign academic records or credentials may have additional requirements that must be met in order to enroll in courses or gain admission due to the differences in educational systems and document requirements. Undergraduate applicants relying on educational credentials from an institution outside of the United States may enroll in University of Phoenix courses upon the completion of their admission application and enrollment agreement provided that they meet all admission requirements for their selected program. For applicants with academic records from colleges or universities earned outside of the United States, the University will accept copies of academic records issued from international institutions to conduct a pre-evaluation to determine comparability of previous academic studies for unofficial placement and advisement purposes. Internal evaluation practices utilized by the central Office of Admissions and Evaluation follow standards and practices defined by the National Association of Foreign Student Administrators (NAFSA) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). Certain programs that lead to certification may require students to have an evaluation performed by an external evaluation agency that is approved by both the University and the state in which the student seeks certification. Limitations exist on the countries in which internal pre-evaluation, verification or evaluation services can be conducted through the Central Office of Admissions and Evaluation and campus personnel should be contacted for a list of current services. Students using foreign academic records to satisfy an admission requirement will not be eligible to attend classes prior to the University receiving a favorable evaluation from an approved credentials evaluation service or evaluation performed by the Central Office of Admissions & Evaluation. For official admission and transfer credit evaluation purposes previous academic credentials earned outside of the United States must meet the University’s verification standards prior to an official admission or transfer credit decision being rendered. Verification of previous academic credentials earned outside of the United States can be satisfied by the following methods.

1. Receipt and verification of official academic credentials issued directly to University of Phoenix by the student’s previous institution, or
2. Receipt and verification of official academic credentials held in possession of the student as the official record of academic studies conducted in the student’s specific country, or
3. Receipt and verification of official correspondence issued directly to University of Phoenix by the student’s previous institution indicating copies of academic credentials and/or level study is valid, or
4. Receipt of an official professional evaluation issued directly from a professional evaluation agency that is approved to satisfy verification requirements as indicated by the Office of Admission and Records.

All academic credentials sent to University of Phoenix will become the possession of University of Phoenix and will not be returned to students unless prior approval was granted by the Office of Admission and Records.

If documents are issued to University of Phoenix in a language other than English, the student will be required to obtain an official translation and submit it to University of Phoenix. Translations must be completed/verified by an official translation service, a foreign language department of an accredited college or university,
the country’s embassy/consulate or by the Office of Admission and Records at University of Phoenix if translation services are provided for that specific language.

Non–Native Speakers of English
An applicant who does not have appropriate English language experience in an academic environment will not be eligible to attend classes under Registered status. Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission. Specific English language proficiency policies and requirements are listed in the admission requirements section.

Admission Appeal Process
Any applicant who has been denied admission to the University has the right to appeal the decision to the Student Appeals Center. All appeals, including any evidence to be considered, must be submitted in writing to the Student Appeals Center. The written appeal may consist of a letter of explanation for academic deficiencies, lack of experience, and any other factors which might be of benefit when the Student Appeals Center conducts its review. It is incumbent upon the applicant to submit all relevant documents and statements of support attached to the appeal letter to the Student Appeals Center. The Student Appeals Center will carefully review all materials submitted, and the applicant will be notified of the outcome of the appeal by campus personnel.

Undergraduate Admission Requirements
Most undergraduate programs have additional admission requirements listed within the program specific information. All applicants are expected to meet the following admission requirements:

• Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet one of the following exceptions in order to meet the English Language Proficiency Requirement:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  -or-
  - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  -or-
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  -or-
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  -or-
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  -or-
  - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

• The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:
  - The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.
  - The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
  - The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
  - The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.

• Applicants who reside in the United States must meet one of the following requirements:
  - Be a legal resident of the United States
  - Have been granted permanent residency
  - Have a valid visa that does not prohibit educational studies
  - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  - Have been granted asylum or refugee status.

• Applicants who reside in Canada must meet one of the following requirements:
  - Be a legal resident of Canada
  - Be a landed immigrant
  - Have a valid visa that does not prohibit educational studies
  - A completed and signed undergraduate application
  - A signed Enrollment/Disclosure Agreement.
  - Completion of any state-specific required documents or forms.
  - Students enrolled in programs that are not administered under the risk free period policy*, who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.
• Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state must provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school.

Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

**Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:**

• The student was born before January 1, 1957 (applicable to MMR vaccine only).

• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)

• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.

• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.

• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.

• The student has submitted a statement that immunization is contrary to his/her religious beliefs.

• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.

• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

* Programs administered under the risk free period policy are indicated as such in the “General Information” section of the program’s policy in the catalog.

**Residency Requirements and Course Waivers for Bachelor Programs**

**Please see the program for any additional program specific residency**
requirements and course waivers. The following does not apply to nursing and education programs.

- Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits (as a part of the final 60 credits of the program) come from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
- In order to be granted a waiver for a course in the required course of study, the student must have completed a previous credit bearing activity in transfer which meets the following criteria:
  - The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or from an approved source of nontraditional transfer credit as listed in University transfer policy.
  - The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.
  - The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  - Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.
  - Providing that University residency policy is met, through an approved articulation agreement or Educational Partnership Pathway (EPP) students may be able to waive courses outside of standard course waiver policy requirements to facilitate seamless transfer for Associate degree completers.
  - Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
  - Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student’s required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy.

Residency Requirements and Course Waivers for Associate Programs

Please see the program for any additional program specific residency requirements and course waivers. The following does not apply to nursing and education programs in addition to the AACR.

- Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits (as a part of the final 30 credits of the program) come from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.
- In order to be granted a waiver for a course in the required course of study, the student must have completed a previous credit bearing activity in transfer which meets the following criteria:
  - The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or from an approved source of nontraditional transfer credit as listed in University transfer policy.
  - The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.
  - The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  - Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.
  - Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
  - Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student’s required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy.

University Orientation Workshops

Students enrolled in programs that are not administered under the risk free period policy*, who list less than 24 previous college credits as recognized by the University on the admissions application, are required to complete a University Orientation Workshop (UNIV 100 for Online or UNIV 101 for local campus). Students will be granted Orientation Pending (OP) admitted status once all admission documents have been received, the admission file has been reviewed and all admission requirements for the chosen program have been met. Upon successful completion of the Orientation and evaluation of all transfer credits, students on OP status will be updated and the admission status will be updated to Admitted (AM).

Attendance and participation in the Orientation is required. To successfully complete the Orientation and receive an Orientation Complete (OC), students must attend all three weeks and submit
all assignments by the Orientation end date.

Students who do not successfully complete the Orientation will receive an Orientation Not Complete (ON) status and will remain on Orientation Pending (OP) admission status. Students will be allowed two attempts to successfully complete the Orientation. After a second unsuccessful attempt, participants are required to sit out for a period of six months after the last posted attendance in the second attempt.

Orientation Extended (OX) status is only awarded to eligible students who require special accommodations. The OX status provides students with an additional 3-9 weeks to complete the Orientation Workshop. If a student does not fulfill the Orientation Workshop requirements at the end of the extension period, the OX status will default to Orientation Not Complete (ON) status. Students may request additional extensions. The Orientation must be successfully completed prior to enrollment in a credit-bearing degree applicable course. Students who list more than 24 previous college credits as recognized by the university on the admissions application, are not required to complete a University Orientation Workshop.

Re-entry students who were previously admitted to the University are not required to complete the Orientation upon re-entry to the University.

* Programs administered under the risk free period policy are indicated as such in the “General Information” section of the program’s policy in the catalog.

**Risk Free Period Policy**

Students enrolled in programs that are administered under the risk free period policy are not required to complete a University Orientation Workshop.

The first three weeks of the first course constitute the trial period for programs that are administered under the risk free period policy. First time attendees who have not previously been admitted as a regular student to the University who are intending to pursue such programs will participate in the trial period and will be conditionally admitted.

This trial period will apply to all repeated attempts to complete the first course in the program while students are in conditionally admitted status. Students will be eligible for unconditional admission to the University after meeting class attendance requirements in the fourth week of their first course (or after the fourth week) and after having transfer credits evaluated.

Students will not be eligible for Title IV, HEA funds until they are admitted as a regular student after the trial period has completed. Once admitted as a regular student, students become eligible for Title IV, HEA program funds back to the beginning of the payment or loan period, as applicable, including the trial period. Students who decide not to continue in the trial period may opt out with no financial obligation prior to meeting class attendance requirements for their fourth week in their first course with the University. Students who withdraw after the trial period and do not continue enrollment will not be eligible for Title IV, HEA program funds for the trial period.

Students will indicate their intent to continue with their program by meeting class attendance requirements in the fourth week of their first course (or after the fourth week) at which point the trial period will end. Students completing the trial period that meet class attendance requirements for their fourth week or after will be financially responsible for all associated course charges. Students that record positive class attendance in at least one class that do not meet the class attendance requirements for the course due to exceeding maximum allowable absences will receive a “W” grade for the course which will be documented on the University of Phoenix transcript.

* Programs administered under the risk free period policy are indicated as such in the “General Information” section of the program’s policy in the catalog.

**First-Year Sequence**

The following First-Year Sequence is applicable to students starting on or after February 1, 2010. Students who begin courses prior to February 1, 2010 will not be required to complete the First-Year Sequence.

All students entering undergraduate degree programs (other than LVN/BSN, LPN/BSN, BSN, BSLS, and BS/ED/E) who have fewer than 24 previous college credits as recognized by the university on the admissions application are required to complete the following First-Year Sequence:

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Note:** Non-Degree students may not enroll in any of the University of Phoenix or Associates First-Year Sequence courses.

**Course Descriptions for First-Year Sequence**

**GEN 195** .................................................................................. 3 credits

**Foundations of University Studies**

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

**SCI 163** .................................................................................. 3 credits

**Elements of Health and Wellness**

This course reinforces the concept that learning effectively and living well involves both the mind and body. It presents the fundamentals of wellness and preventive health including strategic planning to attain and maintain personal optimal health. In addition, physical and mental diseases are discussed along with the dangers of environmental pollution, stress, addiction, and other
negative factors that can affect personal health.

FP 120 ..................................................................................3 credits

Essentials of Personal Finance

This course provides an overview of the elements necessary for effective personal financial planning and the opportunity to apply the techniques and strategies essential to this understanding. Primary areas of study include creating and managing a personal budget, understanding and paying taxes, working with financial institutions, wise use of credit cards and consumer loans, financing automobiles and homes, and the use of insurance for protecting one’s family and property.

COM 170 ..................................................................................3 credits

Elements of University Composition and Communication I

This course addresses the key elements necessary for effective academic writing in college. The course begins with focus on pre-writing strategies and builds to drafting and revising essays. In addition, the course includes skill development at the sentence and paragraph level.

COM 172 ..................................................................................3 credits

Elements of University Composition and Communication II

This course builds upon the foundations established in Com155. It addresses the various rhetorical modes necessary for effective college essays: narration, illustration, description, process analysis, classification, definition, comparison and contrast, cause and effect, and argumentation. In addition, requirements for research essays, including the use of outside sources and appropriate formatting, are considered.

PSY 211 ..................................................................................3 credits

Essentials of Psychology

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

HUM 114 ..................................................................................3 credits

Critical Thinking and Creative Problem Solving

This course focuses on developing the critical and creative thinking skills necessary to analyze and solve problems, make decisions, implement strategies, and formulate well supported points of view on key academic, social, and professional issues. The principles of creative thinking are essential to critical thinking skills. Students will learn how to evaluate their ideas and how to communicate their points of view persuasively.

HUM 186 ..................................................................................3 credits

Media and American Culture

The course provides an introduction to the most prominent forms of media that influence and impact social, business, political, and popular culture in contemporary America. It explores the unique aspects of each medium as well as interactions across various media that combine to create rich environments for information sharing, entertainment, business, and social interaction in the U.S. and around the world.

First-Year Sequence - Online Associate Programs

The following First-Year Sequence is applicable to students starting on or after February 1, 2010. Students who begin courses prior to February 1, 2010 will not be required to complete the First-Year Sequence.

All students entering undergraduate degree programs (other than AAEE) who have less than 24 previous college credits as recognized by the university on the admissions application are required to complete the following First-Year Sequence:

Courses requiring prerequisites are identified by a ~ symbol following the course number.

It explores the unique aspects of each medium as well as interactions across various media that combine to create rich environments for information sharing, entertainment, business, and social interaction in the U.S. and around the world.

Academic Progression
Students entering the University bachelor degree programs (other than AAEE, LVN/BSN, LPN/BSN, BSN, BSLS, and BSLED/E) with fewer than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence. To enroll in the required course of study students must have a minimum of 24 credits. Students who have 24 credits may take select courses in the business foundation. Students must have 60 credits to enroll in the major. As an alternative, enrollment into major course work also extends to students who have completed 45 credits, of which 21 credits were earned at the University.

Math and English Prerequisites
In line with the mission of the University’s General Education program to ensure that students have reached baseline levels in basic skills before entering into the professional programs, students must satisfy prerequisites in the areas of math and English. Math and English prerequisites may be satisfied in one of the following ways:

• Successful completion of University of Phoenix math and English courses
• Transfer credit may be used by students who have achieved a C- or better in a comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill math and English prerequisites must be eligible to receive general education credit.
• Achieve a passing score on the College Mathematics CLEP exam and/or a passing score on the College Composition CLEP exam.
• Students in the state of Florida who have passed the CLAST or FTCE-GK exam will have satisfied math and English prerequisites.

All students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English prerequisites. All undergraduate students must fulfill the Spanish prerequisite prior to enrolling in any course that requires Spanish as a prerequisite. The Spanish prerequisite may be fulfilled in one of the following ways:

• Successful completion of COMM P215 with a passing grade.
• Achieve a passing score on the Spanish CLEP, AP, Berlitz, or DLPT exam.
• Transfer credit may be used by students who have achieved a “C-“ or better in a comparable course at a regionally or approved nationally accredited institution.

Waivers
The University defines a waiver as the substitution of a required course at the University with a course of the same level listed on an official transcript from another institution. Students may find specific course waiver information after the applicable required course of study. Students requesting course waivers must make formal written requests to the central Office of Admissions & Evaluation, utilizing the Request for Course Waiver Form citing the courses they request to be waived, the courses to be transferred into the required course of study, and the university where the courses were completed. An official catalog/course description must accompany the request. The official transcript from the institution where the course was completed must also be submitted, unless it has previously been submitted to the University as part of the application process.

Degree Requirements
Students must complete the minimum number of upper and/or lower division credits that make up the required course of study. Completion of the Comprehensive General Education Program,
including a minimum number of credits distributed among Liberal Arts and Interdisciplinary components is also required. Degree requirements may vary by program and may be found after each required course of study.

**Degree Completion Options**

Bachelor degree seeking students who have successfully completed the required course of study and need additional academic work in order to fulfill the minimum number of credits required for graduation may choose the following options:

- Complete additional upper or lower division elective courses offered by the University of Phoenix;
- Complete approved CLEP, Excelsior, or DANTES examinations;
- Participate in the Prior Learning Assessment process as described in this catalog; or
- Complete approved courses at other regionally or nationally accredited associate degree granting candidates for accreditation college or university.

Students who need additional academic credits to graduate should contact an Academic representative to ensure that there is no duplication or regression of previously completed course work.

**General Education**

In its commitment to help working adults achieve their professional and personal goals, the University of Phoenix endorses the role of general education in ensuring student success in the classroom, the workplace, and the community. The general education curriculum, which is developed through the College of Arts and Sciences, provides instruction that focuses on skills in communication, critical thinking, and computation, and fosters a philosophical orientation that enables students to function as productive members of society. The University’s general education program embraces four goals:

- To refine students’ abilities to apply problem-solving skills in many settings and contexts.
- To promote students’ active awareness of their relationships to the natural, social, and cultural environments.
- To develop students’ appreciation for and commitment to lifelong learning.
- To prepare students with competencies needed to fully benefit from and successfully complete their professional programs of study.

Undergraduate general education requirements emphasize the mastery of competencies within the respective frameworks of mathematics and physical sciences, life sciences, technology, communication arts, social sciences, and humanities. Students are required to demonstrate proficiency in written and oral communications, in the handling and use of quantitative information, and the application of analytic and synthetic-creative thinking skills. This background provides students with the perspectives needed for meaningful self-examination of personal and social values, as well as enhanced ability to understand and cope with social, technological, and cultural change.

If elective curriculum is being taken to satisfy graduation requirements, the courses being taken cannot duplicate credits earned in the required course of study, credits earned at other institutions, credits earned through national testing programs, or credits awarded through Prior Learning Assessment.

**Liberal Arts Components**

The liberal arts component of the General Education Program is comprised of traditional liberal arts categories. The number of credits required in each category varies by program and may be found after each program. The purpose of this component is to ensure that students are exposed to a breadth of traditional liberal arts essential to a baccalaureate experience, and is distributed as follows:

- **Communication Arts**, credit requirements vary by program
  - Course work in the Communication Arts primarily focuses on the development and application of writing, speaking, group process, and interpersonal communication skills.

- **English/Language Arts**, credit requirements vary by program
  - Course work in the English/Language Arts primarily focuses on the development and application of writing, speaking, group process, and interpersonal communication skills.

- **Mathematics**, credit requirements vary by program
  - Course work in the mathematics area develops quantitative and analytical skills in the fields of mathematics and advanced logic. The area does not include courses in which mathematics is merely an applied component (such as finance and accounting), nor does it include mathematics foundation courses below the level of college algebra.

- **Social Sciences**, credit requirements vary by program
  - Course work in the social science promotes understanding of human behavior as well as the structure and dynamics of social systems. Emphasis is on the discovery of patterns in social processes and institutions, both past and present. Courses in anthropology, sociology, ethnic and gender studies, geography, political science, psychology, history, and certain communications courses focusing on mass media and society typically satisfy these requirements.

In accord with the General Education requirements, Nevada students must take six units of social science credits. However, three of those units may be HIS 311 Nevada and the U.S. Constitutions which is required for Nevada students.

- **Social Studies**, credit requirements vary by program
  - Course work in the social studies promotes understanding of human behavior as well as the structure and dynamics of social systems. Emphasis is on the discovery of patterns in social processes and institutions, both past and present. Courses in anthropology, sociology, ethnic and gender studies, geography, political science, psychology, history, and certain communications courses focusing on mass media and society typically satisfy these requirements.

- **Spanish**, credit requirements vary by program
  - Course work in Spanish primarily focuses on the development and application of writing, speaking, group process, and interpersonal communication skills in Spanish. This is a requirement of the University of Phoenix.

- **Humanities**, credit requirements vary by program
  - Course work in the humanities focuses on the development of ideas and values, appreciation of cultural and artistic achievements, and the evaluation of human experience. Courses in general humanities, philosophy, literature, fine arts, music, theater, and religious studies normally satisfy requirements in this area. Certain courses in political science and intellectual history emphasizing the development of cultural thought processes may also satisfy humanities requirements.

- **Fine Arts**, credit requirements vary by program
  - Course work in the fine arts focuses on the development of ideas and values, appreciation of cultural and artistic achievements, and the evaluation of human experience. Courses in general humani-
ties, philosophy, literature, fine arts, music, theater, and religious studies normally satisfy requirements in this area. Certain courses in political science and intellectual history emphasizing the development of cultural thought processes may also satisfy humanities requirements.

**Science/Technology**, credit requirements vary by program

Course work in the sciences provides students with an understanding of nature and the physical world, along with knowledge of the methods scientists use to study the world around them. Courses in astronomy, biology, chemistry, physics, anatomy and physiology, geology, and environmental science typically satisfy requirements in this area. All students must complete a minimum of three credits in the physical/biological sciences as part of the six credit Science/Technology requirement. Certain courses in geography or aerospace studies which emphasize the earth’s physical characteristics, weather, and climate are included in the science category, along with highly specialized course work in the social sciences such as physical anthropology, archaeological field methods, and psychology courses which focus on human physiological processes.

Technology refers to the application of scientific knowledge in making and using tools to enhance materials culture. Course work in the area of technology which satisfies general education requirements includes engineering, materials science, electronics courses that emphasize theory and design, and computer science courses that focus on programming languages and hardware/software engineering. Courses which focus primarily on the social and environmental conflicts which arise over the uses of technology usually satisfy requirements in the social sciences and humanities.

**Additional Liberal Arts**, credit requirements vary by program

Students will pursue more depth in the liberal arts by selecting two different courses in any of the liberal arts categories listed above.

**Interdisciplinary Component**

**Interdisciplinary**, credit requirements vary by program

To fulfill this requirement, students may select additional general education courses, or they may select from any University requirements other than those in their major field. The intent of this requirement is to further increase students’ exposure to the liberal arts and to facilitate their exposure to field of study beyond the necessarily narrow scope of their professional interest. Students are encouraged to explore diverse content areas to add depth to their academic and professional knowledge base.

**Professional Development Component**

**Professional Development**, 3 credits

GEN 300, Skills for Professional Development, is required as the first course for all undergraduate students. It is part of the required course of study. This course focuses on the knowledge and skills necessary for a returning adult student to be successful. It also introduces students to the theories of adult learning that underlie their professional programs. **Note:** This requirement can also be filled with GEN 101 for ICS students. ICS students will be required to complete other upper division elective or business credits in the BSB program to satisfy degree requirements. The upper division credit must be business-related for Bachelor of Science in Business students.

**Integrating Component**

**Integrating**, 3 credits

GEN 480, This is the capstone course for business, health and human services, and information technology undergraduate students. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

BUS 475, The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery. In addition to the 54 credits in this prescribed General Education program, each major course of study at the University of Phoenix’s includes courses that integrate general education principles. The University of Phoenix’s educational philosophy is based on the integration of theory and practice. Within that philosophical framework, a number of the courses required for the professional programs have a strong general education component.

**Prior Learning Assessment**

Prior Learning Assessment is a process that may save students time and money in completing a degree program. The Prior Learning Assessment process determines if learning received outside of the traditional university classroom is comparable to academic curriculum and eligible for college credit. Learning that is eligible for assessment includes: Professional Training, Licenses, course work at non-transferable institutions, and Experiential Learning Essays. Prior Learning Assessment applies only to Associate or Undergraduate degree programs. Credit awards by assessment have limitations that may apply depending on the student’s program of choice or type of material being assessed.

Corporate articulation provides an opportunity for students to be assessed for undergraduate semester credits (limitations exist based on state statutes for non-traditional credit limitations or based on student's program of choice) for professional training obtained through their employer(s). Corporate training is assessed for academic equivalency to college level classroom learning. The recognition of corporate training is a concept based on accepted principles of adult learning and serves to validate the professional competence and learning experience achieved by students outside of a traditional college classroom. Credit awards are applied towards associate or bachelor degree program areas.

**Prior Learning Credit**

Prior Learning credits may be earned as a result of professional training (workshops, seminars, licenses, business and professional courses, and other institutionally-sponsored course work). The University may award up to 30 undergraduate semester credits for verified college-level learning gained through experience, and submitted in the form of experiential course writing referred to as Experiential Learning Essay. Some states may have restrictive state regulations. Students should check with their Academic Advisor.

Notwithstanding the above, Georgia students may earn a maximum of 25% of the total credit requirements for the degree for life experience and credit granted by examination. Notwithstanding the above, Arkansas students may earn a maximum of 30 credit hours in a certificate or degree program for documented learning or work experiences. Notwithstanding the above, Oregon residents may not earn more than 25 percent of an undergraduate degree program (30 credits).
toward Bachelor programs and 15 credits toward Associate programs) for any combination of experiential learning, national testing, credit by exam, and professional coursework and training. Notwithstanding the above, Washington residents may not earn more than 25 percent of an undergraduate degree program (30 credits toward Bachelor programs and 15 credits toward Associate programs) for any combination of experiential learning, national testing, credit by exam, and professional coursework and training.

**Faculty Assessment Evaluations**
Portfolio evaluations are performed in accordance with the policies of the University, individual state regulatory requirements, the standards of the Council for Adult and Experiential Learning, and the Council for Higher Education Association.

The University maintains a centralized Prior Learning Assessment team within Office of Admissions & Records which directs evaluations and controls for the assessment of prior learning for credit.

**Prior Learning Assessment Submission and Posting & Fees**
Charges arising out of services and the posting of credit awarded for prior learning are separate and apart from tuition and curriculum fees.

When materials are complete, they are sent to Prior Learning Assessment in Phoenix and a non-refundable application fee is required and collected. The evaluation and posting fees apply to credit awarded through Prior Learning Assessment: Student portfolios are subject to fees related to evaluation and assessment of all portfolio inclusions. The fees may vary depending upon number of items reviewed. Fee structure and information may be viewed at: http://www.phoenix.edu/admissions/prior_learning_assessment_center/prior_learning_assessment_center.aspx.

**Transcription of Prior Learning Assessment Credits**
Credits awarded are posted to student transcripts by Prior Learning Assessment. Since these credits are a permanent part of a student’s academic record, fees are non-refundable.

**Privacy of Portfolio**
The University considers all Prior Experiential Learning course writing and Professional Training Portfolios to be confidential. For this reason, access to portfolio submissions is limited to members of the University’s assessment and administrative staff, faculty evaluators, and members of accreditation evaluating teams. However, students may sign a release form which allows the University to use portions of the portfolio material in professional training workshops for counselors and faculty members, and as classroom examples.

**Standardized Credit Recommendations**
Credits awarded through the assessment process are applicable to University of Phoenix degrees, and may be transferable subject to the receiving institution’s discretion. Credit awards are applied to Associate or Bachelor elective or general education areas within degree programs. Student degree program admission is required (all other transfer credit applied in the program) prior to portfolio submission.

**Estimated Program Length**
To determine the number of months it takes to complete the program as designed, add all the credit hours in a given program, divide the result by 24 credit hours and then multiply the result by the number of months in the academic year for the degree (Associates = 9 months in an academic year, Bachelors = 10 months in an academic year, Masters/Doctoral = 12 months in an academic year, Undergraduate Certificate = 10 months in an academic year and Graduate Certificate = 12 months in an academic year). Example: Associate program is 60 credits. Divide 60 credit hours by 24 credit hours (60/24 = 2.5). Then multiply the result by the number of months in the academic year for the degree (2.5 x 9 months = 22.5 months).
COLLEGES OF HUMANITIES AND SCIENCES

The study of Humanities and Sciences illuminates the world in which we live. Through the Humanities we have a greater understanding of the human experience on its highest cognitive, spiritual, and social levels. Students in the Humanities learn to think critically, effectively express themselves, understand the complexities of diverse cultural identities, appreciate the power of words, images and ideas, and interpret the human experience. Studying the sciences gives students insight into the fundamental processes of nature and provides the basic knowledge needed to understand modern scientific accomplishments. Students also develop independent and critical thinking for problem solving that forms the basis of lifelong learning. The College of Humanities and Sciences offers a variety of courses in Biology, Communication, English, Environmental and Natural Sciences, History, Languages, Literature, Mathematics, Philosophy, Politics, Religion, and the Arts.

Associate of Arts Degree Through Credit Recognition

The following Associate of Arts Degree Through Credit Recognition (AACR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University of Phoenix acknowledges that many service members have already achieved an education equivalent to an associate degree through college course work, military training and experience, and national testing programs. The University of Phoenix Associate of Arts Degree through Credit Recognition allows service members to fulfill their degree requirements by recognizing approved college level learning to award an Associate of Arts degree no matter where service members are located throughout the world.

The Associate of Arts degree includes the option of a professional focus. The University does not certify students in their professional focus but acknowledges their qualifications by recognizing their American Council on Education (ACE) certified training received through the Armed Forces. Students need a minimum of 15 semester hours in a related field to qualify for one of the professional focuses listed below. The focus will be printed on the student’s official University of Phoenix transcript.

- Aerospace Physiology Technology
- Allied Health Management
- Allied Health Sciences
- Aviation Technology
- Biomedical Technology
- Business Administration
- Cardiopulmonary Technology
- Computer Science Technology
- Criminal Justice
- Dental Laboratory Technology
- Electronics Technology
- Health Care Technology
- Histologic Technology
- Marine Engineering
- Marine Environmental Science
- Medical Laboratory Technology
- Nuclear Medicine Technology
- Nuclear Technology
- Occupational/Environment Health
- Operating Room Technology
- Pharmacy Technology
- Physical Therapy
- Radiologic Technology
- Respiratory Therapy
- Technical Management
- Technical Studies
- Technology Instruction
- Urological Laboratory Technology

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

General Information for the AACR

- Any student planning to complete both an associate of arts degree and a baccalaureate degree must complete all 60 required credits of the associate’s degree and meet admission requirements for their chosen degree requirements before enrolling in any University bachelor-degree programs or courses.

Additional Admission Requirements for the AACR

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants for admission must be active duty military, retired military, veterans, spouses of active duty military personnel, full or part-time Reservists, National Guard and Coast Guard members, and Department of Defense employees.

Degree Requirements for the AACR

- A minimum grade point average (GPA) of 2.0.
- Students must complete the AACR degree within 2 years of their matriculation date.

General Education Requirements for the AACR

Completion of a minimum of 60 credits that include the following distribution:

Communication Arts, 6 credits
The 21 Elective credit requirement will be fulfilled through selected.

If declared.

specialty training, technical schools, MOS’s, Navy ratings, NEC’s, and

transfer credits, including ACE recognized credit earned from military

law enforcement training.

The 21 Elective credit requirement will be fulfilled through selected

transfer credits, including ACE recognized credit earned from military

specialty training, technical schools, MOS’s, Navy ratings, NEC’s, and

transfer credits, including ACE recognized credit earned from military

law enforcement training.

EML 299, EML 299.1, and COMM 299 course satisfies Communication

law enforcement training.

EML 299, EML 299.1, and COMM 299 must be completed with a grade of “C” or better

in order to receive credit and general education credit. Students earning

less than a “C” grade must repeat the course with a “C” or better to

graduate from the AA program and receive GE’s.

Students who lack .67 or fewer general education credits may use

interdisciplinary or elective credits to waive the balance. Students

must use interdisciplinary or elective credits to waive the general

education balance in order to complete the minimum general edu-

cation credits required for their program.

For a description of the preceding general education areas, see the

Undergraduate Programs section within this catalog.

Residency Requirements and Course Waivers for the AACR

Students must meet established University residency requirement

definitions. The University requires that the majority of coursework, 3 credits in the Required Course of Study, must be

completed at University of Phoenix.

Students may transfer a maximum of 57 credits, which may be

earned by combining the areas below, but credit cannot exceed the

maximum in each area:

30 credit limit on experiential learning

30 credit limit on national testing (including CLEP, Excelsior,

Berlitz, NLN, AP, DANTES, and DLPT)

30 credit limit on professional training credit

Professional Focus for the AACR

• The Associates of Arts Degree through Credit Recognition offers

the option of a Professional Focus. The University does not

certify students in their Professional Focus, but acknowledges

their qualifications by recognizing their Regionally or Approved

Nationally Accredited transferable coursework, ACE certified

training received through the United States Armed Forces, or

law enforcement training. University of Phoenix coursework

may also be recognized to fulfill professional focus credits.

• A minimum of 15 credits are required for each Professional

Focus chosen.

• The student may request a dual focus on their application.

• The student may amend their Professional Focus by submitting

a signed request to the Military Department prior to graduation.

Academic Progression Requirements for the AACR

All students entering undergraduate degree programs who list less

than 24 previous college credits as recognized by the university on

the admissions application are required to enroll in the First-Year

Sequence:

• First-Year Sequence students must satisfy all seven (7) courses

from the First-Year Sequence prior to enrolling in any other

General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year

Sequence.

• All FYS requirements must be satisfied prior to enrolling in any

other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course

requirements may be satisfied by any of the following means:

• University of Phoenix coursework,

• Regionally or nationally accredited coursework (C- or higher

grade),

• University of Phoenix Prior Learning Assessment,

• National Testing Programs, and

• ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be

comparable in content to the university course it is

replacing, must be at least a 2.67 credit course, and must be

an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in

the First-Year Sequence.

• Students who list 24 or more previous college credits, as

recognized by the university on the admissions application,

must take GEN 200 Foundations for General Education and

Professional Success as the first course with University of

Phoenix and are not required to enroll in the First-Year

Sequence.

• Students who list 24 or more previous college credits, as

recognized by the University on the admissions application, and

who do not enroll in the First-Year Sequence, may not enroll in

any course from the First Year Sequence to satisfy programmatic

prerequisites, general education or elective requirements. (e.g.,

taking COM 172 instead of COMM 215)

• Students who previously completed GEN 101, GEN 200, or GEN

300 and choose to transition to the First-Year Sequence are not

required to take GEN 195.

• Students may not complete any of the First-Year Sequence

courses via Directed Study.

Many courses in the Required Course of Study build on or rein-

force each other. To ensure that students have the requisite skills

for specific coursework certain program areas must be satisfied

before students can progress to others.

• All undergraduate students must satisfy math and English

prerequisites prior to enrolling in any course that requires math

or English as a prerequisite.

The Associate of Arts through Credit Recognition Degree

Completion Deadline

The application is valid for two years. During this time students

can update their records by submitting additional documentation.

If a student has not completed the required credits during this time

frame, the University will close the file. Further activity will

require a new application and fees.

Issuance of Diplomas

Students will receive a diploma and an official University of Phoe-

nix transcript when they have satisfied all the degree requirements.

Diplomas require approximately two weeks to process.

For more information call (800) 800-7006.

Course Descriptions for the AACR

COMM 299.................................................................3 credits
**Written Communication for AACR**
This course assists students in analyzing their experiences and communicating the experiences effectively. Further, the course focuses on core academic skills necessary for writing effective college-level essays and covers writing strategies, paragraph use and structure, and sentence construction. This course also covers the application of peer-review, collaborative, and error analysis strategies for developing more effective communication.

**COMM 215** ................................................................. 3 credits

**Essentials of College Writing**
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

**GEN 200** ................................................................. 3 credits

**Foundations for General Education and Professional Success**
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**GEN 101** ................................................................. 3 credits

**Skills for Lifelong Learning**
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

**GEN 300** ................................................................. 3 credits

**Skills for Professional Development**
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

**Associate of Arts - Professional Focus**

The following Associate of Arts - Professional Focus (AA/PF) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University of Phoenix Associate of Arts in Professional Focus acknowledges college level coursework, military training, and national testing to partially fulfill the requirements of the degree. The Associate of Arts degree includes a professional focus recognized by the American Council on Education (ACE) as equivalent college content, to fulfill a 15 credit professional focus in the degree.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

**Additional Admission Requirements for the AA/PF**
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, (includes Online students and any cross-border locations) must provide the university with an official a copy of High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants for admission must be active duty military, retired military, veterans, spouses of active duty military personnel, full or part-time Reservists, National Guard members, Coast Guard members, or Department of Defense employees.

**Degree and General Education Requirements for the AA/PF**
Completion of a minimum of 60 credits that include the following distribution:

- Communication Arts, 6 credits
  - (A Track must include COMM 215, equivalent or higher)
  - (B Track must include COMM 170 and COMM 172)
- Mathematics, 6 credits
  - Must include MTH 209, equivalent or higher
- Science/Technology, 6 credits
  - (B Track must include SCI 163)
- Humanities, 6 credits
  - Must include at least three (3) credits in the physical or biological sciences
  - (B Track must include HUM 114)
- Social Science, 6 credits
  - (B Track must include PSY 211)
- Liberal Arts, 9 credits
  - (A Track must include GEN 200)
  - (B Track must include GEN 195)
- Elective, 6 credits
  - (B Track must include FP 120)
- Professional Focus/Interdisciplinary, 15 credits
  - The 15 credit Professional Focus requirement will be fulfilled through selected transfer credits, including ACE recognized credit earned from military specialty training, technical schools, MOS’s, Navy ratings, NEC’s, and law enforcement training.
  - A minimum grade point average (GPA) of 2.0.
  - Students must complete the AA/PF degree within 5 years.
• Professional Focus is reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the AA/PF
• All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
• First-Year Sequence students must satisfy all seven (?) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Professional Focus for the AA/PF
• The AA/PF program offers a Professional Focus. The University does not certify students in their Professional Focus but acknowledges their qualifications by recognizing their regionally or approved nationally accredited transferable coursework, ACE certified training received through the United States Armed Forces or law enforcement training. University of Phoenix coursework may also be recognized to fulfill professional focus credits.
• The student may request a dual focus on their enrollment agreement. Each professional focus must be adequately demonstrated.
• A minimum of 15 credits are required for each Professional Focus chosen.
• The student may amend their Professional Focus by submitting a signed request to the Military Division prior to graduation.

Residency Requirements and Course Waivers for the AA/PF
The following course may not be waived: GEN 200.

Course Descriptions for the AA/PF
COMM 215 .............................................................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 200 .............................................................................................. 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 101 .............................................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 .............................................................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.
MTH 209 .............................................................................................. 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

Associate of Arts/Concentration in General Studies**

The following Associate of Arts/Concentration in General Studies (AAGS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts degree with a concentration in General Studies provides a solid foundation in liberal arts and sciences based on a survey of mathematics, physical and life sciences, humanities, social science and technology. Students will apply effective communication skills, as directed, for informal, formal, and quantitative tasks and will be conversant with the values and terminology of a variety of academic disciplines. They will be able to access information resources, evaluate them for credibility and relevance, and use the sources to present a wide range of alternatives. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aags.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.

General Education Requirements for the AAGS

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)

Interdisciplinary Requirement 27 credits

(B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Additional Admission Requirements for AAGS

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the AAGS

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum program grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Associate of Arts

Academic Progression Requirements for the AAGS

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAGS

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAGS

COM 150 .................................................................3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .................................................................3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 .................................................................3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ........................................................................3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in General Studies**
(Maryland-Online)

The following Associate of Arts/Emphasis in General Studies (AAGS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state.

Please contact your enrollment advisor for more information.

The Associate of Arts degree with an emphasis in General Studies provides a solid foundation in liberal arts and sciences based on a survey of mathematics, physical and life sciences, humanities, social science and technology. Students will apply effective communication skills, as directed, for informal, formal, and quantitative tasks and will be conversant with the values and terminology of a variety of academic disciplines. **Note:** Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.

**General Education Requirements for the AAGS for Arkansas Students**

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Must include a minimum of 6 credits in lab science.

The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Must include: HIS 135

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Additional Residency Requirements and Course Waivers for the AAGS

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAGS

COM 150 ................................................................. 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

MAT 219 ................................................................................... 3 credits
Introduction to Life Science with Lab
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 ................................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

103
the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 ...................................................................................3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135 ...................................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

ETH 125 ...................................................................................3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ...................................................................................3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most relevant and credible sources. The text emphasizes the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ...................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Course Descriptions for the AACOM**

XCOM 100 ................................................................. 3 credits

**Introduction to Communication**

This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organizational, intercultural, and rhetoric.

XCOM 200 ................................................................. 3 credits

**Foundations of Interpersonal Communication**

This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

XCOM 225 ................................................................. 3 credits

**Foundations of Mass Communications**

This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.

IT 235 ................................................................. 3 credits

**Image Editing and Implementation**

Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/
font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

CMC 260 .................................................................................3 credits

Communication Variety: The Spice of Life
The field of communications underlies virtually every aspect of today’s increasing global interdependence. This course addresses how customs, values, and societal systems generate expectations—often tacit—about how communication should occur, and problems—often misunderstood—about how communication is occurring. Students develop greater sensitivity to intercultural and intracultural differences to foster effective information exchange and develop mutually satisfying communication solutions.

CMC 240...................................................................................3 credits

Information Strategies: Putting 2 and 2 Together
This course addresses effective communication strategies via the gathering, analysis, evaluation, and synthesis that comprise information literacy as a standard of modern problem solving. Students recognize the need for information, formulate meaningful questions to guide their search, access what is cogent, interpret bias, and integrate material for a compelling presentation. Furthermore, they perform these tasks with a regard for social responsibility and professional ethics.

COM 150 ..................................................................................3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ..................................................................................3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ..................................................................................3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ..................................................................................3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ..................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Communications (Maryland-OnLine)

The Associate of Arts Degree with an emphasis in Communications focuses on the growth and convergence of major venues of telecommunications, the role of media in a democratic society, and standards of social responsibility within the culture of journalism. Courses include win-win communication processes, problem-solving information strategies, an extensive review of information sources, and news presentation for print, web, and broadcast delivery. Students review and assess pivotal influences on the development of mass media and speculate upon their future evolution. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aacom.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AACOM

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AACOM**

- Communication Arts Requirement 6 credits
  
  *(A Track must include: COM 150 and COM 220)*
  
  *(B Track must include: COM 155 and COM 156)*

- Mathematics Requirement 6 credits

- Science & Technology Requirement 6 credits
  
  *(A Track must include: 3 credits in the physical or biological sciences)*
  
  *(B Track must include: SCI 162)*

- Social Science Requirement 6 credits
  
  *(A Track must include: ETH 125)*
  
  *(B Track must include: PSY 201 and ETH 125)*

- Humanities Requirement 6 credits
  
  *(A Track must include: CRT 205)*
  
  *(B Track must include: HUM 111)*

- Additional Liberal Arts Requirement 3 credits
  
  *(A Track must include: GEN 105)*
  
  *(B Track must include: US 101)*

- Interdisciplinary Requirement 9 credits
  
  *(B Track must include: FP 101)*

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education totals.

Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for AACOM**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

**Academic Progression Requirements for the AACOM**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.

- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.

- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

**Additional Residency Requirements and Course Waivers for the AACOM**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**Course Descriptions for the AACOM**

XCOM 100 ................................................................. 3 credits

**Introduction to Communication**

This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organizational, intercultural, and rhetoric.

XCOM 200 ........................................................................ 3 credits

**Foundations of Interpersonal Communication**

This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

XCOM 225 ........................................................................ 3 credits

**Foundations of Mass Communications**

This course is a survey of the basic theories upon which our scien-
tific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.

IT 235 .................................................................3 credits

**Image Editing and Implementation**

Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic retouching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

CMC 260 .............................................................3 credits

**Communication Variety: The Spice of Life**

The field of communications underlies virtually every aspect of today’s increasing global interdependence. This course addresses how customs, values, and societal systems generate expectations—often tacit—about how communication should occur, and problems—often misunderstood—about how communication is occurring. Additional Admission Requirements for AACOM

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AACOM for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220
B Track must include: SCI 162
Must include a minimum of 6 credits in lab science.
The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Science & Technology Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Additional Liberal Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)

Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

MAT 219 ........................................ 3 credits
Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 ........................................ 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100 ...................................... 4 credits
Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs...
build upon the concepts in the text and offer a chance to interact
with the material and further their understanding.

CHM 109 ................................................................. 3 credits

Introductory Chemistry

This course will examine the basic principles of chemistry concep-
tually and specifically. The course will apply chemical concepts to
address relevant issues ranging from atomic structure and chemi-
cal reactions to organic and biological chemistry. The course topics
include matter and energy, chemical bonding, intermolecular
forces, chemical equilibrium, and nuclear, organic, and biological
chemistry. Students will apply these concepts using practical exam-
ple faciliated discusstions, and experiments conducted through a
virtual laboratory.

The Bachelor of Science in Communication (BS/COM) degree pro-
gram is designed to develop knowledge and skills for effective
communication in a variety of public and private work environ-
ments. The program was created specifically to build upon per-
sonal and professional communication experiences. The BS/COM
degree enhances the communication skills necessary for the de-
velopment of professional competence and values; critical thinking
and problem-solving; information utilization; and collaboration.
The curriculum focuses on the development of core communica-
tion competencies. It emphasizes theory and application in the
domains of interpersonal, small group, organizational, and mass
communication. Specific areas of focus include business communi-
diversity, intercultural communication, conflict resolution,
legal and ethical issues, media and culture, and future trends in
communication technology.

Emphasis in Marketing and Sales Communication

The emphasis of Marketing and Sales Communications focuses on
the science of humanistic interaction in marketing and sales.
Emphasis is placed on understanding the psychology of behavior,
and the impact that it has on marketing communication tools and
strategies. The ethical responsibility associated with customer mes-
sage management is also emphasized throughout the program.

Storytelling: A Multimedia Approach

The University reserves the right to modify the required course of study. Please note that within each state, emphasis availability may vary by campus location.

Additional Admission Requirements for the BS/COM
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

Degree Requirements for the BS/COM
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 42 upper division credits.
  - All students must meet the General Education areas approved by the university.
  - A minimum grade point average (GPA) of 2.0.
  - All students must complete the minimum number of credits required by their degree program.
  - All undergraduate students are required to complete the minimum general education credits required by their program version
  - Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
    Bachelor of Science in Communication

General Education Requirements for the BS/COM
A minimum of 54 of the 120 credits must be in the general educa-
tion areas approved by the University.

Communication Arts, 6 credits
Humanities, 6 credits
Mathematics, 6 credits
Social Sciences, 6 credits
Science/Technology, 6 credits
Must include at least 3 credits in the physical or biological sciences
Additional Liberal Arts, 6 credits
Interdisciplinary Component, 18 credits

Students who lack 6.7 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for BS/COM

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for BS/COM

Students in this program may waive a maximum of 27 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the required course of study may not be waived: GEN 200, GEN 300, COM 480

Course Descriptions for the BS/COM

GEN 300................................................................................... 3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

COM 100.................................................................................. 3 credits

Introduction to Communication

This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organization, intercultural, and rhetoric.

COM 200.................................................................................. 3 credits

Foundations of Interpersonal Communication

This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

COM 225.................................................................................. 3 credits

Foundations of Mass Communication

This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.

COM 310.................................................................................. 3 credits

Communications: Theories and Practice

This course explores the various theories of communication that create the foundation for study of communication in the bachelor’s degree program at the University of Phoenix. Major communication areas examined in this course include intrapersonal, interpersonal, group and teamwork, organizational, intercultural, and mass media. Each area, along with others, will be studied in greater depth in subsequent courses in the degree program.

COM 330.................................................................................. 3 credits

Small Groups and Team Communication

This course explores the dynamics of group communication and
effective team work. Both social and workplace scenarios will be examined. Analytical techniques will be included to provide effective strategies for communication in these contexts.

COM 350 ..................................................................................3 credits

Organizational Communication

This course examines various theoretical frameworks necessary for effective organizational communication. It analyzes the application of communication strategies within organizations in terms of their effectiveness. It provides the infrastructure necessary for the creation and maintenance of successful communication strategies in organizations.

COM 360 ..................................................................................3 credits

Intercultural Communication

The purpose of this course is to assist students in understanding and apply the principles of effective intercultural communication in a diverse society and in global commerce. Students will develop an understanding of why and of how cultural issues influence effective communication. This course introduces techniques for improving written, oral, and interpersonal communication skills in response to intercultural settings.

COM 400 ..................................................................................3 credits

Media and Society

The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.

COM 440 ..................................................................................3 credits

Communication Law

This course focuses on the U.S. legal environment and its specific laws, court decisions, policies, and regulations that address the freedom and responsibilities that come with the First Amendment to the U.S. Constitution. The personal, commercial, and political exercise of free speech, and its regulation, will be analyzed in this course.

COM 450 ..................................................................................3 credits

Ethics and Communication

While ethical decision-making permeates every facet of personal and professional life, this course focuses specifically upon ethical issues that are inherent in personal and public forms of communication. Special emphases are placed on ethical issues in commercial communication. Ethical decision-making models will be discussed and applied to cases involving various contemporary and controversial communication topics.

COM 470 ..................................................................................3 credits

Mediation and Conflict Resolution

Communication is the foundation upon which mediation and other forms of alternative dispute resolution are based. This course starts with an examination of the theoretical basis for ADR in light of communication theory. Then it focuses upon the effective application of theory and practice to achieve meaningful results and to avoiding conflict in the future.

COM 480 ..................................................................................3 credits

Communication Capstone Course

This is the capstone course for students pursuing the bachelor’s of science in communication. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 ..................................................................................3 credits

Essentials of College Writing

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ..................................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ..................................................................................3 credits

Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 ..................................................................................3 credits

College Algebra

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ..................................................................................3 credits

Introductory Chemistry

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ..................................................................................3 credits

Fundamentals of Physics

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter,
heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Emphasis in Marketing and Sales Communication

COM 302 ................................................................. 3 credits

Marketing Communications
This course provides students with the basic concepts and methods related to marketing communications, including communication theories and the communication mix. Emphasis is placed on the marketing mix variables of product, place, price, and promotion, as well as marketing communications tools.

PSY 322 ................................................................. 3 credits

Consumer Psychology and Research
This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

COM 339 ................................................................. 3 credits

Advertising and the Media
This course addresses the elements of advertising and the media. Topics include advertising concepts, selection of media, and the use of media and advertising as marketing communications tools. The course also emphasizes the ongoing convergence of media content and commercial messages and how it is redefining marketing communications.

COM 352 ................................................................. 3 credits

Public Relations and Message Management
This course focuses on the role of public relations in marketing communications and how it can be used to attain organizational marketing and sales objectives. Topics covered in this course include media relations, relationship-building strategies, crisis communication, ethics, and the development of public relations messages.

COM 373 ................................................................. 3 credits

Sales Communications
This course addresses the elements of sales communications. Topics include sales promotion, direct sales, personal selling, and customer relationship management as marketing communications tools.

COM 486 ................................................................. 3 credits

Marketing and Sales Message Management
This course focuses on bridging the gap between sales and marketing communications through the use of customer message management. Topics covered in this course include creating a sense of value for customers; the development of marketing communications campaigns; the integration of the sales cycle and marketing communications; the use of a “single voice” to customers across all selling touch-points; and the ethical considerations associated with customer message management.

Course Descriptions for the Emphasis in Communication and Technology

CIS 205 ................................................................. 3 credits

Management Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

COM 420 ................................................................. 3 credits

Creativity and Communication
Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of “creative” is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one’s creativity is one of the primary focuses of the course.

VCT 235 ................................................................. 3 credits

Image Editing & Implementation
Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

VCT 310 ................................................................. 3 credits

Web Design
This course focuses on the principles of good web design and the essential role of the web designer in today’s business environment. Topics covered include layout, style, artistic quality, navigation, performance, communication, community, e-commerce and marketing.

VCT 320 ................................................................. 3 credits

Electronic Publishing
This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.
Multimedia Development
This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.

Course Descriptions for the Emphasis in Journalism

SOC 262 .................................................................3 credits
Contemporary American Society
Students in this course will explore the implications of ethnicity, culture, and diversity within the context of society. Students will be introduced to racial and ethnic relations, prejudice, stereotypes, discrimination, and adaptation and conflict in diverse cultures.
SOC 333 .................................................................3 credits
Genders in Society
The objective of this course is to explore gender differences and communication. This course introduces students to gender inclusiveness and sensitivity through the examination of the roles of genders in society. Students will focus on gender communication in business, organizations, family and the media. Additionally, students will explore communication traits of men and women and the impact of miscommunication between genders.
SOC 335 .................................................................3 credits
The Peoples and Cultures of Asia
This course provides students with an overview of the cultural traditions and contemporary development of Asian countries. Course topics include the geography, history, politics, economic development, and social conditions of Asian countries.
SOC 337 .................................................................3 credits
Contemporary Latin American Society
This course introduces the cultural perspectives of Latin America. Students will explore cultural geography, ethnicity, class and culture, gender, and challenges facing Latin America.
SOC 338 .................................................................3 credits
The African American Experience
This course serves as an introduction to the African American experience. This course will explore the social construction of identity, culture and the inequalities African Americans face in popular American culture. Race, class and gender of the African American people will be explored from a historical to modern day perspective.
COM 403 .................................................................3 credits
Contemporary Communication in a Diverse Society
The objective of this course is to focus on the dynamics of human communication across cultures and genders in a multicultural society.

Course Descriptions for the Emphasis in Journalism

JRN 310 .................................................................3 credits
Introduction to Journalism
This course is the introduction to the journalism emphasis. The role of the journalist will be described from its origin to the emergence of the modern-era journalist. Key journalistic theories and principles will be discussed. Special attention will be given to influences in journalism and qualities that exemplify journalistic writing. The concepts of journalistic writing, research, technology, ethics, and personal responsibility will be introduced. Controversial issues faced by journalists will be highlighted throughout the course.

VCT 420 .................................................................3 credits
Research for Journalism
This course focuses on the research methods employed in journalistic writing and reporting. The goal of this course is to enhance the understanding of the characteristics of credible sources and accurate information. Information will be assembled and evaluated to support journalistic goals by interpreting information needs, choosing accurate and unbiased sources, and selecting relevant and reliable information. The importance of employing ethical practices to research techniques is emphasized throughout the course.

JRN 320 .................................................................3 credits
Journalistic Writing I
This course focuses on understanding journalistic writing styles. The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.

JRN 340 .................................................................3 credits
Journalistic Writing II
This course focuses on the application of the diverse journalistic writing techniques used by today's changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written media messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The role of ethics in journalism is emphasized throughout the course.

JRN 350 .................................................................3 credits
Controversial Issues in Journalism
This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter’s ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public’s need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.

JRN 360 .................................................................3 credits
Storytelling: A Multimedia Approach
This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.
Bachelor of Science in Communication

The following Bachelor of Science in Communication (BS/COM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Communication (BS/COM) degree program is designed to develop knowledge and skills for effective communication in a variety of public and private work environments. The program was created specifically to build upon personal and professional communication experiences. The BS/COM degree enhances the communication skills necessary for the development of professional competence and values; critical thinking and problem solving; information utilization; and collaboration. The curriculum focuses on the development of core communication competencies. It emphasizes theory and application in the domains of interpersonal, small group, organizational, and mass communication. Specific areas of focus include business communication, diversity, intercultural communication, conflict resolution, legal and ethical issues, media and culture, and future trends in communication technology.

BS/COM Required Course of Study

Storytelling: A Multimedia Approach

The University reserves the right to modify the required course of study. Please note that within each state, concentration availability may vary by campus location.

Additional Admission Requirements for the BS/COM

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Completion Requirements for the BS/COM

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 42 upper division credits.
  • All students must meet the General Education areas approved by the university.
  • A minimum grade point average (GPA) of 2.0.
  • All students must complete the minimum number of credits required by their degree program.
  • All undergraduate students are required to complete the minimum general education credits required by their program version
  • Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
    Bachelor of Science in Communication

General Education Requirements for the BS/COM

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Humanities, 6 credits
Mathematics, 6 credits
Social Sciences, 6 credits
Science/Technology, 6 credits

Must include at least 3 credits in the physical or biological sciences
Additional Liberal Arts, 6 credits
Interdisciplinary Component, 18 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BS/COM for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Humanities, 6 credits
Mathematics, 6 credits

Must include MTH 220.
Science/Technology, 9 credits

Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Additional Liberal Arts, 6 credits
Interdisciplinary Component, 9 credits

Students who lack .67 or fewer general education credits may use
Students who list 24 or more previous college credits, as recognized by the university on the admissions application, are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First-Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

### Additional Residency Requirements and Course Waivers for BS/COM

Students in this program may waive a maximum of 27 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the required course of study may not be waived: GEN 200, GEN 300, COM 480

#### Course Descriptions for the BS/COM

**GEN 300**

- Introduction to Communication
  - This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organization, intercultural, and rhetoric.
  - **COM 200**
  - **COM 225**

**GEN 310**

- Foundations of Interpersonal Communication
  - This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.
- **COM 225**

**GEN 320**

- Foundations of Mass Communication
  - This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.
- **COM 310**

**GEN 330**

- Communications: Theories and Practice
  - This course explores the various theories of communication that create the foundation for study of communication in the bachelor's degree program at the University of Phoenix. Major communication areas examined in this course include intrapersonal, interpersonal, group and teamwork, organizational, intercultural, and mass media. Each area, along with others, will be studied in greater depth in subsequent courses in the degree program.
- **COM 330**

**GEN 340**

- Small Groups and Team Communication
  - This course explores the dynamics of group communication and effective team work. Both social and workplace scenarios will be examined. Analytical techniques will be included to provide effective strategies for communication in these contexts.
- **COM 350**

**GEN 350**

- Organizational Communication
  - This course examines various theoretical frameworks necessary for effective organizational communication. It analyzes the application of communication strategies within organizations in terms of their effectiveness. It provides the infrastructure necessary for the creation and maintenance of successful communication strategies in
Media and Society
The development and evolution of contemporary society have become intricately intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.

COM 440 ................................................................. 3 credits

Ethics and Communication
While ethical decision-making permeates every facet of personal and professional life, this course focuses specifically upon ethical issues that are inherent in personal and public forms of communication. Special emphases are placed on ethical issues in commercial communication. Ethical decision-making models will be discussed and applied to cases involving various contemporary and controversial communication topics.

COM 450 ................................................................. 3 credits

Mediation and Conflict Resolution
Communication is the foundation upon which mediation and other forms of alternative dispute resolution are based. This course starts with an examination of the theoretical basis for ADR in light of communication theory. Then it focuses upon the effective application of theory and practice to achieve meaningful results and to avoiding conflict in the future.

COM 480 ................................................................. 3 credits

Communication Capstone Course
This is the capstone course for students pursuing the bachelor’s of science in communication. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 ................................................................. 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 .............................................................................. 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 .............................................................................. 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 .............................................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .............................................................................. 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 .............................................................................. 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 .............................................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experi-
ence since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying a historical perspective to analyze contemporary issues.

**POL 215** ................................................................. 3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Course Descriptions for the Concentration in Marketing and Sales Communication**

**COM 302** ................................................................. 3 credits

**Marketing Communications**

This course provides students with the basic concepts and methods related to marketing communications, including communication theories and the communication mix. Emphasis is placed on the marketing mix variables of product, place, price, and promotion, as well as marketing communications tools.

**PSY 322** ................................................................. 3 credits

**Consumer Psychology and Research**

This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

**COM 339** ................................................................. 3 credits

**Advertising and the Media**

This course addresses the elements of advertising and the media. Topics include advertising concepts, selection of media, and the use of media and advertising as marketing communications tools. The course also emphasizes the ongoing convergence of media content and commercial messages and how it is redefining marketing communications.

**COM 352** ................................................................. 3 credits

**Public Relations and Message Management**

This course focuses on the role of public relations in marketing communications and how it can be used to attain organizational marketing and sales objectives. Topics covered in this course include media relations, relationship-building strategies, crisis communication, ethics, and the development of public relations messages.

**COM 373** ................................................................. 3 credits

**Sales Communications**

This course addresses the elements of sales communications. Topics include sales promotion, direct sales, personal selling, and customer relationship management as marketing communications tools.

**COM 486** ................................................................. 3 credits

**Marketing and Sales Message Management**

This course focuses on bridging the gap between sales and marketing communications through the use of customer message management. Topics covered in this course include creating a sense of value for customers; the development of marketing communications campaigns; the integration of the sales cycle and marketing communications; the use of a “single voice” to customers across all selling touch-points; and the ethical considerations associated with customer message management.

**Course Descriptions for the Concentration in Communication and Technology**

**CIS 205** ................................................................. 3 credits

**Management Information Systems**

This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

**COM 420** ................................................................. 3 credits

**Creativity and Communication**

Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of “creative” is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one’s creativity is one of the primary focuses of the course.

**VCT 235** ................................................................. 3 credits

**Image Editing & Implementation**

Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

**VCT 310** ................................................................. 3 credits

**Web Design**

This course focuses on the principles of good web design and the essential role of the web designer in today’s business environment. Topics covered include layout, style, artistic quality, navigation, performance, communication, community, e-commerce and marketing.

**VCT 320** ................................................................. 3 credits

**Electronic Publishing**

This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

**VCT 420** ................................................................. 3 credits

**Multimedia Development**

This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.

**Course Descriptions for the Concentration in Culture and
Communication
SOC 262 ................................................................. 3 credits

Contemporary American Society
Students in this course will explore the implications of ethnicity, culture, and diversity within the context of society. Students will be introduced to racial and ethnic relations, prejudice, stereotypes, discrimination, and adaptation and conflict in diverse cultures.
SOC 333 ................................................................. 3 credits

Genders in Society
The objective of this course is to explore gender differences and communication. This course introduces students to gender inclusiveness and sensitivity through the examination of the roles of genders in society. Students will focus on gender communication in business, organizations, family and the media. Additionally, students will explore communication traits of men and women and the impact of miscommunication between genders.
SOC 335 ................................................................. 3 credits

The Peoples and Cultures of Asia
This course provides students with an overview of the cultural traditions and contemporary development of Asian countries. Course topics include the geography, history, politics, economic development, and social conditions of Asian countries.
SOC 337 ................................................................. 3 credits

Contemporary Latin American Society
This course introduces the cultural perspectives of Latin America. Students will explore cultural geography, ethnicity, class and culture, gender, and challenges facing Latin America.
SOC 338 ................................................................. 3 credits

The African American Experience
This course serves as an introduction to the African American experience. This course will explore the social construction of identity, culture and the inequalities African Americans face in popular American culture. Race, class and gender of the African American people will be explored from a historical to modern day perspective.
COM 403 ................................................................. 3 credits

Contemporary Communication in a Diverse Society
The objective of this course is to focus on the dynamics of human communication across cultures and genders in a multicultural society.

Course Descriptions for the Concentration in Journalism
JRN 310 ................................................................. 3 credits

Introduction to Journalism
This course is the introduction to the journalism concentration. The role of the journalist will be described from its origin to the emergence of the modern-era journalist. Key journalistic theories and principles will be discussed. Special attention will be given to influences in journalism and qualities that exemplify journalistic writing. The concepts of journalistic writing, research, technology, ethics, and personal responsibility will be introduced. Controversial issues faced by journalists will be highlighted throughout the course.
JRN 320 ................................................................. 3 credits

Research for Journalism
This course focuses on the research methods employed in journalistic writing and reporting. The goal of this course is to enhance the understanding of the characteristics of credible sources and accurate information. Information will be assembled and evaluated to support journalistic goals by interpreting information needs, choosing accurate and unbiased sources, and selecting relevant and reliable information. The importance of employing ethical practices to research techniques is emphasized throughout the course.
JRN 330 ................................................................. 3 credits

Journalistic Writing I
This course focuses on understanding journalistic writing styles. The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.
JRN 340 ................................................................. 3 credits

Journalistic Writing II
This course focuses on the application of the diverse journalistic writing techniques used by today’s changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written media messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The association between research and responsible writing will be explored, as writing strategies to craft effective messages are developed. The role of ethics in journalism is emphasized throughout the course.
JRN 350 ................................................................. 3 credits

Controversial Issues in Journalism
This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter’s ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public’s need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.
JRN 360 ................................................................. 3 credits

Storytelling: A Multimedia Approach
This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.

Bachelor of Arts in English

The following Bachelor of Arts in English (BA/ENG) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online

122
The Bachelor of Arts degree with a language requirement and primary major in English is designed to provide students with substantive academic content in a liberal arts discipline of their choice. The program prepares students for teaching opportunities in elementary and secondary education after completion of additional methodology courses required for teacher certification in all states. The degree also provides an academic foundation for students interested in pursuing further graduate education necessary for postsecondary teaching positions in liberal arts at most colleges and universities. Focused studies are designed to provide an interdisciplinary component that will increase the student’s breadth of learning. The program will provide workers in business and government, as well as education, with learning that promotes critical thinking, information utilization, collaboration, communication, and analytical skills essential to effective and efficient work productivity. The Bachelor of Arts in English introduces students to literature, rhetoric, grammar and composition as a disciplined course of study. Students will gain a multifaceted understanding of the major literary genres, authors, and forms; and proficiency in the English language through their course of study. Using English language as a context, students develop skills in research, critical thinking & analysis, and communication.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ba-eng.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

To satisfy the Focus Study requirement, students must complete 15 credits in a content area outside of their selected major. All 15 credits must be from the same content area and can be satisfied using transfer or University of Phoenix coursework. Credits completed to satisfy the Focus Study requirement may not apply within applicable General Education categories.

**Electives -24 credits**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Arts in English degree.

**Electives - 9 credits (for Arkansas students only)**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Arts in English degree.

**Additional Admission Requirements BA/ENG**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the BA/ENG

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 45 upper division credits.
  • All students must meet the General Education areas approved by the university.
  • Completion of a fifteen (15) credit Focus Study.
  • A minimum grade point average (GPA) of 2.0.
  • Students may choose additional elective credits to fulfill upper division and elective requirements.
  • All Students must complete the minimum number of credits required by their degree program.
  • All undergraduate students are required to complete the minimum general education credits required by their program version.
  • Focus Study is reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
    Bachelor of Arts in English

Academic Progression Requirements for the BA/ENG

• All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence.
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the University course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success or the program specific entry point course as outlined in the individual program policy as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
• Students must declare Focus study within 84 applied credits of program.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

General Education Requirements for the BA/ENG

Communication Arts Requirement(s) 6 credits
   Must include COMM 215 or equivalent
Mathematics Requirement(s) 6 credits
   Must include MTH 209 or equivalent
Social Science Requirement(s) 6 credits
Science & Technology Requirement(s) 6 credits
   Must include 3 credits in the physical or biological sciences
Humanities Requirement(s) 6 credits
Foreign Language Requirement(s) 6 credits
NTP Foreign Language Exams may be used to satisfy foreign language requirements.
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for Arkansas students for the BA/ENG

Communication Arts Requirement(s) 6 credits
   Must include COMM 215 or equivalent
Mathematics Requirement(s) 6 credits
   Must include MTH 220
Social Science Requirement(s) 9 credits
   Must include HIS 145 or POL 215
The Social Science requirement may also be satisfied with any transfer coursework with US History or Government content.
Science & Technology Requirement(s) 9 credits
Survey of Literacy Masterpieces

This course provides students with a survey of literary masterpieces across the ages. Students will gain insight into writing and culture from the content of this course. Topics include Shakespeare, Homer, Dante, Milton, Machiavelli, and Joyce, among other literary authors.

ENG 155 ................................................................. 3 credits

Mythology in Literature and Life

This course provides an overview of mythology and its relationship to ancient and current cultures. The course covers the purposes and types of myths, the development of myths and mythological characters; the common elements of mythological structures, the predominant characteristics of deities and heroes in myth and the obstacles and dangers that these archetypes encounter, how myths affect our personal and social lives, in which these ancient archetypes are found in contemporary society, and how attitudes and behaviors are influenced by mythological literature.

ENG 157 ................................................................. 3 credits

Multicultural Literature

This course provides students with an introduction to multicultural literature. Emphasis is placed on increasing students’ awareness and understanding of the values, beliefs, and experiences of people from different cultures through literature.

ENG 215 ................................................................. 3 credits

Effective Academic Writing

This course develops the skills used in writing applied research papers for a university-level audience. Students will write position papers, persuasive essays, and case study analyses. Students will study classical rhetorical concepts of authority and the Toulmin method of argument analysis, and will evaluate outside sources for objectivity and utility in constructing persuasive arguments. Students practice giving peer feedback, revising essays in response to feedback, and writing collaboratively as learning teams. The course reviews the elements of grammar, mechanics, style, and proper documentation of outside sources.

COMM 251 ........................................................... 3 credits

Rhetoric and Critical Thinking

This course in critical thinking and informal logic helps students develop the ability to reason clearly and critically. It includes an introduction to the disciplines of inductive and deductive logic, fallacious reasoning, and problem-solving techniques. Emphasis is placed on the identification and management of the perception process, use of assumptions, emotional influences, and language in various forms of communication.

HUM 150 ................................................................. 3 credits

Introduction to Film Studies

Introduction to Film Studies is designed to provide students with an overview of film history and the skills necessary to analyze and critique film. Students will learn about film theory, aesthetics, genres, and basic film criticism. Students will analyze film through an examination of cinematography, editing, acting, scenes, and sound to allow students to view films critically, to develop a systematic and convincing interpretation of the films they watch, and to acquire the ability to analyze films in well-constructed and persuasive essays.

ENG 135 ................................................................. 3 credits

Essentials of Contemporary Communication

This course covers the skills necessary for effective written and oral communication in the work environment and in modern society. The course reviews basic communication theories and discusses the fundamentals of interpersonal, written, and oral communication skills.

ENG 221 ................................................................. 3 credits

Technical Writing Fundamentals

This course covers the fundamentals and best practices of using written communication in business and in the information technologies. Topics include strategies, techniques, and nuances for producing emails, memos, reports, proposals, project specifications, and user manuals, as well as other technical documents.

ENG 290 ................................................................. 3 credits

Children's Literature in a Pluralistic Society

This course examines the social function of children’s literature from oral origins to modern anthologies, exploring messages in
nursery rhymes, fairy tales, and early childhood fiction. Students will apply major schools of literary criticism and relate children’s literature to theoretical models of childhood. The course surveys readings across cultures (European/American, Native American, African American, Asian, and Hispanic/Latino), genres (nursery rhymes, fairy tales, picture books, early childhood fiction), and time periods. It addresses portrayals of ethnicity, race, class, and gender in children’s literature, and considers the implications of film adaptations of select children’s stories in a pluralistic society.

ENG 301 ...................................................................................3 credits

American Ethnic Literature
This course will survey the literature of the major ethnic groups in the United States (Hispanics/Latinos, Native Americans, African-Americans, and Asian-Americans) as a means to explore ethnic diversity and minority voices. Focusing on contemporary relevance, a wide range of representative literary works and authors will be discussed in their historical, socio-political, and cultural contexts with special consideration of characteristic literary themes and techniques.

ENG 306 ...................................................................................3 credits

Poetry and Society
This course surveys English language poetry from medieval times through the present. Students analyze and interpret poetry, paying particular attention to the role of the poet and poetry in society. Poems are addressed in historical context, by theme, and for their relevance to contemporary culture.

ENG 340 ...................................................................................3 credits

Creative Writing
This course introduces students to creative writing in various genres. The purpose of this course is to develop and expand students’ imaginative writing processes and to develop and expand their understanding of the human experience through creative writing. This would include identifying elements of writing and developing skills and techniques for creative writing in poetry, fiction, and nonfiction writings.

ENG 380 ...................................................................................3 credits

Applied Linguistics
This course introduces students to the nature of language and the way in which language is acquired and used in society. It also addresses grammatical aspects of language such as syntax, semantics, and pragmatics and changes in language over time. Stages of language acquisition and bilingual development will also be discussed.

ENG 491 ...................................................................................3 credits

American Literature to 1860
This course will survey major authors, ideologies, and historical contexts of American literature from colonial times until the Civil War era. A diverse range of works, genres, movements, and cultural narratives will be explored. Accounts of early explorers, Puritan sermons, American Indian mythology, slave narratives, political, and social writings, and poetry will be read and discussed.

ENG 493 ...................................................................................3 credits

English Literature to 1800
This course will survey major authors, ideologies, and historical contexts of English literature from medieval times until the 18th century. A diverse range of works, genres, movements, and cultural narratives will be explored.

COMM 301 ...................................................................................1 credit

Proposal Writing
This one-credit course is a comprehensive guide that includes step-by-step approaches to devising a strategy that will lead to the development of a winning proposal. The course focuses on the process of proposal “development” rather than proposal “writing.” The format and content of the course are both technical and conceptual in nature.

ENG 302 ...................................................................................3 credits

20th Century American Literature
This course will survey major authors, ideologies, and historical contexts of American literature from the 20th century. A diverse range of works, genres, movements, and cultural narratives will be used to explore how cultural pluralism helped shape and reflect the evolution of American thought.

ENG 304 ...................................................................................3 credits

Shakespeare
This course will focus on Shakespearean literature and will cover significant plays still popular today. Students will discuss the influence of Shakespeare on literary, social, and theatrical concepts.

ENG 308 ...................................................................................3 credits

American Autobiography
Through the use of memoirs, autobiographies, journals, or diaries, students in this course will be introduced to individuals who impacted the social, political, and cultural environments of America.

ENG 492 ...................................................................................3 credits

American Literature since 1860
This course will survey the writings of 150 years in the historical and cultural context of America. The influence of vast social, political, and philosophical changes in America on literary works will be explored. The major literary movements, works, and authors of four distinct time periods will be read and discussed: the late 19th century, the early 20th century, the late 20th century, and the 21st century.

ENG 494 ...................................................................................3 credits

English Literature since 1800
This course will survey major authors, ideologies, and historical contexts of English literature from the 19th century to the present. A diverse range of works, genres, movements, and cultural narratives will be explored. Humanities

ENG 495 ...................................................................................3 credits

Advanced Creative Writing
This course explores advanced literary elements of creative writing, focusing on elements of form and craft. Students will write poems, fictional short stories, and one act plays. In the process, students will re-examine all elements of the writing process to deepen their understanding of each stage of the process including prewriting, drafting, editing, and revising, and students will reflect upon differences among genres. A writers’ workshop will be an integral component of this course.

ENG 496 ...................................................................................3 credits

African American Literature
This course will provide students with an in-depth analysis of African American Literature. Topics include the underlying historical experiences and cultural values of African Americans and how
these experiences and values were expressed through various types of literature. Throughout the course, students will be encouraged to examine African American Literature in a socio-historical context.

COMM 215 ................................................................................... 3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

MTH 209 ................................................................................... 3 credits

**College Mathematics II**

This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

GEN 101 ................................................................................... 3 credits

**Skills for Lifelong Learning**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................................... 3 credits

**Skills for Professional Development**

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 220 ................................................................................... 3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................................... 3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................................... 3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................................... 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................................... 3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Bachelor of Science in History**

The following Bachelor of Science in History (BS/HIS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in History degree is designed to provide students with substantive academic content in the discipline of their choice. After completion of additional methodology courses required for teacher certification in all states, the program may assist in the preparation of students for teaching opportunities in elementary and secondary education. The degree may also provide an academic foundation for students interested in pursuing further graduate education necessary for postsecondary teaching positions in history at most colleges and universities. Focused studies are designed to provide an interdisciplinary component that will increase the student's breadth of learning. The program will provide workers in business and government, as well as education, with learning that promotes critical thinking, information utilization, collaboration, communication, and analytical skills essential to effective and efficient work productivity. The Bachelor of Science in History introduces students to the study of the past and develops their understanding of historical events as they relate to the present. Students develop skills in research, critical thinking & analysis, and communication through a rigorous study of the past
as a contextual framework. Students will gain a proficient understanding of the major historical facts and themes in Western Civilization, United States, and Global History through their course of study.

*Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Focus Study -15 credits**

To satisfy the Focus Study requirement, students must complete 15 credits in a content area outside of their selected major. All 15 credits must be from the same content area and can be satisfied using transfer or University of Phoenix coursework. Credits completed to satisfy the Focus Study requirement may not apply within applicable General Education categories.

**Electives -27 credits**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in History degree.

**Electives -12 credits (for Arkansas students only)**

Select elective courses to meet the minimum upper division and general education requirements for the Bachelor of Science in History degree.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements BS/HIS**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**Degree Requirements for the BS/HIS**

The degree requirements for this program are the following:

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - All students must meet the General Education areas approved by the university.
- Completion of a fifteen (15) credit Focus Study.
- A minimum program grade point average (GPA) of 2.0.
- Students may choose additional elective credits in order to fulfill the required upper division and elective requirements.
- All students must complete the minimum number of credits required by their degree program.
• Focus Study is reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Bachelor of Science in History

**General Education Requirements for the BS/HIS**

Communication Arts Requirement(s) 6 credits
*Must include COMM 215, equivalent or higher*

Mathematics Requirement(s) 9 credits
*Must include MTH 209 and MTH 233, equivalent or higher*

Social Science Requirement(s) 6 credits

Science & Technology Requirement(s) 6 credits
*Must include at least three credits in the physical or biological sciences*

Humanities Requirement(s) 6 credits

All undergraduate students are required to complete the minimum general education credits required by their program version.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**General Education Requirements for Arkansas students for the BS/HIS**

Communication Arts Requirement(s) 6 credits
*Must include COMM 215, equivalent or higher*

Mathematics Requirement(s) 9 credits
*Must include MTH 233, equivalent or higher*
*Must include MTH 220.*

Social Science Requirement(s) 9 credits
*Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.*

Science & Technology Requirement(s) 9 credits
*Must include at least three credits in the physical or biological sciences*
*Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.*

Humanities Requirement(s) 9 credits

Additional Liberal Arts 6 credits

All undergraduate students are required to complete the minimum general education credits required by their program version.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Academic Progression Requirements for the BS/HIS**

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

Students must declare a Focus Study within 84 applied credits of program.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Residency Requirements and Course Waivers for the BS/HIS**

Students in this program may waive a maximum of fifteen (15) credits from their major and focus on the basis of regionally or approved nationally accredited transferable coursework. Prior learning credit and military credits may not be used to waive coursework.

The following courses in the required course of study may not be waived: GEN 200

**Course Descriptions for the BS/HIS**

GEN 200................................................................. 3 credits

*Foundations for General Education and Professional Success*

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
HIS 110 .....................................................................................3 credits
U.S. History to 1865
This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.
HIS 120 .....................................................................................3 credits
U.S. History 1865 to 1945
This course recounts the story of our country by looking at the experiences of the many diverse races and nationalities that, woven together, have created the United States of America. Students will learn to appreciate the contributions various peoples have made to the American culture. Emphasis will be placed on how both compromise and conflict have played major parts in American history.
HIS 145 .....................................................................................3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.
HIS 112 ......................................................................................3 credits
History of Western Civilization from Prehistory to the Middle Ages
This course provides an overview of the principal social, cultural, political, economic, and global developments that shaped Western civilization from prehistory to the Middle Ages. It presents a framework for understanding current social experience by applying historical perspectives to contemporary issues.
GEO 155 ....................................................................................3 credits
Cultural Geography
This course provides students with an introduction to the cultural factors that impact the way in which humans use the environment. Topics include settlement patterns, the modification of the landscape, and resource utilization.
HIS 276 .....................................................................................3 credits
Global Civilizations 1400-1700
This course provides an overview of the establishment of world civilizations during the European Middle Ages through the 1700s. The principle social, cultural, political, economic, and global developments that influenced multiple civilizations during this period will be explored. The framework of this course will provide a societal understanding by applying historical perspectives to contemporary issues.
REL 134.....................................................................................3 credits
World Religious Traditions II
This course provides a survey of the major historical developments, structural cosmology, symbolic interpretation, and values of the Judaic, Christian, and Islamic religious traditions.
HIS 275 .....................................................................................3 credits
Global Civilizations to 1400
This course provides an overview of the establishment of civilizations throughout the world to the 1400s. The principle social, cultural, political, economic, and global developments that influenced multiple civilizations will be explored. The framework of the course will provide a societal understanding by applying historical perspectives to contemporary issues.
HIS 114 .....................................................................................3 credits
History of Western Civilization from the French Revolution to the Present
This course provides an overview of the principle social, cultural, political, economic, and global developments that shaped Western civilization from the French Revolution to the present. It presents a framework for understanding current social experience by applying historical perspectives to contemporary issues.
HIS 205 .....................................................................................3 credits
Asian History
This course provides a historical overview of India, China, Southeast Asia, Korea, and Japan. Emphasis will be placed on the diverse political, social, intellectual, and economic histories of these countries.
HIS 206 .....................................................................................3 credits
Latin American History
This course provides an overview of the history of Latin America. Topics include politics, economic development, international relations, and cultural development.
HIS 308 .....................................................................................3 credits
European History: Early Modern Era to the Present
This course discusses the growth and development of European nations from the Early Modern Era to the present, with a focus on Europe’s social, political, and economic history.
HIS 309 .....................................................................................3 credits
American Colonial and Revolutionary History
This course discusses the development of the American colonies and the origins of the American Revolution.
HIS 335 .....................................................................................3 credits
Europe and the World Wars
This course discusses the causes and history of World War I, the interwar era, and World War II, with a particular emphasis upon social, political, and economic developments during the period.
HIS 349 .....................................................................................3 credits
The History of Modern China
This course provides students with a survey of the final century of dynastic rule and the rise to power of the Nationalist and Communist parties. Social and cultural developments, the impact of Western imperialism, and the evolution of revolutionary ideologies are highlighted throughout the course.
HIS 403 .....................................................................................3 credits
Foundations of American Foreign Policy
This course provides students with a review of U.S. diplomatic relations with Europe, Latin America, and Asia from the Declaration of Independence to the First World War.
RES 404 .....................................................................................3 credits
Historical Research Methods
This course provides students with the opportunity to learn and apply various types of research methods used in historical research. Emphasis is placed on research, writing, and critical thinking in a historical context.
HIS 301 .....................................................................................3 credits
United States Constitution
This course is a five-week introduction to the historical, political,
The History of Russia and the Soviet Union
This course examines the historical and political development of Russia and the Soviet Union including imperial Russia, the Russian Revolution, and the collapse of the Soviet Union.
HIS 458 ................................................................. 3 credits

The History of Africa
This course provides an overview of the history of Africa, including the colonial period, post-colonial developments, and contemporary issues.
HIS 341 ................................................................. 3 credits

The History of Modern Mexico
This course presents an analysis of the historical, cultural, social, economic, and political development of Mexico from 1821 to the present.
HIS 345 ................................................................. 3 credits

The History of Africa
This course examines the events and processes leading up to the colonization of Africa, and the subsequent changes in African society under colonial rule and after independence.
HIS 359 ................................................................. 3 credits

History of Human Discovery
This course seeks to provide an interdisciplinary approach to human discovery by investigating the minds, hearts, and actions of some of the significant people and events in the history of human development.
COMM 215 ............................................................ 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 ............................................................... 3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.
MTH 233 ............................................................... 3 credits

Statistics
This course surveys descriptive and inferential statistics with emphasis on practical applications of statistical analysis. The principles of collecting, analyzing, and interpreting data are covered. It examines the role of statistical analysis, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings through the applications and functions of statistical methods.
MTH 209 ............................................................... 3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.
MTH 220 ............................................................... 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
CHM 110 ............................................................... 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
PHY 101 ............................................................... 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The
topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ........................................................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ........................................................................................................3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science in Environmental Science

The following Bachelor of Science in Environmental Science (BS/EVS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

BS/EVS Required Course of Study - Environmental Science Major

Major Requirements
GEN 200 (A Track Only) .......................................................................................3 credits
Foundations for General Education and Professional Success
GEN 195 (B Track Only) .......................................................................................3 credits
Foundations of University Studies

Major Courses - Lower Division
BIO 101 ~ ........................................................................................................3 credits
Principles of Biology
BIO 280 ~ ........................................................................................................3 credits
Conservation Biology
CHM 150 ~ .......................................................................................................4 credits
General Chemistry I
CHM 151 ~ .......................................................................................................4 credits

GLG 220 ~ .......................................................................................................3 credits
Physical Geology
SCI 256 ~ .......................................................................................................3 credits
People, Science and the Environment

Electives - Lower Division
Students must choose one course from the list below:
BIO 204 ~ .......................................................................................................3 credits
Plant Physiology
BIO 240 ~ .......................................................................................................3 credits
General Biology
GEO 180 ~ .......................................................................................................3 credits
Physical Geography
GLG 240 ~ .......................................................................................................3 credits
Environmental Geology
SCI 209 ~ .......................................................................................................3 credits
Oceanography

Major Courses - Upper Division
BIO 315 ~ .......................................................................................................3 credits
Ecology and Evolution
ECO 370 ~ .......................................................................................................3 credits
Environmental Economics
ENV 320 ~ .......................................................................................................3 credits
Environmental Law
ENV 420 ~ .......................................................................................................3 credits
Environmental Toxicology
SCI 362 ~ .......................................................................................................3 credits
Environmental Risk Assessment
SCI 365 ~ .......................................................................................................3 credits
Environmental Issues and Ethics
SUS 300 ~ .......................................................................................................3 credits
Environmental Sustainability

Electives - Upper Division
Students must choose three courses from the list below:
BIO 325 ~ .......................................................................................................3 credits
• Completion of a minimum of 120 credits that include the Degree Requirements for the BS/EVS

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Additional Admission Requirements BS/EVS
All applicants are expected to meet the following admissions requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the BS/EVS
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 45 upper division credits.
  • All students must meet the General Education areas approved by the university.
  • Completion of a fifteen (15) credit Focus Study, nine (9) of which must be upper division.
  • A minimum grade point average (GPA) of 2.0.
  • Students may choose additional elective credits to fulfill upper division and elective requirements.

• Focus Study is reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Bachelor of Science in Environmental Science

General Education Requirements for the BS/EVS
A minimum of 36 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
A Track must include: COMM 215, equivalent or higher
B Track must include: COM 170 and COM 172

Mathematics Requirement(s) 9 credits
Must include MTH 220 and MTH 231, equivalent or higher
The MTH 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Social Science Requirement(s) 6 credits
B Track must include: PSY 211
Science & Technology Requirement(s) 6 credits
B Track must include: SCI 163
Must include PHY 101

Humanities Requirement(s) 6 credits
B Track must include: HUM 114

Interdisciplinary Component 3 credits
B Track must include: FP 120

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BS/EVS
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the University course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, must take GEN 200 Foundations for General Education and Professional Success or the program specific entry point course as outlined in the individual program policy as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

### Additional Residency Requirements and Course Waivers for the BS/EVS

Students in this program may waive a maximum of 15 credits from their required course of study on the basis of regionally approved nationally accredited transferable coursework.

The following courses in the Required Course of Study may not be waived: GEN 195, GEN 200

### Course Descriptions for the BS/EVS

**GEN 200** .................................................3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**GEN 195** .................................................3 credits

**Foundations of University Studies**

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

**BIO 101** .................................................3 credits

**Principles of Biology**

This course is designed to introduce biology at an entry level by examining the hierarchy that ranges from the fundamentals of cell biology to the physiology of organisms, and the interactions among those organisms in their environment. The topics in this course include cell biology, genetics, molecular biology, evolution, physiology, and ecology.

**BIO 280** ....................................................3 credits

**Conservation Biology**

This course will examine the concepts and issues related to the conservation of biodiversity. Topics will include the impact of society on plants and animals, aquatic and terrestrial ecosystems, extinction, and genetic diversity.

**CHM 150** .....................................................4 credits

**General Chemistry I**

This course provides students with an in-depth knowledge of the principles and applications of chemistry. Topics include chemical nomenclature, atomic theory, stoichiometry, periodicity, chemical bonding, thermochemistry, gas laws, and properties of solids and liquids. Students apply these concepts using practical examples, facilitated discussions, and experiments conducted through hands-on labs. This course is the first half of the general chemistry sequence, which is completed in CHM 151: General Chemistry II.

**CHM 151** .....................................................4 credits

**General Chemistry II**

This course continues the examination of principles and applications of chemistry that was begun in CHM 150: General Chemistry I. Topics include properties of solutions, acids and bases, kinetics, equilibrium, thermodynamics, oxidation-reduction, ionic and redox equations, and electrochemistry. Students apply these concepts using practical examples, facilitated discussions, and experiments conducted through hands-on labs.

**ENV 100** .....................................................3 credits

**Principles of Environmental Science**

This course will provide students with the scientific principles, concepts, and methodologies that are required to identify and analyze risks associated with environmental problems, and examine alternative solutions for resolving or preventing these problems.

**GLG 220** .....................................................3 credits

**Physical Geology**

This course will introduce the key concepts of geology by examining the Earth and the processes that take place within it. Topics will include historical geology, rocks and minerals, plate tectonics, igneous activity, mass wasting, weathering and erosion systems.

**SCI 256** .....................................................3 credits

**People, Science and the Environment**

This course explores the interrelationship of human beings and their living and nonliving environments. The role of science in helping to define and address problems that stem from these interactions is examined. This introductory environmental science course examines ecosystems and the science behind how they work. It reviews the historical development of the environmental movement, interactions between humans and natural ecosystems, and more specifically, the role of a growing population and associated pressures on natural resources. This course further examines how economics, natural systems, and conservation are interrelated. The many forms of pollution, as well as types of energy resources are addressed. This course challenges students to consider the impact of lifestyle choices on environmental sustainability.

**BIO 204** .....................................................3 credits
Plant Physiology
This course will examine the key concepts of plant physiology. Topics will include the structure and function of plants, growth and development, water transport, mineral nutrition, photosynthesis, and plant metabolism.
BIO 240 ................................................................. 3 credits

General Biology
This course will provide an in-depth look into the principles of biology. Topics will include molecular biology, cellular structure and function, genetics, evolution, organisms, and populations.
GEO 180 ................................................................. 3 credits

Physical Geography
This course introduces students to the principles of physical geography. Students examine the processes of Earth’s physical environment as well as the human-environment interaction. Topics include plate tectonics, the rock cycle, landscape building, water resources, the relationship between the Earth and Sun, the elements of weather and climate, vegetation and soils, types and uses of maps, and human interaction with the environment.
GLG 240 ................................................................. 3 credits

Environmental Geology
This course introduces students to the study of environmental geology. Students examine the connection between geological processes and resource management. Topics include Earth’s internal structure and processes, hydrological and geological resources, geomorphology, natural hazards, waste management, policies and regulations, and the impact of human activity on natural resources.
SCI 209 ................................................................. 3 credits

Oceanography
This course examines the linkages between the evolution of earth and water masses. Students will focus on the physical, chemical, biological and geological aspects of the ocean processes.
BIO 315 ................................................................. 3 credits

Ecology and Evolution
This course provides the fundamental principles of ecology. Students will focus on populations and communities, adaptation, and other factors that affect organisms.
ECO 370 ................................................................. 3 credits

Environmental Economics
This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.
ENV 320 ................................................................. 3 credits

Environmental Law
This course explores the administrative regulations and policies that are requisite to the management of health and safety in the workplace. Federal, state, and local policies will be examined.
ENV 410 ................................................................. 3 credits

Environmental Toxicology
The purpose of this course is to provide the fundamental knowledge of the effects of environmental chemicals on living systems, and the toxic responses of the human and plant systems. Students will discuss risk, ethics, and social responsibility with regard to environmental toxicology.
ENV 420 ................................................................. 3 credits

Environmental Risk Assessment
This course provides an overview of the basic concepts of human and ecological risk assessment. Significant case studies will be used to illustrate the assessment process.
SCI 362 ................................................................. 3 credits

Environmental Issues and Ethics
Applying scientific, philosophical, economic & ethical principles, this course will consider current and future environmental issues from an interdisciplinary philosophical perspective. Students will analyze the cumulative impact of human activities on global ecosystems, as well as responsibilities to the natural world, in terms of the complex interrelationships humans have with their environment.
SUS 300 ................................................................. 3 credits

Environmental Sustainability
Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.
BIO 325 ................................................................. 3 credits

Economic Botany
This course focuses on the economic uses of plants from international, historical, environmental and contemporary perspectives. Economic uses include plant textiles, spices, herbs, perfumes, oils, waxes, beer, coffee, tea, wine, chocolate, marijuana, psychedelics, fuel algae, and fungi.
ENV 310 ................................................................. 3 credits

Environmental Management
This course examines environmental problems from a local, national, and international perspective. Federal legislation will be reviewed on air pollution and water quality. Students will be introduced to control techniques for treating air and water, and the emerging environmental issues such as global climate changes, bioterrorism, organic pollutants, and industrial ecology.
ENV 315 ................................................................. 3 credits

Global Change
This course will examine the impact of human activity on the environment. Students will examine a variety of environmental issues influenced by human activity, including the development and impact of global climate change on Earth.
ENV 330 ................................................................. 3 credits

Global Environmental Health
This course explores the impact of industrialization and development on the global environment. Students will be provided an overview of scientific and policy issues of global environmental health.
ENV 340 ................................................................. 3 credits

Energy and the Environment
This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.
ENV 350 ................................................................. 3 credits
Water and Wastewater Treatment Technology
This course will introduce students to water and wastewater treatment technology. Topics will include drinking-water treatment and distribution, wastewater collection and treatment, and water reuse.

ENV 400 ...................................................................................3 credits

Watershed Hydrology
This course will introduce students to the water cycle and freshwater management. Topics will include examination of bodies of water, geology and soil properties, the water cycle, groundwater flow, pollution effects, and government involvement.

ENV 430 ...................................................................................3 credits

Environmental Technology
This course presents students with the current and emerging technologies that are available for the management of the environment. Environmental factors will be examined for the proper selection and application of these technologies.

ENV 431 ...................................................................................3 credits

Public Policy Analysis
This course will examine the fundamentals of public policy analysis to the environment. Students will explore the management of public policy issues related to land use and urbanization, ecosystems preservation, global analysis, and policy making.

COMM 215 ...............................................................................3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

MTH 220 ...................................................................................3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

MTH 231 ...................................................................................3 credits

Statistics for the Life Sciences
This course will examine the concepts of statistics leading to the application of these concepts to the life sciences. Topics will include populations and samples, random sampling, probabilities, distributions, and confidence intervals.

PHY 101 ...................................................................................3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

Associate Programs Pathways Program
Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:
• Pathways Non-degree Application
• High School Junior or Senior Standing
• Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
• Parent or guardian consent
• $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.
The College of Criminal Justice and Security prepares students for professional and management-related career opportunities in criminal justice and security by applying a multidisciplinary comprehensive approach to criminal justice theory and application. Students will be prepared to understand, explain, and predict criminal justice and security concepts and to contribute to the development of public and private policy within communities. Our mission is to enhance the academic preparation and professionalism of the nation’s criminal justice and security communities through access to quality criminal justice and security higher education. The College of Criminal Justice and Security provides innovative, respected, relevant, affordable, and student-focused programs, designed to prepare students for opportunities for service and leadership in a diverse, global society. Curriculum is delivered by experts who relate both theory and practice in this evolving field. The College has earned respect through continuous improvement driven by a combination of innovation in the field and empirical evidence of learning outcomes, all of which is accomplished through the integrity, teamwork, and creativity of college faculty and staff. We are a respected criminal justice and security college, known for its distinctive strengths in providing superior and relevant educational programs to its students.

It is the student’s responsibility to ascertain whether their past history and conduct may prohibit their placement or participation in the criminal justice and security field. The University makes no guarantee or representation that the student will meet all qualifications for such employment or licensure for the occupation or profession related to the chosen program.

**Associate of Arts/Concentration in Criminal Justice**

The following Associate of Arts/Concentration in Criminal Justice (AACJ) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Criminal Justice concentration focuses on policing practices, corrections, and juvenile justice. Students take a comprehensive look at these topics through interactive assignments that not only develop their critical thinking skills, but also enable them to recognize the functions of the criminal justice professions within their community. Students are required to formulate conclusions, evaluate decisions, and develop opinions based on learned topics. Students analyze relationships between the citizens, the police, and the court systems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aacj.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AACJ**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
  - Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

All undergraduate students are required to complete the minimum
Degree Requirements for AACJ

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Academic Progression Requirements for the AACJ

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Course Descriptions for the AACJ

CJS 200.................................................................................................3 credits
Foundations of the Criminal Justice System
This course is an introduction to the foundational elements of the criminal justice system. Students examine this system from its influential past to its multi-faceted present to its theorized future. This course gives the student an interactive pathway through the laws that protect the system, through the people that enforce the system, and through the courts that govern this system. It also provides an overview of the correctional systems and their impact and roles in American society. Other topics include crime causation, terrorism, and cybercrime related issues.

CJS 210.................................................................................................3 credits
Introduction to Criminal Court System
This course is an introduction to the fundamental elements of the courts in our criminal justice system. Students will examine the many complexities affecting the court system, from the theory behind the creation of laws to the implementation of such laws. This course provides an in-depth look into the roles and functions of the professionals interacting within the court while outlining the courtroom process. Other topics include punishments, appeals, and plea bargains.

CJS 220.................................................................................................3 credits
Introduction to Corrections - A World Apart
This course introduces students to the fundamental elements of the corrections system within the criminal justice field. Students will examine the early implementations of punishment as well as evolving philosophies of sentencing. Students will gain insight into the purpose and functions of jails and prisons, while establishing a connection between prison life and prisoner’s rights. Students will also take an in-depth look into how parole and probation affect our communities. Other topics include correctional management, rehabilitation, and correctional systems in other countries.

CJS 240.................................................................................................3 credits
Introduction to Juvenile Justice
This course is a general orientation to the concept of delinquency and the field of juvenile justice. Students will examine the nature of delinquency, as well as a variety of theories and suspected causes
of delinquent behavior. Students will study factors related to delinquency and/or prevention including gender, youthful behavior, family, peers, drug use, school, and community. This course will also familiarize students with the evolution of juvenile justice and key players in the juvenile justice process. Additionally, students will develop an understanding of the juvenile court process, as well as juvenile detention, restitution, prevention and treatment.

CJS 250 ................................................................................... 3 credits

**Introduction to Security**

This course is an introduction to contemporary security practices and programs. Students will study the origins of private security, its impact on our criminal justice system, and the roles of security personnel. Students will also examine the growth and privatization of the security industry, and study the elements of physical security including surveillance and alarm systems. The course will cover legal and liability issues, which determine the extent of private security authority as well as its limitations. This course will also focus on the current and future integration of private security services in law enforcement agencies.

COM 150 ................................................................................... 3 credits

**Effective Essay Writing**

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................................... 3 credits

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................................... 3 credits

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CJT 205 ................................................................................... 3 credits

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................................... 3 credits

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Concentration in Criminal Justice (Maryland-Online)**

The following Associate of Arts/Emphasis in Criminal Justice (AACJ) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Criminal Justice emphasis focuses on policing practices, corrections, the criminal court system, and juvenile justice. Students take a comprehensive look at these topics through interactive assignments that not only develop their critical thinking skills, but also enable them to recognize the functions of the criminal justice professions within their community. Students are required to formulate conclusions, evaluate decisions, and develop opinions based on learned topics. Students analyze relationships between the citizens, the police, and the court systems. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aacj.

CRT 205 ........................................................................................................................................... 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ........................................................................................................................................... 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Criminal Justice (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Criminal Justice (AACJ) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Criminal Justice concentration focuses on policing practices, corrections, the criminal court system, and juvenile justice. Students take a comprehensive look at these topics through interactive assignments that not only develop their critical thinking skills, but also enable them to recognize the functions of the criminal justice professions within their community. Students are required to formulate conclusions, evaluate decisions, and develop opinions based on learned topics. Students analyze relationships between the citizens, the police, and the court systems.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aacj-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aacj-mn.

**Additional Admission Requirements for AACJ**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AACJ for Arkansas Students**

- Communication Arts Requirement 6 credits
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
  - Students who reside in Arkansas are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
  - Must include: MAT 219 and MAT 220
- Science & Technology Requirement 9 credits
  - (B Track must include: SCI 162)
  - Must include a minimum of 6 credits in lab science.
  - The lab science requirements may also be satisfied with any science transfer coursework with a lab component.
- Social Science Requirement 9 credits
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
  - Must include: HIS 135
  - HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.
- Humanities Requirement 9 credits
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- Additional Liberal Arts Requirement 6 credits
  - (A Track must include: GEN 105)
  - (B Track must include: US 101 and FP 101)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program. Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

**General Education Requirements for the AACJ for Minnesota Students**

- Communication Arts Requirement 6 credits
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
- Science & Technology Requirement 9 credits
  - (B Track must include: SCI 162)
- Social Science Requirement 9 credits
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
- Humanities Requirement 9 credits
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- Additional Liberal Arts Requirement 6 credits
  - (A Track must include: GEN 105)
  - (B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

**Academic Progression Requirements for the AACJ**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
  • The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
  • All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
  • Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
  • Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework, certain program areas must be satisfied before students can progress to others.
  • Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AACJ

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AACJ

CJS 200 ..................................................................................... 3 credits

Foundations of the Criminal Justice System
This course is an introduction to the foundational elements of the criminal justice system. Students examine this system from its influential past to its multi-faceted present to its theorized future. This course gives the student an interactive pathway through the laws that protect the system, through the people that enforce the system, and through the courts that govern this system. It also provides an overview of the correctional systems and their impact and roles in American society. Other topics include crime causation, terrorism, and cybercrime related issues.

CJS 210 ..................................................................................... 3 credits

Fundamentals of Policing
This course provides students with the opportunity to gain a basic understanding of policing in the United States. It examines the history of the police, the emerging role of private security, and the organizational concepts of police departments. This course also discusses the relationships between the police department and their respective communities. Other topics include recruitment processes, diversity, culture, and laws that govern policing. Students will have the opportunity to research their local police department for a closer look at policing in their community.

CJS 220 ..................................................................................... 3 credits

Introduction to Criminal Court System
This course is an introduction to the fundamental elements of the courts in our criminal justice system. Students will examine the many complexities affecting the court system, from the theory behind the creation of laws to the implementation of such laws. This course provides an in-depth look into the roles and functions of the professionals interacting within the court while outlining the courtroom process. Other topics include punishments, appeals, and plea bargains.

CJS 230 ..................................................................................... 3 credits

Introduction to Corrections - A World Apart
This course introduces students to the fundamental elements of the corrections system within the criminal justice field. Students will examine the early implementations of punishment as well as evolving philosophies of sentencing. Students will gain insight into the purpose and functions of jails and prisons, while establishing a connection between prison life and prisoner’s rights. Students will also take an in-depth look into how parole and probation affect our communities. Other topics include correctional management, rehabilitation, and correctional systems in other countries.

CJS 240 ..................................................................................... 3 credits

Introduction to Juvenile Justice
This course is a general orientation to the concept of delinquency and the field of juvenile justice. Students will examine the nature of delinquency, as well as a variety of theories and suspected causes of delinquent behavior. Students will study factors related to delinquency and/or prevention including gender, youthful behavior, family, peers, drug use, school, and community. This course will also familiarize students with the evolution of juvenile justice and key players in the juvenile justice process. Additionally, students will develop an understanding of the juvenile court process, as well as juvenile detention, restitution, prevention and treatment.

COM 150 ..................................................................................... 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ..................................................................................... 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

MAT 219. ..................................................................................... 3 credits

Introduction to College Algebra
This course introduces algebraic concepts providing a solid foun-
Avoid reinforcing biases. Students are given the opportunity to develop writing skills that enable them to clearly present claims to support their conclusions and make their arguments logically and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135 ................................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

ETH 125 ................................................................. 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

The Bachelor of Science in Organizational Security and Management

The following Bachelor of Science in Organizational Security and Management (BS/OSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Organizational Security and Management degree is designed to address an increasing national and international need for greater technical competence and professionalism in the security industry. The distinctions between the roles of criminal justice agencies and private security organizations are recognized and the degree program provides the required knowledge for a student to develop competency and management skills in organizational security. While the program includes courses in Terrorism and Homeland Security, it also recognizes the depth and breadth of the discipline and provides a variety of courses designed to expose students to the entire spectrum of the security profession.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bs-osm.

Capstone Course

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BS/OSM
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.
- Signed Criminal Conviction Prohibition Acknowledgement Form

Degree Requirements for the BS/OSM

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 57 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.00.
- A minimum of 120 total credits that include a minimum of 57 upper division credits. Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
- If a student fails to complete SEC 480 with a C- or better, the student must retake the course to satisfy the degree requirement.

Academic Progression Requirements for the BS/OSM
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others. All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

General Education Requirements for the BS/OSM
A minimum of 54 of the 120 credits must be in the general educa-
tion areas approved by the University.
Communication Arts, 6 credits
Mathematics, 6 credits
Science and Technology, 6 credits
Must include at least 3 credits in the physical or biological sciences
Humanities, 6 credits
Social Science, 6 credits
Additional Liberal Arts, 3 credits
Interdisciplinary Requirements, 15 credits
Professional Development, 5 credits
GEN 300 is completed as part of the required course of study
Integrating, 3 credits
SEC 480 is completed as part of the required course of study
Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance.
Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BS/OSM for Arkansas Students
All students must complete 54 general education credits from the following areas:
Communication Arts, 6 credits
Mathematics, 6 credits
Must include MTH 220
Science and Technology, 9 credits
Must include a minimum of 6 credits in lab science.
Humanities, 9 credits
Social Science, 9 credits
Must include HIS 145 or POL 215
Additional Liberal Arts, 3 credits
Interdisciplinary Requirements, 6 credits
Professional Development, 3 credits
GEN 300 is completed as part of the required course of study
Integrating, 3 credits
SEC 480 is completed as part of the required course of study
Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance.
Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Additional Residency Requirements and Course Waivers for the BS/OSM
Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
The following courses in the Required Course of Study may not be waived: GEN 300, SEC 480

Course Descriptions for the BS/OSM
GEN 300 ...................................................................................3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.
SEC 310 ....................................................................................3 credits

Introduction to Organizational Security and Management
This course is an overview of the principles of security management and the consequences of failure to adequately protect business assets. The course includes an introduction to loss prevention and risk management. It provides an overview of the contingencies that influence modern security management, e.g., technology, legal issues, ethics, vulnerability assessments, criminal and terrorist activity, and interagency cooperation. The course also introduces various security operation specializations and programs such as Corporate, Academic, Transportation, Government, and others.
SEC 320 ....................................................................................3 credits

Survey of Security Specializations
This course identifies and contrasts the benefits of proprietary and contract security operations and introduces the student to a variety of security specializations. It also examines the purposes, objectives, procedures, risks, and types of organizations associated with the respective specializations.
CIS 319 ....................................................................................3 credits

Computers and Information Processing
This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
MGT 431 ....................................................................................3 credits

Human Resources Management
This course focuses on the strategic role of human resources management, personnel planning and job analysis, personnel selection, performance appraisal, compensation, training and development from the vantage point of the manager.
SEC 340 ....................................................................................3 credits

Criminology and the Criminal Justice System
This course identifies various types of criminal activity and provides the student with an understanding of the causes of criminal behavior and the societal response to crime. It also identifies and discusses the various elements of the American criminal justice system.
SEC 360 ....................................................................................3 credits

Interpersonal Communications
This course prepares the student to communicate effectively in written and verbal form. It provides principles for effective investigative reporting and incident documentation as well as techniques for interviewing and understanding verbal and non-verbal communication.
SEC 390 ....................................................................................3 credits

Organizational Behavior and Management
This course encompasses the study of individual and group behavior in organizational settings. Management methods for organizational processes and change are presented along with leadership applications.
SEC 370 ....................................................................................3 credits
The Administration Process
This course provides the student with an understanding of the various elements of a program budget, the process of budget development, justification and presentation and principles of contract preparation.
SEC 330 .................................................................................... 3 credits

Industrial Safety
This course provides the student with an overview of safety issues that could be experienced by security personnel as first responders in various work environments. It includes a review of OSHA, EPA and Fire Code safety regulations and provides methods for identifying and correcting environmental risk factors related to hazardous materials, fire and other potential safety hazards. The course is also intended to provide the student with knowledge that will assist with the initial response to and investigation of work related accidents.
SEC 350 .................................................................................... 3 credits

Legal and Regulatory Issues in Security Management
This course examines legal, regulatory, ethical and policy issues that influence the work performance of security personnel and also discusses the potential consequences of non-compliance for individuals and institutions.
SEC 400 .................................................................................... 3 credits

Threat and Vulnerability Management
This course prepares students to conduct comprehensive threat assessments with respect to physical facilities, personnel, equipment or operating systems and enables students to evaluate and manage vulnerabilities in terms of potential threats.
SEC 430 .................................................................................... 3 credits

Principles of Investigation
Investigation of criminal activity, employment applicant backgrounds and internal organizational issues are an integral part of the security manager’s responsibilities. This course is designed to provide the student with an understanding of the principles and techniques of investigation.
SEC 440 .................................................................................... 3 credits

Security of Information Systems and Technology
This course provides the student with an understanding of the security issues associated with computer systems. The course also identifies security measures that are intended to protect the software, hardware and data associated with computer systems.
SEC 410 .................................................................................... 3 credits

Physical Security
This course provides the student with an understanding of the various levels of security that can be employed for the protection of people, property and data housed in physical facilities.
SEC 420 .................................................................................... 3 credits

Personal Security
This course provides the student with an understanding of the procedures, techniques and technology associated with the protection of executives, employees, customers and the general public from intentional harm, accidents and naturally occurring emergencies.
SEC 450 .................................................................................... 3 credits

Global Security Issues
This course evaluates world interests and the changing dimensions of security. It helps the student understand the dynamic nature of global factors that significantly influence security strategies.
SEC 460 .................................................................................... 3 credits

Terrorism
This course helps the student understand the causes of domestic and international terrorism and the psychological and economic effects of terrorist acts.
SEC 470 .................................................................................... 3 credits

Homeland Security and Interagency Response
This course examines the establishment and mission of the Department of Homeland Security, the agencies contained in the department, other federal agencies involved with homeland security, the USA PATRIOT Act and intelligence gathering, and the role of the military, local and state agencies, and the private sector in homeland security.
SEC 480 .................................................................................... 3 credits

Capstone Course
This is the capstone course for Organizational Security and Management undergraduate students. The course provides students with the opportunity to integrate and apply specific program knowledge and learning in a comprehensive manner. Students will evaluate and demonstrate their professional growth.
COMM 215 ................................................................................ 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 200 .................................................................................... 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 101 .................................................................................... 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
MTH 220 .................................................................................... 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
CHM 110 .................................................................................... 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................. 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying a historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science in Criminal Justice Administration
(Maryland-OnLine)

The following Bachelor of Science in Criminal Justice Administration (BSCJA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The mission of the Bachelor of Science in Criminal Justice Administration is to provide students with a strong foundation in criminal justice principles, concepts, and theories, as well as a practice orientation to justice administration. The degree offers a global perspective, as well as specific emphasis areas of criminal justice services delivery. Students will receive core instruction in criminal justice as it is represented in the domains of police, courts, and corrections and then advance to emphases related to specific areas of criminal justice within those domains.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscj.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSCJA Foundation Courses
GEN 200 ................................................................. 3 credits
Foundations for General Education and Professional Success
CJA 204 ~ ................................................................. 3 credits
Introduction to Criminal Justice
CJA 214 ~ ................................................................. 3 credits
Introduction to Police Theory and Practices
CJA 224 ~ ................................................................. 3 credits
Introduction to Criminal Court Systems
CJA 234 ~ ................................................................. 3 credits
Introduction to Corrections

BSCJA Required Course of Study
CJA 304 ~ ................................................................. 3 credits
Interpersonal Communications
CJA 314 ~ ................................................................. 3 credits
Criminology
CJA 324 ~ ................................................................. 3 credits
Ethics in Criminal Justice
CJA 334 ~ ................................................................. 3 credits
Research Methods in Criminal Justice
CJA 344 ~ ................................................................. 3 credits
Cultural Diversity Issues in Criminal Justice
CJA 354 ~ ................................................................. 3 credits
Criminal Law
CJA 364 ~ ................................................................. 3 credits
Criminal Procedure
CJA 374 ~ ................................................................. 3 credits
Juvenile Justice Systems and Processes
CJA 384 ~ ................................................................. 3 credits
Criminal Organizations
CJA 394 ~ ................................................................. 3 credits
Contemporary Issues and Futures in Criminal Justice

Students must select one emphasis in a particular area of study at the time of enrollment. Students may also complete an additional emphasis. Please contact your academic representative for more information.

Emphasis in Human Services
The BSCJA Human Services emphasis is intended to give graduates knowledge and basic skills to work in the human services and helping areas of the criminal justice system. This particular emphasis represents an integrated program combining academic instruction in criminal justice with applied skills for students whose goal is a career in the areas of the system where basic skills in interviewing, case management, mental health interventions, advocacy and mediation are required. Human Services graduates are prepared to provide services in a variety of institutional and community settings within the criminal justice domains of policing, the courts, institutional and community corrections.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscj-a.ls.
Emphasis in Institutional Healthcare

The BSCJA Institutional Health Care emphasis addresses the basic body of knowledge, understanding, and skills identified as relevant to criminal justice based health care services. This includes such areas as management, policy, legal and ethical parameters, health and disease factors, and health care service delivery. The reshaping of contemporary criminal justice health care requires workers to have a broad range of knowledge associated with the functions of health care in detention and correctional institutions, as well as various other areas represented in the greater criminal justice system.

HCS 310 ~ ................................................................. 3 credits
Health Care Delivery in the United States

HCS 330 ~ ................................................................. 3 credits
Introduction to Health and Disease

Emphasis in Management

The BS/CJA Management emphasis is designed to give learners a depth of understanding concerning the management and administrative skills necessary to effectively run organizations in the various domains of the criminal justice system. The courses included in this degree emphasis focus primarily on the management and administration skill sets associated with the police, the courts, and with corrections. The theories and principles behind criminal justice are also examined. Students learn about policies, procedures associated with management functions, as well as various administrative practices and factors impacting criminal justice agency operations. This will not only give you the insight into what these specific departments are and what they do, but how to maintain and evaluate organizational operations from an administrative viewpoint.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja-m.

CJA 444 ~ ................................................................. 3 credits
Organizational Behavior and Management

CJA 454 ~ ................................................................. 3 credits
Criminal Justice Management Theory and Practice

CJA 464 ~ ................................................................. 3 credits
Criminal Justice Policy Analysis

CJA 474 ~ ................................................................. 3 credits
Managing Criminal Justice Personnel

CJA 484 ~ ................................................................. 3 credits
Criminal Justice Administration Capstone

HCS 310 ~ ................................................................. 3 credits
Health Care Delivery in the United States

HCS 330 ~ ................................................................. 3 credits
Introduction to Health and Disease
Additional Admission Requirements for the BSCJA
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants must be currently employed or have access to a work environment.
- Signed Criminal Conviction Prohibition Acknowledgement Form

General Education Requirements for the BSCJA
A minimum of 54 credits of the 120 credits in the following general education areas approved by the University:
- Communication Arts, 6 credits
- Mathematics, 6 credits
- Science and Technology, 6 credits

Must include at least three credits in physical or biological sciences:
- Humanities, 6 credits
- Social Science, 6 credits
- Additional Liberal Arts, 6 credits

Interdisciplinary Requirements, 18 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Degree Requirements for the BSCJA
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 credits of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
  - Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  - Students will declare an emphasis at the time of enrollment.
  - The diploma awarded for this program will read as: Bachelor of Science in Criminal Justice Administration

Academic Progression Requirements for the BSCJA
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Residency Requirements and Course Waivers for the BSCJA
Students in this program may waive a maximum of 15 upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students may also waive twelve (12) lower division credits from the required course of study.

The following courses in the required course of study may not be waived: GEN 200, CJA 484, GEN 195.

Course Descriptions for the BSCJA
GEN 200 ........................................................................... 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

CJA 204 ........................................................................... 3 credits

Introduction to Criminal Justice
This course is an introductory overview of the organization and jurisdictions of local, state, and federal law enforcement, judicial and corrections agencies, and processes involved in the criminal justice systems. It examines the historical aspects of the police, the courts, and the correctional system, as well as the philosophy. Additionally, career opportunities and qualifying requirements, terminology and constitutional limitations of the system will also be covered.

CJA 214 ........................................................................... 3 credits
Introduction to Policy Theory and Practices
This course is an introductory overview which provides students with the opportunity to gain an understanding of policing in the United States. It surveys the basics of police functions, from individual and organizational roles to the issues faced on a daily basis. This course also examines the procedures and methods of operation of police and critical issues in law enforcement.

CJA 224 .................................................................................... 3 credits

Introduction to Criminal Court Systems
This course is an introduction and overview of the legal system, the participants, the courtroom process, and post-conviction process of the court system. It demonstrates the connection among all participants and how they relate to each other. Additionally, the course covers the history of the court system and the different types of court at the state and federal levels.

CJA 234 .................................................................................... 3 credits

Introduction to Corrections
This course is an introduction to the various components of the corrections system within the criminal justice system. It provides an overview of corrections, including corrections history, the persons, agencies, and organizations that manage convicted offenders. Other topics that are covered include: policy and procedure, sentencing, probation, and rehabilitations of prisoners.

CJA 304 .................................................................................... 3 credits

Interpersonal Communications
This course prepares the student to communicate effectively in both written and verbal form. It covers best practices in investigative reporting and interpersonal verbal communication with victims, suspects, and civilians, in a criminal justice setting. Emphasis is placed on practical application of the skills and theories introduced.

CJA 314 .................................................................................... 3 credits

Criminology
Criminology is an introductory course in the study of crime and criminal behavior, focusing on the various theories of crime causation. This course highlights the causes of crime, criminal behavior systems, societal reaction to crime, and criminological methods of inquiry.

CJA 324 .................................................................................... 3 credits

Ethics in Criminal Justice
This course explores the standards and codes of professional responsibility in criminal justice professions (e.g., Law Enforcement Code of Ethics, ABA Standards of Professional Responsibility, American Jail Association Code of Ethics for Jail Officers, and the American Correctional Association Code of Ethics). It also explores analysis and evaluation of ethical dilemmas, roles of professional organizations and agencies, ethics and community relations, ethics in criminal justice laws and procedures and civil liability in law enforcement and correctional environments.

CJA 334 .................................................................................... 3 credits

Research Methods in Criminal Justice
Students learn and demonstrate knowledge of research methodology within the criminal justice system and become acquainted with the range and scope of quantitative and qualitative tools available to the criminal justice researcher.

CJA 344 .................................................................................... 3 credits

Cultural Diversity Issues in Criminal Justice
This course offers a comprehensive, critical and balanced examination of the issues of crime and justice with respect to race and ethnicity. Procedures and policy in a pluralistic and multicultural society are examined relative to law enforcement, courts and corrections environments.

CJA 354 .................................................................................... 3 credits

Criminal Law
This is an introductory course in the study of criminal law, general legal principles, and how the criminal law functions in and affects modern society. This course highlights a variety of key topics, including the concept of crime and the development of criminal law, defenses to criminal charges, and a number of specific types of crimes, including personal crimes, property crimes, public order crimes, and offenses against public morality. Legal issues affecting punishment will also be discussed, as will ways the criminal law impacts victims of crime.

CJA 364 .................................................................................... 3 credits

Criminal Procedure
This course explores the basic core knowledge of constitutional criminal procedure. Emphasis is placed on the Fourth, Fifth and Sixth Amendments, searches and seizures, interrogations and confessions, identifications, pre-trial and trial processes. In addition, the United States Constitution as interpreted by the U.S. Supreme Court is examined along with philosophical policy considerations. Application of core knowledge is developed through simulation exercises and examination of homeland security issues.

CJA 374 .................................................................................... 3 credits

Juvenile Justice Systems and Processes
This course is a general orientation to the field of juvenile justice, including causation theories and the development of system responses to delinquent behavior. The problems facing juveniles today are addressed, and adult and juvenile justice systems are compared, including initial apprehension, referral, and preventive techniques. Specific issues examined include chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.

CJA 384 .................................................................................... 3 credits

Criminal Organizations
This course is a survey of the origins and development of organized crime in the United States. It examines the structure and activities of organized criminal enterprises, considers different models that have been employed to describe organized crime groups, and explores theories that have been advanced to explain the phenomenon. Major investigations of organized crime and legal strategies that have been developed to combat it are also considered.

CJA 394 .................................................................................... 3 credits

Contemporary Issues and Futures in Criminal Justice
This course examines both the principle issues in contemporary criminal justice as well as the extrapolation of such issues toward possible futures within the criminal justice field. Students will focus upon relevant research in policing, courts, and corrections that reflects key elements of current conditions and what may be expected in the years to come. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global
levels of criminal justice administration.

COMM 215 .................................................................3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 101 .................................................................3 credits

**Skills for Lifelong Learning**

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .................................................................3 credits

**Skills for Professional Development**

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.

MTH 220........................................................................3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .................................................................3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101.......................................................................3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 .......................................................................3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 .......................................................................3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Course Descriptions for the Emphasis in Human Services**

BSHS 311 ....................................................................3 credits

**Models of Effective Helping**

This course presents an exploration of the major theoretical areas in the helping professions: cognitive, behavioral, affective/humanistic, and systems. Students learn the theoretical basis for each of the major theories, the approach to change, and the techniques and interventions used by practitioners of these theories. The course emphasizes the development of a personal theory and approach to human services and the creation of a resource file containing practical applications of theory-based techniques for use by the human service worker.

BSHS 401 ....................................................................3 credits

**Case Management**

This course covers principles, practices, and issues in case management. The diagnosis and treatment of developmental, psychological, and psychiatric problems and treatment resources in least restrictive and most cost effective settings will be examined.

BSHS 441 ....................................................................3 credits

**Advocacy and Mediation**

This course is designed to explore the potential use and benefits of alternative dispute resolution in human services as a part of the advocacy process. Students will explore the role of the advocate, learn about various dispute resolution models, and identify and practice mediation skills. Attention to overcoming barriers to effective service delivery will be examined. Students will experience the roles of mediator, advocate, and agency representative through role-plays in dyads and small groups.

BSHS 471 ....................................................................3 credits

**Mental Health and Crisis Intervention Practices**

Students will learn about the history and current status of the human services delivery system and the mental health services system. Appropriate protocols for assessing strategies will be examined and explored. Students will explore the skills, techniques, and uses of crisis intervention.

CJA 484 ....................................................................3 credits

**Criminal Justice Administration Capstone**

This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular
attention is given to integrating core content of criminal justice administration with specialized content from students' selected emphasis area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Emphasis in Management

CJA 444: Organizational Behavior and Management
This course in organizational behavior encompases the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.

CJA 454: Criminal Justice Management Theory and Practice
This course applies management and financial principles to criminal justice organizations. Emphasis is placed on budgets, financial accounting principles and assessing the effectiveness of the activities of criminal justice organizations. Constitutional requirements, court decisions, and legislation (such as EEOC requirements) as they impact management in criminal justice organizations are discussed. Basic accounting and financial terminology, and purposes and formats of financial statements are introduced: depreciation of assets, capital budgeting, cash management, lease versus purchase, and inventory management.

CJA 464: Criminal Justice Policy Analysis
This course examines the history of federal- and state-level crime control initiatives and explores the development of effective anti-crime policies. The analysis of contemporary crime control policies is included.

CJA 474: Managing Criminal Justice Personnel
This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.

CJA 484: Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected emphasis area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Emphasis in Institutional Health-care

HCS 310: Health Care Delivery in the US
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 330: Introduction to Health and Disease Trends
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 330: Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 430: Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

HCS 430: Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected emphasis area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Emphasis in Cybercrimes

CIS 207: Information System Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

BCC 401: Cybercrimes in the 21st Century
This course explores developments and changes in the practice of criminal justice brought about by technology and crime as well as the rapid technological change in computers, and other Internet
access devices. Specific topics include: cybercrime, how different cybercrimes are committed, the rapid evolution of technology and its effects on crime, cybercrimes against persons, and criminal justice agencies involved in the investigation and prevention of cybercrimes. The new skills and knowledge gained in this course will add to the protection, safety, and security of our society.

BCC 402 .................................................................................... 3 credits

Cybercrime and Role of Law Enforcement Security Personnel
This course explores the developments and changes in the role of law enforcement and security officials in their investigation of cybercrimes. Specific topics include: cybercrime forensics, obtaining search warrants for cybercrimes, jurisdictional issues in cybercrimes, law enforcement issues in cybercrimes, and personal and corporate security and the prevention of cybercrimes. Upon completion of this cybersecurity course, students will have new skills and knowledge that will aid their present or future organizations, and as leaders provide service to their communities.

BCC 403 .................................................................................... 3 credits

Global Technology and Cybercrime
In this course, students will study how global technology is used to further cybercrime. Topics in this course include homeland security and cybertechnology, global technology, threats to the United States, preventing and fighting global technology crime, and the role of local and federal agencies in preventing and investigating global technology crimes. Students will also explore the future of law enforcement and security to prevent and fight global cybercrimes. The new skills and knowledge gained by the students will aid them in their current or future professional endeavors.

CJA 484 ..................................................................................... 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Emphasis in Security

Risk Management Perception and Communication
In this course, students will explore different global and regional threats; integrate security decision concerns with antiterrorism resource allocation; examine the psychological perception of the risk of terrorism threats; evaluate security plans; and discuss the role of the media in regard to accuracy and timely reporting. The knowledge and skills developed in this course will help prepare students for service in local and global security environments.

BSS 480 .................................................................................... 3 credits

Counterterrorism Intelligence and Analysis
This course explores developments and changes in the practice of security operations brought about from global and local terrorist threats to different organizations. Students in this course will study the typology and anatomy of terrorist operations; evaluate intelligence and information sharing in counterterrorism; examine counterterrorism analysis methods and global security tactics; discuss international ethical and legal issues in counterterrorism; and analyze technology issues in counterterrorism. The new skills and knowledge gained will add to the protection, safety, and security of our society.

BSS 482 .................................................................................... 3 credits

Securing Critical Infrastructure and Cyberspace
This course explores the developments and changes in security operations to secure the critical infrastructure in both the public and private environments. Students will explore the critical infrastructure and interdependency; evaluate cybersecurity in post 9/11 global security; discuss the securing of human and property assets; develop proactive planning for protection of assets; and analyze border and transportation security issues. Upon completion of this security course, students will have new skills and knowledge that will aid them in their present or future organizations.

BSS 483 .................................................................................... 3 credits

World View of Homeland Security
Students in this course will develop new skills to aid in the protection, safety, and security of our society. Students will examine public and private security collaboration in homeland security response; discuss the leadership task of controlling the human influence in homeland security; analyze and understand the political influence on idea development in homeland security; compare and contrast jurisdictional responsibilities of homeland security programs; and evaluate the goals, objectives, and assessment of homeland security measures.

CJA 484 ..................................................................................... 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Bachelor of Science in Criminal Justice Administration

The following Bachelor of Science in Criminal Justice Administration (BSCJA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The mission of the Bachelor of Science in Criminal Justice Administration is to provide students with a strong foundation in criminal justice principles, concepts, and theories, as well as a practice orientation to justice administration. The degree offers a global perspective, as well as specific concentration areas of criminal justice services delivery. Students will receive core instruction in criminal justice as it is represented in the domains of police, courts, and corrections and then advance to concentrations related to specific areas of criminal justice within those domains. Concentration in Management

The BSCJA Management concentration is designed to give learners a depth of understanding concerning the management and administrative skills necessary to effectively run organizations in the various chains of criminal justice system. The courses included in this degree concentration focus primarily on the administration and management skill sets associated with the police, the courts, and with corrections. The theories and principles behind criminal justice are also examined. Students learn about policies, procedures associated with management functions, as well as many administrative practices and factors impacting criminal justice agency operations. This will not only give you the insight into what these specific departments are and what they do, but how to maintain and evaluate organizational operations from an administrative viewpoint.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bscja-m.

Concentration in Institutional Healthcare

The BSCJA Institutional Health Care concentration addresses the basic body of knowledge, understanding, and skills identified as relevant to criminal justice-based health care services. This includes such areas as management, policy, legal and ethical parameters, health and disease factors, and health care service delivery. The reshaping of contemporary criminal justice health care requires workers to have a broad range of knowledge associated with the functions of health care in detention and correctional institutions, as well as various other areas represented in the greater criminal justice system.

Criminal Justice Administration Capstone

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSCJA

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.
- Signed Criminal Conviction Prohibition Acknowledgement Form

General Education Requirements for the BSCJA

A minimum of 54 credits of the 120 credits in the following general education areas approved by the University:

- Communication Arts, 6 credits
- Mathematics, 6 credits
- Science and Technology, 6 credits

**Must include at least three credits in physical or biological sciences**

- Humanities, 6 credits
- Social Science, 6 credits
- Additional Liberal Arts, 6 credits
- Interdisciplinary Requirements, 18 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSCJA for Arkansas Students

A minimum of 54 credits of the 120 credits in the following general education areas approved by the University:

- Communication Arts, 6 credits
- Mathematics, 6 credits

**Must include MTH 220**

- Science and Technology, 9 credits

**Must include a minimum of 6 credits in lab science.**

*The lab science requirement may also be satisfied with any science transfer coursework with a lab component.*

- Humanities, 9 credits
- Social Science, 9 credits

**Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.**

Additional Liberal Arts, 6 credits
- Interdisciplinary Requirements, 9 credits

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Degree Requirements for the BSCJA**
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 credits of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
  - Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  - Students will declare a concentration at the time of enrollment.
  - The diploma awarded for this program will read as: Bachelor of Science in Criminal Justice Administration

**Academic Progression Requirements for the BSCJA**
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 172 instead of COMM 215)
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Additional Residency Requirements and Course Waivers for the BSCJA**
Students in this program may waive a maximum of 15 upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students may also waive twelve (12) lower division credits from the required course of study.

The following courses in the required course of study may not be waived: GEN 200, CJA 484

**Course Descriptions for the BSCJA**

**Foundations for General Education and Professional Success**
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**Introduction to Criminal Justice**
This course is an introductory overview of the organization and jurisdictions of local, state, and federal law enforcement, judicial and corrections agencies, and processes involved in the criminal justice systems. It examines the historical aspects of the police, the courts, and the correctional system, as well as the philosophy. Additionally, career opportunities and qualifying requirements, terminology and constitutional limitations of the system will also be covered.

**Introduction to Policy Theory and Practices**
This course is an introductory overview which provides students with the opportunity to gain an understanding of policing in the United States. It surveys the basics of police functions, from individual and organizational roles to the issues faced on a daily basis.

**Introduction to Criminal Court Systems**
This course is an introduction and overview of the legal system, the participants, the courtroom process, and post conviction process of the court system. It demonstrates the connection among all participants and how they relate to each other. Additionally, the course covers the history of the court system and the different types of court at the state and federal levels.

**Introduction to Corrections**
This course is an introduction to the various components of the corrections system within the criminal justice system. It provides an overview of corrections, including corrections history, the persons, agencies, and organizations that manage convicted offenders. Other topics that are covered include: policy and procedure, sentencing, probation, and rehabilitations of prisoners.
Interpersonal Communications
This course prepares the student to communicate effectively in both written and verbal form. It covers best practices in investigative reporting and interpersonal verbal communication with victims, suspects, and civilians, in a criminal justice setting. Emphasis is placed on practical application of the skills and theories introduced.

CJA 314 .....................................................................................3 credits

Criminology
Criminology is an introductory course in the study of crime and criminal behavior, focusing on the various theories of crime causation. This course highlights the causes of crime, criminal behavior systems, societal reaction to crime, and criminological methods of inquiry.

CJA 324 .....................................................................................3 credits

Ethics in Criminal Justice
This course explores the standards and codes of professional responsibility in criminal justice professions (e.g., Law Enforcement Code of Ethics, ABA Standards of Professional Responsibility, American Jail Association Code of Ethics for Jail Officers, and the American Correctional Association Code of Ethics). It also explores analysis and evaluation of ethical dilemmas, roles of professional organizations and agencies, ethics and community relations, ethics in criminal justice laws and procedures and civil liability in law enforcement and correctional environments.

CJA 334 .....................................................................................3 credits

Research Methods in Criminal Justice
Students learn and demonstrate knowledge of research methodology within the criminal justice system and become acquainted with the range and scope of quantitative and qualitative tools available to the criminal justice researcher.

CJA 344 .....................................................................................3 credits

Cultural Diversity Issues in Criminal Justice
This course offers a comprehensive, critical and balanced examination of the issues of crime and justice with respect to race and ethnicity. Procedures and policy in a pluralistic and multicultural society are examined relative to law enforcement, courts and corrections environments.

CJA 354 .....................................................................................3 credits

Criminal Law
This is an introductory course in the study of criminal law, general legal principles, and how the criminal law functions in and affects modern society. This course highlights a variety of key topics, including the concept of crime and the development of criminal law, defenses to criminal charges, and a number of specific types of crimes, including personal crimes, property crimes, public order crimes, and offenses against public morality. Legal issues affecting punishment will also be discussed, as will ways the criminal law impacts victims of crime.

CJA 364 .....................................................................................3 credits

Criminal Procedure
This course explores the basic core knowledge of constitutional criminal procedure. Emphasis is placed on the Fourth, Fifth and Sixth Amendments, searches and seizures, interrogations and confessions, identifications, pre-trial and trial processes. In addition, the United States Constitution as interpreted by the U.S. Supreme Court is examined along with philosophical policy considerations.

Application of core knowledge is developed through simulation exercises and examination of homeland security issues.

CJA 374 .....................................................................................3 credits

Juvenile Justice Systems and Processes
This course is a general orientation to the field of juvenile justice, including causation theories and the development of system responses to delinquent behavior. The problems facing juveniles today are addressed, and adult and juvenile justice systems are compared, including initial apprehension, referral, and preventive techniques. Specific issues examined include chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.

CJA 384 .....................................................................................3 credits

Criminal Organizations
This course is a survey of the origins and development of organized crime in the United States. It examines the structure and activities of organized criminal enterprises, considers different models that have been employed to describe organized crime groups, and explores theories that have been advanced to explain the phenomenon. Major investigations of organized crime and legal strategies that have been developed to combat it are also considered.

CJA 394 .....................................................................................3 credits

Contemporary Issues and Futures in Criminal Justice
This course examines both the principle issues in contemporary criminal justice as well as the extrapolation of such issues toward possible futures within the criminal justice field. Students will focus upon relevant research in policing, courts, and corrections that reflects key elements of current conditions and what may be expected in the years to come. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.

COMM 215 ................................................................................3 credits

Essentials of College Writing
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is
designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 220 ............................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ............................................................. 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ............................................................. 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ............................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ............................................................. 3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Concentration in Human Services

BSHS 311 ............................................................. 3 credits

Models of Effective Helping
This course presents an exploration of the major theoretical areas in the helping professions: cognitive, behavioral, affective/humanistic, and systems. Students learn the theoretical basis for each of the major theories, the approach to change, and the techniques and interventions used by practitioners of these theories. The course emphasizes the development of a personal theory and approach to human services and the creation of a resource file containing practical applications of theory-based techniques for use by the human service worker.

BSHS 401 ............................................................. 3 credits

Case Management
This course covers principles, practices, and issues in case management. The diagnosis and treatment of developmental, psychological, and psychiatric problems and treatment resources in least restrictive and most cost effective settings will be examined.

BSHS 441 ............................................................. 3 credits

Advocacy and Mediation
This course is designed to explore the potential use and benefits of alternative dispute resolution in human services as a part of the advocacy process. Students will explore the role of the advocate, learn about various dispute resolution models, and identify and practice mediation skills. Attention to overcoming barriers to effective service delivery will be examined. Students will experience the roles of mediator, advocate, and agency representative through role-plays in dyads and small groups.

BSHS 471 ............................................................. 3 credits

Mental Health and Crisis Intervention Practices
Students will learn about the history and current status of the human services delivery system and the mental health services system. Appropriate protocols for assessing strategies will be examined and explored. Students will explore the skills, techniques, and uses of crisis intervention.

CJA 484 ............................................................. 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Concentration in Management

CJA 444 ............................................................. 3 credits

Organizational Behavior and Management
This course in organizational behavior encompasses the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.

CJA 454 ............................................................. 3 credits

Criminal Justice Management Theory and Practice
This course applies management and financial principles to criminal justice organizations. Emphasis is placed on budgets, financial accounting principles and assessing the effectiveness of the activities of criminal justice organizations. Constitutional requirements, court decisions, and legislation (such as EEOC requirements) as they impact management in criminal justice organizations are dis-
Criminal Justice Policy Analysis
This course examines the history of federal- and state-level crime control initiatives and explores the development of effective anti-crime policies. The analysis of contemporary crime control policies is included.
CJA 474 ................................................................. 3 credits

Managing Criminal Justice Personnel
This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.
CJA 484 ................................................................. 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Concentration in Institutional Healthcare
HCS 310 ................................................................. 3 credits

Health Care Delivery in the US
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
HCS 330 ................................................................. 3 credits

Introduction to Health and Disease Trends
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.
HCS 430 ................................................................. 3 credits

Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.
HCS 455 ................................................................. 3 credits

Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.
CJA 484 ................................................................. 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Concentration in Cybercrimes
CIS 207 ............................................................................. 3 credits

Information System Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
BCC 401 ............................................................................. 3 credits

Cybercrimes in the 21st Century
This course explores developments and changes in the practice of criminal justice brought about by technology and crime as well as the rapid technological change in computers, and other Internet access devices. Specific topics include: cybercrime, how different cybercrimes are committed, the rapid evolution of technology and its effects on crime, cybercrimes against persons, and criminal justice agencies involved in the investigation and prevention of cybercrimes. The new skills and knowledge gained in this course will add to the protection, safety, and security of our society.
BCC 402 ............................................................................. 3 credits

Cybercrime and Role of Law Enforcement Security Personnel
This course explores the developments and changes in the role of law enforcement and security officials in their investigation of cybercrimes. Specific topics include: cybercrime forensics, obtaining search warrants for cybercrimes, jurisdictional issues in cybercrimes, law enforcement issues in cybercrimes, and personal and corporate security and the prevention of cybercrimes. Upon completion of this cybersecurity course, students will have new skills and knowledge that will aid their present or future organizations, and as leaders provide service to their communities.
BCC 403 ............................................................................. 3 credits

Global Technology and Cybercrime
In this course, students will study how global technology is used to further cybercrime. Topics in this course include homeland security and cybertechnology, global technology, threats to the United States, preventing and fighting global technology crime, and the role of local and federal agencies in preventing and investigating global technology crimes. Students will also explore the future of law enforcement and security to prevent and fight global cybercrimes. The new skills and knowledge gained by the students will
aid them in their current or future professional endeavors.

CJA 484 .................................................................................... 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Course Descriptions for the Concentration in Security

BSS 480 ..................................................................................... 3 credits
Risk Management Perception and Communication
In this course, students will explore different global and regional threats; integrate security decision concerns with antiterrorism resource allocation; examine the psychological perception of the risk of terrorism threats; evaluate security plans; and discuss the role of the media in regard to accuracy and timely reporting. The knowledge and skills developed in this course will help prepare students for service in local and global security environments.

BSS 481 ..................................................................................... 3 credits
Counterterrorism Intelligence and Analysis
This course explores developments and changes in the practice of security operations brought about from global and local terrorist threats to different organizations. Students in this course will study the typology and anatomy of terrorist operations; evaluate intelligence and information sharing in counterterrorism; examine counterterrorism analysis methods and global security tactics; discuss international ethical and legal issues in counterterrorism; and analyze technology issues in counterterrorism. The new skills and knowledge gained will add to the protection, safety, and security of our society.

BSS 482 ..................................................................................... 3 credits
Securing Critical Infrastructure and Cyberspace
This course explores the developments and changes in security operations to secure the critical infrastructure in both the public and private environments. Students will explore the critical infrastructure and interdependency; evaluate cybersecurity in post 9/11 global security; discuss the securing of human and property assets; develop proactive planning for protection of assets; and analyze border and transportation security issues. Upon completion of this security course, students will have new skills and knowledge that will aid them in their present or future organizations.

BSS 483 ..................................................................................... 3 credits
World View of Homeland Security
Students in this course will develop new skills to aid in the protection, safety, and security of our society. Students will examine public and private security collaboration in homeland security response; discuss the leadership task of controlling the human influence in homeland security; analyze and understand the political influence on idea development in homeland security; compare and contrast jurisdictional responsibilities of homeland security programs; and evaluate the goals, objectives, and assessment of homeland security measures.

CJA 484 .................................................................................... 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Associate Programs Pathways Program
Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:

• Pathways Non-degree Application
• High School Junior or Senior Standing
• Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
• Parent or guardian consent
• $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.
THIS PAGE WAS LEFT BLANK INTENTIONALLY.
COLLEGE OF SOCIAL SCIENCES

The College of Social Sciences offers undergraduate and graduate degree programs in a number of diverse academic areas including counseling, psychology, and human services. In addition, the college offers a certificate program in mediation. The College provides innovative educational programs designed to enhance the core knowledge, skills and values essential for students seeking to achieve their academic goals in the field of social sciences. These programs are developed and taught by skilled practitioners who work in their respective fields. Through individual and collaborative work, students can acquire the knowledge and skills needed in today's working environment.

Associate of Arts in Psychology

The following Associate of Arts/Concentration in Psychology (AAPSY) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Psychology includes courses in positive psychology, theories of personality, human sexuality, diversity, psychological disorders, social dynamics and the physiological and neurological bases of human behavior. In this program, students will analyze the interrelationship among leading psychological theories and evaluate how these theories differentially define and explain variations in human behavior. Students will be introduced to the research process and challenged to critically evaluate research results, theories, models, and concepts across a wide range of topics in the field of Psychology.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aapsy.

Additional Admission Requirements for AAPSY

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAPSY

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use...
interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AAPSY

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Academic Progression Requirements for the AAPSY

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix course work,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAPSY

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAPSY

COMP 150 ...................................................................................3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COMP 220 ...................................................................................3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety. ETH 125 ...................................................................................3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ...................................................................................3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ...................................................................................3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Course Descriptions for the AAPSY - Track A

PSY 202 ...................................................................................3 credits

Foundations of Psychology

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emo-
PSY 230 ..................................................................................... 3 credits
Theories of Personality: I Think, Therefore Who Am I?
What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight into the question of the self. Psychoanalytic, social, behavioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240 ..................................................................................... 3 credits
The Brain, the Body, and the Mind: All Together Now
This course provides an introduction to the investigation of physiological and neurological basis for human behavior. The student will be able to study and discuss various influences on personality development, such as pre-natal maternal behavior; gender; nature versus nurture; brain development; genetic composition; sensory motor interactions; learning disabilities; drug impacts; and neurological diseases.

PSY 265 ..................................................................................... 3 credits
Psychology of Human Sexuality: What Turns You On and Why?
This course is a comprehensive view of the psychosocial and physiological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

PSY 270 ..................................................................................... 3 credits
Abnormal Psychology: Abuse, Addiction, and Other Disorders
This course introduces the study of major psychological disorders as defined in the DSM-IV-TR, including their diagnoses, causes, and treatments. It covers such subjects as depression, bipolarity, anxiety, panic, somatoform, dissociation, substance abuse, anorexia, schizophrenia, and childhood disorders, as well as gender and cultural differences.

Course Descriptions for the AAPSy - Track B

PSY 201 ..................................................................................... 3 credits
Foundations of Psychology
This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 220 ..................................................................................... 3 credits
Positive Psychology: What's Right With Me
How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.

PSY 230 ..................................................................................... 3 credits
Theories of Personality: I Think, Therefore Who Am I?
What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight into the question of the self. Psychoanalytic, social, behavioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240 ..................................................................................... 3 credits
The Brain, the Body, and the Mind: All Together Now

Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits

(B Track must include: SCI 162)
Must include a minimum of 6 credits in lab science. The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

General Education Requirements for the AAPSY for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for the AAPSY

The degree requirements for this program are the following:

• Completion of a minimum of 60 credits.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Academic Progression Requirements for the AAPSY

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAPSY

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAPSY
COM 150 .................................................................3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

MAT 219 .................................................................3 credits

Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220 .................................................................3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100 .................................................................4 credits

Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The course emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 .................................................................3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

ETH 125 .................................................................3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

HIS 135 .................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

CRT 205 .................................................................3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Course Descriptions for the AAPSY - Track A

PSY 202 .................................................................3 credits

Foundations of Psychology
This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 220 .................................................................3 credits

Positive Psychology: What's Right With Me
How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.

PSY 230 .................................................................3 credits

Theories of Personality: I Think, Therefore Who Am I?
What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight in to the question of the self. Psychoanalytic, social, behav-
ioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240 ..................................................................................... 3 credits

The Brain, the Body, and the Mind: All Together Now

This course provides an introduction to the investigation of physiological and neurological basis for human behavior. The student will be able to study and discuss various influences on personality development, such as pre-natal maternal behavior; gender; nature versus nurture; brain development; genetic composition; sensory motor interactions; learning disabilities; drug impacts; and neurological diseases.

PSY 265..................................................................................... 3 credits

Psychology of Human Sexuality: What Turns You On and Why?

This course is a comprehensive view of the psychosocial and physiological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

Course Descriptions for the AAPSY - Track B

PSY 201..................................................................................... 3 credits

Foundations of Psychology

This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 220..................................................................................... 3 credits

Positive Psychology: What's Right With Me

How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be “free”? PSY 220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.

PSY 230..................................................................................... 3 credits

Theories of Personality: I Think, Therefore Who Am I?

What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight in to the question of the self. Psychoanalytic, social, behavioral traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.

PSY 240 ..................................................................................... 3 credits

The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.

Associate of Arts/Concentration in Human Services Management

The following Associate of Arts/Concentration in Human Services Management (AAHSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Human Services Management concentration focuses on providing a solid foundation for future workers in the industry. Some of the content is focused in the areas of human services organizations, roles of human services workers, public policy, multicultural practices, information technology, financial management, and regulatory and ethical issues. Some of the activities included in the concentration are creating care plans, developing alternative funding strategies, and determining the characteristics of good human services management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ahsm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAHSM
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAHSM
HSM 210 .................................................................................................3 credits

Human Services in the United States
This course is a foundation for studies of human services in the United States. It provides an overview of the evolution of American human services delivery systems, including historical perspectives, as well as current and future trends. It covers the role of human services workers, how needs are determined and met, and factors that affect the delivery of services such as theoretical perspectives, social policies, and government regulations. Community advocacy, prevention techniques, contemporary issues, and careers in the human services industry are also examined.
HSM 220 ................................................................................... 3 credits
Human Services Administration: So You Want to Help People
This course discusses the roles and responsibilities of administra-
tors in human services organizations. It covers recent studies
related to the changing contests of human services delivery, leader-
ship, organizational culture, human resource management, financial
management, strategic planning, working with boards, marketing and public relations, social entrepreneurship, partner-
ship, and collaboration.
HSM 230 ................................................................................... 3 credits
Ethical Issues in Human Services Organizations
HSM 230 explores the legal and ethical environments of human
service organizations. Students consider tools and traditions for
ethical decision-making, the role of the leader, and the role of orga-
nizational culture in sustaining a moral vision, and the design of
and need for legal and ethical oversight. Students analyze current
ethical and legal dilemmas and controversies through case studies
and debate.
HSM 240 ................................................................................... 3 credits
Public Policy Development in Human Services
This course focuses on the formation and execution of public pol-
cy and programs by government and private organizations within
human services. Emphasis is placed on evaluative and analytical
approaches for determining positive and negative characteristics of
policies and programs. Students will learn to analyze and critique
organizations and the policies and programs within those organi-
zations.
HSM 260 ................................................................................... 3 credits
Financial Management for Human Service Managers
This course focuses on the conceptual understanding and practice
of financial management as it applies to human service agencies.
Students complete the course with a better understanding of basic
accounting concepts, budgets and budgeting systems, and how to
create performance measures, and the ability to analyze financial
statements for the purpose of cost analysis and forecasting. Aspects
of setting fees, funding and risk management are also covered.
HSM 270 ................................................................................... 3 credits
Program Planning and Grant Proposal Writing in Human
Services
This course provides practical knowledge in program planning,
grant proposal writing, and program evaluation. Students will
examine the planning process from conceptualization to imple-
mentation and evaluation. Also discussed is how to locate private
and public funding for human service programs and agencies.
COM 150 ................................................................................... 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students
use the writing process to construct an expository essay with an
emphasis on coherence and correctness in written communication.
Students also conduct basic research for the expository essay.
Selected readings provide the basis for discussion regarding the
difference between fact and opinion. Grammar exercises focus on
verb tense and form, subject-verb and pronoun-antecedent agree-
ment, and pronoun case. Students also complete exercises covering
topic sentences, paragraph development, citations, and formatting
guidelines.
COM 220 ................................................................................... 3 credits
Research Writing

Students focus on gathering research, evaluating and documenting
sources, and developing a major research paper. Selected readings
prompt discussion regarding bias, rhetorical devices, arguments,
and counterarguments. Grammar exercises address commonly
confused words, modifiers, parallel structure, and sentence variety.
ETH 125 ................................................................................... 3 credits
Cultural Diversity
This course is designed to educate students about issues of race,
ethnicity, and gender in the United States by presenting historical
and modern perspectives on diversity.
CRT 205 ................................................................................... 3 credits
Critical Thinking
In this course, students develop the ability to think clearly and crit-
ically. Practice includes developing writing skills that enable stu-
dents to clearly present claims to support their conclusions and
avoid reinforcing biases. Students are given the opportunity to
analyze and discuss various types of media-including television,
Internet, and print-to determine which sources provide the most
reliable information. Topics addressed include the relationship
between critical thinking and clear writing, credibility of sources,
rhetorical devices, fallacies, unclear or misleading language, and
the characteristics of various types of arguments.
GEN 105 ................................................................................... 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich
society. Students will develop strategies for successful distance
learning, time management, and for managing the abundance of
information available in today's society. Students will also explore
the appropriate use of information in an academic environment.
Specific topics for the course include computing skills for distance
learning, online library use, academic honesty, and the
development of effective study skills.

Associate of Arts/Emphasis in Human Services
Management (Maryland-Online)

The following Associate of Arts/Emphasis in Human Services
Management (AAHSM) program may be offered at these University of
Phoenix campus locations: Online, depending on state of residence. The
availability of programs and emphases depend on student demand and
other factors. Not all programs may be available to all residents of all
states. Students may want to consider completing certain courses in the
Online classroom at Online rates if the program is available via the
Online modality in their state. Please contact your enrollment advisor for

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................................... 3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................................... 3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................................... 3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Human Services Management (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Human Services Management (AAHSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Human Services Management concentration focuses on providing a solid foundation for future workers in the industry. Some of the content is focused in the areas of human services organizations, roles of human services workers, public policy, multicultural practices, information technology, financial management, and regulatory and ethical issues. Some of the activities included in the concentration are creating care plans, developing alternative funding strategies, and determining the characteristics of good human
services management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahsm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Human Services Management -**

**Track A and B**

- HSM 210 ~...........................................................................3 credits
- Human Services in the United States
- HSM 220 ~...........................................................................3 credits
- Human Services Administration: So You Want to Help People
- HSM 230 ~...........................................................................3 credits
- Ethical Issues in Human Services Organizations
- HSM 240 ~...........................................................................3 credits
- Public Policy Development in Human Services
- HSM 260 ~...........................................................................3 credits
- Financial Management for Human Service Managers

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAHSM**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AAHSM for Arkansas Students**

- Communication Arts Requirement 6 credits
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
- Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
- Must include: MAT 219 and MAT 220
- Science & Technology Requirement 9 credits
  - (B Track must include: SCI 162)
- Must include a minimum of 6 credits in lab science.
  - The lab science requirements may also be satisfied with any science transfer coursework with a lab component.
- Social Science Requirement 9 credits
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
- Must include: HIS 135
- HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.
- Humanities Requirement 9 credits
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- Additional Liberal Arts Requirement 6 credits
  - (A Track must include: GEN 105)

(B Track must include: US 101 and FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

**General Education Requirements for the AAHSM for Minnesota Students**

- Communication Arts Requirement 6 credits
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
- Science & Technology Requirement 9 credits
  - (B Track must include: SCI 162)
- Social Science Requirement 9 credits
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
- Humanities Requirement 9 credits
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- Additional Liberal Arts Requirement 6 credits
  - (A Track must include: GEN 105)
  - (B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for the AAHSM**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  - Associate of Arts

**Academic Progression Requirements for the AAHSM**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
Human Services Administration: So You Want to Help People

This course discusses the roles and responsibilities of administrators in human services organizations. It covers recent studies related to the changing contexts of human services delivery, leadership, organizational culture, human resource management, financial management, strategic planning, working with boards, marketing and public relations, social entrepreneurship, partnership, and collaboration.

HSM 230 .................................................................................. 3 credits

Ethical Issues in Human Services Organizations

This course explores the legal and ethical environments of human service organizations. Students consider tools and traditions for ethical decision-making, the role of the leader, and the role of organizational culture in sustaining a moral vision, and the design of and need for legal and ethical oversight. Students analyze current ethical and legal dilemmas and controversies through case studies and debate.

HSM 240 .................................................................................. 3 credits

Public Policy Development in Human Services

This course focuses on the formation and execution of public policy and programs by government and private organizations within human services. Emphasis is placed on evaluative and analytical approaches for determining positive and negative characteristics of policies and programs. Students will learn to analyze and critique organizations and the policies and programs within those organizations.

HSM 260 .................................................................................. 3 credits

Financial Management for Human Service Managers

This course focuses on the conceptual understanding and practice of financial management as it applies to human service agencies. Students complete the course with a better understanding of basic accounting concepts, budgets and budgeting systems, and how to create performance measures, and the ability to analyze financial statements for the purpose of cost analysis and forecasting. Aspects of setting fees, funding and risk management are also covered.

COM 150 .................................................................................. 3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .................................................................................. 3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety. MAT 219. .................................................................................. 3 credits

Introduction to College Algebra

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.
MAT 220 ................................................................. 3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100 ................................................................. 4 credits

**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 ................................................................. 3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

ETH 125 ................................................................. 3 credits

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

HIS 135 ................................................................. 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

CRT 205 ................................................................. 3 credits

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Bachelor of Science in Psychology**

The following Bachelor of Science in Psychology (BS/P) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Psychology program provides students with a strong foundation in general psychology. Students will gain insight into the cognitive and affective processes that underlie the individual human experience through an analysis of a variety of theoretical approaches related to human development and behavior. The courses in this program do not have a clinical emphasis and do not lead to professional licensure; instead, they are designed to provide supervisors, managers and other professionals with greater skills in critical thinking, communication, collaboration, and information utilization through the enhanced understanding of human psychology.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bs-p.

Social Psychology
Completion of a minimum of 120 credits that include the Degree Completion Requirements for the BS/P.

Additional Admission Requirements for the BS/P

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Completion Requirements for the BS/P

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 51 upper division credits.
  • All students must meet the General Education areas approved by the university.
  • A minimum grade point average (GPA) of 2.0.
  • All students must complete the minimum number of credits required by their degree program.

General Education Requirements for the BS/P

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits

Humanities Requirement(s) 6 credits

Mathematics Requirement(s) 6 credits

Science & Technology Requirement(s) 6 credits

Must include at least three (3) credits in the physical or biological sciences

Social Science Requirement(s) 6 credits

Interdisciplinary Requirement(s) 18 credits

Additional Liberal Arts Requirement(s) 6 credits

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance.

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BS/P for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits

Social Science Requirement(s) 9 credits

Must include HIS 145 or POL 215 or equivalent transfer coursework with U.S. History or Government content.

Humanities Requirement(s) 9 credits

Mathematics Requirement(s) 6 credits

Must include MTH 220.

Science & Technology Requirement(s) 9 credits

Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Additional Liberal Arts Requirement(s) 6 credits

Interdisciplinary Requirement(s) 9 credits

Students who lack .67 or fewer general education credits may use excess interdisciplinary or elective credits to waive the balance.

Students must use excess interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BS/P

All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements. (e.g., taking COM 372 instead of COMM 215)

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework, certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BS/P

Students in this program may waive a maximum of 24 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the required course of study may not be waived: GEN 300, PSY 490

Course Descriptions for the BS/P

GEN 300 ...................................................................................3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

PSY 300 .....................................................................................3 credits

General Psychology

General Psychology is a survey course which introduces the student to the major topics in scientific psychology as applied to human behavior. Applications of these principles will be made to the human experience.

PSY 310 .....................................................................................3 credits

History and Systems in Psychology

The purpose of this course is to familiarize the student with the various methods of inquiry, terminologies, and theoretical systems that comprise the history of psychology. A broader view is used to introduce the modern era of psychology and its use. These include: structuralism, functionalism, Gestalt, behaviorism, psychoanalysis, and phenomological/existential approaches.

PSY 355 .....................................................................................3 credits

Motivational Processes in Human Psychology

This course examines theories and research results pertaining to the structures (self, person, role, and event schemas) and processes (expectations, attributions, and inferences) underlying self and person perception.

PSY 315 .....................................................................................3 credits

Statistical Reasoning in Psychology

This is an introductory course in applied statistics, with particular emphasis in psychology. Both descriptive and inferential statistics are included. In addition, this course provides the basic statistical background and understanding needed.

PSY 340 ........................................................................................3 credits

Biological Foundations in Psychology

This course is designed to expose you to the underlying physiological mechanisms of behavior. Physiological psychology is a complex but fascinating field of study. It explores the relationship between our biological systems and behavior. Structure and function of the nervous system from the neuron to the brain, as well as the interrelationships between the brain and such behaviors as eating, sleeping, learning, memory, emotion, and mental disorders will be discussed using examples from the behavior of both humans and lower organisms.

PSY 360 ........................................................................................3 credits

Cognitive Psychology

This course will present an overview of cognitive psychology and its findings, theories, and approach. Cognitive psychology deals with how we acquire and use knowledge so the course will cover topics such as perception, attention, memory, language, reasoning, and problem solving.

PSY 375 ........................................................................................3 credits

Lifespan Human Development

This course focuses on a historical view of human development leading to the current lifespan approach to form an understanding of the developing individual, and it explores influences on human development, ranging from individual models to cross-cultural groups. Emphasis is given to personality, social, intellectual, and physical development, and the major theories used to describe how people change throughout their lifespan.

PSY 390 ........................................................................................3 credits

Learning and Cognition

This course concerns the study of learning from the most basic associationistic ideas to complex cognitive behaviors such as problem solving and thinking. Various ideas regarding the nature of the mind are presented along with the fundamental concepts of learning and conditioning. Strengths and weaknesses of the memory system are discussed as they relate to higher cognitive processes such as language, problem solving, and eyewitness identification. Neurophysiological correlates of cognitive phenomena and memory disorders are also discussed.

PSY 400 ........................................................................................3 credits

Social Psychology

This course provides a unified view of the field of social psychology organized around the concepts of social influence and power and exchange in social life and explores in-depth human thoughts, feelings, and actions as influenced by other people. Specific topics include socialization, perception of self and others, pro-social and anti-social behavior, attitudes, interpersonal attraction, social influence, and group behavior.

PSY 405 ........................................................................................3 credits

Theories of Personality

This course surveys the field of personality from a scientific perspective, examining the general approaches to understanding personality. The key theorists and concepts associated with each perspective are highlighted, along with the strengths and limitations of the different approaches.

PSY 410 ........................................................................................3 credits
Abnormal Psychology
This course is designed to provide students with an introduction to theories and research concerning abnormal behavior (psychopathology). The course will address such topics as incidence (frequency) of abnormal behavior of various types; how abnormal behaviors are classified into various diagnostic categories; the etiologies (causes) of psychological disorders; and the variety of methods employed in the treatment of abnormal behavior.

PSY 435 ................................................................. 3 credits

Industrial/Organizational Psychology
This course is designed to introduce the student to the field of industrial/organizational psychology. The emphasis is on the psychological principles and how they can be applied in a work context. Topics will include legal issues in employment, selection of employees, performance appraisal, training, leadership, motivation, and group behavior.

PSY 450 ................................................................. 3 credits

Diversity and Cultural Factors in Psychology
This course is a study of the issues and influences related to gender, sexual orientation, and the major racial/ethnic and cultural groups in the United States and how they affect theoretical and research paradigms in psychology and clinical and counseling practices. The course expands the students’ frame of reference concerning human diversity and applies this knowledge to counseling and research issues in psychology.

PSY 460 ................................................................. 3 credits

Environmental Psychology
In this course students will learn about the interaction between people and their environments; how our behavior affects our environment, and how that environment, in turn, influences our own behavior. An emphasis will be placed on developing behavioral solutions for environmental problems.

PSY 475 ................................................................. 3 credits

Psychological Tests and Measurements
This course will cover the basic principles, research, and theories on testing and measurement of psychological constructs. It is expected that students complete the course with knowledge of various techniques for psychological testing; a familiarity of several professionally developed tests; the ability to develop, administer, and interpret certain tests; and knowledge of measurement theory which includes reliability and validity.

PSY 480 ................................................................. 3 credits

Elements of Clinical Psychology
This course is intended to provide the beginning psychology student with an overview of the theory and practice of clinical and counseling psychology. The course includes reference to major theories of personality, assessment, and psychotherapy. Topics include psychodynamic, cognitive/behavioral, and biological theories of normal and abnormal psychological processes, and the assessment of behavior, abilities, and personality. Therapies covered include a variety of psychoanalytic approaches, and humanistic, biological, cognitive/behavioral, and child and family therapies.

PSY 490 ................................................................. 3 credits

Capstone Course in Psychology
This is the capstone course for undergraduate psychology students. The course provides students with the opportunity to integrate and apply learning from their psychology program of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

COMM 215 ............................................................. 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ............................................................... 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ............................................................... 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

MTH 220 ............................................................... 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ............................................................... 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ............................................................... 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual
The Bachelor of Science in Human Services

The following Bachelor of Science in Human Services (BSHS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The BSHS program curriculum at University of Phoenix employs an interdisciplinary approach for assimilating theory, knowledge, skills and core competencies of today’s human service professional. The conceptual framework of the program draws from a range of human service domains such as counseling, biopsychosocial development, human systems and social change, social work, psychology, and management theories. The program is designed with experiential components, integrated within the academic foundation, to provide students with experience as service providers in a range of human service settings in both private and public sectors. The Human Services program’s interdisciplinary design builds core skills and competencies based on established methods for delivering a variety of direct service roles in the wide-ranging field of human services. In addition to completing core curriculum courses, students must declare and complete courses in an area of concentration selected from the following: 1) Management, 2) Addictions, 3) Family and Child Services, 4) Gerontology. Upon graduation from the program students will be qualified for Registry as Mental Health Facilitators with the National Board for Certified Counselors-International and prepared academically to sit for the Human Services-Board Certified Practitioner examination administered by the Center for Credentialing and Education. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bshs.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSHS
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- No work experience and/or current employment is required for this program.

Degree Requirements for the BSHS
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 60 upper division credits.
  - A minimum of 94 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - Students will declare a concentration at the time of enrollment.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
Bachelor of Science in Human Services

Academic Progression Requirements for the BSHS
All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to enroll in the First-Year Sequence:
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.

University of Phoenix, 2013-2014

COLLEGE OF SOCIAL SCIENCES
interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Additional Residency Requirements and Course Waivers for the BSHS
Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. The following courses in the Required Course of Study may not be waived: BSHS 305, BSHS 415, BSHS 415O, BSHS 475, BSHS 485.

Field Experience for the BSHS
The BSHS programs include two field experience courses: BSHS 415 and BSHS 475. Each field experience course is 15 weeks in length. These courses require at least 175 hours of field experience, or an average of 12 hours per week committed to a community human services placement site. Weekly seminars (2 hours per week) are provided to offer support and supervision of the student activities during their field experience.

Course Descriptions for the BSHS
BSHS 305 ..................................................................................3 credits

Historical Development of Human Services: An Introduction
In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

BSHS 325 ..................................................................................3 credits

Human Systems and Development
Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

BSHS 335 ..................................................................................3 credits

Ethics and Values for Human Service Professionals
In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 ..................................................................................3 credits

Diversity and Special Populations
The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BSHS 355 ..................................................................................3 credits

Delivery of Human Services: Theory and Practice
This course facilitates identification of specific human needs and conditions, which are the core of the human services profession, and the range of human service delivery systems that address them. The conditions most often encountered with addictions and chemical dependency, aging populations, crime, mental and physical illnesses, poverty, delinquency and developmental disabilities will be explored in depth. On completion of this course students will demonstrate knowledge of theory and skills necessary for employing the major models of human service delivery at individual, group and community levels with attention to global influences effecting social policy and the political and ideological perspectives on human services delivery internationally. Students will complete Module 2 of the MHF training.

BSHS 375 ..................................................................................3 credits

Information Management Systems & Technology in Human Services
This course provides the foundation for appropriate integration and use of information management systems crucial to the delivery of human services. Skills developed include methods of obtaining, organizing, analyzing, evaluating, maintaining and disseminating information. Domains addressed in the course involve the application of confidentiality guidelines and the appropriate use of client data, utilizing technology to assist in conducting needs assessment and basic program evaluation, and accessing research literature for advocacy and education initiatives. Basic computer skills such as word processing and the use of spreadsheets for maintaining a database are addressed along with a survey of assistive technology available for a range of special needs populations.

BSHS 415O ..................................................................................0 credits

Orientation to Field Experience
This course will provide an overview of the expectations and requirements for a successful Field Experience. Students will be provided with information regarding field placement with approved sites, documentation of field experience, and requirements for supervision. Orientation is offered well in advance of the first Field Experience course, BSHS/ 415 to provide students ample time for field site selection. (0 credits) Prerequisite: BSHS 375. May not be taken as Directed Study.

BSHS 385 ..................................................................................3 credits

Interpersonal Communication & Interviewing Skills
Human Services delivery requires expertise in communicating well with a wide range of people and groups. A key component of effective communication is the development of genuine positive regard for others, skill in establishing empathic relationships, and obtaining information needed for effective intervention with successful outcomes. This course provides knowledge of theory and practice in interpersonal communication. Students will learn skills for resolving conflict, establishing positive rapport, assisting clients in becoming clear about goals and focusing on outcomes, and practicing professional and ethical behaviors in all client interactions. Students will complete Modules 3, 4, 5 and 6 of the MHF training.

BSHS 395.................................................................................. 3 credits

Client Assessment and Plan Development
This course enables students to understand the process of conducting needs assessments, developing an action plan for services, implementing the action plan, and subsequent evaluation of outcomes. Students will learn the process of developing goals and measurable objectives, designing an individualized program for clients, implementing the program, and using ongoing assessment and evaluation of results to revise or modify individualized programs. Students will demonstrate competency in identifying needs, and mobilizing resources and necessary supports for assisting clients in meeting goals. Students will complete Modules 10, 11 and 12 of the MHF training.

BSHS 405.................................................................................. 3 credits

Intervention, Direct Service Delivery & Case Management
This course provides an overview of the role of the human service worker as a change agent with a focus on the application of theory and skills necessary for providing interventions and direct service delivery to individuals and groups. Specifically, students will develop competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Additionally, students will learn how to access resources, use consultation, and make referrals. Students will complete Module 16 of the MHF training.

BSHS 415.................................................................................. 3 credits

Field Experience I
This is a 15-week course requiring at least 175 hours of field experience, or an average of 12 hours per week committed to a field placement site. Students will work in a human services setting under the supervision of a qualified professional. In addition to providing direct service, students will attend a weekly 2-hour class for faculty supervision and evaluation of core development. Typical activities of a field placement involve employing skills acquired so far in the program progression: conducting interviews, working directly with clients and groups, developing action plans and documenting. Students will complete Modules 13 and 14 of the MHF training.

BSHS 425.................................................................................. 3 credits

Administration & Management of Human Service Programs
Administration and management involve components of indirect services associated with systematic delivery of direct human services. Students will learn theories of strategic planning, human resource management, strategies for evaluation and planning the development of human service organizations, elements of agency operations, risk management, budgeting, and fiscal acquisition through grant writing and contract negotiation. The emphasis of this course is on leadership development, and managing professional and volunteer staff. Additional content areas addressed in the course involve advocacy efforts and grass roots movements focused on constituency building.

BSHS 435.................................................................................. 3 credits

Research & Statistics in Human Services
This course provides an overview of research methods and appropriate use of statistics in the social sciences. A component of program development and evaluation involves knowledge of theory related to understanding research and statistics in the human services arena. The scientific method, research tools, data collection, and analysis will be reviewed. Understanding research and developing the ability to critically evaluate published research reports will be emphasized. Statistical concepts will be reviewed, and students will gain a conceptual understanding of underlying principles of research and statistical analysis. Statistical software will be introduced, and students will compute descriptive and inferential statistical analyses. Students will practice developing research designs and conducting statistical analyses.

BSHS 445.................................................................................. 3 credits

A Survey of Crisis and Mental Health Issues and Interventions
In this course students explore the relationship between mental health and human service delivery systems in the United States as well as global initiatives for improving the international service-base. Students will learn to define and describe the nature and process of crisis and the impact of trauma-causing events on the mental health of diverse clients. Students will compare and contrast the range of service delivery modalities and networks, including the operation of emergency management systems, and will demonstrate understanding of roles and skills needed when services are provided in emergency and crisis situations. The course facilitates development of skills necessary for assessing and managing suicide risk. Students will complete Module 15 of the MHF training.

BSHS 455.................................................................................. 3 credits

Working With Addictions
This course introduces students to the biology of addiction, including brain reward mechanisms, the role of environment and genetics, psychodynamics, and the impact of addiction on individuals, families, and communities. The roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis are emphasized in the course. The course examines major models of conceptualizing and integrating prevention, intervention, rehabilitation and maintenance/relapse prevention. Students will learn strategies for accessing supportive measures and case management processes for developing wrap-around action plans for service delivery to individuals and groups with addiction and chemical dependence related issues.

BSHS 465.................................................................................. 3 credits

Professional Development and Identity
In this course students will explore processes for enhancement of self-awareness and the effect of personal style and personality on human service delivery. Students will examine personal values, cultural differences and biases, individual philosophies and belief systems then integrate this understanding of self into the development of an identity as a human service professional. Students will demonstrate strategies for cultivating self-awareness and modeling self-care. Students will investigate the value of membership in supportive professional organizations such as the National Organization for Human Services (NOHS). Students will complete Module 17 of the MHF training.
Field Experience II

This is a 15-week course requiring at least 175 hours of field experience, or an average of 12 hours per week committed to a community human services placement site. Weekly seminars (2-hours per week) are provided to offer support and supervision of the student activities during their field experience. Students will learn to present issues for supervision. Each student will create a portfolio of his or her competencies and accomplishments for career purposes. This course requires accumulation of the total 350 service hours necessary for graduation from the program (the first 175 hours were compiled in BSHS/415, FE I) and demonstration of a professional attitude and disposition as evaluated in 8 domains: Professionalism, Personal Growth, Sensitivity, Flexibility, Emotional Maturity, Group Membership Skills, Accepting Feedback, and Relationship with Authority. Students will complete Modules 7 and 18 of the MHF training.

BSHS 485 ..................................................................................3 credits

Capstone: Advocacy and Creating Social Change

This course is the culmination of the BSHS program with a focus on the basic tenets of client advocacy efforts and the processes of creating social change. As human services professionals, students will demonstrate strategies for using their knowledge and skills for understanding and helping clients. The Capstone Project asks students to develop an advocacy action plan that addresses a local need they have determined utilizing a community needs assessment. Students will complete Module 19 of the MHF training.

COMM 215 ..............................................................................3 credits

Essentials of College Writing

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ...................................................................................3 credits

Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ...................................................................................3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

Course Descriptions for the Concentration in Addictions

BSHS 456 ..................................................................................3 credits

Addiction Interventions for Human Service Workers

This course has a focus on familiarizing students with fundamental interventions used in drug and alcohol treatment settings. Students will conduct an investigation of 12-step, alternative support group, secular organization, therapeutic community, and structured in-patient/outpatient approaches to intervention and treatment. Students will be prepared to apply basic skills for assessing and evaluating client needs, making referrals, and working as a colleague in groups of professional service providers. An exploration of commonly used evaluation instruments for assessing level of care is underscored along with tenets of co-facilitation of treatment groups and assessing special population needs. Students will demonstrate foundational knowledge and understanding of guidelines for treatment as outlined by the Substance Abuse and Mental Health Services Administration and the American Society of Addiction Medicine’s Patient Placement Criteria.

BSHS 457 ..................................................................................3 credits

Codependence & Working with Families

In this course students will demonstrate an understanding of the impact of controlling behaviors and supporting dysfunction in relation to addictions and families. Theories of codependency are explored as a disease of loss of selfhood and an addiction resulting from an imbalance of inner and outer self-awareness. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate understanding and skill in case management and referral for treatment in addition to assisting clients with recovery goals, self-awareness, self-acceptance, self-responsibility and self-reflection with a focus on prevalence, and consequences of codependency in families.

BSHS 458 ..................................................................................3 credits

Action Planning, Relapse Prevention & Aftercare

This course provides advanced skills development for the addiction and chemical dependency human service worker. Students will conduct an in-depth evaluation of various treatment approaches employed when preparing action plans with clients. An investigation of comprehensive treatment programs, community action programs, school-based programs, and public health approaches to relapse prevention and aftercare strategies will provide students an opportunity to develop and present an individualized program for a fictional client. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

Course Descriptions for the Concentration in Family and Child Services

BSHS 406 ..................................................................................3 credits

Family and Social Systems: Contemporary Trends and Issues

Theories of public and private families, as differentiated by societal interaction, are explored with a focus on family systems as they exist within social systems. Micro and macro family environments
Family Violence Across the Lifespan: A Multi-Strata Problem

This course explores the phenomenon and social problem of family violence with both macro- and micro-theory explanations and an in-depth literature review. Students will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Attention is focused on professional and social responses that include clinical interventions, educational initiatives within schools, and responses to the disclosure of family violence in agency and private settings. Skills to develop a human services approach to preventing family violence are enhanced in this course; students are required to outline their own personal and professional roles in the movement to end family violence.

Childhood Abuse and Neglect

This course focuses on the segment of family violence involving physical child abuse, child sexual abuse and exploitation, child neglect and psychological maltreatment of children. Students will examine the scope of these problems and the characteristics of both victims and perpetrators while conducting a search for patterns and dynamics of each distinction. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases. Areas of focus involve various forms of each category including indicators for the range of abuses on an international scale with child labor, slavery, and child prostitution issues.

Course Descriptions for the Concentration in Gerontology

Social Systems and Aging

This course traces the origins of social systems for the aging around the world, followed by an examination of program types, the effects on retirement, demographic changes, political sustainability of social programs for the aging, institutional settings and labor supply. Students will define and measure population aging by comparing and contrasting U.S. data with other countries by exploring elderly dependency and age-dependency ratios. Additional topics for discussion and demonstrated understanding by students include: the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology.

Care for Aging Populations

The course is an exploration of various living environments for aging and elderly including retirement communities, living with relatives and/or children, independence, assisted living, the goodness-of-fit between lifestyle and housing, and managing long-term care. Students will demonstrate knowledge of segregated versus age-integrated residential settings and the impact on residents. An in-depth investigation of care-related issues across the growing aging population will include topics such as chronic illness, subsidized and un-subsidized healthcare related expenses, and needs assessment protocol. The basic model and principles of integrative, interdisciplinary healthcare is presented as the foundation for a team approach to the development of intervention plans, strategies of care, and implementation.

Grief, Loss and End of Life Issues

In this course students will learn strategies for facilitating the transition from curative measures to palliative care for the relief of emotional/psychological distress, pain, and a range of physical symptoms. Core competencies involve demonstrated learning of methods for anticipating the demands of end-of-life caregiving including advanced directives, 24/7 services, hospice case management, care and placement options, and easing the common challenges as individuals and families move from care and grief modalities to acceptance and healing. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

Course Descriptions for the Concentration in Management

Human Services Management: Theory & Practice

This course traces the historical context of human services management as it relates to current theory and practice. Students will examine strategies for managing an integrated, diverse workforce and prepare to be generalists, understanding the scope of leading an organization with commonly encountered agency pressures. Students will employ learned management practices to inspect, distinguish, and measure the important attributes of program management and supervision. By demonstrating a basic understanding of organizational behavior and the challenges of embracing workforce diversity, dynamic systems change, performance evaluation and effective communication with a range of Para-professional and professionals, students will explore their roles as managers in the growing human services field.

Critical Thinking Skills in Management Decision Making

This course will familiarize students with strategies related to making sustainable decisions. Techniques used to make decisions, solve problems and lead environments will be explored. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Specific details to human services are considered and methods for service delivery to needs-based populations and the workers who serve in this capacity. Students are introduced to, and will demonstrate understanding of, the Six Sigma elements and five-step approach for process improvement.

Human Services Program Design & Proposal Writing

This course introduces students to the purposes, challenges and benefits of program design and grant writing. Students will review components of each and conduct a needs assessment and develop
a business case for implementation on program design. Special attention will be given to research for finding available funding sources and how to form important partnerships. Students explore the methods of research using quantitative, qualitative and mixed-method program design concepts. Students will examine concepts of logic models and their impact on people, processes, and conditions related to program design. Using a specific framework, learners will uncover funding possibilities and use tools to prepare for the rigor related with grant writing. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.

**Associate Programs Pathways Program**

Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:
- Pathways Non-degree Application
- High School Junior or Senior Standing
- Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
- Parent or guardian consent
- $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

*Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.*
The University of Phoenix School of Business works closely with other academic colleges to provide and administer academic courses in other business related fields. In cooperation with the College of Humanities and Sciences, the University of Phoenix School of Business provides select environmental sustainability courses in the Environmental Sustainability concentration. The school also works cooperatively with the College of Humanities and Sciences to give breadth to the undergraduate learning experience through the integration of general education and professional coursework.

**Associate of Arts/Concentration in Accounting**

The following Associate of Arts/Concentration in Accounting (AAACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associates of Arts in Accounting concentration focuses on the role of accounting in business strategy, financial statements, cost information, economics, management, and ethical issues. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaacc.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Accounting - Track A and B**

- **ACC 220 ~** Survey of Accounting: The Maze of Numbers 3 credits
- **ACC 225 ~** Financial Accounting 3 credits
- **ACC 260 ~** Accounting Ethics: Keeping it Clean 3 credits
- **FIN 200 ~** Introduction to Finance: Harvesting the Money Tree 3 credits
- **ACC 230 ~** Accounting Information Systems 3 credits
- **ACC 250 ~** Financial Reporting: Peeking Under the Financial Hood 3 credits

**Additional Liberal Arts Requirement** 3 credits

**Interdisciplinary Requirement** 9 credits

**Degree Requirements for AAACC**

- **High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.**
- **Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.**

**General Education Requirements for the AAACC**

- **Communication Arts Requirement** 6 credits
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- **Mathematics Requirement** 6 credits
- **Science & Technology Requirement** 6 credits
  - (A Track must include: 3 credits in the physical or biological sciences)
  - (B Track must include: SCI 162)
- **Social Science Requirement** 6 credits
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
- **Humanities Requirement** 6 credits
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- **Additional Liberal Arts Requirement** 3 credits
  - (A Track must include: GEN 105)
  - (B Track must include: US 101)
- **Interdisciplinary Requirement** 9 credits
  - (B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**University of Phoenix, 2013-2014**

**UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS**

- **Applicants must be at least 16 years of age at the time of application.**
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
   Associate of Arts

**Academic Progression Requirements for the AAACC**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

### Additional Residency Requirements and Course Waivers for the AAACC

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

#### Course Descriptions for the AAACC

**ACC 220 .................................................................3 credits**

**Survey of Accounting: The Maze of Numbers**

Every business depends on its accountants to organize and maintain financial information. Accountants translate the maze of numbers most people see into valuable information that keeps a company going. This course introduces students to the accounting profession. It covers the role accounting plays in business and career options in accounting. Students learn the fundamentals of accounting principles and the accounting cycle.

**ACC 225 .................................................................3 credits**

**Financial Accounting**

Financial accounting communicates economic information and serves as a tool for business decision making. Through financial accounting, accountants track how money circulates in an organization. This course provides an understanding of the fundamental principles of double entry accounting as applied to practical business situations. Emphasis is given to the following: debit and credit rules of accounting, T-accounts, journalizing transactions, adjusting entries for revenue and expense items, inventories, internal control with emphasis on cash, and accounting information systems. Students will be able to prepare and use the income statement, balance sheet, and statement of cash flows.

**ACC 260 .................................................................3 credits**

**Accounting Ethics: Keeping it Clean**

Businesses’ accounting practices are under heightened scrutiny following corporate scandals in recent years. Accountants have a legal and ethical responsibility to follow the law and standard accounting practices as they document their companies’ finances. The course is an introductory level course in ethics, focusing on the types of situations that pose ethical problems in business. An attempt will be made to help the student develop an ethical framework which will allow the student to address ethical issues in the business world. Current trends in accounting ethics, including the Sarbanes Oxley regulations and the ethical requirements for certified public accountants are emphasized.

**FIN 200 .................................................................3 credits**

**Introduction to Finance: Harvesting the Money Tree**

This course gives students an overview of finance concepts, terminology, and principles. It is an introduction to the role of finance in the business world. Topics covered include the relationship between finance and accounting, careers in finance, basic financial analysis and planning techniques, financial ratios, profit, cash flow, and sources of business financing.

**ACC 230 .................................................................3 credits**

**Financial Reporting: Peeking Under the Financial Hood**

In this course, students will study how to analyze financial statements and methods used to value companies. Financial reports help managers choose between business paths. They also help investors and analysts evaluate the financial health of companies. This course is a practical means of discovering how financial data are generated and their limitations; techniques for analyzing the flow of business funds; and methods for selecting and interpreting financial ratios. It also presents analytical tools for predicting and testing assumptions about a firm’s performance.

**ACC 250 .................................................................3 credits**

**Accounting Information Systems**

Accountants today have put aside paper and pencil and taken advantage of advances in technology. Specialized software has made accounting transactions and reporting more dynamic and efficient. In this course, students will understand the role of accounting information systems in organizations. The course covers the different types of accounting systems used for the collection, organization, and presentation of information. Using accounting software, the students will explore how accounting information systems are used to assist management in decision-
making processes. Emphasis will also be placed on the internal controls that should be included in an accounting information system.

COM 150 ............................... 3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ............................... 3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ............................... 3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ............................... 3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ............................... 3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Accounting Foundations

The following Associate of Arts/Concentration in Accounting Foundations (AAACCF) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts curriculum provides a foundation and overview within the academic disciplines of communication arts, social sciences, mathematics, life sciences, and the humanities. Instruction focuses on the development of student skills in writing, critical thinking, and information utilization, as well as foundational competencies in the selected discipline. The completion of an Associate of Arts degree represents an important milestone for many students as they pursue their educational goals.

The Associates of Arts in Accounting Foundations concentration focuses on the role of accounting in business strategy, accounting communications, accounting information systems, management, financial statements, and cost information. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

Principles of Accounting I

XACC 291 .............................................. 3 credits

Principles of Accounting II

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the AAACCF

• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body; GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
General Education Requirements for the AAACCF
Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)
Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for the AAACCF
• Completion of a minimum of 60 credits.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum program grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts.

Academic Progression Requirements for the AAACCF
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General Education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
• ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAACCF
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAACCF
BUS 210 ..........................................................3 credits
Foundations of Business
In this course students will explore the foundations of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XMGT 230 ..........................................................3 credits
Business Communication for Accountants
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

XMGT 230 ..........................................................3 credits
Accounting Information Systems
This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

XMGT 230 ..........................................................3 credits
Management Theory and Practice
This course explores the rich field of management in theory and
Critical Thinking
In this course, students will develop the ability to think both clearly and critically. Practice includes developing writing skills that will enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students will be given the opportunity to analyze and discuss various types of media—including television, cinema, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

Business Communication for Accountants
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students
will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

XACC 210 .......................... 3 credits

Accounting Information Systems
This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

XACC 290 .......................... 3 credits

Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

XMG 230 .......................... 3 credits

Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

XACC 291 .......................... 3 credits

Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

COM 150 .......................... 3 credits

Effective Essay Writing
Students develop academic writing skills. The emphasis is on coherence and correctness in written communication as students use the writing process to craft an expository essay. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense, subject-verb and pronoun-antecedent agreement, and pronoun case.

COM 220 .......................... 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

CRT 205 .......................... 3 credits

Critical Thinking
In this course, students will develop the ability to think both clearly and critically. Practice includes developing writing skills that will enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students will be given the opportunity to analyze and discuss various types of media—including television, cinema, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

ETH 125 .......................... 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

GEN 105 .......................... 3 credits

Skills for Learning in an Info Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Additional Admission Requirements for the AAACCFC

- Any student planning to complete both an associate of arts degree and a baccalaureate degree must complete all 60 required credits of the associate degree and meet admission requirements for their chosen degree before enrolling in any University baccalaureate degree programs, courses, or University electives.

Additional Residency Requirements and Course Waivers for the AAACCFC

- Students must complete the concentration courses, COM 150 and CRT 205 prior to enrolling in any other general education or interdisciplinary courses.

Academic Progression Requirements for the AAACCFC

- Students must complete the concentration courses, COM 150 and CRT 205 prior to enrolling in any other general education or interdisciplinary courses.

Course Descriptions for the AAACCFC

**BUS 210C**

This course introduces students to the foundations of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XACC 290C

In this course students will explore the foundation of business communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

**XACC 290C**

**Accounting Information Systems**

This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

General Information for the AAACCFC
• The Certificate Track associates programs are designed to be an
  option for students to earn a certificate en-route to earning the
  associates degree.
• Students who completed a certificate in its entirety and who
  later choose to enroll in an associates program with a emphasis
  in the same area of focus as the completed certificate will be
  required to enroll in the Certificate Track and will not earn a
  second certificate en-route to completing the associates
  program.
• Any student planning to complete both an associate of arts
  degree and a baccalaureate degree must complete all 60 required
  credits of the associates degree and meet admission
  requirements for their chosen degree before enrolling in any
  University baccalaureate degree programs, courses, or
  University electives.

Additional Admission Requirements for the AAACCFC
• Applicants must be at least 16 years of age at the time of
  application.
• High school graduation from an institution that holds state
  approval to confer high school diplomas or are accredited or a
  candidate for accreditation at the time the student attended by
  an acceptable accrediting body, GED certificate or CHSPE
  (California High School Proficiency Examination) certificate.

General Education Requirements for the AAACCFC
Communication Arts Requirement 6 credits
Must include COM 150 and COM 220
Mathematics Requirement 6 credits
University of Phoenix math courses must be MAT 116 or higher to satisfy requirement.

Science & Technology Requirement 6 credits
Must include 3 credits in the physical or biological sciences

Humanities Requirement 6 credits
Must include CRT 205

Social Science Requirement 6 credits
Must include ETH 125

Additional Liberal Arts Requirement 3 credits
Interdisciplinary Requirement 9 credits

All undergraduate students are required to complete the minimum general education credits required by their program version.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AAACCFC

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D" or higher.
- A minimum grade point average (GPA) of 2.0.
- Students may earn a certificate in Bookkeeping en route to completing the associates degree. Students may apply for certificate conferral upon successful completion of the emphasis courses.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Academic Progression Requirements for the AAACCFC

- Students must complete the emphasis courses, COM 150 and CRT 205 prior to enrolling in any other general education or interdisciplinary courses.

Additional Residency Requirements and Course Waivers for the AAACCFC

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. The following course in the Required Course of Study may not be waived: BUS 210C

Course Descriptions for the AAACCFC

BUS 210C ................................................................. 3 credits

Foundations of Business
In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XACC 210C ................................................................. 3 credits

Accounting Information Systems
This course introduces accounting students to the use of technology and real-world applications. Areas of study include funda-
reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**Associate of Arts/Concentration in Hospitality, Travel and Tourism**

The following Associate of Arts/Concentration in Hospitality, Travel and Tourism (AAHTT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Hospitality, Travel, and Tourism concentration provides content and practical application in an array of food service, lodging management, and tourism industry careers. The courses emphasize the leadership competencies and knowledge that provide the foundation of management practices valued in the hospitality arena. The Hospitality, Travel, and Tourism associate degree program is also planned to prepare the student for further study in hospitality or related programs at the undergraduate level. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahtt.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAHTT**

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**General Education Requirements for the AAHTT**

**Communication Arts Requirement 6 credits**

(ATrack must include: COM 150 and COM 220)

(BTrack must include: COM 155 and COM 156)

**Mathematics Requirement 6 credits**

Science & Technology Requirement 6 credits

(ATrack must include: 3 credits in the physical or biological sciences)

(BTrack must include: SCI 162)

Social Science Requirement 6 credits

(ATrack must include: ETH 125)

(BTrack must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits

(ATrack must include: CRT 205)

(BTrack must include: HUM 111)

Additional Liberal Arts Requirement 3 credits

(ATrack must include: GEN 105)

(BTrack must include: US 101)

Interdisciplinary Requirement 9 credits

(BTrack must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for AAHTT**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts.

**Academic Progression Requirements for the AAHTT**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.

• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAHTT

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAHTT

HTT 200 ....................................................................................3 credits
Hospitality: Food, Shelter, and Fun Away From Home

This course is an overview of the history, current trends, and general organizational structure of the hospitality industry. Additionally, the course covers topics such as recreational entertainment, economic impact of hospitality, and service standards. The course also gives students the opportunity to examine careers in tourism, foodservice, and lodging industries.

HTT 210 ....................................................................................3 credits
Travel & Tourism: For Work, For Pleasure, Forever Enriching

This course introduces the tourism industry and its major components such as the travel mart, surface travel, air travel, business travel, cruises, and recreation. It covers current issues in tourism and their effect on the hospitality industry as a whole including economic, political, and cultural forces, and quality of life impacts on host locals. Career opportunities within travel and tourism are also discussed.

HTT 220 ....................................................................................3 credits
Information Technology in Hospitality, Travel and Tourism: When Distribution Joins Automation

This course explores the impact of information and communications technology on the structure and operations of the hospitality, travel, and tourism industry. It covers topics dealing with the interaction between consumers, intermediaries, operators, and management through rapidly changing technologies. Effects on service quality, productivity, efficiency, and profitability will be examined.

HTT 230 ....................................................................................3 credits
Finance for Hospitality Professionals: Bed & Balance Sheets

This course focuses on conceptual awareness and practice of financial management as it applies to hospitality, travel, and tourism industries. It covers the basics of accounting, budgets and budgeting systems, performance measures creation, and financial statement evaluation for the purpose of cost analysis and planning. Aspects of setting prices, funding, and risk management are also covered.

HTT 240 ....................................................................................3 credits
Food & Beverage Management: Eat, Drink, & Be Healthy

This course integrates the basic concept and practical skills related to foodservice operations, from the front office to the kitchen. It covers basic principles of purchasing and cost management of food and beverage, as well as menu planning, institutional food service, and quality control.

HTT 250 ....................................................................................3 credits
Lodging and Resort Operations: There’s Room In the Inn

This course studies the lodging industry, its history, growth, development, and future direction. It covers front office procedures and interpersonal dynamics from reservations through the night audit. The course also examines career opportunities in lodging and resorts.

COM 150 ....................................................................................3 credits
Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ....................................................................................3 credits
Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ....................................................................................3 credits
Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ....................................................................................3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media, including television, Internet, and print to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Emphasis in Hospitality, Travel and Tourism (Maryland-Online)**

The following Associate of Arts/Emphasis in Hospitality, Travel and Tourism (AAHTT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Hospitality, Travel, and Tourism emphasis provides content and practical application in an array of foodservice, lodging management, and tourism industry careers. The courses emphasize the leadership competencies and knowledge that provide the foundation of management practices valued in the hospitality arena. The Hospitality, Travel, and Tourism associate degree program is also planned to prepare the student for further study in hospitality or related programs at the undergraduate level.

  - University of Phoenix coursework,
  - The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

**Course Descriptions for the AAFB**

**BUS 210** .................................................................3 credits

**Foundations of Business**

In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

**XECO 212** ...............................................................3 credits

**Principles of Economics**

This course introduces the fundamental theories of microeconomics and macroeconomics. The economic principles studied in this course apply to everyday life as students research an industry, debate issues with trade agreements, discuss the effects of a shift in labor supply and demand, and discuss the strengths and weaknesses of the Consumer Price Index calculation. In particular, students research an industry affected by the economy and perform an economic analysis of the chosen industry.

**XBIS 219** ...............................................................3 credits

**Business Information Systems**

This course provides an overview of Business Information Systems. This includes a broad foundation for both technical and non-technical business professionals. Special emphasis is placed on how information is used by different types of businesses across different industries.

**XMGT 216** ...............................................................3 credits

**Organizational Ethics and Social Responsibility**

This course provides a foundational perspective for socially responsible management practices in business. Special emphasis is placed on the inter-related nature of ethics, moral, legal, and social issues in managing individuals, groups, and the organization within a business environment.

**XACC 280** ...............................................................3 credits

**Financial Accounting Concepts and Principles**

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on the enterprise. Financial information is examined from the perspective of effective management decision making with special emphasis on the planning and controlling responsibilities of practicing managers.

**XCOM 285** ...............................................................3 credits

**Essentials of Managerial Communication**

This course introduces students to the foundations of communication in a business setting. Students are exposed to various topics related to interpersonal and group communication with an eye toward applications in an office or virtual office setting. Students will develop skills in various forms of written communication, including memos, emails, business letters, and reports. Communication ethics and cross-cultural communications are also explored. Upon completing the course, students will have an awareness of their personal communication style and be able to identify areas for further exploration of communication as a business skill.

**COM 150** ...............................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

CRT 205 ................................................................. 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Business Foundations

The Associate of Arts with a concentration in Business Foundations focuses on a variety of business essentials including management theory and practice, information systems, financial accounting, critical thinking and effective managerial communications. Students will explore business principles and learn to apply problem solving strategies to real-life scenarios. In addition, students will also discuss the effects of culture and ethics in current global and domestic business environments. Courses requiring prerequisites are identified by a ~ symbol following the course number.

Additional Admission Requirements for AABF
Applicants who meet the following admission requirements will be considered for admission to the Associate Degree programs:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants (including re-entry students) attending the Puerto Rico campus must meet the English language proficiency requirement for admission.

General Education Requirements for the AABF

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

University of Phoenix math courses must be MAT 116 or higher to satisfy requirement.

Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)
Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)
All undergraduate students are required to complete the minimum general education credits required by their program version.
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AABF
The degree requirements for this program are the following:
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D" or higher.
• A minimum grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Associate of Arts

Academic Progression Requirements for the AABF
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.

All FYS requirements must be satisfied prior to enrolling in any other General Education elective, concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AABF
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AABF
BUS 210 .................................................................3 credits
Foundations of Business
In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XBCOM 275 .........................................................3 credits
Business Communications and Critical Thinking
This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

XBIS 220 ........................................................................3 credits
Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

XMGT 230 ........................................................................3 credits
Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

XACC 290.................................................................3 credits
Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets,
The Associate of Arts with an emphasis in Business Foundations focuses on a variety of business essentials including management theory and practice, information systems, financial accounting, critical thinking and effective managerial communications. **Course Descriptions**

- **Principles of Accounting I**
  - This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

- **Principles of Accounting II**
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

COM 150 .................................................................................. 3 credits

Effective Essay Writing
Students develop academic writing skills. The emphasis is on coherence and correctness in written communication as students use the writing process to craft an expository essay. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense, subject-verb and pronoun-antecedent agreement, and pronoun case.

COM 220 .................................................................................. 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

CRT 205 .................................................................................. 3 credits

Critical Thinking
In this course, students will develop the ability to think both clearly and critically. Practice includes developing writing skills that will enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students will be given the opportunity to analyze and discuss various types of media—including television, cinema, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

ETH 125 .................................................................................. 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

GEN 105 .................................................................................. 3 credits

Skills for Learning in an Info Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Accounting (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Accounting (AAACC) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associates of Arts in Accounting concentration focuses on the role of accounting in business strategy, financial statements, cost information, economics, management, and ethical issues. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaacc-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaacc-mm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Additional Admission Requirements for AAACC
• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAACC for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220
College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Must include a minimum of 6 credits in lab science.

The lab science requirements may also be satisfied with any science transfer coursework with a lab component.
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

**General Education Requirements for the AAACC for Minnesota Students**

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Social Science Requirement 9 credits

(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for the AAACC**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.

- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.

- A minimum grade point average (GPA) of 2.0.

- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

**Academic Progression Requirements for the AAACC**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.

- US 101 will be required as the first course in the first block of the First-Year Sequence.

- All FYS requirements must be satisfied prior to enrolling in any other General Education elective, or concentration courses.

- With the exception of GEN 105, US 101, and FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.

- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

**Additional Residency Requirements and Course Waivers for the AAACC**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**Course Descriptions for the AAACC**

ACC 220 .................................................................3 credits
Survey of Accounting: The Maze of Numbers
Every business depends on its accountants to organize and maintain financial information. Accountants translate the maze of numbers most people see into valuable information that keeps a company going. This course introduces students to the accounting profession. It covers the role accounting plays in business and career options in accounting. Students learn the fundamentals of accounting principles and the accounting cycle.

ACC 225 ..................................................................................... 3 credits

Financial Accounting
Financial accounting communicates economic information and serves as a tool for business decision making. Through financial accounting, accountants track how money circulates in an organization. This course provides an understanding of the fundamental principles of double entry accounting as applied to practical business situations. Emphasis is given to the following: debit and credit rules of accounting, T-accounts, journalizing transactions, adjusting entries for revenue and expense items, inventories, internal control, and analytical information systems. Students will be able to prepare and use the income statement, balance sheet, and statement of cash flows.

ACC 260 .................................................................................. 3 credits

Accounting Ethics: Keeping it Clean
Businesses’ accounting practices are under heightened scrutiny following corporate scandals in recent years. Accountants have a legal and ethical responsibility to follow the law and standard accounting practices as they document their companies’ finances. The course is an introductory level course in ethics, focusing on the types of situations that pose ethical problems in business. An attempt will be made to help the student develop an ethical framework which will allow the student to address ethical issues in the business world. Current trends in accounting ethics, including the Sarbanes Oxley regulations and the ethical requirements for certified public accountants are emphasized.

FIN 200........................................................................................ 3 credits

Introduction to Finance: Harvesting the Money Tree
This course gives students an overview of finance concepts, terminology, and principles. It is an introduction to the role of finance in the business world. Topics covered include the relationship between finance and accounting, careers in finance, basic financial analysis and planning techniques, financial ratios, profit, cash flow, and sources of business financing.

ACC 230 ..................................................................................... 3 credits

Financial Reporting: Peeking Under the Financial Hood
In this course, students study how to analyze financial statements and methods used to value companies. Financial reports help managers choose between business paths. They also help investors and analysts evaluate the financial health of companies. This course is a practical means of discovering how financial data are generated and their limitations; techniques for analyzing the flow of business funds; and methods for selecting and interpreting financial ratios. It also presents analytical tools for predicting and testing assumptions about a firm’s performance.

COM 150 ..................................................................................... 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay.

Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ..................................................................................... 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

MAT 219..................................................................................... 3 credits

Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

MAT 220..................................................................................... 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

BIO 100.................................................................................... 4 credits

Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109..................................................................................... 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135..................................................................................... 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cul-
tural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

ETH 125 ................................................................. 3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—excluding television, Internet, and print—determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the development of effective study skills.

GEN 105 .................................................................. 3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the characteristics of various types of arguments.

Hospitality: Food, Shelter and Fun Away from Home

HTT 210 ................................................................. 3 credits

Travel and Tourism: Work, Pleasure, Forever Enriching

Information Technology in Hospitality, Travel and Tourism

HTT 230 ................................................................. 3 credits

Finance for Hospitality Professionals: Bed and Balance Sheets

HTT 240 ................................................................. 3 credits

Food and Beverage Management: Eat, Drink and Be Healthy

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAHTT

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAHTT for Arkansas Students

Communication Arts Requirement 6 credits

(A Track must include: COM 150 and COM 220)

(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits

(A Track must include: SCI 162)

Must include a minimum of 6 credits in lab science.

The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits

(A Track must include: ETH 125)

(B Track must include: PSY 201 and ETH 125)

Must include: HIS 135

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits

(A Track must include: CRT 205)

(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits

(A Track must include: GEN 105)

(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general edu-
cation credits required for their program. Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

**General Education Requirements for the AAHTT for Minnesota Students**

- Communication Arts Requirement 6 credits
  - **(A Track must include): COM 150 and COM 220**
  - **(B Track must include): COM 155 and COM 156**
- Mathematics Requirement 6 credits
- Science & Technology Requirement 9 credits
  - **(B Track must include): SCI 162**
- Social Science Requirement 9 credits
  - **(A Track must include): ETH 125**
  - **(B Track must include): PSY 201 and ETH 125**
- Humanities Requirement 9 credits
  - **(A Track must include): CRT 205**
  - **(B Track must include): HUM 111**
- Additional Liberal Arts Requirement 6 credits
  - **(A Track must include): GEN 105**
  - **(B Track must include): US 101 and FP 101**

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total. Students who lack 67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for the AAHTT**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts.

**Academic Progression Requirements for the AAHTT**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- **US 101** will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

**Additional Residency Requirements and Course Waivers for the AAHTT**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**Course Descriptions for the AAHTT**

- **HTT 200** ................................................................. 3 credits
  - **Hospitality: Food, Shelter, and Fun Away From Home**
  - This course is an overview of the history, current trends, and general organizational structure of the hospitality industry. Additionally, the course covers topics such as recreational entertainment, economic impact of hospitality, and service standards. The course also gives students the opportunity to examine careers in tourism, foodservice, and lodging industries.
- **HTT 210** ................................................................. 3 credits
  - **Travel & Tourism: For Work, For Pleasure, Forever Enriching**
  - This course introduces the tourism industry and its major components such as the travel mart, surface travel, air travel, business travel, cruises, and recreation. It covers current issues in tourism and their effect on the hospitality industry as a whole including economic, political, and cultural forces, and quality of life impacts on host locals. Career opportunities within travel and tourism are also discussed.
- **HTT 220** ................................................................. 3 credits
  - **Information Technology in Hospitality, Travel and Tourism: When Distribution Joins Automation**
  - This course explores the impact of information and communication technology on the structure and operations of the hospitality, travel, and tourism industry. It covers topics dealing with the interaction between consumers, intermediaries, operatives, and management through rapidly changing technologies. Effects on service quality, productivity, efficiency, and profitability will be examined.
Finance for Hospitality Professionals: Bed & Balance Sheets
This course focuses on conceptual awareness and practice of financial management as it applies to hospitality, travel, and tourism industries. It covers the basics of accounting, budgets and budgeting systems, performance measures creation, and financial statement evaluation for the purpose of cost analysis and planning. Aspects of setting prices, funding, and risk management are also covered.
HTT 240 ................................................................. 3 credits

Food & Beverage Management: Eat, Drink, & Be Healthy
This course integrates the basic concept and practical skills related to foodservice operations, from the front office to the kitchen. It covers basic principles of purchasing and cost management of food and beverage, as well as menu planning, institutional food service, and quality control.
COM 150 ................................................................................. 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
COM 220 ................................................................................. 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
MAT 219 ................................................................................. 3 credits

Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.
MAT 220 ................................................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
BIO 100 ................................................................................. 4 credits

Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.
CHM 109 ........................................................................................ 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
HIS 135 ........................................................................................ 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.
ETH 125 ........................................................................................ 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.
CRT 205 ........................................................................................ 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.
GEN 105 ........................................................................................ 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Foundations of Business (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Foundations of Business (AAFB) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and concentrations depend on student demand
and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Foundations of Business focuses on a variety of business essentials including economics, information systems, managerial ethics, financial accounting, business research and effective managerial communications. Students will explore business principles and learn to apply problem-solving strategies to real-life scenarios. In addition, students will also discuss the effects of culture and ethics in current global and domestic business environments.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aafb

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Foundations of Business - Track A and B
XECO 212 ~ .............................................. 3 credits
Principles of Economics
XBIS 219 ................................................. 3 credits
Business Information Systems
XMGT 216 ................................................. 3 credits
Organizational Ethics and Social Responsibility

Essentials of Managerial Communication

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAFB
- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAFB for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Must include a minimum of 6 credits in lab science.
The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

General Education Requirements for the AAFB for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for the AAFB

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
Academic Progression Requirements for the AAFB

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.

• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.

• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAFB

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAFB

XECO 212 ................................................................. 3 credits

Principles of Economics

This course introduces the fundamental theories of microeconomics and macroeconomics. The economic principles studied in this course apply to everyday life as students research an industry, debate issues with trade agreements, discuss the effects of a shift in labor supply and demand, and discuss the strengths and weaknesses of the Consumer Price Index calculation. In particular, students research an industry affected by the economy and perform an economic analysis of the chosen industry.

XBS 219 ................................................................. 3 credits

Business Information Systems

This course provides an overview of Business Information Systems. This includes a broad foundation for both technical and non-technical business professionals. Special emphasis is placed on how information is used by different types of businesses across different industries.

XMGT 216 ............................................................. 3 credits

Organizational Ethics and Social Responsibility

This course provides a foundational perspective for socially responsible management practices in business. Special emphasis is placed on the inter-related nature of ethics, moral, legal, and social issues in managing individuals, groups, and the organization within a business environment.

XACC 280 ............................................................. 3 credits

Financial Accounting Concepts and Principles

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on the enterprise. Financial information is examined from the perspective of effective management decision making with special emphasis on the planning and controlling responsibilities of practicing managers.

XCOM 285 ............................................................. 3 credits

Essentials of Managerial Communication

This course introduces students to the foundations of communication in a business setting. Students are exposed to various topics related to interpersonal and group communication with an eye toward applications in an office or virtual office setting. Students will develop skills in various forms of written communication, including memos, emails, business letters, and reports. Communication ethics and cross-cultural communications are also explored. Upon completing the course, students will have an awareness of their personal communication style and be able to identify areas for further exploration of communication as a business skill.

COM 150 ............................................................. 3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Accounting Fundamentals

The following Associate of Arts/Concentration in Accounting Fundamentals (AAACCT) program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Accounting Fundamentals focuses on the role of accounting in business strategy, financial statements, cost information, economics, management, and ethical issues. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks. NOTE: Students may earn a certificate in Bookkeeping Fundamentals en-route to completing this associate degree. Students wishing to earn the certificate en-route must be admitted to the corresponding AAACCTC (“Certificate Track”). Students may apply for certificate conferral upon successful completion of the required concentration or emphasis courses.

General Information for the AAACCT
• First time attendees with the University will be admitted with condition to this program according to the risk free period policy.
• Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course.
• Students will be placed in the Accelerated Pathway (A Track) and required to successfully complete GEN 201 as the first course in their program, if they meet the condition below:
  • Scored 70% or higher on the Pathway Diagnostic
• Students will be placed in the standard pathway (B Track) and required to complete GEN 127 as the first course in their program, if they meet the condition below:
  • Score below 70% on the Pathway Diagnostic
• Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all 60 required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

Additional Admission Requirements for AAACCT
• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAACCT
Communication Arts 6 credits
A Track must include: COMM 215, equivalent, or higher
B Track must include: ENG 147
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus
Mathematics 6 credits
Must include MTH 209, equivalent, or higher
Science and Technology 6 credits
Must include: 3 credits in the physical or biological sciences
Humanities 6 credits
B Track must include: HUM 115
Social Science 6 credits
Nevada students must complete three (3) credits in Nevada Constitution
Additional Liberal Arts 3 credits

A Track must include: GEN 201
B Track must include: GEN 127
Interdisciplinary Requirement 9 credits
Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement. Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Degree Requirements for the AAACCT
• Completion of a minimum of 60 credits.
• A minimum grade point average (GPA) of 2.0.
• Students earning the associate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
• Students earning this associate en-route to completion of a bachelor degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the associate degree to be eligible for associate conferral.

• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Associate of Arts

Academic Progression Requirements for the AAACCT
• Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147, and HUM 115
• With the exception of ENG 147, GEN 127, GEN 200, and HUM 115, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
• Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
• Continuously enrolled students will not be required to enroll in the standard pathway (B Track) courses upon the program/program version change.
• Students who previously completed GEN 101, GEN 195, GEN 200, or GEN 300 and choose to transition to the standard pathway (B Track) are not required to take GEN 127.
• Students may not complete any of the standard pathway (B Track) courses via Directed Study.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for
the AAACCT
• Students in this program may waive a maximum of 6 credits
  from their required course of study.

Course Descriptions for the AAACCT

BIS 220 ................................................................. 3 credits

Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including
word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of
application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information
is used across different industries.

BCOM 230 ............................................................................. 3 credits

Business Communication for Accountants
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various
topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop
skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication
ethics, collaboration, information utilization, critical thinking, and professional competence and values.

QNT 275 ................................................................. 3 credits

Statistics for Decision Making
This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion
of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for
statistical inferences, produce tables and charts to organize and display qualitative and quantitative business data, interpret numerical business
data using measures of central tendency and dispersion, apply fundamental concepts probability theory for inferential decision making for business, and perform a linear regression for trend analysis.

MGT 230 ............................................................................. 3 credits

Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply
management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful
performance of employees and organizations, and achieving desired business goals.

ACC 290 ................................................................. 3 credits

Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial
effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management.
Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291 ............................................................................. 3 credits

Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in
making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of
cash flows, financial statement analysis, time value of money, pay-roll accounting, and other significant liabilities.

COMM 215 ................................................................. 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive
and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

ENG 147 ................................................................. 3 credits

University Writing Essentials
is is a course in developing foundational skills necessary for effective and appropriate academic writing. This course reviews the
fundamentals of grammar, writing mechanics, style, and proper documentation of sources.

MTH 209 ................................................................. 3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College
Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

HUM 115 ............................................................................. 3 credits

Interdisciplinary Critical Thinking
This critical thinking skills course focusing on developing the necessary tools and skills to analyze problems, make decisions, formulate
well-supported points of view on key academic, social, and professional issues.

GEN 201 ............................................................................. 3 credits

Foundation for University Success
This course transitions students through the foundations of study at University of Phoenix. Students develop personal strategies for
achieving educational goals; and develop skills in critical thinking, collaboration, and communication.

GEN 127 ............................................................................. 3 credits

University Studies for Success
This is an academic course focusing on the essential information, skills, tools, and techniques necessary for academic success and
personal effectiveness at University of Phoenix. The course develops and applies academic standards, practical knowledge, and study skills immediately relevant to first-year university students.

The following Associate of Arts/Concentration in Accounting Fundamentals (Certificate Track) program may be offered at University of Phoenix. Students develop personal strategies for achieving educational goals; and develop skills in critical thinking, collaboration, and communication.

The following Associate of Arts/Concentration in Accounting Fundamentals (Certificate Track) (AAACCTC) program may be offered:

Through University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want
to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Accounting Fundamentals focuses on the role of accounting in business strategy, financial statements, cost information, economics, management, and ethical issues. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks. Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Accounting Fundamentals - A Track and B Track

**BIS 220 ~** Introduction to Computer Applications and Systems .......................... 3 credits
**BCOM 230 ~** Business Communication for Accountants .................................. 3 credits
**QNT 275 ~** Statistics for Decision Making ............................................................. 3 credits
**MGT 230 ~** Management Theory and Practice ..................................................... 3 credits
**ACC 290 ~** Principles of Accounting I ................................................................. 3 credits
**ACC 291 ~** Principles of Accounting II ............................................................... 3 credits

The University reserves the right to modify the required course of study.

**General Information for the AAACCTC**

- First time attendees with the University will be admitted with condition to this program according to the risk free period policy.

- The Certificate Track associates programs are designed to be an option for students to earn a certificate en-route to earning the associates degree.

- Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.

- Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course.

- Students will be placed in the Accelerated Pathway (A Track) and required to successfully complete GEN 201 as the first course in their program, if they meet the condition below:
  - Scored 70% or higher on the Pathway Diagnostic

- Students will be placed in the standard pathway (B Track) and required to complete GEN 127 as the first course in their program, if they meet the condition below:
  - Score below 70% on the Pathway Diagnostic

- Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all 60 required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

**Additional Admission Requirements for AAACCTC**

- Applicants must be at least 16 years of age at the time of application.

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants in the Accounting Fundamentals concentration or emphasis must demonstrate basic skills proficiency in mathematics.

Students have the following options to satisfy this requirement:

- Students must pass the Praxis I exam at the cut score determined by the School of Business.
  - Math - 170

- Students must pass the Essential Academic Skills Subtest III: Mathematics provided by National Evaluation Systems at the cut scores determined by the national benchmark.
  - Essential Academic Skills Subtest III: Mathematics - 220

- Students must pass the SAT at the cut scores determined by the national benchmark.
  - Mathematics - 480

- Students must pass the ACT at the cut scores determined by the national benchmark.
  - Mathematics - 20

- Transfer credit may be used by students who have achieved a C- or better in a college algebra or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.

- Achieve a passing score eligible for credit on an approved mathematics related National Testing Program.

- Current Approved National Testing Programs are:

  - CLEP Examination
  - College Mathematics
  - College Algebra
  - Precalculus
  - Calculus
  - DANTES Examination
  - Principles of Statistics
  - Business Mathematics
  - Advanced Placement Examination
  - Calculus AB
  - Calculus BC
  - Statistics

- Achieve a passing score on the School of Business math readiness exam.
  - MyMathTest Assessment - 70%

- Successful completion (passing grade) of University of Phoenix mathematics course MAT/116, equivalent or higher.
Degree Requirements for the AAACCTC

- Completion of a minimum of 60 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the associate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this associate en-route to completion of a bachelor degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the associate degree to be eligible for associate conferral.
- Students may earn a certificate in the same area of focus as the concentration or emphasis en route to completing the associates degree. Students may apply for certificate conferral upon successful completion of both the concentration or emphasis courses and the certificate programmatic requirements outlined in the certificate program policy.
- Concentrations or emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

General Education Requirements for the AAACCTC

Communication Arts 6 credits
A Track must include: COMM 215, equivalent, or higher
B Track must include: ENG 147
Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus

Mathematics 6 credits
Must include MTH 209, equivalent, or higher

Science and Technology 6 credits
Must include: 3 credits in the physical or biological sciences

Humanities 6 credits
B Track must include: HUM 115

Social Science 6 credits
Nevada students must complete three (3) credits in Nevada Constitution
Additional Liberal Arts 3 credits
A Track must include: GEN 201
B Track must include: GEN 127

Interdisciplinary Requirement 9 credits
Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.
Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the AAACCTC

- Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, GEN 147 and HUM 115
- Students are encouraged to complete the concentration or emphasis courses prior to enrolling in any other general education or interdisciplinary courses.
- With the exception of ENG 147, GEN 127, GEN 201, and HUM 115, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
- Accelerated Pathway (A Track) students may not enroll in GEN 127, GEN 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
- Continuously enrolled students will not be required to enroll in the standard pathway (B Track) courses upon the program/program version change.
- Students who previously completed GEN 101, GEN 195, GEN 200, or GEN 300 and choose to transition to the standard pathway (B Track) are not required to take GEN 127.
- Students may not complete any of the standard pathway (B Track) courses via Directed Study.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the AAACCTC

Students in this program may waive a maximum of 6 credits from their required course of study.

Course Descriptions for the AAACCTC

BIS 220 ................................................................. 3 credits

Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office™ tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

BCOM 230 ................................................................. 3 credits

Business Communication for Accountants
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

QNT 275 ................................................................. 3 credits

Statistics for Decision Making
This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for statistical inferences, produce tables and charts to orga-
nize and display qualitative and quantitative business data, interpret numerical business data using measures of central tendency and dispersion, apply fundamental concepts probability theory for inferential decision making for business, and perform a linear regression for trend analysis.

Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.
ACC 290 ..................................................................................3 credits

Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

MGT 230 ..................................................................................3 credits
Any student planning to complete an associate of arts degree

Students will be placed in the standard pathway (B Track) and

Students will be placed in the Accelerated Pathway (A Track)

Applicants must complete a Pathway Diagnostic before

Enrolling into their first credit-bearing course.

Students will be placed in the Accelerated Pathway (A Track) and required to successfully complete GEN 201 as the first course in their program, if they meet the condition below:

- Scored 70% or higher on the Pathway Diagnostic
- Students will be placed in the standard pathway (B Track) and required to complete GEN 127 as the first course in their program, if they meet the condition below:

- Score below 70% on the Pathway Diagnostic

Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all 60 required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

General Admission

Applicants must be at least 16 years of age at the time of application.

High school graduation from an accreditation institution that holds state approval to confer high school diplomas or are accredited by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AARETM

Communication Arts 6 credits

A Track must include: COMM 215, equivalent, or higher

B Track must include: GEN 147

Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus

Mathematics 6 credits

Must include MTH 209, equivalent, or higher

Science and Technology 6 credits

Must include: 3 credits in the physical or biological sciences

Humanities 6 credits

B Track must include: HUM 115

Social Science 6 credits

Nevada students must complete three (3) credits in Nevada Constitution

Additional Liberal Arts 3 credits

A Track must include: GEN 201

B Track must include: GEN 127

Interdisciplinary Requirement 9 credits

Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.

Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Degree Requirements for the AARETM

Completion of a minimum of 60 credits.

A minimum grade point average (GPA) of 2.0.

Students earning the associate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.

Students earning this associate en-route to completion of a bachelor degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the associate degree to be eligible for associate conferral.

Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:

Associate of Arts

Academic Progression Requirements for the AARETM

Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147, and HUM 115

With the exception of ENG 147, GEN 127, GEN 200, and HUM 115, course requirements may be satisfied by any of the following means:

- University of Phoenix coursework,
- Regionally or nationally accredited coursework (C- or higher grade),
- University of Phoenix Prior Learning Assessment,
- National Testing Programs, and
- ACE evaluated Military credits.

Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).

Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.

Continuously enrolled students will not be required to enroll in the standard pathway (B Track) courses upon the program version change.

Students who previously completed GEN 101, GEN 195, GEN 200, or GEN 300 and choose to transition to the standard pathway (B Track) are not required to take GEN 127.

Students may not complete any of the standard pathway (B Track) courses via Directed Study.

All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for
Students in this program may waive a maximum of 6 credits from their required course of study.

**Course Descriptions for the AARETM**

**COM 295** ................................................................. 3 credits

**Business Communications**
This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross-cultural, and multinational issues in business communication.

**BRM 226** ................................................................. 3 credits

**Customer Service Management**
This course presents strategies for effective customer service to increase satisfaction and retention within the retail environment. Students will be prepared to build customer rapport, analyze risks associated with customer service, and develop skills and strategies to resolve customer conflict. Additional focus will be placed on managing customer interactions to enhance competitive advantage within the retail sector.

**BRM 236** ................................................................. 3 credits

**Sales, Tools, and Strategies**
This course is an examination of basic principles involved in the sales process, the relationship between sales and business objectives, and managing the sales force and customer relationships. Emphasis is placed on sales planning, developing specific goals to meet the business objectives, and adapting to changes in the market.

**BRM 246** ................................................................. 3 credits

**Retail Marketing: Merchandising**
This course presents strategies for capitalizing on consumer behavior and growing retail market share through the application of research, advertising, and innovative retail merchandising tactics. Students will be prepared to execute the elements of the marketing mix and merchandising strategies to be successful in a retail setting.

**BRM 256** ................................................................. 3 credits

**Retail Personnel Management**
This course focuses on the personnel management aspects of retail management. Students will be prepared to utilize recruiting and staffing, motivating, training, and ethics concepts to effectively lead retail personnel.

**BRM 266** ................................................................. 3 credits

**Retail Operations: Supply Management**
This course is an examination of the retail operations function of retail management including value chain logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.

**COMM 215** ............................................................. 3 credits

**Essentials of College Writing**
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

**ENG 147** ................................................................. 3 credits

**University Writing Essentials**
This is a course in developing foundational skills necessary for effective and appropriate academic writing. This course reviews the fundamentals of grammar, writing mechanics, style, and proper documentation of sources.

**MTH 209** ................................................................. 3 credits

**College Mathematics II**
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

**HUM 115** ................................................................. 3 credits

**Interdisciplinary Critical Thinking**
This critical thinking skills course focusing on developing the necessary tools and skills to analyze problems, make decisions, formulate well-supported points of view on key academic, social, and professional issues.

**GEN 201** ................................................................. 3 credits

**Foundations for University Success**
This course transitions students through the foundations of study at University of Phoenix. Students develop personal strategies for achieving educational goals; and develop skills in critical thinking, collaboration, and communication.

**GEN 127** ................................................................. 3 credits

**University Studies for Success**
This is an academic course focusing on the essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at University of Phoenix. The course develops and applies academic standards, practical knowledge, and study skills immediately relevant to first-year university students.

**Associate of Arts/Concentration in Retail Management (Certificate Track)**

The following Associate of Arts/Concentration in Retail Management (Certificate Track) (AARETMC) program may be offered at these University of Phoenix campus locations as of September 30th, 2013:

- Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state.
- Please contact your enrollment advisor for more information.

The Retail Management concentration focuses on the retail management environment. The concentration emphasizes skill development in customer service management, sales and marketing,
supply management, retail operations, merchandising, and personnel management unique to the retail industry. Upon completion of this concentration, students will possess the knowledge and skills necessary to be leaders in the retail industry. Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

**General Information for the AARETMC**

- First time attendees with the University will be admitted with condition to this program according to the risk free period policy.
- The Certificate Track associates programs are designed to be an option for students to earn a certificate en-route to earning the associates degree.
- Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.
- Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course.
- Students will be placed in the Accelerated Pathway (A Track) and required to successfully complete GEN 127 as the first course in their program, if they meet the condition below:
  - Scored 70% or higher on the Pathway Diagnostic
- Students will be placed in the standard pathway (B Track) and required to meet the condition below:
  - Score below 70% on the Pathway Diagnostic
- Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all 60 required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

**Additional Admission Requirements for AARETMC**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

**Degree Requirements for the AARETMC**

- Completion of a minimum of 60 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the associate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning an associate en-route to completion of a bachelor degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the associate degree to be eligible for associate conferral.
- Students may earn a certificate in the same area of focus as the concentration or emphasis en route to completing the associates degree. Students may apply for certificate conferral upon successful completion of both the concentration or emphasis courses and the certificate programmatic requirements outlined in the certificate program policy.
- Concentrations or emphases are reflected on the transcript only in the concentration or emphasis en route to completing the associates degree.

**General Education Requirements for the AARETMC**

- Communication Arts 6 credits
  - A Track must include: COMM 215, equivalent, or higher
  - B Track must include: ENG 147
- Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus
- Mathematics 6 credits
  - Must include MTH 209, equivalent, or higher
- Science and Technology 6 credits
  - Must include: 3 credits in the physical or biological sciences
- Humanities 6 credits
  - B Track must include: HUM 115
- Social Science 6 credits
  - Nevada students must complete three (3) credits in Nevada Constitution
  - Additional Liberal Arts 3 credits
  - A Track must include: GEN 201
  - B Track must include: GEN 127
- Interdisciplinary Requirement 9 credits
  - Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.
  - Physical Education activity credits are limited to four (4) credits.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
- For a description of the preceding general education areas, see the
Undergraduate Programs section within this catalog.

**Academic Progression Requirements for the AARETMC**

- Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147 and HUM 115
- Students are encouraged to complete the concentration or emphasis courses prior to enrolling in any other general education or interdisciplinary courses.
- With the exception of ENG 147, GEN 127, GEN 201, and HUM 115, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
- Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
- Continuously enrolled students will not be required to enroll in the standard pathway (B Track) courses upon the program/program version change.
- Students who previously completed GEN 101, GEN 195, GEN 200, or GEN 300 and choose to transition to the standard pathway (B Track) are not required to take GEN 127.
- Students may not complete any of the standard pathway (B Track) courses via Directed Study.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Additional Residency Requirements and Course Waivers for the AARETMC**

Students in this program may waive a maximum of 6 credits from their required course of study.

**Course Descriptions for the AARETMC**

**COM 295** ................................................................. 3 credits

**Business Communications**

This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross-cultural, and multinational issues in business communication.

BRM 226 ................................................................. 3 credits

**Customer Service Management**

This course presents strategies for effective customer service to increase satisfaction and retention within the retail environment. Students will be prepared to build customer rapport, analyze risks associated with customer service, and develop skills and strategies to resolve customer conflict. Additional focus will be placed on managing customer interactions to enhance competitive advantage within the retail sector.

BRM 236 ................................................................. 3 credits

**Sales, Tools, and Strategies**

This course is an examination of basic principles involved in the sales process, the relationship between sales and business objectives, and managing the sales force and customer relationships. Emphasis is placed on sales planning, developing specific goals to meet the business objectives, and adapting to changes in the market.

BRM 246 ................................................................. 3 credits

**Retail Marketing: Merchandising**

This course presents strategies for capitalizing on consumer behavior and growing retail market share through the application of research, advertising, and innovative retail merchandising tactics. Students will be prepared to execute the elements of the marketing mix and merchandising strategies to be successful in a retail setting.

BRM 256 ................................................................. 3 credits

**Retail Personnel Management**

This course focuses on the personnel management aspects of retail management. Students will be prepared to utilize recruiting and staffing, motivating, training, and ethics concepts to effectively lead retail personnel.

BRM 260 ................................................................. 3 credits

**Retail Operations: Supply Management**

This course is an examination of the retail operations function of retail management including value chain logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.

COMM 215 ............................................................... 3 credits

**Essentials of College Writing**

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

ENG 147 ................................................................. 3 credits

**University Writing Essentials**

is a course in developing foundational skills necessary for effective and appropriate academic writing. This course reviews the fundamentals of grammar, writing mechanics, style, and proper documentation of sources.

MTH 209 ................................................................. 3 credits

**College Mathematics II**

This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.
HUM 115................................................................. 3 credits
Interdisciplinary Critical Thinking
This critical thinking skills course focusing on developing the ne-
cessary tools and skills to analyze problems, make decisions, formu-
late well-supported points of view on key academic, social, and 
professional issues.
GEN 201................................................................. 3 credits
Foundations for University Success
This course transitions students through the foundations of study
at University of Phoenix. Students develop personal strategies for
achieving educational goals; and develop skills in critical thinking,
collaboration, and communication.
GEN 127................................................................. 3 credits
University Studies for Success
This is an academic course focusing on the essential informa-
tion, skills, tools, and techniques necessary for academic success and 
personal effectiveness at University of Phoenix. The course de-
velops and applies academic standards, practical knowledge, and 
study skills immediately relevant to first-year university students.

Associate of Arts/Concentration in Business 
Fundamentals

The following Associate of Arts/Concentration in Business Fundamentals 
(AABFN) program may be offered at these University of Phoenix campus 
locations as of September 30th, 2013: Online, depending on state of 
residence. The availability of programs and concentrations depend on 
student demand and other factors. Not all programs may be available to 
all residents of all states. Students may want to consider completing 
certain courses in the Online classroom at Online rates if the program is 
available via the Online modality in their state. Please contact your 
enrollment advisor for more information.

The Associate of Arts with a concentration in Business Fundamen-
tals focuses on a variety of business essentials including manage-
ment theory and practice, information systems, financial 
accounting, critical thinking and effective managerial communica-
tions. Students will explore business principles and learn to apply 
problem solving strategies to real-life scenarios. In addition, stu-
dents will also discuss the effects of culture and ethics in current 
global and domestic business environments.

Courses requiring prerequisites are identified by a ~ symbol fol-
lowing the course number.

- Students may not complete any of the standard pathway (B Track) courses via Directed Study.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the AABFN

- Students in this program may waive a maximum of 6 credits from their required course of study.

Course Descriptions for the AABFN

BUS 211 .................................................................3 credits

Foundations of Business

In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

COM 295 ..................................................................................................................3 credits

Business Communications

This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross-cultural, and multinational issues in business communication.

QNT 275 .................................................................3 credits

Statistics for Decision Making

This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross-cultural, and multinational issues in business communication.

BIS 220 .................................................................3 credits

Introduction to Computer Applications and Systems

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

ACC 290 ..................................................................................................................3 credits

Principles of Accounting I

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291 ..................................................................................................................3 credits

Principles of Accounting II

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

COMM 215 ..............................................................................................................3 credits

Essentials of College Writing

This course covers the essential writing skills required for college-
The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking and decision-making, economics, finance, business law and ethics, management, marketing, organizational behavior, business statistical techniques, and information systems. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

The following Bachelor of Science in Business (BSB) program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and en-route credentials depend on student demand and other factors. Not all programs and en-route credentials may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

---

**General Information for the BSB**
• Students may elect to update or remove the selected credentials upon successful completion of both the courses and programmatic requirements outlined in the program policies for each credential.

• Students may elect to update or remove the selected credentials by completing a new enrollment agreement reflecting the new selection of credentials.

Additional Admission Requirements for the BSB

All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

• Applicants must be currently employed or have access to a work environment.

Degree Requirements for the BSB

• Completion of a minimum of 120 credits.

• A minimum of 42 upper division credits.

• A minimum grade point average (GPA) of 2.0.

• The diploma awarded for this program will read as: Bachelor of Science in Business

General Education Requirements for the BSB

A minimum of 45 of the 120 credits must be in the general education areas approved by the University.

Liberal Arts Component 36 credits

Communication Arts 6 credits

A Track must include: COMM 215, equivalent or higher

B Track must include: ENG 147

Puerto Rico students may not use conversational English to satisfy Communication Arts.

Oregon campus students must use writing courses to complete the 6 credits of Communication Arts. This does not include Oregon students attending the Online Campus.

Mathematics 6 credits

Must include MTH 209 or higher

Science and Technology 6 credits

Must include at least three (3) credits in the physical or biological sciences

Humanities 6 credits

B Track must include: HUM 115

Social Science 6 credits

Nevada students must complete three (3) credits in Nevada Constitution

Additional Liberal Arts 6 credits

A Track must include: GEN 201

B Track must include: GEN 127

Interdisciplinary Component 9 credits
Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/interdisciplinary requirement. Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSB

- Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147 and HUM 115.
- With the exception of ENG 147, GEN 127, GEN 201, and HUM 115, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.

- Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
- Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
- Continuously enrolled students will not be required to complete the Pathway Diagnostic upon a program/program version change and will be placed in the Accelerated Pathway (A Track).
- Students who previously completed GEN 101, GEN 195, GEN 200, US 101, or GEN 300 and choose to transition to the standard pathway (B Track) are not required to take GEN 127.
- Students may not complete any of the standard pathway (B Track) courses via Directed Study.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSB

- Students in this program may waive a maximum of 15 upper division credits from their required course of study.
- Students may also waive twelve (12) lower division credits from the required course of study.
- The 18 credit Upper Division Business/Management Elective requirement may be satisfied by any of the following means:
  - Upper Division University of Phoenix Business/Management coursework.
  - Upper Division Certificate approved in the student’s state or jurisdiction.
  - Upper Division Business/Management transfer coursework that is acceptable for transfer and was completed within the past ten (10) years from current program enrollment agreement sign date with a grade of C- or better.
  - Upper Division Business/Management National Testing Program exams that are acceptable for transfer and were completed within the past ten (10) years from current program enrollment agreement sign date.

- Upper Division Business/Management military credits that are acceptable for transfer and were completed within the past ten (10) years from current program enrollment agreement sign date.
- Upper Division Business/Management Prior Learning Assessment (PLA) credits awarded to activities completed within the past ten (10) years from current program enrollment agreement sign date.
- The following course(s) may not be waived: BUS 475

Course Descriptions for the BSB

COM 295

3 credits

Business Communications

This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross-cultural, and multinational issues in business communication.

BIS 220

3 credits

Introduction to Computer Applications and Systems

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

QNT 275

3 credits

Statistics for Decision Making

This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for statistical inferences, produce tables and charts to organize and display qualitative and quantitative business data, interpret numerical business data using measures of central tendency and dispersion, apply fundamental concepts probability theory for inferential decision making for business, and perform a linear regression for trend analysis.

ACC 290

3 credits

Principles of Accounting I

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291

3 credits

Principles of Accounting II

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.
Critical Thinking and Decision Making in Business
This course addresses foundational skills in the analysis, synthesis, prescription, and application of critical thinking and decision making in business environments. Emphasis is placed on thinking critically, creatively, and ethically, and decision making outcomes.
ETH 321 ...................................................................................3 credits

Ethical and Legal Topics in Business
This course provides students with an overview of the legal, ethical, and related statutory and regulatory environment in which businesses, organizations, and individuals within them function. After completion of this course, students will be able to understand the general structure of the court systems in the United States, describe the alternative means of resolving disputes and their respective advantages and disadvantages, evaluate the frameworks for regulatory compliance and corporate social responsibility, examine the principle areas of commercial law, and understand the impact of technology on intellectual property rights.
ECO 365....................................................................................3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 372 ....................................................................................3 credits

Principles of Macroeconomics
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
MGT 312...................................................................................3 credits

Organizational Behavior for Managers
This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.
FIN 370 ....................................................................................3 credits

Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
MKT 421 ...................................................................................3 credits

Marketing
This course involves an analysis of the role of marketing within the organization. Other topics include analyzing consumer behavior, identifying marketing variables, creating marketing strategies, and describing challenges of international marketing issues.
BUS 475 ....................................................................................3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
COMM 215 ....................................................................................3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
ENG 147 ....................................................................................3 credits

University Writing Essentials
This is a course in developing foundational skills necessary for effective and appropriate academic writing. This course reviews the fundamentals of grammar, writing mechanics, style, and proper documentation of sources.
MTH 209 ....................................................................................3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.
HUM 115 ..................................................................................3 credits

Interdisciplinary Critical Thinking
This critical thinking skills course focusing on developing the necessary tools and skills to analyze problems, make decisions, formulate well-supported points of view on key academic, social, and professional issues.
GEN 201 ....................................................................................3 credits

Foundations for University Success
This course transitions students through the foundations of study at University of Phoenix. Students develop personal strategies for achieving educational goals; and develop skills in critical thinking, collaboration, and communication.
GEN 127 ....................................................................................3 credits

University Studies for Success
This is an academic course focusing on the essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at University of Phoenix. The course develops and applies academic standards, practical knowledge, and study skills immediately relevant to first-year university students.
The Bachelor of Science in Business

The following Bachelor of Science in Business (BSB) program may be offered at these University of Phoenix campus locations: Online,
The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking and decision-making, finance, business law, management, marketing, organizational behavior, research and evaluation, and technology. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**BSB Program Category Requirements - A Track and B Track Introductory Course, 3 total credits**
- GEN 200 (For A Track only) .......................................................... 3 credits
- Foundations for General Education and Professional Success
- GEN 195 (For B Track only) .......................................................... 3 credits
- Foundations of University Studies

**Communications, 3 total credits**
- BCOM 275 ................................................................. 3 credits

**Business Communications and Critical Thinking**

**Business Information Systems, 3 total credits**
- BIS 220 ................................................................. 3 credits
- Introduction to Computer Applications and Systems

**Management, 6 total credits**
- MGT 230 ................................................................. 3 credits
- Management Theory and Practice
- MGT 311 ................................................................. 3 credits

**Organizational Development**

**Accounting, 6 total credits**
- ACC 290 ................................................................. 3 credits
- Principles of Accounting I
- ACC 291 ................................................................. 3 credits
- Principles of Accounting II

**Ethics & Social Responsibility, 3 total credits**
- ETH 316 ................................................................. 3 credits

**Economics, 6 total credits**
- ECO 372 ................................................................. 3 credits
- Principles of Macroeconomics

- RES 351 ................................................................. 3 credits
- Business Research
- QNT 351 ................................................................. 3 credits

**Quantitative Analysis for Business**

**Business Capstone, 3 total credits**
- BUS 475 ................................................................. 3 credits

**Integrated Business Topics**

**Students must select one concentration in a particular area of study at the time of enrollment. Students may also complete an additional concentration. Please contact your academic representative for more information.**

**Accounting Concentration**

The Accounting Concentration promotes identification with and orientation to the accounting profession and is designed to provide knowledge skills, and abilities necessary for a career in accounting. Core competencies in technology, critical thinking, and communication are emphasized throughout the curriculum. The program also utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. Students have broad exposure to varied business disciplines, including management, organizational behavior, economics, and finance, and learn how the general manager integrates these disciplines to meet the strategic goals of the organization.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-acc.

**Advanced Topics in Accounting Research**

The BSB/ACC may not educationally qualify graduates to sit for the CPA exam in some states. To the extent that a student intends to sit for the CPA examination, the student should consult with the applicable board of examiners in the state or states in which the individual intends to sit for the examination to determine the precise educational and other requirements, including the acceptability of the University’s BSB/ACC.

**Administration Concentration**

The Business Administration concentration is designed for the working professional employed in a business or public organization. The major coursework emphasizes quantitative skills and is designed to enable graduates to deal effectively with an increasingly complex business environment. The administration concentration examines the areas of operations management, project management, economics, accounting, finance, and strategic management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/
Students must choose three of the following courses:

- ACC 340 ~ ................................................................. 3 credits
- Accounting Information Systems I
- BSA 375 ~ .............................................................. 3 credits
- Fundamentals of Business Systems Development
- EBUS 405 ~ ............................................................. 3 credits
- E-Business Technologies
- ISCOM 472 ~ ........................................................... 3 credits
- Lean Enterprise
- MKT 441 ~ ............................................................... 3 credits
- Marketing Research
- MGT 437 ~ ............................................................... 3 credits
- Project Management
- ETH 355 ~ ............................................................... 3 credits
- Understanding Ethics
- OI 370 ~ ................................................................. 3 credits
- Innovation for the 21st Century
- PHL 410 ~ ............................................................... 3 credits
- Classical Logic

**Finance Concentration**

The Finance Concentration emphasizes fundamental and advanced financial concepts, theories, and practices to promote well-informed financial decision making. The Finance Concentration allows students to examine the areas of finance for decision making, financial risk management, mergers, acquisitions, and corporate restructuring, investment analysis and portfolio management, and global finance. Students will integrate advanced topics in financial management through real-world business application. Financial managers need many different skills. Interpersonal skills are important because these jobs involve managing people and working as part of a team to solve problems. Financial managers must have excellent communication skills to explain complex financial data. Since financial managers work extensively with various departments in their firm, a broad understanding of business is essential. Financial managers should be creative thinkers and problem-solvers, applying their analytical skills to business. They must be comfortable with the latest computer technology. Financial managers must have knowledge of international finance because financial operations are increasingly being affected by the global economy.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-f.

- FIN 419 ~ ............................................................... 3 credits
  Finance for Decision Making
- FIN 486 ~ ............................................................... 3 credits
  Strategic Financial Management

Students must choose three of the following courses:

- FIN 366 ~ ............................................................... 3 credits
  Financial Institutions
- FIN 375 ~ ............................................................... 3 credits
  Financial Management in the Small Business
- FIN 402 ~ ............................................................... 3 credits
  Investment Fundamentals and Portfolio Management
- FIN 410 ~ ............................................................... 3 credits
  Working Capital Management
- FIN 415 ~ ............................................................... 3 credits
  Corporate Risk Management
- FIN 420 ~ ............................................................... 3 credits
  Personal Financial Planning
- FIN 444 ~ ............................................................... 3 credits
  Mergers, Acquisitions, and Corporate Restructuring
- FIN 467 ~ ............................................................... 3 credits
  Real Estate Investment

**Global Management Concentration**

The Global Business concentration emphasizes fundamental principles and practices of conducting global business activities. Components include: international marketing, international trade and investment, global finance, global human resource management, and global value-chain management. Students will integrate advanced topics in global business through real-life applications. The program promotes the development of a "global mindset" and reflects the dynamic nature of global business realities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-gm.

- GBM 380 ~ ............................................................. 3 credits
  Global Business
- GBM 381 ~ ............................................................. 3 credits
  International Trade
- HRM 350 ~ ............................................................ 3 credits
  International Human Resource Management
- ISCOM 383 ~ ......................................................... 3 credits
  International Value Chain Management
- GBM 489 ~ ............................................................. 3 credits
  Strategic Topics in Global Business Management

**Sustainable Enterprise Management Concentration**

The Sustainable Enterprise Management concentration will prepare students for management careers based on sustainable business practices. The program emphasizes the development of skills in operating standards, enterprise planning, social responsibility, and sustainable management techniques. Upon completion of this program students will possess the knowledge and skills needed to manage business enterprises for a sustainable future.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sm.

- MGT 360 ~ ............................................................. 3 credits
  Green and Sustainable Enterprise Management
- MGT 470 ~ ............................................................. 3 credits
  Sustainable Enterprise Planning

Students must choose three of the following courses:

- BUS 327 ~ ............................................................. 3 credits
  The Sustainable Organization
- BUS 372 ~ ............................................................. 3 credits
  Business Sustainability Standards
- ECO 370 ~ ............................................................. 3 credits
  Real Estate Investment
Environmental Economics
MGT 380 ~ ................................................................. 3 credits
Organizational Change Management
MGT 403 ~ ................................................................. 3 credits
Environmental Management Systems
MGT 404 ~ ................................................................. 3 credits
Green Marketing
MGT 441 ~ ................................................................. 3 credits
Business Models in Early-stage Enterprises
MGT 445 ~ ................................................................. 3 credits
Market Discovery and Validation in Early-stage Enterprises
MGT 446 ~ ................................................................. 3 credits
Implementing Entrepreneurship in Early-stage Enterprises

Human Resource Management Concentration

The Human Resource Management Concentration helps students develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The concentration addresses the legal and ethical components of the decision making process involved in the human resources environment.

The Human Resource Management Concentration introduces students to the basic concepts of human resource management, and allows further study in the areas of employment law, risk management, recruitment and selection of employees, international HR, change management, compensation and benefits, employee development, and performance management. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

HRM 300 ~ ................................................................. 3 credits
Fundamentals of Human Resource Management
HRM 498 ~ ................................................................. 3 credits
Strategic Human Resource Management and Emerging Issues

Students must choose three of the following courses:

HRM 310 ~ ................................................................. 3 credits
Change Management
HRM 324 ~ ................................................................. 3 credits
Total Compensation
HRM 326 ~ ................................................................. 3 credits
Employee Development
HRM 420 ~ ................................................................. 3 credits
Human Resource Risk Management
MGT 434 ~ ................................................................. 3 credits
Employment Law

Management Concentration

The Management Concentration emphasizes managing human and fiscal resources within the structure, culture, and missions of any organization. The Management Concentration allows students the opportunity to examine the areas of innovation, design, and creativity in business, global business, quality management and productivity, human resource management, employment law, and organizational negotiations. Students will integrate advanced topics in management through real-world business application.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-m.

PHL 458 ~ ................................................................. 3 credits
Creative Minds and Critical Thinking
MGT 498 ~ ................................................................. 3 credits
Strategic Management

Students must choose three of the following courses:

HRM 300 ~ ................................................................. 3 credits
Fundamentals of Human Resource Management
HRM 326 ~ ................................................................. 3 credits
Employee Development
LDR 300 ~ ................................................................. 3 credits
Innovative Leadership
MGT 360 ~ ................................................................. 3 credits
Green and Sustainable Enterprise Management
MGT 411 ~ ................................................................. 3 credits
Innovative and Creative Business Thinking
MGT 426 ~ ................................................................. 3 credits
Managing Change in the Workplace
OI 361 ~ ................................................................. 3 credits
Innovation, Design, and Creativity for a Competitive Advantage
ETH 355 ~ ................................................................. 3 credits
Understanding Ethics
OI 370 ~ ................................................................. 3 credits
Innovation for the 21st Century
PHL 410 ~ ................................................................. 3 credits
Classical Logic

Marketing Concentration

The Marketing Concentration addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The marketing concentration builds upon the foundational marketing course, which allows further study in the areas of consumer behavior, advertising, marketing research, public relations, promotion measurement and analysis, and international and global marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-mkt.

MKT 435 ~ ................................................................. 3 credits
Consumer Behavior
MKT 498 ~ ................................................................. 3 credits
Integrated Marketing Strategies

Students must choose three of the following courses:

COM 340 ~ ................................................................. 3 credits
Mass Communication
Students must choose three of the following courses:

**Project Management Concentration**

The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-pm.

- COM 400 ~ .................................................................3 credits
- MKT 438 ~ .................................................................3 credits
- Public Relations
- BRM 353 ~ .................................................................3 credits
- Product and Brand Management
- MKT 411 ~ .................................................................3 credits
- Green Marketing
- MKT 431 ~ .................................................................3 credits
- Small Business Marketing
- MKT 441 ~ .................................................................3 credits
- Marketing Research
- CPMGT 300 ~ .............................................................3 credits
- Project Management
- CPMGT 301 ~ .............................................................3 credits
- Strategic Portfolio and Project Management
- CPMGT 302 ~ .............................................................3 credits
- Procurement and Risk Management
- CPMGT 303~ ..............................................................3 credits
- Project Estimating and Control Techniques
- CPMGT 305 ~ .............................................................3 credits
- Project Management Capstone

**Public Sector Concentration**

The Public Sector concentration focuses on the efficient and effective utilization of public resources to achieve the public purpose within a state, local, or not-for-profit environment. The concentration emphasizes the foundations of public policy, program development, implementation and evaluation, human resources and labor relations, and public finance. Students will develop powerful leadership skills enabling them to successfully manage complex public programs.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-ps.

- BPA 303 ~ .................................................................3 credits
- Public Programs: Implementation and Evaluation in a Dynamic Environment
- BPA 406 ~ .................................................................3 credits
- The Public Leader: Integration and Application
- Students must choose three of the following courses:
  - BPA 301 ~ .................................................................3 credits
  - Foundations of Public Administration
  - HRM 330 ~ ..............................................................3 credits
  - Human Resources and Labor Relations in Public Service
  - FIN 380 ~ .................................................................3 credits

**Small Business Management & Entrepreneurship Concentration**

The Small Business Management concentration provides students with a course framework built around small business planning, financial management, and integrated business topics on entrepreneurship and small business management. Within the concentration, students can elect to study advanced concepts in small business marketing, leadership, family business management, operations management, and business law for entrepreneurs. They may also elect to explore in more depth either small business management or entrepreneurship studies as a function of their concentration electives. Students graduating with the Small Business Management concentration will be prepared to address the challenges and opportunities specific to small business management and entrepreneurship.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sbe.

- MGT 401 ~ .................................................................3 credits
- The Small Business: Structure, Planning and Funding
- MGT 418 ~ .................................................................3 credits

Food and Beverage Management
MGT 373 ~ ................................................................. 3 credits
Events and Recreation Management

The University reserves the right to modify the required course of study. Please note that within each state, concentration availability may vary by campus location.

Additional Admission Requirements BSB

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

Degree Requirements for the BSB

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
  - Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Bachelor of Science in Business

General Education Requirements for the BSB

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
A Track must include: COMM 215, equivalent or higher
B Track must include: COM 170 and COM 172
Mathematics Requirement(s) 6 credits
Must include MTH 209 or higher

Science & Technology Requirement(s) 6 credits
B Track must include: SCI 163
Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement(s) 6 credits
B Track must include: HUM 114

Social Science Requirement(s) 6 credits
B Track must include: PSY 211

Additional Liberal Arts Requirement(s) 6 credits

Interdisciplinary Requirement(s) 18 credits
B Track must include: FP 120

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSB for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
A Track must include: COMM 215 or higher
B Track must include: COM 170 and COM 172
Mathematics Requirement(s) 6 credits
Must include MTH 220
Science & Technology Requirement(s) 9 credits
B Track must include: SCI 163
Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
B Track must include: HUM 114

Social Science Requirement(s) 9 credits
B Track must include: PSY 211

Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits

Interdisciplinary Requirement(s) 9 credits
B Track must include: FP 120

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSB

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Additional Residency Requirements and Course Waivers for the BSB**

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the required course of study may not be waived: ACC 497, BPA 406, BUS 475, CPMGT 305, FIN 486, GBM 489, GEN 195, GEN 200, HRM 498, MGT 420, MGT 465, MGT 470, MGT 488, MGT 498, MKT 498, OI 466, SUS 300

**Course Descriptions for the BSB**

**GEN 200** ................................................................. 3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**GEN 195** ................................................................. 3 credits

**Foundations of University Studies**

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

**BCOM 275** ................................................................. 3 credits

**Business Communications and Critical Thinking**

This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organization's strategic direction.

**BIS 220** ................................................................. 3 credits

**Introduction to Computer Applications and Systems**

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

**MGT 230** ................................................................. 3 credits

**Management Theory and Practice**

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

**MGT 311** ................................................................. 3 credits

**Organizational Development**

This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

**ACC 290** ................................................................. 3 credits

**Principles of Accounting I**

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

**ACC 291** ................................................................. 3 credits

**Principles of Accounting II**

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

**ETH 316** ................................................................. 3 credits
Ethics and Social Responsibility

This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

ECO 372 ................................................................. 3 credits

Principles of Macroeconomics

This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ECO 365 ................................................................. 3 credits

Principles of Microeconomics

This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

LAW 421 ............................................................... 3 credits

Contemporary Business Law

This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

FIN 370 ................................................................. 3 credits

Finance for Business

This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

MKT 421 ................................................................. 3 credits

Marketing

This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

RES 351 ................................................................. 3 credits

Business Research

This course evaluates the process of conducting business research for improving decision making within an organization. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.

QNT 351 ................................................................. 3 credits

Quantitative Analysis for Business

This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.

BUS 475 ............................................................... 3 credits

Integrated Business Topics

The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.

COMM 215 ............................................................ 3 credits

Essentials of College Writing

This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ............................................................... 3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competencies and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ............................................................... 3 credits

Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ............................................................... 3 credits

Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.

MTH 209 ............................................................... 3 credits

College Mathematics II

This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting,
finance, and economics are demonstrated and discussed. A variety
of other applications, such as geometry, personal finance, science,
and engineering, are also demonstrated and discussed.

MTH 220...................................................................................3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics
include linear, polynomial, rational, radical, exponential and loga-

tithmic functions, systems of equations, sequences, series, and
probability.

CHM 110 ..........................................................3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry concep-
tually and specifically. The course will apply chemical concepts to
address relevant issues ranging from atomic structure and chemi-
ical reactions to organic and biological chemistry. The course topics
include matter and energy, chemical bonding, intermolecular
forces, chemical equilibrium, and nuclear, organic, and biological
chemistry. Students will apply these concepts using practical ex-
amples, facilitated discussions, and experiments conducted through a
virtual laboratory.

PHY 101....................................................................................3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by
examining the principle laws of physics leading to a conceptual
understanding of how these principles relate to everyday life. The
topics in this course include Newton’s laws, properties of matter,
heat and thermodynamics, electricity and magnetism, and waves.
Students will apply these principles using practical examples, facil-
ated discussions, and experiments conducted through a virtual
laboratory.

HIS 145 .....................................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, eco-

tonic, and global events which have shaped the American experi-
ence since World War II. Understanding modern American history is
a necessity in today’s ever-changing world. This course aims to
supply the tools for understanding current political, social, cul-
tural, and economic problems in the U.S. by applying an historical
perspective to analyze contemporary issues.

POL 215 .................................................................................3 credits

State and Local Political Processes
This course is designed to introduce students to state and local
government structures and processes. Government and business
relationships are particularly emphasized. Opportunities are pro-
vided for students to observe and interact with state and local gov-
ernment officials and groups and to debate public policy issues in a
local or state government meeting setting.

Course Descriptions for the Accounting Concentration

ACC 349 ...................................................................................3 credits

Cost Accounting
This course introduces cost terminology and flows, standard cost
systems, relevant costing, budgeting, inventory control, capital
asset selection, responsibility accounting, and performance mea-

ACC 421 ...................................................................................3 credits

Intermediate Financial Accounting I
This course examines the conceptual framework of accounting,
including cash versus accrual accounting, the income statement
and balance sheet, the time value of money, revenue recognition,
statement of cash flows and full disclosure issues.

ACC 422 ...................................................................................3 credits

Intermediate Financial Accounting II
This course is the second of the three part series of courses related
to intermediate accounting. This section examines the balance
sheet in more detail, including intangible assets, current liabilities
and contingencies, long-term liabilities, stockholder’s equity, and
earnings per share. The course finishes with a look at investments
and revenue recognition. Interwoven in the presentation of the
material is an assortment of ethical dilemmas that encourage dis-
cussions about how the accountant should handle specific situa-
tions.

ACC 423 ...................................................................................3 credits

Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to
intermediate accounting. This course examines owner’s equity,
investments, income taxes, pensions and post-retirement benefits,
as well as changes and error analysis. The course finishes with a
look at derivative instruments. Interwoven in the presentation of
the material is an assortment of ethical dilemmas that encourage dis-
cussions about how the accountant should handle specific situa-
tions.

ACC 497 ...................................................................................3 credits

Advanced Topics in Accounting Research
This course in accounting research provides students with an in-
depth examination of the Generally Accepted Accounting Princi-
ples (GAAP) and acceptable alternative reporting practices.
Through comprehensive case studies, students will develop the
research application skills necessary to analyze and make decisions
regarding accounting reporting dilemmas in for-profit and not-for-
profit companies.

Course Descriptions for the Administration Concentration

ACC 400 ...................................................................................3 credits

Accounting for Decision Making
This course concentrates on effective decision making as it relates
to financial activities in a business enterprise. Course topics will
include financial assets, liabilities, equity, business operations,
financial management, and financial statement analysis. Students
will have the necessary analytical tools to enhance business opera-

MGT 448 .................................................................................3 credits

Global Business Strategies
The manager’s perspective in the fields of international payments,
international trade, and investments are analyzed. Emphasis is
given to the materials and concepts that illuminate the strategies,
structure, practices, and effects of multinational enterprises.

ACC 340 ...................................................................................3 credits

Accounting Information Systems I
This course is designed to provide accounting students with the
proper mix of technical information and real-world applications.
Areas of study include fundamental concepts and technologies,
(what computers can do for business), the Internet, intranets elec-
tronic commerce, information systems development, basic project
management principles, decision support systems, and the benefits
of computer/human synergy.

BSA 375 ...................................................................................3 credits

Fundamentals of Business Systems Development
This course introduces the logical and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. Systems Development Life Cycle (SDLC) will be fundamental to the course.

**EBUS 405**................................................................. 3 credits

**e-Business Technologies**

This course examines the Internet and provides an integration of information technology subjects. Topics include the facilities, services, and trends of the Internet. The functions of information technology that support e-business are emphasized.

**ISCOM 472**............................................................. 3 credits

**Lean Enterprise**

This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

**MKT 441**................................................................. 3 credits

**Marketing Research**

This course covers basic research methodology applied to marketing issues. Students study methods and techniques for collection, analysis, and interpretation of primary and secondary data for customer and business marketing.

**MGT 437**................................................................. 3 credits

**Project Management**

This course examines project management roles and environments, the project life cycle, and various techniques of work, planning, control, and evaluation for project success.

**ETH 355**................................................................. 3 credits

**Understanding Ethics**

This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g., cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).

**OI 370**................................................................. 3 credits

**Innovation for the 21st Century**

This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

**PHL 410**................................................................. 3 credits

**Classical Logic**

This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.

**Course Descriptions for the Finance Concentration**

**FIN 419**................................................................. 3 credits

**Finance for Decision Making**

This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

**FIN 486**............................................................................... 3 credits

**Strategic Financial Management**

This course gives students the opportunity to integrate previously learned finance and accounting concepts and practices to contemporary business strategies, while improving financial decision-making and problem-solving skills. In addition, students will examine real-world financial management scenarios in order to apply best practices resulting in increased value for various types of organizations.

**FIN 366**............................................................................... 3 credits

**Financial Institutions**

This course will cover financial institutions such as insurance companies, commercial banks, investment banks and savings and loan associations. The risks facing financial institutions and how to measure and manage those risks are analyzed.

**FIN 375**............................................................................... 3 credits

**Financial Management in the Small Business**

This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

**FIN 402**............................................................................... 3 credits

**Investment Fundamentals and Portfolio Management**

This course covers the theories and practices of investments including financial markets, risk and return, securities, asset allocation and diversification. Students will utilize analytical techniques available in the investment planning and selection process in the environment in which investment decisions are made. Students will apply finance models and investment strategies to analyze and manage investments for various types of organizations.

**FIN 410**............................................................................... 3 credits

**Working Capital Management**

Working Capital Management This course covers the basics of working capital management with emphasis on how firms manage current assets and liabilities to ensure the organization has sufficient cash to pay day-to-day bills and meet short-term obligations. The balance between risk and return is emphasized. Some of the basic techniques of financial forecasting, accounts receivable and inventory management will also be explored.

**FIN 415**............................................................................... 3 credits

**Corporate Risk Management**

This course will provide students with the elements of corporate risk management in a competitive business environment. Emphasis will be placed upon the identification, measurement, management, and planning aspects of risk management, as well as trends and developments in the business environment. Insurance considerations in corporate risk management will also be addressed. Students will utilize newly acquired knowledge and techniques to develop a corporate risk management plan that will maximize value for the organization and stakeholders.

**FIN 420**............................................................................... 3 credits

**Personal Finance**
This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on investment risk and returns, markets, and analysis tools useful in assessing financial situations.

FIN 444 ...................................................................................3 credits

**Mergers, Acquisitions, and Corporate Restructuring**

This course prepares students to analyze merger and acquisition (M&A) opportunities in ways that will maximize corporate value and shareholder wealth in a competitive market environment. Special emphasis is placed on the identification, screening, selection, evaluation, and financing of M&A activities. Additionally, the course examines business failures and restructuring strategies.

FIN 467 .....................................................................................3 credits

**Real Estate Investment**

This course explores the techniques of real estate investment analysis, including financing, taxes, and decision making criteria in today’s real estate investment environment.

**Course Descriptions for the Global Management Concentration**

GBM 380 ...................................................................................3 credits

**Global Business**

This course addresses major forces in the global environment and the impact upon business strategies, operations, and decision making. Special emphasis is placed on developing a global mindset and the intricacies of the global business environment.

GBM 381 ...................................................................................3 credits

**International Trade**

This course examines the concepts and components of international trade. Emphasis is placed on applying current theories, concepts, and practices in conducting global business transactions.

HRM 390 ...................................................................................3 credits

**International Human Resource Management**

This course is an overview of international human resources management practices with emphasis on human resources challenges and opportunities facing global business enterprises. Students will examine human resources management in the global business environment. Upon completion of this course, students will be able to identify, and evaluate global HR strategies and practices to increase organizational effectiveness and efficiency.

ISCOM 383 ...............................................................................3 credits

**Global Value Chain Management**

This course describes value chain activities between buyers and sellers in international business. Emphasis is placed on global sourcing, procurement of materials and services, and on business-to-business cultural differences between countries.

GBM 489 ...................................................................................3 credits

**Strategic Topics in Global Business Management**

This course applies the principles of international trade, global monetary systems, international organizations, and economic development to make effective strategic business decisions. Emphasis is placed on utilizing improved strategic thinking and decision-making capabilities in the global environment.

**Course Descriptions for the Sustainable Enterprise Concentration**

MGT 360 ...................................................................................3 credits

**Green and Sustainable Enterprise Management**

This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.

MGT 470 ...................................................................................3 credits

**Sustainable Enterprise Planning**

This course provides an integrative discussion on sustainable enterprise planning. Special emphasis is placed on applying environmental science, systems analysis, environmental economics, resource allocation, and the regulatory environment to developing a sustainable business plan for the future.

BUS 327 ...................................................................................3 credits

**The Sustainable Organization**

This course focuses on the business practices and tools that add economic, social, and ethical value to the business resources of a sustainable enterprise. Emphasis is placed on the general science of sustainability, consumptive calculations of manufacturing, and the impact of business decisions on the environment.

BUS 372 ...................................................................................3 credits

**Business Sustainability Standards**

This course provides a regulatory and compliance overview of the local, state, and federal business sustainability standards. Special emphasis is placed on ISO requirements, LEED certification, and emerging sustainability standards for business. Students will also address compliance as a competitive advantage and the ethical responsibility of businesses to employees, the community, and the environment.

ECO 370 ...................................................................................3 credits

**Environmental Economics**

This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

MGT 380 ...................................................................................3 credits

**Organizational Change Management**

This course prepares students to be effective agents for change in the business community. This includes a step-wise framework for understanding, designing, and implementing change successfully. Special emphasis is placed on organizational change, program design, change processes, and successfully implementing both short-term and long-term change within the organization.

MGT 403 ...................................................................................3 credits

**Environmental Management Systems**

This course provides a framework for managing Environmental Management Systems (EMS). This includes continuous improvement through environmental management; facilities and supply chain management; systems integration; environmental considerations; and operational utilization of environmental management systems.

MKT 411 ...................................................................................3 credits

**Green Marketing**

This course applies the principles of sustainability and the philosophy of being environmentally green to the area of marketing. Special emphasis is placed on sustainable product design; awareness and cause marketing; public relations and greenwashing; and emerging green marketing trends.

MGT 441 ...................................................................................3 credits

Business Models in Early-stage Enterprises
This course provides an overview of business models for early-stage entrepreneurial ventures in all industries, including those in green industries and clean technology. Emphasis is placed on designing a competitive early-stage enterprise business model, the competing interests of stakeholders, the use of triple bottom line measures to guide enterprise design, forms of ownership, intellectual property, and exploring financing options—both private and public.

MKT 442 .................................................................................. 3 credits

Market Discovery and Validation in Early-stage Enterprises
This course applies entrepreneurial approaches to the discovery and validation of markets in all industries for early-stage entrepreneurial ventures, including those in green Industries and clean technology. Emphasis is placed on iterative approaches for product design; validation of customer needs in an early-stage entrepreneurial setting; and early-stage enterprise marketing needs and trends.

BUS 443 .................................................................................. 3 credits

Implementing Entrepreneurship in Early-stage Enterprises
This course focuses on the implementation of lean business models in entrepreneurial ventures in all industries, including those in green industries and clean technology. This includes the strategic application of financial planning, capital management, marketing, people management, and leadership as a means to reduce start-up risk. Emphasis is placed on adapting the business plan to the realistic needs of an early-stage owner and entrepreneur.

Course Descriptions for the Human Resource Management Concentration

HRM 300 .................................................................................. 3 credits

Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 498 .................................................................................. 3 credits

Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing businesses. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

HRM 310 .................................................................................. 3 credits

Change Management
This course examines both the human and organizational aspects of change. Topics include identifying the types and sources of change, human and organizational resistance to change, theories of managing change, and developing skills that will enable the student to lead, implement, and sustain change.

HRM 324 .................................................................................. 3 credits

Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 326 .................................................................................. 3 credits

Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 420 .................................................................................. 3 credits

Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

MGT 434 .................................................................................. 3 credits

Employment Law
This course provides an overview of federal statutes and state-regulated areas that impact the personnel function. Among the topics addressed are EEO and affirmative action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraph testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

Course Descriptions for the Management Concentration

PHL 458 ................................................................................... 3 credits

Creative Minds and Critical Thinking
In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

MGT 498 .................................................................................. 3 credits

Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

HRM 300 .................................................................................. 3 credits

Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will
provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resources professionals today.

HRM 326 ................................................................. 3 credits

**Employee Development**

This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

LDR 300 ........................................................................ 3 credits

**Innovative Leadership**

This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 360 ................................................................. 3 credits

**Green and Sustainable Enterprise Management**

This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.

MGT 411 ........................................................................ 3 credits

**Innovative and Creative Business Thinking**

This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and practice and draw upon examples from multiple industry sectors.

MGT 426 ........................................................................ 3 credits

**Managing Change in the Workplace**

This course provides an overview of methods and techniques required of supervisory and management personnel responsible for managing change. As a result of the course, students will be able to identify and develop strategies for managing the following: organizational aspects of change, including shifts in leadership, reorganizations, working conditions, technologically imposed change and workforce issues. In addition to developing strategies, students will gain expertise in applying communication strategies that effectively deal with change.

OI 361 ........................................................................ 3 credits

**Innovation, Design, and Creativity for a Competitive Advantage**

This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.

ETH 355 ........................................................................ 3 credits

**Understanding Ethics**

This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g. cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).

OJ 370 ........................................................................ 3 credits

**Innovation for the 21st Century**

This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

PHL 410 ........................................................................ 3 credits

**Classical Logic**

This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.

**Course Descriptions for the Marketing Concentration**

MKT 435 ........................................................................ 3 credits

**Consumer Behavior**

This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 498 ........................................................................ 3 credits

**Integrated Marketing Strategies**

This course provides students with an in-depth study of Integrated Marketing Communications (IMC). Emphasis will be placed on the strategic roles and integration of marketing communication elements including advertising, public relations, sales promotion, event management, media selection, and sales management.

COM 340 ........................................................................ 3 credits

**Mass Communication**

This course delves into the processes and technology of communication on societal and global levels accomplished through the print and electronic media. Content of communication studied ranges from journalism, entertainment, commerce, and advocacy to personal communication on the Internet. The dynamic changes that have taken place and are evolving today in mass media and mass communication will be considered along with predictions about the role of mass communication.

COM 400 ........................................................................ 3 credits

**Media and Society**

The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be high-
CPMGT 302 ............................................................................. 3 credits
Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.
CPMGT 301 ............................................................................. 3 credits
Strategic Portfolio and Project Management
This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.
CPMGT 302 ............................................................................. 3 credits
Procurement and Risk Management
This course explores the procurement planning process, contract-
studied. Students will study the resolution of disagreements using alternative dispute resolution systems designed to advance the public purpose.

FIN 380 ..................................................................................3 credits

Financial Management of Non-Profit Organizations
Financial Management of Non-Profit Organizations This course emphasizes the utilization of key financial concepts to effectively obtain desired goals and objectives by non-profit organizations in the private, public, and the international arenas. While profit oriented entities focus on maximizing shareholder’s wealth, non-profit organizations are concerned with deriving maximum benefit for each dollar expended on a charitable endeavor. The centrality of finance to achieve such goal will be thoroughly explored.

ACC 460 ...................................................................................3 credits

Government and Non-Profit Accounting
This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.

MKT 438 ......................................................................................3 credits

Public Relations
This course provides an introduction to the field of public relations. Areas covered are media relations; promotion; tools used in developing public relations and publicity, and improving customer satisfaction; relationship-building strategies; and ethics and public relations.

Course Descriptions for the Small Business Management & Entrepreneurship Concentration

MGT 401 ..................................................................................3 credits

The Small Business: Structure, Planning and Funding
This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

MKT 418 ..................................................................................3 credits

Evaluating New Business Opportunities
This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

FIN 375 ..................................................................................3 credits

Financial Management in the Small Business
This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

MKT 431 ..................................................................................3 credits

Small Business Marketing
Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.

MKT 465 ..................................................................................3 credits

Small Business and Entrepreneurial Planning
This course focuses on the development of a strategic business plan applicable for the needs of a small business or entrepreneurial venture. This will include the strategic and integrative application of financial planning, capital management, marketing, people management, and leadership. Special emphasis is placed on adapting business planning requirements to the realistic needs of small business owners and entrepreneurs.

Course Descriptions for the Service Sector Concentration

OI 365 .......................................................................................3 credits

Knowledge Management and Intellectual Capital
In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today’s increasingly innovative and global business environment. Students will be asked to consider a variety of topics critical to an organization’s long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational partnerships, and organizational culture.

OI 466 ......................................................................................3 credits

Organizational Innovation Integrated Project
This project-based course integrates knowledge and skills from previous organizational innovation coursework and requires business students to demonstrate their innovative, creative, and inspirational capacity to solve a real life business problem or opportunity. Using design principles, practices, and theory, students will be asked to create innovative solutions to problems or opportunities in the areas of strategy, process, product, and service.

BRM 353 ..................................................................................3 credits

Product Brand Management
This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

MKT 356 ..................................................................................3 credits

Retail Personnel Management
This course focuses on the personnel management aspects of retail management. Students will be prepared to utilize recruiting and staffing, motivating, training, and ethics concepts to effectively lead retail personnel.

HM 322 ..................................................................................3 credits

Gaming Management
This course provides an overview of the business practices and principles unique to the gaming industry. This includes an overview of the history and evolution of gaming, different venues, and the business implications of the economic and social impact of the industry. Special emphasis is placed on legal, ethical, and social issues related to gaming entertainment as a business entity.

HM 370 ..................................................................................3 credits

Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

HM 486 ..................................................................................3 credits

Trends and Emerging Issues in Hospitality
This course applies a strategic perspective to assessing new trends and emerging issues in hospitality management. Special emphasis
The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking and decision-making, finance, business law, management, marketing, organizational behavior, research and evaluation, and technology. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a **~** symbol following the course number.

**Retail Operations: Supply Management**

This course encompasses an examination of the supply side of the retail value chain including logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.

MGT 371 | 3 credits

**Lodging Management**

This course provides students with the opportunity to examine various lodging options within the hospitality industry from a managerial perspective. Special emphasis will be placed on guest services and on room division management.

MGT 372 | 3 credits

**Food and Beverage Management**

This course focuses on operating and strategic challenges facing managers in the food and beverage industry. Topics include cost control, forecasting, food safety, service standards, and staffing. Students will learn to utilize managerial tools to make sound business decisions in a food and beverage organization.

**Accounting Emphasis**

The Accounting Emphasis promotes identification with and orientation to the accounting profession and is designed to provide knowledge skills, and abilities necessary for a career in accounting. Core competencies in technology, critical thinking, and communication are emphasized throughout the curriculum. The program also utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. Students have broad exposure to varied business disciplines, including management, organizational behavior, economics, and finance, and learn how the general manager integrates these disciplines to meet the strategic goals of the organization.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at [http://www.phoenix.edu/programs/bsb-acc](http://www.phoenix.edu/programs/bsb-acc).
The Finance Emphasis emphasizes fundamental and advanced financial concepts, theories, and practices to promote well-informed financial decision making. The Finance Emphasis allows students to examine the areas of finance for decision making, financial risk management, mergers, acquisitions, and corporate restructuring, investment analysis and portfolio management, and global finance. Students will integrate advanced topics in financial management through real-world business application. Financial managers need many different skills. Interpersonal skills are important because these jobs involve managing people and working as part of a team to solve problems. Financial managers must have excellent communication skills to explain complex financial data. Since financial managers work extensively with various departments in their firm, a broad understanding of business is essential. Financial managers should be creative thinkers and problem-solvers, applying their analytical skills to business. They must be comfortable with the latest computer technology. Financial managers must have knowledge of international finance because financial operations are increasingly being affected by the global economy.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-f.

Global Management Emphasis
The Global Business emphasis emphasizes fundamental principles and practices of conducting global business activities. Components include: international marketing, international trade and investment, global finance, global human resource management, and global value-chain management. Students will integrate advanced topics in global business through real-life applications. The program promotes the development of a “global mindset” and reflects the dynamic nature of global business realities. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-gm.

Global Management Emphasis
The Global Business emphasis emphasizes fundamental principles and practices of conducting global business activities. Students must choose three of the following courses:

**Human Resource Management Emphasis**

The Human Resource Management Emphasis helps students develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The emphasis addresses the legal and ethical components of the decision making process involved in the human resources environment. The Human Resource Management Emphasis introduces students to the basic concepts of human resource management, and allows further study in the areas of employment law, risk management, recruitment and selection of employees, international HR, change management, compensation and benefits, employee development, and performance management. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

HRM 300 ~ .............................................................. 3 credits
Fundamentals of Human Resource Management

HRM 498 ~ .............................................................. 3 credits
Strategic Human Resource Management and Emerging Issues

**Students must choose three of the following courses:**

HRM 310 ~ .............................................................. 3 credits
Change Management

HRM 324 ~ .............................................................. 3 credits
Total Compensation

HRM 326 ~ .............................................................. 3 credits
Employee Development

HRM 420 ~ .............................................................. 3 credits
Human Resource Risk Management

HRM 434 ~ .............................................................. 3 credits
Employment Law

**Management Emphasis**

The Management Emphasis emphasizes managing human and fiscal resources within the structure, culture, and missions of any organization. The Management Emphasis allows students the opportunity to examine the areas of innovation, design, and creativity in business, global business, quality management and productivity, human resource management, employment law, and organizational negotiations. Students will integrate advanced topics in management through real-world business application.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-m.

PHL 458 ~ .............................................................. 3 credits
Creative Minds and Critical Thinking

MGT 498 ~ .............................................................. 3 credits
Strategic Management

**Students must choose three of the following courses:**

HRM 300 ~ .............................................................. 3 credits
Fundamentals of Human Resource Management

HRM 326 ~ .............................................................. 3 credits
Employee Development

LDR 300 ~ .............................................................. 3 credits
Innovative Leadership

MGT 360 ~ .............................................................. 3 credits
Green and Sustainable Enterprise Management

MGT 411 ~ .............................................................. 3 credits
Managing Change in the Workplace

OI 361 ~ .............................................................. 3 credits
Innovation, Design, and Creativity for a Competitive Advantage

ETH 355 ~ .............................................................. 3 credits
Understanding Ethics
Students must choose three of the following courses:

**Marketing Emphasis**
The Marketing Emphasis addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The marketing emphasis builds upon the foundational marketing course, which allows further study in the areas of consumer behavior, advertising, marketing research, public relations, promotion measurement and analysis, and international and global marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-mkt.

MKT 435 ~ ................................................................. 3 credits
Consumer Behavior
MKT 498 ~ ................................................................. 3 credits
Integrated Marketing Strategies

Students must choose three of the following courses:

**Project Management Emphasis**
The Project Management Emphasis focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-pm.

CPMGT 300 ~ ................................................................. 3 credits
Project Management
CPMGT 301 ~ ................................................................. 3 credits
Strategic Portfolio and Project Management

**Public Sector Emphasis**
The Public Sector emphasis focuses on the efficient and effective utilization of public resources to achieve the public purpose within a state, local, or not-for-profit environment. The emphasis emphasizes the foundations of public policy, program development, implementation and valuation, human resources and labor relations, and public finance. Students will develop powerful leadership skills enabling them to successfully manage complex programs.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-ps.

BPA 303 ~ ................................................................. 3 credits
Public Programs: Implementation and Evaluation in a Dynamic Environment
BPA 406 ~ ................................................................. 3 credits
The Public Leader: Integration and Application

Students must choose three of the following courses:

**Small Business Management & Entrepreneurship Emphasis**
The Small Business Management emphasis provides students with a course framework built around small business planning, financial management, and integrated business topics on entrepreneurship and small business management. Within the emphasis, students can elect to study advanced concepts in small business marketing, leadership, family business management, operations management, and business law for entrepreneurs. They may also elect to explore in more depth either small business management or entrepreneurship studies as a function of their emphasis electives. Students graduating with the Small Business Management emphasis will be prepared to address the challenges and opportunities specific to small business management and entrepreneurship.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sbe.

MGT 401 ~ ................................................................. 3 credits
The Small Business: Structure, Planning and Funding
MGT 418 ~ ................................................................. 3 credits
Evaluating New Business Opportunities
FIN 375 ~ ................................................................. 3 credits

MGT 373 ~ ................................................................. 3 credits
Events and Recreation Management

**Environmental Sustainability Emphasis**

This Environmental Sustainability emphasis provides an overview of sustainable practices and applications from the environmental science perspective. Current and historical environmental issues are evaluated by examining the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of action for environmental management. This emphasis is comprised of five categories: energy, business, agriculture, architecture and green materials, and sustainable ecosystems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-sus.

SUS 300 ~ ................................................................. 3 credits
Environmental Sustainability

**Energy and the Environment**

ENV 340 ~ ................................................................. 3 credits

**Industrial Ecology**

SUS 310 ~ ................................................................. 3 credits

**Green Building and Urban Planning**

Students must choose one of the following courses:

SUS 370 ~ ................................................................. 3 credits
Sustainable Ecosystems
SUS 380 ~ ................................................................. 3 credits
Sustainable Planning and Land Use
SUS 385 ~ ................................................................. 3 credits
Sustainable Ocean Use

The University reserves the right to modify the required course of study. Please note that within each state, emphasis availability may vary by campus location.

**Additional Admission Requirements BSB**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants must be currently employed or have access to a work environment.

**Degree Requirements for the BSB**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Bachelor of Science in Business

**General Education Requirements for the BSB**

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts Requirement(s) 6 credits
  A Track must include: COMM 215, equivalent or higher
  B Track must include: COM 170 and COM 172
- Mathematics Requirement(s) 6 credits
  Must include MTH 209 or higher
- Science & Technology Requirement(s) 6 credits
  B Track must include: SCI 163
  Must include at least three (3) credits in the physical or biological sciences
- Humanities Requirement(s) 6 credits
  B Track must include: HUM 114
- Social Science Requirement(s) 6 credits
  B Track must include: PSY 211
- Additional Liberal Arts Requirement(s) 6 credits
- Interdisciplinary Requirement(s) 18 credits
  B Track must include: EP 120
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSB
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSB
Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the required course of study may not be waived: ACC 497, BPA 406, BUS 475, CPMGT 305, FIN 486, GBM 489, GEN 195, GEN 200, HRM 498, MGT 420, MGT 465, MGT 470, MGT 488, MGT 498, MKT 498, OI 466, SUS 300

Course Descriptions for the BSB
GEN 200 .................................................................3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 195 .................................................................3 credits

Foundations of University Studies
The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

BIS 220 ...............................................................3 credits
Business Communications and Critical Thinking
This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

MGT 230 ...............................................................3 credits
Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office® tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

MGT 311 ...............................................................3 credits
Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

MGT 311 ...............................................................3 credits
Organizational Development
This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

ACC 290 ...............................................................3 credits
Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.
ACC 291 ................................................................. 3 credits

Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.
ETH 316 ..................................................................... 3 credits

Ethics and Social Responsibility
This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.
ECO 372 ................................................................. 3 credits

Principles of Macroeconomics
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 365 ................................................................. 3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
LAW 421 ................................................................. 3 credits

Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.
FIN 370 ................................................................. 3 credits

Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
MKT 421 ................................................................. 3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.
RES 351 ................................................................. 3 credits

Business Research
This course evaluates the process of conducting business research for improving decision making within an organization. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.
QNT 351 ................................................................. 3 credits

Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.
BUS 475 ................................................................. 3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
COMM 215 ............................................................ 3 credits

Essentials of College Writing
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is
designed to aid adult learners in acquiring and improving the core competencies that are necessary for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 209....................................................................................3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220....................................................................................3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 .....................................................................................3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101.....................................................................................3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 .....................................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 .....................................................................................3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Accounting Emphasis

ACC 349 .....................................................................................3 credits

Cost Accounting
This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

ACC 421 .....................................................................................3 credits

Intermediate Financial Accounting I
This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.

ACC 422 .....................................................................................3 credits

Intermediate Financial Accounting II
This course is the second of the three-part series of courses related to intermediate accounting. This section examines the balance sheet in more detail, including intangible assets, current liabilities and contingencies, long-term liabilities, stockholder's equity, and earnings per share. The course finishes with a look at investments and revenue recognition. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 423 .....................................................................................3 credits

Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner's equity, investments, income taxes, pensions and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 497 .....................................................................................3 credits

Advanced Topics in Accounting Research
This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

Course Descriptions for the Administration Emphasis

ACC 400 .....................................................................................3 credits

Accounting for Decision Making
This course concentrates on effective decision making as it relates to financial activities in a business enterprise. Course topics will include financial assets, liabilities, equity, business operations, financial management, and financial statement analysis. Students will have the necessary analytical tools to enhance business operations.

MGT 448 .....................................................................................3 credits
**Global Business Strategies**
The manager’s perspective in the fields of international payments, international trade, and investments are analyzed. Emphasis is
given to the materials and concepts that illuminate the strategies, structure, practices, and effects of multinational enterprises.

ACC 340 ........................................................................................................ 3 credits

**Accounting Information Systems I**
This course is designed to provide accounting students with the process mix of technical information and real-world applications.
Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.

BSA 375 ........................................................................................................... 3 credits

**Fundamentals of Business Systems Development**
This course introduces the logical and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. Systems Development Life Cycle (SDLC) will be fundamental to the course.

EBUS 405 ........................................................................................................... 3 credits

**e-Business Technologies**
This course examines the Internet and provides an integration of information technology subjects. Topics include the facilities, services, and trends of the Internet. The functions of information technology that support e-business are emphasized.

ISCOM 472 ........................................................................................................... 3 credits

**Lean Enterprise**
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

MKT 441 ........................................................................................................... 3 credits

**Marketing Research**
This course covers basic research methodology applied to marketing issues. Students study methods and techniques for collection, analysis, and interpretation of primary and secondary data for customer and business marketing.

MGT 437 ........................................................................................................... 3 credits

**Project Management**
This course examines project management roles and environments, the project life cycle, and various techniques of work, planning, control, and evaluation for project success.

ETH 355 ........................................................................................................... 3 credits

**Understanding Ethics**
This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g. cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).

OI 370 ........................................................................................................... 3 credits

**Innovation for the 21st Century**
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

PHL 410 ........................................................................................................... 3 credits

**Classical Logic**
This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.

sufficient cash to pay day-to-day bills and meet short-term obligations. The balance between risk and return is emphasized. Some of the basic techniques of financial forecasting, accounts receivable and inventory management will also be explored.

FIN 415 .....................................................................................3 credits

**Corporate Risk Management**

This course will provide students with the elements of corporate risk management in a competitive business environment. Emphasis will be placed upon the identification, measurement, management, and planning aspects of risk management, as well as trends and developments in the business environment. Insurance considerations in corporate risk management will also be addressed. Students will utilize newly acquired knowledge and techniques to develop a corporate risk management plan that will maximize value for the organization and stakeholders.

FIN 420 .....................................................................................3 credits

**Personal Finance**

This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on investment risk and returns, markets, and analysis tools useful in assessing financial situations.

FIN 444 .....................................................................................3 credits

**Mergers, Acquisitions, and Corporate Restructuring**

This course prepares students to analyze merger and acquisition (M&A) opportunities in ways that will maximize corporate value and shareholder wealth in a competitive market environment. Special emphasis is placed on the identification, screening, selection, evaluation, and financing of M&A activities. Additionally, the course examines business failures and restructuring strategies.

FIN 467 .....................................................................................3 credits

**Real Estate Investment**

This course explores the techniques of real estate investment analysis, including financing, taxes, and decision making criteria in today’s real estate investment environment.

**Course Descriptions for the Global Management Emphasis**

GBM 380 .....................................................................................3 credits

**Global Business**

This course addresses major forces in the global environment and the impact upon business strategies, operations, and decision making. Special emphasis is placed on developing a global mindset and the intricacies of the global business environment.

GBM 381 .....................................................................................3 credits

**International Trade**

This course examines the concepts and components of international trade. Emphasis is placed on applying current theories, concepts, and practices in conducting global business transactions.

HRM 350 .....................................................................................3 credits

**International Human Resource Management**

This course is an overview of international human resources management practices with emphasis on human resources challenges and opportunities facing global business enterprises. Students will examine human resources management in the global business environment. Upon completion of this course, students will be able to identify, and evaluate global HR strategies and practices to increase organizational effectiveness and efficiency.

ISCOM 383 .....................................................................................3 credits

**Global Value Chain Management**

This course describes value chain activities between buyers and sellers in international business. Emphasis is placed on global sourcing, procurement of materials and services, and on business-to-business cultural differences between countries.

GBM 489 .....................................................................................3 credits

**Strategic Topics in Global Business Management**

This course applies the principles of international trade, global monetary systems, international organizations, and economic development to make effective strategic business decisions. Emphasis is placed on utilizing improved strategic thinking and decision-making capabilities in the global environment.

**Course Descriptions for the Sustainable Enterprise Management Emphasis**

MGT 360 .....................................................................................3 credits

**Green and Sustainable Enterprise Management**

This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.

MGT 470 .....................................................................................3 credits

**Sustainable Enterprise Planning**

This course provides an integrative discussion on sustainable enterprise planning. Special emphasis is placed on applying environmental science, systems analysis, environmental economics, resource allocation, and the regulatory environment to developing a sustainable business plan for the future.

BUS 327 .....................................................................................3 credits

**The Sustainable Organization**

This course focuses on the business practices and tools that add economic, social, and ethical value to the business resources of a sustainable enterprise. Emphasis is placed on the general science of sustainability, consumptive calculations of manufacturing, and the impact of business decisions on the environment.

BUS 372 .....................................................................................3 credits

**Business Sustainability Standards**

This course provides a regulatory and compliance overview the local, state, and federal business sustainability standards. Special emphasis is placed on ISO requirements, LEED certification, and emerging sustainability standards for business. Students will also address compliance as a competitive advantage and the ethical responsibility of businesses to employees, the community, and the environment.

ECO 370 .....................................................................................3 credits

**Environmental Economics**

This course applies the theoretical economic tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.

MGT 380 .....................................................................................3 credits

**Organizational Change Management**

This course prepares students to be effective agents for change in the business community. This includes a step-wise framework for understanding, designing, and implementing change successfully. Special emphasis is placed on organizational change, program design, change processes, and successfully implementing both short-term and long-term change within the organization.

MGT 403 .....................................................................................3 credits

**Environmental Management Systems**
This course provides a framework for managing Environmental Management Systems (EMS). This includes continuous improvement through environmental management; facilities and supply-chain management; systems integration; environmental considerations; and operational utilization of environmental management systems.

MKT 411 .......................................................... 3 credits

Green Marketing
This course applies the principles of sustainability and the philosophy of being environmentally green to the area of marketing. Special emphasis is placed on sustainable product design; awareness and cause marketing; public relations and green-washing; and emerging going-green marketing trends.

MGT 441 .......................................................... 3 credits

Business Models in Early-stage Enterprises
This course provides an overview of business models for early-stage entrepreneurial ventures in all industries, including those in green industries and clean technology. Emphasis is placed on designing a competitive early-stage enterprise business model, the competing interests of stakeholders, the use of triple bottom line measures to guide enterprise design, forms of ownership, intellectual property, and exploring financing options—both private and public.

MKT 442 .......................................................... 3 credits

Market Discovery and Validation in Early-stage Enterprises
This course applies entrepreneurial approaches to the discovery and validation of markets in all industries for early-stage entrepreneurial ventures, including those in green Industries and clean technology. Emphasis is placed on iterative approaches for product design; validation of customer needs in an early-stage entrepreneurial setting; and early-stage enterprise marketing needs and trends.

BUS 443 .......................................................... 3 credits

Implementing Entrepreneurship in Early-stage Enterprises
This course focuses on the implementation of lean business models in entrepreneurial ventures in all industries, including those in green industries and clean technology. This includes the strategic application of financial planning, capital management, marketing, people management, and leadership as a means to reduce start-up risk. Emphasis is placed on adapting the business plan to the realistic needs of an early-stage owner and entrepreneur.

Course Descriptions for the Human Resource Management Emphasis

HRM 300 .......................................................... 3 credits

Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 498 .......................................................... 3 credits

Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HR plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

HRM 310 .......................................................... 3 credits

Change Management
This course examines both the human and organizational aspects of change. Topics include identifying the types and sources of change; human and organizational resistance to change; theories of managing change, and developing skills that will enable the student to lead, implement, and sustain change.

HRM 324 .......................................................... 3 credits

Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 326 .......................................................... 3 credits

Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 420 .......................................................... 3 credits

Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

MGT 434 .......................................................... 3 credits

Employment Law
This course provides an overview of federal statutes and state-regulated areas that impact the personnel function. Among the topics addressed are EEO and affirmative action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraph testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

Course Descriptions for the Management Emphasis

PHL 458 .......................................................... 3 credits

Creative Minds and Critical Thinking
In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will
apply critical thinking skills to contemporary creative and scientific thought.
MGT 498 .................................................................................... 3 credits

**Strategic Management**
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.
HRM 300 .................................................................................... 3 credits

**Fundamentals of Human Resource Management**
This course explores the role and relevance of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining, and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.
HRM 326 .................................................................................. 3 credits

**Employee Development**
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.
LDR 300 .................................................................................... 3 credits

**Innovative Leadership**
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.
MGT 360 .................................................................................. 3 credits

**Green and Sustainable Enterprise Management**
This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.
MGT 411 .................................................................................... 3 credits

**Innovative and Creative Business Thinking**
This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and practice and draw upon examples from multiple industry sectors.
MGT 426 ..................................................................................... 3 credits

**Managing Change in the Workplace**
This course provides an overview of methods and techniques required of supervisory and management personnel responsible for managing change. As a result of the course, students will be able to identify and develop strategies for managing the following: organizational aspects of change, including shifts in leadership, reorganizations, working conditions, technologically imposed change and workplace issues. In addition to developing strategies, students will gain expertise in applying communication strategies that effectively deal with change.
OI 361 ..................................................................................... 3 credits

**Innovation, Design, and Creativity for a Competitive Advantage**
This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.
ETH 355 .................................................................................... 3 credits

**Understanding Ethics**
This is an advanced course in moral philosophy, or ethics. Through a critical survey of theory and application, these courses examine the frameworks of moral judgment (e.g. cultural relativism, subjectivism); historically important theoretical approaches to ethics; and consider a wide variety of important moral issues such as war, animal rights, abortion, and euthanasia. (Honors Credit Only).
OI 370 ..................................................................................... 3 credits

**Innovation for the 21st Century**
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.
PHL 410 ..................................................................................... 3 credits

**Classical Logic**
This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.

**Course Descriptions for the Marketing Emphasis**
MKT 435 ..................................................................................... 3 credits

**Consumer Behavior**
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.
MKT 498 ..................................................................................... 3 credits

**Integrated Marketing Strategies**
This course provides students with an in-depth study of Integrated Marketing Communications (IMC). Emphasis will be placed on the strategic roles and integration of marketing communication elements including advertising, public relations, sales promotion, event management, media selection, and sales management.
COM 340 ..................................................................................... 3 credits

**Mass Communication**
This course delves into the processes and technology of communi-
cation on societal and global levels accomplished through the print and electronic media. Content of communication studied ranges from journalism, entertainment, commerce, and advocacy to personal communication on the Internet. The dynamic changes that have taken place and are evolving today in mass media and mass communication will be considered along with predictions about the role of mass communication.

Human Resources and Labor Relations in Public Service

This course explores the changing civil service system within the rich, varied and pluralistic public service of today. Course topics will include recruiting, staffing, employee retention, performance management, compensation, benefits, and promotion. Labor relations, with and without a collective bargaining agreement, will be studied. Students will study the resolution of disagreements using alternative dispute resolution systems designed to advance the public purpose.

FIN 380 ....................................................................................3 credits

Financial Management of Non-Profit Organizations

Financial Management of Non-Profit Organizations This course emphasizes the utilization of key financial concepts to effectively obtain desired goals and objectives by non-profit organizations in the private, public, and the international arenas. While profit-oriented entities focus on maximizing shareholder’s wealth, non-profit organizations are concerned with deriving maximum benefit for each dollar expended on a charitable endeavor. The centrality of finance to achieve such goal will be thoroughly explored.

ACC 460 ...................................................................................3 credits

MGT 356 ....................................................................................3 credits

Public Relations

This course provides an introduction to the field of public relations. Areas covered are media relations; promotion; tools used in developing public relations and publicity, and improving customer satisfaction; relationship-building strategies; and ethics and public relations.

MKT 438 ....................................................................................3 credits

The Small Business: Structure, Planning and Funding

This course provides an overview of the small business from conception through funding. Emphasis is placed on designing a competitive business model, crafting a business plan, forms of ownership and exploring funding options.

MKT 418 ....................................................................................3 credits

Evaluating New Business Opportunities

This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

FIN 375 ....................................................................................3 credits

Financial Management in the Small Business

This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

MKT 431 ....................................................................................3 credits

Small Business Marketing

Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.

MGT 465 ....................................................................................3 credits

Small Business and Entrepreneurial Planning

This course focuses on the development of a strategic business plan applicable for the needs of a small business or entrepreneurial venture. This will include the strategic and integrative application of financial planning, capital management, marketing, people management, and leadership. Special emphasis is placed on adapting business planning requirements to the realistic needs of small business owners and entrepreneurs.

Course Descriptions for the Service Sector Emphasis

OIF 365 ....................................................................................3 credits

Knowledge Management and Intellectual Capital

In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today’s increasingly innovative and global business environment. Students will be asked to consider a variety of topics critical to an organization’s long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational partnerships, and organizational culture.

OIF 466 ....................................................................................3 credits

Organizational Innovation Integrated Project

This project-based course integrates knowledge and skills from previous organizational innovation coursework and requires business students to demonstrate their innovative, creative, and inspirational capacity to solve a real life business problem or opportunity. Using design principles, practices, and theory, students will be asked to create innovative solutions to problems or opportunities in the areas of strategy, process, product, and service.

BRM 353 ....................................................................................3 credits

Product Brand Management

This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

MKT 356 ....................................................................................3 credits

Retail Personnel Management

This course focuses on the personnel management aspects of retail management. Students will be prepared to utilize recruiting and staffing, motivating, training, and ethics concepts to effectively lead retail personnel.

HM 322 ....................................................................................3 credits

Gaming Management

This course provides an overview of the business practices and principles unique to the gaming industry. This includes an overview of the history and evolution of gaming, different venues, and the business implications of the economic and social impact of the industry. Special emphasis is placed on legal, ethical, and social
issues related to gaming entertainment as a business entity.

HM 370 ..................................................................................... 3 credits

Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

HM 486 ..................................................................................... 3 credits

Trends and Emerging Issues in Hospitality
This course applies a strategic perspective to assessing new trends and emerging issues in hospitality management. Special emphasis is placed on applying a global perspective to new and emerging markets in the hospitality industry. This includes consideration of changing social and economic groups as well as shifting demand for existing and new products and services.

ISCOM 354 ............................................................................... 3 credits

Retail Operations: Supply Management
This course encompasses an examination of the supply side of the retail value chain including logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.

MGT 371 .................................................................................. 3 credits

Lodging Management
This course provides students with the opportunity to examine various lodging options within the hospitality industry from a managerial perspective. Special emphasis will be placed on guest services and on room division management.

MGT 372 .................................................................................. 3 credits

Food and Beverage Management
This course focuses on operating and strategic challenges facing managers in the food and beverage industry. Topics include cost control, forecasting, food safety, service standards, and staffing. Students will learn to utilize managerial tools to make sound business decisions in a food and beverage organization.

Course Descriptions for the Environmental Sustainability Emphasis

SUS 300 ..................................................................................... 3 credits

Environmental Sustainability
Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.

ENV 340 ..................................................................................... 3 credits

Energy and the Environment
This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.

SUS 310 ..................................................................................... 3 credits

Industrial Ecology
This course introduces students to the field of industrial ecology. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.

SUS 350 ..................................................................................... 3 credits

Green Building and Urban Planning
This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.

Students must choose one of the following courses:

SUS 370 ..................................................................................... 3 credits

Sustainable Ecosystems
In this course, students evaluate the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and manage habitats and populations.

SUS 385 ..................................................................................... 3 credits

Sustainable Planning and Land Use
In this course, students evaluate strategies that lead to the promotion of sustainable development, planning, and land use. Students develop a sustainable land use plan for natural and human-dominated landscapes and its impact on socioeconomic issues. Upon completion of the course, students are able to apply management strategies and relevant land use practices to achieve sustainability.

The Bachelor of Science in Business (Certificate Track)

The following Bachelor of Science in Business (Certificate Track) (BSB) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business
principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking and decision-making, finance, business law, management, marketing, organizational behavior, research and evaluation, and technology. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSB (Certificate Track) Program Category Requirements - A Track and B Track

Introductory Course, 3 total credits
GEN 200 (For A Track only) ................................................................................. 3 credits
Foundations for General Education and Professional Success
GEN 195 (For B Track only) ................................................................................. 3 credits
Foundations of University Studies

Communications, 3 total credits
BCOM 275 ~ ........................................................................................................ 3 credits
Business Communications and Critical Thinking

Business Information Systems, 3 total credits
BIS 220 ~ ............................................................................................................. 3 credits
Introduction to Computer Applications and Systems

Management, 6 total credits
MGT 230 ~ ............................................................................................................. 3 credits
Management Theory and Practice
MGT 311 ~ ............................................................................................................. 3 credits
Organizational Development

Accounting, 6 total credits
ACC 290 ~ ............................................................................................................. 3 credits
Principles of Accounting I
ACC 291 ~ ............................................................................................................. 3 credits
Principles of Accounting II

Ethics & Social Responsibility, 3 total credits
ETH 316 ~ ............................................................................................................. 3 credits
Ethics and Social Responsibility

Economics, 6 total credits
ECO 365 ~ ............................................................................................................. 3 credits
Principles of Microeconomics

Business Law, 3 total credits
LAW 421 ~ ............................................................................................................. 3 credits
Contemporary Business Law

Finance, 3 total credits
FIN 370 ~ ............................................................................................................. 3 credits
Finance for Business

Marketing, 3 total credits
MKT 421 ~ ............................................................................................................. 3 credits
Marketing

Research and Statistics, 6 total credits
RES 351 ~ ............................................................................................................. 3 credits
Business Research
QNT 351 ~ ............................................................................................................. 3 credits
Quantitative Analysis for Business

Business Capstone, 3 total credits
BUS 475 ~ ............................................................................................................. 3 credits
Integrated Business Topics
Students must select one concentration in a particular area of study at the time of enrollment.

Students may also complete an additional concentration. Please contact your academic representative for more information.

Human Resource Management Concentration (Certificate Track)
The Human Resource Management concentration helps students develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The concentration addresses the legal and ethical components of the decision making process involved in the human resources environment. The Human Resource Management concentration introduces students to the basic concepts of human resource management, and allows further study in the areas of employment law, risk management, recruitment and selection of employees, international HR, change management, compensation and benefits, employee development, and performance management. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

HRM 300 ~ ............................................................................................................. 3 credits
Fundamentals of Human Resource Management

HRM 324 ~ ............................................................................................................. 3 credits
Total Compensation

HRM 326 ~ ............................................................................................................. 3 credits
Employee Development

HRM 420 ~ ............................................................................................................. 3 credits
Human Resource Risk Management

HRM 498 ~ ............................................................................................................. 3 credits
Strategic Human Resource Management and Emerging Issues

Project Management Concentration (Certificate Track)
The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-pm.

CPMGT 300 ~ ............................................................................................................. 3 credits
Project Management
General Information for the BSB (Certificate Track)
The Certificate Track bachelor's programs are designed to be an option for students to earn a certificate en-route to earning the bachelor's degree. Students who completed a certificate in its entirety and who later choose to enroll in a bachelor's program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the bachelor's program.

Additional Admission Requirements for the BSB (Certificate Track)
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

Degree Requirements for the BSB (Certificate Track)
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - Students may earn a certificate in the same area of focus as the concentration en route to completing the bachelor degree. Students may apply for certificate conferment upon successful completion of both the 18 credits required for the certificate and the certificate programmatic requirements outlined in the certificate program policy.
  - Students must successfully complete the following programmatic requirements for certificate conferment:
    - Human Resource Management Certificate (HRM) - 18 credits: HRM 300, HRM 324, HRM 326, HRM 420, HRM 434, HRM 498
    - Project Management Certificate (PM) - 18 credits: CPMGT 300, CPMGT 301, CPMGT 302, CPMGT 303, CPMGT 304, CPMGT 305
    - Students can only earn one certificate en-route to completing the undergraduate program.
    - Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Bachelor of Science in Business

General Education Requirements for the BSB (Certificate Track)
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
- Communication Arts Requirement(s) 6 credits
  A Track must include: COMM 215, equivalent or higher
  B Track must include: COM 170 and COM 172
- Mathematics Requirement(s) 6 credits
  Must include MTH 209 or higher
- Science & Technology Requirement(s) 6 credits
  B Track must include: SCI 163
  Must include at least three (3) credits in the physical or biological sciences
- Humanities Requirement(s) 6 credits
  B Track must include: HUM 114
- Social Science Requirement(s) 6 credits
  B Track must include: PSY 211
- Additional Liberal Arts Requirement(s) 6 credits
  B Track must include: FP 120
- Interdisciplinary Requirement(s) 18 credits
  B Track must include: MGT 434 ~
  BSB/PMC must include: CPMGT 304 ~
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSB (Certificate Track)
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,

UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS

CPMGT 301 ~ ................................................................. 3 credits
  Strategic Portfolio and Project Management
CPMGT 302 ~ ................................................................. 3 credits

Academic Progression Requirements for the BSB (Certificate Track)
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
• Regionally or nationally accredited coursework (C- or higher grade).
• University of Phoenix Prior Learning Assessment,
• National Testing Programs, and
• ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSB (Certificate Track)
Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
The following courses in the Required Course of Study may not be waived: BUS 475, CP/MGT 305, GEN 195, GEN 200, HRM 488

Course Descriptions for the BSB (Certificate Track)
GEN 200 ................................................................. 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 195 ................................................................. 3 credits

Foundations of University Studies
The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

BCOM 275 ................................................................. 3 credits
Business Communications and Critical Thinking
This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

BIS 220 ................................................................. 3 credits
Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

MGT 230 ................................................................. 3 credits
Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

MGT 311 ................................................................. 3 credits
Organizational Development
This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

ACC 290 ................................................................. 3 credits
Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291 ................................................................. 3 credits
Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

ETH 316 ................................................................. 3 credits
Ethics and Social Responsibility
This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.
Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 365 ................................................................. 3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.
LAW 421 ............................................................. 3 credits

Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
FIN 370 .............................................................. 3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.
MKT 421 .............................................................. 3 credits

Business Research
This course evaluates the process of conducting business research for improving decision making within an organization. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.
RES 351 .............................................................. 3 credits

Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.
QNT 351 .............................................................. 3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
COMM 215 .......................................................... 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 200 ............................................................. 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
GEN 101 ............................................................. 3 credits

Skills for Professional Development
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 ............................................................. 3 credits

Skills for Lifelong Learning
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access resources successfully.
MTH 209 ............................................................. 3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

Course Descriptions for the Human Resource Management Concentration (Certificate Track)
HRM 300 ............................................................. 3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 324 .............................................................................. 3 credits

Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 326 .............................................................................. 3 credits

Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 420 .............................................................................. 3 credits

Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 498 .............................................................................. 3 credits

Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

Course Descriptions for the Project Management Concentration (Certificate Track)

CPMGT 300.............................................................................. 3 credits

Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

CPMGT 301.............................................................................. 3 credits

Strategic Portfolio and Project Management
This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

CPMGT 302.............................................................................. 3 credits

Procurement and Risk Management
This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

CPMGT 303.............................................................................. 3 credits

Project Estimating and Control Techniques
To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

CPMT 305.............................................................................. 3 credits

Project Management Capstone
This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in the prior five courses will be integrated and applied to the class project.

The Bachelor of Science in Business (Certificate Track) (Maryland-Online)

The following Bachelor of Science in Business (Certificate Track) (BSB) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Business (BSB) undergraduate degree program is designed to prepare graduates with the requisite knowledge, skills, and values to effectively apply various business principles and tools in an organizational setting. The BSB foundation is designed to bridge the gap between theory and practical application, while examining the areas of accounting, critical thinking and decision-making, finance, business law, management, marketing, organizational behavior, research and evaluation, and technology. Students are required to demonstrate a comprehensive understanding of the undergraduate business curricula through an integrated topics course.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSB (Certificate Track) Program Category Requirements - A Track and B Track

266
Human Resource Management Emphasis (Certificate Track)

The Human Resource Management emphasis introduces students to the basic concepts of human resource management, and allows further study in the areas of employment law, risk management, recruitment and selection of employees, international HR, change management, compensation and benefits, employee development, and performance management. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-hrm.

Project Management Emphasis (Certificate Track)

The Project Management emphasis focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsb-pm.

General Information for the BSB (Certificate Track)

The University reserves the right to modify the required course of study. Please note that within each state, emphasis availability may vary by campus location.
The Certificate Track bachelors programs are designed to be an option for students to earn a certificate en-route to earning the bachelors degree. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with an emphasis in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the bachelors program.

**Additional Admission Requirements for the BSB (Certificate Track)**

All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants must be currently employed or have access to a work environment.

**Degree Requirements for the BSB (Certificate Track)**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - Students may earn a certificate in the same area of focus as the emphasis en route to completing the bachelor degree. Students may apply for certificate conferral upon successful completion of both the 18 credits required for the certificate and the certificate programmatic requirements outlined in the certificate program policy.
  - Students must successfully complete the following programmatic requirements for certificate conferral:
    - Human Resource Management Certificate (HRM) - 18 credits: HRM 300, HRM 324, HRM 326, HRM 420, HRM 434, HRM 498
    - Project Management Certificate (PM) - 18 credits: CPMGT 301, CPMGT 302, CPMGT 303, CPMGT 304, CPMGT 305
  - Students can only earn one certificate en-route to completing the undergraduate program.
  - Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
    - Bachelor of Science in Business

**General Education Requirements for the BSB (Certificate Track)**

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts Requirement(s) 6 credits
  - A Track must include: COMM 215, equivalent or higher
  - B Track must include: COM 170 and COM 172
- Mathematics Requirement(s) 6 credits
  - Must include MTH 209 or higher
- Science & Technology Requirement(s) 6 credits
  - B Track must include: SCI 163
  - Must include at least three (3) credits in the physical or biological sciences
- Humanities Requirement(s) 6 credits
  - B Track must include: HUM 114
- Social Science Requirement(s) 6 credits
  - B Track must include: PSY 211
- Additional Liberal Arts Requirement(s) 6 credits
- Interdisciplinary Requirement(s) 18 credits
  - B Track must include: FP 120
  - BSB/HRMC must include: MGT 434
  - BSB/PMC must include CPMGT 304

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Academic Progression Requirements for the BSB (Certificate Track)**

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the University on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
• Students may not complete any of the First-Year Sequence courses via Directed Study.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSB

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the Required Course of Study may not be waived: BUS 475, CPMGT 305, GEN 195, GEN 200, HRM 498

Course Descriptions for the BSB (Certificate Track)

GEN 200 ................................................................................... 3 credits
Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 195 ................................................................................... 3 credits
Foundations of University Studies

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

BCOM 275 ................................................................................... 3 credits
Business Communications and Critical Thinking

This course introduces students to the foundations of communica-
tion in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organization’s strategic direction.

BIS 220 ................................................................................... 3 credits
Introduction to Computer Applications and Systems

This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.

MGT 230 ................................................................................... 3 credits
Management Theory and Practice

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

MGT 311 ................................................................................... 3 credits
Organizational Development

This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

ACC 290 ................................................................................... 3 credits
Principles of Accounting I

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

ACC 291 ................................................................................... 3 credits
Principles of Accounting II

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

ETH 316 ................................................................................... 3 credits
Ethics and Social Responsibility

This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

ECO 372 ................................................................................... 3 credits
Principles of Macroeconomics

This course provides students with the basic theories, terminolo-
y, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ECO 365 ................................................................................... 3 credits
Principles of Microeconomics

This course provides students with the basic theories, terminolo-
y, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

LAW 421 ................................................................................... 3 credits
Contemporary Business Law

This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency; partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

FIN 370 ................................................................................... 3 credits
Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long-term financing, and international finance.

MKT 421 ...................................................................................3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

BUS 475 .....................................................................................3 credits

Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.

QNT 351 ...................................................................................3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.

COMM 215 ..............................................................................3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ...................................................................................3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ...................................................................................3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 209 .....................................................................................3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

Course Descriptions for the Human Resource Management Emphasis (Certificate Track)

HRM 300 ...................................................................................3 credits

Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 324 ...................................................................................3 credits

Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 326 ...................................................................................3 credits

Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee
development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

**HRM 420** .......................... 3 credits

**Human Resource Risk Management**

This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

**HRM 498** .......................... 3 credits

**Strategic Human Resource Management and Emerging Issues**

This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

**Course Descriptions for the Project Management Emphasis**

(Certificate Track)

**CPMGT 300** .......................... 3 credits

**Project Management**

This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

**CPMGT 301** .......................... 3 credits

**Strategic Portfolio and Project Management**

This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals with objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

**CPMGT 302** .......................... 3 credits

**Procurement and Risk Management**

This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

**CPMGT 303** .......................... 3 credits

**Project Estimating and Control Techniques**

To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

**CPMT 305** .......................... 3 credits

**Project Management Capstone**

This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in the prior five courses will be integrated and applied to the class project.

**Bachelor of Science in Management**

The following Bachelor of Science in Management (BSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state.

Please contact your enrollment advisor for more information.

The Bachelor of Science in Management (BSM) degree program is designed to develop the professional knowledge and skills of cross-functional managers in any organization. The BSM degree enhances skills necessary for improved organizational effectiveness in a dynamic and evolving workplace. The curriculum focuses on the development of management roles. It emphasizes skills necessary to align resources, and to improve communication, productivity, and effectiveness. Through a participative learning environment structured for adult learners, students are taught to manage innovation and apply professional skills and knowledge. Special emphasis can be placed on key management areas, including, leadership, general management, or human resource management based on student preference.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**BSM Program Category Requirements - A Track and B Track**

**Communications, 3 total credits**

**BCOM 275 ~** .......................... 3 credits

**Business Communications and Critical Thinking**

(Prerequisite requirement only applies to B Track students)

**Management, 3 total credits**

**PHL 458 ~** .......................... 3 credits

**Creative Minds and Critical Thinking**

**Ethics and Social Responsibility, 3 total credits**

**ETH 316 ~** .......................... 3 credits

**Ethics and Social Responsibility**

**Business Law, 3 total credits**

**LAW 421 ~** .......................... 3 credits

**Contemporary Business Law**

**Research and Statistics, 3 total credits**

**RES 320 ~** .......................... 3 credits

**Foundations of Research**

**Marketing, 3 total credits**

**PSY 322 ~** .......................... 3 credits

**Consumer Psychology and Research**

**Business Information Systems, 3 total credits**
Additional Admission Requirements for the BSM

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body; GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the BSM

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
  - Students holding an associate degree from the University or a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent undergraduate degree earned at a recognized foreign institution will have that associate degree emphasis(es) noted on the student’s University of Phoenix transcript when the BSM degree is conferred. Students with an associate degree in business, management, arts, general studies, liberal arts, nursing or pre-medicine are not eligible for an emphasis.
  - Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as follows: Bachelor of Science in Management

General Education Requirements for the BSM

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits
(A Track must include: COMM 215, equivalent, or higher)

Mathematics Requirement 6 credits
(Must include MTH 209, equivalent, or higher)

Science & Technology Requirement 6 credits
(B Track must include: SCI 163)

Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement 6 credits
(B Track must include: HUM 114)

Social Science Requirement 6 credits
(B Track must include: PSY 211)

Additional Liberal Arts Requirement 6 credits
(B Track must include: GEN 195)

Interdisciplinary Requirement 18 credits
(B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSM for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
(A Track must include: COMM 215, equivalent, or higher)
(B Track must include: COMM 170 and COMM 172)

Mathematics Requirement(s) 6 credits
Must include MTH 220

Science & Technology Requirement(s) 9 credits
(B Track must include: SCI 163)

Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
(B Track students must include: HUM 114)

Social Science Requirement(s) 9 credits
(B Track must include: PSY 211)

Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits
(B Track must include: GEN 195)

Interdisciplinary Requirement(s) 9 credits
(B Track students must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSM

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence (B Track).
• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
• GEN 195 will be required as the first course in the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take BCOM 275 Business Communications and Critical Thinking as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSM

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. The 15 credit upper division BSM Business/Management Elective requirement may be satisfied by any of the following means:
• Upper division University of Phoenix Business/Management coursework.
• Upper division Business/Management transfer coursework that is acceptable for transfer and was completed within the past ten (10) years from current program enrollment agreement sign date with a grade of C- or better.
• Upper division Business/Management National Testing Program exams that are acceptable for transfer and were completed within the past ten (10) years from current program enrollment agreement sign date.
• Upper division Business/Management ACE credits (including military) that are acceptable for transfer and were completed within the past ten (10) years from current program enrollment agreement sign date.
• Upper division Business/Management Prior learning that has been assessed for credit-worthiness by either the Prior Learning Assessment department or by one of the University’s Colleges, Schools or Provost’s Office completed within the past ten (10) years from current program enrollment agreement sign date. The following courses in the Required Course of Study may not be waived: MGT 420, MGT 498.

Course Descriptions for the BSM

BCOM 275 ......................................................................................... 3 credits
Business Communications and Critical Thinking
This course introduces students to the foundations of communication in a business setting. Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

PHL 458 ......................................................................................... 3 credits
Creative Minds and Critical Thinking
In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

ETH 316 ......................................................................................... 3 credits
Ethics and Social Responsibility
This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

LAW 421 ......................................................................................... 3 credits
Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

RES 320 ......................................................................................... 3 credits
Foundations of Research
This is a course introducing the foundations of research. Research principles and the scientific method are applied to professional situations. The course is designed to equip students with an understanding of commonly employed research methodologies that can be utilized to improve productivity and increase customer satisfaction.

PSY 322 ......................................................................................... 3 credits
Consumer Psychology and Research
This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer
choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

BIS 320 ................................................................................... 3 credits

Business Information Systems
This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.

ECO 365 ................................................................................. 3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ACC 300 ............................................................................... 3 credits

Principles of Accounting
This course focuses on principles of accounting for the non-accounting student. Emphasis will be placed on the accounting equation and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and global business implications.

FIN 370 ................................................................................. 3 credits

Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

MGT 498 ............................................................................... 3 credits

Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

COMM 215 ........................................................................... 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ................................................................................ 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ................................................................................. 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving learning goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................................. 3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 209 ................................................................................. 3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220 ................................................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................................. 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................................. 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The
topics in this course include Newton's laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145................................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215................................................................................. 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science in Management Concentration in Manufacturing Sector
The Bachelor of Science in Management Concentration in Manufacturing Sector (BSM/MAN) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available in all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

BSM/MAN Program Category Requirements - A Track and B Track

Communications, 3 total credits
BCOM 275 ~ ................................................................. 3 credits
Business Communications and Critical Thinking
(The prerequisite requirement only applies to B Track students)

Management, 3 total credits

Global Sourcing and Procurement  
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSM/MAN  
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the BSM/MAN  
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - Students holding an associate degree from the University or a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent undergraduate degree earned at a recognized foreign institution will have that associate degree emphasis(es) noted on the student’s University of Phoenix transcript when the BSM degree is conferred, if applicable.
  - Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as follows: Bachelor of Science in Management

General Education Requirements for the BSM/MAN  
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits  
(A Track must include: COMM 215, equivalent, or higher)  
(B Track must include: COM 170 and COM 172)

Mathematics Requirement 6 credits  
(Must include MTH 209, equivalent, or higher)

Science & Technology Requirement 6 credits  
(B Track must include: SCI 163)

Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement 6 credits  
(B Track must include: HUM 114)

Social Science Requirement 6 credits  
(B Track must include: PSY 211)

Additional Liberal Arts Requirement 6 credits  
(B Track must include: GEN 195)

Interdisciplinary Requirement 18 credits  
(B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSM/MAN for Arkansas Students  
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits  
(A Track must include: COMM 215, equivalent, or higher)  
(B Track must include: COM 170 and COM 172)

Mathematics Requirement(s) 6 credits  
Must include MTH 220

Science & Technology Requirement(s) 9 credits  
(B Track must include: SCI 163)

Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits  
(B Track must include: HUM 114)

Social Science Requirement(s) 9 credits  
(B Track must include: PSY 211)

Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits  
(B Track must include: GEN 195)

Interdisciplinary Requirement(s) 9 credits  
(B Track students must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSM/MAN  
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence (B Track).
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
• University of Phoenix Prior Learning Assessment,
• National Testing Programs, and
• ACE evaluated Military credits.

The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is
be replacing, must be at least a 2.67 credit course, and must be
an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in
the First-Year Sequence.

• Students who list 24 or more previous college credits, as
recognized by the university on the admissions application, will
be enrolled in the A Track, must take BCOM 275 Business
Communications and Critical Thinking as the first course with
University of Phoenix and are not required to enroll in the First-
Year Sequence.

• Students who list 24 or more previous college credits, as
recognized by the University on the admissions application, and
who do not enroll in the First-Year Sequence, may not enroll in
any course from the First Year Sequence to satisfy programmatic
prerequisites, general education or elective requirements. (e.g.,
taking COM 172 instead of COMM 215)

• Students who previously completed GEN 101, GEN 200, or GEN
300 and choose to transition to the First-Year Sequence are not
required to take GEN 195.

• Students may not complete any of the First-Year Sequence
courses via Directed Study.

• Many courses in the Required Course of Study build on or
reinforce each other. To ensure that students have the requisite
skills for specific coursework certain program areas must be
satisfied before students can progress to others.

• All undergraduate students must satisfy math and English
prerequisites prior to enrolling in any course that requires math
or English as a prerequisite.

**Additional Residency Requirements and Course Waivers for
the BSM/MAN**

Students in this program may waive a maximum of 30 credits from
their required course of study on the basis of regionally or
approved nationally accredited transferable coursework.

The following courses in the Required Course of Study may not be
waived: MGT 420, MGT 498

**Course Descriptions for the BSM/MAN**

BCOM 275 ................................................................. 3 credits

*Business Communications and Critical Thinking*

This course introduces students to the foundations of communica-
tion in a business setting. Students will develop skills in critical
thinking and decision making through the forms of written com-
munication, including memos, emails, business letters, and reports.

Other topics include communication ethics and cross-cultural com-
munications, personal communication styles, solving organiza-
tional problems, and the evaluation of an organizations strategic
direction.

PHL 458 ................................................................................ 3 credits

*Creative Minds and Critical Thinking*

In this course students will analyze the thinking process from a
critical and creative perspective. The lives of prominent creative
thinkers will be examined to identify the social, historical, psycho-
logical, and cultural elements that influenced their development.
The salient aspects of creativity will be assessed along with the
relationship between creativity and critical thinking. Students will
apply critical thinking skills to contemporary creative and scientific
thought.

ETH 316 ................................................................................ 3 credits

*Ethics and Social Responsibility*

This course provides a foundational perspective for ethics and
social responsibility in relationship to individuals, organizations,
and the community. Emphasis is placed on the inter-related nature
of ethics, morality, legal responsibility, and social issues.

LAW 421 .................................................................................. 3 credits

*Contemporary Business Law*

This course reviews the US legal system, common law and its
development, organizational structures, and the regulatory envi-
ronment pertinent to business. Students will learn to critically
examine torts, crimes, and business ethics; contracts; business asso-
ciations (agency, partnerships, corporations); wills, estates, trusts,
and other legal entities; securities regulations; and investor protec-
tion.

RES 320 .................................................................................. 3 credits

*Foundations of Research*

This is a course introducing the foundations of research. Research
principles and the scientific method are applied to professional sit-
uations. The course is designed to equip students with an under-
standing of commonly employed research methodologies that can
be utilized to improve productivity and increase customer satisfac-
tion.

PSY 322 .................................................................................. 3 credits

*Consumer Psychology and Research*

This course focuses on consumer behavior and marketing research.
Topics include the cognitive processes underlying consumer
choice, descriptive consumer characteristics, and environmental
consumer behavior. This course emphasizes the implications of
consumer behavior on domestic and global marketing communica-
tions.

BIS 320 .................................................................................. 3 credits

*Business Information Systems*

This course provides instruction on the use of Business Informa-
tion Systems. Students apply Microsoft Office tools including word
processing, spreadsheet, database, and presentation software to
accomplish business objectives. Other topics include application
software and the Internet for effective problem solving, use of rele-
vant emerging technologies, and using information across different
industries.

ECO 365 .................................................................................. 3 credits

*Principles of Microeconomics*

This course provides students with the basic theories, concepts, ter-
minality, and uses of microeconomics. Students learn practical
applications for microeconomics in their personal and professional
lives through assimilation of fundamental concepts and analysis of
actual economic events.

ACC 300 .................................................................................. 3 credits

*Principles of Accounting*

This course focuses on principles of accounting for the non-
accounting student. Emphasis will be placed on the accounting
equation and transactions, financial statement preparation and
analysis, internal controls, regulatory environment, compliance,
and global business implications.

FIN 370 .................................................................................. 3 credits

*Finance for Business*

This course introduces the student to the essential elements of
finance for business. Emphasis is placed on financial manage-
Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

COMM 215 ................................................................. 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ............................................................................. 3 credits

Skills for Lifelong Learning
This course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ............................................................................. 3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access resources successfully.

GEN 300 ............................................................................. 3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220 ................................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ............................................................................. 3 credits

Introductory Chemistry
This course is designed to introduce physics at an entry level by examining the principal laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ............................................................................. 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principal laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ............................................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ............................................................................. 3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Manufacturing Sector Concentration
OI 365 ............................................................................. 3 credits

Knowledge Management and Intellectual Capital
In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today’s increasingly innovative and global business environment. Students will be asked to consider a variety of topics critical to an organization’s long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational
partnerships, and organizational culture.

MGT 420 ~ Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

HRM 420 ~ Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

ISCOM 352 ~ Logistics Management
This course provides an overview of logistics management within a supply chain operation. This includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 472 ~ Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

ISCOM 473 ~ Operations Management
This course provides an overview of operations management. Students will analyze the planning, organizing, controlling, and general management of productive resources in manufacturing and service organizations. This course also addresses the design and control of systems that are responsible for the efficient use of raw materials, labor, equipment, and facilities in the production of customer satisfying products and services.

BSM/MAN Program Category Requirements - A Track and B Track

Communications, 3 total credits
BCOM 275 ~ Business Communications and Critical Thinking
(The prerequisite requirement only applies to B Track students)

Management, 3 total credits
PHL 458 ~ Creative Minds and Critical Thinking

Ethics and Social Responsibility, 3 total credits
ETH 316 ~ Ethics and Social Responsibility

Global Sourcing and Procurement

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSM/MAN
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

Degree Requirements for the BSM/MAN
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 45 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
- Students holding an associate degree from the University or a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent undergraduate degree earned at a recognized foreign institution will have that associate degree emphasis(es) noted on the student’s University of Phoenix transcript when the BSM degree is conferred, if applicable.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as follows:
  Bachelor of Science in Management

General Education Requirements for the BSM/MAN
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits
(A Track must include COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)

Mathematics Requirement 6 credits
(Must include MTH 209, equivalent, or higher)

Science & Technology Requirement 6 credits
(B Track must include: SCI 163)

Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement 6 credits
(B Track must include: HUM 114)

Social Science Requirement 6 credits
(B Track must include: PSY 211)

Additional Liberal Arts Requirement 6 credits
(B Track must include: GEN 195)

Interdisciplinary Requirement 18 credits
(B Track must include: FP 120)

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSM/MAN
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application are required to complete the First-Year Sequence (B Track).
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:

Students will develop skills in critical thinking and decision making through the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics and cross-cultural communications, personal communication styles, solving organizational problems, and the evaluation of an organizations strategic direction.

PHL 458................................................................. 3 credits

Creative Minds and Critical Thinking

In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.

ETH 316................................................................. 3 credits

Ethics and Social Responsibility

This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter-related nature of ethics, morality, legal responsibility, and social issues.

Contemporary Business Law

This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

RES 320................................................................. 3 credits

Foundations of Research

This is a course introducing the foundations of research. Research principles and the scientific method are applied to professional situations. The course is designed to equip students with an understanding of commonly employed research methodologies that can be utilized to improve productivity and increase customer satisfaction.

PSY 322................................................................. 3 credits

Consumer Psychology and Research

This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

BIS 320................................................................. 3 credits

Business Information Systems

This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.

ECO 365................................................................. 3 credits

Principles of Microeconomics

This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ACC 300................................................................. 3 credits

Principles of Accounting

This course focuses on principles of accounting for the non-accounting student. Emphasis will be placed on the accounting equation and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and global business implications.

FIN 370................................................................. 3 credits

Finance for Business

This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
MGT 498.................................................................................. 3 credits
Strategic Management
This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

COMM 215 ................................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ............................................................................. 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ............................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ............................................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 209........................................................................... 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220............................................................................ 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ............................................................................. 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ............................................................................. 3 credits
Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ............................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215............................................................................. 3 credits
State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Manufacturing Sector Emphasis

OIF 365 ............................................................................. 3 credits
Knowledge Management and Intellectual Capital
In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today’s increasingly innovative and global business environment. Students will be asked to consider a variety of tips critical to an organization’s long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational partnerships, and organizational culture.

MGT 420............................................................................. 3 credits
Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories
of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

HRM 420 ................................................................. 3 credits

**Human Resource Risk Management**

This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

ISCOM 352 ................................................................. 3 credits

**Logistics Management**

This course provides an overview of logistics management within a supply chain operation. This includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 472 ................................................................. 3 credits

**ISCOM 473** ................................................................. 3 credits

**ISCOM 471** ................................................................. 3 credits

**Operations Management**

This course provides an overview of operations management. Students will analyze the planning, organizing, controlling, and general management of productive resources in manufacturing and service organizations. This course also addresses the design and control of systems that are responsible for the efficient use of raw materials, labor, equipment, and facilities in the production of customer satisfying products and services.

ISCOM 473 ................................................................. 3 credits

**Global Sourcing and Procurement**

This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.

**Bachelor of Science in Accounting**

The following Bachelor of Science in Accounting (BSACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Accounting (BSACC) promotes identification with, and orientation to, the accounting profession and is designed to provide knowledge and skills necessary to an accounting career. In addition to the key accounting course work at the introductory and intermediate levels, critical areas of study including auditing and taxation are required in the program. The importance of ethics and international issues are emphasized throughout the curriculum, along with core competencies in technology and communication. The program utilizes specific accounting problems solving software to provide students with practical knowledge of the accounting field. The program also addresses the goals of professional values, communications and leadership skills, strategic and critical thinking skills, and technology skills of the professional accounting environment and provides additional coverage on the International Financial Reporting Standards (IFRS). Students are also exposed to varied business disciplines including economics, statistics, business law, corporate finance, and marketing to provide the general business overview and context necessary for accounting studies. This program is consistent with generally accepted accounting principles, including the accounting processes and knowledge areas that lead to professional certification.

At the conclusion of the BSACC program:

- Graduates will be able to apply financial accounting principles to record and communicate business activities to stakeholders.
- Graduates will be able to analyze accounting financial statements to support effective fiscal decision making.
- Graduates will be able to evaluate various accounting activities in relation to ethical, legal, and professional standards.
- Graduates will be able to demonstrate an understanding of issues in the areas of government and not-for-profit accounting, international transactions, taxation, and auditing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsacc.

Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine requirements. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

This program does not meet the Minnesota State Board of Accountancy requirements to sit for the CPA examination, additional coursework is required.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Program Category Requirements - A Track and B Track**

**Communications, 3 total credits**

BIS 220 ~ ................................................................. 3 credits

**Business Communication for Accountants**

(The prerequisite requirement only applies to B Track students)

**Business Information Systems, 3 total credits**

BIS 220 ~ ................................................................. 3 credits

**Introduction to Computer Applications and Systems**
(The prerequisite requirement only applies to B Track students)

**Management, 6 total credits**
MGT 230～ .................................................................3 credits
Management Theory and Practice
MGT 311～ .................................................................3 credits
Organizational Development

**Accounting Principles, 6 total credits**
ACC 290～ .................................................................3 credits
Principles of Accounting I
ACC 291～ .................................................................3 credits
Principles of Accounting II

**Ethics, 3 total credits**
ETH 376～ .................................................................3 credits
Accounting Ethics and Professional Regulations

**Law, 3 total credits**
LAW 421～ .................................................................3 credits
Contemporary Business Law

**Economics, 6 total credits**
ECO 365～ .................................................................3 credits
Principles of Microeconomics
ECO 372～ .................................................................3 credits
Principles of Macroeconomics

**Marketing, 3 total credits**
MKT 421～ .................................................................3 credits
Marketing

**Finance, 3 total credits**
FIN 370～ .................................................................3 credits
Finance for Business

**Quantitative Studies, 3 total credits**
QNT 351～ .................................................................3 credits
Quantitative Analysis for Business

**Strategy, 3 total credits**
BUS 475～ .................................................................3 credits
Integrated Business Topics

**Accounting Information Systems, 3 total credits**
ACC 340～ .................................................................3 credits
Accounting Information Systems I

**Cost Accounting, 3 total credits**
ACC 349～ .................................................................3 credits
Cost Accounting

**Intermediate Accounting, 9 total credits**
ACC 421～ .................................................................3 credits
Intermediate Financial Accounting I
ACC 422～ .................................................................3 credits
Intermediate Financial Accounting II
ACC 423～ .................................................................3 credits
Intermediate Financial Accounting III

**Tax, 3 total credits**
Students must choose one of the following courses:
ACC 455～ .................................................................3 credits

Corporate Taxation
ACC 456～ .................................................................3 credits
Individual/Estate Taxation

**Government & Non-Profit Accounting, 3 total credits**
ACC 460～ .................................................................3 credits
Government and Non-Profit Accounting

**Auditing, 6 total credits**
ACC 491～ .................................................................3 credits
Contemporary Auditing I
ACC 492～ .................................................................3 credits
Contemporary Auditing II

**Accounting Research, 3 total credits**
ACC 497～ .................................................................3 credits
Advanced Topics in Accounting Research

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the BSACC**
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

**Degree Requirements for the BSACC**
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 57 upper division credits.
  - A minimum of 48 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- The diploma awarded for this program will read as: Bachelor of Science in Accounting

**General Education Requirements for the BSACC**
A minimum of 48 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts Requirement 6 credits
  *(A Track must include: COMM 215, equivalent, or higher)*
  *(B Track must include: COM 170 and COM 172)*

- Mathematics Requirement 6 credits
  *(Must include MTH 209, equivalent, or higher)*

- Science & Technology Requirement 6 credits
  *(B Track must include: SCI 163)*
  *(Must include at least three (3) credits in the physical or biological sciences)*

- Humanities Requirement 6 credits
  *(B Track must include: HUM 114)*
All FYS requirements must be satisfied prior to enrolling in any other program applicable course.

First-Year Sequence students must satisfy all seven (7) courses in the First-Year Sequence prior to enrolling in any other program applicable course.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Social Science Requirement 6 credits
(B Track must include: PSY 211)
Additional Liberal Arts Requirement 3 credits
(B Track must include: GEN 195)
Interdisciplinary Requirement 15 credits
(B track must include: FP 120)
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSACC for Arkansas Students

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
(A Track must include COMM 215, equivalent, or higher)
(B Track must include: COM 170 and COM 172)
Mathematics Requirement(s) 6 credits
Must include MTH 220
Science & Technology Requirement(s) 9 credits
(B Track must include: SCI 163)
Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
(B Track must include: HUM 114)
Social Science Requirement(s) 9 credits
(B Track must include: PSY 211)
Must include: HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits
(B Track must include: GEN 195)
Interdisciplinary Requirement(s) 6 credits
(B Track must include: FP 120)
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSACC

• All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.

   The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take BCOM 230 Business Communication for Accountants as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, must take BCOM 230 Business Communication for Accountants as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, must take BCOM 230 Business Communication for Accountants as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSACC

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. The following courses in the required course of study may not be waived: ACC 497 and BCOM 230, BUS 475.

Course Descriptions for the BSACC

BCOM 230 ............................................................................... 3 credits

Business Communication for Accountants

This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

BIS 220 .......................................................................................... 3 credits
Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.
MGT 230 ................................................................. 3 credits

Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.
MGT 311 ................................................................. 3 credits

Organizational Development
This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.
ACC 290 ................................................................. 3 credits

Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.
ACC 291 ................................................................. 3 credits

Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.
ETH 376 ................................................................. 3 credits

Accounting Ethics and Professional Relations
This course provides a foundation in the nature of ethics, moral, legal, and social issues in the accounting and business environments. Students learn topics including ethical reasoning, dealing with controversial issues, and the roles and responsibilities of accounting and auditing professionals. Other topics include a discussion of the AICPA Code of Professional Conduct and the Sarbanes-Oxley Act.
LAW 421 ................................................................. 3 credits

Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.
ECO 365 ................................................................. 3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 372 ................................................................. 3 credits

Principles of Macroeconomics
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
MKT 421 ................................................................. 3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.
FIN 370 ................................................................. 3 credits

Quantitative Analysis for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
QNT 351 ................................................................. 3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
ACC 340 ................................................................. 3 credits

Accounting Information Systems I
This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.
ACC 349 ................................................................. 3 credits

Cost Accounting
This course introduces cost terminology and flows, standard cost
systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

ACC 421 ................................................................. 3 credits
Intermediate Financial Accounting I
This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.

ACC 422 ................................................................. 3 credits
Intermediate Financial Accounting II
This course is the second of the three part series of courses related to intermediate accounting. This section examines the balance sheet in more detail, including intangible assets, current liabilities and contingencies, long-term liabilities, stockholder's equity, and earnings per share. The course finishes with a look at investments and revenue recognition. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 423 ................................................................. 3 credits
Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner’s equity, investments, income taxes, pension and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Intertwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 455 ................................................................. 3 credits
Corporate Taxation
This course is a basic introduction to federal corporate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

ACC 456 ................................................................. 3 credits
Individual/Estate Taxation
This course is a basic introduction to federal individual and estate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

ACC 460 ................................................................. 3 credits
Government and Non-Profit Accounting
This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.

ACC 491 ................................................................. 3 credits
Contemporary Auditing I
This course is the first in a two-part series that deals with auditing a company’s financial reports, internal controls, and Electronic Data Processing (EDP) systems. Topics include auditing standards, evidence, audit planning and documentation, materiality and risk, internal control, statistical tools, and the overall audit plan and program.

ACC 492 ................................................................. 3 credits
Contemporary Auditing II
This course is the second in a two-part series that deals with auditing a company’s financial reports, internal controls, and Electronic Data Processing (EDP) systems. Topics include the personnel and payroll system, inventory, capital acquisition cycle, selected balance sheet and income statement accounts, audit reports, assurances and other services, professional ethics, and legal responsibilities.

ACC 497 ................................................................. 3 credits
Advanced Topics in Accounting Research
This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

COMM 215 ........................................................... 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 200 ................................................................. 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.

MTH 209 ................................................................. 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College
Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

MTH 220 ........................................................................................................ 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ........................................................................................................ 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ........................................................................................................ 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ........................................................................................................ 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ........................................................................................................ 3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Bachelor of Science/Concentration in Accounting (Ohio)

The following Bachelor of Science/Concentration in Accounting (BSACC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Accounting (BSACC) promotes identification with, and orientation to, the accounting profession and is designed to provide knowledge and skills necessary to an accounting career. In addition to the key accounting course work at the introductory and intermediate levels, critical areas of study including auditing and taxation are required in the program. The importance of ethics and international issues is emphasized throughout the curriculum, along with core competencies in technology and communication. The program utilizes specific accounting problem-solving software to provide students with practical knowledge of the accounting field. The program also addresses the goals of professional values, communications and leadership skills, strategic and critical thinking skills, and technology skills of the professional accounting environment and provides additional coverage on the International Financial Reporting Standards (IFRS). Students are also exposed to varied business disciplines including economics, statistics, business law, corporate finance, and marketing to provide the general business overview and context necessary for accounting studies. This program is consistent with generally accepted accounting principles, including the accounting processes and knowledge areas that lead to professional certification.

At the conclusion of the BSACC program:

- Graduates will be able to apply financial accounting principles to record and communicate business activities to stakeholders.
- Graduates will be able to analyze accounting financial statements to support effective fiscal decision making.
- Graduates will be able to evaluate various accounting activities in relation to ethical, legal, and professional standards.
- Graduates will be able to demonstrate an understanding of issues in the areas of government and not-for-profit accounting, international transactions, taxation, and auditing.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsacc.

Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine requirements. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements - A Track and B Track

Communications, 3 total credits

BCOM 230 ~ ................................................................. 3 credits

Business Communication for Accountants
(The prerequisite requirement only applies to B Track students)
Students must choose one of the following courses:

- ACC 455 ~ ................................................................. 3 credits
  Corporate Taxation
- ACC 456 ~ ................................................................. 3 credits
  Individual/Estate Taxation

**Government & Non-Profit Accounting, 3 total credits**

- ACC 460 ~ ................................................................. 3 credits
  Government and Non-Profit Accounting

**Auditing, 6 total credits**

- ACC 491 ~ ................................................................. 3 credits
  Contemporary Auditing I
- ACC 492 ~ ................................................................. 3 credits
  Contemporary Auditing II

**Accounting Research, 3 total credits**

- ACC 497 ~ ................................................................. 3 credits
  Advanced Topics in Accounting Research

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the BSACC**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants must be currently employed or have access to a work environment.

**Degree Requirements for the BSACC**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 57 upper division credits.
  - A minimum of 48 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- The diploma awarded for this program will read as: Bachelor of Science in Accounting

**General Education Requirements for the BSACC**

A minimum of 48 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts Requirement 6 credits
  (A Track must include: COMM 215, equivalent, or higher)
  (B Track must include: COM 170 and COM 172)
- Mathematics Requirement 6 credits
  (Must include MTH 209, equivalent, or higher)
- Science & Technology Requirement 6 credits
  (B Track must include: SCI 163)
  Must include at least three (3) credits in the physical or biological sciences
- Humanities Requirement 6 credits
  (B Track must include: HUM 114)
- Social Science Requirement 6 credits
  (B Track must include: PSY 211)
- Additional Liberal Arts Requirement 3 credits
  (B Track must include: GEN 195)
  Interdisciplinary Requirement 15 credits
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

**Academic Progression Requirements for the BSACC**

- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).
- Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.
- Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.
- Students may not complete any of the First-Year Sequence courses via Directed Study.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

**Additional Residency Requirements and Course Waivers for the BSACC**

Students in this program may waives a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. The following courses in the required course of study may not be waived: ACC 497, BCOM 230, BUS 475.

**Course Descriptions for the BSACC**

**Business Communication for Accountants**

This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

**Management Theory and Practice**

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

**Organizational Development**

This organizational behavior course encompasses the study of individual and group behavior in organizational settings. Students will learn to examine their role in an organization. Other topics include strategic elements of organizational behavior, workforce diversity, managing change, effective communication, and performance systems.

**Principles of Accounting I**

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

**Principles of Accounting II**

This course introduces accounting concepts in a business environ-
ment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

ETH 376................................................................. 3 credits

Accounting Ethics and Professional Relations
This course provides a foundation in the nature of ethics, moral, legal, and social issues in the accounting and business environment. Students learn topics including ethical reasoning, dealing with controversial issues, and the roles and responsibilities of accounting and auditing professionals. Other topics include a discussion of the AICPA Code of Professional Conduct and the Sarbanes-Oxley Act.

LAW 421 .................................................................................. 3 credits

Contemporary Business Law
This course reviews the US legal system, common law and its development, organizational structures, and the regulatory environment pertinent to business. Students will learn to critically examine torts, crimes, and business ethics; contracts; business associations (agency, partnerships, corporations); wills, estates, trusts, and other legal entities; securities regulations; and investor protection.

ECO 365 ................................................................................... 3 credits

Principles of Microeconomics
This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ECO 372 ................................................................................... 3 credits

Principles of Macroeconomics
This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

MKT 421 ................................................................................... 3 credits

Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

FIN 370................................................................................... 3 credits

Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

QNT 351................................................................................... 3 credits

Quantitative Analysis for Business
This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.

BUS 475................................................................................... 3 credits

Integrated Business Topics
The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.

ACC 340................................................................................... 3 credits

Accounting Information Systems I
This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies, (what computers can do for business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer/human synergy.

ACC 349................................................................................... 3 credits

Cost Accounting
This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

ACC 421................................................................................... 3 credits

Intermediate Financial Accounting I
This course examines the conceptual framework of accounting, including cash versus accrual accounting, the income statement and balance sheet, the time value of money, revenue recognition, statement of cash flows and full disclosure issues.

ACC 422................................................................................... 3 credits

Intermediate Financial Accounting II
This course is the second of the three part series of courses related to intermediate accounting. This section examines the balance sheet in more detail, including intangible assets, current liabilities and contingencies, long-term liabilities, stockholder’s equity, and earnings per share. The course finishes with a look at investments and revenue recognition. Interwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 423................................................................................... 3 credits

Intermediate Financial Accounting III
This course is the third of a three-part series of courses related to intermediate accounting. This course examines owner’s equity, investments, income taxes, pensions and post-retirement benefits, as well as changes and error analysis. The course finishes with a look at derivative instruments. Interwoven in the presentation of the material is an assortment of ethical dilemmas that encourage discussions about how the accountant should handle specific situations.

ACC 455................................................................................... 3 credits

Corporate Taxation
This course is a basic introduction to federal corporate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.
ACC 456 ................................................................. 3 credits
Individual/Estate Taxation
This course is a basic introduction to federal individual and estate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.

ACC 460 ................................................................. 3 credits
Government and Non-Profit Accounting
This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.

ACC 491 ................................................................. 3 credits
Contemporary Auditing I
This course is the first in a two-part series that deals with auditing a company’s financial reports, internal controls, and Electronic Data Processing (EDP) systems. Topics include auditing standards, evidence, audit planning and documentation, materiality and risk, internal control, statistical tools, and the overall audit plan and program.

ACC 492 ................................................................. 3 credits
Contemporary Auditing II
This course is the second in a two-part series that deals with auditing a company’s financial reports, internal controls, and Electronic Data Processing (EDP) systems. Topics include the personnel and payroll system, inventory, capital acquisition cycle, selected balance sheet and income statement accounts, audit reports, assurances and other services, professional ethics, and legal responsibilities.

ACC 497 ................................................................. 3 credits
Advanced Topics in Accounting Research
This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.

COMM 215 ............................................................. 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

MTH 209 ................................................................. 3 credits
College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

GEN 200 ................................................................. 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 101 ................................................................. 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ................................................................. 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

Associate Programs Pathways Program
Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:
• Pathways Non-degree Application
• High School Junior or Senior Standing
• Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
• Parent or guardian consent
• $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are
eligible for this program.
THIS PAGE WAS LEFT BLANK INTENTIONALLY.

Associate of Arts/Concentration in Information Technology

The following Associate of Arts/Concentration in Information Technology (AAIT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Information Technology focuses on basic understanding of programming practices, web design and the creation of web pages, local and wide area networking and information systems security. Courses build upon the fundamentals of information technology to give students the skills needed to address and solve real-world IT problems.

For more information about our graduation rates, the median debt needed to address and solve real-world IT problems, please visit our website at http://www.phoenix.edu/programs/aa-it.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology

IT 210 ~ ................................................................. 3 credits
Fundamentals of Programming with Algorithms and Logic
IT 236 ~ ................................................................. 3 credits
Intro to Web Design I
IT 237 ~ ................................................................. 3 credits
Intro to Web Design II
IT 240 ~ ................................................................. 3 credits
Introduction to LAN Technologies
IT 242 ~ ................................................................. 3 credits
Introduction to WAN Technologies
IT 244 ~ ................................................................. 3 credits
Introduction to IT Security

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAIT

• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAIT

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: UIS 101)

Interdisciplinary Requirement 3 credits
(B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Degree Requirements for AAIT

The degree requirements for this program are the following:

• Completion of a minimum of 60 credits.

• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.

• A minimum grade point average (GPA) of 2.0.

• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:

Associate of Arts
Academic Progression Requirements for the AAIT

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
  - The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class has been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAIT

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally approved nationally accredited transferable coursework.

Course Descriptions for the AAIT

IT 210 ............................ 3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 237 ............................ 3 credits
Intro to Web Design I
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia.Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

IT 236 ............................ 3 credits
Intro to Web Design II
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

IT 240 ............................. 3 credits
LAN Technologies
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

IT 242 ............................. 3 credits
Introduction to WAN Technologies
This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

IT 244 ............................. 3 credits
Intro to IT Security
General concepts of information systems security will be introduced. Content includes governmental views, positions and processes of national security. Other concepts include contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.

COM 150 .......................... 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 .......................... 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 .......................... 3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.
The following Associate of Arts/Emphasis in Information Technology (AAIT) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Emphasis in Information Technology (Maryland-OnLine)**

The Associate of Arts with an emphasis in Information Technology focuses on basic understanding of programming practices, web design and the creation of web pages, local and wide area networking and information systems security. Courses build upon the fundamentals of information technology to give students the skills needed to address and solve real-world IT problems. For more information about our graduation rates, please visit our website at http://www.phoenix.edu/programs/aait.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAIT**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AAIT**

Communication Arts Requirement 6 credits
- (A Track must include: COM 150 and COM 220)
- (B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
- (A Track must include: 3 credits in the physical or biological sciences)
- (B Track must include: SCI 162)

Science & Technology Requirement 6 credits
- (A Track must include: ETH 125)
- (B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
- (A Track must include: CRT 205)
- (B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
- (A Track must include: GEN 105)
- (B Track must include: US 101)

Interdisciplinary Requirement 9 credits
- (B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for AAIT**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D” or higher.
- A minimum grade point average (GPA) of 2.0.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

**Academic Progression Requirements for the AAIT**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.

297
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class has been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

**Additional Residency Requirements and Course Waivers for the AAIT**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**Course Descriptions for the AAIT**

**IT 210** .................................................................3 credits
*Fundamentals of Programming with Algorithms and Logic*
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

**IT 236** .................................................................3 credits
*Intro to Web Design I*
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

**IT 237** ........................................................................3 credits
*Intro to Web Design II*
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

**IT 240** .................................................................3 credits
*LAN Technologies*
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

**IT 242** ........................................................................3 credits
*Introduction to WAN Technologies*
This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WANG security considerations and planning.

**IT 244** ........................................................................3 credits
*Intro to IT Security*
General concepts of information systems security will be introduced. Content includes governmental views, positions and processes of national security. Other concepts include contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.

**COM 150** .............................................................3 credits
*Effective Essay Writing*
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**COM 220** .............................................................3 credits
*Research Writing*
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**ETH 125** .............................................................3 credits
*Critical Thinking*
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and
avoid reinforcing biases. Students are given the opportunity to
analyze and discuss various types of media—including television,
Internet, and print—to determine which sources provide the most
reliable information. Topics addressed include the relationship
between critical thinking and clear writing, credibility of sources,
rhetorical devices, fallacies, unclear or misleading language, and
the characteristics of various types of arguments.

GEN 105 ............................................................................... 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich
society. Students will develop strategies for successful distance
learning, time management, and for managing the abundance of
information available in today’s society. Students will also explore
the appropriate use of information in an academic environment.
Specific topics for the course include computing skills for distance
learning, online library use, academic honesty, and the develop-
ment of effective study skills.

Associate of Arts/Concentration in Information
Technology/Networking

The following Associate of Arts/Concentration in Information
Technology/Networking (AAIT/N) program may be offered at these
University of Phoenix campus locations: Online, depending on state
residence. The availability of programs and concentrations depend on
student demand and other factors. Not all programs may be available to
all residents of all states. Students may want to consider completing
certain courses in the Online classroom at Online rates if the program is
available via the Online modality in their state. Please contact your
enrollment advisor for more information.

The Associate of Arts in Information Technology/Networking con-
centration focuses on information systems and the analysis, design,
and security of modern computer networks. Courses emphasize
Local Area Networks, Wireless Local Area Networks, Wide Area
Networks, and network security. Students will be able to simulate
network administration tasks through remote access to real hard-
ware and software commonly used in the IT industry. Additionally,
courses include scenario-based activities, placing students in real-
world situations that allow them to apply foundational knowledge
and skills.

For more information about our graduation rates, the median debt
of students who completed the program, and other important
information, please visit our website at http://www.phoenix.edu/
programs/aait-n.

Courses requiring prerequisites are identified by a ~ symbol fol-
lowing the course number.

study.

Additional Admission Requirements for AAIT/N

• Applicants must be at least 16 years of age at the time of
  application.
• High school graduation from an institution that holds state
  approval to confer high school diplomas or are accredited or a
  candidate for accreditation at the time the student attended by
  an acceptable accrediting body, GED certificate or CHSPE
  (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending
  classes via the Online modality and students attending a
  local campus in Tennessee, including from any cross-border
  locations, must provide the university with an official High
  School transcript or official GED score (if applicable). A
  college transcript which documents high school date of
  completion or a copy of a DD-214 showing high school
  graduation or equivalency may be submitted to satisfy this
  requirement.

General Education Requirements for the AAIT/N

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)

Additional Residency Requirements and Course Waivers for the AAIT/N

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAIT/N

IT 205 .................................................................................3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 210 .....................................................................................3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 240 .....................................................................................3 credits
LAN Technologies
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

IT 241 .....................................................................................3 credits
Introduction to W-LAN Technologies
Concepts of wireless networking systems include wireless networking topologies, hardware protocols, hardware selection and implementation, interfaces with MAN, LAN and WAN networks, basic wireless security and integration concepts.

IT 242 .....................................................................................3 credits
Introduction to WAN Technologies
This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

IT 244 .....................................................................................3 credits
Intro to IT Security
General concepts of information systems security will be introduced. Content includes governmental views, positions and processes of national security. Other concepts include contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.

COM 150 ................................................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................................3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................................3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical
and modern perspectives on diversity.

CRT 205 ................................................................................... 3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to-determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................................... 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Information Technology/Networking (Maryland-Online)

The following Associate of Arts/Emphasis in Information Technology/Networking (AAIT/N) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts in Information Technology/Networking emphasis focuses on information systems and the analysis, design, and security of modern computer networks. Courses emphasize Local Area Networks, Wireless Local Area Networks, Wide Area Networks, and network security. Students will be able to simulate network administration tasks through remote access to real hardware and software commonly used in the IT industry. Additionally, courses include scenario-based activities, placing students in real world situations that allow them to apply foundational knowledge and skills.

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for AAIT/PRG**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
Associate of Arts

Academic Progression Requirements for the AAIT/PRG
• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAIT/PRG
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAIT/PRG

Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.
IT 210 ............................................................................................................. 3 credits

Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.
IT 236 .......................................................................................................... 3 credits

Intro to Web Design I
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.
IT 237 .......................................................................................................... 3 credits

Intro to Web Design II
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.
IT 215 .......................................................................................................... 3 credits

JAVA Programming
JAVA has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming in particular. The syntax and semantics of the JAVA language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java2 Software Development Kit, Student Edition V, 1.4.2_02 2003.
IT 218 .......................................................................................................... 3 credits

Introduction to C/C++
This course introduces the student to C/C++ programming. The syntax and semantics of the C/C++ programming language are used to produce simple computer programs.
COM 150 .................................................................................................... 3 credits

Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
COM 220 .................................................................................................... 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
ETH 125 ................................................................................... 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................................... 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................................... 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Emphasis in Information Technology/Programming (Maryland-Online)

The following Associate of Arts/Emphasis in Information Technology/Programming (AAIT/PRG) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the A and B Concentration in Information Technology/Programming - Track and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

A concentration in Programming offers coursework in computer scripting and programming.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-prg.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology/Programming - Track A and B

IT 205 ~ ................................................................................... 3 credits
Management of Information Systems
IT 210 ~ ................................................................................... 3 credits
Fundamentals of Programming with Algorithms & Logic
IT 236 ~ ................................................................................... 3 credits
Intro to Web Design I
IT 237 ~ ................................................................................... 3 credits
Intro to Web Design II

IT 215 ~ ................................................................................... 3 credits
Java Programming
IT 218 ~ ................................................................................... 3 credits
Introduction to C/C++

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAIT/PRG
• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAIT/PRG

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: LIS 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AAIT/PRG

The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
• A minimum grade point average (GPA) of 2.0.
• Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts
Academic Progression Requirements for the AAIT/PRG

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

Academic Progression Requirements for the AAIT/WD

All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or emphasis courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track and must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAIT/WD

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAIT/WD

IT 205 ..........................................................3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 210 ..........................................................3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 235 ..........................................................3 credits
Image Editing and Implementation
Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop® Elements 3.0 is required for this class.

IT 236 ..........................................................3 credits
Intro to Web Design I
Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

IT 237 ..........................................................3 credits
Intro to Web Design II
This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

IT 238 ..........................................................3 credits
Web Systems
This course builds upon a foundational understanding of Web design and examines professional Web development technologies. Topics include dynamic hypertext markup language (DHMTL), interactive technologies, advanced use of presentational technologies and Web 2.0. Emphasis is placed upon the appropriate use of Web programming tools and professional development standards.

COM 150 ......................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
ETH 125 .................................................................................... 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.
CRT 205 .................................................................................... 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Information Technology/Information Technology Support

The following Associate of Arts/Concentration in Information Technology/Information Technology Support (AAIT/ITS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree with a concentration in Information Technology/Information Technology Support covers theory and practice to provide a foundation in hardware and software computer support. Online labs give students hands on experience in hardware, software, networking and security fundamentals. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ait-its.

Additional Admission Requirements for AAIT/ITS

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAIT/ITS

Communication Arts Requirement 6 credits
- (A Track must include: COM 150 and COM 220)
- (B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
- (A Track must include: 3 credits in the physical or biological sciences)
- (B Track must include: SCI 162)

Social Science Requirement 6 credits
- (A Track must include: ETH 125)
- (B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
- (A Track must include: CRT 205)
- (B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
- (A Track must include: GEN 105)
- (B Track must include: US 101)

Interdisciplinary Requirement 9 credits
- (B Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

University of Phoenix, 2013-2014

COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for AAIT/ITS**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

**Academic Progression Requirements for the AAIT/ITS**

- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  - Associate of Arts

**Additional Residency Requirements and Course Waivers for the AAIT/ITS**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally approved nationally accredited transferable coursework.

**Course Descriptions for the AAIT/ITS**

- **IT 205** ................................................................. 3 credits
  - **Management of Information Systems**
    - This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

- **IT 206** ................................................................. 3 credits
  - **PC Applications Support**
    - This course will prepare students to support Microsoft Office applications. The student will learn the product features of Word, Excel, PowerPoint, Outlook and Access. This course is based on the requirements of the Microsoft Office Specialist certification.

- **IT 280** ................................................................. 3 credits
  - **Computer Hardware Fundamentals**
    - This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.

- **IT 282** ................................................................. 3 credits
  - **Computer Software Fundamentals**
    - This course is an introduction to the fundamentals of the Vista and legacy Windows Operating Systems (98/ME, 2000/XP) for computer software configuration, file management, performance monitoring, optimization, maintenance, recover and security. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.

- **IT 284** ................................................................. 3 credits
  - **Enterprise Computer Support**
    - This course is an introduction to the roles, responsibilities, and skills required to become a professional computer support PC Technician and provide exceptional computer support service. This includes the fundamentals of customer service, effective questioning, verbal and non-verbal communication, on-site support, telephone support, remote e-commerce support, and dealing with difficult customers. This course includes remote access to hands-on, real-world customer support issues and Scenarios.

- **IT 286** ................................................................. 3 credits
  - **Computer Maintenance and Troubleshooting**
    - This course is an introduction to computer hardware and software maintenance and troubleshooting. Each Module of the course will focus on typical problem scenarios, diagnostics, procedures and solutions. The final Module of this course provides you with a problem scenario to demonstrate your understanding of diagnostic skills and solution implementation. This course includes remote access to hands-on LiveLabs and Scenarios.

- **COM 150** .......................................................... 3 credits
  - **Effective Essay Writing**
    - In this course, students develop academic writing skills. Students...

Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................. 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................. 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAIT/DBD
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAIT/DBD
IT 205 ........................................................................................3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.
IT 210 ........................................................................................3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.
IT 260 ........................................................................................3 credits
Introduction to Desktop Databases
This course will cover the use desktop database software to create small database applications. Emphasis will be placed on creating databases and forms. Hands-on experience in the installation, design, and debugging of desktop database software will be included in this course.
IT 261 ........................................................................................3 credits
Advanced Desktop Databases
This course is a continuation in the study of desktop database software. Emphasis will be placed on database design, reporting, queries and data analysis using desktop database software.
IT 264 ........................................................................................3 credits
Introduction to SQL
This course provides an introduction to the Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.
IT 265 ........................................................................................3 credits
Managing the Database Environment
This course provides an introduction to the installation, configuration, support, availability and recovery databases. The considerations for database administration addressing the requirements for user access, security, backup and recovery will be covered in this course.
COM 150 ..................................................................................3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ........................................................................................................ 3 credits

Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ........................................................................................................ 3 credits

Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ........................................................................................................ 3 credits

Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ........................................................................................................ 3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

COM 220 ........................................................................................................ 3 credits

Associate of Arts/Emphasis in Information Technology/Database Development Emphasis
(Maryland-Online)

The following Associate of Arts/Emphasis in Information Technology/Database Development Emphasis (AAIT/DBD) degree program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This emphasis focuses on the installation and programming of database applications in the business environment. The development of queries and reports from a database are addressed in this program as well as the backup, recovery, and security of databases. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-db.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Emphasis in Information Technology/Database Development - Track A and B

IT 205~ ............................................................. 3 credits
Management of Information Systems
IT 210~ ............................................................. 3 credits
Fundamentals of Programming with Algorithms & Logic
IT 260~ ............................................................. 3 credits
Intro to Desktop Databases
IT 261~ ............................................................. 3 credits
Advanced Desktop Databases
IT 264~ ............................................................. 3 credits

General Education Requirements for the AAIT/DBD

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)

Mathematics Requirement 6 credits
(A Track must include: SCI 162)

Science & Technology Requirement 6 credits
(A Track must include: credits in the physical or biological sciences)

Social Science Requirement 6 credits
(A Track must include: ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)

Additional Liberal Arts Requirement 3 credits
(A Track must include: UIS 101)

Interdisciplinary Requirement 9 credits
(A Track must include: FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.
Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for AAIT/DBD**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  - Associate of Arts

**Academic Progression Requirements for the AAIT/DBD**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General Education elective, or emphasis courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education totals.

**Additional Residency Requirements and Course Waivers for the AAIT/DBD**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**ETH 125** 3 credits

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

**CRT 205** 3 credits

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**GEN 105** 3 credits

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Concentration in Information Technology (Minnesota/Arkansas)**

The following Associate of Arts/Concentration in Information Technology (AAIT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts with a concentration in Information Technology focuses on basic understanding of programming practices, web design and the creation of web pages, local and wide area networking and information systems security. Courses build upon the fundamentals of information technology to give students the skills needed to address and solve real-world IT problems. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ait-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ait-mn.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Information Technology**

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ait-mn.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Information Technology**

**IT 210 ~** 3 credits

Fundamentals of Programming with Algorithms & Logic

**IT 236 ~** 3 credits

Intro to Web Design I

**IT 237 ~** 3 credits

Intro to Web Design II

**IT 240 ~** 3 credits

Introduction to LAN Technologies

**IT 242 ~** 3 credits

Introduction to WAN Technologies

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAIT**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AAIT for Arkansas Students**

- Communication Arts Requirement 6 credits
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- Mathematics Requirement 6 credits
  - Students, who reside in Arkansas, are required to complete MAT 220
  - College Algebra. The MAT 220 requirement may be satisfied with College Algebra coursework or math transfer coursework requiring College Algebra as a prerequisite.
  - Arkansas residents must include: MAT 219 and MAT 220
- Science & Technology Requirement 9 credits
  - Must include a minimum of 6 credits in lab science.
  - Students in the AAIT and AAIT/WD programs must complete IT 205 as a required Science course as this course is a prerequisite to courses in the concentration.
  - Arkansas AAIT and AAIT/WD B Track students are not required to take SCI 162.
  - The lab science requirement may also be satisfied with any science transfer coursework with a lab component.
- Social Science Requirement 9 credits
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
  - Must include: HIS 135
  - HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.
- Humanities Requirement 9 credits
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are not required to complete the First-Year Sequence.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

General Education Requirements for the AAIT for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Students in the AAIT and AAIT/WD programs must complete IT 205 as a required Science course as this course is a prerequisite to courses in the concentration.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who list 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are not required to complete the First-Year Sequence.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

Degree Requirements for the AAIT

The degree requirements for this program are the following:

- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Academic Progression Requirements for the AAIT

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
- US 101 will be required as the first course in the first block of the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade).
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.

- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.

- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAIT

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAIT

IT 210 ........................................................................................3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when
properly applied, improve program design.

**Intro to Web Design I**

Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creating quality Web page layouts, navigation, appearance, functionality, and multimedia. Used to create basic designs are Adobe® Photoshop® Elements, and the Macromedia® Studio MX 2004 software package which includes Macromedia® Dreamweaver® and Macromedia® Flash®.

**Intro to Web Design II**

This course focuses on the creation of robust, well-formatted, esthetically pleasing, text-based Web pages. Students create Web pages using Hypertext Markup Language (HTML), and discussion centers on how to publish completed pages and advertise those pages on the Web.

**LAN Technologies**

This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

**Introduction to WAN Technologies**

This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

**Effective Essay Writing**

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

**Management of Information Systems**

This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ...................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Information Technology/Networking (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Information Technology/Networking (AAIT/N) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts in Information Technology/Networking concentration focuses on information systems and the analysis, design, and security of modern computer networks. Courses emphasize Local Area Networks, Wireless Local Area Networks, Wide Area Networks, and network security. Students will be able to simulate network administration tasks through remote access to real hardware and software commonly used in the IT industry. Additionally, courses include scenario-based activities, placing students in real-world situations that allow them to apply foundational knowledge and skills.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ait-n.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Concentration in Information Technology/Networking - Track A and B

IT 205 ~ .....................................................................................3 credits
Management Information Systems
IT 210 ~ .....................................................................................3 credits
Fundamentals of Programming with Algorithms and Logic
IT 240 ~ .....................................................................................3 credits
Intro to LAN Technologies
IT 241 ~ .....................................................................................3 credits

Intro to W-LAN Technologies
IT 242 ~ .....................................................................................3 credits
Intro to WAN Technologies

Additional Admission Requirements for AAIT/N

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAIT/N for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Must include a minimum of 6 credits in lab science. The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BSC 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

General Education Requirements for the AAIT/N for Minnesota
Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Social Science Requirement 9 credits
(A Track must include: ETH 125)

(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for the AAIT/N

The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Academic Progression Requirements for the AAIT/N

• All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.
• US 101 will be required as the first course in the first block of the First-Year Sequence.
• All FYS requirements must be satisfied prior to enrolling in any other General education elective, or concentration courses.
• With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment,
  • National Testing Programs, and
  • ACE evaluated Military credits.
  • The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
• All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for the AAIT/N

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAIT/N

IT 205 ........................................................................................................ 3 credits
Management of Information Systems
This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 210 ........................................................................................................ 3 credits
Fundamentals of Programming with Algorithms and Logic
This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 240 ........................................................................................................ 3 credits
LAN Technologies
This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

IT 241 ........................................................................................................ 3 credits
Introduction to W-LAN Technologies
Concepts of wireless networking systems include wireless networking topologies, hardware protocols, hardware selection and implementation, interfaces with MAN, LAN and WAN networks,
basic wireless security and integration concepts.

**IT 242** .................................................................3 credits

**Introduction to WAN Technologies**

This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

**COM 150** .............................................................3 credits

**Effective Essay Writing**

Use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**COM 220** .............................................................3 credits

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**MAT 219** .............................................................3 credits

**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**MAT 220** .............................................................3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

**BIO 100** .............................................................4 credits

**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

**CHM 109** .............................................................3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**HIS 135** .............................................................3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

**ETH 125** .............................................................3 credits

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

**CRT 205** .............................................................3 credits

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media—including television, Internet, and print—to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

**GEN 105** .............................................................3 credits

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Associate of Arts/Concentration in Information Technology/Web Design (Minnesota/Arkansas)**

The following Associate of Arts/Concentration in Information Technology/Web Design (AAIT/WD) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree with a concentration in Information Technology/Web Design focuses on the application of web author-
Applicants must be at least 16 years of age at the time of application.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aait-wd.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Concentration in Information Technology/Web Design - Track A and B**

IT 210 ~ ................................................................. 3 credits  
Fundamentals of Programming with Algorithms and Logic
IT 235 ~ ................................................................. 3 credits  
Image Editing and Implementation
IT 236 ~ ................................................................. 3 credits  
Intro to Web Design I
IT 237 ~ ................................................................. 3 credits  
Intro to Web Design II
IT 238 ~ ................................................................. 3 credits  
Web Systems

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for AAIT/WD**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

**General Education Requirements for the AAIT/WD for Arkansas Students**

Communication Arts Requirement 6 credits  
(A Track must include: COM 150 and COM 220)  
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Arkansas residents must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits

Must include a minimum of 6 credits in lab science.

Students in the AAIT and AAIT/WD programs must complete IT 205 as a required Science course as this course is a prerequisite to courses in the concentration.

Arkansas AAIT and AAIT/WD B Track students are not required to take SCI 162.

The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Social Science Requirement 9 credits  
(A Track must include: ETH 125)  
(B Track must include: PSY 201 and ETH 125)  
Must include: HIS 135

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits  
(A Track must include: CRT 205)  
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits  
(A Track must include: GEN 105)  
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

**General Education Requirements for the AAIT/WD for Minnesota Students**

Communication Arts Requirement 6 credits  
(A Track must include: COM 150 and COM 220)  
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Science & Technology Requirement 9 credits  
(B Track must include: SCI 162)

Students in the AAIT and AAIT/WD programs must complete IT 205 as a required Science course as this course is a prerequisite to courses in the concentration.

Social Science Requirement 9 credits  
(A Track must include: ETH 125)  
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 9 credits  
(A Track must include: CRT 205)  
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits  
(A Track must include: GEN 105)  
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for the AAIT/WD**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.

A minimum grade point average (GPA) of 2.0.

Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:

Associate of Arts

**Academic Progression Requirements for the AAIT/WD**

- All students entering associate degree programs with less than 24 previous college credits, as recognized by the university on the admissions application, will be enrolled in the B Track and are required to complete the First-Year Sequence.

This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.

IT 206 ........................................................................ 3 credits
PC Applications Support
This course will prepare students to support Microsoft Office applications. The student will learn the product features of Word, Excel, PowerPoint, Outlook and Access. This course is based on the requirements of the Microsoft Office Specialist certification.

IT 280 ........................................................................ 3 credits
Computer Hardware Fundamentals
This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, up-grading, and repair. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.

IT 282 ........................................................................ 3 credits
Computer Software Fundamentals
This course is an introduction to the fundamentals of the Vista and legacy Windows Operating Systems (98/ME, 2000/XP) for computer software configuration, file management, performance monitoring, optimization, maintenance, recover and security. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.

IT 284 ........................................................................ 3 credits
LiveLabs and Scenarios.

IT 286 ........................................................................ 3 credits
Enterprise Computer Support
This course is an introduction to the roles, responsibilities, and skills required to become a professional computer support PC Technician and provide exceptional computer support service. This includes the fundamentals of customer service, effective questioning, verbal and non-verbal communication, on-site support, telephone support, remote e-commerce support, and dealing with difficult customers. This course includes remote access to hands-on, real-world customer support issues and Scenarios.

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

**General Education Requirements for the AAIT/PRG for Minnesota Students**

- Communication Arts Requirement 6 credits (A Track must include: COM 150 and COM 220)
- Mathematics Requirement 6 credits (B Track must include: SCI 162)
- Science & Technology Requirement 9 credits (B Track must include: SCI 162)
- Social Science Requirement 9 credits (A Track must include: ETH 125)
- Humanities Requirement 9 credits (B Track must include: PSY 201 and ETH 125)
- Additional Liberal Arts Requirement 6 credits (A Track must include: GEN 105)
- Additional courses (B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Degree Requirements for the AAIT/PRG**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
- Associate of Arts

**Academic Progression Requirements for the AAIT/PRG**

- With the exception of GEN 105, US 101, FP 101, and HUM 111, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- All students entering associate degree programs with 24 or more previous college credits, as recognized by the university on the admissions application, will be enrolled in the A Track, must take GEN 105 as part of the first block, and are not required to enroll in the First-Year Sequence. ETH 125 or an appropriate writing class have been recommended by the college as the second course in the first block; however, the student may choose an alternate course.
- Students who list 24 or more previous college credits, as recognized by the university on the admissions application, and who do not enroll in the First-Year Sequence may not enroll in any course from the First-Year Sequence to satisfy General Education or Elective requirements.
- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

**Additional Residency Requirements and Course Waivers for the AAIT/PRG**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**Course Descriptions for the AAIT/PRG**

- **IT 205** ................................................................. 3 credits
- **Management of Information Systems**
  - This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.
- **IT 210** ................................................................. 3 credits
- **Fundamentals of Programming with Algorithms and Logic**
  - This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.
- **IT 236** ................................................................. 3 credits
- **Intro to Web Design I**
  - Intro to Web Design I combines the study of foundational Web design principles with the practice of Web page construction to create business and e-business Web sites. Students conceptualize, design, and refine a Web site while satisfying class assignment and final project requirements. Students explore best practices for creat-
students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 ............................................................... 3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135 ............................................................... 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

ETH 125 ............................................................... 3 credits

**Cultural Diversity**

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ............................................................... 3 credits

**Critical Thinking**

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ............................................................... 3 credits

**Skills for Learning in an Information Age**

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

**Bachelor of Science in Information Technology**

The following Bachelor of Science in Information Technology (BSIT) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and
concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Information Technology (BSIT) program is focused on the acquisition of theory and application of technical competencies associated with the information technology profession. The courses prepare students with fundamental knowledge in core technologies, such as systems analysis and design, programming, database design, network architecture and administration, Web technologies and application development, implementation and maintenance.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**A Track Required Introductory Course**

- GEN 200 ................................................................. 3 credits
  Foundations for General Education and Professional Success

**B Track Required Introductory Course**

- GEN 195 ................................................................. 3 credits
  Foundations of University Studies

**BSIT Required Course of Study - A Track and B Track**

- CIS 207 ~ ................................................................. 3 credits
  Information Systems Fundamentals
- PRG 211 ~ ................................................................. 3 credits
  Algorithms and Logic for Computer Programming
- WEB 240 ~ ................................................................. 3 credits
  Web Design Fundamentals
- POS 355 ~ ................................................................. 3 credits
  Introduction to Operating Systems
- ENG 221 ~ ................................................................. 3 credits
  Technical Writing Fundamentals
- BSA 310 ~ ................................................................. 3 credits
  Business Systems
- BSA 375 ~ ................................................................. 3 credits
  Fundamentals of Business Systems Development
- CMGT 410 ~ ................................................................. 3 credits
  Project Planning & Implementation
- DBM 380 ~ ................................................................. 3 credits
  Database Concepts
- CMGT 400 ~ ................................................................. 3 credits
  Intro to Information Assurance & Security
- NTC 362 ~ ................................................................. 3 credits
  Fundamentals of Networking
- PRG 420 ~ ................................................................. 3 credits
  Java Programming I
- MTH 221 ~ ................................................................. 3 credits
  Discrete Math for IT
- CMGT 445 ~ ................................................................. 3 credits
  Application Implementation

**Concentration in Advanced Networking**

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-bsa.

- NTC 405 ~ ................................................................. 3 credits
  Telecommunications and Networking I
- NTC 406 ~ ................................................................. 3 credits
  Telecommunications and Networking II
- NTC 409 ~ ................................................................. 3 credits
  Global Network Architecture and Design
- NTC 411 ~ ................................................................. 3 credits
  Global Network Management, Support and Security

**Concentration in Business Systems Analysis**

- POS 410 ~ ................................................................. 3 credits
  Systems Analysis Tools
- CMGT 411~ ................................................................. 3 credits
  Project Planning Management
- CMGT 413 ~ ................................................................. 3 credits
  Application Acquisition & Sourcing

**Concentration in Information Management**

- IM 300~ ................................................................. 3 credits
  Data Organization Architecture
- IM 305~ ................................................................. 3 credits
  Data Modeling
- POS 410~ ................................................................. 3 credits
  SQL for Business
- DBM 384 ~ ................................................................. 3 credits
  Special Purpose Databases
- DBM 460~ ................................................................. 3 credits
  Enterprise Database Management Systems

**Concentration in Information Systems Security**

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-iss.

- POS 420~ ................................................................. 3 credits
  Introduction to UNIX
- POS 421~ ................................................................. 3 credits
  Windows Server Networking
- CMGT 441~ ................................................................. 3 credits
  Introduction to Information Systems Security Management
- CMGT 442~ ................................................................. 3 credits
  Information Systems Risk Management
- CMGT 430~ ................................................................. 3 credits
  Enterprise Security
Concentration in Mobile Development

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-md.

Students must have access to a Mac computer to complete iOS mobile coursework or the latest Windows operating system to complete Windows mobile coursework.

MBL 400 ~ ................................................................. 3 credits
Mobile Computing

Students must complete 12 credits from the following coursework:

Android Mobile Development

MBL 402 ~ ................................................................. 3 credits
Android Mobile Development
MBL 404 ~ ................................................................. 3 credits
Android Mobile Implementation

Apple iOS Mobile Development

MBL 406 ~ ................................................................. 3 credits
iOS Mobile Development
MBL 408 ~ ................................................................. 3 credits
iOS Mobile Implementation

Windows Mobile Development

MBL 410 ~ ................................................................. 3 credits
Windows Mobile Development
MBL 412 ~ ................................................................. 3 credits
Windows Mobile Implementation

Concentration in Multimedia & Visual Communication

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-md.

VCT 300 ~ ................................................................. 3 credits
Image Editing
VCT 320 ~ ................................................................. 3 credits
Electronic Publishing
VCT 410 ~ ................................................................. 3 credits
Instructional Design
VCT 420 ~ ................................................................. 3 credits
Multimedia Development
WEB 431 ~ ................................................................. 3 credits
XML

Concentration in Software Engineering

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-se.

PRG 421 ~ ................................................................. 3 credits
Java Programming II
BSA 385 ~ ................................................................. 3 credits
Intro to Software Engineering
CSS 422 ~ ................................................................. 3 credits
Software Architecture
POS 408 ~ ................................................................. 3 credits
.NET I
POS 409 ~ ................................................................. 3 credits
.NET II

Concentration in Web Development

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-md.

VCT 300 ~ ................................................................. 3 credits
Image Editing
WEB 401 ~ ................................................................. 3 credits
Web Development
WEB 407 ~ ................................................................. 3 credits
Advanced Web Development
WEB 434 ~ ................................................................. 3 credits
Website Commercialization I
WEB 435 ~ ................................................................. 3 credits
Website Commercialization II

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSIT

All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• Applicants must be currently employed or have access to a work environment.
• Signed Hardware/Software Agreement

Degree Requirements for the BSIT

• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 42 upper division credits.
  • A minimum of 54 credits of the 120 credits must be in the general education areas approved by the University.
• A minimum grade point average (GPA) of 2.0.
• All students must complete the minimum number of credits required by their degree program.
• Students will declare a concentration at the time of enrollment.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Bachelor of Science in Information Technology

General Education Requirements for the BSIT

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement 6 credits
Students

General Education Requirements for the BSIT for Arkansas

(A Track must include COMM 215, equivalent, or higher and COMM 218)
(B Track must include: COM 170 and COM 172)
Mathematics Requirement 6 credits
(Must include MTH 220, equivalent, or higher)
Science & Technology Requirement 6 credits
(B Track must include: SCI 163)
Must include at least three (3) credits in the physical or biological sciences

Humanities Requirement 6 credits
(B Track must include: HUM 114)

Social Science Requirement 6 credits
(B Track must include: PSY 211)

Additional Liberal Arts Requirement 6 credits
(B Track must include COMM 218)
Interdisciplinary Requirement 18 credits
(B Track must include: FP 120)

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

General Education Requirements for the BSIT for Arkansas

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts Requirement(s) 6 credits
(A Track must include: COMM 215, equivalent, or higher and COMM 218)
(B Track must include: COM 170 and COM 172)
Mathematics Requirement(s) 6 credits
Must include MTH 220
Science & Technology Requirement(s) 9 credits
(B Track must include: SCI 163)
Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component.

Humanities Requirement(s) 9 credits
(B Track must include: HUM 114)

Social Science Requirement(s) 9 credits
(B Track must include: PSY 211)
Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content.

Additional Liberal Arts Requirement(s) 6 credits
(B Track must include: COMM 218)
Interdisciplinary Requirement(s) 9 credits
(B Track students must include: FP 120)

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Academic Progression Requirements for the BSIT

• All students entering undergraduate degree programs who lack .67 or fewer general education credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.

• First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or concentration courses.

• GEN 195 will be required as the first course in the First-Year Sequence.

• All FYS requirements must be satisfied prior to enrolling in any other program applicable course.

• With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, National Testing Programs, and
  • ACE evaluated Military credits.

• The course used to satisfy a First-Year Sequence course must be comparable in content to the university course. It is replacing, must be at least a 2.67 credit course, and must be at an equivalent level or higher level course.

• Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

• Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework, certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSIT

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. The following courses in the Required Course of Study may not be waived: GEN 195, GEN 200

Students may waive, with or without credit, courses in the Required Course of Study, but must substitute with any upper division coursework to satisfy the required course of study (national testing program credit, prior learning credit, and military credit, or General Education coursework, may not be used to replace coursework waived, with or without credit).
University of Phoenix, 2013-2014

Course Descriptions for the BSIT

**GEN 200** ................................................................. 3 credits

**Foundations for General Education and Professional Success**
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**GEN 195** ................................................................. 3 credits

**Foundations of University Studies**
The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

**POS 355** ........................................................................ 3 credits

**Information Systems Fundamentals**
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

**PRG 211** ........................................................................ 3 credits

**Algorithms and Logic for Computer Programming**
This course provides students with a basic understanding of programming development practices. Concepts covered include the application of algorithms and logic to the design and development of procedural and object-oriented computer programs to address the problem solving requirements associated with business information systems. This course will cover procedural programming concepts including data types, controls structures, functional decomposition, arrays, and files, classes and objects.

**WEB 240** ........................................................................ 3 credits

**Web Design Fundamentals**
This course introduces development tools and techniques used to publish web pages on the World Wide Web. Students use basic hypertext markup language, scripting, and presentational technologies to create websites with the aid of a software authoring application. Topics include XHTML, CSS, JavaScript®, server hosting, site publication, site maintenance, and search engine optimization.

**MTH 221** ........................................................................ 3 credits

**Discrete Math for Information Technology**
This course introduces fundamentals and best practices of using written communication in business and in the information technologies. Topics include strategies, techniques, and nuances for producing emails, memos, reports, proposals, project specifications, and user manuals, as well as other technical documents.

**BSA 310** ........................................................................ 3 credits

**Business Systems**
This course reviews common business systems and their interrelationships. Business systems covered include finance, accounting, sales, marketing, human resources, legal, and operations. Emphasis is placed upon the inputs and outputs of information systems, the potential for integration of the systems, and information systems security.

**BSA 375** ........................................................................ 3 credits

**Fundamentals of Business Systems Development**
This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. The Systems Development Life Cycle will be fundamental to the course.

**CMGT 410** ........................................................................ 3 credits

**Project Planning and Implementation**
This course provides the foundation for successful project planning, organization, and implementation within the realm of information technology. The course uses real-world examples and identifies common mistakes and pitfalls in project management. Topics covered include project scoping, estimating, budgeting, scheduling and staffing, tracking and controlling, and software tools for project management.

**DBM 380** ........................................................................ 3 credits

**Database Concepts**
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.

**CMGT 400** ........................................................................ 3 credits

**Intro to Information Assurance & Security**
This course is an introduction to information assurance and security in computing technology. Topics include risk management; protecting information in the enterprise; business continuity and disaster recovery planning; threats and remediation; legal, ethical, and professional issues; and considerations within systems development processes.

**NTC 362** ........................................................................ 3 credits

**Fundamentals of Networking**
This course provides a foundation in the basic telecommunications and networking technologies fundamental to the industry and to the broad field of telecommunications. Analog, digital, and radio frequency technologies are covered. Also covered in this course is an introduction to the OSI protocol model, network-switching systems, basics of wireless communications, and network security.

**PRG 420** ........................................................................ 3 credits

**Java Programming I**
This course introduces object-oriented programming in the content of business applications development. The basics of the Java programming language are covered.

**MTH 221** ........................................................................ 3 credits

**Discrete Math for Information Technology**
Discrete (as opposed to continuous) mathematics is of direct importance to the fields of Computer Science and Information Technology. This branch of mathematics includes studying areas such as set theory, logic, relations, graph theory, and analysis of algorithms. This course is intended to provide students with an
understanding of these areas and their use in the field of Information Technology.

**MTH 445**: Discrete Math for Information Technology

This course will cover the process and issues associated with the implementation of a computer application information system. Topics will include the processes associated with sponsor and stakeholder approvals, end user training, technical staff training, conversion from existing application(s) and integration into the information system production environment. This course will also examine the use of development and testing environments and the testing procedures related to the implementation of a computer application information system.

**MTH 220**: College Algebra

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

**MTH 221**: Discrete Math for Information Technology

Discrete (as opposed to continuous) mathematics is of direct importance to the fields of Computer Science and Information Technology. This branch of mathematics includes studying areas such as set theory, logic, relations, graph theory, and analysis of algorithms. This course is intended to provide students with an understanding of these areas and their use in the field of Information Technology.

**GEN 101**: Skills for Lifelong Learning

This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals. This course is intended to provide students with an understanding of these areas and their use in the field of Information Technology.

**GEN 300**: Skills for Professional Development

This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access resources successfully.

**PHY 101**: Introductory Chemistry

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**COMM 215**: Fundamentals of Physics

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

**POL 215**: The American Experience Since 1945

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying a historical perspective to analyze contemporary issues.

**NTC 405**: State and Local Political Processes

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

**Course Descriptions for the Concentration in Advanced Networking**

**NTC 406**: Telecommunications and Networking I

This course is designed to provide the fundamentals of basic telecommunications including an introduction to standards, organizations, and governing bodies, and concepts such as TCP/IP, modulation or demodulation, and terminology for telecommunications and computer networks. The basics of analog and digital circuits are analyzed. Complex digital equipment, such as multiplexers, is introduced. The course is completed with an overview and analysis of various network topologies and network operating systems explaining how the electronic concepts assist in network troubleshooting.

**NTC 407**: Telecommunications and Networking II

This course provides analysis of the seven levels of the OSI model as the basis for analysis and discussion of network protocols. Each level of the OSI model is analyzed in detail with the related theory being applied to specific applications in the industry.
Global Network Architecture and Design
This course addresses the fundamentals of network design and analysis with an emphasis on network traffic. The network design techniques necessary for LAN and WAN implementations are covered. The concept of service levels, the provisioning of and importance of service levels are analyzed.

NTC 411 ................................................................. 3 credits

Global Network Management, Support and Security
NTC 411 broadens network design and analysis to include global considerations for an enterprise network configuration. This course introduces the topic of overall end-to-end network management, the concepts and the available tools to the network designer. The development and management of the relationships between the enterprise and the WAN providers is discussed. Network security, Disaster Recovery, and Business Continuity planner is also addressed in this course.

NTC 415 ................................................................. 3 credits

Network Integration Project
The focus of this course is the application of network design and performance concepts. The design considerations for a global network, including LANs and WANs with both wired and wireless functionality will be applied. End-to-end performance criteria and service levels guarantees will examined as a part of network design project. Network capabilities to handle varying types of traffic from low speed data to large image files and streaming video and digital voice will be explored.

Course Descriptions for the Concentration in Business Systems Analysis
BSA 400 ................................................................. 3 credits

Business Systems Development II
This course continues the subject matter of BSA/375, Fundamentals of Business Systems Development. It completes an examination of methodologies, tools, and standards used in business systems development. An emphasis is placed on examining enterprise-level business systems.

BSA 411 ................................................................. 3 credits

Systems Analysis Methodologies
This course provides the student with an understanding of several methodologies available to identify business problems and the possible information system solutions for addressing problems.

BSA 412 ................................................................. 3 credits

Systems Analysis Tools
This course builds upon the methodologies examined in Systems Analysis Methodologies by providing an emphasis on analysis tools – computer and non-computer supported. Emphasis is placed on when and how Microsoft Visio may be used for analysis.

CMGT 411 ................................................................. 3 credits

Project Planning Management
This course provides the foundation for understanding the broad concepts of successful planning, organization, and implementation within the realm of information technology. This course uses real-world examples and identifies common mistakes and pitfalls in project management. Topics covered include project scopeing, estimating, budgeting, scheduling, tracking, and controlling.

CMGT 413 ................................................................. 3 credits

Application Acquisition and Sourcing
This course examines a number of alternatives to be considered when delivery of an information technology application is needed. The evaluation of alternatives such as build versus buy and in-sourcing or outsourcing are covered along with the considerations for testing and evaluation of information technology decisions. The primary components of a Request for Proposal (RFP) and a Statement of Work (SOW) are examined in this course.

Course Descriptions for the Concentration in Information Management
IM 300 ................................................................. 3 credits

Data Organization Architecture
This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.

IM 305 ................................................................. 3 credits

Data Modeling
This course provides an in-depth look at several intermediate design and architecture concepts. The course covers the design method used in the creation of a relational database, the required steps to reengineer a database, and several tools and techniques used through the database design process.

POS 410 ................................................................. 3 credits

SQL For Business
This course covers Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.

DBM 384 ................................................................. 3 credits

Special Purpose Databases
This course examines the use of database technology in a variety of information technology applications. The use of text, multimedia, temporal, spatial, and mobile databases will be covered in this course.

DBM 460 ................................................................. 3 credits

Enterprise Database Management Systems
This course covers distributed computing, middleware and industry standards as relating to the enterprise data repository. Data warehousing, data mining, and data marts are covered from an enterprise perspective.

Course Descriptions for the Concentration in Information Systems Security
POS 420 ................................................................. 3 credits

Introduction to UNIX
This course is a survey of the UNIX® operations. The student will gain an understanding of the internal operations of the UNIX® system, which enables the user to make efficient use of files, file systems, and processes. Commands for efficient management of UNIX® system files, file systems and processes, systems administration and security are also examined.

POS 421 ................................................................. 3 credits

Windows Server Networking
This course is a survey of Windows Server Administration. Topics emphasize the structure and the various applications supported by Windows Server. The course includes remote, hands-on access to Windows lab exercises.

CMGT 441 ................................................................. 3 credits

Introduction to Information Systems Security Management
This course introduces security principles and management issues that IT professionals must consider. The course surveys current and emerging security practices and processes as they relate to;
information systems, systems development, operating systems and programming, database development and management, networking and telecommunications, and the Internet.

CMGT 442 .................................................................................. 3 credits

Information Systems Risk Management
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of computer-based information systems. This course will survey remedies and prevention techniques available to address the risk areas present. Organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer-based information systems.

CMGT 430 ................................................................................ 3 credits

Enterprise Security
This course covers the managerial and technical considerations related to access controls, authentication, external attacks and other risk areas facing the enterprise. This course will also survey the techniques to prevent unauthorized computer and facility access as well the concepts for protecting the hardware and software assets of the enterprise.

Course Descriptions for the Concentration in Mobile Development

MBL 400 .................................................................................. 3 credits

Mobile Computing
This course is an introduction to mobile application development. Participants will learn about industry standards, how to select an application platform and architecture, and current trends in mobile application development. Additionally, the course covers HTML 5, CSS, and JavaScript for mobile devices. Upon completion, participants will be able to plan, design and create simple mobile applications.

MBL 402 .................................................................................. 3 credits

Android Mobile Development
This course will cover the basics of coding for Android. Topics include use of the Android APIs, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

MBL 404 .................................................................................. 3 credits

Android Mobile Implementation
This course will continue to build on the fundamentals covered in Android Mobile Development. Topics include security, multi-threading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

MBL 406 .................................................................................. 3 credits

iOS Mobile Development
This course will cover the basics of coding for iOS. Topics include Objective-C, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

MBL 408 .................................................................................. 3 credits

iOS Mobile Implementation
This course will continue to build on the fundamentals covered in iOS Mobile Development. Topics include security, multi-threading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

MBL 410 .................................................................................. 3 credits

Windows Mobile Development
This course will cover the basics of coding mobile applications for Windows Phone. Topics include use of XAML, the Windows Phone APIs (through C# or VB.NET), persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

MBL 412 .................................................................................. 3 credits

Windows Mobile Implementation
This course will continue to build on the fundamentals covered in Windows Mobile Development. Topics include security, multi-threading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

Course Descriptions for the Concentration in Multimedia & Visual Communication

VCT 300 ................................................................................... 3 credits

Image Editing
This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on file formats, composition, color, text design, retouching and manipulation of graphic and photographic images.

VCT 320 ................................................................................... 3 credits

Electronic Publishing
This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

VCT 410 ................................................................................... 3 credits

Instructional Design
This course presents principles of instructional design. An instructional design methodology is presented that includes requirements analysis, performance objectives, performance measures, instructional strategies, storyboarding, design specifications, development, implementation and evaluation.

VCT 420 ................................................................................... 3 credits

Multimedia Development
This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.

WEB 431 ................................................................................... 3 credits

XML
This course extends Web programming to include XML. An emphasis is placed upon the appropriate use of XML as a programming tool.

Course Descriptions for the Concentration in Software Engineering

PRG 421 ................................................................................... 3 credits

Java Programming II
This course continues the subject in PRG 420, Java Programming I. Topics include designing complex applications and the use of date
This course focuses on existing and emerging Web development and an introduction to Java and Java applets. Emphasis is placed on graphical user interfaces (GUI). Topics include standard Windows compatible forms, controls, and procedures. The course uses Visual Basic.

This course extends the facilities of the .NET family of languages. The course focuses on the C# language. Topics covered include designing C# applications, writing and debugging programs, data files and database connectivity.

Course Descriptions for the Concentration in Web Development

VCT 300 ...................................................................................3 credits

Image Editing

This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on file formats, composition, color, text design, retouching and manipulation of graphic and photographic images.

WEB 401 ...................................................................................3 credits

Web Development

This course covers topics such as designing dynamic web pages and an introduction to Java and Java applets. Emphasis is placed upon the appropriate use of web programming tools.

WEB 407 ...................................................................................3 credits

Advanced Web Development

This course focuses on existing and emerging Web development technologies. Topics include specialized Web markup languages, server-side backend databases, server-side programming technologies, server-side backend databases, server-side programming, web services, enterprise Web development and Web applications.

WEB 431 ...................................................................................3 credits

XML

This course extends Web programming to include XML. An emphasis is placed upon the appropriate use of XML as a programming tool.

WEB 434 ...................................................................................3 credits

Website Commercialization I

This course builds upon a professional understanding of web design and development, emphasizing the trend towards website commercialization. Topics of this course include web-based interfaces, online supply chain management, eCommerce tools and techniques, branding, basic marketing strategies and Search Engine Optimization.

WEB 435 ...................................................................................3 credits

Website Commercialization II

This course explores the concept of website commercialization from the perspective of an advanced web developer. Students will focus on client security and server security, social networks, virtual worlds, m-commerce, non-traditional marketing strategies and customer service.

Bachelor of Science in Information Technology

(Maryland)

The Bachelor of Science in Information Technology (BSIT) program is focused on the acquisition of theory and application of technical competencies associated with the information technology profession. The courses prepare students with fundamental knowledge in core technologies, such as systems analysis and design, programming, database design, network architecture and administration, Web technologies and application development, implementation and maintenance.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

A Track Required Introductory Course

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success

B Track Required Introductory Course

GEN 195 ...................................................................................3 credits

Foundations of University Studies

BSIT Required Course of Study - A Track and B Track

CIS 207 ~ ...............................................................................3 credits

Information Systems Fundamentals

PRG 211 ~ ...............................................................................3 credits

Algorithms and Logic for Computer Programming

WEB 240 ~ ...............................................................................3 credits

Web Design Fundamentals

POS 355 ~ ...............................................................................3 credits

Introduction to Operating Systems

ENG 221 ~ ...............................................................................3 credits

Technical Writing Fundamentals

BSA 310 ~ ...............................................................................3 credits

Business Systems

BSA 375 ~ ...............................................................................3 credits

Fundamentals of Business Systems Development

CMGT 410 ~ ...............................................................................3 credits

Project Planning & Implementation

DBM 380 ~ ...............................................................................3 credits
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-im.

Emphasis in Business Systems Analysis

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-bsa.

BSA 400 ~ 3 credits
Introduction to Information Assurance & Security
NTC 362 ~ 3 credits
Fundamentals of Networking
PRG 420 ~ 3 credits
Java Programming I
MTH 221 ~ 3 credits
Discrete Math for IT
CMGT 445 ~ 3 credits
Application Implementation

Emphasis in Advanced Networking

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-an.

NTC 405 ~ 3 credits
Telecommunications and Networking I
NTC 406 ~ 3 credits
Telecommunications and Networking II
NTC 409 ~ 3 credits
Global Network Architecture and Design
NTC 411 ~ 3 credits
Global Network Management, Support and Security
NTC 415 ~ 3 credits
Network Integration Project

Emphasis in Business Systems Development

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-bsa.

BSA 400 ~ 3 credits
Business Systems Development II
BSA 411 ~ 3 credits
Systems Analysis Methodologies
BSA 412 ~ 3 credits
Systems Analysis Tools
CMGT 411 ~ 3 credits
Project Planning Management
CMGT 413 ~ 3 credits
Application Acquisition & Sourcing

Emphasis in Information Management

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-im.

IM 300 ~ 3 credits
Data Organization Architecture
IM 305 ~ 3 credits
Data Modeling
POS 410 ~ 3 credits
SQL for Business
DBM 384 ~ 3 credits
Special Purpose Databases
DBM 460 ~ 3 credits
Enterprise Database Management Systems

Emphasis in Information Systems Security

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-iss.

CMGT 441 ~ 3 credits
Windows Server Networking
POS 420 ~ 3 credits
Introduction to UNIX
POS 421 ~ 3 credits
Windows Server Networking
CMGT 442 ~ 3 credits
Introduction to Information Systems Security Management
CMGT 443 ~ 3 credits
Information Systems Risk Management
CMGT 430 ~ 3 credits
Enterprise Security

Emphasis in Mobile Development

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-md.

Students must have access to a Mac computer to complete iOS mobile coursework or the latest Windows operating system to complete Windows mobile coursework.

Students must complete 15 credits from the following coursework:

MBL 400 ~ 3 credits
Mobile Computing
MBL 402 ~ 3 credits
Android Mobile Development
MBL 404 ~ 3 credits
Android Mobile Implementation
MBL 406 ~ 3 credits
iOS Mobile Development
MBL 408 ~ 3 credits
iOS Mobile Implementation
MBL 410 ~ 3 credits
Windows Mobile Development
MBL 412 ~ 3 credits
Windows Mobile Implementation

Emphasis in Multimedia &Visual Communication

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

programs/bsit-mvc.

VCT 300 ~ 3 credits
Image Editing
VCT 320 ~ 3 credits
Electronic Publishing
VCT 410 ~ 3 credits
Instructional Design
VCT 420 ~ 3 credits
Multimedia Development
WEB 431 ~ 3 credits
XML
Emphasis in Software Engineering
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-se.
- PRG 421 - Java Programming II - 3 credits
- BSA 385 - Intro to Software Engineering - 3 credits
- CSS 422 - Software Architecture - 3 credits
- POS 408 - .NET I - 3 credits
- POS 409 - .NET II - 3 credits

Emphasis in Web Development
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsit-wd.
- VCT 300 - Image Editing - 3 credits
- WEB 401 - Web Development - 3 credits
- WEB 407 - Advanced Web Development - 3 credits
- WEB 434 - Website Commercialization I - 3 credits
- WEB 435 - Website Commercialization II - 3 credits

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSIT
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
- Applicants must be currently employed or have access to a work environment.

Degree Requirements for the BSIT
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 42 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
  - All students must complete the minimum number of credits required by their degree program.
  - Students will declare an emphasis at the time of enrollment.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Bachelor of Science in Information Technology

General Education Requirements for the BSIT
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
- Communication Arts Requirement 6 credits
  (A Track must include COMM 215, equivalent, or higher and COMM 218)
  (B Track must include: COM 170 and COM 172)
- Mathematics Requirement 6 credits
  (Must include MTH 220, equivalent, or higher)
- Science & Technology Requirement 6 credits
  (B Track must include: SCI 163)
  Must include at least three (3) credits in the physical or biological sciences
- Humanities Requirement 6 credits
  (B Track must include: HUM 114)
- Social Science Requirement 6 credits
  (B Track must include: PSY 211)
- Additional Liberal Arts Requirement 6 credits
  (B Track must include COMM 218)
- Interdisciplinary Requirement 18 credits
  (B Track must include: FF 120)

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Academic Progression Requirements for the BSIT
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.
- GEN 195 will be required as the first course in the First-Year Sequence.
- All FYS requirements must be satisfied prior to enrolling in any other program applicable course.
- With the exception of GEN 195, FP 120, and HUM 114, course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - University of Phoenix Prior Learning Assessment,
  - National Testing Programs, and
  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.

Bachelor of Science in Information Technology

Academic Progression Requirements for the BSIT
- All students entering undergraduate degree programs who list less than 24 previous college credits as recognized by the university on the admissions application will be enrolled in the B Track and are required to complete the First-Year Sequence.
- First-Year Sequence students must satisfy all seven (7) courses from the First-Year Sequence prior to enrolling in any other General Education, elective, or emphasis courses.

  - ACE evaluated Military credits.
- The course used to satisfy a First-Year Sequence course must be comparable in content to the university course it is replacing, must be at least a 2.67 credit course, and must be an equivalent level or higher level course.
- Concurrent enrollment is prohibited during any of the courses in the First-Year Sequence.
• Students who list 24 or more previous college credits, as recognized by the university on the admissions application, must take GEN 200 Foundations for General Education and Professional Success as the first course with University of Phoenix and are not required to enroll in the First-Year Sequence (A Track).

• Students who list 24 or more previous college credits, as recognized by the University on the admissions application, and who do not enroll in the First-Year Sequence, may not enroll in any course from the First Year Sequence to satisfy programmatic prerequisites, general education or elective requirements.

• Students who previously completed GEN 101, GEN 200, or GEN 300 and choose to transition to the First-Year Sequence are not required to take GEN 195.

• Students may not complete any of the First-Year Sequence courses via Directed Study.

• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

• All undergraduate students must satisfy math and English prerequisites prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSIT

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The following courses in the Required Course of Study may not be waived: GEN 195, GEN 200

Students may waive, with or without credit, courses in the Required Course of Study, but must substitute with an upper division coursework to satisfy the required course of study (national testing program credit, prior learning credit, and military credit, or General Education coursework, may not be used to replace coursework waived, with or without credit).

Course Descriptions for the BSIT

GEN 200. .................................................................................... 3 credits
Foundations of General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 195. .................................................................................... 3 credits
Foundations of University Studies

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

CIS 207. .................................................................................... 3 credits
Information Systems Fundamentals

This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

PRG 211. .................................................................................... 3 credits
Algorithms and Logic for Computer Programming

This course provides students with a basic understanding of programming development practices. Concepts covered include the application of algorithms and logic to the design and development of procedural and object oriented computer programs to address the problem solving requirements associated with business information systems. This course will cover procedural programming concepts including data types, controls structures, functional decomposition, arrays, and files, classes and objects.

WEB 240. .................................................................................... 3 credits
Web Design Fundamentals

This course introduces development tools and techniques used to publish web pages on the World Wide Web. Students use basic hypertext markup language, scripting, and presentational technologies to create websites with the aid of a software authoring application. Topics include XHTML, CSS, JavaScript®, server hosting, site publication, site maintenance, and search engine optimization.

POS 355. .................................................................................... 3 credits
Introduction to Operating Systems

This course provides an introduction to operating systems. Topics covered include operating system concepts, program execution, and operating system internals such as memory, processor, device, and file management. A variety of operating systems are compared and contrasted.

ENG 221. .................................................................................... 3 credits
Technical Writing Fundamentals

This course covers the fundamentals and best practices of using written communication in business and in the information technologies. Topics include strategies, techniques, and nuances for producing emails, memos, reports, proposals, project specifications, and user manuals, as well as other technical documents.

BSA 310. .................................................................................... 3 credits
Introduction to Database Systems

This course introduces common business systems and their interrelationships. Business systems covered include finance, accounting, sales, marketing, human resources, legal, and operations. Emphasis is placed upon the inputs and outputs of information systems, the potential for integration of the systems, and information systems security.

BSA 375. .................................................................................... 3 credits
Business Systems

This course reviews common business systems and their interrelationships. Business systems covered include finance, accounting, sales, marketing, human resources, legal, and operations. Emphasis is placed upon the inputs and outputs of information systems, the potential for integration of the systems, and information systems security.
