The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

FP 120 .................................................................3 credits

Essentials of Personal Finance
This course provides an overview of the elements necessary for effective personal financial planning and the opportunity to apply the techniques and strategies essential to this understanding. Primary areas of study include creating and managing a personal budget, understanding and paying taxes, working with financial institutions, wise use of credit cards and consumer loans, financing automobiles and homes, and the use of insurance for protecting one’s family and property.
GEN 101 .......................................................................................... 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .......................................................................................... 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

Associate Programs Pathways Program
Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.
Admission into the Pathways program requires:
• Pathways Non-degree Application
• High School Junior or Senior Standing
• Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
• Parent or guardian consent
• $25 application fee
Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.
Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
The College of Health Sciences and Nursing provides a blend of the business and management focus of health care with the clinical/delivery focus of nursing. Each academic program area will provide students with the insight and perspectives needed to support their specific career focus.

Health administration programs provide students with an opportunity to see the expansive scope and diversity of the health care industry. The associate and baccalaureate programs are designed to provide students with the foundational knowledge of management, finance, marketing, communication, health information systems and compliance and legal concepts. At the graduate level students will expand their focus to leadership, policy, quality and performance measures, economics and strategic management.

Students will also have the opportunity to expand their interests in career areas such as health information systems, electronic health records, long term care, emergency management, gerontology, or sustainability.

The nursing programs are designed to support the career advancement and educational needs of licensed practical, vocational and registered nurses, who are looking to expand their professional horizons. The nursing degree programs have a blend of theory and practice, which fosters a learning environment that allows a nurse to build a knowledge base and effectively apply what they have learned. Students develop critical thinking and problem solving skills that are essential for clinical or leadership roles needed in today's challenging health care environment. The graduate nursing programs focus on the specialty areas of nursing administration, nursing education and family nurse practitioner.

The Bachelor of Science in Nursing and the Master of Science in Nursing programs are accredited by The Commission on Collegiate Nursing Education, One DuPont Circle, NW, Suite 530, Washington, DC 20036 - 1120, (202) 887 6791. http://www.aacn.nche.edu/accreditation/ 

International Nursing Honor Society

The vision of Sigma Theta Tau is to create a global community of nurses who lead in using scholarship, knowledge, and technology to improve the health of the world's people. The society provides support for the professional development of members who strive to improve nursing care worldwide.

Omicron Delta is the Sigma Theta Tau chapter of the University of Phoenix, College of Health Sciences and Nursing members. Membership to Sigma Theta Tau is by invitation to baccalaureate and graduate nursing students who demonstrate excellence in scholarship, and to nurse leaders who demonstrate exceptional achievement in nursing.

The undergraduate student must have at least a 3.0 grade point average on a 4.0 scale, be in the upper 35 percent of his/her graduating class, have completed at least one-half of the nursing curriculum to qualify for membership and meet the expectation of academic integrity. The graduate student must have at least a 3.5 grade point average on a 4.0 scale and have completed at least one-half of the nursing curriculum to qualify for membership.

More than 300,000 nurse scholars have been inducted into Sigma Theta Tau. With 130,000 active members, it is the second-largest and one of the most prestigious nursing organizations in the world. The society's members are active in more than 90 countries and territories, and the 463 chapter honor societies are located on more than 523 college and university campuses in United States, Australia, Brazil, Canada, Hong Kong, the Netherlands, Pakistan, South Korea, and Taiwan.

Omicron Delta has close to 5,000 active members worldwide. The chapter was originally chartered in 1996 and has grown to be one of the largest chapters in the international organization. To learn more about Omicron Delta visit the Web site http://www.omicrondelta.net.

Academic Progression Requirements for all Current Nursing Programs (excluding BSN/I)

Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a "for-cause" 10 panel, plus alcohol drug test.

- For purposes of this policy, the following definitions apply:
  - Drug testing means the scientific analysis of urine, blood, breath, saliva, hair, tissue, and other specimens from the human body for the purpose of detecting the use of drugs or alcohol.
  - Reasonable suspicion means evidence which forms a reasonable basis for concluding that it is more likely than not that a person is impaired by alcohol or drugs or has engaged in substance abuse. Facts which could give rise to reasonable suspicion include, but are not limited to: the odor of alcohol or drugs, impaired behavior such as slurred speech, decreased motor coordination, difficulty in maintaining balance, marked changes in personality or job performance, and unexplained accidents, without reasonable justification. Such evidence may come from a professional or expert opinion, layperson opinion, scientific tests, or other sources or methods.
  - Illegal drug means any drug which is not legally obtainable; any drug which is legally obtainable but has not been legally obtained; any prescribed drug not legally obtained; any prescribed drug not being used for the prescribed purpose or by the person for whom it was prescribed; any over-the-counter drug being used at a dosage level other than that recommended by the manufacturer, or being used for a purpose other than the purpose intended by the manufacturer; and any drug being used for a purpose or by a person not in accordance with bona fide medical therapy. Examples of illegal drugs include, but are not limited to, stimulants; depressants; narcotic or hallucinogenic drugs; cannabis substances, such as marijuana and hashish; cocaine; heroin; methamphetamine; phencyclidine (PCP); and so-called designer drugs and look-alike drugs.

345
Impaired means that a person's mental or physical capabilities are reduced below his or her normal levels without reasonable justification. An impaired student manifests deterioration in the level of function as compared to that previously observed, or the student does not function at a level normally expected under the prevailing circumstances. Impairment may exist in one or more multiple domains, including psychomotor activity and skills, conceptual or factual recall, integrative or synthetic thought processes, judgment, attentiveness, demeanor and attitudes as manifested in speech or actions. Impairment will include addiction to and/or physical dependence upon alcohol or illegal drugs.

Substance abuse means:
- the consumption, possession, or distribution of alcohol or illegal drugs by any nursing student while on University or affiliated clinical site premises or while participating in any University (or affiliated clinical site) sponsored or related activity, including any nursing-related course or clinical training activity.
- a nursing student's use of alcohol or any drug in such a way that the student's performance in any nursing course, including activities at any clinical site, is impaired.

Prior to being assigned to a clinical placement and as a prerequisite for placement at any agency or health care facility the nursing student shall sign an agreement:
- to abide by the drug policies and drug testing policies of the University and each agency or health care facility in which a student is assigned as applicable,
- to submit to any “for cause” drug testing required by the University and testing required by each agency or health care facility the nursing student obtains clinical hours, and
- to release a copy of any and all drug test results to the University of Phoenix, Dean/Associate Dean of Nursing, other appropriate University officials, and to any State Board(s) of Nursing in which the student holds a nursing license or certificate, where required by the relevant State Board(s) of Nursing.

Failure to sign such agreement is grounds for refusal for student admission and progression in the program.

The College of Health Sciences and Nursing requires students to obtain a 10 panel, plus alcohol drug test if the student's use of the drug as prescribed will not interfere with safe practice in the clinical area.

The results of the positive test for alcohol or illegal drugs shall be reported to the applicable State Board(s) of Nursing, if required by the applicable State Board(s), by the Campus College Chair, Director of Nursing, or NP Program Manager. If the results of the 10 panel, plus alcohol drug test(s) are positive for a prescribed drug(s) but not those that would be defined as illegal in the definitions above:
- The student shall, within three (3) business days, obtain a written statement from their treating, licensed health care provider (MD, DO, HMD, ND/NMD, NP or PA) stating that:
  - the drug level is within prescribed limits.
  - the level does not indicate abuse.
  - the student's use of the drug as prescribed will not interfere with safe practice in the clinical area.

This statement must be provided to the Campus College Chair, Director of Nursing, or NP Program Manager. The findings may result in student dismissal from the nursing program and expulsion from the University. The results of a positive test for alcohol or illegal drugs shall be reported to the applicable State Board(s) of Nursing, where required by the applicable State Board(s) of Nursing's statute(s) or regulation(s).

Students who refuse to submit to a “for-cause” drug test will not be allowed to return to any clinical setting pending conclusion of a full review by the Office of Dispute Management and Apollo Ethics and Compliance. The findings may result in dismissal from the nursing program and expulsion from the University. The results of a positive test for illegal drugs as defined herein or a refusal to undergo a required drug test will be reported to the applicable State Board of Nursing where required by the applicable State Board(s) of Nursing's statute(s) or regulation(s).

Students must also adhere to any other additional policies prescribed by the clinical agency. It is the sole responsibility of the student to read and acknowledge the requirements of the clinical health care facility in addition to University policy.

All costs associated with the drug test, including any transportation costs to or from the drug testing facility, will be the responsibility of the student.

University of Phoenix, College of Health Sciences and Nursing, campus officials may be required to report all failed drug tests to each State Board of Nursing in which the student holds a nursing license or certificate. Campus officials shall report test results to all applicable State Boards of Nursing as described in the applicable Board's statutes and/or regulations.
Associate of Arts/Concentration in Health Care Administration

The following Associate of Arts/Concentration in Health Care Administration (AAHCA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration concentration focuses on health care organizations, roles of health care workers, public policy, information technology, financial management, and regulatory and ethical issues of health care. Students will discuss current strengths, weaknesses, and challenges of the U.S. health care system. Students will also critically examine the current state of health and disease, health care’s laws and ethics, the psychology of health, and financial operations of the health care system.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: This is not a nursing program nor will the courses included in this program fully prepare a student to enter a nursing program.

Concentration in Health Care Administration - Track A and B

HCA 210 ~ Introduction to Health Care: Riding the Fourth Wave 3 credits
HCA 220 ~ The Language of Health Care 3 credits
HCA 230 ~ Communication Skills for Health Care Professionals 3 credits
HCA 240 ~ Health & Diseases: Understanding Pathos of Pathology 3 credits
HCA 250 ~ The Psychology of Health 3 credits
HCA 270 ~ Financial Matters for Health Care Professionals 3 credits

Communication Arts Requirement 6 credits
A Track must include: COM 150 and COM 220
B Track must include: COM 155 and COM 156

Mathematics Requirement 6 credits
A Track must include: SCI 162
B Track must include: SCI 162

Science & Technology Requirement 6 credits
A Track must include: 3 credits in the physical or biological sciences
B Track must include: SCI 162

Social Science Requirement 6 credits
A Track must include: ETH 125
B Track must include: PSY 201 and ETH 125

Humanities Requirement 6 credits
A Track must include: CRT 205
B Track must include: HUM 111

Additional Liberal Arts Requirement 3 credits
A Track must include: GEN 105
B Track must include: US 101

Interdisciplinary Requirement 9 credits
B Track must include: FP 101

Any credit that is not being applied to the program as a waiver may be applied to the electives/Interdisciplinary Requirement. This can include any University of Phoenix course previously taken prior to enrollment into an Online Associate program. Students may not enroll in 5-week University of Phoenix lower or upper division coursework. (Physical Education activity credits are limited to four credits.)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AAHCA

The degree requirements for this program are the following:

° Completion of a minimum of 60 credits.
° Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
° A minimum grade point average (GPA) of 2.0.
° Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
Associate of Arts
Academic Progression Requirements for the AAHCA

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAHCA

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAHCA

HCA 210 ................................................................. 3 credits
Introduction to Health Care: Riding the Fourth Wave
This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 220 ................................................................. 3 credits
The Language of Health Care
This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

HCA 230 ................................................................. 3 credits
Communication Skills for Health Care Professionals
This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

HCA 240 ................................................................. 3 credits
Health & Diseases: Understanding Pathos of Pathology
This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCA 250 ................................................................. 3 credits
The Psychology of Health
In this course, the student is introduced to the psychological factors that relate to maintaining a healthy workplace. The course also exposes the student to management elements of cultural diversity, collaboration, and healthy behaviors.

HCA 270 ................................................................. 3 credits
Financial Matters for Health Care Professionals
This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care operations. This course introduces the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the responsibilities of health care financial management.

COM 150 ................................................................. 3 credits
Effective Essay Writing
In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220 ................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125 ................................................................. 3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
The following Associate of Arts/Emphasis in Health Care Administration (AAHCA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree with an emphasis in Health Care Administration focuses on health care organizations, roles of health care workers, public policy, information technology, financial management, and regulatory and ethical issues of health care. Students will discuss current strengths, weaknesses, and challenges of the U.S. health care system. Students will also critically examine the current state of health and disease, health care’s laws and ethics, the psychology of health, and financial operations of the health care system.

Degree Requirements for AAHCA/MR

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts.

Academic Progression Requirements for the AAHCA/MR

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.
- Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Additional Residency Requirements and Course Waivers for the AAHCA/MR

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The Language of Health Care

This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.
Health & Diseases: Understanding Pathos of Pathology

This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCR 210...................................................................................3 credits

Patient Records: Keeping it Real

Documenting patients' health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records. Settings include hospitals, physicians' offices and alternate care facilities. Students review uses of health data and legal aspects of health information management.

HCR 220...................................................................................3 credits

Claims Preparation I: Clean Bills of Health

Medical records processing revolves around insurance and reimbursement. This course focuses on the background, knowledge and skills related to basic billing duties, HIPAA regulations, patient encounters, and the preparation, compliance, and transmission of claims. Students are introduced to the history, current state and future direction of the major diagnostic and procedural coding systems.

HCR 230...................................................................................3 credits

Claims Preparation II: Footing the Bills

This course continues medical records processing instruction. Topics focus on the background, knowledge and skills related to private payers, Medicare, Medicaid, Tricare, Champva, workers compensation and disability. Claims processing includes payments, appeals, and secondary claims; patient billing and collections; hospital billing and reimbursement.

HCR 240...................................................................................3 credits

Computerizing Medical Data: The Paper Chase Goes Techno

This medical records capstone course enables students to develop career skills in computerizing data through application of a software program widely used in health care. While popular for medical billing and collections, Medisoft™ also applies to managing patients' health care information, scheduling, correspondence, and a variety of reports. This course requires a PC with Windows 2000® or Windows XP® operating system.

COM 150...................................................................................3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

COM 220...................................................................................3 credits

Research Writing

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ETH 125...................................................................................3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205...................................................................................3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105...................................................................................3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

The following Associate of Arts/Emphasis in Health Care Administration/Medical Records (AAHCA/MR) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration with an emphasis in Medical Records lays a foundation for further study in health care at the undergraduate level. Topics focus on medical terminology related to disease diagnosis and treatment, patient information management, and medical claims processing. Software instruction synthesizes a variety of records processes common in medical facilities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca-mr.

Additional Admission Requirements for AAHCA/MR

• Applicants must be at least 16 years of age at the time of application.
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

General Education Requirements for the AAHCA/MR

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

Science & Technology Requirement 6 credits
(A Track must include: 3 credits in the physical or biological sciences)
(B Track must include: SCI 162)

Social Science Requirement 6 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Humanities Requirement 6 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Additional Liberal Arts Requirement 3 credits
(A Track must include: GEN 105)
(B Track must include: US 101)

Interdisciplinary Requirement 9 credits
(B Track must include: FP 101)

Any credit that is not being applied to the program as a waiver may be applied to the electives/Interdisciplinary Requirement. This can include any University of Phoenix course previously taken prior to enrollment into an Online Associate program. Students may not enroll in 5-week University of Phoenix lower or upper division coursework. (Physical Education activity credits are limited to four credits.)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AAHCA/MR

The degree requirements for this program are the following:

• Completion of a minimum of 60 credits.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum grade point average (GPA) of 2.0.
• Emphasises are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

Additional Residency Requirements and Course Waivers for the AAHCA/MR

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally approved nationally accredited transferable coursework.

Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Health Care Administration/Electronic Health Records

The following Associate of Arts/Concentration in Health Care Administration/Electronic Health Records (AAHCA-EHR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration with a concentration in Electronic Health Records lays a foundation for further study of the health care industry at the undergraduate level. Courses focus on the introduction of health care delivery, medical terminology, health care information systems fundamentals, data management, and health care ethics and compliance. Students will also use electronic health record-keeping software that synthesizes a variety of records processes common in health care facilities. The concepts learned in this program align to national electronic health record specialist certification exam content. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ahca.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: This is not a nursing program nor will the courses included in this program fully prepare a student to enter a nursing program.

Concentration in Health Care Administration/Electronic Health Records - Track A and B

HCA 210 ~ .................................................................3 credits

Introduction to Health Care: Riding the Fourth Wave

HCA 220 ~ .................................................................3 credits

The Language of Health Care

HCA 240 ~ .................................................................3 credits

Health & Diseases: Understanding Pathos of Pathology

HCIS 245 ~ .................................................................3 credits

Structure and Design of Electronic Health Records

HCIS 265 ~ .................................................................3 credits

Medical Health Information

HCIS 275 ~ .................................................................3 credits

Practical Application of Electronic Health Records

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAHCA/EHR

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending completion of the HiSET examination with a passing score.
- Arkansas: Students residing in Arkansas who are attending the completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

General Education Requirements for the AAHCA/EHR

Communication Arts Requirement 6 credits

(A Track must include: COM 150 and COM 220)

(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits

University of Phoenix math courses must be MAT 116 or higher to satisfy requirement.

Science & Technology Requirement 6 credits

(A Track must include: 3 credits in the physical or biological sciences)

(B Track must include: SCI 162)

Must include: HCIS 245. Students must complete HCA 210, HCA 220, and HCA 240 before enrolling in HCIS 245. The HCIS 245 course requirement cannot be satisfied with transfer credit.

Humanities Requirement 6 credits
Concentrations are reflected on the transcript only and will not
appear on the diploma. The diploma awarded for this program
will read as: Associate of Arts in Medical Health Information.

The Language of Health Care
This course offers the student engagement and interaction with
the dynamic language of health care. Through comprehensive
discussions and activities, the student will have the opportunity to
be immersed in the words used in health care. This course requires a
microphone and speakers or headphones for recording and listen-
ing to digital audio files.

Health & Diseases: Understanding Pathos of Pathology
This course introduces the student to the basic principles of illness
and disease commonly seen in the health care environment. Topics
may include infectious and noninfectious diseases, environmental
health, and the promotion of good health practices. In addition,
students will be introduced to common disease and medical proce-
dure terminology.

Structure and Design of Electronic Health Records
Students will learn about the evolving function and use of technol-
gy to support the documentation of vital health information con-
tained in a patient’s medical history. This course will introduce
students to the general software applications, insurance and cod-
ing information, and regulatory compliance requirements.

Medical Health Information
This course focuses on the documentation of medical data and how
managing data can be vital to the treatment and care of individuals
in the health care system. Students will examine development,
forms, routing, filing, and storage of patient’s records in a variety
of health care settings. Students will also review issues related to
quality and data management, as well as privacy and security com-
pliance.

Practical Application of Electronic Health Records
Students in the capstone course will use case studies and an elec-
tronic health record (EHR) software application to develop founda-
tional skills related to data charting, usage, and application.

Research Writing
Students focus on gathering research, evaluating and documenting
sources, and developing a major research paper. Selected readings
prompt discussion regarding bias, rhetorical devices, arguments,
and counterarguments. Grammar exercises address commonly
confused words, modifiers, parallel structure, and sentence variety.

Fundamentals of Information Systems for Health Care
This course introduces the fundamentals of computer systems and
the role of information processing in today’s health care environ-
ment. An overview is presented of information systems, systems
development, operating systems and programming, database man-
agement, networking and telecommunications, the Internet, and
how these resources are applied in the health care industry.

Cultural Diversity
This course is designed to educate students about issues of race,
etnicity, and gender in the United States by presenting historical
and modern perspectives on diversity.
The Associate of Arts in Health Care Administration with emphasis in Electronic Health Records (AAHCA/EHR) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available virtually in their state. Please contact your enrollment advisor for more information.

The following Associate of Arts/Emphasis in Health Care Administration/Electronic Health Records (Maryland-Onsite) courses are available via the Online modality in their state. Please contact your enrollment advisor for more information.

### Critical Thinking
- CRT 205: Critical Thinking 3 credits

### Skills for Learning in an Information Age
- GEN 105: Skills for Learning in an Information Age 3 credits

### Associate of Arts/Emphasis in Health Care Administration/Electronic Health Records (Maryland-Onsite)

The following Associate of Arts/Emphasis in Health Care Administration/Electronic Health Records (AAHCA-EHR) program may be offered at these University of Phoenix campus locations: Online, depending on the state of residence. ### Required Course of Study

Any credit is not being applied to the program as a waiver may be applied to the electives/Interdisciplinary Requirement. This can include any University of Phoenix course previously taken prior to enrollment into an Online Associate program. Students may not enroll in 5-week University of Phoenix lower or upper division coursework. (Physical Education activity credits are limited to four credits.)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the emphasis and cannot count toward General Education total.
The Language of Health Care

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for AAHCA/EHR

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of "D-" or higher.
- A minimum grade point average (GPA) of 2.0.
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as Associate of Arts.

Academic Progression Requirements for the AAHCA/EHR

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the AAHCA/EHR

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAHCA/EHR

HCA 210 ................................................................................. 3 credits
Introduction to Health Care: Riding the Fourth Wave
This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 220 ................................................................................. 3 credits
The Language of Health Care
This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

HCA 240 ................................................................................. 3 credits
Health & Diseases: Understanding Pathos of Pathology
This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCIS 255 ................................................................................. 3 credits
Structure and Design of Electronic Health Records
Students will learn about the evolving function and use of technology to support the documentation of vital health information contained in a patient’s medical history. This course will introduce students to the general software applications, insurance and coding information, and regulatory compliance requirements.

HCIS 265 ................................................................................. 3 credits
Medical Health Information
This course focuses on the documentation of medical data and how managing data can be vital to the treatment and care of individuals in the health care system. Students will examine development, forms, routing, filing, and storage of patient’s records in a variety of health care settings. Students will also review issues related to quality and data management, as well as privacy and security compliance.

HCIS 275 ................................................................................. 3 credits
Practical Application of Electronic Health Records
Students in the capstone course will use case studies and an electronic health record (EHR) software application to develop foundational skills related to data charting, usage, and application.

COM 220 ................................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

HCIS 245 ................................................................................. 3 credits
Fundamentals of Information Systems for Health Care
This course introduces the fundamentals of computer systems and the role of information processing in today’s health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.

ETH 125 ................................................................................. 3 credits
Cultural Diversity
This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.
The following Associate of Arts/Concentration in Health Care Administration/Medical Records (AAHCA/MR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration with emphasis in Medical Records lays a foundation for further study in health care at the undergraduate level. Topics focus on medical terminology related to disease diagnosis and treatment, patient information management, and medical claims processing. Software instruction synthesizes a variety of records processes common in medical facilities.

**Degree Requirements for the AAHCA/MR**

The degree requirements for this program are the following:

- Completion of a minimum of 60 credits.
- Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

**Academic Progression Requirements for the AAHCA/MR**

- Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

**Additional Residency Requirements and Course Waivers for the AAHCA/MR**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

**Course Descriptions for the AAHCA/MR**

**HCR 220** ................................................................. 3 credits

**Claims Preparation I: Clean Bills of Health**

Medical records processing revolves around insurance and reimbursement. This course focuses on the background, knowledge and skills related to basic billing duties, HIPAA regulations, patient encounters, and the preparation, compliance, and transmission of claims. Students are introduced to the history, current state and future direction of the major diagnostic and procedural coding systems.

**HCR 230** ................................................................. 3 credits

**Claims Preparation II: Footing the Bills**

This course continues medical records processing instruction. Topics focus on the background, knowledge and skills related to private payers, Medicare, Medicaid, Tricare, Chapmpva, workers compensation and disability. Claims processing includes payments, appeals, and secondary claims; patient billing and collections; hospital billing and reimbursement.

**COM 150** ................................................................. 3 credits

**Effective Essay Writing**

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**COM 220** ................................................................. 3 credits

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**MAT 219** ................................................................. 3 credits

**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**MAT 220** ................................................................. 3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

**BIO 100** ................................................................. 4 credits

**Introduction to Life Science with Lab**

This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes
methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

CHM 109 ................................................................. 3 credits

Introductory Chemistry

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135 ................................................................. 3 credits

The American Experience Since 1945

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.

ETH 125 ................................................................. 3 credits

Cultural Diversity

This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

CRT 205 ................................................................. 3 credits

Critical Thinking

In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 ................................................................. 3 credits

Skills for Learning in an Information Age

This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Note: This is not a nursing program nor will the courses included in this program fully prepare a student to enter a nursing program.

The following Associate of Arts/Foundations in Health Care Administration (AAFHCA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree Foundations in Health Care Administration concentration focuses on developing a foundational understanding of the health care industry and career opportunities. Students will discuss current strengths and challenges of the U.S. health care system. Students will also explore content related to health care communication, medical language, health and disease, and the financial aspects of health care delivery.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: This is not a nursing program nor will the courses included in this program fully prepare a student to enter a nursing program.

Foundations in Health Care Administration - Track A and B

HCA 210 ~ ................................................................. 3 credits
Introduction to Health Care

HCA 220 ~ ................................................................. 3 credits
Riding the Fourth Wave

HCA 230 ~ ................................................................. 3 credits

Communication Skills for Health Care Professionals

HCA 270 ~ ................................................................. 3 credits
Health & Diseases: Understanding Pathos of Pathology

Additional Admission Requirements for AAFHCA

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.
General Education Requirements for the AAFHCA for Arkansas Students
Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Students who reside in Arkansas, are required to complete MAT 220
College Algebra. The MAT 220 requirement may be satisfied with College
Algebra transfer coursework or math transfer coursework requiring
College Algebra as a prerequisite.
Must include: MAT 219 and MAT 220
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Must include a minimum of 6 credits in lab science.
The lab science requirements may also be satisfied with any science
transfer coursework with a lab component.
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Must include: HIS 135
HIS 135 requirement may also be satisfied with any transfer coursework
with US History or Government content.
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
All undergraduate students are required to complete the minimum
general education credits required by their program version.
Credits applied to the Required Course of Study (with the exception
of the electives) will only be applied to the core and cannot
count toward General Education total
Students who lack 67 or fewer general education credits may use
interdisciplinary or elective credits to waive the balance. Students
must use interdisciplinary or elective credits to waive the general
education balance in order to complete the minimum general edu-
cation credits required for their program.

General Education Requirements for the AAFHCA for
Minnesota Students
Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)
Mathematics Requirement 6 credits
Science & Technology Requirement 9 credits
(B Track must include: SCI 162)
Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)
Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)
Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)
All undergraduate students are required to complete the minimum
general education credits required by their program version.
Credits applied to the Required Course of Study (with the exception
of the electives) will only be applied to the core and cannot
count toward General Education total
Students who lack 67 or fewer general education credits may use
interdisciplinary or elective credits to waive the balance. Students
must use interdisciplinary or elective credits to waive the general
education balance in order to complete the minimum general edu-
cation credits required for their program.

Degree Requirements for the AAFHCA
The degree requirements for this program are the following:
• Completion of a minimum of 60 credits.
• Students transferring from Western International University to
any University of Phoenix undergraduate program may transfer
all coursework completed at Western International University
with a grade of “D-“ or higher.
• A minimum grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not
appear on the diploma. The diploma awarded for this program
will read as:
Associate of Arts

Academic Progression Requirements for the AAFHCA
• Many courses in the Required Course of Study build on or
reinforce each other. To ensure that students have the requisite
skills for specific coursework certain program areas must be
satisfied before students can progress to others.
• Credits applied to the Required Course of Study (with the exception
of the electives) will only be applied to the concentration and cannot count toward General Education totals.

Additional Residency Requirements and Course Waivers for
the AAFHCA
Students in this program may waive a maximum of 6 credits from
their required course of study on the basis of regionally or
approved nationally accredited transferable coursework.

Course Descriptions for the AAFHCA
HCA 210 .................................................................................. 3 credits
Introduction to Health Care: Riding the Fourth Wave
This course provides a broad overview of the United States health
care system. The historical evolution of the business of health care
is examined. The student will explore management concepts and
workforce opportunities within the health care industry.
HCA 220 .................................................................................. 3 credits
The Language of Health Care
This course offers the student engagement and interaction with the
dynamic language of health care. Through comprehensive discus-
sions and activities, the student will have the opportunity to be
immersed in the words used in health care. This course requires a
microphone and speakers or headphones for recording and listen-
ing to digital audio files.

**Communication Skills for Health Care Professionals**

This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

**Health & Diseases: Understanding Pathos of Pathology**

This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

**Financial Matters for Health Care Professionals**

This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care operations. This course introduces the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the responsibilities of health care financial management.

**Effective Essay Writing**

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.

**Research Writing**

Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

**Introduction to College Algebra**

This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
The following Associate of Arts/Foundations in Health Care Administration/Medical Records (AAFHCA/MR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree Foundations in Health Care Administration with a concentration in Medical Records provides an introductory curriculum framework in this field of study. Courses focus on medical terminology, patient information management, and medical claims processing. In addition, the use of software instruction allows students to explore the application of theory to practice.

For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: Associate of Arts/Foundations in Health Care Administration/Medical Records provides foundation skills in medical record keeping. However, it does not lead to certification in medical coding practice or any other related practice.

### Foundations in Health Care Administration/Medical Records - Track A and B

- **HCA 220 ~** The Language of Health Care - 3 credits
- **HCA 240 ~** Health & Diseases: Understanding Pathos of Pathology - 3 credits
- **HCR 210 ~** Patient Records: Keeping it Real - 3 credits
- **HCR 220 ~** Claims Preparation I: Clean Bills of Health - 3 credits
- **HCR 230 ~** Claims Preparation II: Footing the Bills - 3 credits

### Additional Admission Requirements for AAFHCA/MR

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

### General Education Requirements for the AAFHCA/MR for Arkansas Students

- **Communication Arts Requirement 6 credits**
  - (A Track must include: COM 150 and COM 220)
  - (B Track must include: COM 155 and COM 156)
- **Mathematics Requirement 6 credits**
  - Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.
  - Must include: MAT 219 and MAT 220
- **Science & Technology Requirement 9 credits**
  - (B Track must include: SCI 162)
  - Must include a minimum of 6 credits in lab science.
  - Must include: HCR 240
- **Social Science Requirement 9 credits**
  - (A Track must include: ETH 125)
  - (B Track must include: PSY 201 and ETH 125)
  - Must include: HIS 135
- **Humanities Requirement 9 credits**
  - (A Track must include: CRT 205)
  - (B Track must include: HUM 111)
- **Additional Liberal Arts Requirement 6 credits**
  - (A Track must include: GEN 105)
  - (B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.
General Education Requirements for the AAFHCA/MR for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Additional Residency Requirements and Course Waivers for the AAFHCA/MR

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Course Descriptions for the AAFHCA/MR

HCA 220 ...................................................................................3 credits

The Language of Health Care

This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

HCA 240 ...................................................................................3 credits

Health & Diseases: Understanding Pathos of Pathology

This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCR 210 ...................................................................................3 credits

Patient Records: Keeping it Real

Documenting patients’ health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records. Settings include hospitals, physicians’ offices and alternate care facilities. Students review uses of health data and legal aspects of health information management.

HCR 220 ...................................................................................3 credits

Claims Preparation I: Clean Bills of Health

Medical records processing revolves around insurance and reimbursement. This course focuses on the background, knowledge and skills related to basic billing duties, HIPAA regulations, patient encounters, and the preparation, compliance, and transmission of claims. Students are introduced to the history, current state and future direction of the major diagnostic and procedural coding systems.

HCR 230 ...................................................................................3 credits

Claims Preparation II: Footing the Bills

This course continues medical records processing instruction. Topics focus on the background, knowledge and skills related to private payers, Medicare, Medicaid, Tricare, Champva, workers compensation and disability. Claims processing includes payments, appeals, and secondary claims; patient billing and collection; hospital billing and reimbursement.

COM 150 .................................................................................3 credits

Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Students also complete exercises covering topic sentences, paragraph development, citations, and formatting guidelines.
COM 220 ................................................................. 3 credits
Research Writing
Students focus on gathering research, evaluating and documenting sources, developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.
HCR 240 ................................................................. 3 credits
Computerizing Med Data: Paper Chase Goes Techno
This medical records capstone course enables students to develop career skills in computerizing data through application of a software program widely used in health care. While popular for medical billing and collections, MedisoftTM also applies to managing patients' health care information, scheduling, correspondence, and a variety of reports. This course requires a PC with Windows 2000 or Windows XP operating system.
MAT 219 ................................................................. 3 credits
Introduction to College Algebra
This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.
MAT 220 ................................................................. 3 credits
College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.
BIO 100 ................................................................. 4 credits
Introduction to Life Science with Lab
This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effects humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.
CHM 109 ................................................................. 3 credits
Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 135 ................................................................. 3 credits
The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying historical perspective to analyze contemporary issues.
ETH 125 ................................................................. 3 credits
Cultural Diversity
This course is designed to educate students about issues of race and ethnicity by presenting historical and modern perspectives on diversity in the United States, and by providing tools necessary to promote a respectful and inclusive society. Students will complete several activities that allow them to examine their own values in relation to the values of various other racial and ethnic communities.
CRT 205 ................................................................. 3 credits
Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.
GEN 105 ................................................................. 3 credits
Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today's society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.
Associate of Arts/Concentration in Health Care Administration/Electronic Health Records (Minnesota/Arkansas)

The following Associate of Arts/Concentration in Health Care Administration/Electronic Health Records (AAHCA/EHR) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree in Health Care Administration with emphasis in Electronic Health Records lays a foundation for further study of the health care industry at the undergraduate level. Courses focus on the introduction of health care delivery, medical terminology, health care information systems fundamentals, data management, and health care ethics and compliance. Students will also use electronic health record-keeping software that synthesizes a variety of records processes common in health care facilities. The concepts learned in this program align to national electronic health record specialist certification exam content.

For students residing in Arkansas: For more information about our record specialist certification exam content. For students residing in Arkansas: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca-ar.

For students residing in Minnesota: For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahca-mn.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Note: This is not a nursing program nor will the courses included in this program fully prepare a student to enter a nursing program.

Concentration in Health Care Administration/Electronic Health Records - Track A and B

HCA 210 ~ Introduction to Health Care: Riding the Fourth Wave
HCA 220 ~ The Language of Health Care
HCA 240 ~ Health & Diseases: Understanding Pathos of Pathology
HCIS 255 ~ Structure and Design of Electronic Health Records
HCIS 265 ~ Medical Health Information

The University reserves the right to modify the required course of study.

Additional Admission Requirements for AAHCA/EHR

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate.

General Education Requirements for the AAHCA/EHR for Arkansas Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
Students, who reside in Arkansas, are required to complete MAT 220 College Algebra. The MAT 220 requirement may be satisfied with College Algebra transfer coursework or math transfer coursework requiring College Algebra as a prerequisite.

Must include: MAT 219 and MAT 220

Science & Technology Requirement 9 credits
(B Track must include: SCI 162)

Must include a minimum of 6 credits in lab science.

The lab science requirements may also be satisfied with any science transfer coursework with a lab component.

Must include: HCIS 275. Students must complete all concentration courses before enrolling in HCIS 275. HCIS 275 will satisfy three (3) credits of the Arkansas science requirement.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Must include: HIS 135

HIS 135 requirement may also be satisfied with any transfer coursework with US History or Government content.

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version. Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students who reside in Arkansas are required to complete a minimum of 6 credits in Lab Sciences. Students who complete BIO 100 to fulfill the requirement may be required to complete more than 60 credits to fulfill all requirements for the degree program.

General Education Requirements for the AAHCA/EHR for Minnesota Students

Communication Arts Requirement 6 credits
(A Track must include: COM 150 and COM 220)
(B Track must include: COM 155 and COM 156)

Mathematics Requirement 6 credits
University of Phoenix math courses must be MAT 116 or higher to satisfy requirement.

Science & Technology Requirement 9 credits
courses before enrolling in HCIS 275. Students must complete all concentration courses before enrolling in HCIS 275.

Humanities Requirement 9 credits
(A Track must include: CRT 205)
(B Track must include: HUM 111)

Social Science Requirement 9 credits
(A Track must include: ETH 125)
(B Track must include: PSY 201 and ETH 125)

Additional Liberal Arts Requirement 6 credits
(A Track must include: GEN 105)
(B Track must include: US 101 and FP 101)

All undergraduate students are required to complete the minimum general education credits required by their program version.

Credits applied to the Required Course of Study (with the exception of the electives) will only be applied to the core and cannot count toward General Education total

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Degree Requirements for the AAHCA/EHR

The degree requirements for this program are the following:

• Completion of a minimum of 60 credits.
• Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a grade of “D-” or higher.
• A minimum grade point average (GPA) of 2.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:

Associate of Arts

Academic Progression Requirements for the AAHCA/EHR

This course requires a microphone and speakers or headphones for recording and listening to digital audio files.

HCA 240 .................................................................................. 3 credits
Health & Diseases: Understanding Pathos of Pathology

This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCIS 255 .................................................................................. 3 credits
Structure and Design of Electronic Health Records

Students will learn about the evolving function and use of technology to support the documentation of vital health information contained in a patient’s medical history. This course will introduce students to the general software applications, insurance and coding information, and regulatory compliance requirements.

HCIS 265 .................................................................................. 3 credits
Medical Health Information

This course focuses on the documentation of medical data and how managing data can be vital to the treatment and care of individuals in the health care system. Students will examine development, forms, routing, filing, and storage of patient’s records in a variety of health care settings. Students will also review issues related to quality and data management, as well as privacy and security compliance.

COM 150 .................................................................................. 3 credits
Effective Essay Writing

In this course, students develop academic writing skills. Students use the writing process to construct an expository essay with an emphasis on coherence and correctness in written communication. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense and form, subject-verb and pronoun-antecedent agreement, and pronoun case. Critical Thinking
In this course, students develop the ability to think clearly and critically. Practice includes developing writing skills that enable students to clearly present claims to support their conclusions and avoid reinforcing biases. Students are given the opportunity to analyze and discuss various types of media-including television, Internet, and print-to determine which sources provide the most reliable information. Topics addressed include the relationship between critical thinking and clear writing, credibility of sources, rhetorical devices, fallacies, unclear or misleading language, and the characteristics of various types of arguments.

GEN 105 .........................................................................................3 credits

Skills for Learning in an Information Age
This course introduces students to learning in an information-rich society. Students will develop strategies for successful distance learning, time management, and for managing the abundance of information available in today’s society. Students will also explore the appropriate use of information in an academic environment. Specific topics for the course include computing skills for distance learning, online library use, academic honesty, and the development of effective study skills.

Associate of Arts/Concentration in Foundations in Health Administration

The following Associate of Arts/Concentration in Foundations in Health Administration (AAHAD) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts degree with a concentration in Foundations in Health Administration provides a foundational framework of knowledge and practical skills needed for the evolving health care business environment. The program is designed to prepare students entering into a wide range of health industry settings. Students will have the option to expand their career development by selecting from a variety of concentrations, some of which align to national certifications. In addition, associate degree graduates seeking to enhance their professional career have the opportunity to transition into the university’s Bachelors of Science in Health Administration.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaahad.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Preferred Sequence and Prerequisites for the AAHAD

HCS 235 ~ .................................................................3 credits
Health Care Delivery in the U. S.

HCS 120 ~ .................................................................3 credits
Medical Terminology for Health Care Professionals

HCS 131 ~ .................................................................3 credits
Business Communication Skills for Health Care Professionals

HCIS 140 ~ .................................................................3 credits
Fundamentals of Electronic Health Records

HCS 265 ~ .................................................................3 credits
The Managerial Environment of Health Care

HCS 219 ~ .................................................................3 credits
Introduction to Health Care Finance

The University reserves the right to modify the required course of study.
General Information for the AAHAD

- First time attendees with the University who indicate less than 24 previous college credits (as recognized by the university) on the admission application and who meet the requirements for "Admitted with Condition" status, will be admitted with condition to this program according to the risk free period policy.
- Prior Learning Assessment and credits earned through National Testing Programs are excluded from the calculation of previous college credits.
- Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course. The results of the diagnostic will determine placement in the Accelerated Pathway (A Track) or standard pathway (B Track).
- Students who have previously posted at least one week of class attendance in a course for credit with the University will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track).
- Students who wish to pursue an alternate pathway must have an approved appeal on file prior to posting positive attendance in class.
- Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

Additional Admission Requirements for AAHAD

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or HiSET (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the AAHAD

- Completion of a minimum of 60 credits that include the following distribution:
  - General Education Component - 42 credits
  - Concentration - 18 credits
- A minimum grade point average (GPA) of 2.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma.
- The diploma awarded for this program will read as: Associate of Arts

General Education Requirements for the AAHAD

The General Education requirements for this program are the following:

Communication Arts Requirement 6 credits

B Track must include: ENG 147
Mathematics Requirement 6 credits
Science and Technology Requirement 6 credits
Must include HCS 245
Humanities Requirement 6 credits
B Track must include: HUM 115
Social Science Requirement 6 credits
Additional Liberal Arts Requirement 3 credits
A Track must include: GEN 201
B Track must include: GEN 127
Interdisciplinary Requirement 9 credits

Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement. Physical Education activity credits are limited to four (4) credits. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Academic Progression Requirements for the AAHAD

- Students placed in the Accelerated Pathway (A Track) are required to successfully complete GEN 201 as the first course in their program.
- Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147, HUM 115
- With the exception of ENG 147, GEN 127, GEN 201, and HUM 115, General Education course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - UOPX Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
- Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
- Students may not complete any of the standard pathway (B Track) courses via Directed Study.
- All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite. A student may not enroll in a course requiring math and/or English as a prerequisite unless the proficiency requirement has been fulfilled. Math and English proficiencies may be satisfied in one of the following ways:
  - Successful completion of UOPX math and English courses designated as applicable to the proficiency requirement
  - Comparable regionally or approved nationally accredited transfer coursework that meets the following requirements:
    - Completed within five years of enrollment
    - Grade of C- or better
    - At least 2.67 semester credits
    - Eligible to receive general education credits
• Achieve a passing score (as established by the American Council on Education) on a comparable National Testing Program (NTP) exam completed within five years of enrollment.
• Students in the state of Florida who have passed the CLAST or FTCE-GK exam will have satisfied English proficiency.
• Demonstrate competency by meeting minimum passing score on UOPX approved placement exam.
**Minimum Grade Requirements for the AAHAD**
• Students in this program will be placed on scholastic disqualification if a minimum grade of “C” (2.0) is not attained in the following courses: HCS 219, HCS 265.
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.
• Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific courses listed above only one time. If the student does not receive the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.
**Additional Residency Requirements and Course Waivers for the AAHAD**
• Students in this program may waive a maximum of 6 credits from their required course of study.
**Additional Academic Program Re-Entry Policies for the AAHAD**
• Re-entry students will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track). They will not be required to enroll in the standard pathway (B Track) courses.
**Course Descriptions for the AAHAD**

HCS 235 ................................................................. 3 credits

**Health Care Delivery in the U.S.**
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 120 ................................................................. 3 credits

**Medical Terminology for Health Care Professionals**
This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, students will have the opportunity to be immersed in the words used in health care.

HCS 131 ................................................................. 3 credits

**Business Communication Skills for Health Care Professionals**
This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will focus on business writing correspondence, communication technologies, and effective communication strategies for the health care industry.

HCIS 140 ...................................................................................3 credits

**Fundamentals of Electronic Health Records**
This course introduces students to the fundamentals of electronic health records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCS 265 ...................................................................................3 credits

**The Managerial Environment of Health Care**
This course introduces students to basic management concepts and regulations within the health care industry. Students will become familiar with regulatory compliance and ethical issues in the health care business. The application of human resource concepts will also be discussed.

HCS 219 ...................................................................................3 credits

**Introduction to Health Care Finance**
This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care. Students will explore the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the use of financial documents.

**Associate of Arts/Emphasis in Foundations in Health Administration (Maryland-Online)**

The following Associate of Arts/Emphasis in Foundations in Health Administration (AAHAD) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts degree with an emphasis in Foundations in Health Administration provides a foundational framework of knowledge and practical skills needed for the evolving health care business environment. The program is designed to prepare students entering into a wide range of health industry settings. Students will have the opportunity to expand their career development by selecting from a variety of emphases, some of which align to national certifications. In addition, associate degree graduates seeking to enhance their professional career have the opportunity to transition into the university’s Bachelors of Science in Health Administration.

Associate of Arts/Concentration in Health Administration/Health Records Fundamentals (Certificate Track)
The following Associate of Arts/Concentration in Health Administration/Health Records Fundamentals (Certificate Track) (AAHAD/EHRC) program may be offered at these University of Phoenix campus locations:
Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.
The Associate of Arts Degree with a concentration in Health Administration/Electronic Health Records Fundamentals lays a foundation for further study of the health care industry at the undergraduate level. Courses focus on the introduction of health care delivery, medical terminology, health care information systems fundamentals, data management, and health care ethics and compliance. Students will also use electronic health record-keeping software that synthesizes a variety of records processes common in health care facilities. The concepts learned in this program align to national electronic health record specialist certification exam content.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ahad.

Medical Terminology for Health Care Professionals
HCS 131 ~ ................................................................................3 credits
Business Communication Skills for Health Care Professionals
The Certificate Track associates programs are designed to be an option for students to earn a certificate en-route to earning the associates degree. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education requirement. Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement. Physical Education activity credits are limited to four (4) credits.

### Additional Admission Requirements for AAHAD/EHRC
- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

### General Information for the AAHAD/EHRC
- First time attendees with the University who indicate less than 24 previous college credits (as recognized by the university) on the admission application and who meet the requirements for "Admitted with Condition" status, will be admitted with condition to this program according to the risk free period policy.
- Prior Learning Assessment and credits earned through National Testing Programs are excluded from the calculation of previous college credits.
- The Certificate Track associates programs are designed to be an option for students to earn a certificate en-route to earning the associates degree.
- Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.
- Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course. The results of the diagnostic will determine placement in the Accelerated Pathway (A Track) or standard pathway (B Track).
- Students who have previously posted at least one week of class attendance in a course for credit with the University will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track).
- Students who wish to pursue an alternate pathway must have an approved appeal on file prior to posting positive attendance in class.
- Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

### Additional Admission Requirements for AAHAD/EHRC
- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

### Degree Requirements for AAHAD/EHRC
- Completion of a minimum of 60 credits that include the following distribution:
  - General Education Component - 42 credits
  - Concentration - 18 credits
  - A minimum grade point average (GPA) of 2.0.
- Students may earn a certificate in the same area of focus as the concentration en route to completing the associates degree. Students may apply for certificate conferral meeting the following program requirements:
  - Successful completion of the concentration courses outlined in the enrollment agreement for the certificate.
  - Achievement of the minimum program GPA.
  - Fulfillment of the minimum University residency requirement.
- Concentrations or emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

### General Education Requirements for the AAHAD/EHRC
- Communication Arts Requirement 6 credits
  - B Track must include: ENG 147
- Mathematics Requirement 6 credits
  - Must include: HCS 245

- University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
- National Testing Programs, and
- ACE evaluated Military credits.

Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).

Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.

Students may not complete any of the standard pathway (B Track) courses via Directed Study.

All undergraduate students must satisfy math and English proficiency prior to enrolling in any course that requires math or English as a prerequisite. A student may not enroll in a course requiring math and/or English as a prerequisite unless the proficiency requirement has been fulfilled. Math and English proficiency may be satisfied in one of the following ways:

- Successful completion of University of Phoenix math and English courses designated as applicable to the proficiency requirement
- Comparable regionally or approved nationally accredited transfer coursework that meets the following requirements:
  - Completed within five years of enrollment
  - Grade of C- or better
  - At least 2.67 semester credits
- Eligible to receive general education credits

Accreditor Pathway (A Path) students may not be required to complete the standard diagnostic and will be placed in the Accelerated Pathway (A Track). They will not be required to enroll in the required pathway (B Track) courses.

Course Descriptions for the AAHAD/EHRC

HCS 235 .................................................................3 credits
Health Care Delivery in the U. S.
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 120 .................................................................3 credits
Medical Terminology for Health Care Professionals
This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, students will have the opportunity to be immersed in the words used in health care.

HCS 131 .................................................................3 credits
Business Communication Skills for Health Care Professionals
This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will focus on business writing correspondence, communication technologies, and effective communication strategies for the health care industry.

HCS 140 .................................................................3 credits
Fundamentals of Electronic Health Records
This course introduces students to the fundamentals of electronic health records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCS 250 .................................................................3 credits
Application of Electronic Health Records
Students in the capstone course for the electronic health records (EHR) concentration will continue to use an EHR software to apply foundational skills related to administrative tasks, data charting,
insurance and billing, and regulatory compliance and reporting. Students will demonstrate mastery processing an electronic health record.

**Associate of Arts/Emphasis in Health Administration/Health Records Fundamentals (Certificate Track)** (Maryland-Online)

The following Associate of Arts/Emphasis in Health Administration/Health Records Fundamentals (Certificate Track) (AAHAD/EHRC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree with an emphasis in Health Administration/Electronic Health Records Fundamentals lays a foundation for further study of the health care industry at the undergraduate level. Concepts such as an introduction to health care delivery, communication skills, medical terminology, health care information systems, the regulatory environment, and patient records will be discussed. Students that complete this program will obtain the knowledge and skills necessary to work in an entry level component of the health and wellness industry.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aahad.

**General Information for the AAHAD/EHRC**

- First time attendees with the University who indicate less than 24 previous college credits (as recognized by the university) on the admission application and who meet the requirements for "Admitted with Condition" status, will be admitted with condition to this program according to the risk free period policy.
- Prior Learning Assessment and credits earned through National Testing Programs are excluded from the calculation of previous college credits.
- The Certificate Track associates programs are designed to be an option for students to earn a certificate en-route to earning the associates degree.
- Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a emphasis in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.
- Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course. The results of the diagnostic will determine placement in the Accelerated Pathway (A Track) or standard pathway (B Track).
- Students who have previously posted at least one week of class attendance in a course for credit with the University will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track).
- Students who wish to pursue an alternate pathway must have an approved appeal on file prior to posting positive attendance in class.
- Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

**Additional Admission Requirements for AAHAD/EHRC**

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

**Degree Requirements for AAHAD/EHRC**

- Completion of a minimum of 60 credits that include the following distribution:
  - General Education Component - 42 credits
  - Emphasis - 18 credits
  - A minimum grade point average (GPA) of 2.0.
- Students may earn a certificate in the same area of focus as the emphasis en route to completing the associates degree. Students may apply for certificate conferral meeting the following program requirements:
  - Successful completion of the emphasis courses outlined in the enrollment agreement for the certificate.
  - Achievement of the minimum program GPA.
  - Fulfillment of the minimum University residency requirement.
- Emphases are reflected on the transcript only and will not appear on the diploma.

The diploma awarded for this program will read as: Associate of Arts

**General Education Requirements for the AAHAD/EHRC**

- Communication Arts Requirement 6 credits
- B Track must include: ENG 147
- Mathematics Requirement 6 credits
- Science and Technology Requirement 6 credits
Must include: HCS 245
Humanities Requirement 6 credits
B Track must include: HLIM 115
Social Science Requirement 6 credits
Additional Liberal Arts Requirement 3 credits
A Track must include: GEN 201
B Track must include: GEN 127
Interdisciplinary Requirement 9 credits
Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.
Physical Education activity credits are limited to four (4) credits.
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Academic Progression Requirements for the AAHAD/EHRC
• Students placed in the Accelerated Pathway (A Track) are required to successfully complete GEN 201 as the first course in their program.
• Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147, HUM 115
• With the exception of ENG 147, GEN 201, and HUM 115, General Education course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
• Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
• Students may not complete any of the standard pathway (B Track) courses via Directed Study.
• All undergraduate students must satisfy math and English proficiency prior to enrolling in any course that requires math or English as a prerequisite. A student may not enroll in a course requiring math and/or English as a prerequisite unless the proficiency requirement has been fulfilled. Math and English proficiencies may be satisfied in one of the following ways:
  • Successful completion of University of Phoenix math and English courses designated as applicable to the proficiency requirement
  • Comparable regionally or approved nationally accredited transfer coursework that meets the following requirements:
    -Completed within five years of enrollment
    -Grade of C- or better
    -At least 2.67 semester credits
    -Eligible to receive general education credits
• Achieve a passing score (as established by the American Council on Education) on a comparable National Testing Program (NTP) exam completed within five years of enrollment.
• Students in the state of Florida who have passed the CLAST or FTCE-GK exam will have satisfied English proficiency
• Demonstrate competency by meeting minimum passing score on University of Phoenix approved placement exam.

Minimum Grade Requirements for the AAHAD/EHRC
• Students in this program will be placed on scholastic disqualification if a minimum grade of "C" (2.0) is not attained in the following courses: HCIS 250, HCIS 270, HCR 201, HCR 202, HCR 203, HCS 182, HCS 214, HCS 216, HCS 224
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.
• Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific courses listed above only once time. If the student does not receive the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.

Additional Residency Requirements and Course Waivers for the AAHAD/EHRC
• Students in this program may waive a maximum of 6 credits from their required course of study.
• The following course in the Required Course of Study may not be waived: HCIS 270, HCR 203

Additional Academic Program Re-Entry Policies for the AAHAD/EHRC
• Re-entry students will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track). They will not be required to enroll in the standard pathway (B Track) courses.

Course Descriptions for the AAHAD/EHRC
HCS 235 ................................................................. 3 credits
  Health Care Delivery in the U. S.
  This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
HCS 120 ................................................................. 3 credits
  Medical Terminology for Health Care Professionals
  This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, students will have the opportunity to be immersed in the words used in health care.
HCS 131 ................................................................. 3 credits
  Business Communication Skills for Health Care Professionals
  This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will
fundamental electronic health records, and effective communication strategies for the health care industry.

HCIS 140 ................................................................. 3 credits

Fundamentals of Electronic Health Records
This course introduces students to the fundamentals of electronic health records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCIS 250 ................................................................. 3 credits

Structure, Design and Tools of Electronic Health Records
Students will learn about the evolving functions and uses of technology to support the documentation of vital health information contained in a patient’s electronic health record. This course will introduce students to software applications, claims and reimbursement information, as well as regulatory compliance requirements. Students will examine forms, routing, and reporting of patient records in a variety of health care settings. Students will use an electronic health record (EHR) software to reinforce quality and data management of patient information.

HCIS 270 ................................................................. 3 credits

Application of Electronic Health Records
Students in the capstone course for the electronic health records (EHR) concentration will continue to use an EHR software to apply foundational skills related to administrative tasks, data charting, insurance and billing, and regulatory compliance and reporting. Students will demonstrate mastery processing an electronic health record.

HCIS 270 ................................................................. 3 credits

Associate of Arts/Concentration in Health Administration/Health and Wellness Administration Foundations (Certificate Track)
The following Associate of Arts/Concentration in Health Administration/ Health and Wellness Administration Foundations (Certificate Track) (AAHAD/HWAC) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts Degree with a concentration in Health Administration/Health and Wellness Administration Foundations lays a foundation for further study of the health care industry at the undergraduate level. Concepts such as an introduction to health care delivery, communication skills, medical terminology, health care information systems, the regulatory environment, and patient records will be discussed. Students that complete this program will obtain the knowledge and skills necessary to work in an entry level component of the health and wellness industry.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aaabh.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Preferred Sequence and Prerequisites for the AAHAD/HWAC
HCIS 235 ~ ................................................................. 3 credits
Health Care Delivery in the U.S.

Introduction to Financial Concepts

The University reserves the right to modify the required course of study.

General Information for the AAHAD/HWAC
• First time attendees with the University who indicate less than 24 previous college credits (as recognized by the university) on the admission application and who meet the requirements for “Admitted with Condition” status, will be admitted with condition to this program according to the risk free period policy.

• Prior Learning Assessment and credits earned through National Testing Programs are excluded from the calculation of previous college credits.

• The Certificate Track associates programs are designed to be an option for students to earn a certificate en-route to earning the associates degree.

• Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.

• Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course. The results of the diagnostic will determine placement in the Accelerated Pathway (A Track) or standard pathway (B Track).

• Students who have previously posted at least one week of class attendance in a course for credit with the University will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track).

• Students who wish to pursue an alternate pathway must have an approved appeal on file prior to posting positive attendance in class.

• Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

Additional Admission Requirements for AAHAD/HWAC
• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for AAHAD/HWAC

• Completion of a minimum of 60 credits that include the following distribution:
  - General Education Component - 42 credits
  - Concentration - 18 credits
  - A minimum grade point average (GPA) of 2.0.
  - Students may earn a certificate in the same area of focus as the concentration en route to completing the associates degree. Students may apply for certificate conferral meeting the following program requirements:
    • Successful completion of the concentration courses outlined in the enrollment agreement for the certificate.
    • Achievement of the minimum program GPA.
    • Fulfillment of the minimum University residency requirement.
  - Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Associate of Arts

General Education Requirements for the AAHAD/HWAC

The General Education requirements for this program are the following:

- Communication Arts Requirement 6 credits
  - Must include: ENG 147

- Mathematics Requirement 6 credits
  - Science and Technology Requirement 6 credits
  - Humanities Requirement 6 credits
  - Social Science Requirement 6 credits
  - Additional Liberal Arts Requirement 3 credits
  - A Track must include: GEN 201
  - B Track must include: GEN 127

- Interdisciplinary Requirement 9 credits
  - Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.
  - Physical Education activity credits are limited to four (4) credits.

Minimum Grade Requirements for the AAHAD/HWAC

• Students in this program will be placed on scholastic disqualification if a minimum grade of "C" (2.0) is not attained in the following courses: HCIS 250, HCIS 270, HCR 201, HCR 202, HCR 203, HCS 182, HCS 214, HCS 216, HCS 224
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

• Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific courses listed above only one time. If the student does not receive the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.
Additional Residency Requirements and Course Waivers for the AAHAD/HWAC

- Students in this program may waive a maximum of 6 credits from their required course of study.
- The following course in the Required Course of Study may not be waived: HCIS 270, HCR 203

Additional Academic Program Re-Entry Policies for the AAHAD/HWAC

- A. Re-entry students will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track). They will not be required to enroll in the standard pathway (B Track) courses.

General Education Requirements for the AAHAD/HWAC

The General Education requirements for this program are the following:

Communication Arts Requirement 6 credits
  B Track must include: ENG 147

Mathematics Requirement 6 credits

Science and Technology Requirement 6 credits
  Must include: HCS 245

Humanities Requirement 6 credits
  H Track must include: HUM 115

Social Science Requirement 6 credits
  Additional Liberal Arts Requirement 3 credits
  A Track must include: GEN 201
  B Track must include: GEN 127

Interdisciplinary Requirement 9 credits

Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.

Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Academic Progression Requirements for the AAHAD/HWAC

• Students placed in the Accelerated Pathway (A Track) are required to successfully complete GEN/201 as the first course in their program.

• Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any University bachelor degree programs.

  • With the exception of ENG 147, GEN 127, GEN 201, and HUM 115, General Education course requirements may be satisfied by any of the following means:
    • University of Phoenix coursework,
    • Regionally or nationally accredited coursework (C- or higher grade),
    • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
    • National Testing Programs, and
    • ACE evaluated Military credits.

• Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).

• Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.

• Students may not complete any of the standard pathway (B Track) courses via Directed Study.

• All undergraduate students must satisfy math and English proficiency prior to enrolling in any course that requires math or English as a prerequisite. A student may not enroll in a course requiring math and/or English as a prerequisite unless the proficiency requirement has been fulfilled. Math and English proficiencies may be satisfied in one of the following ways:
  • Successful completion of University of Phoenix math and English courses designated as applicable to the proficiency requirement
  • Comparable regionally or approved nationally accredited transfer coursework that meets the following requirements:
    - Completed within five years of enrollment
    - Grade of C- or better
    - At least 2.67 semester credits
  • Eligible to receive general education credits
• Achieve a passing score (as established by the American Council on Education) on a comparable National Testing Program (NTP) exam completed within five years of enrollment.
• Students in the state of Florida who have passed the CLAST or FTCE-GK exam will have satisfied English proficiency
• Demonstrate competency by meeting minimum passing score on University of Phoenix approved placement exam.

Minimum Grade Requirements for the AAHAD/HWAC

• Students in this program will be placed on scholastic disqualification if a minimum grade of "C" (2.0) is not attained in the following courses: HCIS 250, HCIS 270, HCR 201, HCR 202, HCR 203, HCS 182, HCS 214, HCS 216, HCS 224
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

Students in the capstone course for the electronic health records (EHR) concentration will continue to use an EHR software to apply foundational skills related to administrative tasks, data charting, insurance and billing, and regulatory compliance and reporting. Students will demonstrate mastery processing an electronic health record.

The Bachelor of Science in Health Administration (Maryland-Online)

The following Bachelor of Science in Health Administration (BSHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depends on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The bachelor of Science in Health Administration (BSHA) program is designed to integrate a framework of general education courses with a health care curriculum that provides the graduate with the foundational knowledge needed to enter today’s challenging health industry. The BSHA curriculum focuses on the basic body of knowledge, understanding, and skills identified as relevant to an ever expanding and diverse health care arena.

Coursework includes content in some of the following areas: management, finance, legal and ethical parameters, human resources, and information systems. Upon completion of the core curriculum healthcare students have the opportunity to select an emphasis that is designed to expand their professional opportunities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha.

### Emphasis in Health Information Systems

This emphasis is designed for individuals that want to work with information technology in health care. Focus is on database concepts as well as information network and system design.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at [http://www.phoenix.edu/programs/bsha-his](http://www.phoenix.edu/programs/bsha-his).
Applicants to the Emergency Management emphasis (BSHA/EM) must be currently employed or have access to a work environment.

Additional Admission Requirements BSHA
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Applicants must be currently employed or have access to a work environment.
- Applicants to the Emergency Management emphasis (BSHA/EM) must be currently employed or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

Degree Requirements for the BSHA
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 48 upper division credits
  - A minimum of 54 credits of the 120 must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
  - Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
  - Students will declare an emphasis at the time of enrollment.
  - Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read: Bachelor of Science in Health Administration

General Education Requirements for the BSHA
All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement. Communication Arts Requirement(s) 6 credits
Mathematics Requirement(s): 6 credits
Science & Technology Requirement(s): 6 credits
Must include at least 3 credits in the physical or biological sciences
Humanities Requirement(s): 6 credits
Social Science Requirement(s): 6 credits
Additional Liberal Arts Requirement(s): 6 credits
Interdisciplinary Requirement(s): 18 credits

Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement. Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Academic Progression Requirements for the BSHA
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

Additional Residency Requirements and Course Waivers for the BSHA
Students in this program may waive a maximum of eighteen (18) upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework (national testing program credit, prior learning credit, and military credit may not be used to waive with or without credit coursework in the required course of study).

Students may also waive nine (9) lower division credits from the required course of study.

The following courses in the required course of study may not be waived: GEN 200, HCS 449.

Course Descriptions for the BSHA
GEN 200 ........................................................................... 3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.
HCS 212 ........................................................................... 3 credits
Health Care Vocabulary
This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems. In addition, students will also explore terminology related to body systems and common diseases and treatments associated with these systems.
HCS 235 ........................................................................... 3 credits
Health Care Delivery in the United States
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
HCS 245 ....................................................................................3 credits
**Introduction to Health and Disease**
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.
HCS 320 ....................................................................................3 credits

**Health Care Communication Strategies**
This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss the influences of gender and culture, examine channels of communication including the development of interpersonal and technology-related communication, and the impact of consumer and interdisciplinary communication.
HCS 325 ....................................................................................3 credits

**Health Care Management**
The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.
HCS 335 ....................................................................................3 credits

**Health Care Ethics and Social Responsibility**
This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.
HCS 341 ....................................................................................3 credits

**Human Resources in Health Care**
This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.
HCS 483 ....................................................................................3 credits

**Health Care Information Systems**
The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application, and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.
HCS 490 ....................................................................................3 credits

**Health Care Consumer - Trends and Marketing**
In this course students will have the opportunity to examine the traits, trends, and needs of today’s health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.
HCS 485 ....................................................................................3 credits

**Health Care Financial Accounting**
This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting, and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.
HCS 440 ....................................................................................3 credits

**Economics: The Financing of Health Care**
This course provides an overview of the economics of health care. The various payers are examined, including private, state, and federal entities. Issues such as the cost effectiveness of prevention, the management of patients and their diseases, as well as the cost of treatment settings are discussed. Third-party reimbursement from various sources, ranging from for-profit insurance carriers to charitable donations, are reviewed. The health care system’s use of grant funding and research dollars is described.
HCS 465 ....................................................................................3 credits

**Health Care Research Utilization**
This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements of evidence based research within health care.
HCS 451 ....................................................................................3 credits

**Health Care Quality Management and Outcomes Analysis**
This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and the role of the governing body of the health care organization in ensuring compliance with the standards of regulatory and accreditation organizations. Methods for assuring quality in process and outcome management are described, as well as the significance and statistical application of measuring outcomes. Various health care customers are identified. Changing trends in the provision and reimbursement of health care services are reviewed.
COMM 215 ..............................................................................3 credits

**Essentials of College Writing**
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 101 ....................................................................................3 credits

**Skills for Lifelong Learning**
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources success-
fully.

GEN 300 ................................................................. 3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.

MTH 220 ................................................................. 3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

CHM 110 ................................................................. 3 credits

Introductory Chemistry
This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

PHY 101 ................................................................. 3 credits

Fundamentals of Physics
This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

HIS 145 ................................................................. 3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.

POL 215 ................................................................. 3 credits

State and Local Political Processes
This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting.

Course Descriptions for the Emphasis in Health Management

HCS 457 ................................................................. 3 credits

Public and Community Health
This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.

HCS 430 ................................................................. 3 credits

Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 475 ................................................................. 3 credits

Leadership and Performance Development
This course provides students with an overview of leadership theories to assist in the development of effective leadership skills. Students will discuss workplace change and the leader’s role in the change process as well as examining and analyzing effective performance indicators for staff and organizational goals.

HCS 455 ................................................................. 3 credits

Healthcare Policy: The Past and the Future
This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined.

HCS 446 ................................................................. 3 credits

Facility Planning
This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss future health care consumer utilization trends, and as well as examine the regulatory compliance requirements.

HCS 449 ................................................................. 3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.
Course Descriptions for the Emphasis in Emergency Management

EMC 310 ...................................................................................3 credits

Principles of Emergency Management
This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.

EMC 330 ...................................................................................3 credits

Political and Policy issues for Emergency Management
This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

EMC 340 ...................................................................................3 credits

Emergency Services and the Community
This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 ...................................................................................3 credits

Managing Emergency Response Operations
This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.

EMC 320 ...................................................................................3 credits

Emergency Preparedness and Planning
This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

HCS 449 ...................................................................................3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Emphasis in Long Term Care

HCS 433 ...................................................................................3 credits

Dimensions of Health and the Older Adult
Basic principles and concepts of the aging process; includes the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.

LTC 310 ...................................................................................3 credits

Social and Community Related Programs and Services
This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult to support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.

HCS 437 ...................................................................................3 credits

Long-term Care Administration
This course examines the organization and management of long-term care and assisted living facilities. The impacts of state and federal regulation are analyzed, as well as issues surrounding funding services are discussed. Students will examine the health services needed for current and future populations needing long term care.

LTC 315 ...................................................................................3 credits

Alternative Living Environments
This course focuses on the various formats of care and living environments for the older adult. The cultural and socioeconomic demographics of our current aging population provide different expectations and needs from previous generations. With the changing needs of this population and their families, students will focus on understanding the multidisciplinary continuum of factors to be considered when determining the living and care options available.

LTC 328 ...................................................................................3 credits

Legal Perspectives in Aging
This course will look at the diverse legal issues related to today’s older adult. Topics will include age discrimination, advocacy and autonomy, elder and fraud abuse, major life transitions, and end of life decision making.

HCS 449 ...................................................................................3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Emphasis in Health Information Systems

HCIS 410 ...................................................................................3 credits

Project Planning and Implementation in Health Care
This course provides the foundation for understanding the broad concepts of successful planning, organization, and implementation within the realm of health care information technology. This course uses real-world examples to support and expand a student’s skills in project management. Topics covered include project scoping,
estimating, budgeting, scheduling, tracking and controlling.

DBM 381 .......................................................... 3 credits

Database Concepts
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.

NTC 361 .......................................................... 3 credits

Network and Telecommunications Concepts
This course provides an overview of telecommunication systems in a business environment. Topics covered include voice communications, standards, transmission, networks, and internetworking.

BSA 376 .......................................................... 3 credits

Systems Analysis and Design
This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. The Systems Development Life Cycle will be fundamental to the course.

HCIS 420 .......................................................... 3 credits

Information Systems Risk Management in Health Care
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of health care information systems. This course will survey remedies and prevention techniques available to address risk and security management. Health care organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.

HCS 449 .......................................................... 3 credits

Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

The Bachelor of Science in Health Administration

The following Bachelor of Science in Health Administration (BSHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Health Administration (BSHA) Program is designed to integrate a framework of general education courses with a health care curriculum that provides the graduate with the foundational knowledge needed to enter today’s challenging health industry. The BSHA curriculum focuses on the basic body of knowledge, understanding, and skills identified as relevant to an ever expanding and diverse health care arena.

Coursework includes content in some of the following areas—management, finance, legal and ethical parameters, human resources, and information systems. Upon completion of the core curriculum healthcare students have the opportunity to select a concentration that is designed to expand their professional opportunities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**BSHA Foundation Courses**

- GEN 200 .......................................................... 3 credits
- Foundations for General Education and Professional Success
- HCS 212 ~ ......................................................... 3 credits
- Health Care Vocabulary
- HCS 235 ~ ......................................................... 3 credits
- Health Care Delivery in the United States
- HCS 245 ~ ......................................................... 3 credits
- Introduction to Health and Disease
- BSHA Required Course of Study

- HCS 320 ~ ......................................................... 3 credits
- Health Care Communication Strategies
- HCS 325 ~ ......................................................... 3 credits
- Health Care Management
- HCS 335 ~ ......................................................... 3 credits
- Health Care Ethics and Social Responsibility
- HCS 341 ~ ......................................................... 3 credits
- Human Resources in Health Care
- HCS 483 ~ ......................................................... 3 credits
- Health Care Information Systems
- HCS 490 ~ ......................................................... 3 credits
- Health Care Consumer - Trends and Marketing
- HCS 405 ~ ......................................................... 3 credits
- Health Care Financial Accounting
- HCS 440 ~ ......................................................... 3 credits
- Economics: The Financing of Health Care
- HCS 465 ~ ......................................................... 3 credits
- Health Care Research Utilization
- HCS 451 ~ ......................................................... 3 credits
- Health Care Quality Management and Outcome Analysis
- Students must select one concentration in a particular area of study at the time of enrollment.
- Students may complete an additional concentration. Please contact your academic representative for more information.

**Concentration in Health Management**

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-hm.

- HCS 457 ~ ......................................................... 3 credits
- Public and Community Health
- HCS 430 ~ ......................................................... 3 credits
- Legal Issues in Health Care: Regulation and Compliance
Concentration in Emergency Management
This concentration is designed for EMTs, First Responders, Firefighters, or any other emergency personnel that want to expand their knowledge and skills related to emergency management. Focus will be on principles of emergency management, managing emergency response operations, and planning and preparedness of emergency situations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-em.

EMC 310 ~ 3 credits
Principles of Emergency Management

EMC 330 ~ 3 credits
Political and Policy Issues for Emergency Management

EMC 340 ~ 3 credits
Emergency Services and the Community

EMC 350 ~ 3 credits
Managing Emergency Response Operations

EMC 320 ~ 3 credits
Emergency Preparedness and Planning

HCS 449 ~ 3 credits
Health Administration Capstone

Concentration in Long Term Care
This concentration is designed to increase skills that are essential when working with various populations requiring long-term care. Courses will focus on aging, legal issues and perspective, gerontology programs and services, as well as alternative living environments for this population.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-ltc.

HCS 433 ~ 3 credits
Dimensions of Health and the Older Adult

LTC 310 ~ 3 credits
Social and Community Related Programs and Services

HCS 437 ~ 3 credits
Long-term Care Administration

LTC 315 ~ 3 credits
Alternative Living Environments

LTC 328 ~ 3 credits
Legal Perspectives in Aging

HCS 449 ~ 3 credits
Health Administration Capstone

Concentration in Health Information Systems
This concentration is designed for individuals that want to work with information technology in health care. Focus is on database concepts as well as information network and system design.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-his.

HCIS 410 ~ 3 credits
Project Planning and Implementation in Health Care

DBM 381 ~ 3 credits
Database Concepts

NTC 361 ~ 3 credits
Network and Telecommunications Concepts

BSA 376 ~ 3 credits
Systems Analysis and Design

HCIS 420 ~ 3 credits
Information Systems Risk Management in Health Care

HCS 449 ~ 3 credits
Health Administration Capstone

The University reserves the right to modify the required course of study as necessary.

Additional Admission Requirements BSHA
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must be currently employed or have access to a work environment.

- Applicants to the Emergency Management concentration (BSHA/EM) must be currently employed or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

Degree Requirements for the BSHA
- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 48 upper division credits
  - A minimum of 54 credits of the 120 must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- Students must satisfy all required courses of study and general education requirements. Any remaining credits may be satisfied by elective coursework.
- Students will declare a concentration at the time of enrollment.
Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:

Bachelor of Science in Health Administration

**General Education Requirements for the BSHA**

All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement.

- Communication Arts Requirement(s): 6 credits
- Mathematics Requirement(s): 6 credits
- Science & Technology Requirement(s): 6 credits
  *Must include at least 3 credits in the physical or biological sciences*
- Humanities Requirement(s): 6 credits
- Social Science Requirement(s): 6 credits
- Additional Liberal Arts Requirement(s): 6 credits
- Interdisciplinary Requirement(s): 18 credits
  *Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.*

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**General Education Requirements for the BSHA for Arkansas Students**

All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement.

- Communication Arts Requirement(s): 6 credits
- Mathematics Requirement(s): 6 credits
  *Must include MTH 220*
- Science & Technology Requirement(s): 9 credits
  *Must include a minimum of 6 credits in lab science or equivalent transfer coursework with a lab component*
- Humanities Requirement(s): 9 credits
- Social Science Requirement(s): 9 credits
  *Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content*
- Additional Liberal Arts Requirement(s): 6 credits
- Interdisciplinary Requirement(s): 9 credits
  *Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.*

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Academic Progression Requirements for the BSHA**

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite.

**Additional Residency Requirements and Course Waivers for the BSHA**

Students in this program may waive a maximum of eighteen (18) upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework (national testing program credit, prior learning credit, and military credit may not be used to waive with or without credit coursework in the required course of study).

Students may also waive nine (9) lower division credits from the required course of study.

The following courses in the required course of study may not be waived: GEN 200, HCS 449

**Bachelor of Science in Health Administration**

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**Health Care Vocabulary**

This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems. In addition, students will also explore terminology related to body systems and common diseases and treatments associated with these systems.

**Health Care Delivery in the United States**

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

**Introduction to Health and Disease**

This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

**Health Care Communication Strategies**

This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss
the influences of gender and culture, examine channels of communication including the development of interpersonal and technology related communication, and the impact of consumer and interdisciplinary communication.

HCS 325 .................................................................................... 3 credits

Health Care Management
The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

HCS 335 .................................................................................... 3 credits

Health Care Ethics and Social Responsibility
This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

HCS 341 .................................................................................... 3 credits

Human Resources in Health Care
This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.

HCS 483 .................................................................................... 3 credits

Health Care Information Systems
The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.

HCS 490 .................................................................................... 3 credits

Health Care Consumer - Trends and Marketing
In this course students will have the opportunity to examine the traits, trends and needs of today’s health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.

HCS 405 .................................................................................... 3 credits

Health Care Financial Accounting
This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting, and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

HCS 440 .................................................................................... 3 credits

Economics: The Financing of Health Care
This course provides an overview of the economics of health care. The various payers are examined, including private, state, and federal entities. Issues such as the cost effectiveness of prevention, the management of patients and their diseases, as well as the cost of treatment settings are discussed. Third-party reimbursement from various sources, ranging from for-profit insurance carriers to charitable donations, are reviewed. The health care system’s use of grant funding and research dollars is described.

HCS 465 .................................................................................... 3 credits

Health Care Research Utilization
This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements of evidence based research within health care.

HCS 451 .................................................................................... 3 credits

Health Care Quality Management and Outcomes Analysis
This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and the role of the governing body of the health care organization in ensuring compliance with the standards of regulatory and accreditation organizations. Methods for assuring quality in process and outcome management are described, as well as the significance and statistical application of measuring outcomes. Various health care customer and patient expectations are identified. Changing trends in the provision and reimbursement of health care services are reviewed.

COMM 215 .............................................................................. 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

GEN 101 .................................................................................... 3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 .................................................................................... 3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the Uni-
versity library and learn how to access its resources successfully. MTH 220 3 credits

**College Algebra**

This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability. CHM 110 3 credits

**Introductory Chemistry**

This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory. PHY 101 3 credits

**Fundamentals of Physics**

This course is designed to introduce physics at an entry level by examining the principle laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton’s laws, properties of matter, heat and thermodynamics, electricity and magnetism, and waves. Students will apply these principles using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory. HIS 145 3 credits

**The American Experience Since 1945**

This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues. POL 215 3 credits

**State and Local Political Processes**

This course is designed to introduce students to state and local government structures and processes. Government and business relationships are particularly emphasized. Opportunities are provided for students to observe and interact with state and local government officials and groups and to debate public policy issues in a local or state government meeting setting. HCS 487 3 credits

**Course Descriptions for the Concentration in Health Management**

**HCS 437** Public and Community Health

This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location. HCS 430 3 credits

**Legal Issues in Health Care: Regulation and Compliance**

This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed. HCS 475 3 credits

**Leadership and Performance Development**

This course provides students with an overview of leadership theories to assist in the development of effective leadership skills. Students will discuss workplace change and the leader’s role in the change process as well as examining and analyzing effective performance indicators for staff and organizational goals. HCS 455 3 credits

**Healthcare Policy: The Past and the Future**

This course will introduce the student to the intricate processes that public policymakers use to influence the health status of a society. The role of economic theory, interest groups, and the various levels of government involved in policymaking will be examined. A historic review of trends will be evaluated, and the challenges of future health care delivery will be examined. HCS 446 3 credits

**Facility Planning**

This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss future health care consumer utilization trends, and as well as examine the regulatory compliance requirements. HCS 449 3 credits

**Health Administration Capstone**

Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

**Course Descriptions for the Concentration in Emergency Management**

**EMC 310** Principles of Emergency Management

This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges. EMC 330 3 credits

**Political and Policy issues for Emergency Management**

This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law affecting emergency operations will be studied.
Dimensions of Health and the Older Adult
Basic principles and concepts of the aging process; includes the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.
LTC 310 .............................................................. 3 credits

Social and Community Related Programs and Services
This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult to support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.
HCS 437 .............................................................. 3 credits

Long-term Care Administration
This course examines the organization and management of long-term care and assisted living facilities. The impacts of state and federal regulation are analyzed, as well as issues surrounding funding services are discussed. Students will examine the health services needed for current and future populations needing long term care.
LTC 315 .............................................................. 3 credits

EMC 340 .............................................................. 3 credits
Emergency Services and the Community
This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparedness that as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 .............................................................. 3 credits
Managing Emergency Response Operations
This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.

EMC 320 .............................................................. 3 credits
Emergency Preparedness and Planning
This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

HCS 449 .............................................................. 3 credits
Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Concentration in Health Information Systems
HCIS 410 .............................................................. 3 credits
Project Planning and Implementation in Health Care
This course provides the foundation for understanding the broad concepts of successful planning, organization, and implementation within the realm of healthcare information technology. This course uses real-world examples to support and expand a student’s skills in project management. Topics covered include project planning and scheduling, budgeting, tracking and controlling.

DBM 381 .............................................................. 3 credits
Database Concepts
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.

NCT 361 .............................................................. 3 credits
Network and Telecommunications Concepts
This course provides an overview of telecommunication systems in a business environment. Topics covered include voice communications, standards, transmission, networks, and internetworking.

BSA 376 .............................................................. 3 credits
Systems Analysis and Design
This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. The Systems Development Life Cycle will be fundamental to the course.
HCIS 420  Information Systems Risk Management in Health Care
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of health care information systems. This course will survey remedies and prevention techniques available to address risk and security management. Health care organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.

HCIS 449  Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

The Bachelor of Science in Health Administration (Certificate Track)

The following Bachelor of Science in Health Administration (Certificate Track) (BSHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Health Administration (BSHA) Program is designed to integrate a framework of general education courses with a health care curriculum that provides the graduate with the foundational knowledge needed to enter today’s challenging health industry. The BSHA curriculum focuses on the basic body of knowledge, understanding, and skills identified as relevant to an ever expanding and diverse health care arena.

Coursework includes content in some of the following areas: management, finance, legal and ethical parameters, human resources, and information systems. Upon completion of the core curriculum healthcare students have the opportunity to select a concentration that is designed to expand their professional opportunities.

For more information about their graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

BSHA Foundation Courses (Certificate Track)

GEN 200 (For A Track only) .................................................. 3 credits
Foundations for General Education and Professional Success
GEN 195 (For B Track only) .................................................. 3 credits

HCIS 465 ~ ................................................................................ 3 credits
Health Care Research Utilization
HCIS 451 ~ ................................................................................ 3 credits
Health Care Quality Management and Outcome Analysis

Concentration in Health Management (Certificate Track)

This concentration is designed to expand the students’ health care management focus. Courses will include content in leadership theory, the legal and regulatory aspects in health care, facility planning, community health as well as an introduction to health care policy.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-hm.

HCIS 457 ~ ................................................................................ 3 credits
Public and Community Health
HCIS 430 ~ ................................................................................ 3 credits
Legal Issues in Health Care: Regulation and Compliance
HCIS 475 ~ ................................................................................ 3 credits
Leadership and Performance Development
HCIS 455 ~ ................................................................................ 3 credits
Health Care Policy: The Past and the Future
HCIS 446 ~ ................................................................................ 3 credits
Facility Planning
HCIS 449 ~ ................................................................................ 3 credits
Health Administration Capstone
Concentration in Emergency Management (Certificate Track)
This concentration is designed for EMTs, First Responders, Firefighters, or any other emergency personnel that want to expand their knowledge and skills related to emergency management. Focus will be on principles of emergency management, managing emergency response operations, and planning and preparedness of emergency situations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-em.

EMC 310 ~ ................................................................. 3 credits
Principles of Emergency Management
EMC 330 ~ ................................................................. 3 credits
Political and Policy Issues for Emergency Management
EMC 340 ~ ................................................................. 3 credits
Emergency Services and the Community

LTC 328 ~ ................................................................. 3 credits
Legal Perspectives in Aging
HCS 449 ~ ................................................................. 3 credits
Health Administration Capstone

The University reserves the right to modify the required course of study as necessary.

General Information for the BSHA (Certificate Track)
The Certificate Track bachelors programs are designed to be an option for students to earn a certificate en-route to earning the bachelors degree. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration/ emphasis in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the bachelors program.

Additional Admission Requirements for the BSHA (Certificate Track)
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body; GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.
- Applicants to the Emergency Management concentration (BSHA/EMC) must be currently employed in or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

Degree Requirements for the BSHA (Certificate Track)

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 48 upper division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.
- Students may earn a certificate in the same area of focus as the concentration en route to completing the bachelor degree. Students may apply for certificate conferral upon meeting the following program requirements:
  - Successful completion of the concentration courses outlined in the enrollment agreement for the certificate
  - Achievement of the minimum program GPA
  - Fulfillment of the minimum University residency requirement
- Health Management Certificate (HM) - 18 credits: GEN 200, HCS 235 Choose four of the following: HCS 325, HCS 335, HCS 341, HCS 405, HCS 430, HCS 446, HCS 457, HCS 483
- Emergency Management Certificate (EMC) - 18 credits: EMC 310, EMC 320, EMC 330, EMC 340, EMC 350, GEN 200
- Long Term Care Certificate (LTC) - 18 credits: GEN 200, HCS 433, HCS 437, LTC 310, LTC 315, LTC 328
- Students can only earn one certificate en-route to completing the undergraduate program.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Bachelor of Science in Health Administration
Academic Progression Requirements for the BSHA (Certificate Track)

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite.

Additional Residency Requirements and Course Waivers for the BSHA

Students in this program may waive a maximum of eighteen (18) upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferrable coursework (national testing program credit, prior learning credit, and military credit may not be used to waive with or without credit coursework in the required course of study). Students may also waive nine (9) lower division credits from the required course of study.

The following courses in the Required Course of Study may not be waived: GEN 195, GEN 200, HCS 449

General Education Requirements for the BSHA (Certificate Track)

All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement:

Communication Arts Requirement(s): 6 credits  
A Track must include: COMM 215, equivalent or higher  
B Track must include: COM 170 and COM 172

Mathematics Requirement(s): 6 credits  
Must include: MTH 209 or higher

Science & Technology Requirement(s): 6 credits  
A Track must include: SCI 163

Must include at least 3 credits in the physical or biological sciences

Humanities Requirement(s): 6 credits  
B Track must include: HUM 114

Social Science Requirement(s): 6 credits  
B Track must include: PSY 211

Additional Liberal Arts Requirement(s): 6 credits

Interdisciplinary Requirement(s): 18 credits  
B Track must include: FP 120

Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement. Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Course Descriptions for the BSHA (Certificate Track)

GEN 200 ................................................................................... 3 credits  
Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 195 ................................................................................... 3 credits  
Foundations of University Studies

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

HCS 212 ................................................................................... 3 credits  
Health Care Vocabulary

This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems. In addition, students will also explore terminology related to body systems and common diseases and treatments associated with these systems.

HCS 235 ................................................................................... 3 credits  
Health Care Delivery in the United States

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 245 ................................................................................... 3 credits  
Introduction to Health and Disease

This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 320 ................................................................................... 3 credits  
Health Care Communication Strategies

This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss the influences of gender and culture, examine channels of communication including the development of interpersonal and technology related communication, and the impact of consumer and interdisciplinary communication.

HCS 325 ................................................................................... 3 credits  
Health Care Management

The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed
Health Care Ethics and Social Responsibility
This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

HCS 341 ....................................................................................3 credits

Human Resources in Health Care
This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.

HCS 483 ....................................................................................3 credits

Health Care Information Systems
The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.

HCS 490 ....................................................................................3 credits

Health Care Consumer - Trends and Marketing
In this course students will have the opportunity to examine the traits, trends and needs of today’s health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.

HCS 405 ....................................................................................3 credits

Health Care Financial Accounting
This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting, and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

HCS 440 ....................................................................................3 credits

Economics: The Financing of Health Care
This course provides an overview of the economics of health care. The various payers are examined, including private, state, and federal entities. Issues such as the cost effectiveness of prevention, the management of patients and their diseases, as well as the cost of treatment settings are discussed. Third-party reimbursement from various sources, ranging from for-profit insurance carriers to charitable donations, are reviewed. The health care system's use of grant funding and research dollars is described.

HCS 465 ....................................................................................3 credits

Health Care Research Utilization
This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements of evidence based research within health care.

HCS 451 ....................................................................................3 credits

Health Care Quality Management and Outcomes Analysis
This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and the role of the governing body of the health care organization in ensuring compliance with the standards of regulatory and accreditation organizations. Methods for assuring quality in process and outcomes management are described, as well as the significance and statistical application of measuring outcomes. Various health care customers are identified. Changing trends in the provision and reimbursement of health care services are reviewed.

HCS 490 ....................................................................................3 credits

Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.

GEN 300 ....................................................................................3 credits

Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University Library and learn how to access its resources successfully.

Course Descriptions for the Concentration in Health Management (Certificate Track)

HCS 457 ....................................................................................3 credits

Public and Community Health
This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic...
Facility Planning

This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss future health care consumer utilization trends, and as well as examine the regulatory compliance requirements.

HCS 449 ................................................................................... 3 credits

Health Administration Capstone

Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Concentration in Emergency Management (Certificate Track)

EMC 310 ................................................................................... 3 credits

Principles of Emergency Management

This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.

EMC 330 ................................................................................... 3 credits

Political and Policy issues for Emergency Management

This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

EMC 340 ................................................................................... 3 credits

Emergency Services and the Community

This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 ................................................................................... 3 credits

Managing Emergency Response Operations

This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.

EMC 320 ................................................................................... 3 credits

Emergency Preparedness and Planning

This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

HCS 449 ................................................................................... 3 credits

Health Administration Capstone

Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Concentration in Emergency Management (Certificate Track)

HCS 433 ................................................................................... 3 credits

Dimensions of Health and the Older Adult

Basic principles and concepts of the aging process; includes the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.

LTC 310 ................................................................................... 3 credits

Social and Community Related Programs and Services

This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult to support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.

HCS 437 ................................................................................... 3 credits

Long-term Care Administration

This course examines the organization and management of long-term care and assisted living facilities. The impacts of state and federal regulation are analyzed, as well as issues surrounding funding
services are discussed. Students will examine the health services needed for current and future populations needing long term care.

LTC 319 ........................................................................................................3 credits

**Alternative Living Environments**

This course focuses on the various formats of care and living environments for the older adult. The cultural and socioeconomic demographics of our current aging population provide different expectations and needs from previous generations. With the changing needs of this population and their families, students will focus on understanding the multidisciplinary continuum of factors to be considered when determining the living and care options available.

LTC 328 ........................................................................................................3 credits

**Legal Perspectives in Aging**

This course will look at the diverse legal issues related to today’s older adult. Topics will include age discrimination, advocacy and autonomy, elder and fraud abuse, major life transitions, and end of life decision making.

HCS 449 ........................................................................................................3 credits

**Health Administration Capstone**

Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

The following Bachelor of Science in Health Administration (Certificate Track) (Maryland-Online)

---------------------------------------------------------------

The Bachelor of Science in Health Administration (Certificate Track) (BSHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and emphases depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

---------------------------------------------------------------

The Bachelor of Science in Health Administration (BSHA) Program is designed to integrate a framework of general education courses with a health care curriculum that provides the graduate with the foundational knowledge needed to enter today’s challenging health industry. The BSHA curriculum focuses on the basic body of knowledge, understanding, and skills identified as relevant to an ever expanding and diverse health care arena. 

Coursework includes content in some of the following areas: management, finance, legal and ethical parameters, human resources, and information systems. Upon completion of the core curriculum healthcare students have the opportunity to select an emphasis that is designed to expand their professional opportunities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsha-hm.

The University reserves the right to modify the required course of study as necessary.  

**General Information for the BSHA (Certificate Track)**  
The Certificate Track bachelor's programs are designed to be an option for students to earn a certificate en-route to earning the bachelor's degree.  
Students who completed a certificate in its entirety and who later choose to enroll in a bachelor's program with an emphasis in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the bachelor's program.  

**Additional Admission Requirements for the BSHA (Certificate Track)**  
All applicants are expected to meet the following admissions requirements:  
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.  
- Applicants must be currently employed or have access to a work environment.  
- Applicants to the Emergency Management emphasis (BSHA/EMC) must be currently employed in or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.  

**Degree Requirements for the BSHA (Certificate Track)**  
- Completion of a minimum of 120 credits that include the following distribution:  
  - A minimum of 48 upper division credits.  
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.  
  - A minimum grade point average (GPA) of 2.0.  
- Students may earn a certificate in the same area of focus as the emphasis en route to completing the bachelor degree. Students may apply for certificate conferral upon successful completion of both the 18 credits required for the certificate and the certificate programmatic requirements outlined in the certificate program policy.  
- Students must successfully complete the following programmatic requirements for certificate conferral:  
  - Health Management Certificate (HM) - 18 credits: GEN 200, HCS 235 Choose four of the following: HCS 325, HCS 335, HCS 341, HCS 405, HCS 430, HCS 446, HCS 457, HCS 483  
  - Emergency Management Certificate (EMC) - 18 credits: EMC 310, EMC 320, EMC 330, EMC 340, EMC 350, GEN 200  
  - Long Term Care Certificate (LTC) - 18 credits: GEN 200, HCS 433, HCS 437, LTC 310, LTC 315, LTC 328  
- Students can only earn one certificate en-route to completing the undergraduate program.  
- Emphases are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Bachelor of Science in Health Administration.  

**Academic Progression Requirements for the BSHA (Certificate Track)**  
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.  
All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or Eng-
Additional Residency Requirements and Course Waivers for the BSHA

Students in this program may waive a maximum of eighteen (18) upper division credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework (national testing program credit, prior learning credit, and military credit may not be used to waive with or without credit coursework in the required course of study). Students may also waive nine (9) lower division credits from the required course of study.

The following courses in the Required Course of Study may not be waived: GEN 195, GEN 200, HCS 449

General Education Requirements for the BSHA (Certificate Track)

All students must complete a minimum of 54 credits in the following areas as a part of their minimum 120 credit degree requirement.

Communication Arts Requirement(s): 6 credits
A track must include: COMM 215, equivalent or higher
B Track must include: COM 170 and COM 172

Mathematics Requirement(s): 6 credits
Must include: MTH 209 or higher

Science & Technology Requirement(s): 6 credits
B Track must include: SCI 163
Must include at least 3 credits in the physical or biological sciences

Humanities Requirement(s): 6 credits
B Track must include: HUM 114

Social Science Requirement(s): 6 credits
B Track must include: PSY 211

Additional Liberal Arts Requirement(s): 6 credits

Interdisciplinary Requirement(s): 18 credits
B Track must include: FP 120

Any credit that is not being applied to the primary major as a waiver may be applied to the lower division electives/Interdisciplinary requirement.
Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Course Descriptions for the BSHA (Certificate Track)

GEN 200 ...................................................................................3 credits
Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

GEN 195 ...................................................................................3 credits
Foundations of University Studies

The essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at the University of Phoenix are introduced in this course. The course develops and applies practical knowledge and skills immediately relevant to first-year university students. Course topics include goal setting and working with personal motivation, understanding and using University resources, developing efficient study habits, making the most of personal learning styles, and how best to manage time and reduce personal stress levels.

HCS 212 ...................................................................................3 credits
Health Care Vocabulary

This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems. In addition, students will also explore terminology related to body systems and common diseases and treatments associated with these systems.

HCS 235 ...................................................................................3 credits
Health Care Delivery in the United States

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 245 ...................................................................................3 credits
Introduction to Health and Disease

This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 320 ...................................................................................3 credits
Health Care Communication Strategies

This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss the influences of gender and culture, examine channels of communication including the development of interpersonal and technology related communication, and the impact of consumer and interdisciplinary communication.

HCS 325 ...................................................................................3 credits
Health Care Management

The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.
HCS 335 ................................................................. 3 credits
Health Care Ethics and Social Responsibility
This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.
HCS 341 ................................................................. 3 credits
Human Resources in Health Care
This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.
HCS 483 ................................................................. 3 credits
Health Care Information Systems
The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.
HCS 490 ................................................................. 3 credits
Health Care Consumer - Trends and Marketing
In this course students will have the opportunity to examine the traits, trends and needs of today’s health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.
HCS 405 ................................................................. 3 credits
Health Care Financial Accounting
This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting, and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.
HCS 440 ................................................................. 3 credits
Economics: The Financing of Health Care
This course provides an overview of the economics of health care. The various payers are examined, including private, state, and federal entities. Issues such as the cost effectiveness of prevention, the management of patients and their diseases, as well as the cost of treatment settings are discussed. Third-party reimbursement from various sources, ranging from for-profit insurance carriers to charitable donations, are reviewed. The health care system’s use of grant funding and research dollars is described.
HCS 465 ................................................................. 3 credits
Health Care Research Utilization
This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements of evidence based research within health care.
HCS 451 ................................................................. 3 credits
Health Care Quality Management and Outcomes Analysis
This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and the role of the governing body of the health care organization in ensuring compliance with the standards of regulatory and accreditation organizations. Methods for assuring quality in process and outcome management are described, as well as the significance and statistical application of measuring outcomes. Various health care customers are identified. Changing trends in the provision and reimbursement of health care services are reviewed.
COMM 215 ........................................................... 3 credits
Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.
GEN 101 ............................................................... 3 credits
Skills for Lifelong Learning
This course is designed to provide core competencies for adult learners. The course examines learning theory and the application of adult learning principles to communication skills, group processes, and personal management. Adult learners will develop strategies for achieving University of Phoenix Learning Goals in school, work, and personal settings. They will also be introduced to the University Library and learn how to access resources successfully.
GEN 300 ............................................................... 3 credits
Skills for Professional Development
This course examines the skills necessary for successful critical thinking, teamwork, research, and communication. The course is designed to aid adult learners in acquiring and improving the core competencies that are necessary at the University of Phoenix. Students will examine their reasons for returning to school, and develop strategies for achieving educational goals in school, work, and personal settings. Students will also be introduced to the University library and learn how to access its resources successfully.
Course Descriptions for the Emphasis in Health Management (Certificate Track)
HCS 457 ................................................................. 3 credits
Public and Community Health
This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.
Legal Issues in Health Care: Regulation and Compliance
This course covers the broad range of topics affected by health law and regulation, ranging from patient rights to corporate responsibilities. Public and private health care regulatory agencies are examined as well their impact on the operation of health care as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

EMC 340 ................................................................. 3 credits
Emergency Services and the Community
This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

Leadership and Performance Development
This course provides students with an overview of leadership theories to assist in the development of effective leadership skills. Students will discuss workplace change and the leader’s role in the change process as well as examining and analyzing effective performance indicators for staff and organizational goals.

HCS 475 ................................................................. 3 credits
Health Administration Capstone
Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Course Descriptions for the Emphasis in Long Term Care (Certificate Track)

HCS 433 ................................................................. 3 credits
Dimensions of Health and the Older Adult
Basic principles and concepts of the aging process; includes the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.

LTC 310 ................................................................. 3 credits
Social and Community Related Programs and Services
This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult to support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.

HCS 437 ................................................................. 3 credits
Long-Term Care Administration
This course examines the organization and management of long-term care and assisted living facilities. The impacts of state and federal regulation are analyzed, as well as issues surrounding funding
services are discussed. Students will examine the health services needed for current and future populations needing long term care.

**Alternative Living Environments**

This course focuses on the various formats of care and living environments for the older adult. The cultural and socioeconomic demographics of our current aging population provide different expectations and needs from previous generations. With the changing needs of this population and their families, students will focus on understanding the multidisciplinary continuum of factors to be considered when determining the living and care options available.

**Legal Perspectives in Aging**

This course will look at the diverse legal issues related to today’s older adult. Topics will include age discrimination, advocacy and autonomy, elder and fraud abuse, major life transitions, and end of life decision making.

**Health Administration Capstone**

Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

**Bachelor of Science in Nursing**

The following Bachelor of Science in Nursing (BSN) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Nursing (BSN), accredited by the Commission on Collegiate Nursing Education (CCNE)*, is a program designed to develop the professional knowledge and skills of registered nurses. The curriculum builds on a foundation of biological, physical, and social sciences, which contribute to the science of nursing. The liberal arts components enhance the development of the intellectual, social, and cultural aspects of the professional nurse. This baccalaureate program includes behavioral objectives that concentrate on the development of the nurse’s role as caregiver, teacher, and leader. Utilizing human caring as a framework, registered nurses are prepared as generalists who are able to apply critical thinking, progressional skills, and knowledge to client outcomes and health care systems. The Bachelor of Science in Nursing degree program has a 41-credit required course of study and a 6-credit elective requirement. The required course of study includes a capstone course that synthesizes baccalaureate outcomes. The required course of study fulfills only part of the 120-minimum-credit requirement for degree completion. * For more information about accreditation, please contact CCNE at One Dupont Circle NW, Suite 530, Washington, DC 20036; (202)887-6791.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsn.

**Required Course of Study for the BSN**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Undergraduate Nursing Studies**

HCS 301 .................................................................................. 2 credits
NUR 391 ~ ............................................................................... 3 credits
Professional Nursing Practice
HCS 350 ~ ............................................................................... 3 credits
Health Care Communication
NUR 403 ~ ............................................................................... 3 credits
Theories and Models of Nursing Practice
NUR 427 ~ ............................................................................... 3 credits
Health and Chronic Disease Management
NUR 440 ~ ............................................................................... 3 credits
Health Assessment and Promotion for Vulnerable Population
HCS 438 ~ ............................................................................... 3 credits
Statistical Applications
NUR 443 ~ ............................................................................... 3 credits
Evidence-Based Nursing Research and Practice
NUR 405 ~ ............................................................................... 4 credits
Health Communities: Theory and Practice (50 Clinical hours)
NUR 408 ~ ............................................................................... 4 credits
Epidemiology: Global and Public Health (50 Clinical hours)
HCS 478 ~ ............................................................................... 3 credits
Health Law and Ethics
HCS 482 ~ ............................................................................... 3 credits
Health Care Informatics
NUR 492 ~ ............................................................................... 4 credits
Senior Practicum: Leadership and Management
The University reserves the right to modify the required course of study. All grades of “F” or grades not meeting minimum specific course grade requirements must be repeated.

**Additional Admission Requirements for the BSN**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Current employment is not a requirement for admission.
• Applicants must reside in the United States or in one of the US Territories with documentation of a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  • Guam
  • American Samoa
  • Northern Mariana Islands
  • US Virgin Islands
• Non-military students who enroll in this program while living in the US and then move outside of the U.S. and its territories must change to the International version of the degree -BSN-I. Students must sign a new Enrollment Agreement for the international version of the degree. Students must: 1) notify their campus representative within thirty (30) days of their moving outside the country; 2) update their profile to reflect the new international address; and 3) have a nursing license to practice nursing in the country where they are residing for the BSN practicum or contact an Online College representative.
• Completion of a nursing diploma earned from a recognized school of nursing in the United States; associate degree (any emphasis) earned in the United States from an approved regionally or nationally accredited institution; an associate degree in nursing or post-secondary diploma in nursing or foreign equivalent earned at a recognized foreign institution; degree in nursing or post-secondary diploma in nursing or foreign equivalent earned at a recognized foreign institution; California 30 credit option or California BSN approved program.
• Signed Criminal Background Check Disclosure
• Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
• Signed FERPA Release/Drug Test or Failure to Test Results

Degree Requirements for the BSN
• Completion of a minimum of 120 credits that include the following:
  • A minimum of 47 upper division credits.
  • A maximum of 73 lower division credits
  • A minimum program grade point average (GPA) of 2.0.
  • All students must complete the minimum number of credits required by their degree program.
• University of Phoenix offers assessment of prior learning as an option by which students can earn assessed credits toward degree completion requirements. Registered nurses, enrolled in the BSN program, whose nursing education was completed at a non-US institution, or a non-accredited institution, may be evaluated for transferable non-nursing credits for degree completion.
• The diploma awarded for this program will read as: Bachelor of Science in Nursing

Additional Academic Progression Requirements for the BSN
• All students enrolling in the BSN program will take HCS 301 as their first course.
• Students may take courses required for the Bachelor of Science in Nursing degree in any sequence as long as the prerequisite(s) for each course has been satisfactorily completed.
• Students whose RN license becomes restricted, encumbered or revoked while enrolled in the program, may not enroll in any further courses.
• All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite. Math and English prerequisites may be found in the Undergraduate Programs section of this catalog.
• A clinical course may not be taken concurrently with any other course.
• Students must hold a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program.

Minimum Grade Requirements for the BSN
Students in the Bachelor of Science in Nursing are required to achieve a minimum grade of “C” (2.0) in specific nursing and clinical courses. Students who fail to receive a minimum grade of “C” in any of the specified courses will be scholastically disqualified from the University. (“C-” is not acceptable). These courses include: NUR 391, NUR 403, NUR 405, NUR 408, NUR 420, NUR 440, NUR 443, NUR 492
Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.
Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific nursing courses listed above only one time. If the student does not receive a “C” or better on the second attempt, the student will be scholastically suspended, permanently withdrawn, from the Bachelor of Science in Nursing program.

Residency Requirements and Course Waivers for the BSN
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 29 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
Students in this program may waive a maximum of 12 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to waive a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study.
Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following required courses may not be waived: NUR 391, NUR 492

**General Education Requirements for the BSN**

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts, 6 credits
- Mathematics, 6 credits
- Natural/Physical Sciences, 12 credits
- Humanities, 6 credits
- Social Science, 6 credits
- Interdisciplinary Requirements, 18 credits

*Any earned credit may be applied to the Interdisciplinary Component, with the exception of the following: credits applied to course(s) in the Required Course of Study as a waiver, equivalent course(s) to the BSN Required Course of Study and credits that apply to other areas of general education or the nursing Required Course of Study.*

**Credits that will apply:** 5 (of the 30) additional Nursing transfer credits of licensure

**Physical Education activity credits are limited to four (4) credits.**

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**General Education Requirements for the BSN for Arkansas Students**

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

- Communication Arts, 6 credits
- Mathematics, 6 credits
- Must include MTH 220
- Natural/Physical Sciences, 12 credits
- (Must include NSCI 280 and NSCI 281)
- Humanities, 6 credits
- Social Science, 9 credits
- (Must include HIS 145 or POL 215 or equivalent transfer coursework with US History or Government content)
- Interdisciplinary Requirements, 12 credits

*Any earned credit may be applied to the Interdisciplinary Component, with the exception of the following: credits applied to course(s) in the Required Course of Study as a waiver, equivalent course(s) to the BSN*

**Required Course of Study and credits that apply to other areas of general education or the nursing Required Course of Study.**

**Credits that will apply:** 5 (of the 30) additional Nursing transfer credits of licensure

**Undergraduate Nursing Studies**

The course is designed to aid adult learners in acquiring or improving critical thinking, teamwork, research, and communication skills, which are necessary at the University of Phoenix. Students will develop strategies for achieving educational goals that will help them be successful in the undergraduate program as well as in their professional development. Students will also be introduced to the University library and the Center for Writing Excellence and learn how to access those resources successfully.

**Course Descriptions for the BSN**

**HCS 301**

**Undergraduate Nursing Studies**

This course will focus on professional role and discipline of nursing. Students will examine the image of nursing and develop strategies for improvement. Standards of professional practice will be discussed in relation to the profession, role, and value behavior.

**NUR 391**

**Professional Nursing Practice**

This course focuses on the professional role and discipline of nursing. Students will examine the image of nursing and develop strategies for improvement. Standards of professional practice will be discussed in relation to the profession, role, and value behavior.

**HCS 350**

**Health Care Communication**

This course will focus on professional communication related to the role of the registered nurse. This course is designed to explore the knowledge and skills required to communicate therapeutically with clients and communicate effectively with other professionals of a health care team. The art of delegation will be examined.

**NUR 403**

**Theories and Models of Nursing Practice**

This course is designed to focus baccalaureate students on the behaviors, attitudes, and values necessary for theory-based professional nursing practice. Concepts of professional nursing are presented within the unifying framework of Jean Watson’s Theory of Human Caring.
NUR 427....................................................................................3 credits

Health and Chronic Disease Management
This course focuses on pathophysiology, principles of motivation, learning theories, and their application to disease processes. A review of diseases from a systems approach will be stressed along with discussions regarding the impact of diversity, delivery of patient education, complementary and alternative therapies, and community resources.

NUR 440 .................................................................3 credits

Health Assessment and Promotion for Vulnerable Population
This course is designed to assist professional nurses in developing interviewing skills, refinement of physical assessment techniques, and preventative health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in performing a health assessment is emphasized.

HCS 438 .................................................................3 credits

Statistical Applications
The emphasis in this statistical application’s course is on thinking about research issues in a statistically sound and practical fashion. Students will learn how to formulate and ask the right questions, how to collect data effectively, how to summarize and interpret information, and how to understand the limitations of statistical inferences.

NUR 443 .................................................................3 credits

Evidence-Based Nursing Research and Practice
This course will focus on current review of nursing research literature and research utilization through evidence-based practice. Three areas of research competencies will be examined which include interpreting and using research in nursing practice, evaluating research, and conducting research.

NUR 405 .................................................................4 credits

Health Communities: Theory and Practice
This course will examine the role of nursing in community health and create conditions that promote healthy living. Theories of community health and nursing practice will be explored through concepts of health promotion, tertiary, primary, and preventative care of individuals, families, and communities. Students will complete 50 clinical hours.

NUR 408 .................................................................4 credits

Epidemiology: Global and Public Health
Epidemiology provides the basis for significant public and global health decisions. This course will explore key issues related to public and global health relevant to professional nursing practice. Through the use of epidemiology methods, students will track the natural history of a disease and identify its frequency, distribution, and cause. This course contains 50 hours of clinical experience.

HCS 478 .................................................................3 credits

Health Law and Ethics
The legal and ethical aspects of the nurse’s role in the delivery and management of health care are examined in this course. This course will introduce ethical responsibilities and decision making models related to various health care situations while exploring legal accountability to the individual, client, and health care providers.

NUR 492 .................................................................4 credits

Senior Practicum: Leadership and Management
This course will provide the student the opportunity to synthesize previous knowledge and skills in a supervised practicum experience with the guidance and approval of the faculty. The final project will integrate the academic and practical knowledge the students have acquired in their program. This course contains 25 hours of clinical experience.

MTH 220 .................................................................3 credits

College Algebra
This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, series, and probability.

NSCI 281 .................................................................4 credits

Anatomy and Physiology I
Anatomy and Physiology I is the first of a two-course sequence examining the terminology, structure, function, and interdependence of the human body systems. This course includes a study of the cells, chemistry, tissues, integumentary, skeletal, muscular, nervous, and endocrine systems. In conjunction with classroom instruction, the anatomy and physiology online lab component for this course requires students to apply knowledge from the classroom to online experiments and critical thinking application exercises.

NSCI 281 .................................................................4 credits

Anatomy and Physiology II
Anatomy and Physiology II is the second in a two course sequence examining the terminology, structure, function, and interdependence of systems within the human body. This course includes a study of circulatory, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. Discussion includes the application of nutrition, fluid, electrolyte and acid base balance, and genetics as applicable to the weekly course content. In conjunction with the classroom instruction, the anatomy and physiology online lab component for this course requires students to apply knowledge learned regarding the systems through online experiments and critical thinking application exercises.

HIS 145 .................................................................3 credits

The American Experience Since 1945
This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today’s ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the U.S. by applying an historical perspective to analyze contemporary issues.
The Bachelor of Science in Nursing (BSN), accredited by the Commission of Collegiate Nursing Education (CCNE), is a program designed to develop the professional knowledge and skills of registered nurses. The curriculum builds on a foundation of biological, physical, and social sciences, which contribute to the science of nursing. The liberal arts components enhance the development of the intellectual, social, and cultural aspects of the professional nurse. This baccalaureate program includes behavioral objectives that concentrate on the development of the nurse’s role as caregiver, teacher, and leader. Utilizing human caring as a framework, registered nurses are prepared as generalists who are able to apply critical thinking, progressional skills, and knowledge to client outcomes and health care systems. Registration in the partnership program is limited to students who are following the program of study as outlined by the community college partnership(s): Gateway Community College.

For more information about accreditation, please contact CCNE at One Dupont Circle NW, Suite 530, Washington, DC 20036; (202)887-6791.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsn.

**Required Course of Study for the BSN**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

- **HSN 302** ~ Undergraduate Nursing Studies 3 credits
- **NSG 391** ~ Professional Nursing Practice 3 credits
- **Upper Division Humanities Elective** ~ 3 credits
- **NUR 440CC** ~ Health Assessment and Promotion for Vulnerable Populations 3 credits
- **HSN 251** ~ Critical Thinking 3 credits
- **Upper Division Elective** ~ 3 credits
- **NUR 443CC** ~ Evidence-Based Nursing Research and Practice 3 credits
- **NUR 405CC** ~ Healthy Communities: Theory and Practice 4 credits
- **NUR 408CC** ~ Epidemiology: Global and Public Health 4 credits
- **NUR 492CC** ~ Senior Practicum: Leadership and Management 4 credits

The following courses will be waived with coursework from the partner institution:

- **HCS 350** ~ Health Care Communication 3 credits
- **HCS 438** ~ Statistical Applications 3 credits
- **HCS 478** ~ Health Law and Ethics 3 credits
- **HCS 482** ~ Health Care Informatics 3 credits
- **NUR 427** ~ Theories and Models of Nursing Practice 3 credits
- **NUR 403** ~ Health and Chronic Disease Management 3 credits

For more information, please contact your enrollment advisor for more information.

The following Bachelor of Science in Nursing Partner (BSN) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The University reserves the right to modify the required course of study. All grades of “F” or grades not meeting minimum specific course grade requirements must be repeated.

**Additional Admission Requirements for the BSN**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Current employment is not a requirement for admission.
- Signed Program Eligibility Form from Partner Institution indicating student has completed an appropriate Associate program for transfer and is eligible to take the NCLEX-RN exam.
- Completion of an associate degree in nursing from an approved RN-BSN transfer partner institution.
- Signed Criminal Background Check Disclosure
- Signed Acknowledgment of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results
- Students must complete HSN 302, NSG 391 and NUR 440CC prior to admission with a C or better.

**Degree Requirements for the BSN**

- Completion of a minimum of 120 credits that include the following:
  - A minimum of 30 upper division credits.
  - A maximum of 90 lower division credits.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum program grade point average (GPA) of 2.0.
- The diploma awarded for this program will read as: Bachelor of Science in Nursing

**Additional Academic Progression Requirements for the BSN**

- All students enrolling in the BSN Partner program will take NUR 443CC as their first course.
• Students may take courses required for the Bachelor of Science in Nursing degree in any sequence as long as the prerequisite(s) for each course has been satisfactorily completed.
• Students whose RN license becomes restricted, encumbered or revoked while enrolled in the program may not enroll in any further program courses.
• All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite. Math and English prerequisites may be found in the Undergraduate Programs section of this catalog.
• A clinical course may not be taken concurrently with any other course.
• Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a "for-cause" 10 panel, plus alcohol drug test.

Candidacy Status for the BSN
The College of Health Sciences and Nursing has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• All Level 2 Candidate Status requirements must be completed and posted to the student’s academic record prior to starting NUR 405CC. Review for Level 2 Candidacy will be based on the following items:
  • Documentation of a valid, unrestricted, unencumbered RN license.
  • Completion of all general education credits.

Minimum Grade Requirements for the BSN
Students in the Bachelor of Science in Nursing are required to achieve a minimum grade of “C” (2.0) in specific nursing and clinical courses. Students who fail to receive a minimum grade of “C” in any of the specified courses will be scholastically disqualified from the University. (“C-” is not acceptable). These courses include: HSN 302, NSG 391, NUR 405CC, NUR 408CC, NUR 440CC, NUR 443CC, and NUR 492CC.

Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean. Students may repeat the above courses only one time. If the student does not receive a "C" or better on the second attempt, the student will be scholastically suspended, permanently withdrawn, from the Bachelor of Science in Nursing program.

Residency Requirements and Course Waivers for the BSN
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 18 credits from their required course of study using their associates degree in nursing from an approved partner institution. The following courses will be waived with coursework from the partner institution: HCS 350, NUR 403, NUR 427, HCS 438, HCS 478, and HCS 482. Students in this program are not eligible to waive any additional courses from the required course of study.

The following courses in the Required Course of Study may not be waived or satisfied with transfer coursework: HSN 251, HSN 302, NSG 391, NUR 405CC, NUR 408CC, NUR 440CC, NUR 443CC, NUR 492CC, Upper Division Elective, and Upper Division Humanities.

General Education Requirements for the BSN
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Must include COMM 215, equivalent or higher.
Mathematics, 6 credits
Must include MTH 209, equivalent or higher.
Natural/Physical Sciences, 12 credits
Humanities, 6 credits
Social Science, 6 credits
Interdisciplinary Requirements, 18 credits
Any earned credit may be applied to the Interdisciplinary Component, with the exception of the following: credits applied to course(s) in the Required Course of Study as a waiver, equivalent course(s) to the BSN Required Course of Study and credits that apply to other areas of general education or the nursing Required Course of Study.

Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Course Descriptions for the BSN
HSN 302 .............................................................................2 credits
Undergraduate Nursing Studies
This course is designed to aid learners in critical thinking, teamwork, basic research, and oral and written communication skills. Students will develop strategies for achieving educational goals in the undergraduate nursing program as well as in professional development. Students will be introduced to University of Phoenix resources, including the Online Learning System, Centers for Math and Writing Excellence, and University Library. This course will include an orientation to the partnering educational institution.
NSG 391 .................................................................3 credits
Professional Nursing Practice
This course focuses on the professional role and discipline of nursing. Students will examine the image of nursing and develop strategies for improvement. Standards of professional practice will be discussed in relation to the profession, role, and value behavior.
NUR 440CC ..........................................................3 credits
Health Assessment and Promotion for Vulnerable Populations
This course is designed to assist professional nurses in developing interviewing skills, refinement of a health assessment, and preventative health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in
performing a health assessment is emphasized.

HSN 251 ................................................................................................. 3 credits

Critical Thinking
This five-week course in critical thinking and informal logic helps students develop the ability to reason clearly and critically. It includes an introduction to the disciplines of inductive and deductive logic, fallacious reasoning, and problem-solving techniques. Emphasis is placed on the identification and management of the perception process, use of assumptions, emotional influences, and language in various forms of business communication.

NUR 443CC ........................................................................................... 3 credits

Evidence-Based Nursing Research and Practice
This course will focus on current review of nursing research literature and research utilization through evidence-based practice. Three areas of research competencies will be examined which include interpreting and using research in nursing practice, evaluating research, and conducting research.

NUR 405CC ........................................................................................... 4 credits

Health Communities: Theory and Practice
This course will examine the role of nursing in community health and create conditions that promote healthy living. Theories of community health and nursing practice will be explored through concepts of health promotion, tertiary, primary, and preventative care of individuals, families, and communities. Students will complete 50 hours of clinical experience.

NUR 408CC ........................................................................................... 4 credits

Epidemiology: Global and Public Health
Epidemiology provides the basis for significant public and global health decisions. This course will explore key issues related to public and global health relevant to professional nursing practice. Through the use of epidemiology methods, students will track the natural history of a disease and identify its frequency, distribution, and cause. This course contains 50 hours of clinical experience.

NUR 492CC ........................................................................................... 4 credits

Senior Practicum: Leadership and Management
This course will provide the student the opportunity to synthesize previous knowledge and skills in a supervised practicum experience with the guidance and approval of the faculty. The final project will integrate the academic and practical knowledge the students have acquired in their program. This course contains 25 hours of clinical experience.

HCS 350 ................................................................................................. 3 credits

Health Care Communication
This course will focus on professional communication related to the role of the registered nurse. This course is designed to explore the knowledge and skills required to communicate therapeutically with clients and communicate effectively with other professionals of a health care team. The art of delegation will be examined.

HCS 438 ................................................................................................. 3 credits

Statistical Applications
The emphasis in this statistical application’s course is on thinking about research issues in a statistically sound and practical fashion. Students will learn how to formulate and ask the right questions, how to collect data effectively, how to summarize and interpret information, and how to understand the limitations of statistical inferences.

HCS 478 ................................................................................................. 3 credits

Health Law and Ethics
The legal and ethical aspects of the nurse’s role in the delivery and management of health care are examined in this course. This course will introduce ethical responsibilities and decision making models related to various health care situations while exploring legal accountability to the individual, client, and health care providers.

HCS 482 ................................................................................................. 3 credits

Health Care Informatics
This course is designed to examine computer and electronic modalities that assist patient and client management. The automation of data management through information systems, expert systems, and telecommunication will be examined in the context of health care informatics. The use of technology to help make decisions and to improve the health status of the individual, family, and community will be emphasized.

NUR 403 ................................................................................................. 3 credits

Theories and Models of Nursing Practice
This course is designed to focus baccalaureate students on the behaviors, attitudes, and values necessary for theory-based professional nursing practice. Concepts of professional nursing are presented within the unifying framework of Jean Watson’s Theory of Human Caring.

NUR 427 ................................................................................................. 3 credits

Health and Chronic Disease Management
This course focuses on pathophysiology, principles of motivation, learning theories, and their application to disease processes. A review of diseases from a systems approach will be stressed along with discussions regarding the impact of diversity, delivery of patient education, complementary and alternative therapies, and community resources.

Bachelor of Science in Nursing Partner (California)

The following Bachelor of Science in Nursing Partner (BSN) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state.

Please contact your enrollment advisor for more information.

The Bachelor of Science in Nursing (BSN), accredited by the Commission of Collegiate Nursing Education (CCNE), is a program designed to develop the professional knowledge and skills of registered nurses. The curriculum builds on a foundation of biological, physical, and social sciences, which contribute to the science of nursing. The liberal arts components enhance the development of the intellectual, social, and cultural aspects of the professional nurse. This baccalaureate program includes behavioral objectives that concentrate on the development of the nurse’s role as caregiver, teacher, and leader. Utilizing human caring as a framework, registered nurses are prepared as generalists who are able to apply critical thinking, progressional skills, and knowledge to client outcomes and health care systems.

* For more information about accreditation, please contact CCNE at One
University of Phoenix, 2014-2015

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSN

All applicants are expected to meet the following admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Current employment is not a requirement for admission.

- Signed Program Eligibility Form from Partner Institution indicating student has completed an appropriate Associate program for transfer and is eligible to take the NCLEX-RN exam.
- Completion of an associate degree in nursing from an approved RN-BSN transfer partner institution.
- Signed Criminal Background Check Disclosure
- Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results
- Students must complete HSN 302, NSG 391 and NUR 440CC prior to admission with a C or better.

Candidacy Status for the BSN

The College of Nursing has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidacy Status Level 1.

All Level 2 Candidate Status requirements must be completed and posted to the student's academic record prior to starting NUR/405CC. Review for Level 2 Candidacy will be based on the following items:

- Documentation of a valid, unrestricted, unencumbered RN license.
- Completion of all general education credits.

Degree Requirements for the BSN

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 30 upper division credits.
  - A maximum of 90 lower division credits.
  - A minimum of 48 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.0.

- The diploma awarded for this program will read as: Bachelor of Science in Nursing.

Additional Academic Progression Requirements for the BSN

- All students enrolling in the BSN Partner program will take NUR 443CC as their first course.
- Students may take courses required for the Bachelor of Science in Nursing degree in any sequence as long as the prerequisite(s) for each course has been satisfactorily completed.
- Students whose RN license becomes restricted, encumbered or revoked while enrolled in the program may not enroll in any further program courses.
- A clinical course may not be taken concurrently with any other course.
- Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.
Minimum Grade Requirements for the BSN

- Students in the Bachelor of Science in Nursing are required to achieve a minimum grade of "C" (2.0) in specific nursing and clinical courses. A "C-" grade is not acceptable. Students who fail to receive a minimum grade of "C" in any of the following courses will be scholastically disqualified from the University. These courses include: HSN 302, NSG 391, NUR 405CC, NUR 408CC, NUR 440CC, NUR 443CC, NUR 492CC.

- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean. Students may repeat the above courses only one time. If the student does not receive a "C" or better on the second attempt, the student will be scholastically suspended, permanently withdrawn, from the Bachelor of Science in Nursing program.

Residency Requirements and Course Waivers for the BSN

- Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

- Students in this program may waive a maximum of 18 credits from their required course of study using their associates degree in nursing from an approved partner institution. The following courses will be waived with coursework from the partner institution: HCS 350, NUR 403, NUR 427, HCS 438, HCS 478, and HCS 482. Students in this program are not eligible to waive any additional courses from the required course of study.

- The following courses in the Required Course of Study may not be waived or satisfied with transfer coursework: HSN 302, NSG 391, NUR 405CC, NUR 408CC, NUR 440CC, NUR 443CC, NUR 492CC. Upper Division Non-Nursing Elective.

General Education Requirements for the BSN

A minimum of 48 of the 120 credits must be in the general education areas approved by the University.

Communication Arts, 6 credits
Must include COMM 215, equivalent or higher.
Must include an oral communication course and a written communication course.

Mathematics, 6 credits
Must include MTH 209, equivalent or higher
Must include a statistics course

Natural/Physical Sciences, 12 credits
Humanities, 6 credits
Social Science, 6 credits
Must include an introduction to psychology and an introduction to sociology course

Additional Liberal Arts, 3 credits
Interdisciplinary Requirements, 9 credits
Any earned credit may be applied to the Interdisciplinary Component, with the exception of the following: credits applied to course(s) in the Required Course of Study as a waiver, equivalent course(s) to the BSN Required Course of Study and credits that apply to other areas of general education or the nursing Required Course of Study.

Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Course Descriptions for the BSN

HSN 302................................................................................... 3 credits

Undergraduate Nursing Studies

This course is designed to aid learners in critical thinking, team-work, basic research, and oral and written communication skills. Students will develop strategies for achieving educational goals in the undergraduate nursing program as well as in professional development. Students will be introduced to University of Phoenix resources, including the Online Learning System, Centers for Math and Writing Excellence, and University Library. This course will include an orientation to the partnering educational institution.

NSG 391 .................................................................................. 3 credits

Professional Nursing Practice

This course focuses on the professional role and discipline of nursing. Students will examine the image of nursing and develop strategies for improvement. Standards of professional practice will be discussed in relation to the profession, role, and value behavior.

NUR 440CC ............................................................................. 3 credits

Health Assessment and Promotion for Vulnerable Populations

This course is designed to assist professional nurses in developing interviewing skills, refinement of a health assessment, and preventive health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in performing a health assessment is emphasized.

NUR 443CC ............................................................................. 3 credits

Evidence-Based Nursing Research and Practice

This course will focus on current review of nursing research literature and research utilization through evidence-based practice. Three areas of research competencies will be examined which include interpreting and using research in nursing practice, evaluating research, and conducting research.

NUR 405CC ............................................................................. 4 credits

Health Communities: Theory and Practice

This course will examine the role of nursing in community health and create conditions that promote healthy living. Theories of community health and nursing practice will be explored through concepts of health promotion and preventative care of individuals, families, and communities. Students will complete 50 clinical hours.

NUR 408CC ............................................................................. 4 credits

Epidemiology: Global and Public Health

Epidemiology provides the basis for significant public and global health decisions. This course will explore key issues related to public and global health relevant to professional nursing practice.

Through the use of epidemiology methods, students will track the natural history of a disease and identify its frequency, distribution, and cause. This course contains 50 hours of clinical experience.
NUR 492CC ................................................................. 4 credits

Senior Practicum: Leadership and Management
This course will provide the student the opportunity to synthesize previous knowledge and skills in a supervised practicum experience with the guidance and approval of the faculty. The final project will integrate the academic and practical knowledge the students have acquired in their program. This course contains 25 hours of clinical experience.

HCS 350 ................................................................................... 3 credits

Health Care Communication
This course will focus on professional communication related to the role of the registered nurse. This course is designed to explore the knowledge and skills required to communicate therapeutically with clients and communicate effectively with other professionals of a health care team. The art of delegation will be examined.

HCS 438 ................................................................................... 3 credits

Statistical Applications
The emphasis in this statistical applications course is on thinking about research issues in a statistically sound and practical fashion. Students will learn how to formulate and ask the right questions, how to collect data effectively, how to summarize and interpret information, and how to understand the limitations of statistical inferences.

HCS 478 ................................................................................... 3 credits

Health Law and Ethics
The legal and ethical aspects of the nurse’s role in the delivery and management of health care are examined in this course. This course will introduce ethical responsibilities and decision making models related to various health care situations while exploring legal accountability to the individual, clinical, and health care providers.

HCS 482 ................................................................................... 3 credits

Health Care Informatics
This course is designed to examine computer and electronic modalities that assist patient and client management. The automation of data management through information systems, expert systems, and telecommunications will be examined in the context of health care informatics. The use of technology to help make decisions and to improve the health status of the individual, family, and community will be emphasized.

NUR 403 ................................................................................... 3 credits

Theories and Models of Nursing Practice
This course is designed to focus baccalaureate students on the behaviors, attitudes, and values necessary for theory-based professional nursing practice. Concepts of professional nursing are presented within the unifying framework of Jean Watson’s Theory of Human Caring.

NUR 427 ................................................................................... 3 credits

Health and Chronic Disease Management
This course focuses on pathophysiology, principles of motivation, learning theories, and their application to disease processes. A review of diseases from a systems approach will be stressed along with discussions regarding the impact of diversity, delivery of patient education, complementary and alternative therapies, and community resources.

COMM 215 ................................................................................... 3 credits

Essentials of College Writing
This course covers the essential writing skills required for college-level coursework. Students will learn to distinguish between interpretive and analytical writing while using the writing process and specific rhetorical strategies to develop position and persuasion essays and a case study analysis, and learning teams will prepare an applied research paper. The course offers exercises for review of the elements of grammar, mechanics, style, citation, and proper documentation.

MTH 209 ................................................................................... 3 credits

College Mathematics II
This course continues the demonstration and examination of various basic algebra concepts that was begun in MTH 208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course. Specific applications to disciplines such as statistics, accounting, finance, and economics are demonstrated and discussed. A variety of other applications, such as geometry, personal finance, science, and engineering, are also demonstrated and discussed.

Bachelor of Science in Nursing/International

The following Bachelor of Science in Nursing/International (BSN/I) program may be offered at these University of Phoenix campus locations:

Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The RN to BSN/International program is intended for Registered Nurses living outside the US and not considered US residents, and will not prepare nurses for licensure in the United States. The Bachelor of Science in Nursing is an accredited program designed to develop the professional knowledge and skills of working registered nurses. The curriculum is built upon a foundation of biological, physical, and social sciences, which contribute to the science of nursing. The liberal arts components enhance the development of the intellectual, social, and cultural aspects of the professional nurse. This instructional program includes behavioral objectives that concentrate on the development of the nurse’s role as caregiver, teacher, and manager of care. Utilizing a framework of caring, working registered nurses are prepared as generalists who are able to apply professional skills and knowledge to nursing, client, and health care systems.

Required Course of Study for the BSN/I

Courses requiring prerequisites are identified by a ~ symbol following the course number.

HCS 301 ................................................................................... 2 credits

Undergraduate Nursing Studies

NUR 391 ~ ................................................................................... 3 credits

Professional Nursing Practice
• All Canadian students must complete the Canadian RN License
• All students, with the exception of students residing in Canada
  • A signed Foreign Nursing Memo of Understanding.
  • Completion of a minimum of 120 credits that include the Degree Requirements for the BSN/I
  • Current employment is not a requirement for admission.

Note: Nurses with a Puerto Rico License must obtain US licensure for admission.

Additional Admission Requirements for the BSN/I
• Applicants must be residents outside of the United States, Alaska, Hawaii or approved US Territories. Applicants residing in the Commonwealth of Puerto Rico must enroll in the International version. Program will be offered only through the Online Campus.

Note: Nurses with a Puerto Rico License must obtain US licensure for admission.

• Completion of a nursing diploma, associates degree in nursing, or foreign equivalent program.
• Current employment is not a requirement for admission.
• A signed Foreign Nursing Memo of Understanding.
• All students, with the exception of students residing in Canada or Puerto Rico, will be required to validate their International Nursing License equivalency by CGFNS (Commission on Graduates of Foreign Nursing Schools) or ICD (International Consultants of Delaware) for RN equivalency.
• All Canadian students must complete the Canadian RN License Acknowledgment Form and submit documentation of a valid, unrestricted, unencumbered RN license.
• Applicants residing in the Commonwealth of Puerto Rico must have an approved appeal on file documenting successful completion of the US NCLEX-RN exam and that all Puerto Rico RN licensing requirements are met to be eligible for admission.

Degree Requirements for the BSN/I
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 42 upper division credits.
  • A maximum of 73 lower division credits.
  • A minimum program grade point average (GPA) of 2.0.
• All students must complete the minimum number of credits required by their degree program.

• University of Phoenix offers assessment of prior learning as an option by which students can earn assessed credits toward degree completion requirements. Registered nurses, enrolled in the BSN program, whose nursing education was completed at a non-US institution or a non-accredited institution, may be evaluated for transferable non-nursing credits for degree completion.

Academic Progression Requirements for the BSN/I
• All students enrolling in the BSN program will take HCS 301 as their first course.
• Students may take courses required for the Bachelor of Science in Nursing degree in any sequence as long as the prerequisite(s) for each course has been satisfactorily completed.
• Students whose RN license becomes restricted, encumbered or revoked while enrolled in the program may not enroll in any further NUR courses and may only complete non-nursing and elective coursework until their license restrictions have been removed and validated.
• All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite.
• Students whose RN license becomes restricted, encumbered or revoked while enrolled in the program, may not enroll in any further courses.
• A clinical course may not be taken concurrently with any other course.

Minimum Grade Requirements for the BSN/I
• Students in the Bachelor of Science in Nursing are required to achieve a minimum grade of “C” (2.0) in specific nursing and clinical courses. Students who fail to receive a minimum grade of “C” in any of the specified courses will be scholastically disqualified from the University. (“C-“ is not acceptable). These courses include: NUR 391, NUR 403, NUR 405, NUR 408, NUR 440, NUR 443, NUR 492
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.
• Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific nursing courses listed above only one time. If the student does not receive a “C” or better on the second attempt, the student will be scholastically suspended, permanently withdrawn, from the Bachelor of Science in Nursing program.

Residency Requirements and Course Waivers for the BSN/I
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 29 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 12 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following required courses may not be waived: NUR 391, NUR 492.

General Education Requirements for the BSN/I

A minimum of 54 of the 120 credits must be in the general education area approved by the University.

Communication Arts, 6 credits
Mathematics, 6 credits
Natural/Physical Sciences, 12 credits
Humanities, 6 credits
Social Science, 6 credits

Interdisciplinary Requirements, 18 credits

Any earned credit may be applied to the Interdisciplinary Component, with the exception of the following: credits applied to course(s) in the Required Course of Study as a waiver, equivalent course(s) to the BSN Required Course of Study and credits that apply to other areas of general education or the nursing Required Course of Study.

Physical Education activity credits are limited to four (4) credits.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

Additional Academic Program Re-Entry Policies for the BSN/I

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course will be required to re-enter and follow the admission, degree requirements and program policies published in the catalog which is in effect at the time of re-entry.

Students who have been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.

Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Course Descriptions for the BSN/I

HCS 301 ...................................................................................2 credits

Undergraduate Nursing Studies

The course is designed to aid adult learners in acquiring or improving critical thinking, teamwork, research, and communication skills, which are necessary at the University of Phoenix. Students will develop strategies for achieving educational goals that will help them be successful in the undergraduate program as well as in their professional development. Students will also be introduced to the University library and the Center for Writing Excellence and learn how to access those resources successfully.

NUR 391 ...................................................................................3 credits

Professional Nursing Practice

This course focuses on the professional role and discipline of nursing. Students will examine the role of the registered nurse. This course is designed to explore the knowledge and skills required to communicate therapeutically with clients and communicate effectively with other professionals of a health care team. The role of delegation will be examined.

NUR 403 ...................................................................................3 credits

HCS 350....................................................................................3 credits

Health Care Communication

This course will focus on professional communication related to the role of the registered nurse. This course is designed to explore the knowledge and skills required to communicate therapeutically with clients and communicate effectively with other professionals of a health care team. The role of delegation will be examined.

Theories and Models of Nursing Practice

This course is designed to focus baccalaureate students on the behaviors, attitudes, and values necessary for theory-based professional nursing practice. Concepts of professional nursing are presented within the unifying framework of Jean Watson’s Theory of Human Caring.

NUR 427 ...................................................................................3 credits

Health and Chronic Disease Management

This course focuses on pathophysiology, principles of motivation, learning theories, and their application to disease processes. A review of diseases from a systems approach will be stressed along with discussions regarding the impact of diversity, delivery of patient education, complementary and alternative therapies, and community resources.

NUR 440 ...................................................................................3 credits

Health Assessment and Promotion for Vulnerable Population

This course is designed to assist professional nurses in developing interviewing skills, refinement of physical assessment techniques,
and preventative health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in performing a health assessment is emphasized.

**Statistical Applications**

The emphasis in this statistical application’s course is on thinking about research issues in a statistically sound and practical fashion. Students will learn how to formulate and ask the right questions, how to collect data effectively, how to summarize and interpret information, and how to understand the limitations of statistical inferences.

NUR 443................................................................. 3 credits

**Epidemiology: Global and Public Health**

Epidemiology provides the basis for significant public and global health decisions. This course will explore key issues related to public and global health relevant to professional nursing practice. Through the use of epidemiology methods, students will track the natural history of a disease and identify its frequency, distribution, and cause. This course contains 50 hours of clinical experience.

NUR 408................................................................. 4 credits

**Health Law and Ethics**

The legal and ethical aspects of the nurse’s role in the delivery and management of health care are examined in this course. This course will introduce ethical responsibilities and decision making models related to various health care situations while exploring legal accountability to the individual, client, and health care providers.

HCS 482 ................................................................. 3 credits

**Health Care Informatics**

This course is designed to examine computer and electronic modalities that assist patient and client management. The automation of data management through information systems, expert systems, and telecommunications will be examined in the context of health care informatics. The use of technology to help make decisions and to improve the health status of the individual, family, and community will be emphasized.

NUR 492................................................................. 4 credits

**Senior Practicum: Leadership and Management**

This course will provide the student the opportunity to synthesize previous knowledge and skills in a supervised practicum experience with the guidance and approval of the faculty. The final project will integrate the academic and practical knowledge the students have acquired in their program. This course contains 25 hours of clinical experience.

**State of California Public Health Nursing Certificate**

The State of California has reviewed the University of Phoenix BSN course requirements and has determined that students entering the program after March 1, 1989 meet the state’s standards for Public Health Nursing certification. Those University of Phoenix students who have successfully completed their degree program are eligible to apply for the California PHN Certificate.

**Associate Programs Pathways Program**

Non-degree seeking students are permitted to take courses if admitted into the Pathways Program. The Pathways Program is designed for current high school juniors and seniors seeking to earn college credits while still enrolled in secondary schools. Pathways students may earn a maximum of 12 credits at the University of Phoenix. Non-degree students are not eligible to receive most types of financial aid or veterans benefits and must demonstrate English proficiency, if applicable, to be eligible for course enrollment. The Pathways Program admissions process must be completed before enrollment in any courses.

Admission into the Pathways program requires:
- Pathways Non-degree Application
- High School Junior or Senior Standing
- Pathways students must meet all prerequisite requirements for the program in which the courses are included. Students must also meet all admission requirements, with the exception of the HS diploma or equivalent
- Parent or guardian consent
- $25 application fee

Before proceeding beyond 12 credits, Pathways program students must submit a University of Phoenix degree seeking application for admission, possess a high school diploma (or equivalent), and be granted acceptance to the University of Phoenix. Pathways students who want to earn more than 12 credits will be deemed degree seeking and be required to submit an application for admission to a University of Phoenix degree program.

Note: The Pathways Program is not available in all states. Please consult an enrollment counselor to determine if residents of a specific state are eligible for this program.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
The College of Education offers undergraduate programs designed for future educators combining content and pedagogical preparation. These programs are developed and taught by skilled practitioners who work in their respective fields, and emphasize knowledge, skills, dispositions, and lifelong learning as essential elements for professional practice. Each program blends theory and practice through a combination of individual and collaborative work to foster a learning environment that allows students to build their knowledge base and apply what they have learned to “impact student learning one educator at a time.” Each student/applicant is responsible for checking with his/her state Department of Education and/or school district to determine specific credentialing requirements. The College of Education offers associate level degree programs designed to provide content knowledge in areas such as English/language arts, fine arts, math, science, and social studies, as well as foundational coursework in education.

**Admission Requirements for University of Phoenix**

All applicants are expected to meet the following admission requirements:

- Applicants whose native language is not English must have either:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  - or-
  - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  - or-
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  - or-
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  - or-
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  - or-
  - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

- The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:
  - The applicant has successfully completed thirty (30) transferable, academic semester credits at a nationally accredited college or university in the United States.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
  - The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
  - The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
  - The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.

- Applicants who reside in the United States must meet one of the following requirements:
  - Be a legal resident of the United States
  - Have been granted permanent residency
  - Have a valid visa that does not prohibit educational studies
  - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  - Have been granted asylum or refugee status.
  - A signed Enrollment Disclosure Agreement.
  - Students, who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 for Online or UNIV 101 for local campus) to be officially admitted (AM).
  - Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program.
  - A signed New Student Checklist may be required.
  - Completion of any state specific required documents or forms.
  - Applicants who have been expelled from other institutions are not eligible for admission to University of Phoenix.
  - Students who have been expelled from University of Phoenix are not eligible for re-admission to University of Phoenix. No appeals will be accepted.

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.
• Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students residing in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exceptions from the MMR immunization requirement may be granted for the following reasons:

• The student graduated from a public or nonpublic high school or has been home schooled. (Registration may be delayed until the required immunizations are completed and appropriate documentation is provided.)

• The student was born before January 1, 1957 (applicable to MMR vaccine only).

• The student was born before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)

• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.

• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.

• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.

• The student has submitted a statement that immunization is contrary to his/her religious beliefs.

• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.

• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

• A copy of each exemption must be kept in the student's health record at school.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school.

Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• The student was born before January 1, 1957 (applicable to MMR vaccine only).

• The student was born before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)

• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.

• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.

• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.

• The student has submitted a statement that immunization is contrary to his/her religious beliefs.

• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.

• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.
Associate of Arts/Concentration in Education

The following Associate of Arts/Concentration in Education (AAE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students who have previously posted at least one week of class may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Associate of Arts in Education program provides learners with a foundation in the lower division academic disciplines of mathematics, life and social sciences, humanities, and communication. The education concentration is intended to provide an introduction to the education field. The learner will gain knowledge in the historical and philosophical aspects of education, multicultural issues, the role of assessment, and the function of ethics in teaching. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/aae.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Preferred Sequence for the AAE

EDU 101 ~................................................................. 3 credits
Foundations of Education
EDU 105 ~................................................................. 3 credits
Diversity in Educational Settings
EDU 200 ~................................................................. 3 credits
Introduction to Assessment
EDU 215 ~................................................................. 3 credits
Ethics and Social Responsibility in Education

The University reserves the right to modify the required course of study.

General Information for the AAE

- First time attendees with the University who indicate less than 24 previous college credits (as recognized by the university) on the admission application and who meet the requirements for "Admitted with Condition" status, will be admitted with condition to this program according to the risk free period policy.
- Prior Learning Assessment and credits earned through National Testing Programs are excluded from the calculation of previous college credits.
- Applicants must complete a Pathway Diagnostic before enrolling into their first credit-bearing course. The results of the diagnostic will determine placement in the Accelerated Pathway (A Track) or standard pathway (B Track).
- Students who have previously posted at least one week of class attendance in a course for credit with the University will not be required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track).
- Students who wish to pursue an alternate pathway must have an approved appeal on file prior to posting positive attendance in class.
- Any student planning to complete an associate of arts degree prior to enrolling in a bachelor degree must complete all 60 required credits of the associates degree and meet admission requirements for their chosen bachelor degree before enrolling in any University bachelor degree programs.

Additional Admission Requirements for AAE

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Degree Requirements for the AAE

The degree requirements for this program are the following:
- Completion of a minimum of 60 credits.
- A minimum of 48 of the 60 credits must be in the general education areas approved by the University.
- A minimum grade point average (GPA) of 2.5.

Concentrations or emphases are reflected on the transcript only and will not appear on the diploma.

The diploma awarded for this program will read as: Associate of Arts

General Education Requirements for the AAE

The General Education requirements for this program are the following:

- English/Language Arts Requirement 12 credits
  - B Track must include: HUM 115 and ENG 147
- Mathematics Requirement 12 credits
  - Must Include MTH 213 and MTH 214
- Science Requirement 9 credits
- Fine Arts Requirement 3 credits
  - Must include Art, music, drama or dance
- Social Studies Requirement 9 credits
  - Must include HIS 110

Additional Liberal Arts Requirement 3 credits

B Track must include: GEN 201
A Track must include: GEN 127

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Students transferring from Western International University to any University of Phoenix undergraduate program may transfer all coursework completed at Western International University with a
grade of “D-” or higher.

**Academic Progression Requirements for the AAE**

- Students placed in the Accelerated Pathway (A Track) are required to successfully complete GEN 201 as the first course in their program.
- Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147, HUM 115.
- With the exception of ENG 147, GEN 127, GEN 201, and HUM 115, General Education and Elective course requirements may be satisfied by any of the following means:
  - University of Phoenix coursework,
  - Regionally or nationally accredited coursework (C- or higher grade),
  - National Testing Programs, and
  - ACE evaluated Military credits.
- Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
- Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
- Students may not complete any of the standard pathway (B Track) courses via Directed Study.
- All undergraduate students must satisfy math and English proficiency prior to enrolling in any course that requires math or English as a prerequisite.

**Residency Requirements and Course Waivers for the AAE**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 15 credits from a combination of Required Course of Study and General Education courses must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the AAE**

**EDU 101** ................................................................. 3 credits

**Foundations of Education**

In this course, learners are introduced to the foundations of education. Topics include the history of education, philosophical perspectives, and societal trends that change education. Learners will explore the characteristics of 21st century students and the use of technology in the classroom. In addition, learners will reflect on reasons for working in the educational setting and create a personal philosophy of education.

**EDU 105** ............................................................... 3 credits

**Diversity in Educational Settings**

This course focuses on developing an understanding of multicultural diversity concepts in education and implications for learning and instruction. Learners will examine the relationship of cultural values on the formation of self-concept and learning styles. Learners will also explore the scope of diversity prevalent in classrooms today and the role of prejudice, biases, assumptions, stereotyping, and cultural inequalities in education. Learners will connect these perspectives to instructional strategies that contribute to creating culturally responsive classrooms.

**EDU 200** .............................................................. 3 credits

**Introduction to Assessment**

In this course learners are introduced to the role of assessment in education. The purpose and types of assessment are identified including appropriate components in assessment planning. Formative assessment for learning and summative assessment of learning will be examined. Learners will also explore the topics of feedback and grading.

**EDU 215** .............................................................. 3 credits

**Ethics and Social Responsibility in Education**

This course introduces learners to the concepts of ethical reasoning and professional ethics in teaching. Learners will explore how their personal values and dispositions—whether inherited through culture and tradition or consciously adopted—interact with professional codes of ethics and ethical decision-making. Learners will examine ethical theories and the function of ethics in teaching. Ethical dilemmas in the education workplace will also be investigated.

**HUM 115** .......................................................... 3 credits

**Critical Thinking in Everyday Life**

This is a critical thinking skills course focusing on developing the necessary tools and skills to analyze problems, make decisions, formulate well-supported points of view on key academic, social, and professional issues.

**ENG 147** ............................................................ 3 credits

**University Writing Essentials**

This is a course in developing foundational skills necessary for effective and appropriate academic writing. This course reviews the fundamentals of grammar, writing mechanics, style, and proper documentation of sources.

**MTH 213** .......................................................... 3 credits

**Mathematics for Elementary Educators I**

This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.

**MTH 214** .......................................................... 3 credits

**Math for Elementary Teachers II**

This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.
HIS 110 ................................................................. 3 credits
US History to 1865
This course provides an overview of the social, political, economic,
and global events that have shaped the American scene from colo-
nial times through the Civil War period.
GEN 201 ................................................................. 3 credits

**Foundations for University Success**
This course transitions students through the foundations of study
at University of Phoenix. Students develop personal strategies for
achieving educational goals; and develop skills in critical thinking,
collaboration, and communication.
GEN 127 ................................................................. 3 credits

**University Studies for Success**
This is an academic course focusing on the essential information,
skills, tools, and techniques necessary for academic success and
personal effectiveness at University of Phoenix. The course devel-
ops and applies academic standards, practical knowledge, and
study skills immediately relevant to first-year university students.

**Associate of Arts/Concentration in Education**
(California)

The following Associate of Arts/Concentration in Education (AAE)
program may be offered at these University of Phoenix campus locations:
Online, depending on state of residence. The availability of programs and
concentrations depend on student demand and other factors. Not all
programs may be available to all residents of all states. Students may want
to consider completing certain courses in the Online classroom at Online
rates if the program is available via the Online modality in their state.
Please contact your enrollment advisor for more information.

The Associate of Arts in Education program provides learners with
a foundation in the lower division academic disciplines of mathemat-
ics, life and social sciences, humanities, and communication.
The education concentration is intended to provide an introduction
to the education field. The learner will gain knowledge in the his-
torical and philosophical aspects of education, multicultural issues,
the role of assessment, and the function of ethics in teaching.

This is a critical thinking skills course focusing on developing the necessary tools and skills to analyze problems, make decisions, formulate well-supported points of view on key academic, social, and professional issues.

EDG 147 .......................................................................................3 credits

University Writing Essentials

This is a course in developing foundational skills necessary for effective and appropriate academic writing. This course reviews the fundamentals of grammar, writing mechanics, style, and proper documentation of sources.
**Survey of the Visual Arts**

This course offers a foundation in the visual arts, elements, styles, and critical analysis for beginning art students. Emphasis is on identifying and explaining styles of visual arts from various cultures, eras, and places. The course focuses on the interpretation of art to understand meaning, and the ability to make critical judgment based on principles of art. Students learn to communicate ideas and expression through their own creative work in a two-dimensional, three-dimensional, video, or other time-based media.

**U.S. History to 1865**

This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period. This course includes philosophies of the Articles of Confederation and the U.S. Constitution.

**Foundations for University Success**

This course transitions students through the foundations of study at University of Phoenix. Students develop personal strategies for achieving educational goals; and develop skills in critical thinking, collaboration, and communication.

**University Studies for Success**

This is an academic course focusing on the essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at University of Phoenix. The course develops and applies academic standards, practical knowledge, and study skills immediately relevant to first-year university students.

**Bachelor of Science in Education/Elementary Education**

The following Bachelor of Science in Education/Elementary Education (BSED/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education/Elementary Education (BSED-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSED/E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-e.

EED 498 ~ .......................................................... 4 credits
Elementary Student Teaching, Seminar I

EED 499 ~ .......................................................... 4 credits
Elementary Student Teaching, Seminar II

The University reserves the right to modify the required course of Study.

**Additional Admission Requirements for the BSED/E**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

**Candidacy Status for the BSED/E**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study (Core) credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the BSED/E**

- Completion of a minimum of 120 credits that include the following distribution:
  - A minimum of 60 upper division credits in the Required Program Category Preferred Sequence.
  - A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.5.
  - Satisfactory completion and uploading of the Teacher Work Sample (TWS).
  - Satisfactory completion of any required internship, student teaching, practicum courses and/or alternative clinical practice.
  - Complete course within the sequence specified by course prerequisite requirements.
  - Meet state requirements as set forth by state of residency to receive state endorsement.
  - Complete Field Experience Observation Record (100 hours).
  - All Students must complete the minimum number of credits required by their degree program.
  - The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education

**Academic Progression Requirements for the BSED/E**

Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:

- Passing scores on the designated state content knowledge exam.
- Verification of immunization or TB test results (district specific)
- Verification of the completion of 100 hours of field experience

Candidates residing in the state of Idaho must provide verification of the completion of twenty (20) required semester credits in one of the endorsement areas below prior to student teaching.

- Social Studies (This may include areas such as American Government, Political Science, Economics, Geography, History, Psychology, Sociology, and Sociology / Anthropology).
- English / Language Arts (This may include areas such as Communication, English, English as a New Language, Journalism, Literacy, Writing and Foreign Language).
- Mathematics (This may include areas such as Mathematics, Geometry, Linear Algebra, Discrete Mathematics, Probability and Statistics, Trigonometry, and Calculus).
- Science (This may include areas such as Biological Science, Chemistry, Earth Science, Geology, Natural Science, and Physical Science).

_The following areas may not be used to satisfy these categories:_

_Agriculture Science and Technology, Business Technology Education, and Marketing Technology Education._

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- All students must complete GEN 200 as their first course at the University.

Students must complete all General Education requirements prior to completion of EDU 390.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the BSED/E**

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499
• Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/E
• Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
• Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Through an approved articulation agreement, students who have successfully completed equivalent courses may waive without credit up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed and transcripted from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
  • The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
  • The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.
• Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214 requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.
• The following courses in the Required Course of Study may not be waived: EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, GEN 200, RDG 415, SPE 300.
• Arizona residents may waive SEI 300 and/or SEI 301 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:
  • Arizona Provisional SEI Endorsement (SEI 300)
  • Arizona Full SEI Endorsement (SEI 300 and SEI 301)
  • Arizona English as a Second Language Endorsement
  • Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at http://www.ade.state.az.us/asd/lep/

General Education Requirements for the BSED/E
A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

English/Language Arts Requirement(s) 12 credits
Mathematics Requirement(s) 12 credits
6 credits must include MTH 213 and MTH 214

Physical/Biological Science Requirement(s) 6 credits
Social Studies Requirement(s) 9 credits
3 credits must include ETH 120
3 credits must include HIS 301 or HIS 310
Fine Arts Requirement(s) 3 credits
Art, music, drama or dance

Humanities Requirement(s) 3 credits

Additional Liberal Arts Requirement(s) 9 credits

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Field Experience for BSED/E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific coursework content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.
Student Teaching for the BSED/E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
  - Arizona teacher candidates enrolled in the BSED/E program will be issued an Elementary certificate in grades 1-8. Teacher candidates in the BSED/E program will not be eligible to student teach in Kindergarten and will not be issued an Institutional Recommendation (IR) as the Arizona Department of Education will no longer recognize Kindergarten experience for certification in Elementary education.

- Student teaching must occur in a 1-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings. Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:
  - Transcripts documenting of a minimum of 24 semester credits in their content area
  - Passing scores on the state mandated content exam
  - Candidates must earn a “B” or better in Elementary Education Seminar. If a candidate receives less than a “B” (B- or lower, or an incomplete grade), they must repeat the course.
  - Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
  - Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
  - Student teaching can only be repeated one time.
  - Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
  - Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
  - Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
  - Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
  - Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must successfully pass the Elementary Education Seminar with a "B" or better.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the BSED/E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Institutional Recommendation for the BSED/E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Candidates wishing to be certified in the state of Pennsylvania must show verification of a 3.0 overall cumulative GPA as noted on the Bachelor’s transcript.
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Course Descriptions for the BSED/E

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional
competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

EDU 300 ................................................................................... 0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

EDU 301 ................................................................................... 3 credits

Foundations of Education
This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.

EDU 315 ................................................................................... 3 credits

Legal & Ethical Issues in Education
This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

EDU 331 ................................................................................... 3 credits

Models and Theories of Instruction
This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.

EDU 321 ................................................................................... 3 credits

Classroom Management
This course examines the strategies used in managing a positive elementary classroom. Topics include models of discipline, motivation, disruptive students, classroom expectations and procedures, parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.

EDU 350 ................................................................................... 3 credits

Child Development
This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.

EED 400 ................................................................................... 3 credits

Assessment in Elementary Education
This course identifies what assessment is and how formative and summative assessments are used in the classroom. The course will include construction of objective and performance assessments, topics on reliability and validity, understanding the uses of standardized assessments, and the framework of assessment.

RDG 350 ................................................................................... 3 credits

Children’s Literature
This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied as well as the application of children’s literature to instruction and assessment in reading. Methods for integrating the use of children’s literature in all content areas will be examined.

RDG 420 ................................................................................... 3 credits

Elementary Methods - Reading/Language Arts
This course focuses on current research, theory, methods, and state standards related to reading instruction. It provides students with the background knowledge in language arts necessary to prepare comprehensive standards-based lesson plans and integrated units of instruction. Effective instructional and assessment techniques are modeled.

RDG 415 ................................................................................... 3 credits

Diagnosis and Remediation of Reading Difficulties
This course addresses the use of reading assessments to determine classroom intervention and instructional strategies. It provides foundational information about stages of reading acquisition, factors that impact reading success or failure, and the nature of reading difficulties. This information serves as a context for learning about the selection, administration, and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final diagnostic and instructional recommendations report will be developed based on student test data provided.

SEI 300 ................................................................................... 3 credits

Structured English Immersion
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELLs), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and ELL’s acquire English.

SEI 301 ................................................................................... 3 credits

Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 300 ................................................................................... 3 credits

Orientation to the Exceptional Child
This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations.
Historical perspectives and information related to special education law, and current policies and practices are examined.

EED 416 ....................................................................................3 credits

Elementary Methods - Mathematics

This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students’ problem-solving skills.

EED 420 ....................................................................................3 credits

Elementary Methods - Science

This course focuses on methodology and assessment strategies that enhance learning in science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of science, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.

EED 425 ....................................................................................3 credits

Elementary Methods - Health/PE

This course provides an overview of the physical education and health state and national standards and provides a context for how these are addressed in elementary schools and classrooms. Instructional approaches for the integration of physical education and health with other content areas are explored.

EED 430 ....................................................................................3 credits

Elementary Methods - Social Studies

This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop a variety of data collection tools designed to assess student learning.

EED 435 ....................................................................................3 credits

Elementary Methods - Fine Arts

This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

EDU 390........................................................................................1 credit

Elementary Education Seminar

This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.

EED 498 .....................................................................................4 credits

Elementary Student Teaching, Seminar I

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

EED 499 .....................................................................................4 credits

Elementary Student Teaching, Seminar II

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

MTH 213.....................................................................................3 credits

Mathematics for Elementary Educators I

This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.

MTH 214.....................................................................................3 credits

Math for Elementary Teachers II

This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.

ETH 120.....................................................................................3 credits

Cultural Diversity in the United States

This course is designed to educate students about issues of race, ethnicity, gender, disability and other diversity issues in the United States.

HIS 301.....................................................................................3 credits

United States Constitution

This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution, known as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.

HIS 110.....................................................................................3 credits

US History to 1865

This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.
Bachelor of Science in Education/Elementary Education (New Mexico)

The following Bachelor of Science in Education/Elementary Education (BSED/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education/Elementary (BSED-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSED/E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher.

Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student's professional portfolio.

For more information about our graduation rates, the median debt to specific course content. Documentation will be maintained in the student's professional portfolio. Please visit our website at http://www.phoenix.edu/programs/bsed-e.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSED/E

All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HSAT examination with a passing score.

• Applicants must be currently employed or have access to a work environment.

Candidacy Status for the BSED/E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).

Degree Completion Requirements for the BSED/E
Completion of a minimum of 129 credits that include the following distribution:
• A minimum of 48 upper division credits in the Required Program Category Preferred Sequence.
• A minimum of 78 of the 129 credits must be in the general education areas approved by the University.
• A minimum grade point average (GPA) of 2.5.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Complete courses within the sequence specified by course prerequisite requirements.
• Meet state requirements as set forth by state of residency to receive state endorsement.
• Complete Field Experience Observation Record (100 hours).
• All students must complete the minimum number of credits required by their degree program.
• The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education.

Academic Progression Requirements for the BSED/E
Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
• Passing scores on the designated state content knowledge exam.
• Verification of immunization or TB test results (district specific).
• Verification of the completion of 100 hours of field experience.
• Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All students must complete GEN 200 as their first course at the University.

Students must complete all General Education requirements prior to completion of EDU 390.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/E
• A candidate must earn a grade of "B" (grades of "I" and "B–" are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499
• Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching.

The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/E
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 21 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following courses in the Required Course of Study may not be waived: EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, GEN 200, RDG 415, SPE 300

General Education Requirements for the BSED/E
A minimum of 78 of the 129 credits must be in the General Education areas approved by the University.

Candidates must complete one of the following Content Areas: English/Language Arts, Mathematics or Social Studies. Content Area credits (18) combined with General Education credit requirements listed in the table below for the categories of English/Language Arts (12), Mathematics (12) and Social Studies (12) will provide candidates with a total of 30 credits in their selected Content Area. The 30 credits in the Content Area must include a breakdown of 15 upper division credits and 15 lower division credits.
English/Language Arts Requirement(s) 12 credits
May include COMM 251
Spanish Requirement(s) 3 credits
Mathematics Requirement(s) 12 credits
6 credits must include MTH 213 and MTH 214
Physical/Biological Science Requirement(s) 12 credits
Must include at least 3 credits in Physical Science and 3 credits in Biological Science
Social Studies Requirement(s) 18 credits
3 credits must include U.S. Constitution
12 credits must be in History, American History or Western Civilization
3 credits must be in Government, Economics or Sociology
Fine Arts Requirement(s) 3 credits
Art, music, drama or dance
Content Area 18 credits
English/Language Arts, Mathematics and Social Studies
For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.
All undergraduate students are required to complete the minimum general education credits required by their program version.
Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Student Teaching for the BSED/E
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
- Student teaching must occur in a K-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings.
- Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:
  - Passing scores on the state mandated content exam
  - Candidates must earn a "B" or better in Elementary Education Seminar. If a candidate receives less than a "B" (B- or lower, or an incomplete grade), they must repeat the course.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
- Student teaching can only be repeated one time.

- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
- Candidates must teach in a self-contained elementary setting. Candidates may not teach in special education.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching for the BSED/E
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must successfully pass the Elementary Education Seminar with a "B" or better.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Field Experience for the BSED/E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the BSED/E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching,
internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Institutional Recommendation for the BS/ED**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Course Descriptions for the BS/ED**

**GEN 200** .................................................................................... 3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**EDU 300** .................................................................................... 3 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

**EDU 301** .................................................................................... 3 credits

**Foundations of Education**

This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.

**EDU 315** .................................................................................... 3 credits

**Legal & Ethical Issues in Education**

This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

**EDU 311** .................................................................................... 3 credits

**Models and Theories of Instruction**

This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.

**EDU 321** .................................................................................... 3 credits

**Classroom Management**

This course examines the strategies used in managing a positive elementary classroom. Topics include models of discipline, motivation, disruptive students, classroom expectations and procedures, parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.

**EDU 305** .................................................................................... 3 credits

**Child Development**

This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.

**RDG 420** .................................................................................... 3 credits

**Elementary Methods - Reading/Language Arts**

This course focuses on current research, theory, methods, and state standards related to reading instruction. It provides students with the background knowledge in language arts necessary to prepare comprehensive standards-based lesson plans and integrated units of instruction. Effective instructional and assessment techniques are modeled.

**RDG 415** .................................................................................... 3 credits

**Diagnosis and Remediation of Reading Difficulties**

This course addresses the use of reading assessments to determine classroom intervention and instructional strategies. It provides foundational information about stages of reading acquisition, factors that impact reading success or failure, and the nature of reading difficulties. This information serves as a context for learning about the selection, administration, and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final diagnostic and instructional recommendations report will be developed based on student test data provided.

**ESL 300** .................................................................................... 3 credits

**Teaching English Language Learners**

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multilingual curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 300 ............................................................................... 3 credits
Orientation to the Exceptional Child
This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
EED 416 ............................................................................... 3 credits
Elementary Methods - Mathematics
This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students’ problem-solving skills.
EED 420 ............................................................................... 3 credits
Elementary Methods - Science
This course focuses on methodology and assessment strategies that enhance learning in science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of science, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.
EED 430 ............................................................................... 3 credits
Elementary Methods - Social Studies
This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop a variety of data collection tools designed to assess student learning.
EED 435 ............................................................................... 3 credits
Elementary Methods - Fine Arts
This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.
EDU 390 .............................................................................. 1 credit
Elementary Education Seminar
This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.
EED 498 ............................................................................... 4 credits
Elementary Student Teaching, Seminar I
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
EED 499 ............................................................................... 4 credits
Elementary Student Teaching, Seminar II
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
COMM 251 ......................................................................... 3 credits
Rhetoric and Critical Thinking
This course in critical thinking and informal logic helps students develop the ability to reason clearly and critically. It includes an introduction to the disciplines of inductive and deductive logic, fallacious reasoning, and problem-solving techniques. Emphasis is placed on the identification and management of the perception process, use of assumptions, emotional influences, and language in various forms of communication.
MTH 213 ............................................................................ 3 credits
Mathematics for Elementary Educators I
This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.
MTH 214 ............................................................................. 3 credits
Math for Elementary Teachers II
This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.
Bachelor of Science Education/Elementary Education

The following Bachelor of Science in Education/Elementary Education (BSED/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education/Elementary (BSEd-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSEd-E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-e.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements and Course Selections

Introductory Course, 3 total credits
GEN 200 .................................3 credits
Foundations for General Education and Professional Success

Orientation, 0 total credits
EDU 300 .................................................0 credits
Orientation to Teacher Education

History and Foundations of Education, 6 total credits
EDU 301 ~ .................................3 credits
Foundations of Education
EDU 315 ~ .................................3 credits
Legal & Ethical Issues in Education

Educational Theories and Models, 6 total credits
EDU 311 ~ .................................3 credits
Models and Theories of Instruction
EDU 321 ........................................3 credits
Classroom Management

Human Development, 3 total credits
EDU 305 ~ .................................3 credits
Child Development

EDU 390 ...........................................1 credit
Elementary Education Seminar
EED 498 ~ ...........................................4 credits
Elementary Student Teaching, Seminar I
EED 499 ~ ...........................................4 credits
Elementary Student Teaching, Seminar II

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the BSED/E

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Applicants must be currently employed or have access to a work environment.

Candidate Status for the BSED/E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
• Demonstration of basic skills proficiency
• Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSED/E
Completion of a minimum of 120 credits that include the following distribution:
• Candidates who select the Science Content Area are required to complete 126 credits
  A minimum of 57 upper division credits in the Required Program Category Preferred Sequence.
  A minimum of 60 of the 120 credits must be in the general education areas approved by the University.
  A minimum of 66 of the 126 credits (Science content area) must be in the general education areas approved by the University.
  A minimum grade point average (GPA) of 2.5.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Complete courses within the sequence specified by course prerequisite requirements.
• Meet state requirements as set forth by state of residency to receive state endorsement.
• Complete Field Experience Observation Record (200 hours).
• All students must complete the minimum number of credits required by their degree program.
• The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education

Academic Progression Requirements for the BSED/E
Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
• Passing scores on the designated state content knowledge exam.
• Verification of immunization or TB test results (district specific)
• Verification of the completion of 200 hours of field experience

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All students must complete GEN 200 as their first course at the University.
• Students must complete all General Education requirements prior to completion of EDU 390.
• Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/E
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499

• Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/E
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcribed from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214
requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements. The following courses in the Required Course of Study may not be waived: EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, GEN 200, RDG 412, RDG 415, RDG 418, SPE 300

**General Education Requirements for the BSED/E**

A minimum of 60 of the 120 credits must be in the general education areas approved by the University. Candidates must complete one of the following Content Areas: English/Language Arts, Mathematics, Social Studies or Science. Candidates who select English/Language Arts, Mathematics or Social Studies as their Content Area are required to complete the general education requirements outlined below:

- English/Language Arts Requirement(s) 12 credits
- Mathematics Requirement(s) 12 credits
- 6 credits must include MTH 213 and MTH 214
- Physical/Biological Science Requirement(s) 6 credits
- Must include at least 3 credits in Physical Science and 3 credits in Biological Science

Social Studies Requirement(s) 12 credits
- Must include HIS 301
- Fine Arts Requirement(s) 6 credits
- Art, music, drama or dance
- Content Area 12 credits

**Students must complete an additional 12 credits for their selected Content Area outside of their English, Mathematics and Social Studies general education requirements.**

Candidates who select Science as their Content Area are required to complete the general education requirements outlined below:

- English/Language Arts Requirement(s) 12 credits
- Mathematics Requirement(s) 12 credits
- 6 credits must include MTH 213 and MTH 214
- Physical/Biological Science Requirement(s) 6 credits
- Must include at least 3 credits in Physical Science and 3 credits in Biological Science

Social Studies Requirement(s) 12 credits
- Must include HIS 301
- Fine Arts Requirement(s) 6 credits
- Art, music, drama or dance
- Content Area 18 credits

**Students must complete an additional 18 credits for their selected Content Area outside of their Physical/Biological Science general education requirements.**

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog. All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

---

**Field Experience for BSED/E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the BSED/E**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- **Student teaching is the culminating experience of the Bachelor of Science in Education program.** Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.

- **Student teaching must occur in a K-8 self-contained classroom setting under the supervision of a certified teacher.** This applies to self-contained settings only, not departmentalized settings.

- **Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:**
  - Transcripts documenting a minimum of 24 semester credits in their content area.
  - Passing scores on the state mandated content exam.
  - Candidates must earn a “B” or better in Elementary Education Seminar. If a candidate receives less than a “B” (B- or lower, or an incomplete grade), they must repeat the course.
  - Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
  - **Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience.** If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
  - Student teaching can only be repeated one time.
  - Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
  - Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
  - Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
  - **Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.**
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching for the BSED/E**
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must successfully pass the Elementary Education Seminar with a "B" or better.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Additional Academic Program Re-entry Policy for the BSED/E**
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved. Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Institutional Recommendation for the BSED/E**
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Course Descriptions for the BSED/E**

**GEN 200** ................................................................. 3 credits

*Foundations for General Education and Professional Success*
This general education course is designed to introduce the intentionional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**EDU 300** ................................................................. 0 credits

*Orientation to Teacher Education*
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

**EDU 301** ................................................................. 3 credits

*Foundations of Education*
This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.

**EDU 315** ................................................................. 3 credits

*Legal & Ethical Issues in Education*
This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

**EDU 311** ................................................................. 3 credits

*Models and Theories of Instruction*
This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.

**EDU 321** ................................................................. 3 credits

*Classroom Management*
This course examines the strategies used in managing a positive elementary classroom. Topics include models of discipline, motivation, disruptive students, classroom expectations and procedures, parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.

**EDU 305** ................................................................. 3 credits

*Child Development*
This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/ emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.
EED 400 .................................................................3 credits
Assessment in Elementary Education
This course identifies what assessment is and how formative and summative assessments are used in the classroom. The course will include construction of objective and performance assessments, topics on reliability and validity, understanding the uses of standardized assessments, and the framework of assessment.

RDG 412 ...............................................................3 credits
Scientifically Based Literacy Instruction
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: Phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children’s performance in reading and in the language arts are also emphasized.

RDG 413 ...............................................................3 credits
Diagnosis and Remediation of Reading Difficulties
This course addresses the use of reading assessments to determine classroom intervention and instructional strategies. It provides foundational information about stages of reading acquisition, factors that impact reading success or failure, and the nature of reading difficulties. This information serves as a context for learning about the selection, administration, and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final diagnostic and instructional recommendations report will be developed based on student test data provided.

RDG 418 ...............................................................3 credits
Phonological Theory and Reading Instruction
This course focuses on phonologically based instruction in phonological awareness, linguistic skills, and phonics as fundamental to implementing an effective reading program. Students examine scientific research and distinguish it from non-scientific claims. In addition, they study the applications of scientific research to classroom instruction.

ESL 300 ...............................................................3 credits
Teaching English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 300 ...............................................................3 credits
Orientation to the Exceptional Child
This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations.

Historical perspectives and information related to special education law, and current policies and practices are examined.

EED 416 ...............................................................3 credits
Elementary Methods - Mathematics
This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students’ problem-solving skills.

EED 420 ...............................................................3 credits
Elementary Methods - Science
This course focuses on methodology and assessment strategies that enhance learning in science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of science, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.

EED 425 ...............................................................3 credits
Elementary Methods - Health/PE
This course provides an overview of the physical education and health state and national standards and provides a context for how these are addressed in elementary schools and classrooms. Instructional approaches for the integration of physical education and health with other content areas are explored.

EED 430 ...............................................................3 credits
Elementary Methods - Social Studies
This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop a variety of data collection tools designed to assess student learning.

EED 435 ...............................................................3 credits
Elementary Methods - Fine Arts
This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

EDU 390 .................................................................1 credit
Elementary Education Seminar
This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.
EED 498 ................................................................. 4 credits

Elementary Student Teaching, Seminar I

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

EED 499 ................................................................. 4 credits

Elementary Student Teaching, Seminar II

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

MTH 213 .................................................................. 3 credits

Mathematics for Elementary Educators I

This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.

MTH 214 .................................................................. 3 credits

Math for Elementary Teachers II

This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.

SOC 315 .................................................................. 3 credits

Cultural Diversity

This course focuses on the issues, challenges and opportunities presented by U.S. population diversity. Emphasis is placed on workplace issues related to employee diversity in terms of gender, race/ethnicity, socioeconomic class and cultural background.

HIS 301 .................................................................. 3 credits

United States Constitution

This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution know as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.

Bachelor of Science in Education Elementary Education (Hawaii)

The following Bachelor of Science in Education Elementary Education (BSEd/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education/Elementary (BSEd-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSed/E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher.

Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-e.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Elementary Student Teaching, Seminar II

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSED/E
All applicants are expected to meet the following admission requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Applicants must be currently employed or have access to a work environment.

Candidacy Status for the BSED/E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study (Core) credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be uploaded to the Teacher Education Program Requirement DRF in the e-portfolio.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSED/E
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 60 upper division credits in the Required Program Category Preferred Sequence.
  • A minimum of 54 of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.5.
  • Satisfactory completion and uploading of the Teacher Work Sample (TWS).
  • Satisfactory completion of any required internship, student teaching, practicum courses and/or alternative clinical practice.
  • Complete course within the sequence specified by course prerequisite requirements.
  • Meet state requirements as set forth by state of residency to receive state endorsement.
  • Complete Field Experience Observation Record (100 hours).
  • All Students must complete the minimum number of credits required by their degree program.
  • The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education

Academic Progression Requirements for the BSED/E
Candidates must provide the following verification prior to beginning student teaching:
• Passing scores on the designated state content knowledge exam.
• Verification of immunization or TB test results (district specific)
• Verification of the completion of 100 hours of field experience

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All students must complete GEN/200 as their first course at the University.

Students must complete all General Education requirements prior to completion of EDU 390.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/E
• A candidate must earn a grade of “B” (grades if “I” and “B-” are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499.
Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching.

The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the BSED/E**

Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent coursework may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcribed from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214 requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.

The following courses in the Required Course of Study may not be waived: EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, GEN 200, RDC 415, SPE 300.

**General Education Requirements for the BSED/E**

A minimum of 54 of the 120 credits must be in the general education areas approved by the University.

- English/Language Arts Requirement(s) 12 credits
- Mathematics Requirement(s) 12 credits
- Physical/Biological Science Requirement(s) 6 credits
- Social Studies Requirement(s) 9 credits
- Art, music, drama or dance
- Humanities Requirement(s) 3 credits
- Additional Liberal Arts Requirement(s) 9 credits
- Fine Arts Requirement(s) 3 credits

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite. Note: Advanced exams such as Calculus or Freshman Composition and/or equivalent DANTES or Excelsior (formerly Regents or ACT/PEP) exams may also be used to fulfill the prerequisite requirements.

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Field Experience for BSED/E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the BSED/E**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
• Student teaching must occur in a K-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings.
• Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:
  • Transcripts documenting a minimum of 24 semester credits in their content area
  • Passing scores on the state mandated content exam
• Candidates must earn a "B" or better in Elementary Education Seminar. If a candidate receives less than a "B" (B- or lower, or an incomplete grade), they must repeat the course.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
• Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the student teaching experience being removed from their transcript. This experience counts as one of their two student teaching attempts.
• Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
• Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must successfully pass the Elementary Education Seminar with a "B" or better.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Additional Academic Program Re-entry Policy for the BSED/E**
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Institutional Recommendation for the BSED/E**
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Course Descriptions for the BSED/E**

**Foundations for General Education and Professional Success**
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

EDU 300 ...................................................................................0 credits

**Orientation to Teacher Education**
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

EDU 301 ...................................................................................3 credits

**Foundations of Education**
This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.

This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

This course examines the strategies used in managing a positive elementary classroom. Topics include models of discipline, motivation, disruptive students, classroom expectations and procedures, parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.

This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.

This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.

This course identifies what assessment is and how formative and summative assessments are used in the classroom. The course will include construction of objective and performance assessments, topics on reliability and validity, understanding the uses of standardized assessments, and the framework of assessment.

This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied as well as the application of children’s literature to instruction and assessment in reading. Methods for integrating the use of children’s literature in all content areas will be examined.

This course focuses on scientifically based instruction in phonological awareness, linguistic skills, and phonics as fundamental to implementing an effective reading program. Students examine scientific research and distinguish it from non-scientific claims. In addition, they study the applications of scientific research to classroom instruction.
EED 425 ................................................................. 3 credits
Elementary Methods - Health/PE
This course provides an overview of the physical education and health state and national standards and provides a context for how these are addressed in elementary schools and classrooms. Instructional approaches for the integration of physical education and health with other content areas are explored.

EED 430 ................................................................. 3 credits
Elementary Methods - Social Studies
This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop a variety of data collection tools designed to assess student learning.

EED 435 ................................................................. 3 credits
Elementary Methods - Fine Arts
This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

EED 444 ................................................................. 3 credits
Elementary Methods - Integration of Hawaiian Studies
This course focuses on the pedagogy and assessment strategies that enhance student learning of Hawaiian studies. Instructional approaches for the Hawaiian Studies content area within the framework of an integrated curriculum are explored, including the use of critical thinking and study skills. Methods for integrating Hawaiian history, cultural values, and Hawaiian heritage are emphasized. This course provides students with an opportunity to develop the ability to create performance-based activities and assessments, culturally-sensitive instructional methods, curricular materials and resources, and appropriate assessment strategies. Students develop a variety of data-collection tools designed to assess student learning.

EDU 390................................................................. 1 credit
Elementary Education Seminar
This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.

EED 498 ................................................................. 4 credits
Elementary Student Teaching, Seminar I
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

EED 499 ................................................................. 4 credits
Elementary Student Teaching, Seminar II
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

MTH 213 .............................................................................. 3 credits
Mathematics for Elementary Educators I
This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.

MTH 214 .............................................................................. 3 credits
Math for Elementary Teachers II
This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.

ETH 120 .............................................................................. 3 credits
Cultural Diversity in the United States
This course is designed to educate students about issues of race, ethnicity, gender, disability and other diversity issues in the United States.

HIS 110 .............................................................................. 3 credits
United States Constitution
This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution known as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.

HIS 301 .............................................................................. 3 credits
US History to 1865
This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.

HIS 265 .............................................................................. 3 credits
Hawaii History and Culture
This is a survey course in the history of Hawaii from Polynesian origins to contemporary multi-cultural society. This course traces the impact of major events, historical figures, and cultures on the development of Hawaii; and considers the Hawaiian response to these forces.
Bachelor of Science in Education/Elementary Education (Nevada)

The following Bachelor of Science in Education/Elementary Education (BSED/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education/Elementary (BSED-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSED/E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher.

Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-e.

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the BSED/E
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Applicants attending a local campus in Nevada must submit a copy of their high school diploma, high school transcript with graduation posted, GED certificate, GED transcript with successful completion posted, CHSPE examination results or a letter on letterhead from the high school records office confirming the date of graduation. Students may submit a college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency to satisfy this requirement.
• Applicants must be currently employed or have access to a work environment.

Candidacy Status for the BSED/E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted must meet the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s electronic file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSED/E
• Completion of a minimum of 120 credits that include the following distribution:
  • A minimum of 57 upper division credits in the Required Program Category Preferred Sequence.
  • A minimum of 51 of the 120 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.5.
  • Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Complete courses within the sequence specified by course prerequisite requirements.
• Meet state requirements as set forth by state of residency to receive state endorsement.
• Complete Field Experience Observation Record (100 hours).
• All students must complete the minimum number of credits required by their degree program.
• The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education.

Academic Progression Requirements for the BSED/E
Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
• Passing scores on the designated state content knowledge exam.
• Verification of immunization or TB test results (district specific).
• Verification of the completion of 100 hours of field experience
Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All students must complete EDU 390 as their first course at the University.
• Students must complete all General Education requirements prior to completion of EDU 390.

Minimum Grade Requirements for the BSED/E
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499.
• Candidates must earn a “B” or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching.

Residency Requirements and Course Waivers for the BSED/E
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent coursework may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a
waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcribed from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214 requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.

The following courses in the Required Course of Study may not be waived: GEN 200, EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, RDG 415, SPE 300.

General Education Requirements for the BSED/E

A minimum of 51 of the 120 credits must be in the general education areas approved by the University.

- English/Language Arts Requirement(s) 12 credits
- Mathematics Requirement(s) 12 credits
- 6 credits must include MTH 213 and MTH 214
- Social Studies Requirement(s) 12 credits
- 3 credits must include HIS 311 Nevada Constitution
- 3 credits must include ETH 120
- Physical/Biological Science Requirement(s) 6 credits
- Fine Arts Requirement(s) 3 credits
- Art, music, drama or dance
- Humanities Requirement(s) 3 credits
- Additional Liberal Arts Requirement(s) 3 credits

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.

All undergraduate students must satisfy math and English proficiency prior to enrolling in any course that requires math or English as a prerequisite. Note: Advanced exams such as Calculus or Freshman Composition and /or equivalent DANTES or Excelsior (formerly Regents or ACT/PEP) exams may also be used to fulfill the prerequisite requirements.

All undergraduate students are required to complete the minimum general education credits required by their program version.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Field Experience for BSED/E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the BSED/E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
- Student teaching must occur in a K-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings.
- Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:
  - Transcripts documenting of a minimum of 24 semester credits in their content area
  - Passing scores on the state mandated content exam
  - Candidates must earn a "B" or better in Elementary Education Seminar. If a candidate receives less than a "B" (B- or lower, or an incomplete grade), they must repeat the course.
  - Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
  - Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
  - Student teaching can only be repeated one time.
  - Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
  - Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
  - Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
  - Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
  - Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoe-
rix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must successfully pass the Elementary Education Seminar with a "B" or better.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the BSED/E
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Institutional Recommendation for the BSED/E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Course Descriptions for the BSED/E

GEN 200 .................................................................3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

EDU 300 .................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

EDU 301 .................................................................3 credits
Foundations of Education
This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.

EDU 315 .................................................................3 credits
Legal & Ethical Issues in Education
This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

EDU 311 .................................................................3 credits
Models and Theories of Instruction
This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.

EDU 321 .................................................................3 credits
Classroom Management
This course examines the strategies used in managing a positive elementary classroom. Topics include models of discipline, motivation, disruptive students, classroom expectations and procedures, parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.

EDU 305 .................................................................3 credits
Child Development
This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/ emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.

EED 400 .................................................................3 credits
Assessment in Elementary Education
This course identifies what assessment is and how formative and summative assessments are used in the classroom. The course will include construction of objective and performance assessments, topics on reliability and validity, understanding the uses of standardized assessments, and the framework of assessment.

Children’s Literature
This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied as well as the application of children’s literature to instruction and assess-
Teaching English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multi-ethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

ESL 300 ................................................................. 3 credits

Elementary Methods - Mathematics

This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students’ problem-solving skills.

EED 416 ................................................................. 3 credits

Elementary Methods - Reading/Language Arts

This course focuses on scientifically based instruction in phonological awareness, linguistic skills, and phonics as fundamental to implementing an effective reading program. Students examine scientific research and distinguish it from non-scientific claims. In addition, they study the applications of scientific research to classroom instruction.

RDG 415 .............................................................. 3 credits

Diagnosis and Remediation of Reading Difficulties

This course addresses the use of reading assessments to determine classroom intervention and instructional strategies. It provides foundational information about stages of reading acquisition, factors that impact reading success or failure, and the nature of reading difficulties. This information serves as a context for learning about the selection, administration, and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final diagnostic and instructional recommendations report will be developed based on student test data provided.

RDG 420 .............................................................. 3 credits

Elementary Methods - Social Studies

This course focuses on differentiated methods and techniques used for the instruction in reading. Methods for integrating the use of children’s literature in all content areas will be examined.

Elementary Student Teaching, Seminar I

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assis-

EED 425 .............................................................. 3 credits

Elementary Methods - Health/PE

This course provides an overview of the physical education and health state and national standards and provides a context for how these are addressed in elementary schools and classrooms. Instructional approaches for the integration of physical education and health with other content areas are explored.

EED 430 .............................................................. 3 credits

Elementary Methods - Social Studies

This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop a variety of data collection tools designed to assess student learning.

EED 435 .............................................................. 3 credits

Elementary Methods - Fine Arts

This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

EUD 390 ............................................................. 1 credit

Elementary Education Seminar

This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.

EED 498 ............................................................. 4 credits

Elementary Student Teaching, Seminar I

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

EED 449 ............................................................. 4 credits

Elementary Student Teaching, Seminar II

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assis-
The Bachelor of Science in Education/Elementary Education (Utah)

The following Bachelor of Science in Education/Elementary Education (BSEd/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online Information. For more information, please visit our website at http://www.phoenix.edu/programs/bsede.

The Bachelor of Science in Education/Elementary (BSEd-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSEd/E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher.

Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

Level 1 Candidate Status is completed upon admission to the program. Applicants must be currently employed or have access to a work experience prior to beginning student teaching. Candidates must provide:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Verification of fingerprint clearance
- Demonstration of basic skills proficiency
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Verification of the completion of 100 hours of field experience

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSED/E
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Verification of fingerprint clearance

Candidate Status for the BSED/E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSED/E
Completion of a minimum of 120 credits that include the following distribution:
- A minimum of 57 upper division credits in the Required Program Category Preferred Sequence.
- A minimum of 51 of the 120 credits must be in the general education areas approved by the University.
- A minimum grade point average (GPA) of 2.5.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Complete courses within the sequence specified by course prerequisite requirements.

Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
- Passing scores on the designated state content knowledge exam.
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- A minimum of 51 of the 120 credits must be in the general education areas approved by the University.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the BSED/E
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Verification of fingerprint clearance
- Demonstration of basic skills proficiency
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Verification of the completion of 100 hours of field experience

The University reserves the right to modify the required course of study.

Candidate Status for the BSED/E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSED/E
Completion of a minimum of 120 credits that include the following distribution:
- A minimum of 57 upper division credits in the Required Program Category Preferred Sequence.
- A minimum of 51 of the 120 credits must be in the general education areas approved by the University.
- A minimum grade point average (GPA) of 2.5.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Complete courses within the sequence specified by course prerequisite requirements.

Meet state requirements as set forth by state of residency to receive state endorsement.
- Complete Field Experience Observation Record (100 hours).
- All students must complete the minimum number of credits required by their degree program.
- The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education

Academic Progression Requirements for the BSED/E
Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
- Passing scores on the designated state content knowledge exam.
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Verification of immunization or TB test results (district specific)
- Verification of the completion of 100 hours of field experience

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
- All students must complete GEN 200 as their first course at the University.

Students must complete all General Education requirements prior to completion of EDU 390.
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/E
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499
- Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/E
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214 requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.

The following courses in the Required Course of Study may not be waived: GEN 200, EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, RDG 415, SPE 300

General Education Requirements for the BSED/E

A minimum of 51 of the 120 credits must be in the general education areas approved by the University.
English/Language Arts Requirement(s) 12 credits
- Must include 3 credit lower division writing course and 3 credit upper division writing course

Mathematics Requirement(s) 12 credits
- Must include MTH 213 and MTH 214

Social Studies Requirement(s) 9 credits
- Must include HIS 301 or HIS 110

Physical/Biological Science Requirement(s) 6 credits
- Must include 3 credits in Physical Science and 3 credits in Biological Science

Fine Arts Requirement(s) 3 credits
- Art, music, drama or dance

Humanities Requirement(s) 3 credits
- Art, music, drama or dance

Additional Liberal Arts Requirement(s) 6 credits

For a description of the preceding general education areas, see the Undergraduate Programs section within this catalog.
All undergraduate students are required to complete the minimum general education credits required by their program version.

Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

Field Experience for BSED/E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the BSED/E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
- Student teaching must occur in a K-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings.
- Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:
  - Transcripts documenting of a minimum of 24 semester credits in their content area
  - Passing scores on the state mandated content exam
- Candidates must earn a "B" or better in Elementary Education Seminar. If a candidate receives less than a "B" (B- or lower, or an incomplete grade), they must repeat the course.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
- Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
• Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching for the BSED/E
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must successfully pass the Elementary Education Seminar with a “B” or better.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the BSED/E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Institutional Recommendation for the BSED/E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.

EDU 315 ................................................................................... 3 credits

This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

EDU 311 ................................................................................... 3 credits
parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.

**EDU 305** ................................................................. 3 credits

**Child Development**
This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.

**EED 400** ................................................................. 3 credits

**Assessment in Elementary Education**
This course identifies what assessment is and how formative and summative assessments are used in the classroom. The course will include construction of objective and performance assessments, topics on reliability and validity, understanding the uses of standardized assessments, and the framework of assessment.

**RDG 350** ................................................................. 3 credits

**Children's Literature**
This course will examine the use of children's literature in the elementary school classroom. Various genres will be studied as well as the application of children's literature to instruction and assessment in reading. Methods for integrating the use of children's literature in all content areas will be examined.

**RDG 420** ................................................................. 3 credits

**Elementary Methods - Reading/Language Arts**
This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students' problem-solving skills.

**EED 420** ................................................................. 3 credits

**Elementary Methods - Science**
This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**EED 416** ................................................................. 3 credits

**Elementary Methods - Health/PE**
This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the integration of physical education and health with other content areas are explored.

**EED 430** ................................................................. 3 credits

**Elementary Methods - Fine Arts**
This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

**EDU 390** ................................................................. 1 credit

**Elementary Education Seminar**
This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-
evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.

**EED 498** ................................................................. 4 credits

**Elementary Student Teaching, Seminar I**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**EED 499** ................................................................. 4 credits

**Elementary Student Teaching, Seminar II**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**MTH 213** .................................................................. 3 credits

**Mathematics for Elementary Educators I**

This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.

**MTH 214** .................................................................. 3 credits

**Cultural Diversity**

This course focuses on the issues, challenges and opportunities presented by U.S. population diversity. Emphasis is placed on workplace issues related to employee diversity in terms of gender, race/ethnicity, socioeconomic class and cultural background.

**HIS 301** .................................................................. 3 credits

**United States Constitution**

This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.

**ETH 120** .................................................................. 3 credits

**Cultural Diversity in the United States**

This course is designed to educate students about issues of race, ethnicity, gender, disability and other diversity issues in the United States.

**HIS 110** .................................................................. 3 credits

**US History to 1865**

This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.

**Bachelor of Science in Liberal Studies (California)**

The following Bachelor of Science in Liberal Studies (BSLS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Liberal Studies (BSLS) is an undergraduate liberal studies program that combines content and pedagogical preparation required for multiple subject credential candidates. Field experiences are integrated throughout the program, with a culminating student teaching experience. The program and field experiences are designed to emphasize mastery of state standards with ongoing assessment to measure candidate competency. State Licensure requirements include completion of a state approved program, TB test, fingerprint verification, basic skills exam, content exam, and clinical student teaching experience. In addition to the requirements listed above, students seeking a California teaching license must also have:

- Certificate of Clearance;
- Pass CBEST, CSET, & RICA examinations;
- Successfully complete a US Constitution course;
- CalTPA assessments;
- Current CPR certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsls.

Additional Admission Requirements for the BSLS
All applicants are expected to meet the following admissions requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Applicants must be currently employed or have access to a work environment.
• Verification of negative TB test results
• A receipt of the Request for Certificate of Clearance.
• Students who reside outside of the state of California are not eligible to apply.
• Signed CalTPA Code of Honor

Candidacy Status for the BSLS
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1. Level 2 Candidate Status is completed prior to the completion of 12 University of Phoenix credits from the Required Course of Study (Core) of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed.
• Demonstration of basic skills proficiency (CBEST)
• Verification of Certificate of Clearance
• Must provide one of the following verifications prior to the completion of 12 semester credits in the program:
  • The candidate provides evidence of having passed the appropriate subject matter examination(s).
  • The candidate provides evidence of having attempted the appropriate subject matter examination(s).
  • The candidate provides evidence of registration for the next scheduled examination.
  • The candidate provides evidence of having completed a Commission approved subject matter preparation program.
  • The candidate provides evidence of continuous progress toward meeting the subject matter requirement.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSLS
• Completion of a minimum of 121 credits that include the following distribution:
  • A minimum of 43 upper division credits.
  • A minimum of 81 of the 121 credits must be in the general education areas approved by the University.
  • A minimum grade point average (GPA) of 2.5.
  • Satisfactory completion of CalTPA 1-4.
  • Satisfactory completion of student teaching.
  • Complete courses within the sequence specified by course prerequisites and requirements.
  • Meet state requirements as set forth by state of residency to receive state endorsement.
  • Complete Field Experience Observation Record (100 hours).
  • All students must complete the minimum number of credits required by their degree program.
  • The diploma awarded for this program will read as: Bachelor of Science in Liberal Studies

Academic Progression Requirements for the BSLS
Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
• Verification of content knowledge mastery prior to student teaching (CSET content exam)
• Verification of Disposition Assessments (Self-Evaluation Dispositions Rubric & Personal Assessment Interview)
• Passing score on Teaching Performance Assessment CalTPA 1: Subject- Specific Pedagogy
• Passing score on Teaching Performance Assessment CalTPA 2: Designing Instruction
• Completion of all coursework prior to Student Teaching Seminar I & II with a 2.5 program GPA
• Verification of the completion of 100 hours of field experience.

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.
• All students must complete GEN 200 and BSLS 101CA as the first two courses at the University.
• BSLS students are not required to enroll in the First-Year Sequence.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.
A candidate must earn a grade of “B” (Grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: HUM 375CA, PHL 310CA
A candidate must earn a grade of “C” (Grades of “I” and “C-” are not accepted) or better in the following courses in order to student teach: EED 498CA, EED 499CA

Minimum Grade Requirements for the BSLS
- A candidate must earn a grade of “B” (Grades of “I” and “B-” are not accepted) or better in the following courses in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSLS
Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the required course of study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, a student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcribed from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Students may use a 2 semester credit Constitution course to satisfy the HIS 305CA or HIS 110CA constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213CA and MTH 214CA requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.

The following courses in the Required Course of Study may not be waived: EED 498CA, EED 499CA, GEN 200

General Education Requirements for the BSLS
A minimum of 81 of the 121 credits must be in the general education areas approved by the University.

BSLS Orientation, 0 credits
Must include: BSLS 101CA, Orientation to Liberal Studies in Education

English/Language Arts, 21 credits
Must include the following:
- 6 credits in Writing (RDG 201CA)
- 3 credits in Communication
- 3 credits in Linguistics
- 3 credits in American Literature
- 3 credits in Reading

Mathematics, 12 credits
Must include: MTH 213CA and MTH 214CA

Physical/Biological Science, 12 credits
Must include the following:
- 3 credits in Physics
- 3 credits in Biology
- 3 credits in Chemistry
- 3 credits in Earth Science
  (must include two lab sciences)

Social Studies, 15 credits
Must include the following:
- 6 credits in World History
- 3 credits in CA History (HIS 305CA)
- 6 credits in U.S. History (HIS 110CA)

Fine Arts, 9 credits
Must include: ARTS 100CA, ARTS 230CA, and ARTS 340CA

Humanities, 6 credits
Must include: HUM 375CA and PHIL 310CA

Health/Physical Education, 6 credits
Must include the following:
- 3 credits in Health/PE (HPE 170CA)
- 3 credits in Human Nutrition

Coursework which was completed at an institution that offers associate degrees or higher, which was accredited, or a candidate for accreditation at the time the student attended, by a regional or approved national accrediting body, or a foreign institution recognized/authorized by the country’s Ministry of Education, will be reviewed for transfer into the University.

In order to satisfy RDG 201CA with transfer coursework, a student must have completed a previous course which meets the following
candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.

- Student teaching can only be repeated one time.
- Candidates that do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teaching Performance Assessment.

**Additional Academic Program Re-entry Policy for the BSLS**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Institutional Recommendation for the BSLS**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must provide verification of U.S. Constitution coursework (with a grade of “C” or better), or exam as required by the state certification agency.
- Candidates must provide proof of certification in cardio pulmonary resuscitation (CPR).
- Candidates must pass the RICA exam.

**California Teaching Performance Assessment Policy**

- Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy (course and assessment) and TPA 002: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.
• Candidates may attempt the Teaching Performance Assessment 1: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction a total of three times each. Candidates are required to retake TPA 001 or TPA 002 courses if they have failed the corresponding assessment two times. This retake must be completed prior to the third attempt.
• Teaching Performance Assessment 3: Assessing Learning and Teaching Performance Assessment 4: Culminating Teaching Experience are completed during the student teaching experience. These assessments can only be attempted two times each.
• Candidates must earn a score of 3 or 4 on each Teaching Performance Assessment to be considered passing. Scores of 1 or 2 are not considering passing scores.
• Candidates who are unable to pass any assessment after the allotted number of attempts are permanently removed from the program.
TPA 1 and TPA2 = 3 attempts
TPA 3 and TPA4 = 2 attempts
• Students who transfer into the BSLS program and have documentation of passing TPA 1: Subject-specific Pedagogy and/or TPA 2: Designing Instruction while attending another university are not required to complete the corresponding preparation courses TPA 001 - Subject-specific Pedagogy and/or TPA 002 - Designing Instruction. Students should submit a course waiver request to apply the TPA 1 and/or TPA 2 assessments to the TPA 001 and/or TPA 002 courses at University of Phoenix.

Course Descriptions for the BSLS
EDU 300CA ................................................................. 0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teaching Performance Assessment (TPA), and technology resources will be discussed.
GEN 200 ............................................................................. 3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach goals and achieve academic success.
EDU 301CA ................................................................. 3 credits

Foundations of Education
This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.
EDU 311CA ................................................................. 3 credits

Models and Theories of Instruction
This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.
EDU 321CA ...................................................................... 3 credits

Classroom Management
This course examines the strategies used in managing a positive elementary classroom. Topics include management models, motivation, disruptive students, classroom expectations and procedures, communication, and record keeping. Managing materials and technology will also be addressed. Students will develop an individual classroom management plan.
EDU 305CA ...................................................................... 3 credits

Child Development
This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.
RDG 420CA ...................................................................... 3 credits

Elementary Methods: Reading and Language Arts
This course focuses on current research, theory, methods, and state standards related to reading instruction. It provides students with the background knowledge in language arts necessary to prepare comprehensive standards-based lesson plans and integrated units of instruction. Effective instructional and assessment techniques are modeled.
SPE 300CA ...................................................................... 3 credits

Orientation to the Exceptional Child
This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
ELL 300 ................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
EED 436CA ...................................................................... 3 credits

Elementary Methods: Social Science and Fine Arts
This course focuses on methodology and assessment strategies that enhance learning in social science and fine arts. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of social science and fine arts, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.
EED 438CA ................................................................. 3 credits
**Elementary Methods: Mathematics and Science**

This course focuses on methodology and assessment strategies that enhance learning in mathematics and science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of student development and diversity, as well as current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.

EED 498CA ................................................................. 4 credits
**Elementary Student Teaching, Seminar I**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the learning environment, designing and implementing assessments in preparation for the CalTPA Task Three: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the Teaching Performance Expectations.

EED 499CA ................................................................. 4 credits
**Elementary Student Teaching, Seminar II**

This course will focus on the elements of the CalTPA Task Four: Culminating Teaching Experience Task. The course explores the following topics: school culture and diversity, pedagogical assignments and tasks, self-reflection, and preparation to serve as a beginning teacher in an induction program. It also provides practical guidance in seeking a teaching position. This course will serve as a forum for open discussion and problem solving based on student teaching classroom experiences and their ability to use and apply the full-range of Teaching Performance Expectations.

TPA 001 ......................................................................... 1 credit
**Subject Specific Pedagogy**

This course addresses California’s Teaching Performance Assessment: Principles of Content-Specific and Developmentally Appropriate Pedagogy. Students will review the elements of this assessment and will demonstrate their knowledge of principles of content-specific pedagogy and developmentally appropriate pedagogy. Through this assessment process, students will learn the importance of their performance with K-12 students in mastering the knowledge, skills and abilities required of a beginning teacher, as exemplified in the Teacher Performance Expectations.

TPA 002 ......................................................................... 1 credit
**Designing Instruction**

This course addresses the second task of California’s Teaching Performance Assessment: Designing Instruction, Connecting Instructional Planning to Student Characteristics for Academic Learning. Students will review the elements of the Designing Instruction Teaching Performance Assessment and will demonstrate their ability to learn important details about a classroom of students, an English learner, and a student who presents a different instructional challenge. Students will focus on how instructional planning connects to student characteristics of a whole class and to two focus students who present a different instructional challenge.

BSLS 101CA ..................................................................... 0 credits
**Orientation to Liberal Studies in Education**

This course is an orientation to the primary components of the Bachelor of Science in Liberal Studies program. Students will introduce to the program’s progression and degree completion requirements. Field experience, electronic resources, e-portfolio, teacher performance assessments, and student teaching will be discussed.

RDG 201CA ................................................................. 3 credits
**Reading and Writing Concepts**

This course builds a foundation in language acquisition and development to examine the concepts of reading, writing, spelling, and handwriting. Students explore children’s development in these areas and the implications for instruction. They also observe and reflect on language arts interactions and activities in a classroom setting.

MTH 213CA ..................................................................... 3 credits
**Mathematics for Elementary Educators I**

This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations, and algebraic reasoning and problem solving.

MTH 214CA ..................................................................... 3 credits
**Mathematics for Elementary Educators II**

This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability, and data analysis.

HIS 110CA ..................................................................... 3 credits
**U.S. History to 1865**

This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period. This course includes philosophies of the Articles of Confederation and the U.S. Constitution.

HIS 305CA ..................................................................... 3 credits
**California State History**

This course provides students with the political, economic, and social history of California. Topics include Pre-Columbian California; the early exploration and founding of California; the Gold Rush, the Railroad Era, and current challenges faced by the state.

ARTS 100CA ................................................................. 3 credits
**Introduction to the Visual and Performing Arts**

This course examines traditions and developments in the visual and performing arts genres including music, dance, theater, cinema, visual arts, and architecture. Students will be introduced to the elements of each genre, along with an overview of its historical development in Western European tradition.

ARTS 230CA ..................................................................... 3 credits
**Survey of the Visual Arts**

This course offers a foundation in the visual arts, elements, styles, and critical analysis for beginning art students. Emphasis is on identifying and explaining styles of visual arts from various cultures, eras, and places. The course focuses on the interpretation of art to understand meaning, and the ability to make critical judgment based on principles of art. Students learn to communicate
ideas and expression through their own creative work in a two-dimensional, three-dimensional, video, or other time-based media.

ARTS 340CA ................................................................. 3 credits

Exploration of Western Classical Music
This course will introduce students to Western European music from the Baroque period through the beginning of the 20th Century. The course will emphasize the history, musical development, and accomplishments of the Baroque, Classical, Romantic, and Early 20th Century periods in music. Students will learn to recognize form, style, texture, and characteristics of each period by studying a variety of composers and the representative masterpieces of each period.

HUM 375CA ................................................................. 3 credits

Integrative Studies
This course introduces students to the concept of integrative study, which involves connecting the liberal arts to multiple subject education and integrating disciplines through the curriculum development process. Emphasis is placed on thinking critically and creatively about the relationships that exist among the disciplines of language arts, art, physical education, math, social studies, and science.

PHL 310CA ................................................................. 3 credits

Critical Thinking Across Disciplines
This course in critical thinking helps students develop the ability to reason clearly and critically. It includes an introduction to inductive and deductive logic, fallacious reasoning, assumptions, and problem-solving techniques. Students will apply critical thinking skills in confirming knowledge, producing new ideas, research, and making connections across disciplines.

HPE 170CA ................................................................. 3 credits

Health and Physical Education
This course will help students understand the importance of a healthy lifestyle with the knowledge of human movement, motor skills, and learning. Students will explore the principles of exercise science and its impact on health, while developing self-confidence and self-worth. It will also help students achieve goals of lifelong health; understand growth and development; and utilize health-related information, products, and services.

Bachelor of Science in Education/Elementary Education (Indiana)

The following Bachelor of Science in Education/Elementary Education (BSED/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education/Elementary Education (BSED-E) is an undergraduate degree program preparing candidates for teacher licensure. The guiding philosophy of the BSED-E program is to provide students with the skills and knowledge that will allow them to become competent and effective educators. This program focuses on elementary student learning by developing the skills of the educator responsible for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-e.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

EED 499 ~ .................................................................4 credits
Elementary Student Teaching, Seminar II

The University reserves the right to modify the Required Course of Study.

Additional Admission Requirements for the BSED/E

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HSET examination with a passing score.
- Applicants must be currently employed or have access to a work environment.

Candidacy Status for the BSED/E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the prerequisite requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study credits of the program. To meet the Candidacy Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the BSED/E

- Completion of a minimum of 126 credits that include the following distribution:
  - A minimum of 48 upper division credits in the Required Program Category Preferred Sequence.
  - A minimum of 69 of the 126 credits must be in the general education areas approved by the University.
  - A minimum grade point average (GPA) of 2.5.
  - Satisfactory completion and uploading of the Teacher Work Sample (TWS).
  - Satisfactory completion of any required internship, student teaching, and/or practicum courses.
  - Complete courses within the sequence specified by course prerequisite requirements.
  - Meet state requirements as set forth by state of residency to receive state endorsement.
  - Complete Field Experience Observation Record (100 hours).
  - All students must complete the minimum number of credits required by their degree program.

- The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education

Academic Progression Requirements for the BSED/E

Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:

- Verification of content knowledge mastery prior to student teaching.
- Verification of immunization or TB test results (district specific)
- Verification of the completion of 100 hours of field experience

Many courses in the Required Course of Study build on or reinforce each other. To ensure that students have the requisite skills for specific coursework certain program areas must be satisfied before students can progress to others.

- All students must complete GEN 200 as their first course at the University.

Students must complete all General Education requirements prior to completion of EDU 390.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/E

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: EDU 390, EED 498, EED 499

- Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching.

Minimum Grade Requirements for the BSED/E

- Candidates must earn a "B" or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching.

- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/E

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 21 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214 requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.

The following courses in the Required Course of Study may not be waived: GEN 200, EDU 300, EDU 311, EDU 321, EDU 390, EED 416, EED 498, EED 499, RDG 415, SPE 300.

**General Education Requirements for the BSED/E**

A minimum of 69 of the 126 credits must be in the general education areas approved by the University. Candidates must complete one of the following Content Areas:
- English/Language Arts
- Mathematics
- Social Studies or Science

The general education requirements are outlined below:
- English/Language Arts Requirement(s) 12 credits
  - Must include 3 credits in Children's Literature (RDG 350 or ENG 290), 3 credits in Speech/Oral Expression, 3 credits in Composition/Writing and 3 credits in Communication/English Language Arts
- Mathematics Requirement(s) 12 credits
  - Must include MTH 213 and MTH 214
- Physical/Biological Science Requirement(s) 9 credits
  - Must include 3 credits in Physical Science, 3 credits in Biological Science and 3 credits in Earth Science
- Social Studies Requirement(s) 12 credits
  - Must include U.S. History, World Civilization and Cultural Diversity
- Fine Arts Requirement(s) 6 credits
  - Must include music and art
- Content Area Requirement(s) 18 credits
  - English/Language Arts, Mathematics, Science or Social Studies

All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.

**Field Experience for BSED/E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the BSED/E**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
- Student teaching must occur in a K-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings.
- Candidates wishing to do their student teaching in a single subject in grades 6-8 must provide the following prior to Student Teaching I:
  - Transcripts documenting of a minimum of 24 semester credits in their content area
  - Passing scores on the state mandated content exam
  - Candidates must earn a "B" or better in Elementary Education Seminar. If a candidate receives less than a "B" (B- or lower, or an incomplete grade), they must repeat the course.
  - Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
  - Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
  - Student teaching can only be repeated one time.
  - Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
  - Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
  - Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
  - Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
  - Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching
experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student
teaching through the University of Phoenix Online campus. A
select number of states do not participate in the University of Phoe-
nix Teacher Education program. Candidates must contact the
Online campus for a list of participating states and procedures for
student teaching placement.
• Candidates must successfully pass the Elementary Education
Seminar with a “B” or better.
• Candidates must enroll in the remaining Student Teaching
Seminars through the Online campus while completing their
student teaching experience.
• Candidates need to work directly with the Online campus to
complete the requirements for verification of placement.

**Institutional Recommendation for the BSED/E**

Candidates must meet all current state certification requirements
prior to being issued an Institutional Recommendation (IR, request
for state teaching credential).

Upon completion, candidates must complete a University of Phoe-
nix diploma application in order to receive a diploma and official
transcript. Candidates’ records will be analyzed to ensure that they
have met all academic and financial requirements of their pro-
grams. An IR cannot be completed until this process has fin-
ished. This will ensure that candidates have met all of their
obligations to the University before they receive an IR from the
University.

• Candidates must pass their state-mandated professional
knowledge exam.
• Candidates must provide verification of state and U.S.
Constitution coursework as required by the state certification
agency.
• Indiana candidates must provide verification of current CPR/
AED/Heimlich certification prior to being recommended for
their credential.

**Course Descriptions for the BSED/E**

**GEN 200** .................................................................3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the inten-
tional learner to communication, collaboration, information utiliza-
tion, critical thinking, problem solving and professional
competence and values. The course uses an interdisciplinary
approach for the learner to develop personal, academic strategies
in order to reach desired goals and achieve academic success.
EDU 300..............................................................................0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary
components of the Teacher Education Program. Students will be
introduced to the program’s progression and degree completion
requirements. Field Experience, E-Portfolio, Student Teaching,
Teacher Work Sample, and technology resources will be discussed.
EDU 301..............................................................................3 credits

**Foundations of Education**

This course introduces students to the teaching profession. Histori-
cal foundations, professionalism, the role of technology, and trends
and issues in education are introduced. Students will examine per-
sonal reasons for wanting to teach and will create a personal phi-
losophy of education.

EDU 311..............................................................................3 credits

**Models and Theories of Instruction**

This course focuses on the theoretical models that underlie teach-
ing and learning for all learners. Effective teaching strategies that
promote student learning will be examined. Various lesson plan
designs will be explored, and students will create an original les-
son plan.
EDU 321..............................................................................3 credits

**Classroom Management**

This course examines the strategies used in managing a positive
elementary classroom. Topics include models of discipline, motiva-
tion, disruptive students, classroom expectations and procedures,
parent communication, and materials management and record
keeping. Students will develop an individual classroom manage-
ment plan.

EDU 305..............................................................................3 credits

**Assessment in Elementary Education**

This course measures what assessment is and how formative and
summative assessments are used in the classroom. The course will
include construction of objective and performance assessments,
topics on reliability and validity, understanding the uses of stan-
ardized assessments, and the framework of assessment.

RDG 420..............................................................................3 credits

**Elementary Methods - Reading/Language Arts**

This course focuses on current research, theory, methods, and state
standards related to reading instruction. It provides students with
the background knowledge in language arts necessary to prepare
comprehensive standards-based lesson plans and integrated units
of instruction. Effective instructional and assessment techniques
are modeled.

RDG 415..............................................................................3 credits

**Diagnosis and Remediation of Reading Difficulties**

This course addresses the use of reading assessments to determine
classroom intervention and instructional strategies. It provides
foundational information about stages of reading acquisition, fac-
tors that impact reading success or failure, and the nature of read-
ing difficulties. This information serves as a context for learning
about the selection, administration, and interpretation of formal
and informal classroom assessments for the purposes of screening,
diagnosing difficulties, monitoring progress, and evaluating
instruction. In addition, a final diagnostic and instructional recom-
mandations report will be developed based on student test data
provided.

SPE 300..............................................................................3 credits

**Orientation to the Exceptional Child**

This course provides an overview of the categories of exception-
ality for elementary age students with special needs. The course
focuses on differentiated methods and techniques used for the
identification, assessment, and instruction of diverse populations.
Historical perspectives and information related to special educa-
tion law, and current policies and practices are examined.
EED 416.................................................................................... 3 credits
Elementary Methods - Mathematics
This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students' problem-solving skills.

EED 420.................................................................................... 3 credits
Elementary Methods - Science
This course focuses on methodology and assessment strategies that enhance learning in science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of science, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.

EED 430.................................................................................... 3 credits
Elementary Methods - Health/PE
This course focuses on methodology and assessment strategies that enhance learning in health and physical education. The focus of part two will be service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on the desire and reasons for joining the profession.

EED 435.................................................................................... 3 credits
Elementary Methods - Social Studies
This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the integration of physical education and health with other content areas are explored.

EED 440.................................................................................... 3 credits
Elementary Methods - Fine Arts
This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

EDU 390 .......................................................... 1 credit
Elementary Education Seminar
This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.

EED 498 .......................................................... 4 credits
Elementary Student Teaching, Seminar I
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

EED 499 .......................................................... 4 credits
Elementary Student Teaching, Seminar II
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

ENG 290 .......................................................... 3 credits
Children’s Literature
This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied as well as the application of children’s literature to instruction and assessment in reading. Methods for integrating the use of children’s literature in all content areas will be examined.

MTH 213 .......................................................... 3 credits
Mathematics for Elementary Educators I
This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.

MTH 214 .......................................................... 3 credits
Math for Elementary Teachers II
This is the second course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.

SOC 315 .......................................................... 3 credits
Cultural Diversity
This course focuses on the issues, challenges and opportunities presented by U.S. population diversity. Emphasis is placed on workplace issues related to employment equity in terms of gender, race/ethnicity, socioeconomic class and cultural background.

HIS 301 .......................................................... 3 credits
United States Constitution
This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution.
the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.

**Bachelor of Science in Education/Elementary Education**

The following Bachelor of Science in Education/Elementary Education (BSED/E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The BSED/E-EPP is an undergraduate degree program preparing candidates for teacher licensure. The BSED/E-EPP program is intended to afford candidates the opportunity to develop the skills and knowledge that will allow them to become competent and effective educators. This program focuses on improving elementary student learning through coursework that focuses on instructional strategies, assessment, and the integration of instructional technology. Throughout the program, students are required to complete verified field experiences covering a variety of developmental levels. The focus of each field experience will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. Student teaching is an integral component of the program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty supervisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-e. Courses requiring prerequisites are identified by a ~ symbol following the course number.

  Elementary Student Teaching, Seminar I
- EED 499 .................................................................4 credits
  Elementary Student Teaching, Seminar II

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the BSED/E**

All applicants are expected to meet the following admissions requirements:

- Successful completion of MCCD Education Pathway program requirements
- Applicants must be currently employed or have access to a work environment.
- Verification of fingerprint clearance
- Demonstration of basic skills proficiency
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

**Degree Requirements for the BSED/E**

- Completion of a minimum of 120 credits that include the following distribution:
  - General Education - 45 credits
  - Education Preparation Coursework - 37 credits
  - Required Course of Study - 38 credits
- A minimum of 82 of the 120 credits must be in transfer from MCCD Education Pathway Program.
• A minimum of 38 upper division credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 2.5.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, practicum courses and/or alternative clinical practice.
• Complete course within the sequence specified by course prerequisite requirements.
• Complete Field Experience Observation Record (30-40 hours).
• All Students must complete the minimum number of credits required by their degree program.
• The diploma awarded for this program will read as: Bachelor of Science in Education Elementary Education

Academic Progression Requirements for the BSED/E
Candidates must provide verification of content knowledge mastery prior to beginning student teaching. Candidates must provide:
• Passing scores on the designated state content knowledge exam.
• Verification of immunization or TB test results (district specific)
• Verification of the completion of 30-40 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/E
• A candidate must earn a grade of “B” or better in the following courses in order to student teach: EED 498, EED 499. Grades of ‘I’ and “B-” are not accepted. Students who fail to receive a minimum grade of “B” in any of the following courses will be scholastically disqualified from the University.
• Candidates must earn a “B” or better in Elementary Student Teaching I & II in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College Chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/E
Students must meet the established University residency requirement for degree conferral. The University requires that 38 credits must be completed at University of Phoenix. Students in this program may not waive any credits from the required course of study.

General Education Requirements for the BSED/E
A minimum of 45 of the 120 credits must be in the general education areas approved by the University.

English/Language Arts Requirement(s) 12 credits
Mathematics Requirement(s) 12 credits
Physical/Biological Science Requirement(s) 6 credits
Social Studies Requirement(s) 9 credits
Fine Arts Requirement(s) 3 credits
Humanities Requirement(s) 3 credits

Field Experience for BSED/E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the BSED/E
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Student teaching is the culminating experience of the Bachelor of Science in Education program. Students must complete prerequisites leading up to Student Teaching Seminar I prior to beginning the student teaching experience.
• Student teaching must occur in a 1-8 self-contained classroom setting under the supervision of a certified teacher. This applies to self-contained settings only, not departmentalized settings.
• Candidates wishing to do their student teaching in a single subject in grades 6 - 8 must provide the following prior to Student Teaching I:
  • Transcripts documenting of a minimum of 24 semester credits in their content area
  • Passing scores on the state mandated content exam
• Candidates must earn a “B” or better in Elementary Education Seminar. If a candidate receives less than a “B” (B- or lower, or an incomplete grade), they must repeat the course.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Candidates must be enrolled in Student Teaching Seminar I and II during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these seminars.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
• Candidates must student teach in a self-contained elementary setting. Candidates may not student teach in special education.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching for the BSED/E
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates must complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must successfully pass the Elementary Education Seminar with a "B" or better.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the BSED/E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Institutional Recommendation for the BSED/E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their program. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Course Descriptions for the BSED/E
GEN 200 ....................................................................................3 credits
Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

EDU 340 ....................................................................................0 credits
Orientation to Teacher Education
This 1-week orientation course introduces the learner to the Program, University, and College resources that foster academic strategies for success. Students will also discuss program requirements and review coursework; which includes a field experience component.

SPE 350 ....................................................................................3 credits
Foundations of Response to Intervention (RTI)
This course provides students with the foundational concepts of Response to Intervention (RTI). Participants will explore the background, history and principles of RTI to include components of the program. An emphasis will be placed on the roles school personnel play in data collection, implementation, and intervention.

CUR 506 ....................................................................................3 credits
Theories and Best Practices of Curriculum and Instruction
This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.

CUR 545 ....................................................................................3 credits
Using Technology for Teaching and Learning
Learners evaluate technology use and technology integration for teaching and learning while considering the value of current technologies and tools as part of an interactive experience in a 21st century classroom. Learners will review the considerations and responsibilities of using and maintaining technology in today’s schools, including safety, ethics, resources, and financial needs. Using the knowledge gained in this course, learners will determine how they will advocate and be change-agents for technology integration within their districts, schools, classrooms, and the community.

CUR 515 ....................................................................................3 credits
Critical Thinking and Innovative Skills
Learners in this course explore the development and application of critical thinking skills for all academic content areas in elementary, middle school, and high school settings. Participants identify the educational needs of students by exploring current instructional theories, models, and strategies; and state, local, and national standards as they relate to developing critical thinking skills in classroom teaching. Prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
Implementing the Common Core in English Language Arts
This course focuses on strategies for implementing and assessing Common Core State Standards in English/Language Arts in the classroom. Special attention is paid to the anchor standards, determining text complexity, literacy across the genres, integrating technology and differentiating to meet the needs of diverse learners.

EDU 499 ................................................................................... 4 credits
Elementary Student Teaching, Seminar II
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Bachelor of Science in Education/Early Childhood Education
The following Bachelor of Science in Education/Early Childhood Education (BSED/ECH) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bachelor of Science in Education (BSED) with a specialization in Early Childhood Education is an undergraduate degree program preparing candidates for teacher licensure in the field of early childhood (birth to age eight/grade 3). The curriculum is aligned with the Interstate Teaching Assessment and Support Consortium’s (InTASC) model core teaching standards and the National Association for the Education of Young Children (NAEYC) standards. The curriculum includes common core standards, child development and learning, building family and community relations, cultural diversity, assessment to support young children and families, strong content knowledge to build developmentally appropriate and meaningful curriculum and experiences, and professionalism and ethics of educators. Throughout the program, students are required to complete verified field experiences and student teaching.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bsed-ech.

Early Childhood Student Teaching (K through Age 8/Grade 3)

The University reserves the right to modify the required course of Study.

**General Information for the BSED/ECH**
- First time attendees with the University who indicate less than 24 previous college credits (as recognized by the university) on the admission application and who meet the requirements for “Admitted with Condition” status, will be admitted with condition to this program according to the risk free period policy.
- Prior Learning Assessment and credits earned through National Testing Programs are excluded from the calculation of previous college credits.
- Applicants who have not previously completed an associate degree at a regionally or approved nationally accredited institution must complete a Pathway Diagnostic before enrolling into their first credit-bearing course. The results of the diagnostic will determine placement in the Accelerated Pathway (A Track) or standard pathway (B Track).
- Students who have completed an associate degree at a regionally or nationally accredited institution are not required to complete the Pathway Diagnostic and will be placed in the Accelerated Pathway (A Track).

**Additional Admission Requirements for the BSED/ECH**
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

**Candidacy Status for the BSED/ECH**
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 Required Course of Study (Core) credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the BSED/ECH**
- Completion of a minimum of 120 credits that include the following distribution:
  - General Education - 57 credits
  - Required Course of Study- 60 credits
  - Electives - 3 credits
  - A minimum of 48 upper division credits.
  - A minimum grade point average (GPA) of 2.5.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required student teaching and/or alternative clinical practice.
• Meet state requirements as set forth by state of residency to receive state endorsement.
• Complete Field Experience Observation Record (100 hours).
• The diploma awarded for this program will read as: Bachelor of Science in Education
  Early Childhood Education
• Students who have graduated from any BS Early Childhood Education program leading to initial teacher certification are not eligible for admission to any MAED/TED programs.

Academic Progression Requirements for the BSED/ECH
• Students placed in the Accelerated Pathway (A Track) are required to successfully complete GEN 201 as the first course in their program.
• Standard pathway (B Track) students must satisfy all three (3) courses from the standard pathway prior to enrolling in any other course: GEN 127, ENG 147, HUM 115.
• With the exception of GEN 147, GEN 127, GEN 201, and HUM 115, General Education and Elective course requirements may be satisfied by any of the following means:
  • University of Phoenix coursework,
  • Regionally or nationally accredited coursework (C- or higher grade),
  • University of Phoenix Prior Learning Assessment, (30 credit limit on experiential learning; 30 credit limit on professional training),
  • National Testing Programs, and
  • ACE evaluated Military credits.
• Concurrent enrollment is prohibited during any of the courses in the standard pathway (B Track).
• Accelerated Pathway (A Track) students may not enroll in GEN 127, ENG 147, or HUM 115 to satisfy programmatic prerequisites, general education or elective requirements.
• Students who wish to pursue an alternate pathway must have an approved appeal on file prior to posting positive attendance in class.
• Continuously enrolled students will not be required to complete the Pathway Diagnostic upon a program/program version change and will be placed in the Accelerated Pathway (A Track).
• Students who previously completed GEN 101, GEN 195, GEN 200, US 101, or GEN 300 and choose to transition to the standard pathway (B Track) are not required to take GEN 127.
• Students may not complete any of the standard pathway (B Track) courses via Directed Study.
• All undergraduate students must satisfy math and English proficiencies prior to enrolling in any course that requires math or English as a prerequisite. A student may not enroll in a course requiring math and/or English as a prerequisite unless the proficiency requirement has been fulfilled. Math and English proficiencies may be satisfied in one of the following ways:
  • Successful completion of University of Phoenix math and English courses designated as applicable to the proficiency requirement
  • Comparable regionally or approved nationally accredited transfer coursework that meets the following requirements:
    - Completed within five years of enrollment
    - Grade of C- or better
    - At least 2.67 semester credits
  • Eligible to receive general education credits
  • Achieve a passing score (as established by the American Council on Education) on a comparable National Testing Program (NTP) exam completed within five years of enrollment.
• Students in the state of Florida who have passed the CLAST or FTCE-GK exam will have satisfied English proficiency
• Demonstrate competency by meeting minimum passing score on University of Phoenix approved placement exam.
• Successful completion of basic skills exam
• Candidates must provide verification of content knowledge mastered prior to beginning student teaching. Candidates must provide:
  • Passing scores on the designated state content knowledge exam.
  • Verification of immunization or TB test results (district specific)
  • Verification of the completion of 100 hours of field experience
• Candidates residing in the state of Idaho must provide verification of the completion of twenty (20) required semester credits in one of the endorsement areas below prior to student teaching.
  • Social Studies (This may include areas such as American Government, Political Science, Economics, Geography, History, Psychology, Sociology, and Sociology/Anthropology).
  • English/Language Arts (This may include areas such as Communication, English, English as a New Language, Journalism, Literacy, Writing and Foreign Language).
  • Mathematics (This may include areas such as Mathematics, Geometry, Linear Algebra, Discrete Mathematics, Probability and Statistics, Trigonometry, and Calculus).
  • Science (This may include areas such as Biological Science, Chemistry, Earth Science, Geology, Natural Science, and Physical Science).
• Students must complete all General Education requirements prior to completion of ECH 390.
• Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the BSED/ECH
• A candidate must earn a grade of "B" or better in the following courses in order to progress in future coursework. Grades of "I" and "P" are not accepted. Students who do not receive a B- or better will be placed on Scholastic Disqualification and will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan: ECH 390, ECH 498, ECH 499
University of Phoenix, 2014-2015

- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the BSED/ECH

- Students must meet the established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
- Students in this program may waive a maximum of 30 credits from their required course of study on the basis of regionally accredited transferable coursework.
- Upon the successful completion of the Child Development Associate (CDA) candidates transferring to University of Phoenix may waive 21 credits using the following coursework in the BSEd/ECH program:
  - 3 credits in social sciences
  - 9 credits in additional liberal arts
  - ECH 301: Foundations of Early Childhood (3 credits)
  - ECH 205: Growth and Development (3 credits)
  - ECH 321: Developmentally Effective Learning Environments (3 credits)
- Arizona residents may waive SEI 300 and/or SEI 301 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:
  - Arizona Provisional SEI Endorsement (SEI/300)
  - Arizona Full SEI Endorsement (SEI/300 and SEI/301)
  - Arizona English as a Second Language Endorsement
  - Arizona Bilingual Endorsement
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to thirty (30) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill Associate of Arts degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed and transcripted from a regionally accredited institution with which the University of Phoenix has an approved articulation agreement.
  - The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
  - The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.
- Unless otherwise noted, no timeframe or minimum grade (other than a passing grade) is required when waiving the mandatory General Education courses (MTH 213, MTH 214, SOC 315, HIS 301 or HIS 110). Students may use a 2 semester credit Constitution course to satisfy the HIS 301 or HIS 110 constitution requirement, or a 2 semester credit Education Math course to satisfy the MTH 213 and MTH 214 requirements, but will be required to make up the credit with other Liberal Arts General Education credit to meet the minimum requirements.
- The following courses in the Required Course of Study may not be waived: ECH 211, ECH 300, ECH 302, ECH 321, ECH 390, ECH 416, ECH 498, ECH 499, RDG 416

General Education Requirements for the BSED/ECH

A minimum of 57 of the 120 credits must be in the general education areas approved by the University.

English/Language Arts Requirement(s) 12 credits
B Track must include: HUM 115 and ENG 147
Mathematics Requirement(s) 12 credits
6 credits must include MTH 213 and MTH 214
Physical/Biological Science Requirement(s) 6 credits
Social Studies Requirement(s) 9 credits
3 credits must include ETH 120
3 credits must include HIS 301 or HIS 110
Fine Arts Requirement(s) 6 credits
Art, music, drama or dance
Humanities Requirement(s) 3 credits
Additional Liberal Arts Requirement(s) 9 credits
All undergraduate students are required to complete the minimum general education credits required by their program version. Students who lack .67 or fewer general education credits may use interdisciplinary or elective credits to waive the balance. Students must use interdisciplinary or elective credits to waive the general education balance in order to complete the minimum general education credits required for their program.
Field Experience for BSED/ECH

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through grade eight. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the BSED/ECH

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Student teaching is the culminating experience of the Bachelor of Science in Early Childhood program. Students must complete prerequisites leading up to Student Teaching prior to beginning the student teaching experience.
- Candidates must earn a “B” or better in Early Childhood Education Seminar. If a candidate receives less than a “B” (B- or lower, or an incomplete grade), they must repeat the course.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Candidates must be enrolled in Early Childhood Student Teaching courses during their student teaching experience. If a candidate chooses to postpone student teaching they must postpone their enrollment in these courses.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates that do not successfully complete the second student teaching program will be removed from the program and are not eligible for re-entry.
- Candidates must student teach in a self-contained early childhood setting. Candidates may not student teach in special education.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must successfully pass the Early Childhood Seminar with a “B” or better.
- Candidates must enroll in the remaining Student Teaching courses through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the BSED/ECH

- Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
- Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
- Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Institutional Recommendation for the BSED/ECH

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Course Descriptions for the BSED/ECH

GEN 201 (A Track) ................................................................. 3 credits

Foundations for University Success

This course transitions students through the foundations of study at University of Phoenix. Students develop personal strategies for achieving educational goals; and develop skills in critical thinking,
Collaboration, and communication.

GEN 127 (B Track) .................................................................3 credits

University Studies for Success

This is an academic course focusing on the essential information, skills, tools, and techniques necessary for academic success and personal effectiveness at University of Phoenix. The course develops and applies academic standards, practical knowledge, and study skills immediately relevant to first-year university students.

ECH 300 ..................................................................................0 credits

Orientation to Early Childhood Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program for Early Childhood. Students will be introduced to the program's progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

ECH 301 ..................................................................................3 credits

Foundations of Early Childhood Education

This course provides an overview of early childhood education for children, birth through age 8. Topics include theories and history of early childhood education, play theories, program types and models, and public policy trends. The course examines the significance of developmentally effective learning experiences throughout early childhood programs.

EDU 215 ..................................................................................3 credits

Ethics and Social Responsibility in Education

This course introduces learners to the concepts of ethical reasoning and professional ethics in teaching. Learners will explore how their personal values and dispositions—whether inherited through culture and tradition or consciously adopted—interact with professional codes of ethics and ethical decision-making. Learners will examine ethical theories and the function of ethics in teaching. Ethical dilemmas in the education workplace will also be investigated.

ECH 418 ..................................................................................3 credits

Community and Family Engagement

This course focuses on establishing and maintaining collaborative relationships among families, early childhood learning environments, and communities to support student development and achievement. Candidates explore and discuss issues related to family diversity, relationship building, and community involvement. Emphasis will be placed on creating positive family and community engagement as well as strengthening the connection between home and school.

ECH 211 ..................................................................................3 credits

Instructional Strategies for Early Childhood Education

This course focuses on the theoretical models that underlie teaching and learning in the early childhood setting. Students examine appropriate methods for teaching all young children, explore lesson plan designs, analyze the most effective, research-based teaching strategies to promote student learning, and develop a lesson plan.

ECH 321 ..................................................................................3 credits

Developmentally Effective Learning Environments

This course examines developmentally-effective strategies used in implementing and managing a positive and active learning environment within the framework of a diverse early childhood population. Topics include models of classroom management, establishing expectations and procedures, motivating children, family communication, managing off-task behaviors, technology integration, and materials management and record keeping. Students will develop an individual classroom management plan for an early childhood setting.

ECH 205 ..................................................................................3 credits

Early Childhood Growth and Development

This course examines the theories, concepts, and trends related to early childhood growth and development from prenatal development through the early school years. It examines the physical, social, emotional, cognitive, and language development of children from birth through age 8. The course focuses on defining the various stages as they impact instructional practices and decisions in the context of the early learning environment.

ECH 400 ..................................................................................3 credits

Assessment and Evaluation in Early Childhood

This course provides exposure to a variety of assessment techniques in early childhood education, including children with special needs. There is a focus on structured observations, use of behavioral rating scales, psycho-educational screening tests, and assessment of parent-child interactions. Formal and informal parent contacts, interviewing techniques, the use of technology in the assessment process, and referrals to school and community resources are also explored. Emphasis is placed on developmental and differentiated assessment strategies for children birth through age eight.

RDG 351 ..................................................................................3 credits

Early Childhood Literacy Development

This course focuses on creating an environment in the early childhood setting that promotes literacy skill development. This course will help teachers create developmentally effective learning environments that promote listening, speaking, reading, and writing skills.

RDG 416 ..................................................................................3 credits

Methods of Teaching in Early Childhood Language and Literacy

This course focuses on children’s language and literacy development from birth to age 8. Students examine theories of language development, including theories of second language acquisition and the needs of English Language Learners. They also explore strategies for engaging children in integrated listening, speaking, reading, and writing experiences. Integration of content area standards and development of hands-on learning experiences are emphasized. Additionally, developmentally-effective assessments are discussed as a means of informing instruction.

SEI 300 ..................................................................................3 credits

Structured English Immersion

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELLs), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and ELL’s acquire English.

SEI 301 ..................................................................................3 credits

Advanced Structured English Immersion Methods

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language
Exceptionalities of the Young Child

This course provides an overview of the exceptional young child in early childhood education who may require accommodations and adaptations. The course focuses on developmentally-effective methods and techniques used for the identification, assessment, and instruction of children with special needs from birth to age 8. Legal structures, public policy, and information related to current practices serving exceptional young children in early childhood are also examined.

Methods of Teaching in Early Childhood: Math

This course focuses on methodology and assessment strategies that enhance young children’s learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of young children as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing children’s problem-solving skills.

Methods of Teaching in Early Childhood: Science

This course focuses on understanding and using developmentally effective practices to teach and to integrate science concepts and skills in early childhood education (birth through age 8). Developing meaningful curricular content, modifications, hands-on learning experiences, and integration of early childhood content area standards are explored. A foundation in developmentally effective teaching and assessment of the content area is provided.

Methods of Teaching in Early Childhood: Social Studies

This course provides a foundation in content and methodology for the teaching of social studies in early childhood education (birth through age 8). Developing meaningful curricular content, hands-on learning experiences, integration of early childhood content area standards, and the impact of technology are explored. A foundation in developmentally-effective teaching and assessment of the content area is provided.

Methods of Teaching in Early Childhood: Arts & Music

This course focuses on understanding and using the visual and performing arts to promote growth and development in early childhood education. Emphasis is placed on developmentally-effective practices and integration of art, music, dance, and drama across the curriculum. Assessment, modifications, accommodations, culture, and family involvement through the arts are also explored. A foundation of effective teaching strategies and best practices in early childhood education are provided.
ETH 120 ................................................................. 3 credits
Cultural Diversity in the United States
This course is designed to educate students about issues of race, ethnicity, gender, disability and other diversity issues in the United States.

HIS 301 ................................................................. 3 credits
United States Constitution
This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution known as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.

HIS 110 ................................................................. 3 credits
US History to 1865
This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.
GRADUATE PROGRAMS

Admission Procedures

Application Process

Working adults seeking admission to the University’s graduate programs in business, management, information systems, nursing, counseling, or education begin the admission process by submitting a complete and accurate application. An application which is later verified to contain incomplete, false or misleading information may be grounds for dismissal and administrative withdrawal. Once the application has been received by the University, applicants are responsible for ensuring the completion of their admission file. No applicant will be formally accepted for admission until their admission file is complete and officially evaluated. Formal written notice is provided by the central Office of Admissions & Evaluation upon formal acceptance.

The University will advise students which admission file documents are required in order to begin a program of study. Students may attend their first four courses under Registered status. Students, however, must submit all admission documentation and gain unconditional admission status prior to the start of their fifth course. Students failing to submit all documentation prior to the end of the required time frame will be administratively withdrawn until formally admitted by the central Office of Admissions & Evaluation. The University cannot guarantee that a student who begins course work under Registered status will be admitted to the degree program.

Applications of individuals who have not gained admission or enrolled in the University will be kept on file for one year. After that time, the applicant is required to submit a new application and material. A second application fee (if applicable) is not required.

Transcript Requests of Other Institutions

Because institutions vary in the time they take to respond to transcript requests, all transcripts should be requested immediately upon submission of an application and application fee (if applicable). University staff will process all requests for required transcripts on behalf of the student. However, it remains the student’s responsibility to ensure that all transcripts are submitted to the University. The student must sign a “Transcript Request Form” for each transcript being requested from educational institutions. The University’s application fee (if applicable) covers the student’s expense for requesting official transcripts.

General Graduate International Admissions Information

Students applying to the University with foreign academic records or credentials may have additional requirements that must be met in order to enroll in courses or gain admission due to the differences in educational systems and document requirements.

Graduate applicants relying on educational credentials from an institution outside of the United States to meet admission requirements may enroll in University of Phoenix courses prior to the student being officially admitted only if they meet all the following requirements:

1. If residing in the United States, have an appropriate immigrant or nonimmigrant status which does not prohibit educational studies
2. Satisfied the English language proficiency requirements through one of the approved methods or exceptions if not meeting English Language Proficiency requirements as outlined in the policy for their chosen program, and
3. Graduate applicants must have a professional evaluation report (or pre-eval completed by the Office of Admissions and Records from a country that the Office of Admissions & Records evaluates in-house) indicating that the student has the appropriate academic background to meet the admission requirements, and
4. All other program specific admission requirements must be met.

An applicant who has earned an undergraduate degree, or other transfer credit, from an institution outside of the United States, but has earned a Master’s degree from a regionally accredited or approved nationally accredited institution is eligible to enroll in the University at the graduate level provided all program specific policies have been met by the previous credential earned without requiring an evaluation of the previous international credentials.

For applicants with academic records from colleges or universities earned outside of the United States, the University will accept copies of academic records issued from international institutions to conduct a pre-evaluation to determine comparability of previous academic studies for unofficial placement and advisement purposes. Internal evaluation practices utilized by the central Office of Admissions and Evaluation follow standards and practices defined by the National Association of Foreign Student Administrators (NAFSA) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). Certain programs that lead to certification may require students to have an evaluation performed by an external evaluation agency that is approved by both the University and the state in which the student seeks certification. Limitations exist on the countries in which internal pre-evaluation, verification or evaluation services can be conducted through the Central Office of Admissions and Evaluation and campus personnel should be contacted for a list of current services.

Students using foreign academic records to satisfy an admission requirement will not be eligible to attend classes prior to the University receiving a favorable evaluation from an approved credentials evaluation service or evaluation performed by the Central Office of Admissions & Evaluation. For official admission and transfer credit evaluation purposes previous academic credentials earned outside of the United States must meet the University’s verification standards prior to an official admission or transfer credit decision being rendered. Verification of previous academic credentials earned outside of the United States can be satisfied by the following methods.

1. Receipt and verification of official academic credentials issued directly to University of Phoenix by the student’s previous institution, or
2. Receipt and verification of official academic credentials held in possession of the student as the official record of academic studies conducted in the student’s specific country, or
3. Receipt and verification of official correspondence issued directly to University of Phoenix by the student’s previous institution indicating copies of academic credentials and/or level study is valid, or
4. Receipt of an official professional evaluation issued directly from a professional evaluation agency that is approved to satisfy verification requirements as indicated by the Office of Admissions and
Graduate Admission Requirements

All academic credentials sent to University of Phoenix will become the possession of University of Phoenix and will not be returned to students unless prior approval was granted by the Office of Admission and Records.

If documents are issued to University of Phoenix in a language other than English, the student will be required to obtain an official translation and submit it to University of Phoenix. Translations must be completed/verified by an official translation service, a foreign language department of an accredited college or university, the country’s embassy/consulate or by the Office of Admission and Records at University of Phoenix if translation services are provided for that specific language.

Non–Native Speakers of English

An applicant who does not have appropriate English language experience in an academic environment will not be eligible to attend classes under Registered status. Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission. Specific English language proficiency policies and requirements are listed in the admission requirements section.

Admission Appeal Process

Any applicant who has been denied admission to the University has the right to appeal the decision to the Student Appeals Center. All appeals, including any evidence to be considered, must be submitted in writing to the Student Appeals Center. The written appeal may consist of a letter of explanation for academic deficiencies, lack of experience, and any other factors which might be of benefit when the Student Appeals Center conducts its review. It is incumbent upon the applicant to submit all relevant documents and statements of support attached to the appeal letter to the Student Appeals Center. The Student Appeals Center will carefully review all materials submitted, and the applicant will be notified of the outcome of the appeal by campus personnel.

Graduate Admission Requirements

For graduate education and doctoral admission requirements please refer to the education and doctoral section(s) of the catalog. Most graduate programs have additional admission requirements listed within the program specific information. All applicants are expected to meet the following admission requirements:

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet one of the following exceptions in order to meet the English Language Proficiency Requirement:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English.
  - achieved a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
   - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.
- The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:
  - The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.
  - The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
  - The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
  - The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
- Applicants who reside in the United States must meet one of the following requirements:
  - Be a legal resident of the United States
  - Have been granted permanent residency
  - Have a valid visa that does not prohibit educational studies
  - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  - Have been granted asylum or refugee status.
- Applicants who reside in Canada must meet one of the following requirements:
  - Be a legal resident of Canada
• Be a landed immigrant
• Have a valid visa that does not prohibit educational studies
• Students may not receive a graduate degree and a graduate-level certificate in the same area of focus.
• A signed Enrollment/Disclosure Agreement.
• Completion of any state-specific required documents or forms.
• Applicants who have been expelled from other institutions are not eligible for admission to University of Phoenix.
• Students who have been expelled from University of Phoenix are not eligible for readmission to University of Phoenix. No appeals will be accepted.

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.
• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

**Exemptions from the MMR immunization requirement may be granted for the following reasons:**

• A U.S. licensed physician (M.D. or D.O.) must state in writing that giving a specific vaccine would endanger the student’s life or health, and specify the reason based on valid medical contraindications.
• The physician must state the length of time during which the vaccine would endanger the student’s health or life.
• The exemption certification must be signed by the physician on the physician’s printed stationery.
• A religious exemption may be granted if the student signs a statement certifying that the student’s religious beliefs prohibit the practice of immunization.
• If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.
• A copy of each exemption must be kept in the student’s health record at school.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

**Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:**

• The student was born before January 1, 1957 (applicable to MMR vaccine only).
• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
• The student has submitted a statement that immunization is contrary to his/her religious beliefs.
• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.

• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

**Estimated Program Length**

To determine the number of months it takes to complete the program as designed, add all the credit hours in a given program, divide the result by 24 credit hours and then multiply the result by the number of months in the academic year for the degree (Associates = 9 months in an academic year, Bachelors = 10 months in an academic year, Masters/Doctoral = 12 months in an academic year, Undergraduate Certificate = 10 months in an academic year and Graduate Certificate = 12 months in an academic year). Example: Associate program is 60 credits. Divide 60 credit hours by 24 credit hours (60/24 = 2.5). Then multiply the result by the number of months in the academic year for the degree (2.5 x 9 months = 22.5 months).
COLLEGE OF CRIMINAL JUSTICE AND SECURITY

The College of Criminal Justice and Security prepares students for professional and management-related career opportunities in criminal justice and security by applying a multidisciplinary comparative management approach to criminal justice theory and application. Students will be prepared to understand, explain, and predict criminal justice and security concepts and to contribute to the development of public and private policy within communities.

Our mission is to enhance the academic preparation and professionalism of the nation’s criminal justice and security communities through access to quality criminal justice and security higher education. The College of Criminal Justice and Security provides innovative, respected, relevant, affordable, and student-focused programs, designed to prepare students for opportunities of service and leadership in a diverse, global society. Curriculum is delivered by experts who relate both theory and practice in this evolving field. The College has earned respect through continuous improvement driven by a combination of innovation in the field and empirical evidence of learning outcomes, all of which is accomplished through the integrity, teamwork, and creativity of college faculty and staff. We are a respected criminal justice and security college, known for its distinctive strengths in providing superior and relevant educational programs to its students. It is the student’s responsibility to ascertain whether their past history and conduct may prohibit their placement or participation in the criminal justice and security field. The University makes no guarantee or representation that the student will meet all qualifications for such employment or licensure for the occupation or profession related to the chosen program.

Master of Science/Administration of Justice and Security

The following Master of Science/Administration of Justice and Security (MS/AJS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science/Administration of Justice and Security degree provides the required knowledge for the student to develop competence in administering criminal justice or security programs. While distinctions between the roles of justice and security organizations are understood, the degree emphasizes an understanding of administrative responsibilities common to both disciplines. The value of cooperative interaction is also addressed. The degree provides the student with administrative program development and problem solving skills in preparation for promotional or transitional opportunities in the management of police, corrections, security or court operations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms-ajs.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MS/AJS

All applicants are expected to meet the following admissions requirements:
• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

• A minimum of three (3) years of full-time, post-high school professional work experience.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

• Signed Criminal Conviction Prohibition Acknowledgement Form.

Degree Requirements for the MS/AJS

• Completion of a minimum of 37 credits.

• A minimum program grade point average (GPA) of 3.0.

• The diploma awarded for this program will read as: Master of Science Administration of Justice and Security

Residency Requirements and Course Waivers for the MS/AJS

• Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 28 credits in the Required Course of Study, must be completed at University of Phoenix.

• Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

• In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of 'B' (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

• The following courses in the Required Course of Study may not be waived: AJS 595

Course Descriptions for the MS/AJS

AJS 501 ..............................................................................................................1 credit
Introduction to Graduate Study in Criminal Justice and Security
This course provides new graduate students in the college with an introduction to strategies for success within the university’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.

AJS 502 ..............................................................................................................3 credits
Survey of Justice and Security
This is a survey course that introduces policing, the court systems, corrections, and private security and how they relate to each other. Challenges in these relationships are also presented.

AJS 512 ..............................................................................................................3 credits
Organizational Administration in Justice and Security
This course explores the various elements of organizational administration, behavior, and management in criminal justice organizations and provides the student with an understanding of individual and group dynamics, problem solving concepts, and administrative processes associated with organizational behavior and structures that exist in the criminal justice system.

AJS 522 ..............................................................................................................3 credits
Finance and Budgeting in Justice and Security
This course introduces fundamental concepts of using financial tools and analysis for effective managerial decision making in criminal justice and security. Topics include the role of the financial management in the criminal justice organization, concepts and principles underlying financial practices, and operational planning and budgeting.

AJS 532 ..............................................................................................................3 credits
Ethics in Justice and Security
This course will examine the theoretical and philosophical basis of ethics and the standards of professional conduct and leadership applicable to justice and security agencies. Applicable case studies will be used as well as contemporary situations in ethics.

AJS 542 ..............................................................................................................3 credits
Criminological Theory
This is an advanced course in theories of crime causation, including classical, biological, psychological, sociological, and social-psychological approaches. Victimology, to include victimization statistics, victimogenesis, and the prevention of victimization, is included.

AJS 552 ..............................................................................................................3 credits
Legal Issues in Justice and Security
This course examines the competing legal and social issues that influence the actions of public officials, security personnel, and private citizens with respect to the provision of law enforcement, safety, and security services for various elements of society. The
Potential conflicts between public policy and civil rights will be discussed.

**AJS 562** .................................................................................. 3 credits

### Organizational Risk and Incident Management
This course provides an overview of the relationship between risk assessment and consequence management within the context of justice and security organizations. Specifically, it will examine the factors that go into mitigating risk and when these measures fail, how critical incident response can maintain order. Topics include defining risk, planning factors for critical incident response, lessons learned.

**AJS 572** .................................................................................. 3 credits

### Cybercrimes and Information Systems Security
This course provides an overview of the nature of criminal activity that is facilitated through or that targets information systems. The course also reviews security measures that are designed to protect the software, hardware and data associated with information systems.

**AJS 582** .................................................................................. 3 credits

### Public Policy Issues
This course addresses the development and influence of public policy with respect to specific justice and security issues facing the American society.

**AJS 585** .................................................................................. 3 credits

### Concepts of Physical and Personal Protection
This course provides the student with an understanding of contemporary concepts of physical facility security and personal protection.

**AJS 592** .................................................................................. 3 credits

### Forensic Science and Psychological Profiling
This course provides the student with a fundamental understanding of forensic science and technology, psychological profiling, and the application of scientific methodologies to the investigative process.

**AJS 595** .................................................................................. 3 credits

### Program Development and Evaluation
This course prepares the student to identify operational goals and to design programs with associated policies and procedures required for the successful achievement of performance objectives.

### Master of Science/Administration of Justice and Security Concentration in Global and Homeland Security

The following Master of Science/Administration of Justice and Security Concentration in Global and Homeland Security (MS/AJS-GHS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Administration of Justice and Security degree program offers concentrations in Global and Homeland Security and in Law Enforcement Organizations. The concentration in Global and Homeland Security provides students with the knowledge to administer security programs within organizations. Developing a foundation of related theory, the concentration includes topics such as: critical incident management, intelligence, cybercrime, organizational performance, and technology. While distinctions between the roles of Criminal Justice and Security organizations are addressed, the concentration emphasizes administrative responsibilities common to security and Homeland Security organizations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms-ajs.

This is a survey course that introduces policing, the court systems, corrections, and private security and how they relate to each other. Challenges in these relationships are also presented.

AJS 512 .....................................................................................3 credits
Organizational Administration in Justice and Security
This course explores the various elements of organizational administration, behavior, and management in criminal justice organizations and provides the student with an understanding of individual and group dynamics, problem solving concepts, and administrative processes associated with organizational behavior and structures that exist in the criminal justice system.

AJS 522 .....................................................................................3 credits
Finance and Budgeting in Justice and Security
This course introduces fundamental concepts of using financial tools and analysis for effective managerial decision making in criminal justice and security. Topics include the role of the financial management in the criminal justice organization, concepts and principles underlying financial practices, and operational planning and budgeting.

AJS 532 .....................................................................................3 credits
Ethics in Justice and Security
This course will examine the theoretical and philosophical basis of ethics and the standards of professional conduct and leadership applicable to justice and security agencies. Applicable case studies will be used as well as contemporary situations in ethics.

AJS 542 .....................................................................................3 credits
Criminological Theory
This is an advanced course in theories of crime causation, including classical, biological, psychological, sociological, and social-psychological approaches. Victimology, to include victimization statistics, victimogenesis, and the prevention of victimization, is
included.

**Legal Issues in Justice and Security**
This course examines the competing legal and social issues that influence the actions of public officials, security personnel, and private citizens with respect to the provision of law enforcement, safety, and security services for various elements of society. The potential conflicts between public policy and civil rights will be discussed.

**Organizational Risk and Incident Management**
This course provides an overview of the relationship between risk assessment and consequence management within the context of justice and security organizations. Specifically, it will examine the factors that go into mitigating risk and when these measures fail, how critical incident response can maintain order. Topics include defining risk, planning factors for critical incident response, lessons learned.

**Program Development and Evaluation**
This course prepares the student to identify operational goals and to design programs with associated policies and procedures required for the successful achievement of performance objectives.

**Leadership and Public Policy in Global/Homeland Security**
This course is designed to provide students with an understanding of how public organizations deal with the threat of various forms of terrorism. Leadership and management responsibilities are considered. Students will understand the importance of interdisciplinary security in developing comprehensive protection plans and policies designed to reduce the vulnerability associated with deliberate violent acts.

**Intelligence Integration in Global/Homeland Security**
This course allows students to explore the collaboration of intelligence and law enforcement communities (intelligence-led policing) for human welfare and safety in global and homeland environments. Students will review the development and implementation of counterterrorism initiatives based on terrorism intelligence and emerging threats to homeland security. Students will also examine recommendations of the Global Intelligence Working Group (GIWG) and evaluate operational expectations of law enforcement and federal intelligence analysts, law enforcement administrators, and first responding officers responsible for global and homeland security. Students will also explore the importance of keeping local law enforcement intelligence and national security intelligence separate, but recognize methods for federal, state, and local law enforcement agencies to share and dispense intelligence.

**Multi-disciplinary Global and Homeland Security Issues**
This course explores current and future issues in global and homeland security. Students will evaluate domestic border security and global immigration control. Students will understand the importance of planning for the prevention of domestic and international terrorism acts and other critical incidents and develop an understanding of gathering, using, and sharing appropriate intelligence. They will explore the collaboration and development of partnerships with private security organizations. Students will develop methods for coordinating emergency management efforts and discuss the psychological and sociological effects of terrorism and other critical incidents. The new skills and knowledge gained will add to the protection, safety, and security of our society.

**Critical Infrastructure Analysis and Protection**
This course focuses on systems analysis in the context of critical infrastructure protection. The course provides a strategic perspective of the Critical Infrastructure Protection (CIP) efforts in the United States. This includes preparation and response to critical events. Practical approaches to CIP are considered including threat assessment and vulnerability identification. Risk assessment methodologies, physical protection system design, cybersecurity, and emergency response protocols are also discussed.

**Master of Science/Administration of Justice and Security Concentration in Law Enforcement Organizations**

The following Master of Science/Administration of Justice and Security Concentration is offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depends on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Administration of Justice and Security degree program offers concentrations in Global and Homeland Security and in Law Enforcement Organizations. The Law Enforcement Organizations concentration provides students with the general knowledge needed to perform in supervisory, administrative, and executive roles within law enforcement organizations. The concentration emphasizes intelligence operations, organizational behavior, budgeting, planning, and technology.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms-aajs.

Additional Admission Requirements for the MPA
All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- No work experience is required for this program.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Degree Requirements for the MPA
The degree requirements for this program are the following:
- A minimum of 36 graduate credits.
- A minimum grade point average (GPA) of 3.0.
- The diploma awarded for this program will read as:
  - Master of Public Administration

Residency Requirements and Course Waivers for the MPA
Completion of a minimum of 27 credit of the required course of study to meet University residency requirements.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a "B" (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

Public Administration Applied Project (MGT 582) may not be waived.

Course Descriptions for the MPA
MGT 522 .................................................................................. 3 credits

Public Administration - Institutions and Processes
This course applies the tools available to UPX graduate students and the competencies of successful managers to understand the functions of public administration. Students will distinguish the dichotomy between the political system and public administration in the creation and implementation of public policy. Other topics, at the state and local level, include executive & legislative branches of government, the evolution of public administration, intergovernmental relationships, and fiscal sources & uses.

MGT 572 .................................................................................. 3 credits

Public Policy Planning and Implementation
This course prepares students to trace the development of a public policy. For a selected policy, students will analyze the policy making process and the challenges that accompany each stage. Other topics, at the state and local level, include public policy planning, policy evaluation, and stakeholder conflicts.

MGT 582 .................................................................................. 3 credits

Public Administration Applied Project
This capstone course prepares students to improve existing policies. Students will evaluate existing policy and recommend improvements and recommend changes to improve efficiency and effectiveness. Other topics, at the state and local level, include policy creation, policy evaluation, and nontraditional/innovative solutions in the public sector.

MGT TM562 ................................................................................. 3 credits

Leveraging Technology in the Public Sector
This course prepares students to leverage technology in support of effective and efficient administration of government. Students will apply technology concepts to enhance self-service tools for citizens while providing data security and respecting privacy concerns. Other topics, at the state and local level, include mobility, database interconnectivity, Internet, intranet & extranet, and data maintenance & retrieval.
RES 562..................................................................................... 3 credits  
**Policy and Program Evaluation**  
This course prepares students to apply techniques to evaluate public sector programs. Students will evaluate policy alternatives using analytical tools. Other topics, at the state and local level, include measures of effectiveness, benchmarks, baselines, performance standards, and customized stakeholder communication.

QNT 562................................................................................... 3 credits  
**Data Analysis for Public Policy and Management**  
This course prepares students to analyze information and present it appropriately to diverse stakeholder groups. Students will design research instruments and collect data to measure and analyze effectiveness and efficiency in the delivery of public sector goods and services. Other topics, at the state and local level, include pre-testing, post testing, correlation, and forecasting.

HRM 532.................................................................................. 3 credits  
**Human Capital Development in the Public Sector**  
This course prepares students to apply human capital development concepts in a public sector. Students will create plans for managing human capital in an environment of political appointment. Other topics, at the state and local level, include recruitment, development & retention of employees, motivation, performance evaluation, employee/employer relationship, personnel policies & politics, and public service ethic.

LDR 532.................................................................................... 3 credits  
**Leading Organizational Development in the Public Sector**  
This course prepares students to lead change in the public sector. Students will apply leadership theories in the bureaucratic public sector considering the unique role of power and politics. Other topics, at the state and local level, include culture in the public sector, group behavior, financial and nonfinancial motivation, and workplace conflict.

LAW 562 .................................................................................. 3 credits  
**Law and Public Administration**  
This course prepares students to apply legal concepts in public administration. Students will analyze legislative and judicial processes in the administration of state and local governments. Other topics, at the state and local level, include enabling laws, regulatory review, open-meeting/sunshine provisions, adjudication, and the Administrative Procedures Act.

ACC 574 .................................................................................. 3 credits  
**Public Budgeting**  
In this course students learn the accounting and budgeting tools and theories used in the public sector. Students will analyze the relationship between public policy and the public budget process. Other topics, at the state and local level, include budgetary decision making, basics of government and not-for-profit accounting, reporting, capital and operating expenditures, and inter-period equity.

ECO 572 ................................................................................... 3 credits  
**Public Finance**  
This course prepares students to apply the principles of economics to the public sector. Students will create a plan for a public-private partnership to deliver a public good or service. Other topics, at the state and local level, include microeconomics in the public sector, basic macroeconomic variables, monetary policy, income redistribution, multilevel government financing, bond issuance, role of nonprofits, and tax efficiency, equity, and incidence.

COM PA530............................................................................. 3 credits  
**Communications for Public Administrators**  
This course prepares students to communicate with multiple stakeholders and public media. Students will apply communication concepts to create messages that are sensitive to the opinions and positions of disparate groups. Other topics, at the state and local level, include uniqueness of public sector communications, public involvement, and internal & external communications.
COLLEGE OF SOCIAL SCIENCES

The College of Social Sciences offers undergraduate and graduate degree programs in a number of diverse academic areas including counseling, psychology, and human services. In addition, the college offers a certificate program in mediation.

The College provides innovative educational programs designed to enhance the core knowledge, skills and values essential for students seeking to achieve their academic goals in the field of social sciences. These programs are developed and taught by skilled practitioners who work in their respective fields. Through individual and collaborative work, students can acquire the knowledge and skills needed in today’s working environment.

Master of Science in Counseling Clinical Mental Health Counseling

The following Master of Science in Counseling Clinical Mental Health Counseling (MSC/CCMH) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Counseling: Clinical Mental Health Counseling is a 63 credit program that prepares graduates to work as practitioners with diverse clients in various mental health environments, including private practice, hospitals, and public and private mental health agencies. Students learn the foundations of counseling including theories and their application with groups and individuals; assessment and evaluation; counseling and consultative relationships; career planning; research methods; legal and ethical concerns; trauma and crisis; and program development, implementation, and evaluation. The program addresses critical issues facing counselors and includes supervised practicum and internship experiences where students obtain practical experience prior to graduation. Students in the program must pass the Counselor Preparation Comprehensive Examination (CPCE) as part of the graduation requirements.

This program meets the California LPCC educational requirements for registration with the Board of Behavioral Sciences (BBS) as an Professional Clinical Counselor Intern (PCCI). Upon successful completion of all educational requirements and required postgraduate supervised clinical hours, graduates are eligible to sit for the LPCC licensure exams in California.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/msc-ccmh.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MSC/CCMH

All applicants are expected to meet the following admissions requirements:
• An undergraduate degree from a regionally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• A signed Criminal Conviction Disclosure Form.
• A signed Professional Counseling Non-Academic Requirement Addendum Form.
• Official transcripts listing at least six (6) credits in the helping professions (psychology, counseling, or related) or education with a grade of "C" or better in each course. The six credits must have been completed prior to the student starting CNSL 500 - Orientation to the Counseling Profession.
• A minimum equivalent of two (2) years of full-time, post-high school paid and/or volunteer work experience with direct exposure to human services, human resources, primary, secondary or higher education, or organizational systems and associated management processes is required.
• Successful completion of CNSL 500, Orientation to the Counseling Profession. If the student is denied admission because of the unacceptable grade, the student may reapply for the Counseling program in 30 days and would be required to retake and pass CNSL 500. A student failing CNSL 500 on the second attempt, must wait 6 months before reapplying. Passing CNSL 500 is limited to a total of three attempts.

Degree Requirements for the MSC/CCMH
• Completion of a minimum of 63 credits.
• A minimum program grade point average (GPA) of 3.0.
• Completion of the Counselor Preparation Comprehensive Exam (CPCE) with a minimum percentage of 60.
• Completion of Internship (600 hours) and Practicum (100 hours).
• The diploma awarded for this program will read as: Master of Science in Counseling Clinical Mental Health Counseling

Academic Progression Requirements for the MSC/CCMH
• Residency courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 12 students. Residency courses are: CNSL 503R, CNSL 513R, CNSL 523R.
• Clinical Practice courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 12 students. Clinical Practice courses are: CCMH 592, CCMH 597A, CCMH 597B.

• The following Clinical courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 20 students. Clinical courses are: CCMH 515, CCMH 548, CCMH 551, CCMH 568, CNSL 500.
• Completion of all courses with a grade of "B-" or better. Students must maintain an overall GPA of at least 3.0.
• Students are required to complete and earn the minimum score for the Counselor Preparation Comprehensive Exam (CPCE) or another assessment/examination instrument as authorized by the Dean of the College. The CPCE may not be scheduled before the Practicum and must be completed by the conclusion of Internship If the student does not receive a passing score with their first attempt, s/he may take this exam up to three times before being scholastically suspended, permanently withdrawn, from the program.

Academic Standing and Minimum Grade Requirements for the MSC/CCMH
• Students in this program may not attend any further courses after being assigned a grade of incomplete in a course.
• MSC students will be placed on Scholastic Disqualification if a minimum grade of "B-" is not attained in any course. If a student repeats a course due to receiving a grade that is less than a "B-" and does not receive a grade of "B-" or better the second time, the student will be scholastically suspended, permanently withdrawn, from this program.
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have fulfilled the requirements for reentry as determined by the Campus College Chair.
• Students must successfully complete CNSL 503R Graduate Portfolio Residency I in order to continue in this program. Students who do not successfully complete CNSL 503R may not enroll in any subsequent coursework until the course has been successfully completed. Students who fail CNSL 503R may repeat the course after three (3) months. If the student does not meet the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.
• Students in the College of Social Science graduate programs may not transfer credit to the University from courses taken from other schools while academically or scholastically disqualified.

Residency Requirements and Course Waivers for the MSC/CCMH
• Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: CCMH 515, CCMH 515CA, CCMH 522, CCMH 547, CCMH 548, CCMH 558, CCMH 565; CCMH 581, CCMH 592, CCMH 597A, CCMH 597B, CNSL 500, CNSL 503R, CNSL 513R, CNSL 523R

Additional Academic Program Re-entry Policy for the MSC/CCMH
All students who have been out of attendance for one (1) year or more in a counseling program must retake and pass the most recently graded Residency class.
If a student is required to retake CNSL 503R Residency I: Basic Helping Competencies upon re-entry and does not pass the course, the student may reapply for the Counseling program in three (3) months and would be required to retake and pass CNSL 503R. A student failing CNSL 503R on the second attempt, must wait six (6) months before reapplying. Passing CNSL 503R is limited to a total of three attempts.

Course Descriptions for the MSC/CCMH
CNSL 500 ........................................................................................................ 0 credits
Orientation to the Counseling Profession
CNSL/500 is a 3-week orientation required for specified counseling program applicants. Students will explore the field of counseling and options for a career path to determine their readiness for entry into a graduate program in counseling. Students are required to take a career inventory to examine their interests and aptitude for acquiring the skills needed in the counseling professions. Students also begin to identify their personal motives for a career in the counseling field. Additional topics include orientation to University of Phoenix learning platforms, the online library, graduate-level writing expectations, and the broader idea of navigating graduate school and studies.
CCMH 504 ........................................................................................................ 3 credits
Individual and Family Development Across the Life Span
This course presents students with theoretical frameworks to foster an understanding of the various dimensions of human development. Emphasis is placed on biological, cognitive, and psychosocial development within the context of gender, family systems, social roles, and culture.
CCMH 506 ........................................................................................................ 3 credits
Personality Theories and Counseling Models
This course enables students to differentiate among the primary theoretical models of personality theory and counseling practice, including psychodynamic, affective, cognitive behavioral, humanistic, interpersonal, multicultural, and systems theory. A focus on evidence-based practices that incorporate cultural diversity issues with population-specific approaches is significant feature of this course. Emphasis is on the importance of students recognizing belief systems that accurately reflect their own personal style and to recognize strategies and approaches likely to be most successful with a particular client population. Students have opportunities to establish a strong theoretical foundation as the basis of clinical practice and to evaluate and assess clinical situations for implementation of therapeutic interventions that are gender and culturally appropriate. Assessment and intervention for emergency/crisis is introduced.
CCMH 515 ........................................................................................................ 3 credits
Legal, Ethical, and Professional Issues in Counseling
This course covers the legal and ethical responsibilities of the counseling professional. Students learn to interpret and act upon situations appropriately and effectively. Content includes issues such as client rights, confidentiality, duty to warn and protect, dual relationships, supervision and consulting, ethics with special populations, and ethical decision-making models.
CCMH 511 ........................................................................................................ 3 credits
Fundamental Counseling Skills
This introductory counseling skills course introduces students to fundamental helping skills. Students will develop a range of basic communication patterns to facilitate a healthy therapeutic relationship between counselor and client. Students learn counseling and communication skills such as, attending behaviors, eliciting, structuring, and summarizing.
CNSL 503R ...................................................................................................... 1 credit
Residency I
This 3-day residency course is the last requirement for formal admission into the counseling program. The residency is experiential, with organized opportunities for students to observe, practice and demonstrate fundamental counseling and helping skills. Topics in this course include counselor self-efficacy, oral and written communication skills, basic interviewing skills, application of counseling theory to counseling models and practice, and finally an evaluation of students’ readiness to move forward in the program.
CCMH 525 ........................................................................................................ 3 credits
Research Methods for Mental Health Counselors
This course provides an overview of the fundamentals of research and evaluation in the counseling profession. Topics include critical analysis of research literature, statistical analysis, qualitative and quantitative research methods, needs assessment, and program evaluation. Emphasis is placed on understanding connections between research design, theories, and the utilization of results in the professional practice of counseling.
CCMH 510 ........................................................................................................ 3 credits
Multi-Cultural Issues in Mental Health Counseling
This course is designed to be a foundation for understanding diversity among clients in a pluralistic society. Emphasis will be on integrating awareness, knowledge, and skills related to counseling differences and similarities based on age, race, ethnicity, national origin, religious affiliations, gender identification, sexual orientation, physical/mental limitations, social class, etc.
CCMH 547 ........................................................................................................ 3 credits
Basic Clinical Assessment and Psychometrics
This course introduces students to models and tools of clinical assessment and diagnosis techniques, including tests and test reports used in counseling and behavioral analysis. Students use the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) to practice writing clear, accurate, and useful intake assessments, mental status examinations, and outcome-
based treatment planning. Special focus is placed on psychometric properties of tests, test selection criteria, administration, interpretation, and reporting of test results. Multicultural and ethical issues in assessment and psychometrics are also explored.

CCMH 548 ................................................................. 3 credits

Psychopathology: Advanced Clinical Assessment
Students build on the skills gained in CCMH 544 (Introduction to Clinical Assessment), focusing on the more complex or problematic disorders with particular focus on personality disorders. Students enhance their skills by using the DSM™ for report-writing and treatment plan development. Emphasis is on accepted treatment approaches and outcome-based assessments; the development of critical thinking skills; and on multicultural, legal, and ethical issues.

CCMH 522 ................................................................. 3 credits

Individual Counseling
This course focuses on intensive skill building in individual counseling. The relationship between assessment, theory, application of strategy and intervention, setting goals with clients, closure, and referral are emphasized as essential to the counseling environment. Emphasis is also placed on treatment plans, ethics, and cultural diversity.

CCMH 568 ................................................................. 3 credits

Group Counseling
This course provides students with intensive knowledge, awareness, and skill-building in group counseling. Content emphasizes such areas as different types of groups, dynamics, norms and boundaries, leadership styles, leading, and co-leading, and treatment plans. Confidentiality, selection procedures, ethics, and diversity are included as key components of effective group counseling practice.

CNSL 513R ................................................................. 1 credit

Residency II
This 3-day residency course provides an opportunity for students to observe, practice, and demonstrate competency in intermediate counseling skills. Topics include professional and personal development, oral communication skills, research methodologies, and sensitivity to diversity issues. Students will demonstrate intake, assessment, provisional diagnoses, and treatment planning abilities. Students also practice facilitation of group therapy and demonstrate skills in clinical case staffing. The core of this residency focuses on practicing group work theory and application in a variety of group therapy simulations. The capstone of the residency is staffing a clinical case and role play.

CCMH 540 ................................................................. 3 credits

Career and Vocational Counseling
This course provides the student with a comprehensive overview of vocational theory and career counseling. It includes the historical foundations of vocational theory and the relationship of these to skills and techniques utilized in career counseling and vocational development practices. Vocational and career counseling is examined as an integral component of the overall assessment and treatment of clients representing diverse populations found within the scope of community, mental health, and marriage and family counseling. Emphasis is placed on the examination of adults in transition and the nature of work in a changing world. Students develop competencies necessary to provide career and vocational counseling to clients across the lifespan.

CCMH 561 ................................................................. 3 credits

Dependency and Addictions
This course addresses addiction concepts and counseling practices. Topics include an overview of dependency theories, major substances of abuse, assessment, diagnosis, treatment modalities, special topics, and working with diverse populations.

CCMH 565 ................................................................. 3 credits

Family, Couple, and Child Counseling
This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories; address integrative approaches to assessment and diagnosis in family therapy; and explore systemic approaches to treatment of issues common to families and children in clinical settings.

CCMH 558 ................................................................. 3 credits

Crisis Intervention and Trauma
This course provides students with an in-depth evaluation of crisis and trauma counseling, including emergency and disaster situations. Students examine crisis theory, methods of crisis response, psychological effects associated with trauma, assessment strategies, and intervention models. Students analyze theoretical approaches as they relate to crisis management and trauma counseling.

CMHC 551 ................................................................. 3 credits

Human Sexuality and Sex Therapy
The goal of this course is to learn about the many facets of human sexuality and the treatment of sexual dysfunctions in a safe and respectful environment. Topics include the physiology, psychology, and sociology of sexuality, including the effects of sexual attitudes and functioning on individuals and families. Clinical applications, including the treatment of sexual difficulty and dysfunction will also be explored. Students will develop familiarity with the language and terms of sexology and demonstrate an ability to apply this knowledge to clinical situations.

CCMH 581 ................................................................. 3 credits

Supervision/Management in Clinical Mental Health Counseling
This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories, address integrative approaches to assessment and diagnosis in family therapy, and explore systemic approaches to treatment of issues common to families and children in clinical settings.

CNSL 523R ................................................................. 1 credit

Residency III
The final 3-day residency in the Clinical Mental Health Counseling online program focuses on advanced clinical counseling skills and competencies. This residency is used to determine the student’s readiness for work with diverse populations during clinical placement in practicum and internship courses. Students demonstrate skills in case conceptualization, diagnosis and rationalization, treatment planning using evidence-based approaches, and cultural and career awareness. Additional counseling topics include crisis
Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

CCMH 597A ................................................................. 3 credits

Internship A

Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Additional Admission Requirements for the MSC/CCMH
All applicants are expected to meet the following admission requirements:
• An undergraduate degree from a regionally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• A signed Criminal Conviction Disclosure Form.
• A signed Professional Counseling Non-Academic Requirement Addendum Form.
• Official transcripts listing at least six (6) credits in the helping professions (psychology, counseling, or related) or education with a grade of “C” or better in each course. The six credits must have been completed prior to the student starting CNSL/500 - Orientation to the Counseling Profession.
• A minimum equivalent of two (2) years of full-time, post-high school paid and/or volunteer work experience with direct exposure to human services, human resources, primary, secondary or higher education, or organizational systems and associated management processes is required.
• Successful completion of CNSL 500, Orientation to the Counseling Profession. If the student is denied admission because of the unacceptable grade, the student may reapply for the counseling program in 30 days and would be required to retake and pass CNSL 500. A student failing CNSL 500 on the second attempt, must wait 6 months before reapplying. Passing CNSL/500 is limited to a total of three attempts.

Degree Requirements for the MSC/CCMH
• Completion of a minimum of 66 credits.
• A minimum program grade point average (GPA) of 3.0.
• Completion of the Counselor Preparation Comprehensive Exam (CPCE) with a minimum percentage of 60.
• Completion of Internship (900 hours) and Practicum (100 hours).
• The diploma awarded for this program will read as: Master of Science in Counseling Clinical Mental Health Counseling

Academic Progression Requirements for the MSC/CCMH
• Residency courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 12 students. Residency courses are: CNSL 503R, CNSL 513R, CNSL 523R
• Clinical Practice courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 12 students. Clinical Practice courses are: CCMH 592, CCMH 597A, CCMH 597B, CCMH 597C
• The following Clinical courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 20 students. Clinical courses are: CCMH 515, CCMH 548, CCMH 551, CCMH 568, CNSL 500
• Completion of all courses with a grade of “B” or better. Students must maintain an overall GPA of at least 3.0.
Students are required to complete and earn the minimum score for the Counselor Preparation Comprehensive Exam (CPCE) or another assessment/examination instrument as authorized by the Dean of the College. The CPCE may not be scheduled before the Practicum and must be completed by the conclusion of Internship II. If the student does not receive a passing score with their first attempt, s/he may take this exam up to three times before being scholastically suspended, permanently withdrawn, from the program.

Academic Standing and Minimum Grade Requirements for the MSC/CCMH

- Students in this program may not attend any further courses after being assigned a grade of incomplete in a course.
- MSC students will be placed on Scholastic Disqualification if a minimum grade of "B-" is not attained in any course. If a student repeats a course due to receiving a grade that is less than a "B-" and does not receive a grade of "B-" or better the second time, the student will be scholastically suspended, permanently withdrawn, from this program.
- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have fulfilled the requirements for reentry as determined by the Campus College Chair.
- Students must successfully complete CNSL/503R Graduate Portfolio Residency I in order to continue in this program. Students who don’t successfully complete CNSL/503R may not enroll in any subsequent coursework until the course has been successfully completed. Students who fail CNSL/503R may repeat the course after three (3) months. If the student does not meet the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.
- Students in the College of Social Science graduate programs may not transfer credit to the University from courses taken from other schools while academically or scholastically disqualified.

Residency Requirements and Course Waivers for the MSC/CCMH

- Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally accredited transferable coursework.
- In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following courses in the Required Course of Study may not be waived: CCMH 515, CCMH 522, CCMH 547, CCMH 548, CCMH 558, CCMH 565, CCMH 581, CCMH 592, CCMH 597A, CCMH 597B, CCMH 597C, CNSL 500, CNSL 503R, CNSL 513R, CNSL 523R

Additional Academic Program Re-entry Policy for the MSC/CCMH

All students who have been out of attendance for one (1) year or more in a counseling program must retake and pass the most recently graded Residency class.

If a student is required to retake CNSL 503R Residency I: Basic Helping Competencies upon re-entry and does not pass the course, the student may reapply for the Counseling program in three (3) months and would be required to retake and pass CNSL 503R. A student failing CNSL 503R on the second attempt, must wait six (6) months before reapplying. Passing CNSL 503R is limited to a total of three attempts.

Course Descriptions for the MSC/CCMH

CNSL 500 ................................................................................. 0 credits
Orientation to the Counseling Profession
CNSL/500 is a 3-week orientation required for specified counseling program applicants. Students will explore the field of counseling and options for a career path to determine their readiness for entry into a graduate program in counseling. Students are required to take a career inventory to examine their interests and aptitude for acquiring the skills needed in the counseling professions. Students also begin to identify their personal motives for a career in the counseling field. Additional topics include orientation to University of Phoenix learning platforms, the online library, graduate-level writing expectations, and the broader idea of navigating graduate school and studies.

CCMH 504 ............................................................................... 3 credits
Individual and Family Development Across the Life Span
This course presents students with theoretical frameworks to foster an understanding of the various dimensions of human development. Emphasis is placed on biological, cognitive, and psychosocial development within the context of gender, family systems, social roles, and culture.

CCMH 506 ............................................................................... 3 credits
Personality Theories and Counseling Models
This course enables students to differentiate among the primary theoretical models of personality theory and counseling practice, including psychodynamic, affective, cognitive behavioral, humanistic, interpersonal, multicultural, and systems theory. A focus on evidence-based practices that incorporate cultural diversity issues with population-specific approaches is significant feature of this course. Emphasis is on the importance of students recognizing belief systems that accurately reflect their own personal style and to recognize strategies and approaches likely to be most successful with a particular client population. Students have opportunities to establish a strong theoretical foundation as the basis of clinical
practice and to evaluate and assess clinical situations for implementation of therapeutic interventions that are gender and culturally appropriate. Assessment and intervention for emergency/crisis is introduced.

CCMH 515 ...............................................................................3 credits

Legal, Ethical, and Professional Issues in Counseling
This course covers the legal and ethical responsibilities of the counseling professional. Students learn to interpret and act upon situations appropriately and effectively. Content includes issues such as client rights, confidentiality, duty to warn and protect, dual relationships, supervision and consulting, ethics with special populations, and ethical decision-making models.

CCMH 511 ..............................................................................3 credits

Fundamental Counseling Skills
This introductory counseling skills course introduces students to fundamental helping skills. Students will develop a range of basic communication patterns to facilitate a healthy therapeutic relationship between counselor and client. Students learn counseling and communication skills such as, attending behaviors, eliciting, structuring, and summarizing.

CNSL 503R ..............................................................................1 credit

Residency I
This 3-day residency course is the last requirement for formal admission into the counseling program. The residency is experiential, with organized opportunities for students to observe, practice and demonstrate fundamental counseling and helping skills. Topics in this course include counselor self-efficacy, oral and written communication skills, basic interviewing skills, application of counseling theory to counseling models and practice, and finally an evaluation of students’ readiness to move forward in the program.

CCMH 525 ..............................................................................3 credits

Research Methods for Mental Health Counselors
This course provides an overview of the fundamentals of research and evaluation in the counseling profession. Topics include critical analysis of research literature, statistical analysis, qualitative and quantitative research methods, needs assessment, and program evaluation. Emphasis is placed on understanding connections between research design, theories, and the utilization of results in the professional practice of counseling.

CCMH 510 ...............................................................................3 credits

Multi-Cultural Issues in Mental Health Counseling
This course is designed to be a foundation for understanding diversity among clients in a pluralistic society. Emphasis will be on integrating awareness, knowledge, and skills related to counseling differences and similarities based on age, race, ethnicity, national origin, religious affiliations, gender identification, sexual orientation, physical/mental limitations, social class, etc.

CCMH 547 ...............................................................................3 credits

Basic Clinical Assessment and Psychometrics
This course introduces students to models and tools of clinical assessment and diagnosis techniques, including tests and test reports used in counseling and behavioral analysis. Students use the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) to practice writing clear, accurate, and useful intake assessments, mental status examinations, and outcome-based treatment planning. Special focus is placed on psychometric properties of tests, test selection criteria, administration, interpretation, and reporting of test results. Multicultural and ethical issues in assessment and psychometrics are also explored.

CCMH 548 ...............................................................................3 credits

Psychopharmacology: Advanced Clinical Assessment
Students build on the skills gained in CCMH 544 (Introduction to Clinical Assessment), focusing on the more complex or problematic disorders with particular focus on personality disorders. Students enhance their skills by using the DSM™ for report-writing and treatment plan development. Emphasis is on accepted treatment approaches and outcome-based assessments; the development of critical thinking skills; and on multicultural, legal, and ethical issues.

CCMH 522 ...............................................................................3 credits

Psychosocial Issues
Students build on the skills gained in CCMH 544 (Introduction to Clinical Assessment), focusing on the more complex or problematic disorders with particular focus on personality disorders. Students enhance their skills by using the DSM™ for report-writing and treatment plan development. Emphasis is on accepted treatment approaches and outcome-based assessments; the development of critical thinking skills; and on multicultural, legal, and ethical issues.

CCMH 551 ...............................................................................3 credits

Individual Counseling
This course focuses on intensive skill building in individual counseling. The relationship between assessment, theory, application of strategy and intervention, setting goals with clients, closure, and referral are emphasized as essential to the counseling environment. Emphasis is also placed on treatment plans, ethics, and cultural diversity.

CCMH 568 ...............................................................................3 credits

Group Counseling
This course provides students with intensive knowledge, awareness, and skill-building in group counseling. Content emphasizes such areas as different types of groups, dynamics, norms and boundaries, leadership styles, leading and co-leading, and treatment plans. Confidentiality, selection procedures, ethics, and diversity are included as key components of effective group counseling practice.

CNSL 513R ..............................................................................1 credit

Residency II
This 3-day residency course provides an opportunity for students to observe, practice, and demonstrate competency in intermediate counseling skills. Topics include professional and personal development, oral communication skills, research methodologies, and sensitivity to diversity issues. Students will demonstrate intake, assessment, provisional diagnoses, and treatment planning abilities. Students also practice facilitating group therapy and demonstrate skills in clinical case staffing. The core of this residency focuses on practicing group work theory and application in a variety of group therapy simulations. The capstone of the residency is staffing a clinical case and role play.

CCMH 540 ...............................................................................3 credits

Career and Vocational Counseling
This course provides the student with a comprehensive overview of vocational theory and career counseling. It includes the historical foundations of vocational theory and the relationship of these to skills and techniques utilized in career counseling and vocational development practices. Vocational and career counseling is examined as an integral component of the overall assessment and treatment of clients representing diverse populations found within the scope of community, mental health, and marriage and family
counseling. Emphasis is placed on the examination of adults in transition and the nature of work in a changing world. Students develop competencies necessary to provide career and vocational counseling to clients across the lifespan.

CCMH 561 ............................................................................. 3 credits

**Dependency and Addictions**

This course addresses addiction concepts and counseling practices. Topics include an overview of dependency theories, major substances of abuse, assessment, diagnosis, treatment modalities, special topics, and working with diverse populations.

CCMH 565 ............................................................................. 3 credits

**Family, Couple, and Child Counseling**

This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories; address integrative approaches to assessment and diagnosis in family therapy; and explore systemic approaches to treatment of issues common to families and children in clinical settings.

CCMH 558 ............................................................................. 3 credits

**Crisis Intervention and Trauma**

This course provides students with an in-depth evaluation of crisis and trauma counseling, including emergency and disaster situations. Students examine crisis theory, methods of crisis response, psychological effects associated with trauma, assessment strategies, and intervention models. Students analyze theoretical approaches as they relate to crisis management and trauma counseling.

CMHC 551 ............................................................................. 3 credits

**Human Sexuality and Sex Therapy**

The goal of this course is to learn about the many facets of human sexuality and the treatment of sexual dysfunctions in a safe and respectful environment. Topics include the physiology, psychology, and sociology of sexuality, including the effects of sexual attitudes and functioning on individuals and families. Clinical applications, including the treatment of sexual difficulty and dysfunction will also be explored. Students will develop familiarity with the language and terms of sexology and demonstrate an ability to apply this knowledge to clinical situations.

CCMH 581 ............................................................................. 3 credits

**Supervision/Management in Clinical Mental Health Counseling**

This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories; address integrative approaches to assessment and diagnosis in family therapy; and explore systemic approaches to treatment of issues common to families and children in clinical settings.

CNSL 523R ............................................................................. 1 credit

**Residency III**

The final 3-day residency in the Clinical Mental Health Counseling online program focuses on advanced clinical counseling skills and competencies. This residency is used to determine the student’s readiness for work with diverse populations during clinical placement in practicum and internship courses. Students demonstrate skills in case conceptualization, diagnosis and rationalization, treatment planning using evidence-based approaches, and cultural and career awareness. Additional counseling topics include crisis and trauma, professional orientation and identity, personal growth and self-care concepts, and completion of a scenario-based exam.

CCMH 592 ............................................................................. 3 credits

**Practicum in Clinical Mental Health Counseling**

This course focuses on the assessment and continuing development of student counseling skills. Students have a variety of opportunities to receive feedback and to evaluate their ability to integrate theory into practice. Students determine their styles and strengths as professional counseling practitioners, as well as identify areas needing further development. Individualized practice sessions and feedback are designed into the course.

CCMH 597A ............................................................................. 3 credits

**Internship A**

Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

CCMH 597B ............................................................................. 3 credits

**Internship B**

Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

CCMH 597C ............................................................................. 3 credits

**Internship C**

Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.
Master of Science in Counseling Clinical Mental Health Counseling (Nevada)

The following Master of Science in Counseling Clinical Mental Health Counseling (MSC/CCMH) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Counseling: Clinical Mental Health Counseling is a 66 credit program that prepares graduates to work as practitioners with diverse clients in various mental health environments, including private practice, hospitals, and public and private mental health agencies. Students learn the foundations of counseling including theories and their application with groups and individuals; assessment and evaluation; counseling and consultative relationships; career planning; research methods; legal and ethical concerns; trauma and crisis, and program development, implementation, and evaluation. The program addresses critical issues facing counselors and includes supervised practicum and internship experiences where students obtain practical experience prior to graduation. Students in the program must pass the Counselor Preparation Comprehensive Examination (CPCE) as part of the graduation requirements.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/msc-ccmh.

- Internship B
- CCMH 597C ~ .......................................................... 3 credits
- Internship C

The University reserves the right to modify the required course of study.

### Additional Admission Requirements for the MSC/CCMH

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

- A signed Criminal Conviction Disclosure Form.

- A signed Professional Counseling Non-Academic Requirement Addendum Form.
• Official transcripts listing at least six (6) credits in the helping professions (psychology, counseling, or related) or education with a grade of "C" or better in each course. The six credits must have been completed prior to the student starting CNSL/500 - Orientation to the Counseling Profession.
• A minimum equivalent of two (2) years of full-time, post-high school paid and/or volunteer work experience with direct exposure to human services, human resources, primary, secondary or higher education, or organizational systems and associated management processes is required.
• Successful completion of CNSL 500, Orientation to the Counseling Profession. If the student is denied admission because of the unacceptable grade, the student may reapply for the Counseling program in 30 days and would be required to retake and pass CNSL 500. A student failing CNSL 500 on the second attempt, must wait 6 months before reapplying. Passing CNSL 500 is limited to a total of three attempts.

Degree Requirements for the MSC/CCMH
• Completion of a minimum of 66 credits.
• A minimum program grade point average (GPA) of 3.0.
• Completion of the Counselor Preparation Comprehensive Exam (CPCE) with a minimum percentage of 60.
• Completion of Internship (600 hrs) and Practicum (100 hours) within 52 weeks.
• The diploma awarded for this program will read as: Master of Science in Counseling Clinical Mental Health Counseling

Academic Progression Requirements for the MSC/CCMH
• Residency courses contain multiple requirements for academic progression; therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 12 students. Residency courses are: CNSL 503R, CNSL 513R, CNSL 523R
• Clinical Practice courses contain multiple requirements for academic progression, therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 12 students. Clinical Practice courses are: CCMH 592, CCMH 597A, CCMH 597B, CCMH 597C
• The following Clinical courses contain multiple requirements for academic progression, therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in these courses shall not exceed 20 students. Clinical courses are: CCMH 515, CCMH 548, CCMH 551, CCMH 568, CNSL 500
• Completion of all courses with a grade of "B-" or better. Students must maintain an overall GPA of at least 3.0.

• Students are required to complete and earn the minimum score for the Counselor Preparation Comprehensive Exam (CPCE) or another assessment/examination instrument as authorized by the Dean of the College. The CPCE may not be scheduled before the Practicum and must be completed by the conclusion of Internship B. If the student does not receive a passing score with their first attempt, s/he may take this exam up to three times before being scholastically suspended, permanently withdrawn, from the program.

Academic Standing and Minimum Grade Requirements for the MSC/CCMH
• Students in this program may not attend any further courses after being assigned a grade of incomplete in a course.
• MSC students will be placed on Scholastic Disqualification if a minimum grade of "B-" is not attained in any course. If a student repeats a course due to receiving a grade that is less than a "B-" and does not receive a grade of "B-" or better the second time, the student will be scholastically suspended, permanently withdrawn, from this program.
• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have fulfilled the requirements for reentry as determined by the Campus College Chair.
• Students must successfully complete CNSL/503R Graduate Portfolio Residency I in order to continue in this program. Students who don’t successfully complete CNSL/503R may not enroll in any subsequent coursework until the course has been successfully completed. Students who fail CNSL/503R may repeat the course after three (3) months. If the student does not meet the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.
• Students in the College of Social Science graduate programs may not transfer credit to the University from courses taken from other schools while academically or scholastically disqualified.

Residency Requirements and Course Waivers for the MSC/CCMH
• Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• The following courses in the Required Course of Study may not be waived: CCMH 515, CCMH 522, CCMH 547, CCMH 548, CCMH 558, CCMH 565, CCMH 581, CCMH 592, CCMH 597A, CCMH 597C, CCMH 597D, CNSL 500, CNSL 503R, CNSL 513R, CNSL 523R

Additional Academic Program Re-entry Policy for the MSC/CCMH

All students who have been out of attendance for one (1) year or more in a counseling program must retake and pass the most recently graded Residency class.

If a student is required to retake CNSL/503R Residency I: Basic Helping Competencies upon re-entry and does not pass the course, the student may reapply for the Counseling program in three (3) months and would be required to retake and pass CNSL/503R. A student failing CNSL/503R on the second attempt, must wait six (6) months before reapplying. Passing CNSL/503R is limited to a total of three attempts.

Course Descriptions for the MSC/CCMH

CCMH 506 ...............................................................................3 credits

Orientation to the Counseling Profession

CCMH 506 is a 3-week orientation required for specified counseling program applicants. Students will explore the field of counseling and options for a career path to determine their readiness for entry into a graduate program in counseling. Students are required to take a career inventory to examine their interests and aptitude for acquiring the skills needed in the counseling professions. Students also begin to identify their personal motives for a career in the counseling field. Additional topics include orientation to University of Phoenix learning platforms, the online library, graduate-level writing expectations, and the broader idea of navigating graduate school and studies.

CCMH 504 ...............................................................................3 credits

Individual and Family Development Across the Life Span

This course presents students with theoretical frameworks to foster an understanding of the various dimensions of human development. Emphasis is placed on biological, cognitive, and psychosocial development within the context of gender, family systems, social roles, and culture.

CCMH 506 ...............................................................................3 credits

Personality Theories and Counseling Models

This course enables students to differentiate among the primary theoretical models of personality theory and counseling practice, including psychodynamic, affective, cognitive behavioral, humanistic, interpersonal, multicultural, and systems theory. A focus on evidence-based practices that incorporate cultural diversity issues with population-specific approaches is significant feature of this course. Emphasis is on the importance of students recognizing belief systems that accurately reflect their own personal style and to recognize strategies and approaches likely to be most successful with a particular client population. Students have opportunities to establish a strong theoretical foundation as the basis of clinical practice and to evaluate and assess clinical situations for implementation of therapeutic interventions that are gender and culturally appropriate. Assessment and intervention for emergency/crisis is introduced.

CCMH 515 ...............................................................................3 credits

Legal, Ethical, and Professional Issues in Counseling

This course covers the legal and ethical responsibilities of the counseling professional. Students learn to interpret and act upon situations appropriately and effectively. Content includes issues such as client rights, confidentiality, duty to warn and protect, dual relationships, supervision and consulting, ethics with special populations, and ethical decision-making models.

CCMH 511 ...............................................................................3 credits

Fundamental Counseling Skills

This introductory counseling skills course introduces students to fundamental helping skills. Students will develop a range of basic communication patterns to facilitate a healthy therapeutic relationship between counselor and client. Students learn counseling and communication skills such as, attending behaviors, eliciting, structuring, and summarizing.

CCMH 510 ...............................................................................3 credits

Research Methods for Mental Health Counselors

This course provides an overview of the fundamentals of research and evaluation in the counseling profession. Topics include critical analysis of research literature, statistical analysis, qualitative and quantitative research methods, needs assessment, and program evaluation. Emphasis is placed on understanding connections between research design, theories, and the utilization of results in the professional practice of counseling.

CCMH 512 ...............................................................................3 credits

Multi-Cultural Issues in Mental Health Counseling

This course is designed to be a foundation for understanding diversity among clients in a pluralistic society. Emphasis will be on integrating awareness, knowledge, and skills related to counseling differences and similarities based on age, race, ethnicity, national origin, religious affiliations, gender identification, sexual orientation, physical/mental limitations, social class, etc.

CCMH 547 ...............................................................................3 credits

Basic Clinical Assessment and Psychometrics

This course introduces students to models and tools of clinical assessment and diagnosis techniques, including tests and test reports used in counseling and behavioral analysis. Students use the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) to practice writing clear, accurate, and useful intake assessments, mental status examinations, and outcome-based treatment planning. Special focus is placed on psychometric properties of tests, test selection criteria, administration, interpretation, and reporting of test results. Multicultural and ethical issues in assessment and psychometrics are also explored.
CCMH 548: Psychopathology: Advanced Clinical Assessment

Students build on the skills gained in CCMH 544 (Introduction to Clinical Assessment), focusing on the more complex or problematic disorders with particular focus on personality disorders. Students enhance their skills by using the DSM™ for report-writing and treatment plan development. Emphasis is on accepted treatment approaches and outcome-based assessments; the development of critical thinking skills; and on multicultural, legal, and ethical issues.

CCMH 522: Individual Counseling

This course focuses on intensive skill building in individual counseling. The relationship between assessment, theory, application of strategy and intervention, setting goals with clients, closure, and referral are emphasized as essential to the counseling environment. Emphasis is also placed on treatment plans, ethics, and cultural diversity.

CCMH 568: Group Counseling

This course provides students with intensive knowledge, awareness, and skill-building in group counseling. Content emphasizes such areas as different types of groups, dynamics, norms and boundaries, leadership styles, leading and co-leading, and treatment plans. Confidentiality, selection procedures, ethics, and diversity are included as key components of effective group counseling practice.

CNSL 513R: Residency II

This 3-day residency course provides an opportunity for students to observe, practice, and demonstrate competency in intermediate counseling skills. Topics include professional and personal development, oral communication skills, research methodologies, and sensitivity to diversity issues. Students will demonstrate intake, assessment, provisional diagnoses, and treatment planning abilities. Students also practice facilitation of group therapy and demonstrate skills in clinical case staffing. The core of this residency focuses on practicing group work theory and application in a variety of group therapy simulations. The capstone of the residency is staffing a clinical case and role play.

CCMH 540: Career and Vocational Counseling

This course provides the student with a comprehensive overview of vocational theory and career counseling. It includes the historical foundations of vocational theory and the relationship of these to skills and techniques utilized in career counseling and vocational development practices. Vocational and career counseling is examined as an integral component of the overall assessment and treatment of clients representing diverse populations found within the scope of community, mental health, and marriage and family counseling. Emphasis is placed on the examination of adults in transition and the nature of work in a changing world. Students develop competencies necessary to provide career and vocational counseling to clients across the lifespan.

CCMH 561: Dependency and Addictions

This course addresses addiction concepts and counseling practices. Topics include an overview of dependency theories, major substances of abuse, assessment, diagnosis, treatment modalities, special topics, and working with diverse populations.

CCMH 565: Family, Couple, and Child Counseling

This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories; address integrative approaches to assessment and diagnosis in family therapy; and explore systemic approaches to treatment of issues common to families and children in clinical settings.

CCMH 558: Crisis Intervention and Trauma

This course provides students with an in-depth evaluation of crisis and trauma counseling, including emergency and disaster situations. Students examine crisis theory, methods of crisis response, psychological effects associated with trauma, assessment strategies, and intervention models. Students analyze theoretical approaches as they relate to crisis management and trauma counseling.

CMHC 551: Human Sexuality and Sex Therapy

The goal of this course is to learn about the many facets of human sexuality and the treatment of sexual dysfunctions in a safe and respectful environment. Topics include the physiology, psychology, and sociology of sexuality, including the effects of sexual attitudes and functioning on individuals and families. Clinical applications, including the treatment of sexual difficulty and dysfunction will also be explored. Students will develop familiarity with the language and terms of sexology and demonstrate an ability to apply this knowledge to clinical situations.

CCMH 581: Supervision/Management in Clinical Mental Health Counseling

This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories, address integrative approaches to assessment and diagnosis in family therapy, and explore systemic approaches to treatment of issues common to families and children in clinical settings.

CNSL 523R: Residency III

The final 3-day residency in the Clinical Mental Health Counseling online program focuses on advanced clinical counseling skills and competencies. This residency is used to determine the student’s readiness for work with diverse populations during clinical placement in practicum and internship courses. Students demonstrate skills in case conceptualization, diagnosis and rationalization, treatment planning using evidence-based approaches, and cultural and career awareness. Additional counseling topics include crisis and trauma, professional orientation and identity, personal growth and self-care concepts, and completion of a scenario-based exam.
CCMH 592 ..........................................................................................3 credits

Practicum in Clinical Mental Health Counseling
This course focuses on the assessment and continuing development of student counseling skills. Students have a variety of opportunities to receive feedback and to evaluate their ability to integrate theory into practice. Students determine their styles and strengths as professional counseling practitioners, as well as identify areas needing further development. Individualized practice sessions and feedback are designed into the course.

CCMH 597A ..........................................................................................3 credits

Internship A
Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

CCMH 597B ..........................................................................................3 credits

Internship B
Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

CCMH 597C ..........................................................................................3 credits

Internship C
Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

Master of Science in Psychology

The following Master of Science in Psychology (MSP) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Psychology focuses on the scientific study of human behavior including cognition, motivation and emotion. The program provides training in four core areas: biological bases of behavior, acquired or learned bases of behavior, social, cultural and systemic influences on behavior and individual differences in behavior. Students will learn how the science of psychology is advanced through research. Emphasis is placed on critical thinking, problem-solving and the application of knowledge to problems and issues related to the human experience. This program is not designed to prepare students for professional licensure. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms-p.

The University reserves the right to modify the required course of study.
Additional Admission Requirements for the MSP
All applicants are expected to meet the following admissions requirements:
- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, or comparable undergraduate bachelor's degree earned at a recognized foreign institution, or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- No work experience is required for this program.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Degree Requirements for the MSP
- Completion of a minimum of 39 credits.
- A minimum grade point average (GPA) of 3.0.
- Students will declare Thesis or Non-Thesis track at the time of enrollment.
- Non-Thesis Track graduates will not be permitted to return to complete PSYCH 670 and receive a degree in any MSP Thesis Track program at the University.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Master of Science in Psychology

Scholastic Disqualification for the MSP
Students who do not pass this course with a grade of B or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and permanently withdrawn from the program.

Residency Requirements and Course Waivers for the MSP
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.
Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 600, PSYCH 610, PSYCH 660, PSYCH 665

Course Descriptions for the MSP
- COM 600 ............................................................................. 3 credits
  Communication Skills for Graduate Study
  This course provides students with an introduction to strategies for academic success at the graduate level. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, program standards, stress and time management, and collaborative processes.
  PSYCH 600 ............................................................................. 3 credits
  Developmental Psychology
  This course examines biological and environmental influences on human development across the lifespan. The biological foundations of human growth and development are presented along with major theories of cognitive, social and emotional development. Current research in developmental psychology is presented as students explore both opportunities and challenges that people face as they age. Social, cultural, systemic and ethical issues related to research and practice are also addressed.
  PSYCH 610 ............................................................................. 3 credits
  Research Methods in Psychology
  This course is an overview of the fundamentals of research methods applicable to the broad field of psychology. Topics include research design, quantitative and qualitative forms of analysis, ethical issues in research, and appropriate documentation of research processes and outcomes. Students will learn to critically read and evaluate psychological studies and apply their knowledge of research design and methodology to a variety of problems and issues in the field of psychology.
  PSYCH 620 ............................................................................. 3 credits
  Multicultural and Social Issues in Psychology
  This course provides students with an in-depth investigation of cross-cultural issues and perspectives in the field of psychology. Students learn to identify and consider cultural and systemic variables in psychological theory, research and practice. Multicultural issues, social dynamics, social justice and valued diversity are emphasized.
  PSYCH 625 ............................................................................. 3 credits
  Statistics for the Behavior Sciences
  This course presents fundamental statistical concepts and tools for understanding and analyzing data from studies in the social and behavioral sciences. Topics include measures of central tendency and dispersion, probability theory, data distributions, significance testing and statistical inference. Students will learn how to analyze and interpret data from psychological studies using descriptive statistics, correlational methods, t-tests and analysis of variance procedures.
  PSYCH 630 ............................................................................. 3 credits
  Physiological Psychology
  This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system.
nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

**PSYCH 635** ................................................................. 3 credits

**Psychology of Learning**
This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.

**PSYCH 640** ................................................................. 3 credits

**Cognitive Psychology**
This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.

**PSYCH 645** ................................................................. 3 credits

**Personality Theories**
This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective, cognitive-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.

**PSYCH 660** ................................................................. 3 credits

**Psychopathology**
This course will introduce students to the major categories of psychopathology as presented in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Mental disorders and their etiologies will be conceptualized from different perspectives, including cultural, biological, psychodynamic, cognitive-behavioral, existential and systemic. Ethical issues related to research and practice in the field will be addressed. Students will be challenged to consider various definitions of normality/abnormality, the process of rendering a diagnosis, and the symptoms, causes and interventions for commonly occurring mental disorders.

**PSYCH 665** ................................................................. 3 credits

**Psychometrics**
This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence and personality assessment instruments.

**PSYCH 660** ................................................................. 3 credits

**Ethics and Professional Issues**
This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.

**PSYCH 665** ................................................................. 3 credits

**Integrative Capstone: Psychology Past and Present**
This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.

**Master of Science in Psychology (Thesis Track)**

The following Master of Science in Psychology (MSP) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. 510
Students will declare Thesis or Non-Thesis track at the time of application.

- A minimum grade point average (GPA) of 3.0.
- Completion of a minimum of 42 credits.
- Signed Thesis Requirement Addendum Form.

Master's Thesis
The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the MSP**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, or comparable undergraduate bachelor's degree earned at a recognized foreign institution, or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- No work experience is required for this program.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- Signed Thesis Requirement Addendum Form.

**Degree Requirements for the MSP**

- Completion of a minimum of 42 credits.
- A minimum grade point average (GPA) of 3.0.
- Students will declare Thesis or Non-Thesis track at the time of enrollment.
- Concentrations and Thesis Track are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Master of Science in Psychology.

**Academic Progression Requirements for the MSP**

- Students must successfully complete COM 600 with a B or better.
- The following course contains multiple requirements for academic progression, therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in the following course shall not exceed 10 students: PSYCH 670.
- Students must complete PSYCH 670 with a grade of Pass. Students who do not complete PSYCH 670 with a grade of Pass by the third attempt cannot continue in the thesis track program, but have the option to change to the non-thesis track of the program.

**Scholastic Disqualification for the MSP**

COM 600 must be completed with a grade of B or better. Students who do not pass this course with a grade of B or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and permanently withdrawn from the program.

**Residency Requirements and Course Waivers for the MSP**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 33 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 600, PSYCH 610, PSYCH 660, PSYCH 665, PSYCH 670.

**Course Descriptions for the MSP**

**Communication Skills for Graduate Study**

This course provides students with an introduction to strategies for academic success at the graduate level. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, program standards, stress and time management, and collaborative processes.

**Developmental Psychology**

This course examines biological and environmental influences on human development across the lifespan. The biological foundations of human growth and development are presented along with major theories of cognitive, social and emotional development. Current research in developmental psychology is presented as students explore both opportunities and challenges that people face as they age. Social, cultural, systemic and ethical issues related to research and practice are also addressed.

**Research Methods in Psychology**

This course is an overview of the fundamentals of research methods applicable to the broad field of psychology. Topics include...
research design, quantitative and qualitative forms of analysis, ethical issues in research, and appropriate documentation of research processes and outcomes. Students will learn to critically read and evaluate psychological studies and apply their knowledge of research design and methodology to a variety of problems and issues in the field of psychology.

**PSYCH 620** ........................................................................................................3 credits

**Multicultural and Social Issues in Psychology**

This course provides students with an in-depth investigation of cross-cultural issues and perspectives in the field of psychology. Students learn to identify and consider cultural and systemic variables in psychological theory, research and practice. Multicultural issues, social dynamics, social justice and valued diversity are emphasized.

**PSYCH 625** ........................................................................................................3 credits

**Statistics for the Behavior Sciences**

This course presents fundamental statistical concepts and tools for understanding and analyzing data from studies in the social and behavioral sciences. Topics include measures of central tendency and dispersion, probability theory, data distributions, significance testing and statistical inference. Students will learn how to analyze and interpret data from psychological studies using descriptive statistics, correlational methods, t-tests and analysis of variance procedures.

**PSYCH 630** ........................................................................................................3 credits

**Physiological Psychology**

This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

**PSYCH 635** ........................................................................................................3 credits

**Psychology of Learning**

This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.

**PSYCH 640** ........................................................................................................3 credits

**Cognitive Psychology**

This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.

**PSYCH 645** ........................................................................................................3 credits

**Personality Theories**

This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective, cognitive-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.

**PSYCH 650** ........................................................................................................3 credits

**Psychopathology**

This course will introduce students to the major categories of psychopathology as presented in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Mental disorders and their etiologies will be conceptualized from different perspectives, including cultural, biological, psychodynamic, cognitive-behavioral, existential and systemic. Ethical issues related to research and practice in the field will be addressed. Students will be challenged to consider various definitions of normality/abnormality, the process of rendering a diagnosis, and the symptoms, causes and interventions for commonly occurring mental disorders.

**PSYCH 655** ........................................................................................................3 credits

**Psychometrics**

This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence and personality assessment instruments.

**PSYCH 660** ........................................................................................................3 credits

**Ethics and Professional Issues**

This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.

**PSYCH 665** ........................................................................................................3 credits

**Integrative Capstone: Psychology Past and Present**

This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.

**PSYCH 670** ........................................................................................................3 credits

**Master's Thesis**

Only those students who have developed a detailed and manageable research proposal in PSYCH/665 may enroll in this course. During the course, the student will implement a small-scale or quantitative study, analyze the data and document the research in an APA style manuscript.
Master of Science in Psychology Concentration in Industrial-Organizational Psychology

The following Master of Science in Psychology Concentration in Industrial-Organizational Psychology (MSP/I-O) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Psychology focuses on the scientific study of human behavior including cognition, motivation and emotion. The program provides training in four core areas: biological bases of behavior, acquired or learned bases of behavior, social, cultural and systemic influences on behavior and individual differences in behavior. Students will learn how the science of psychology is advanced through research. Emphasis is placed on critical thinking, problem-solving and the application of knowledge to problems and issues related to the human experience. This program is not designed to prepare students for professional licensure.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms-p.

**Scholastic Disqualification for the MSP/I-O**

• Students who do not pass this course with a grade of B or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and permanently withdrawn from the program.

**Residency Requirements and Course Waivers for the MSP/I-O**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 42 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 600, PSYCH 610, PSYCH 660, PSYCH 665

Course Descriptions for the MSP/I-O

COM 600 ...............................................................................3 credits
Communication Skills for Graduate Study
This course provides students with an introduction to strategies for academic success at the graduate level. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, program standards, stress and time management, and collaborative processes.

PSYCH 600 ..............................................................................3 credits
Developmental Psychology
This course examines biological and environmental influences on human development across the lifespan. The biological foundations of human growth and development are presented along with major theories of cognitive, social and emotional development. Current research in developmental psychology is presented as students explore both opportunities and challenges that people face as they age. Social, cultural, systemic and ethical issues related to research and practice are also addressed.

PSYCH 610 ...............................................................................3 credits
Research Methods in Psychology
This course is an overview of the fundamentals of research methods applicable to the broad field of psychology. Topics include research design, quantitative and qualitative forms of analysis, ethical issues in research, and appropriate documentation of research processes and outcomes. Students will learn to critically read and evaluate psychological studies and apply their knowledge of research design and methodology to a variety of problems and issues in the field of psychology.

PSYCH 620 ................................................................................3 credits
Multicultural and Social Issues in Psychology
This course provides students with an in-depth investigation of cross-cultural issues and perspectives in the field of psychology. Students learn to identify and consider cultural and systemic variables in psychological theory, research and practice. Multicultural issues, social dynamics, social justice and valued diversity are emphasized.

PSYCH 625 ................................................................................3 credits
Statistics for the Behavior Sciences
This course presents fundamental statistical concepts and tools for understanding and analyzing data from studies in the social and behavioral sciences. Topics include measures of central tendency and dispersion, probability theory, data distributions, significance testing and statistical inference. Students will learn how to analyze and interpret data from psychological studies using descriptive statistics, correlational methods, t-tests and analysis of variance procedures.

PSYCH 700.........................................................................................3 credits
Introduction to I/O
This survey course introduces the domains of the I/O program. The topics include an overview of the four I/O program domains: human resource management, factors influencing employee performance, organization development, and research relevance within the I/O field of study. Furthermore, the learner will gain a firm understanding of the evolution of the I/O field of study from the foundations of the field to the present day, the various ways that I/O psychologists contribute to organizations, broader scientific community, and the main ethical issues likely to be encountered in the field. The survey course covers a wide variety of topics, ranging from employee selection to organizational development, with the goal of exposing students to the main issues influenced by I/O psychologists.

PSYCH 630 .........................................................................................3 credits
Physiological Psychology
This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

PSYCH 635 .........................................................................................3 credits
Psychology of Learning
This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.

PSYCH 640 .........................................................................................3 credits
Cognitive Psychology
This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.

PSYCH 705.........................................................................................3 credits
Personnel Psychology
Learners gain an appreciation for the processes I/O psychologists use to recruit, select, place, and develop employees/managers/executives, including discussions about tests, assessment centers, and interviews. Furthermore, the course examines the role of the I/O psychologist in awareness, preparedness, and response to behavioral problems or issues in the workplace.

PSYCH 645.........................................................................................3 credits
Personality Theories
This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective, cognitive-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.
Psychopathology

In this course learners are familiarized with basic models of learning, as well as the different approaches to training, design, delivery, and measurement, that are necessary for organizational development programs. A key emphasis of the class concerns designing essential and effective training objectives that are aligned with an organization’s mission.

Psychometrics

This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural, and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence, and personality assessment instruments.

Work Motivation and Job Attitudes

This course will allow learners to evaluate various theories of motivation and develop a familiarity and understanding of pertinent research in the field. Learners will be able to relate motivational theories to enhance employee attitudes, effectiveness, and well-being in the midst of organizational stressors, health and safety issues, and outsourcing/downsizing.

Ethics and Professional Issues

This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research, and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.

Integrative Capstone: Psychology Past and Present

This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.

Master of Science in Psychology Concentration in Industrial-Organizational Psychology (Thesis Track)

The following Master of Science in Psychology Concentration in Industrial-Organizational Psychology (MSP/I-O) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Master’s Thesis

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MSP/I-O
All applicants are expected to meet the following admissions requirements:
• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, or comparable undergraduate bachelor’s degree earned at a recognized foreign institution, or a graduate degree from an ABA accredited institution (e.g., JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• No work experience is required for this program.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• Signed Thesis Requirement Addendum Form.

Degree Requirements for the MSP/I-O
• Completion of a minimum of 54 credits.
• A minimum grade point average (GPA) of 3.0.
• Students will declare Thesis or Non-Thesis track at the time of enrollment.
• Concentrations and Thesis Track are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
Master of Science in Psychology

Academic Progression Requirements for the MSP/I-O
• Students must successfully complete COM 600 with a B or better.
• The following course contains multiple requirements for academic progression, therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in the following course shall not exceed 10 students: PSYCH 670
• Students must complete PSYCH 670 with a grade of Pass. Students who do not complete PSYCH 670 with a grade of Pass by the third attempt cannot continue in the thesis track program, but have the option to change to the non-thesis track of the program.

Scholastic Disqualification for the MSP/I-O
COM 600 must be completed with a grade of B or better. Students who do not pass this course with a grade of B or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and permanently withdrawn from the program.

Residency Requirements and Course Waivers for the MSP/I-O
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 45 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 600, PSYCH 610, PSYCH 660, PSYCH 665, PSYCH 670

Course Descriptions for the MSP/I-O
COM 600 .................................................................3 credits

The topics include an overview of the four I/O program domains: human resource management, factors influencing employee performance, organization development, and research relevance within the I/O field of study. Furthermore, the learner will gain a firm understanding of the evolution of the I/O field of study from the foundations of the field to the present day, the various ways that I/O psychologists contribute to organizations, broader scientific community, and the main ethical issues likely to be encountered in the field. The survey course covers a wide variety of topics, ranging from employee selection to organizational development, with the goal of exposing students to the main issues influenced by I/O psychologists.

PSYCH 630 ................................................................. 3 credits

**Physiological Psychology**

This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

PSYCH 635 ................................................................. 3 credits

**Psychology of Learning**

This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.

PSYCH 640 ................................................................. 3 credits

**Cognitive Psychology**

This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.

PSYCH 705 ................................................................. 3 credits

**Personnel Psychology**

Learners gain an appreciation for the processes I/O psychologists use to recruit, select, place, and develop employees/managers/executives, including discussions about tests, assessment centers, and interviews. Furthermore, the course examines the role of the I/O psychologist in awareness, preparedness, and response to behavioral problems or issues in the workplace.

PSYCH 645 ................................................................. 3 credits

**Personality Theories**

This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.

PSYCH 706 ................................................................. 3 credits

**Human Performance, Assessment, and Feedback**

In this course learners are familiarized with basic models of learning, as well as the different approaches to training, design, delivery, and measurement, that are necessary for organizational development programs. A key emphasis of the class concerns designing essential and effective training objectives that are aligned with an organization’s mission.

PSYCH 650 ................................................................. 3 credits

**Psychopathology**

This course will introduce students to the major categories of psychopathology as presented in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Mental disorders and their etiologies will be conceptualized from different perspectives, including cultural, biological, psychodynamic, cognitive-behavioral, existential and systemic. Ethical issues related to research and practice in the field will be addressed. Students will be challenged to consider various definitions of normality/abnormality, the process of rendering a diagnosis, and the symptoms, causes and interventions for commonly occurring mental disorders.

PSYCH 655 ................................................................. 3 credits

**Psychometrics**

This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence and personality assessment instruments.

PSYCH 708 ................................................................. 3 credits

**Work Motivation and Job Attitudes**

This course will allow learners to evaluate various theories of motivation and develop a familiarity and understanding of pertinent research in the field. Learners will be able to relate motivational theories to enhance employee attitudes, effectiveness, and well being in the midst of organizational stressors, health and safety issues, and outsourcing/downsizing.
PSYCH 660 .................................................................3 credits
Ethics and Professional Issues
This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.

PSYCH 665 .................................................................3 credits
Integrative Capstone: Psychology Past and Present
This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.

PSYCH 670 .................................................................3 credits
Master's Thesis
Only those students who have developed a detailed and manageable research proposal in PSYCH/665 may enroll in this course. During the course, the student will implement a small-scale or quantitative study, analyze the data and document the research in an APA style manuscript.

Master of Science in Psychology Concentration in Behavioral Health

The following Master of Science in Psychology Concentration in Behavioral Health (MSP/BH) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Psychology focuses on the scientific study of human behavior including cognition, motivation and emotion. The program provides training in four core areas: biological bases of behavior, acquired or learned bases of behavior, social, cultural and systemic influences on behavior and individual differences in behavior. Students will learn how the science of psychology is advanced through research. Emphasis is placed on critical thinking, problem-solving and the application of knowledge to problems and issues related to the human experience. This program is not designed to prepare students for professional licensure. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MSP/BH

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, or comparable undergraduate bachelor’s degree earned at a recognized foreign institution, or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- No work experience is required for this program.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Degree Requirements for the MSP/BH

- Completion of a minimum of 48 credits.
- A minimum grade point average (GPA) of 3.0.
- Students will declare Thesis or Non-Thesis track at the time of enrollment.
• Non-Thesis Track graduates will not be permitted to return to complete PSYCH 670 and receive a degree in any MSP Thesis Track program at the University.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Master of Science in Psychology

Scholastic Disqualification for the MSP/BH
COM 600 must be completed with a grade of B or better. Students who do not pass this course with a grade of B or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and permanently withdrawn from the program.

Residency Requirements and Course Waivers for the MSP/BH
Students must establish University residency requirement for degree conferral. The University requires that the majority of coursework, 39 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 600, PSYCH 610, PSYCH 660, PSYCH 665

Course Descriptions for the MSP/BH

Communication Skills for Graduate Study
This course provides students with an introduction to strategies for academic success at the graduate level. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, program standards, stress and time management, and collaborative processes.

PSYCH 660 ................................................................. 3 credits

Developmental Psychology
This course examines biological and environmental influences on human development across the lifespan. The biological foundations of human growth and development are presented along with major theories of cognitive, social and emotional development.

Current research in developmental psychology is presented as students explore both opportunities and challenges that people face as they age. Social, cultural, systemic and ethical issues related to research and practice are also addressed.

PSYCH 610 ................................................................. 3 credits

Research Methods in Psychology
This course is an overview of the fundamentals of research methods applicable to the broad field of psychology. Topics include research design, quantitative and qualitative forms of analysis, ethical issues in research, and appropriate documentation of research processes and outcomes. Students will learn to critically read and evaluate psychological studies and apply their knowledge of research design and methodology to a variety of problems and issues in the field of psychology.

PSYCH 620 ................................................................. 3 credits

Multicultural and Social Issues in Psychology
This course provides students with an in-depth investigation of cross-cultural issues and perspectives in the field of psychology. Students learn to identify and consider cultural and systemic variables in psychological theory, research and practice. Multicultural issues, social dynamics, social justice and valued diversity are emphasized.

PSYCH 625 ................................................................. 3 credits

Statistics for the Behavior Sciences
This course presents fundamental statistical concepts and tools for understanding and analyzing data from studies in the social and behavioral sciences. Topics include measures of central tendency and dispersion, probability theory, data distributions, significance testing and statistical inference. Students will learn how to analyze and interpret data from psychological studies using descriptive statistics, correlational methods, t-tests and analysis of variance procedures.

PSYCH 630 ................................................................. 3 credits

Physiological Psychology
This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

PSYCH 626 ................................................................. 3 credits

Elements of Health Psychology and Behavioral Health
This course is an overview of the field of health psychology and the origins of the biopsychosocial model from a historical perspective, including the biological, psychological and social contexts of the science. It provides students with information about the biological foundations of health and illness, as well as current research in health psychology. The dangers of “unscientific” applications and the importance of using critical thinking and evidence-based research when formulating strategies are described.

PSYCH 635 ................................................................. 3 credits

Psychology of Learning
This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.
This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.

PSYCH 627 ..............................................................................3 credits

Illness Prevention and Health Promotion
This course examines research on the basic relationships between behavior and health, including stress, eating and obesity, substance abuse, and chronic illness such as cardiovascular disease, cancer and HIV-AIDS. Students will learn the major concepts of illness prevention and health promotion, with a focus on both personal behavioral factors and sociocultural determinants. Special attention will be given to the disparities in health status and prevention efforts with regard to race, gender, ethnicity, and socioeconomic status.

PSYCH 645 ..............................................................................3 credits

Personality Theories
This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective, cognitive-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.

PSYCH 650 ..............................................................................3 credits

Psychopathology
This course will introduce students to the major categories of psychopathology as presented in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Mental disorders and their etiologies will be conceptualized from different perspectives, including cultural, biological, psychodynamic, cognitive-behavioral, existential and systemic. Ethical issues related to research and practice in the field will be addressed. Students will be challenged to consider various definitions of normality/abnormality, the process of rendering a diagnosis, and the symptoms, causes and interventions for commonly occurring mental disorders.

PSYCH 628 ..............................................................................3 credits

Evidence-based Interventions in Behavioral Health
This course provides a description of those therapeutic interventions which are based on outcome studies. Students will learn practical assessment and intervention strategies for the major disorders where health psychology plays a role, including chronic stress and pain, obesity and eating disorders, substance abuse, HIV and AIDS, diabetes and hypertension, insomnia and cancer. Methods will include self-monitoring, relaxation and meditation techniques, stimulus control, self-management, and cognitive-behavioral therapies. Complementary and alternative therapies which have shown clinical efficacy will also be described.

PSYCH 655 ..............................................................................3 credits

Psychometrics
This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence and personality assessment instruments.

PSYCH 660 ..............................................................................3 credits

Ethics and Professional Issues
This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.

PSYCH 665 ..............................................................................3 credits

Integrative Capstone: Psychology Past and Present
This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.

Master of Science in Psychology Concentration in Behavioral Health (Thesis Track)

The following Master of Science in Psychology Concentration in Behavioral Health (MSP/BH) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Psychology focuses on the scientific study of human behavior including cognition, motivation and emotion. The program provides training in four core areas: biological bases of behavior, acquired or learned bases of behavior, social, cultural and systemic influences on behavior and individual differences in behavior. Students will learn how the science of psychology is advanced through research. Emphasis is placed on critical thinking, problem-solving and the application of knowledge to problems and issues related to the human experience. This program is not designed to prepare students for professional licensure.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms-p.

**Master of Science in Psychology for this program will read as:**

Master of Science in Psychology

**Degree Requirements for the MSP/BH**

- Completion of a minimum of 51 credits.
- A minimum grade point average (GPA) of 3.0.
- Students will declare Thesis or Non-Thesis track at the time of enrollment.
- Concentrations and Thesis Track are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Master of Science in Psychology

**Academic Progression for the MSP/BH**

- Students must successfully complete COM 600 with a B or better.
- The following course contains multiple requirements for academic progression, therefore sufficient time is needed for faculty to conduct a thorough assessment of student coursework. Therefore enrollment in the following course shall not exceed 10 students: PSYCH 670
- Students must complete PSYCH 670 with a grade of Pass. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and permanently withdrawn from the program.

**Scholastic Disqualification for the MSP/BH**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 42 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

**Residency Requirements and Course Waivers for the MSP/BH**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 42 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waiver a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- No work experience is required for this program.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- Signed Thesis Requirement Addendum Form.
The following courses in the Required Course of Study may not be waived: COM 600, PSYCH 610, PSYCH 660, PSYCH 665, PSYCH 670

Course Descriptions for the MSP/BH

COM 600 ................................................................. 3 credits
Communication Skills for Graduate Study
This course provides students with an introduction to strategies for academic success at the graduate level. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, program standards, stress and time management, and collaborative processes.

PSYCH 600 ................................................................. 3 credits
Developmental Psychology
This course examines biological and environmental influences on human development across the lifespan. The biological foundations of human growth and development are presented along with major theories of cognitive, social and emotional development. Current research in developmental psychology is presented as students explore both opportunities and challenges that people face as they age. Social, cultural, systemic and ethical issues related to research and practice are also addressed.

PSYCH 610 ................................................................. 3 credits
Research Methods in Psychology
This course is an overview of the fundamentals of research methods applicable to the broad field of psychology. Topics include research design, quantitative and qualitative forms of analysis, ethical issues in research, and appropriate documentation of research processes and outcomes. Students will learn to critically read and evaluate psychological studies and apply their knowledge of research design and methodology to a variety of problems and issues in the field of psychology.

PSYCH 620 ................................................................. 3 credits
Multicultural and Social Issues in Psychology
This course provides students with an in-depth investigation of cross-cultural issues and perspectives in the field of psychology. Students learn to identify and consider cultural and systemic variables in psychological theory, research and practice. Multicultural issues, social dynamics, social justice and valued diversity are emphasized.

PSYCH 625 ................................................................. 3 credits
Statistics for the Behavior Sciences
This course presents fundamental statistical concepts and tools for understanding and analyzing data from studies in the social and behavioral sciences. Topics include measures of central tendency and dispersion, probability theory, data distributions, significance testing and statistical inference. Students will learn how to analyze and interpret data from psychological studies using descriptive statistics, correlational methods, t-tests and analysis of variance procedures.

PSYCH 630 ................................................................. 3 credits
Physiological Psychology
This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

PSYCH 626 ................................................................. 3 credits
Elements of Health Psychology and Behavioral Health
This course is an overview of the field of health psychology and the origins of the biopsychosocial model from a historical perspective, including the biological, psychological and social contexts of the science. It provides students with information about the biological foundations of health and illness, as well as current research in health psychology. The dangers of “unscientific” applications and the importance of using critical thinking and evidence-based research when formulating strategies are described.

PSYCH 635 ................................................................. 3 credits
Psychology of Learning
This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.

PSYCH 640 ................................................................. 3 credits
Cognitive Psychology
This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.

PSYCH 647 ................................................................. 3 credits
Illness Prevention and Health Promotion
This course examines research on the basic relationships between behavior and health, including stress, eating and obesity, substance abuse, and chronic illness such as cardiovascular disease, cancer and HIV-AIDS. Students will learn the major concepts of illness prevention and health promotion, with a focus on both personal behavioral factors and sociocultural determinants. Special attention will be given to the disparities in health status and prevention efforts with regard to race, gender, ethnicity, and socioeconomic status.

PSYCH 645 ................................................................. 3 credits
Personality Theories
This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective, cognitive-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.

PSYCH 650 ................................................................. 3 credits
Psychopathology
This course will introduce students to the major categories of psychopathology as presented in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Mental disorders and their etiologies will be conceptualized from different perspectives, including cultural, biological, psychodynamic, cognitive-behavioral, existential and systemic. Ethical issues related to research and practice in the field will be addressed. Students will be challenged to consider various definitions of normality/abnormality, the process of rendering a diagnosis, and the symptoms, causes and interventions for commonly occurring mental disorders.
PSYCH 628 .............................................................................. 3 credits
Evidence-based Interventions in Behavioral Health
This course provides a description of those therapeutic interventions which are based on outcome studies. Students will learn practical assessment and intervention strategies for the major disorders where health psychology plays a role, including chronic stress and pain, obesity and eating disorders, substance abuse, HIV and AIDS, diabetes and hypertension, insomnia and cancer. Methods will include self-monitoring, relaxation and meditation techniques, stimulus control, self-management, and cognitive-behavioral therapies. Complementary and alternative therapies which have shown clinical efficacy will also be described.

PSYCH 655 ............................................................................. 3 credits
Psychometrics
This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence and personality assessment instruments.

PSYCH 660 ............................................................................. 3 credits
Ethics and Professional Issues
This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.

PSYCH 665 ............................................................................. 3 credits
Integrative Capstone: Psychology Past and Present
This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.

PSYCH 670 .............................................................................. 3 credits
Master’s Thesis
Only those students who have developed a detailed and manageable research proposal in PSYCH/665 may enroll in this course. During the course, the student will implement a small-scale or quantitative study, analyze the data and document the research in an APA style manuscript.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
The University of Phoenix School of Business offers the Master of Business Administration, Master of Management, and Master of Science in Accountancy programs. Although only one MBA degree may be earned, MBA students may choose to pursue the MBA or a concentration in a variety of areas. The University of Phoenix School of Business also offers graduate programs in management and accountancy, which can be completed in addition to the MBA degree program.

**Master of Business Administration**

The following Master of Business Administration (MBA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Business Administration (MBA) program prepares students in the functional areas of business allowing them to develop managerial skills necessary to be effective in a rapidly changing business environment. The program is based on current research of managerial competencies and graduate business standards as tested by existing national standardized graduate business examinations.

In addition to the University of Phoenix learning goals, the MBA program prepares students to:

- Demonstrate the knowledge and skills needed to identify and solve organizational problems using a systematic decision-making approach.
- Demonstrate the knowledge and skills needed to manage, develop, and motivate personnel to meet changing organizational needs in a global business environment.
- Apply critical analysis of alternatives under conditions of uncertainty.
- Develop awareness of their own values and the effect of those values on organizational decision making.
- Assess whether an organization’s plans and actions align with its values.
- Comprehend the application of a significant amount of business administration knowledge within the domains of management, business law, human capital management, organizational leadership, quantitative reasoning for business, economics, accounting, applied business research & statistics, operations management, corporate finance, marketing, and strategic planning & implementation.

Students can gain additional knowledge in a concentration area through the selection and completion of up to 15 graduate-level credits in required concentration-specific courses. Students may also complete an additional concentration. Please contact your academic representative for more information.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/mba.

## Additional Admission Requirements for the MBA

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- No work experience is required for this program.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Degree Requirements for the MBA

The degree requirements for this program are the following:
• A minimum of 36 graduate credits must be completed to meet all areas of the required course of study.
• A minimum grade point average (GPA) of 3.0.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Master of Business Administration

Academic Progression Requirements for the MBA

• MGT 521 must be the first course taken.
• QRB 501 must be satisfied prior to progressing in courses in Economics, Accounting, Applied Business Research & Statistics, Operations Management, Corporate Finance, Marketing, and Strategic Planning & Implementation.
• Strategic Planning & Implementation (STR 581 or an alternative strategy course) must be taken as the last core course in the program.

Residency Requirements and Course Waivers for the MBA

• The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 30 graduate level credits at the University.
• In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:
  • The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
  • The course must have been completed within the past ten (10) years with a “B” (3.0) or better; and
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Management (MGT 521) may not be waived.
• Strategic Planning & Implementation (STR 581 or an alternative strategy course), which is the last core course in the program, may not be waived.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

• The following courses may not be waived: ACC 541, CAP GM591, EM 555, EM 595, GMGT 510, HCS 531, HCS 586, HRM 595, MGT 521, MKT 593, PM 598, QRB 501, STR 581

The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses. In the bridge program, a master’s degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master’s degree program.

Students must earn a B- or better in the doctoral level courses in order to waive them in the doctoral program.

Students who have completed Meritus University graduate MBA courses may transfer all courses earned at Meritus University into the MBA program at the University of Phoenix without limitation provided that they sign an Enrollment Agreement for the University of Phoenix MBA program by March 1, 2012. Students transferring from Meritus University to University of Phoenix will still be required to satisfy all program requirements for the University of Phoenix MBA program and complete at least 3 credits at University of Phoenix in order to obtain their MBA degree from University of Phoenix.

Course Descriptions for the MBA

MGT 521 ................................................................................. 3 credits
Management

This course applies the tools available to University of Phoenix graduate students and the competencies of successful managers to understand the functions of business. Students learn their own perceptions and values to communicate more effectively with others. Other topics include graduate business program goals, argument constructions, decision making, collaboration, and academic research.

HRM 531 ................................................................................. 3 credits
Human Capital Development

This course prepares students to address the concepts of personnel development as managers. Students learn criteria for developing effective job analysis, appraisal systems, and appropriate career development plans for employees. Other topics include personnel selection, employee compensation, benefits, training, workplace diversity, discipline, employee rights, unions, and management behaviors.

LAW 531 ................................................................................. 3 credits
Business Law

This course prepares students to evaluate the legal risks associated with business activity. Students will create proposals to manage an organization’s legal exposure. Other topics include the legal system, alternative dispute resolution, enterprise liability, product liability, international law, business risks, intellectual property, legal forms of business, and governance.

LDR 531 ................................................................................. 3 credits
Organizational Leadership

This course prepares students to apply leadership principles to the roles they play as managers. Students will discover more about themselves and learn more about the connection between the individual and the organization. Other topics include organizational culture, structure, group behavior, motivation, power, politics, organizational change, and workplace conflict.

**Accounting**

This course prepares students to apply accounting tools to make management decisions. Students learn to evaluate organizational performance from accounting information. Other topics include financial statements, cost behavior, cost allocation, budgets, and control systems.

**Quantitative Reasoning for Business**

This course applies quantitative reasoning skills to business problems. Students learn to analyze data using a variety of analytical tools and techniques. Other topics include formulas, visual representation of quantities, time value of money, and measures of uncertainty.

**Economics**

This course applies economic concepts to make management decisions. Students employ the concepts of scarce resources and opportunity costs to perform economic analysis. Other topics include supply and demand, profit maximization, market structure, macroeconomic measurement, money, trade, and foreign exchange.

**Applied Business Research and Statistics**

This course prepares students to apply statistics and probability concepts to business decisions. Students learn criteria for developing effective research questions, including the creation of appropriate sampling populations and instruments. Other topics include descriptive statistics, probability concepts, confidence intervals, sampling designs, data collection, and data analysis - including parametric and nonparametric tests of hypothesis and regression analysis.

**Operations Management**

This course applies planning and controlling concepts to increase the value of the supply chain. Students learn to evaluate and improve processes. Other topics include process selection, process design, theory of constraints, project implementation, capacity planning, lean production, facility location, and business forecasting.

**Marketing**

This course prepares students to apply marketing concepts to create and sustain customer value. Students learn to solve marketing problems in a collaborative environment. Topics include market research, customer relationships, branding, market segmentation, product development, pricing, channels, communications, and public relations.

**Strategic Planning and Implementation**

This course integrates concepts from all prior courses in the program. Students apply the concepts of strategic planning and implementation to create sustainable competitive advantage for an organization. Other topics include environmental scanning, strategic analysis, corporate social responsibility, implementation, evaluation, and risk management.

**Course Descriptions for the Accounting Concentration**

**Accounting Theory & Research**

This is the first core course in the Master of Science in Accounting (MSA). In this course, students apply accounting research tools to current accounting issues. Other topics include research of accounting questions related to: inventory, fixed assets, leases, derivative instruments, debt, contingencies, segment reporting, pensions, business combinations, consolidations, stockholder’s equity, and a program overview.

**Communications for Accountants**

In this course, students examine principles and practices of group communication in the context of the organization. Topics include an overview of group communication, culture and conflict, group formation, influence in organizational communication, organizational change, formal communications, and public communications.

**Managerial Accounting & Legal Aspects of Business**

In this course, students examine managerial accounting as part of the business’s accounting information system and legal aspects of the business enterprise. Topics include managerial accounting and capital budgeting, cost analysis; management planning and control, negotiable instruments, secured transactions, debtor/creditor relationships, property and insurance, and legal aspects of employment and environment.

**Internal Control Systems**

In this course, students gain a broad perspective of accounting and control that considers attainment of all goals of the organization, including those concerned with financial objectives. Topics include an overview of control, risk management, internal control systems, controls for current asset functions, controls for other accounting classifications, controls for information technology systems, and reporting on controls.

**Financial Reporting**

This course prepares students to address concepts of financial reporting for roles as CPAs. Students learn important criteria for calculating capital changes, applying concepts of fixed assets and cost determination, and preparing consolidated financial statements. Other topics include the professional responsibilities of CPAs, deferred taxes, cash flow statements, balance sheet preparation, restructuring of troubled debt, and the intricacies of comprehensive income.

**Auditing**

In this course, students focus on the auditing practice performed by public accountants. Topics include the CPA profession and the
auditor’s role, planning the audit, audit reporting and required communications, evaluating internal controls, audit programs for current assets and liabilities, and audit programs for other business cycles.

**ACC 547** ................................................................. 3 credits

**Taxation**

In this course, students develop an understanding of the taxation of business entities and the individuals who own those entities. Topics include tax entities, property transactions, calculating basis, gains and losses, alternative minimum tax, S-corporations and partnerships.

**ACC 548** ................................................................. 3 credits

**Not-for-Profit & Government Accounting**

In this course, students receive an overview of the budgeting, accounting, financial reporting, and auditing required of government and not-for-profit organizations. Topics include the governmental accounting, accounting records in government, fund allocation, government-wide reporting, not-for-profit accounting, governmental performance measures.

**ACC 556** ................................................................. 3 credits

**Forensic Accounting**

In this course, students are introduced to the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind these procedures. Topics include an overview of fraud and abuse, forensic evidence, substantive procedures for cash outflow irregularities, substantive procedures for asset irregularities, financial statement fraud, and examination reporting.

**ACC 557** ................................................................. 3 credits

**Accounting Ethics**

In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting ethics, ethics and information technology, and professional standards.

**Course Descriptions for the Energy Management Concentration**

**EM 555** ................................................................. 3 credits

**Energy Sector Management**

This course integrates energy technology and management opportunities in the energy sector. Students will apply knowledge of the energy sector value change to identify a business opportunity. Other topics include renewable and non-renewable energy sources, science of energy, communications, energy sector terminology, corporate social responsibility, ethics, and negotiation.

**EM 565** ................................................................. 3 credits

**Financial Management in the Energy Sector**

This course applies corporate finance concepts to make management decisions in the energy sector. Students analyze the financial merit of opportunities in renewable and non-renewable energy sources. Other topics include cash flows, business valuation, working capital, capital budgets, government sources, long-term financing, risk analysis and management, and financial planning.

**EM 575** ................................................................. 3 credits

**Energy Economics**

This course applies economic concepts to make management decisions in the energy sector. Students apply concepts of supply and demand to create an economic model of a sub sector of the energy industry. Other topics include scarce resources, opportunity costs, profit maximization, market structure, macroeconomic measurement, money, trade, foreign exchange, regulatory issues, and economic analysis.

**EM 585** ................................................................. 3 credits

**Marketing Energy**

This course prepares students to apply marketing concepts to affect public perception of energy alternatives. Students learn to solve marketing problems in a collaborative environment. Topics include market research, customer relationships, branding, market segmentation, product development, pricing, channels, communications, public relations and policy formulation.

**EM 595** ................................................................. 3 credits

**Strategic Planning and Implementation for the Energy Sector**

This capstone course integrates concepts from all prior courses in the program and the energy management concentration. Students apply the concepts of strategic planning and implementation to create sustainable competitive advantage in an energy organization. Other topics include environmental scanning, strategic analysis, corporate social responsibility, implementation, evaluation, risk management, interdependent organizational relationships, technology adoption, and scenario planning.

**Course Descriptions for the Finance Concentration**

**FIN 580** ................................................................. 3 credits

**Global Capital Markets**

This course examines the international financial environment facing firms in a globalized economy. Students will assess the impact of economic policy and financial disturbances on financial markets, exchange rates, and capital flows. Other topics include investment analysis, asset management, capital markets, hedge funds, corporate finance, and international macroeconomics.

**FIN 585** ................................................................. 3 credits

**Financial Controlling**

This course analyzes several topics concerning financial control. Students will explore design and use of cost control systems, financial performance measures for enhancing firm value, managerial incentive contracts and accounting data, and management accounting. Other topics include managing earnings and financial ratios, use of balanced scorecard to evaluate financial/nonfinancial managerial performance, and post-auditing of capital investments.

**FIN 590** ................................................................. 3 credits

**Audit and Compliance Management**

The course emphasizes concepts and principles of auditing and assurance services theory and practice. Students will explore professional standards utilized in providing auditing and other assurance services, and reporting on financial statements. Other topics include securities law and regulatory structure, professional conduct, and ethical and legal issues in securities regulation.

**FIN 591** ................................................................. 3 credits

**Real Estate Investment**

This course explores the techniques of real estate investment analysis, including financing, taxes, and decision-making criteria in today’s real estate investment environment. Students will analyze the risks and rewards of existing and proposed real estate projects to make specific financing and investment decisions. Other topics include real estate financial analysis and valuation, diversification of real estate assets, real estate taxation, and real estate law.
Mergers and Acquisitions
This course examines merger and acquisition opportunities to maximize corporate value and shareholder wealth in a competitive market environment. Students will focus on the identification, screening, selection, evaluation, and financing of activities. Other topics include business failures and restructuring strategies.
FIN 593 ................................................................. 3 credits

Investment Banking
This course examines investment banking firm organizational structure, products, risks, earnings, regulations, innovations and competition. Students will analyze the functions of the banking business, including equity, bond and convertible financings and sales and trading business. Other topics include investment banking relationships with LBO funds, hedge funds and corporate and institutional clients.

Course Descriptions for the Global Management Concentration
GMGT 510 ............................................................. 3 credits
Global Business Organization and Culture
This course examines the cultural and organization framework within which global business is conducted. Topics include socio-cultural forces, cultural analysis, communication strategies, human resources investment and utilization, and managing across borders.
GMGT 520 ............................................................. 3 credits

External Environment of Global Business
This course explores issues and institutions that affect global business outside the direct control of the organization. Topics include country risk assessment, basis for trade and capital flows, exchange rate determination, international, national, and local organizations, regional integration, and conflict resolution of global trade disputes.
GMGT 530 ............................................................. 3 credits

Internal Environment of Global Business
This course examines issues and functions that global business faces within control of the organization. Topics include organization forms of entry and exit, legal issues, marketing, finance, human resources, and risk management.
GMGT 540 ............................................................. 3 credits

Global Strategy Formulation and Implementation
This course develops strategy for global implementation. Topics include the role of global strategy in the organization, the current state and strategy choices, strategy selection, implementation and control issues, portfolio management, and case analysis.
CAP GM591 .......................................................... 3 credits

Cases in Cross-Border Management
This content area capstone course applies management concepts to a global environment. Students learn to evaluate opportunities and challenges in world wide market places. Case studies will be utilized to synthesize concepts from prior global management course work.

Course Descriptions for the Health Care Management Concentration
HCS 531 ............................................................... 3 credits

Health Care Organizations and Delivery Systems
This course examines health care delivery during a time of financial and regulatory stress, the impact of the evolving consumer movement, and managing efficient and effective organizational structures.

Health Information Systems
This course provides administrators and managers an overview of the information systems used in the health care industry. The effective use of data requires an understanding of how the data is captured as well as the HIPAA and security issues related to this confidential material. The course provides students with a general background to communicate more effectively with technical personnel and provide general management oversight of information systems within health care organizations.

Health Law and Ethics
Students explore and analyze current ethical issues such as biomedical research, insurance statutes, and demand management. Students survey the extensive legal foundations of health care, and apply current case law to contemporary situations. Topics include legal aspects of legislation, patient rights, data security, professional liability, and labor relations.

Measuring Performance Standards
Quality improvement initiatives rely upon data from monitoring program implementation and evaluating program outcomes to determine achievement of program objectives. The processes of developing and revising monitoring and outcome measures are used to help determine progress toward meeting accreditation and regulatory standards.

Health Care Strategic Management
This is the capstone course for the graduate health care programs. The development and presentation of health care organization’s strategic plan will demonstrate mastery of the critical content as the principles relate to the health care industry. Special emphasis is placed upon consumer demand, market volatility, regulatory and fiscal constraints from the perspective of strategic management. The learner will demonstrate understanding of the critical importance of strategic management and planning within the dynamic, complex, and evolving nature of the health care industry.

Course Descriptions for the Human Resource Management Concentration
HRM 546 .............................................................. 3 credits

Human Resource Law
This course prepares human resource managers to comply with human resource laws and regulations across all jurisdictions. Students learn how to manage human resource functions within a regulatory environment. Other topics include laws and regulations related to the following: workforce planning and employment, human resource development activities, compensation and benefits, labor relations, and workplace safety.
HRM 558 .............................................................. 3 credits

Research in Human Resource Management
This course applies research methods to human resource functions. Students learn to use quantitative analysis and secondary research to recruit and select employees to meet organizational goals. Other topics include forecasting, evaluation of selection tests, application of selection tests, interviewing techniques, techniques to assess
training program effectiveness, job evaluation methods, and external labor market analysis.

HRM 548 ................................................................. 3 credits

**Recruitment and Retention Practices**
This course prepares students to evaluate and develop a workforce to attain organizational goals. Students learn to develop total reward strategies that attract and retain the best employees. Other topics include recruitment strategies, workforce planning and assessment, relocation practices, right sizing, negotiation, employment policies, and global compensation practices.

HRM 552 ................................................................. 3 credits

**Occupational Health and Safety**
This course applies health and safety principles to reduce hazards to a productive work environment. Students create a prevention program to promote occupational safety and health. Other topics include injury and illness compensation, safety risks, security risks, workplace violence, health and safety practices, emergency response plans, and issues related to substance abuse.

HRM 595 ................................................................. 3 credits

**Human Resource Capstone Course**
This content area capstone course applies human resource concepts to improve organizational effectiveness within the framework of employment laws and regulations. Students apply existing professional standards and theories to human resource management. Other topics include the alignment of human resource strategy with the organization, global workforce planning, career and leadership development, and performance analysis and appraisal.

**Course Descriptions for the Marketing Concentration**

MKT 544 ................................................................. 3 credits

**Integrated Marketing Communications**
This course prepares students to apply integrated marketing communications as part of a strategic marketing plan. Students evaluate how marketing communication tools build brand value. Topics include advertising, promotions, public relations, sales, and direct marketing.

MKT 554 ................................................................. 3 credits

**Consumer Behavior**
This course prepares students to apply buyer behavior theories in the marketplace. Students evaluate how demographic, psychological, and socio-cultural issues contribute to buyer behavior. Topics include consumer preference, brand perception, attitude formation, persuasion, motivation, and consumer protection.

MKT 552 ................................................................. 3 credits

**Technology Applications and e-Marketing**
This course prepares students to integrate technology in marketing functions. Students design the organization and content of a website to accomplish one or more marketing objectives. Topics include basics of the World Wide Web, bandwidth, servers and storage, e-Marketing, e-Commerce, and targeting customers.

MKT 562 ................................................................. 3 credits

**Advanced International Marketing**
This course prepares students to develop and manage a marketing strategy in an international business environment. Students evaluate case studies of previous product launches and current research to create a launch strategy for a specific country. Topics include distribution systems, socio-cultural perspectives, business customs, product and service adaptations, and pricing issues.

MKT 593 ................................................................. 3 credits

**Product Design and Development**
In this content area capstone course students design an innovative product or service that satisfies an unmet consumer need. Students use research methods to identify opportunities or new product features that reflect the latest market trends. Topics include market environmental analysis, marketing strategy, the marketing process, product development, ethics and social responsibility, innovation and diffusion, pricing strategy, and strategic marketing issues.

**Course Descriptions for the Project Management Concentration**

PM 571 ................................................................. 3 credits

**Project Management**
This course integrates the five processes that define project management. Students will design a project management plan to accomplish an organizational objective. Other topics include project initiation, budgeting, communications, execution, team management, control, and closure.

PM 582 ................................................................. 3 credits

**Project Leadership**
This course prepares students to lead a project to successful conclusion. Students will create a plan to lead change during project execution. Other topics include integrated change control, work breakdown structures, human resource planning, performance reporting, managing stakeholders, negotiation, conflict resolution, and cultural diversity.

PM 584 ................................................................. 3 credits

**Project Risk Management**
This course applies risk management concepts to project execution. Students will create contingency plans for a project. Other topics include risk identification, qualitative analysis, quantitative analysis, response planning, monitoring & control, and proactive planning.

PM 586 ................................................................. 3 credits

**Project Quality Management**
This course applies quality control techniques to project development and implementation. Students will create a continuous quality improvement plan for projects within an organization. Other topics include scheduling, quality planning, quality assurance, scope management, schedule control, and quality control.

PM 598 ................................................................. 3 credits

**Project Management Capstone**
In this concentration capstone course, students will design a project to meet an organizational need. Students will collaboratively create a project plan using Microsoft® Project software. Other topics include Project Management Professional (PMP) certification preparation.
Course Descriptions for the Technology Management Concentration

COM TM541 ................................................................. 3 credits
Communications for Managers of Technology
This course prepares graduate students to apply communication principles to the roles they play as technology managers. Students learn how to effectively communicate technical issues to non-technical stakeholders in a business environment. Other topics include the role of perception in communication, techniques to enhance group communication, aligning communication to an audience, cross-border communications, and ethics in organizational communications.

PM 571 ................................................................. 3 credits
Project Management
This course integrates the five processes that define project management. Students will design a project management plan to accomplish an organizational objective. Other topics include project initiation, budgeting, communications, execution, team management, control, and closure.

TMGT 540 ................................................................. 3 credits
Management of R&D and Innovation Processes
This course explores the role of research and development (R&D) as a means to provide future survival and growth for the organization as the lifecycle of existing products and/or services matures to obsolescence. Also introduced are techniques used to stimulate and manage innovation in the workplace.

TMGT 550 ................................................................. 3 credits
Technology Transfer in the Global Economy
This course introduces the student to the concept of multinational enterprises and the role of technology in the strategic management of these enterprises. This course focuses on opportunities to utilize technology transfer within global business to meet the goals of the strategic plan.

TMGT 590 ................................................................. 3 credits
Applications of Technology Management
This is an integrative course and the capstone for the MBA/TM program. The outcome is to apply a range of skills from the individual courses in the technology management program to develop a strategy management plan to implement, build, and initiate a technology product or infrastructure in an organization.

Master of Management
...........................................................................................

The following Master of Management (MM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Management degree program promotes the development of management competencies through the practical application of theory, business and management diagnostics, and the formulation of creative management and consulting solutions. Students will acquire a wide range of tools, concepts and methodologies to design, conduct, and follow through on successful consulting practices. In addition, students will be able to actively develop their interpersonal and business-related management skills in order to foster leadership, creative thinking, collegiality, and teamwork ability in an international context. The Master of Management will provide students with firsthand knowledge of the tools and techniques used by successful consultants in the competitive management consulting industry.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/mm.

The University reserves the right to modify the required course of study.
Additional Admission Requirements for the MM

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- No work experience is required for this program.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Degree Requirements for the MM

The degree requirements for this program are the following:

- A minimum of 42 graduate credits must be completed to meet all areas of the required course of study.
- A minimum grade point average (GPA) of 3.0.
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Management

Residency Requirements and Course Waivers for the MM

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 30 graduate level credits at the University.

Students in this program may waive a maximum of 12 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years with a "B" (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses may not be waived from the degree program: MGT 527, MGT 598

The School of Advanced Studies offers a bridge opportunity for masters degree students who are interested in taking doctoral courses as part of the masters degree program. The School of Advanced Studies has created a bridge opportunity for master's degree students who are interested in taking doctoral courses as part of the master's degree program. Our goal is to encourage students to enroll in doctoral programs at University of Phoenix. In this bridge program, a master's degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master's degree program.

All credit-bearing doctoral courses must be completed with a grade of "B-" or better. Students who earn a grade lower than a "B-" will not be able to use the bridge course to waive credits upon enrollment in a doctoral program.

Course Descriptions for the MM

MGT 527 ..................................................................................3 credits
Consulting

This course applies the tools available to University of Phoenix graduate students and the competencies of successful individuals who exercise influence within an organization but have no direct authority to make changes or implement programs. Students learn their own perceptions and values to communicate more effectively with others. Other topics include Master of Management program goals, argument construction, decision making, collaboration, and academic research.

COM 537 .................................................................................3 credits
Organizational Communications

This course prepares graduate students to apply written and oral communication principles to the roles they play as managers. Students will learn how to persuade a variety of stakeholders to commit to a proposal. Other topics include the role of perception in communication, techniques, aligning communication to an audience, business justifications, presenting data, and ethics in organizational communications.

MGT 527 ..................................................................................3 credits
Negotiation, Power, and Politics

This course prepares students to achieve organizational objectives through formal and informal channels. Students will create a plan to achieve a goal by applying negotiation skills within the formal and informal structures of an organization. Other topics include coalitions, types of power, liaison roles, and persuasion.
QNT 565  .................................................................................. 3 credits
Research Methods, Design and Analysis
This course applies research and probability concepts to project management decisions. Students will evaluate feasibility, manage risk, and measure outcomes for a project. Other topics include measures of central tendency & dispersion, program evaluation, research design, data sampling, and analysis & presentation.

MGT 567 ................................................................. 3 credits
Ethics and Social Responsibility
This course prepares students to align an organization’s social responsibility initiatives with its values. Students will create a proposal for an organization that aligns corporate social initiatives with its values. Other topics include ethics, values awareness, and evaluating the results of social initiatives.

LAW 579 ................................................................. 3 credits
Business Law for Consultants
This course prepares students to evaluate the legal risks associated with business consulting. Students will create proposals to manage an individual’s legal exposure when performing consulting work. Other topics include the legal system, alternative dispute resolution, enterprise liability, international law, business risks, intellectual property, legal forms of business, and governance.

PM 586 ................................................................. 3 credits
Project Quality Management
This course applies quality control techniques to project development and implementation. Students will create a continuous quality improvement plan for projects within an organization. Other topics include scheduling, quality planning, quality assurance, scope management, schedule control, and quality control.

FIN 575 ................................................................. 3 credits
Project Budget and Finance
This course applies finance concepts to evaluate and manage projects. Students will prepare a plan to obtain funding and manage a project budget. Other topics include return on investment, cost classification, debt and equity financing, and project cash flows.

MKT 575 ................................................................. 3 credits
Marketing Strategy
This course prepares students to evaluate marketing and strategic choices of an organization. Students will analyze a series of case studies to recommend changes needed to achieve organizational marketing goals and strategy. Other topics include generic & grand strategies, strategic analysis, competitive advantage, consumer behavior, and branding.

MKT 578 ................................................................. 3 credits
Public Relations
This course prepares students to evaluate the use of public relations in meeting organizational objectives. Students will create a response to a given public relations challenge. Other topics include media relations; promotion; public relations tools, publicity, and ethics.

ORG 581 ................................................................. 3 credits
Organizational Design
This course prepares students to design organizations that adapt to environmental changes through innovation. Students will prepare a plan to incorporate innovation into organizational design to align an organization with a change in strategy. Other topics include the learning organization, authority & control, specialization & coordination, entrepreneurship, and lateral organizations.

MGT 598 ................................................................. 3 credits
Consulting Project
This course applies student understanding of organizations and project management to the development of a consulting project. The course requires students to synthesize and integrate theory and practice from all prior courses in the program.

Master of Science in Accountancy
The following Master of Science in Accountancy (MSA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Accountancy (MSA) provides the breadth of knowledge for the professional accountant. Students master the theory and principles that frame a wide range of problems and issues encountered in the accounting profession. This program is designed for accountants and non-accountants who are preparing for a professional certification in accounting such as the uniform Certified Public Accountant (CPA) exam. This degree will allow students to seek positions in such career areas as accounting, auditing, and budgeting.

The MSA consists of 36 credit hours. Thirty credit hours constitute the core curriculum which covers the following areas of accounting: accounting theory and research, accounting information systems, managerial accounting and legal aspects of business, internal control systems, financial reporting, auditing, taxation, not-for-profit and government accounting, forensic accounting, and accounting ethics. The core courses were designed based upon the standards proposed by the National Association of State Boards of Accountancy (NASBA). Additionally, six credit hours make up the financial accounting and communication proficiency courses. The proficiency courses are required for students who have not completed previous coursework in financial accounting or communications.

This program addresses the goals of the American Institute of Certified Public Accountants (AICPA) Vision Project for the professional values, communications and leadership skills, strategic and critical thinking skills, and technology skills (The American Institute of Certified Public Accountants, 2007). In addition, the program meets the University of Phoenix learning goal of collaboration. A key feature of this program is the utilization of the CPA Test Prep software, which is integrated throughout the core program.

Note: Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine if this program, combined with their undergraduate degree and any other specific criteria, meets the requirements to qualify for examination in that specific jurisdiction. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

For more information about our graduation rates, the median debt
of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/msa.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MSA

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, an ABA accredited institution (if coursework was from a graduate level program) or comparable undergraduate bachelor’s degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Degree Requirements for the MSA

The degree requirements for this program are the following:

• A minimum of 36 graduate credits.
• A minimum program grade point average (GPA) of 3.0.

Academic Progression Requirements for the MSA

The competency course, ACC 537, must be satisfied prior to progressing into the MSA Core (ACC 541, ACC 542, ACC 543, ACC 544, ACC 545, ACC 546, ACC 548, ACC 556, ACC 557). The MSA competency course may be satisfied in the following ways:
• Successful completion of the University of Phoenix course, ACC 537.
• Successful completion of appropriate levels of undergraduate or graduate coursework from a regionally or approved nationally accredited, or candidate for accreditation, college or university, or equivalent undergraduate degree earned at a recognized foreign institution no more than 10 years prior to enrolling at the University. For ACC 537, the appropriate level is six semester hours at the upper division or three semester hours at the graduate level in financial accounting.

Residency Requirements for the MSA

The University requires completion of a minimum of 21 graduate level credits at the University to meet residency requirements. Students who complete the Graduate Accounting Certificate and wish to enroll in the MSA program can apply courses towards the MSA program requirement.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

Course Competencies and Course Waivers for the MSA

Eligible students may satisfy the 2 competency courses (ACC 537, COM 530) using one of the following methods:

Six semester credits of upper-division undergraduate coursework or three semester credits of graduate coursework in financial accounting that meets the following requirements will satisfy ACC 537:
• The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university.

Six semester credits of upper-division undergraduate coursework or three semester credits of graduate coursework in communications that meets the following requirements will satisfy COM 530:
• The coursework must have been completed with a C- or better, within the past ten (10) years from current program enrollment agreement sign date

A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in the MSA Program.

Six semester credits of upper-division undergraduate coursework or three semester credits of graduate coursework in communications that meets the following requirements will satisfy COM 530:
• The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university.

A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in the MSA Program.

In addition to satisfying the competency courses using one of the approved methods, students may also waive a maximum of nine
Communications for Accountants

Course Descriptions for the MSA

The course must be comparable in content and credits to the course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course in the Required Course of Study may not be waived: ACC 541

**Course Descriptions for the MSA**

**COM 530** ............................................................... 3 credits

**Communications for Accountants**

In this course, students examine principles and practices of group communication in the context of the organization. Topics include an overview of group communication, culture and conflict, group formation, influence in organizational communication, organizational change, formal communications, and public communications.

**ACC 537** ............................................................... 3 credits

**Financial Accounting**

In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders’ equity, statement of cash flows, and error correction and accounting changes.

**ACC 541** ............................................................... 3 credits

**Accounting Theory & Research**

This is the first core course in the Master of Science in Accounting (MSA). In this course, students apply accounting research tools to current accounting issues. Other topics include research of accounting questions related to: inventory, fixed assets, leases, derivative instruments, debt, contingencies, segment reporting, pensions, business combinations, consolidations, stockholder’s equity, and a program overview.

**ACC 542** ............................................................... 3 credits

**Accounting Information Systems**

In this course, students examine the fundamentals of accounting systems design. Topics include business information systems, business processes and data flows, database concepts and tools, internal control and risks, auditing the information system, and using the information system to perform audit functions.

**ACC 543** ............................................................... 3 credits

**Managerial Accounting & Legal Aspects of Business**

In this course, students examine managerial accounting as part of the business’s accounting information system and legal aspects of the business enterprise. Topics include managerial accounting and capital budgeting, cost analysis; management planning and control, negotiable instruments, secured transactions, debtor/creditor relationships, property and insurance, and legal aspects of employment and environment.

**ACC 544** ............................................................... 3 credits

**Internal Control Systems**

In this course, students gain a broad perspective of accounting and control that considers attainment of all goals of the organization, including those concerned with financial objectives. Topics include an overview of control, risk management, internal control systems, controls for current asset functions, controls for other accounting classifications, controls for information technology systems, and reporting on controls.

**ACC 545** ............................................................... 3 credits

**Financial Reporting**

This course prepares students to address concepts of financial reporting for roles as CPAs. Students learn important criteria for calculating capital changes, applying concepts of fixed assets and cost determination, and preparing consolidated financial statements. Other topics include the professional responsibilities of CPAs, deferred taxes, cash flow statements, balance sheet preparation, restructuring of troubled debt, and the intricacies of comprehensive income.

**ACC 546** ............................................................... 3 credits

**Auditing**

In this course, students focus on the auditing practice performed by public accountants. Topics include the CPA profession and the auditor’s role, planning the audit, audit reporting and required communications, evaluating internal controls, audit programs for current assets and liabilities, and audit programs for other business cycles.

**ACC 547** ............................................................... 3 credits

**Taxation**

In this course, students develop an understanding of the taxation of business entities and the individuals who own those entities. Topics include tax entities, property transactions, calculating basis, gains and losses, alternative minimum tax, S-corporations and partnerships.

**ACC 548** ............................................................... 3 credits

**Not-for-Profit & Government Accounting**

In this course, students receive an overview of the budgeting, accounting, financial reporting, and auditing required of government and not-for-profit organizations. Topics include the governmental accounting, accounting records in government, fund allocation, government-wide reporting, not-for-profit accounting, and governmental performance measures.
ACC 556 .................................................................3 credits
Forensic Accounting
In this course, students are introduced to the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind these procedures. Topics include an overview of fraud and abuse, forensic evidence, substantive procedures for cash outflow irregularities, substantive procedures for asset irregularities, financial statement fraud, and examination reporting.

ACC 557 .................................................................3 credits
Accounting Ethics
In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.
COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

The College of Information Systems and Technology Programs offers the Master of Information Systems (MIS) degree.

Master of Information Systems

The following Master of Information Systems (MIS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Information Systems (MIS) program provides the knowledge to successfully apply information systems theory and principles to address real world business opportunities and challenges to meet the needs of today’s information economy. Under the guidance of practitioner faculty, the graduate student will use innovative digital materials to understand the development and management of business systems within the organization, to understand and apply the principles of systems analysis and design, to analyze and evaluate emerging information technologies, and to create project, risk, and information systems strategic plans.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/mis.

The University reserves the right to modify the required course of study.

En-Route Credentials for the MIS

Students may declare and earn an additional credential that is approved in their state or jurisdiction en-route to completing the graduate degree. Students must sign and submit the enrollment agreement that corresponds with the unique combination of desired credentials to be earned. Possible credentials include a graduate certificate. Listed below are all of the possible en-route credentials:

• CERT/G-BA
• CERT/G-ISA
• CERT/G-ISM

Students may apply for conferral of an en-route credential upon meeting the following program requirements:

• Successful completion of all the courses outlined in the enrollment agreement for the credential
• Achievement of the minimum program GPA
• Fulfillment of the minimum University residency requirement

Students may elect to update or remove the selected credentials by completing a new enrollment agreement reflecting the new selection of credentials.

Additional Admission Requirements for the MIS

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• Applicants must have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• Signed Hardware/Software Agreement

Degree Requirements for the MIS

• Completion of a minimum of 42 credits that include the following distribution:
  • Required Course of Study - 24 credits
  • Graduate Electives - 18 credits
• A minimum grade point average (GPA) of 3.0.
• The diploma awarded for this program will read as: Master of Information Systems

Residency Requirements and Course Waivers for the MIS

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 24 credits in the program, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to waive a course in the major course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The 18 credit Graduate Electives requirement may be satisfied by any of the following means:

- Any pre-determined 3-credit Graduate UOPX courses.
- Previously completed Graduate coursework from UOPX.
- Graduate transfer coursework that is acceptable for transfer and was completed within the past ten (10) years from current program enrollment agreement sign date with a grade of C- or better.
- Graduate Certificate approved in the student’s state or jurisdiction.

Students earning a certificate en-route to completing the graduate degree may waive a maximum of 6 credits within the certificate program in addition to the 9 credits that can be waived in the MIS required course of study by meeting the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

**Course Descriptions for the MIS**

**CMGT 555** ................................................................. 3 credits

**System Analysis & Development**

This course explores the framework and strategy for creating an environment to develop and engineer software according to the business needs of an organization. The course teaches the techniques of software engineering while focusing on the quality and development and the support of business objectives during the software engineering process.

**CMGT 556** ................................................................. 3 credits

**Enterprise Models**

This course provides a process view of the organization from several perspectives including enterprise resource planning (ERP), supply chain management (SCM), and customer relationship management (CRM) system.

**CMGT 557** ................................................................. 3 credits

**Emerging Technologies & Issues**

The course examines how to identify emerging technology, the related issues and their potential impact on the organization. This examination provides an understanding of both the technical and managerial issues including the strategic implications associated with emerging technologies.

**CMGT 557** ................................................................. 3 credits

**CIS Project Management**

This course will provide both theory and application of the skills required for project management. Topics covered with include: identifying deliverables, determining work breakdown structure, estimating resource and cost requirements, resource management, scheduling techniques, schedule control methods, pert and gantt charts. MS Project, a project management application, will be used extensively at this course.

**CMGT 577** ................................................................. 3 credits

**CIS Strategic Planning**

This course provides the knowledge and skills to develop effective short, intermediate and long-range strategic information technology plans. Course topics include the need and responsibilities of an information technology steering committee, the relationship of information technology planning to the overall organizational mission, goals, and assessment of the organization’s current state, determination of information technology, project and management requirements, and means of prioritizing and selecting information technology projects.

**CMGT 578** ................................................................. 3 credits

**Security & Ethics**

The ethical issues examined in the course will include information privacy, accessibility, and ownership from an organizational perspective. Information laws, regulations and compliance requirements will be examined in this course as well as the considerations for creating a safe digital environment within the organization.

**CMGT 583** ................................................................. 3 credits

**IS Integration**

This course will focus on the integration of the IS function and the information technology architecture within the enterprise. The alignment of IT with the strategy of the organization will be examined considering the decisions related to information technology architecture.
The College of Health Sciences and Nursing provides a blend of the business and management focus of health care with the clinical/delivery focus of nursing. Each academic program area will provide students with the insight and perspectives needed to support their specific career focus.

Health administration programs provide students with an opportunity to see the expansive scope and diversity of the health care industry. The associate and baccalaureate programs are designed to provide students with the foundational knowledge of management, finance, marketing, communication, health information systems and compliance and legal concepts. At the graduate level students will expand their focus to leadership, policy, quality and performance measures, economics and strategic management.

Students will also have the opportunity to expand their interests in career areas such as health information systems, electronic health records, long term care, emergency management, gerontology, or sustainability.

The nursing programs are designed to support the career advancement and educational needs of licensed practical, vocational and registered nurses, who are looking to expand their professional horizons. The nursing degree programs have a blend of theory and practice, which fosters a learning environment that allows a nurse to build a knowledge base and effectively apply what they have learned. Students develop critical thinking and problem solving skills that are essential for clinical or leadership roles needed in today's challenging health care environment. The graduate nursing programs focus on the specialty areas of nursing administration, nursing education and family nurse practitioner.

The Bachelor of Science in Nursing and the Master of Science in Nursing programs are accredited by The Commission on Collegiate Nursing Education, One DuPont Circle, NW, Suite 530, Washington, DC 20036 - 1120, (202) 887 6791. http://www.aacn.nche.edu/accreditation/

International Nursing Honor Society

The vision of Sigma Theta Tau is to create a global community of nurses who lead in using scholarship, knowledge, and technology to improve the health of the world’s people. The society provides support for the professional development of members who strive to improve nursing care worldwide.

Omicron Delta is the Sigma Theta Tau chapter of the University of Phoenix, College of Health Sciences and Nursing members. Membership to Sigma Theta Tau is by invitation to baccalaureate and graduate nursing students who demonstrate excellence in scholarship, and to nurse leaders who demonstrate exceptional achievement in nursing.

The undergraduate student must have at least a 3.0 grade point average on a 4.0 scale, be in the upper 35 percent of his/her graduating class, have completed at least one-half of the nursing curriculum to qualify for membership and meet the expectation of academic integrity. The graduate student must have at least a 3.5 grade point average on a 4.0 scale and have completed at least one-half of the nursing curriculum to qualify for membership.

More than 300,000 nurse scholars have been inducted into Sigma Theta Tau. With 130,000 active members, it is the second-largest and one of the most prestigious nursing organizations in the world. The society’s members are active in more than 90 countries and territories, and the 463 chapter honor societies are located on more than 523 college and university campuses in United States, Australia, Brazil, Canada, Hong Kong, the Netherlands, Pakistan, South Korea, and Taiwan.

Omicron Delta has close to 5,000 active members worldwide. The chapter was originally chartered in 1996 and has grown to be one of the largest chapters in the international organization. To learn more about Omicron Delta visit the Web site http://www.omicrondelta.net.

Academic Progression Requirements for all Current Nursing Programs

Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.

- For purposes of this policy, the following definitions apply:
  - Drug testing means the scientific analysis of urine, blood, breath, saliva, hair, tissue, and other specimens from the human body for the purpose of detecting the use of drugs or alcohol.
  - Reasonable suspicion means evidence which forms a reasonable basis for concluding that it is more likely than not that a person is impaired by alcohol or drugs or has engaged in substance abuse. Facts which could give rise to reasonable suspicion include, but are not limited to: the odor of alcohol or drugs, impaired behavior such as slurred speech, decreased motor coordination, difficulty in maintaining balance, marked changes in personality or job performance, and unexplained accidents, without reasonable justification. Such evidence may come from a professional or expert opinion, layperson opinion, scientific tests, or other sources or methods.
  - Illegal drug means any drug which is not legally obtainable; any drug which is legally obtainable but has not been legally obtained; any prescribed drug not legally obtained; any prescribed drug not being used for the prescribed purpose or by the person for whom it was prescribed; any over-the-counter drug being used at a dosage level other than that recommended by the manufacturer, or being used for a purpose other than the purpose intended by the manufacturer; and any drug being used for a purpose or by a person not in accordance with bona fide medical therapy. Examples of illegal drugs include, but are not limited to, stimulants; depressants; narcotic or hallucinogenic drugs; cannabis substances, such as marijuana and hashish; cocaine; heroin; methamphetamine; phencyclidine (PCP); and so-called designer drugs and look-alike drugs.
• Impaired means that a person’s mental or physical capabilities are reduced below his or her normal levels without reasonable justification. An impaired student manifests deterioration in the level of function as compared to that previously observed, or the student does not function at a level normally expected under the prevailing circumstances. Impairment may exist in one or more multiple domains, including psychomotor activity and skills, conceptual or factual recall, integrative or synthetic thought processes, judgment, attentiveness, demeanor and attitudes as manifested in speech or actions. Impairment will include addiction to and/or physical dependence upon alcohol or illegal drugs.

• Substance abuse means:
  - the consumption, possession, or distribution of alcohol or illegal drugs by any nursing student while on University or affiliated clinical site premises or while participating in any University (or affiliated clinical site) sponsored or related activity, including any nursing-related course or clinical training activity.
  - a nursing student’s use of alcohol or any drug in such a way that the student’s performance in any nursing course, including activities at any clinical site, is impaired.

• Prior to being assigned to a clinical placement and as a prerequisite for placement at any agency or health care facility the nursing student shall sign an agreement:
  - to abide by the drug policies and drug testing policies of the University and each agency or health care facility in which a student is assigned as applicable,
  - to submit to any “for-cause” drug testing required by the University and testing required by each agency or health care facility the nursing student obtains clinical hours, and
  - to release a copy of any and all drug test results to the University of Phoenix, Dean/Associate Dean of Nursing, other appropriate University officials, and to any State Board(s) of Nursing in which the student holds a nursing license or certificate, where required by the relevant State Board(s) of Nursing.

Failure to sign such agreement is grounds for refusal for student admission and progression in the program.

The College of Health Sciences and Nursing requires students to obtain a 10 panel, plus alcohol drug test within 24 hours or by the first business day following the test results to discuss the circumstances surrounding suspected behavior.

The Campus College Chair, Director of Nursing, or NP Program Manager will counsel the student regarding return to the classroom and clinical agency. The preliminary investigation will cease and the student will be released from further action at that time.

The results of the 10 panel, plus alcohol drug test(s) are positive for a prescribed drug(s) but not those that would be defined as illegal in the definitions above:

• The student shall, within three (3) business days, obtain a written statement from their treating, licensed health care provider (MD, DO, HMD, ND/NMD, NP or PA) stating that:
  - the drug level is within prescribed limits.
  - the level does not indicate abuse.
  - the student’s use of the drug as prescribed will not interfere with safe practice in the clinical area.

Failure to sign such agreement is grounds for refusal for student admission and progression in the program.

A full review by the Office of Dispute Management and Apollo Ethics and Compliance shall be conducted. Students who test positive for alcohol or illegal drugs will not be permitted to return to any clinical setting pending conclusion of the review. The findings may result in student dismissal from the nursing program and expulsion from the University.

The results of the positive test for alcohol or illegal drugs shall be reported to the applicable State Board(s) of Nursing, if required by the applicable State Board(s), by the Campus College Chair, Director of Nursing, or NP Program Manager.

If the results of the 10 panel, plus alcohol drug test(s) are positive for a prescribed drug(s) but not those that would be defined as illegal in the definitions above:

This statement must be provided to the Campus College Chair, Director of Nursing, or NP Program Manager. If the statement is approved, then the test result will be deemed acceptable and not failed for these purposes.

• The failure of a student to provide the above statement or a health care provider’s inability to provide a statement meeting the requirements above shall be treated as a positive test for an illegal drug.

• Students who refuse to submit to a “for-cause” drug test will not be allowed to return to any clinical setting pending conclusion of a full review by the Office of Dispute Management and Apollo Ethics and Compliance. The findings may result in dismissal from the nursing program and expulsion from the University. The results of a positive test for illegal drugs as defined herein or a refusal to undergo a required drug test will be reported to the applicable State Board of Nursing, where required by the applicable State Board(s) of Nursing’s statute(s) or regulation(s).

• Students must also adhere to any other additional policies prescribed by the clinical agency. It is the sole responsibility of the student to read and acknowledge the requirements of the clinical health care facility in addition to University policy.

• All costs associated with the drug test, including any transportation costs to or from the drug testing facility, will be the responsibility of the student.

• University of Phoenix, College of Health Sciences and Nursing, campus officials may be required to report all failed drug tests to each State Board of Nursing in which the student holds a nursing license or certificate. Campus officials shall report test results to all applicable State Boards of Nursing as described in the applicable Board’s statutes and/or regulations.
The following Master of Health Administration (MHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Health Administration (MHA) program prepares leaders who can effectively respond to the dynamic and ever-changing health care industry. These individuals have a capacity to critically examine and evaluate issues and trends and are influential to the destiny of a broad and dynamic health care system. Curriculum is tailored to the needs of the health care leader/manager by providing content in finance, policy, research, technology, quality improvement, economics and strategic planning. In addition to the University Learning Goals, graduates of the MHA program will: Create a strategic plan for a health care organization, analyze the impact of health care policy on delivery and services provided by the industry, evaluate informational technology and security management needs of health care, utilize data to support quality and performance measure decision-making processes for health care entities, demonstrate management of organizational finances within the economic environment of various health care industries, and analyze the impact of various management and leadership theories within health care organizations and delivery systems. Students can gain additional knowledge through the selection and completion of a 9 credit specialization in their area of interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/mha.

Health Care Strategic Management

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MHA

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

• A minimum equivalent of three (3) years of full-time, post-high school professional work experience within the past ten years.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Requirements for the MHA
• Completion of a minimum of 45 credits.
• A minimum program grade point average (GPA) of 3.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Master of Health Administration
• Students who have earned a graduate degree in Health Administration (MHA) may not receive a certificate in the same area of focus. Example: a student may not earn an MHA/GER degree and a GER certificate; however, students who have completed a certificate may return to receive a Master of Health Administration (MHA) degree with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the MHA
Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: HCS 504, HCS 589
The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses as part of the master’s degree program. In this bridge program, a master’s degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master’s degree program.

All credit-bearing doctoral courses must be completed with a grade of “B-” or better. Students who earn a grade lower than a “B-” will not be able to use the bridge course to waive credits upon enrollment in a doctoral program.

Minimum Grade Requirements for the MHA
• Students in this program are required to achieve a minimum grade of "B" (3.0) in following course: HCS 589. A “B-” grade is not acceptable. Students who fail to receive a minimum grade of “B” will be scholastically disqualified from the University.
• Students who fail to meet the minimum grade requirement and have been scholastically disqualified will not be allowed to continue in the program until the course has been successfully repeated. Students will be allowed to repeat each class in which the minimum grade was not achieved one time. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MHA program.

Course Descriptions for the MHA
HCS 504......................................................................................1 credit
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.

HCS 531 .....................................................................................3 credits
Health Care Organizations and Delivery Systems
This course is a comprehensive approach to health care delivery systems that provides the student with an in-depth understanding of health systems and organizations. Students will examine historical evolutions of the health care industry and recent impacts that influence the delivery of health care.

HCS 577 .....................................................................................3 credits
Financial Management in Health Care
This course presents the concepts of financial accounting important to the understanding of the financial environment of the health care industry. Students interpret financial statements, prepare analyses of financial data necessary to make decisions, describe the different third party payment methods, experiment with cost finding and price setting, and conduct break-even analyses. The course provides students with experience in capital and operating budgets, and financial forecasts.

HCS 552 .....................................................................................3 credits
Health Care Economics
This course focuses on the application of macro and micro economic tools to the health care industry. Content includes demand management; concepts of efficiency, production and distribution of health care services; impact of regulation and reimbursement; and economic incentives in health care. Students apply principles to a variety of business models.

HCS 588 .....................................................................................3 credits
Measuring Performance Standards
Quality improvement initiatives rely upon data from monitoring program implementation and evaluating program outcomes to determine achievement of program objectives. The processes of developing and revising monitoring and outcome measures are used to help determine progress toward meeting accreditation and regulatory standards.
HCS 533 ................................................................. 3 credits
**Health Information Systems**
This course provides administrators and managers an overview of the information systems used in the healthcare industry. The effective use of data requires an understanding of how the data is captured as well as the HIPAA and security issues related to this confidential material. The course provides students with a general background to communicate more effectively with technical personnel and provide general management oversight of information systems within healthcare organizations.

HCS 514 ................................................................. 3 credits
**Managing in Today's Health Care Organizations**
This course focuses on the adaptation of organizational management to evolving health systems. Students will examine organizational theory, organizational performance, structure, change management and human resource management. Students apply various organizational theories to contemporary issues.

HCS 550 ................................................................. 3 credits
**Health Care Policy**
This course will provide students with an understanding of how health care policy influences systems and the delivery of care. Policymakers who influence the health status of a society will be identified as well as the role of economic health, interest groups, and the various levels of government involved in policymaking will be examined. Challenges, stakeholder impact, and organizational behavior, all caused by policy requirements, will be identified.

HCS 545 ................................................................. 3 credits
**Health Law and Ethics**
Students explore and analyze current ethical issues such as biomedical research, insurance statutes, and demand management. Students survey the extensive legal foundations of health care, and apply current case law to contemporary situations. Topics include legal aspects of legislation, patient rights, data security, professional liability, and labor relations.

HCS 553 ................................................................. 3 credits
**Concepts of Population Health**
This course addresses the epidemiological and sociological perspectives and techniques for analyzing the health status of populations. Topics focus on disease trends, distribution and detriments of health and disease, models and concepts of health and wellness, and the development of a proactive response to community health issues.

HCS 539 ................................................................. 3 credits
**Marketing for Health Care**
This course examines marketing principles as they are applied within various health delivery systems. Special attention is focused on consumer behavior, market segmentation, environmental scanning, and identification of new market opportunities. The role of social marketing, data base research, and evaluation design and interpretation are addressed.

HCS 548 ................................................................. 3 credits
**Foundations of Gerontology**
This course introduces students to the field of gerontology and focuses on the aspect of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older adults.

HCS 567 ................................................................. 3 credits
**Entrepreneurship in Health Care**
This course will set up the context of entrepreneurship and new business development; examine the characteristics of entrepreneurs, identifying and quantifying market opportunities in the health care market, as well conceptualizing the resources and capabilities needed. Topics include opportunity assessment, regulated industry implications and requirements, as well as the challenges of expansion within an existing enterprise.

HCS 587 ................................................................. 3 credits
**Creating Change Within Organizations**
Diffusion of innovations models in health care systems use principles of planned change within a dynamic organizational environment. Communication skills, such as negotiation and conflict resolution, help leaders analyze and respond to health care needs while using resources efficiently.

HCS 591 ................................................................. 3 credits
**Creating a Sustainable Health Care Organization**
This course explores the challenges faced by health care organizations as they create an environment focused on sustainability. Understanding sustainability, assessing institutional practices, supporting behavioral change, organizational leadership, and exploring innovation are examined.

HCS 525 ................................................................. 3 credits
**Leadership**
This course examines organizational leadership in the context of the health care organization. Principles, theories and models of leadership are explored. Collaborative relationships, concepts of power and professional culture are explored. Students will articulate a personal vision of leadership and ways of providing direction within today’s complex health care system.

HCS 529 ................................................................. 3 credits
**Contemporary Health Care Facility Design**
This course will provide students the opportunity to analyze and create plausible designs for a health care organization. Students will discuss current and future health care consumer utilization trends and environmental impacts, as well as examine the regulatory compliance requirements. Practical application of design and planning for a health care facility will be demonstrated.

HCS 542 ................................................................. 3 credits
**Health Care Research**
This course focuses on the application of health care research methods. Emphasis will be placed on using evidenced based concepts to analyze current health care workplace issues, including the development of an effective research question, literature reviews, and concepts related to data design and collection.

HCS 589 ................................................................. 3 credits
**Health Care Strategic Management**
This is the capstone course for the graduate health care programs. The development and presentation of health care organization’s strategic plan will demonstrate mastery of the critical content as the principles relate to the health care industry. Special emphasis is placed upon consumer demand, market volatility, regulatory and fiscal constraints from the perspective of strategic management. The learner will demonstrate understanding of the critical importance of strategic management and planning within the dynamic, complex, and evolving nature of the health care industry.
Master of Health Administration Concentration in Education

The following Master of Health Administration Concentration in Education (MHA/ED) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Health Administration (MHA) program prepares leaders who can effectively respond to the dynamic and ever-changing health care industry. These individuals have a capacity to critically examine and evaluate issues and trends and are influential to the destiny of a broad and dynamic health care system. Curriculum is tailored to the needs of the health care leader/manager by providing content in finance, policy, research, technology, quality improvement, economics and strategic planning. In addition to the University Learning Goals, graduates of the MHA program will: create a strategic plan for a health care organization, analyze the impact of health care policy on delivery and services provided by the industry, evaluate informational technology and security management needs of health care, utilize data to support quality and performance measure decision-making processes for health care entities, demonstrate management of organizational finances within the economic environment of various health care industries, and analyze the impact of various management and leadership theories within health care organizations and delivery systems. Students can gain additional knowledge through the selection and completion of a 9 credit specialization in their area of interest. For more information about our graduation rates, the median debt completion of a 9 credit specialization in their area of interest. Other important information, please visit our website at http://www.phoenix.edu/programs/mha.

Additional Admission Requirements for the MHA/ED

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• A minimum equivalent of three (3) years of full-time, post-high school professional work experience within the past ten years.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Requirements for the MHA/ED
• Completion of a minimum of 43 credits.
• A minimum program grade point average (GPA) of 3.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Master of Health Administration
• Students who have earned a graduate degree in Health Administration (MHA) may not receive a certificate in the same area of focus. Example: a student may not earn an MHA/GER degree and a GER certificate; however, students who have completed a certificate may return to receive a Master of Health Administration (MHA) degree with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the MHA/ED
Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: HCS 504, HCS 589

The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses as part of the master’s degree program. In this bridge program, a master’s degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master’s degree program.

All credit-bearing doctoral courses must be completed with a grade of "B-" or better. Students who earn a grade lower than a "B-" will not be able to use the bridge course to waive credits upon enrollment in a doctoral program.

Minimum Grade Requirements for the MHA/ED
• Students in this program are required to achieve a minimum grade of "B" (3.0) in following course: HCS 589. A "B-" grade is not acceptable. Students who fail to receive a minimum grade of "B" will be scholastically disqualified from the University.
• Students in this program are required to achieve a minimum grade of "C" (2.0) in the following courses: HSN 540, HSN 544. A "C-" grade is not acceptable. Students who fail to receive a minimum grade of "C-" will be scholastically disqualified from the University.
• Students who fail to meet the minimum grade requirement and have been scholastically disqualified will not be allowed to continue in the program until the course has been successfully repeated. Students will be allowed to repeat each class in which the minimum grade was not achieved one time. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MHA program.

Residency Requirements and Course Waivers for the MHA/GER
Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

The course must have been completed at a previously attended college or university.

The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: HCS 504, HCS 589

The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses as part of the master’s degree program. In this bridge program, a master’s degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master’s degree program. All credit-bearing doctoral courses must be completed with a grade of "B-" or better. Students who earn a grade lower than a "B-" will not be able to use the bridge course to waive credits upon enrollment in a doctoral program.

Minimum Grade Requirements for the MHA/GER
• Students in this program are required to achieve a minimum grade of "B" (3.0) in following course: HCS 589. A "B-" grade is not acceptable. Students who fail to receive a minimum grade of "B" will be scholastically disqualified from the University.
• Students who fail to meet the minimum grade requirement and have been scholastically disqualified will not be allowed to continue in the program until the course has been successfully repeated. Students will be allowed to repeat each class in which the minimum grade was not achieved one time. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MHA program.

Course Descriptions for the MHA/GER
HCS 504 .....................................................................................1 credit
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.

HCS 531 .....................................................................................3 credits
Health Care Organizations and Delivery Systems
This course is a comprehensive approach to health care delivery systems that provides the student with an in-depth understanding of health systems and organizations. Students will examine historical evolutions of the health care industry and recent impacts that influence the delivery of health care.

HCS 577 .....................................................................................3 credits
Financial Management in Health Care
This course presents the concepts of financial accounting important to the understanding of the financial environment of the health care industry. Students interpret financial statements, prepare analyses of financial data necessary to make decisions, describe the different third party payment methods, experiment with cost finding and price setting, and conduct break-even analyses. The course provides students with experience in capital and operating budgets, and financial forecasts.

HCS 552 .....................................................................................3 credits
Health Care Economics
This course focuses on the application of macro and micro economic tools to the health care industry. Content includes demand management; concepts of efficiency, production and distribution of health care services; impact of regulation and reimbursement; and economic incentives in health care. Students apply principles to a variety of business models.
Measuring Performance Standards
Quality improvement initiatives rely upon data from monitoring program implementation and evaluating program outcomes to determine achievement of program objectives. The processes of developing and revising monitoring and outcome measures are used to help determine progress toward meeting accreditation and regulatory standards.

Health Information Systems
This course provides administrators and managers an overview of the information systems used in the health care industry. The effective use of data requires an understanding of how the data is captured as well as the HIPAA and security issues related to this confidential material. The course provides students with a general background to communicate more effectively with technical personnel and provide general management oversight of information systems within health care organizations.

Managing in Today’s Health Care Organizations
This course focuses on the adaptation of organizational management to evolving health systems. Students will examine organizational theory, organizational performance, structure, change management and human resource management. Students apply various organizational theories to contemporary issues.

Health Care Policy
This course will provide students with an understanding of how health care policy influences systems and the delivery of care. Policymakers who influence the health status of a society will be identified as well as the role of economic health, interest groups, and the various levels of government involved in policymaking will be examined. Challenges, stakeholder impact, and organizational behavior, all caused by policy requirements, will be identified.

Health Law and Ethics
Students explore and analyze current ethical issues such as a biomedical research, insurance statutes, and demand management. Students survey the extensive legal foundations of health care, and apply current case law to contemporary situations. Topics include legal aspects of legislation, patient rights, data security, professional liability, and labor relations.

Concepts of Population Health
This course addresses the epidemiological and sociological perspectives and techniques for analyzing the health status of populations. Topics focus on disease trends, distribution and detriments of health and disease, models and concepts of health and wellness, and the development of a proactive response to community health issues.

Marketing for Health Care
This course examines marketing principles as they are applied within various health delivery systems. Special attention is focused on consumer behavior, market segmentation, environmental scanning, and identification of new market opportunities. The role of social marketing, data base research, and evaluation design and interpretation are addressed.

Entrepreneurship in Health Care
This course will set up the context of entrepreneurship and new business development; examine the characteristics of entrepreneurs, identifying and quantifying market opportunities in the health care market, as well conceptualizing the resources and capabilities needed. Topics include opportunity assessment, regulated industry implications and requirements, as well as the challenges of expansion within an existing enterprise.

Creating Change Within Organizations
Diffusion of innovations models in health care systems use principles of planned change within a dynamic organizational environment. Communication skills, such as negotiation and conflict resolution, help leaders analyze and respond to health care needs while using resources efficiently.

Creating a Sustainable Health Care Organization
This course explores the challenges faced by health care organizations as they create an environment focused on sustainability. Understanding sustainability, assessing institutional practices, supporting behavioral change, organizational leadership, and exploring innovation are examined.

Foundations of Gerontology
This course introduces students to the field of gerontology and focuses on the aspect of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older adults.

Biological and Psychological Aspects of Aging
This course examines the physical process of aging and the effects on physical and mental health. These topics are applied to disease prevention, health maintenance, and selected disorders that effect health and independent living. Public policy and program development issues will also be addressed to promote the health of the aging population.

Social and Cultural Aspects of Aging
This course examines the social and cultural perspectives on aging. Public and personal aspects of aging will be addressed through historical, theoretical, cultural, and social venues. Topics will include work and retirement, social policy, older people as social and political forces, care needs, diversity, economics, social support, and disability.

Health Care Strategic Management
This is the capstone course for the graduate health care programs. The development and presentation of health care organization’s strategic plan will demonstrate mastery of the critical content as the principles relate to the health care industry. Special emphasis is placed upon consumer demand, market volatility, regulatory and fiscal constraints from the perspective of strategic management. The learner will demonstrate understanding of the critical importance of strategic management and planning within the dynamic, complex, and evolving nature of the health care industry.
Master of Health Administration Concentration in Informatics

The following Master of Health Administration Concentration in Informatics (MHA/INF) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Health Administration (MHA) program prepares leaders who can effectively respond to the dynamic and ever-changing health care industry. These individuals have a capacity to critically examine and evaluate issues and trends and are influential to the destiny of a broad and dynamic health care system. Curriculum is tailored to the needs of the health care leader/manager by providing content in finance, policy, research, technology, quality improvement, economics and strategic planning. In addition to the University Learning Goals, graduates of the MHA program will: create a strategic plan for a health care organization, analyze the impact of health care policy on delivery and services provided by the industry, evaluate informational technology and security management needs of health care, utilize data to support quality and performance measure decision-making processes for health care entities, demonstrate management of organizational finance within the economic environment of various health care industries, and analyze the impact of various management and leadership theories within health care organizations and delivery systems. Students can gain additional knowledge through the selection and completion of a 9 credit specialization in their area of interest. For more information about our graduation rates, the median debt completion of a 9 credit specialization in their area of interest.

For more information, please visit our website at http://www.phoenix.edu/programs/mha.

MHA/INF Program Category Requirements

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Introduction, 1 total credit
HCS 504 ~ Introduction to Graduate Study in Health Sciences/Nursing 1 credit

Health Care Systems, 3 total credits
HCS 531 ~ Health Care Organizations and Delivery Systems 3 credits

Finance, 3 total credits
HCS 577 ~ Financial Management in Health Care 3 credits

Economics, 3 total credits
HCS 552 ~ Health Care Economics 3 credits

Performance Measures/Data Quality, 3 total credits
HCS 588 ~ Measuring Performance Standards 3 credits

Technology, 3 total credits
HCS 533 ~ Health Information Systems 3 credits

Management/HR, 3 total credits
HCS 514 ~ Managing in Today’s Health Care Organizations 3 credits

Policy and Organizational Behavior, 3 total credits
HCS 550 ~ Health Care Policy 3 credits

Legal and Ethics, 3 total credits
HCS 545 ~ Health Law and Ethics 3 credits

Electives, 6 total credits
Students will select two courses from the following:
HCS 535 ~ Concepts of Population Health 3 credits
HCS 539 ~ Concepts of Health Care Economics 3 credits

Health Care Organizations and Delivery Systems
HCS 567 ~ Foundations of Gerontology 3 credits

Entrepreneurship in Health Care
HCS 587 ~ Entrepreneurship in Health Care 3 credits

Creating Change within Organizations
HCS 591 ~ Creating Change within Organizations 3 credits

Creating a Sustainable Health Care Organization

Informatics Concentration, 9 total credits

HCS 589 ~ Concepts of Population Health 3 credits

HCS 510 ~ Systems Life Cycle 3 credits

HCS 520 ~ Data Management and Design 3 credits

Capstone, 3 total credits
HCS 589 ~ Health Care Strategic Management 3 credits

Additional Admission Requirements for the MHA/INF

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• A minimum equivalent of three (3) years of full-time, post-high school professional work experience within the past ten years.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Requirements for the MHA/INF
• Completion of a minimum of 43 credits.
• A minimum program grade point average (GPA) of 3.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Master of Health Administration
• Students who have earned a graduate degree in Health Administration (MHA) may not receive a certificate in the same area of focus. Example: a student may not earn an MHA/GER degree and a GER certificate; however, students who have completed a certificate may return to receive a Master of Health Administration (MHA) degree with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the MHA/INF
Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may he used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: HCS 504, HCS 589

The School of Advanced Studies offers a bridge opportunity for master's degree students who are interested in taking doctoral courses as part of the master's degree program. In this bridge program, a master's degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master's degree program.

All credit-bearing doctoral courses must be completed with a grade of “B-” or better. Students who earn a grade lower than a “B-” will not be able to use the bridge course to waive credits upon enrollment in a doctoral program.

Minimum Grade Requirements for the MHA/INF
• Students in this program are required to achieve a minimum grade of "B" (3.0) in following course: HCS 589. A "B-" grade is not acceptable. Students who fail to receive a minimum grade of “B” will be scholastically disqualified from the University.
• Students who fail to meet the minimum grade requirement and have been scholastically disqualified will not be allowed to continue in the program until the course has been successfully repeated. Students will be allowed to repeat each class in which the minimum grade was not achieved one time. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MHA program.

Course Descriptions for the MHA/INF
HCS 504 ..................................................................................... 1 credit
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University's adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.
HCS 531 .................................................................................. 3 credits
Health Care Organizations and Delivery Systems
This course is a comprehensive approach to health care delivery systems that provides the student with an in-depth understanding of health systems and organizations. Students will examine historical evolutions of the health care industry and recent impacts that influence the delivery of health care.
HCS 577 .................................................................................. 3 credits
Financial Management in Health Care
This course presents the concepts of financial accounting important to the understanding of the financial environment of the health care industry. Students interpret financial statements, prepare analyses of financial data necessary to make decisions, describe the different third party payment methods, experiment with cost finding and price setting, and conduct break-even analyses. The course provides students with experience in capital and operating budgets, and financial forecasts.
HCS 552 .................................................................................. 3 credits
Health Care Economics
This course focuses on the application of macro and micro economic tools to the health care industry. Content includes demand management; concepts of efficiency, production and distribution of health care services; impact of regulation and reimbursement; and economic incentives in health care. Students apply principles to a variety of business models.
HCS 588 .................................................................................. 3 credits
Measuring Performance Standards
Quality improvement initiatives rely upon data from monitoring program implementation and evaluating program outcomes to
determine achievement of program objectives. The processes of developing and revising monitoring and outcome measures are used to help determine progress toward meeting accreditation and regulatory standards.

HCS 533 .......................................................... 3 credits

Health Information Systems
This course provides administrators and managers an overview of the information systems used in the healthcare industry. The effective use of data requires an understanding of how the data is captured as well as the HIPAA and security issues related to this confidential material. The course provides students with a general background to communicate more effectively with technical personnel and provide general management oversight of information systems within health care organizations.

HCS 514 .......................................................... 3 credits

Managing in Today’s Health Care Organizations
This course focuses on the adaptation of organizational management to evolving health systems. Students will examine organizational theory, organizational performance, structure, change management and human resource management. Students apply various organizational theories to contemporary issues.

HCS 550 .......................................................... 3 credits

Health Care Policy
This course will provide students with an understanding of how health care policy influences systems and the delivery of care. Policymakers who influence the health status of a society will be identified as well as the role of economic health, interest groups, and the various levels of government involved in policymaking will be examined. Challenges, stakeholder impact, and organizational behavior, all caused by policy requirements, will be identified.

HCS 545 .......................................................... 3 credits

Health Law and Ethics
Students explore and analyze current ethical issues such as a biomedical research, insurance statutes, and demand management. Students survey the extensive legal foundations of health care, and apply current case law to contemporary situations. Topics include legal aspects of legislation, patient rights, data security, professional liability, and labor relations.

HCS 535 .......................................................... 3 credits

Concepts of Population Health
This course addresses the epidemiological and sociological perspectives and techniques for analyzing the health status of populations. Topics focus on disease trends, distribution and detriments of health and disease, models and concepts of health and wellness, and the development of a proactive response to community health issues.

HCS 539 .......................................................... 3 credits

Marketing for Health Care
This course examines marketing principles as they are applied within various health delivery systems. Special attention is focused on consumer behavior, market segmentation, environmental scanning, and identification of new market opportunities. The role of social marketing, data base research, and evaluation design and interpretation are addressed.

HCS 548 .......................................................... 3 credits

Foundations of Gerontology
This course introduces students to the field of gerontology and focuses on the aspect of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older adults.

HCS 567 .......................................................... 3 credits

Entrepreneurship in Health Care
This course will set up the context of entrepreneurship and new business development; examine the characteristics of entrepreneurs, identifying and quantifying market opportunities in the health care market, as well as conceptualizing the resources and capabilities needed. Topics include opportunity assessment, regulatory industry implications and requirements, as well as the challenges of expansion within an existing enterprise.

HCS 587 .......................................................... 3 credits

Creating Change Within Organizations
Diffusion of innovations models in health care systems use principles of planned change within a dynamic organizational environment. Communication skills, such as negotiation and conflict resolution, help leaders analyze and respond to health care needs while using resources efficiently.

HCS 591 .......................................................... 3 credits

Creating a Sustainable Health Care Organization
This course explores the challenges faced by health care organizations as they create an environment focused on sustainability. Understanding sustainability, assessing institutional practices, supporting behavioral change, organizational leadership, and exploring innovation are examined.

HCS 588 .......................................................... 3 credits

Concepts of Health Care Informatics
This course introduces the student to the basic concepts of health care informatics and health information management. It will build on a historical foundation of informatics and roles of the informatics specialist.

HCS 510 .......................................................... 3 credits

Systems Life Cycle
This course will focus on the selection and implementation of an information system within a health facility. The course will review the phases of the life cycle: planning, analysis, design, implementation and evaluation.

HCS 520 .......................................................... 3 credits

Data Management and Design
This course will provide an overview of the understanding of how data, information and knowledge provides the foundation for healthcare information systems. The course will focus on the concepts of information and knowledge in relation to databases, systems operations and information systems.

HCS 589 .......................................................... 3 credits

Health Care Strategic Management
This is the capstone course for the graduate health care programs. The development and presentation of health care organization’s strategic plan will demonstrate mastery of the critical content as the principles relate to the health care industry. Special emphasis is placed upon consumer demand, market volatility, regulatory and fiscal constraints from the perspective of strategic management. The learner will demonstrate understanding of the critical importance of strategic management and planning within the dynamic, complex, and evolving nature of the health care industry.
Master of Health Administration Concentration in Sustainability Management

The following Master of Health Administration Concentration in Sustainability Management (MHA/SUS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Health Administration (MHA) program prepares leaders who can effectively respond to the dynamic and ever-changing health care industry. These individuals have a capacity to critically examine and evaluate issues and trends and are influential to the destiny of a broad and dynamic health care system. Curriculum is tailored to the needs of the health care leader/manager by providing content in finance, policy, research, technology, quality improvement, economics and strategic planning. In addition to the University Learning Goals, graduates of the MHA program will: create a strategic plan for a health care organization, analyze the impact of health care policy on delivery and services provided by the industry, evaluate informational technology and security management needs of health care, utilize data to support quality and performance measure decision-making processes for health care entities, demonstrate management of organizational finances within the economic environment of various health care industries, and analyze the impact of various management and leadership theories within health care organizations and delivery systems.

Students can gain additional knowledge through the selection and completion of a 9 credit specialization in their area of interest. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/mha.

Additional Admission Requirements for the MHA/SUS

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• A minimum equivalent of three (3) years of full-time, post-high school professional work experience within the past ten years.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Requirements for the MHA/SUS
• Completion of a minimum of 43 credits.
• A minimum program grade point average (GPA) of 3.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
  Master of Health Administration
• Students who have earned a graduate degree in Health Administration (MHA) may not receive a certificate in the same area of focus. Example: a student may not earn an MHA/GER degree and a GER certificate; however, students who have completed a certificate may return to receive a Master of Health Administration (MHA) degree with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the MHA/SUS
Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: HCS 504, HCS 589
The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses as part of the master’s degree program. In this bridge program, a master’s degree student would be allowed to substitute up to two graduate level courses with doctoral level courses. Students who choose this option would then be eligible to waive these courses in the doctoral program since they were already taken in the master’s degree program.

All credit-bearing doctoral courses must be completed with a grade of “B-” or better. Students who earn a grade lower than a “B-” will not be able to use the bridge course to waive credits upon enrollment in a doctoral program.

Minimum Grade Requirements for the MHA/SUS
• Students in this program are required to achieve a minimum grade of “B” (3.0) in following course: HCS 589. A “B” grade is not acceptable. Students who fail to receive a minimum grade of “B” will be scholastically disqualified from the University.

• Students who fail to meet the minimum grade requirement and have been scholastically disqualified will not be allowed to continue in the program until the course has been successfully repeated. Students will be allowed to repeat each class in which the minimum grade was not achieved one time. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MHA program.

Course Descriptions for the MHA/SUS
HCS 504 .............................................................................................................. 1 credit
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.
HCS 531 .............................................................................................................. 3 credits
Health Care Organizations and Delivery Systems
This course is a comprehensive approach to health care delivery systems that provides the student with an in-depth understanding of health systems and organizations. Students will examine historical evolutions of the health care industry and recent impacts that influence the delivery of health care.
HCS 577 .............................................................................................................. 3 credits
Financial Management in Health Care
This course presents the concepts of financial accounting important to the understanding of the financial environment of the health care industry. Students interpret financial data necessary to make decisions, describe the different third party payment methods, experiment with cost finding and price setting, and conduct break-even analyses. The course provides students with experience in capital and operating budgets, and financial forecasts.
HCS 552 .............................................................................................................. 3 credits
Health Care Economics
This course focuses on the application of macro and micro economic tools to the health care industry. Content includes demand management; concepts of efficiency, production and distribution of health care services; impact of regulation and reimbursement; and economic incentives in health care. Students apply principles to a variety of business models.
HCS 588 .............................................................................................................. 3 credits
Measuring Performance Standards
Quality improvement initiatives rely upon data from monitoring program implementation and evaluating program outcomes to determine achievement of program objectives. The processes of developing and revising monitoring and outcome measures are
used to help determine progress toward meeting accreditation and regulatory standards.

HCS 533 ................................................................. 3 credits

Health Information Systems
This course provides administrators and managers an overview of the information systems used in the health care industry. The effective use of data requires an understanding of how the data is captured as well as the HIPAA and security issues related to this confidential material. The course provides students with a general background to communicate more effectively with technical personnel and provide general management oversight of information systems within health care organizations.

HCS 514 ................................................................................. 3 credits

Managing in Today’s Health Care Organizations
This course focuses on the adaptation of organizational management to evolving health systems. Students will examine organizational theory, organizational performance, structure, change management and human resource management. Students apply various organizational theories to contemporary issues.

HCS 550 ............................................................................. 3 credits

Health Care Policy
This course will provide students with an understanding of how health care policy influences systems and the delivery of care. Policymakers who influence the health status of a society will be identified as well as the role of economic health, interest groups, and the various levels of government involved in policymaking will be examined. Challenges, stakeholder impact, and organizational behavior, all caused by policy requirements, will be identified.

HCS 545 ............................................................................. 3 credits

Health Law and Ethics
Students explore and analyze current ethical issues such as a biomedical research, insurance statutes, and demand management. Students survey the extensive legal foundations of health care and apply current case law to contemporary situations. Topics include legal aspects of legislation, patient rights, data security, professional liability, and labor relations.

HCS 535 ............................................................................. 3 credits

Concepts of Population Health
This course addresses the epidemiological and sociological perspectives and techniques for analyzing the health status of populations. Topics focus on disease trends, distribution and detriments of health and disease, models and concepts of health and wellness, and the development of a proactive response to community health issues.

HCS 539 ............................................................................. 3 credits

Marketing for Health Care
This course examines marketing principles as they are applied within various health delivery systems. Special attention is focused on consumer behavior, market segmentation, environmental scanning, and identification of new market opportunities. The role of social marketing, data base research, and evaluation design and interpretation are addressed.

HCS 548 ............................................................................. 3 credits

Foundations of Gerontology
This course introduces students to the field of gerontology and focuses on the aspect of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older adults.

HCS 567 ............................................................................. 3 credits

Entrepreneurship in Health Care
This course will set up the context of entrepreneurship and new business development; examine the characteristics of entrepreneurs, identifying and quantifying market opportunities in the health care market, as well as conceptualizing the resources and capabilities needed. Topics include opportunity assessment, regulated industry implications and requirements, as well as the challenges of expansion within an existing enterprise.

HCS 587 ............................................................................. 3 credits

Creating Change Within Organizations
Diffusion of innovations models in health care systems use principles of planned change within a dynamic organizational environment. Communication skills, such as negotiation and conflict resolution, help leaders analyze and respond to health care needs while using resources efficiently.

HCS 591 ............................................................................. 3 credits

Creating a Sustainable Health Care Organization
This course explores the challenges faced by health care organizations as they create an environment focused on sustainability. Understanding sustainability, assessing institutional practices, supporting behavioral change, organizational leadership, and exploring innovation are examined.

HCS 593 ............................................................................. 3 credits

Economics of Sustainability
This course examines the economic issues related to the management of resources in the creation of lean/green environmentally focused organizations. Topics include financial implications, economic analysis of sustainable goods and resources, as well as measures collaborating with external programs and services.

HCS 596 ............................................................................. 3 credits

Issues in Environmental Sustainability
Sustainability strategies are evolving and transforming the landscape of health care. This course will explore the impact of technology, regulations, societal and community interactions, and use of evidenced based knowledge to support environmental sustainability.

HCS 589 ............................................................................. 3 credits

Health Care Strategic Management
This is the capstone course for the graduate health care programs. The development and presentation of health care organization’s strategic plan will demonstrate mastery of the critical content as the principles relate to the health care industry. Special emphasis is placed upon consumer demand, market volatility, regulatory and fiscal constraints from the perspective of strategic management. The learner will demonstrate understanding of the critical importance of strategic management and planning within the dynamic, complex, and evolving nature of the health care industry.
Master of Science in Nursing Concentration in Nurse Administration

The following Master of Science in Nursing Concentration in Nurse Administration (MSN/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Nursing (MSN) program, accredited by the Commission on Collegiate Nursing Education (CCNE)*, enhances the knowledge and skills of registered nurses with baccalaureate-degree preparation. The program prepares registered nurses to function in leadership roles in administration, practice, and education settings. Advanced nursing theory and research provide the foundation for nurses to influence the future of nursing and health care. Students complete core courses in advanced nursing content, process, and leadership. Concentrations in nursing administration, nursing education, or family nurse practitioner allow students to concentrate on developing increased knowledge and skills in a specific area of content or advanced practice role.

*The Masters of Science degree programs are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington DC 20036; (202)887-6791.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/msn-adm.

Role of the Nurse Administrator

NSG 580~ .................................................................4 credits
Practicum

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MSN/ADM

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree with an upper division major in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelors degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

• An undergraduate degree posted transcript with a cumulative grade point average (GPA) of 3.0 is required for all students residing in Oregon or attending the Oregon campus.

• Current employment is not a requirement for admission.

• For all students starting 7/1/2012 - Applicants must reside in the United States or in one of the US Territories with documentation of a valid, unrestricted / unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  • Guam
  • American Samoa
  • Northern Mariana Islands
  • US Virgin Islands

• Effective 11/1/06, nursing students in the state of Florida attending ground based or FlexNet MSN or RN/BSN programs must hold a RN license from the state of Florida for admissions, as mandated by the Florida State Board of Nursing. Military and VA nursing students may hold a RN license from any state as ruled by federal guidelines. Clinical placement of military or VA students must be completed in VA or military environments or the student is subject to obtaining a Florida RN license for placement.
  • Signed Criminal Background Check Disclosure
  • Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
  • Signed FERPA Release/Drug Test or Failure to Test Results

Degree Requirements for the MSN/ADM

• Completion of a minimum of 38 credits.

• A minimum program grade point average (GPA) of 3.0.
• Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as:
Master of Science in Nursing

Academic Progression Requirements for the MSN/ADM
• Minimum grade of B- or better in all graduate level courses.
• For all students starting 7/1/2012—Students must hold a valid, unrestricted / unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program.
• Clinical experiences/hours cannot be completed during work time at the student’s place of employment.
• Students must successfully complete NSG 580 with a B- or better. Students have a maximum of three attempts to meet the minimum grade requirement. Students who do not pass this class on the first attempt will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.
• Students who have been prioritized to the School of Advanced Studies offer a bridge opportunity for master’s degree students who are interested in taking doctoral coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
The following courses in the Required Course of Study may not be waived: HSN 505, NSG 510, NSG 520, NSG 550, NSG 580. The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses as part of the master’s degree program.

Additional Academic Program Re-Entry Policies for the MSN/ADM
• Any student who has been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.
• Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.
Course Descriptions for the MSN/ADM

HSN 505 ................................................................. 2 credits
Introduction to Graduate Studies in Nursing
This course presents the University of Phoenix model and learning goals. A key focus of this course is an introduction to the role of masters-prepared nurses in professional practice. Topics include working in learning teams, academic honesty, graduate-level oral and written communication, APA guidelines, and professional presentations.

NSG 510................................................................. 3 credits
Theoretical Foundations of Nursing Roles and Practice
This course introduces the Division of Nursing’s philosophical framework for professional practice. Topics include theories and models of the interrelated roles of the nurse as researcher, practitioner, and leader.

NSG 515................................................................. 3 credits
Nursing Research and Evidence-Based Practice
This course focuses on research and evidence-based practice in nursing science. A key focus is the process of translating knowledge influenced from quantitative and qualitative research into clinical guidelines. Topics include research methodologies and designs, statistical measures, and the role of the nurse as scientist.

NSG 520................................................................. 3 credits
Nursing Leadership
This course integrates the principles, theories, and models of leadership used in advanced nursing roles. A key focus is determining one’s personal identity as a nurse leader. Topics include complexities in global health care, delivery systems, leadership in the current health care environment, and the future of nursing. Students begin developing a project to be finalized and presented in the capstone course.

NSG 550................................................................. 3 credits
Role of the Nurse Administrator
This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.

HSN 525 ................................................................. 4 credits
Research Methodologies for the Nurse Administrator
This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.

HSN 555 ................................................................. 3 credits
Human Resources in Health Care
This course examines principles of human resource management and personnel development needs in health care organizations. Topics include job analysis, appraisal systems, employee development and evaluation, forecasting of workforce needs, and legal considerations. This course requires 20 hours of clinical practicum.

HSN 560 ................................................................. 3 credits
Organizational Systems and Informatics
This course focuses on the integration of informatics in health care organizations. Topics include organizational effectiveness, systems management, and ethical considerations in data management. This course requires 20 hours of clinical practicum.

HSN 565 ................................................................. 3 credits
Organizational Change and Negotiation
The course examines the role of the nurse leader during organizational change. A key focus is the effect of change on health care delivery. Topics include principles and models of change, communication skills, and allocation of organization resources. This course requires 20 hours of clinical practicum.

HSN 570 ................................................................. 3 credits
Financial Resource Management
This course examines financial resource management as used in health care organizations. Topics include budgeting, financial forecasts, analysis of financial performance, and business plan design. This course requires 20 hours of clinical practicum.

HSN 575 ................................................................. 4 credits
Quality Management and Outcomes
This course focuses on quality management initiatives for improving health care delivery outcomes. Topics include models and theories of quality improvement, evaluation methods, and regulatory and accreditation standards. This course requires 20 hours of clinical practicum.

NSG 580................................................................. 4 credits
Practicum
This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.

Master of Science in Nursing Concentration in Nurse Administration Bridge

The following Master of Science in Nursing Concentration in Nurse Administration Bridge (MSN/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  - Guam
  - American Samoa
  - Northern Mariana Islands
  - US Virgin Islands
- Effective 11/1/06, nursing students in the state of Florida attending ground based or FlexNet MSN or RN/BSN programs must hold a RN license from the state of Florida for admissions, as mandated by the Florida State Board of Nursing. Military and VA nursing students may hold a RN license from any state as ruled by federal guidelines. Clinical placement of military or VA students must be completed in VA or military environments or the student is subject to obtaining a Florida RN license for placement.
- Signed Criminal Background Check Disclosure
- Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results

Degree Requirements for the MSN/ADM

- Completion of a minimum of 47 credits.
- A minimum program grade point average (GPA) of 3.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Master of Science in Nursing

Academic Progression Requirements for the MSN/ADM

- Students enrolling in the MSN bridge program must complete the three MSN bridge courses in these content areas: Theory, Evidence-Based Practice, and Assessment, with a C or better in each course prior to enrolling in NSG 510 - Role-Based Nursing Practice.
- Minimum grade of B- or better in all graduate level courses.
- For all students starting 7/1/2012- Students must hold a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program.
- Clinical experiences/hours cannot be completed during work time at the student's place of employment.
• Students must successfully complete NSG 580 with a B- or better. Students have a maximum of three attempts to meet the minimum grade requirement. Students who do not pass this class on the first attempt will be scholastically disqualified.

Minimum Grade Requirements for the MSN/ADM

• All MSN bridge courses must be completed with a grade of C or better. Students who do not pass these courses with a grade of C or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat each class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MSN program.

• All graduate level MSN courses must be completed with a grade of B- or better. Students who do not pass these classes with a grade of B- or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension.

Students must successfully complete NSG 580 with a B- or better. Students who do not pass this course on the first attempt will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.

• Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.

Students must successfully complete NSG 580 with a B- or better. Students who do not pass this class on the first attempt will be scholastically disqualified.

Residency Requirements and Course Waivers for the MSN/ADM

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 8 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: HSN 505, NSG 510, NSG 520, NSG 550, NSG 580.

The School of Advanced Studies offers a bridge opportunity for master's degree students who are interested in taking doctoral courses as part of the master's degree program.

Additional Academic Program Re-Entry Policies for the MSN/ADM

• Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course will be required to re-enter and follow the admission, degree requirements and program policies published in the catalog which is in effect at the time of re-entry.

• Students who have been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.

• Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Course Descriptions for the MSN/ADM

HSN 505  ................................................................. 2 credits

Introduction to Graduate Studies in Nursing
This course presents the University of Phoenix model and learning goals. A key focus of this course is an introduction to the role of masters-prepared nurses in professional practice. Topics include working in learning teams, academic honesty, graduate-level oral and written communication, APA guidelines, and professional presentations.
NSG 397 ................................................................. 3 credits  
**Professional Nursing Role**  
This course introduces the Division of Nursing’s philosophical framework for professional practice and the interrelated roles of the nurse as practitioner, leader, and researcher. Topics include critical thinking, clinical judgment, and professional values and responsibilities. A key focus is the behaviors necessary for professional and academic accountability.

NSG 415 ................................................................. 3 credits  
**Theory-Based Nursing Practice**  
This course focuses on behaviors, attitudes, and values necessary for theory-based professional nursing practice. The roles of the generalist nurse are presented within the frameworks of Watson’s theory of human caring and Benner’s theory of novice to expert.

NSG 455 ................................................................. 3 credits  
**Evidence-Based Practice and Statistics**  
This course emphasizes the role of evidence-based practice in the nursing profession. Topics include formulating research questions; collecting, summarizing, and interpreting data; and understanding the elements of research designs. The key concept is the role of the nurse as researcher.

NSG 510 ................................................................. 3 credits  
**Theoretical Foundations of Nursing Roles and Practice**  
This course introduces the Division of Nursing’s philosophical framework for professional practice. Topics include theories and models of the interrelated roles of the nurse as researcher, practitioner, and leader.

NSG 515 ................................................................. 3 credits  
**Nursing Research and Evidence-Based Practice**  
This course focuses on research and evidence-based practice in nursing science. A key focus is the process of translating knowledge influenced from quantitative and qualitative research into clinical guidelines. Topics include research methodologies and designs, statistical measures, and the role of the nurse as scientist.

NSG 520 ................................................................. 3 credits  
**Nursing Leadership**  
This course integrates the principles, theories, and models of leadership used in advanced nursing roles. A key focus is determining one’s personal identity as a nurse leader. Topics include complexities in global health care, delivery systems, leadership in the current health care environment, and the future of nursing. Students begin developing a project to be finalized and presented in the capstone course.

NSG 550 ................................................................. 3 credits  
**Role of the Nurse Administrator**  
This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.

HSN 525 ................................................................. 4 credits  
**Research Methodologies for the Nurse Administrator**  
This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.

HSN 555 ................................................................. 3 credits  
**Human Resources in Health Care**  
This course examines principles of human resource management and personnel development needs in health care organizations. Topics include job analysis, appraisal systems, employee development and evaluation, forecasting of workforce needs, and legal considerations. This course requires 20 hours of clinical practicum.

HSN 560 ................................................................. 3 credits  
**Organizational Systems and Informatics**  
This course focuses on the integration of informatics in health care organizations. Topics include organizational effectiveness, systems management, and ethical considerations in data management. This course requires 20 hours of clinical practicum.

HSN 565 ................................................................. 3 credits  
**Organizational Change and Negotiation**  
The course examines the role of the nurse leader during organizational change. A key focus is the effect of change on health care delivery. Topics include principles and models of change, communication skills, and allocation of organization resources. This course requires 20 hours of clinical practicum.

HSN 570 ................................................................. 3 credits  
**Financial Resource Management**  
This course examines financial resource management as used in health care organizations. Topics include budgeting, financial forecasts, analysis of financial performance, and business plan design. This course requires 20 hours of clinical practicum.

HSN 575 ................................................................. 4 credits  
**Quality Management and Outcomes**  
This course focuses on quality management initiatives for improving health care delivery outcomes. Topics include models and theories of quality improvement, evaluation methods, and regulatory and accreditation standards. This course requires 20 hours of clinical practicum.

NSG 580 ................................................................. 4 credits  
**Practicum**  
This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.
Master of Science in Nursing Concentration in Nurse Administration-International

The following Master of Science in Nursing Concentration in Nurse Administration-International (MSN/ADM-I) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Additional Admission Requirements for the MSN/ADM-I

All applicants are expected to meet the following admissions requirements:

- Applicants must be residents outside of the United States or approved US Territories. Program will be offered only through the Online Campus.
- An undergraduate degree with an upper division major in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelors degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- All students, with the exception of students residing in Canada or Puerto Rico, will be required to validate their International Nursing License equivalency by CGFNS (Commission on Graduates of Foreign Nursing Schools) or ICD (International Consultants of Delaware) for RN equivalency.
- All Canadian students must complete the Canadian RN License Acknowledgment Form and submit documentation of a valid, unrestricted, unencumbered RN license.
- Applicants residing in the Commonwealth of Puerto Rico must have an approved appeal on file documenting successful completion of the US NCLEX-RN exam and that all Puerto Rico RN licensing requirements are met to be eligible for admission.
- Signed Criminal Background Check Disclosure
- Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results
- Signed Foreign Nursing Memorandum of Understanding

Degree Requirements for the MSN/ADM-I

- Completion of a minimum of 38 credits.
- A minimum program grade point average (GPA) of 3.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Master of Science in Nursing

Academic Progression Requirements for the MSN/ADM-I

- Minimum grade of B- or better in all graduate level courses.
- Clinical experiences/hours cannot be completed during work time at the student's place of employment.
• Students must successfully complete NSG 580 with a B- or better. Students have a maximum of three attempts to meet the minimum grade requirement. Students who do not pass this class on the first attempt will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.

• Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.

Minimum Grade Requirements for the MSN/ADM-I

• All graduate level MSN courses must be completed with a grade of B- or better. Students who do not pass these classes with a grade of B- or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension.

• Students must successfully complete NSG 580 with a B- or better. Students have a maximum of three attempts to meet the minimum grade requirement. Students who do not pass this class on the first attempt will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.

• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

Residency Requirements and Course Waivers for the MSN/ADM-I

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 8 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• The following courses in the Required Course of Study may not be waived: HSN 505, NSG 510, NSG 520, NSG 550, NSG 580.

The School of Advanced Studies offers a bridge opportunity for master's degree students who are interested in taking doctoral courses as part of the master's degree program.

Additional Academic Program Re-Entry Policies for the MSN/ADM-I

• Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course will be required to re-enter and follow the admission, degree requirements and program policies published in the catalog which is in effect at the time of re-entry.

• Students who have been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.

• Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Course Descriptions for the MSN/ADM-I

HSN 505 ................................................................................... 2 credits
Introduction to Graduate Studies in Nursing
This course presents the University of Phoenix model and learning goals. A key focus of this course is an introduction to the role of masters-prepared nurses in professional practice. Topics include working in learning teams, academic honesty, graduate-level oral and written communication, APA guidelines, and professional presentations.

NSG 510 ................................................................................... 3 credits
Theoretical Foundations of Nursing Roles and Practice
This course introduces the Division of Nursing’s philosophical framework for professional practice. Topics include theories and models of the interrelated roles of the nurse as researcher, practitioner, and leader.

NSG 515 ................................................................................... 3 credits
Nursing Research and Evidence-Based Practice
This course focuses on research and evidence-based practice in nursing science. A key focus is the process of translating knowledge influenced from quantitative and qualitative research into clinical guidelines. Topics include research methodologies and
designs, statistical measures, and the role of the nurse as scientist.

NSG 520 ...................................................................................3 credits

Nursing Leadership
This course integrates the principles, theories, and models of leadership used in advanced nursing roles. A key focus is determining one’s personal identity as a nurse leader. Topics include complexities in global health care, delivery systems, leadership in the current health care environment, and the future of nursing. Students begin developing a project to be finalized and presented in the capstone course.

NSG 550 ...................................................................................3 credits

Role of the Nurse Administrator
This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.

HSN 525 ...................................................................................4 credits

Research Methodologies for the Nurse Administrator
This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.

HSN 555 ...................................................................................3 credits

Human Resources in Health Care
This course examines principles of human resource management and personnel development needs in health care organizations. Topics include job analysis, appraisal systems, employee development and evaluation, forecasting of workforce needs, and legal considerations. This course requires 20 hours of clinical practicum.

HSN 560 ...................................................................................3 credits

Organizational Systems and Informatics
This course focuses on the integration of informatics in health care organizations. Topics include organizational effectiveness, systems management, and ethical considerations in data management. This course requires 20 hours of clinical practicum.

HSN 565 ...................................................................................3 credits

Organizational Change and Negotiation
The course examines the role of the nurse leader during organizational change. A key focus is the effect of change on health care delivery. Topics include principles and models of change, communication skills, and the allocation of organization resources. This course requires 20 hours of clinical practicum.

HSN 570 ...................................................................................3 credits

Financial Resource Management
This course examines financial resource management as used in health care organizations. Topics include budgeting, financial forecasts, analysis of financial performance, and business plan design. This course requires 20 hours of clinical practicum.

HSN 575 ...................................................................................4 credits

Quality Management and Outcomes
This course focuses on quality management initiatives for improving health care delivery outcomes. Topics include models and theories of quality improvement, evaluation methods, and regulatory and accreditation standards. This course requires 20 hours of clinical practicum.

NSG 580 ...................................................................................4 credits

Practicum
This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.

Master of Science in Nursing Concentration in Nurse Education

The following Master of Science in Nursing Concentration in Nurse Education (MSN/NED) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Nursing (MSN) program, accredited by the Commission on Collegiate Nursing Education (CCNE)*, enhances the knowledge and skills of registered nurses with baccalaureate-degree preparation. The program prepares registered nurses to function in leadership roles in administration, practice, and education settings. Advanced nursing theory and research provide the foundation for nurses to influence the future of nursing and health care. Students complete core courses in advanced nursing content, process, and leadership. Concentrations in nursing administration, nursing education, or family nurse practitioner allow students to concentrate on developing increased knowledge and skills in a specific area of content or advanced practice role.

*The Masters of Science degree programs are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington DC 20036, (202)887-6791.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/msn-ned.

• For all students starting 7/1/2012 - Applicants must reside in
• Current employment is not a requirement for admission.
• A cumulative grade point average (GPA) of 2.5 on the
study.
The University reserves the right to modify the required course of
Admission Requirements for the MSN/NED
All applicants are expected to meet the following admissions
requirements:
• An undergraduate degree with an upper division major in
nursing from a regionally or approved nationally accredited, or
candidate for accreditation, college or university or comparable
undergraduate bachelors degree earned at a recognized foreign
institution. If the institution became accredited while the
student was attending, a minimum of 75% of the coursework
taken toward the degree must have been completed while the
institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the
undergraduate degree posted transcript is required for
admission.
• An undergraduate degree posted transcript with a cumulative
grade point average (GPA) of 3.0 is required for all students
residing in Oregon or attending the Oregon campus.
• Current employment is not a requirement for admission.
• For all students starting 7/1/2012 - Applicants must reside in
the United States or in one of the US Territories with
documentation of a valid, unrestricted/unencumbered RN
license in all states in which the applicant holds an active
nursing license. For applicants holding licenses in multiple
jurisdictions, all active licenses must be valid, unrestricted/
unencumbered through the duration of the program. Applicants
from the following territories must also hold a RN license
obtained by taking the NCLEX-RN exam:
  • Guam
  • American Samoa
  • Northern Mariana Islands
  • US Virgin Islands
• Effective 11/1/06, nursing students in the state of Florida
attending ground based or FlexNet MSN or RN/BSN programs
must hold a RN license from the state of Florida for admissions,
as mandated by the Florida State Board of Nursing, Military
and VA nursing students may hold a RN license from any state
as ruled by federal guidelines. Clinical placement of military or VA
students must be completed in VA or military environments or
the student is subject to obtaining a Florida RN license for
placement.
• Signed Criminal Background Check Disclosure
• Signed Acknowledgement of Criminal Conviction Prohibition
for Placement and Licensure
• Signed FERPA Release/Drug Test or Failure to Test Results
Degree Requirements for the MSN/NED
• Completion of a minimum of 38 credits.
• A minimum program grade point average (GPA) of 3.0.
• Concentrations are reflected on the transcript only and will not
appear on the diploma. The diploma awarded for this program
will read as:
 Master of Science in Nursing
Academic Progression Requirements for the MSN/NED
• Minimum grade of B- or better in all graduate level courses.
• For all students starting 7/1/2012 - Students must hold a valid,
unrestricted/unencumbered RN license in all states in which
the applicant holds an active nursing license. For students
holding licenses in multiple jurisdictions, all active licenses
must be valid, unrestricted/unencumbered through the
duration of the program.
• Clinical experiences/hours cannot be completed during work
time at the student's place of employment.
• Students must successfully complete NSG 580 with a B- or
better. Students have a maximum of three attempts to meet the
minimum grade requirement. Students who do not pass this
class on the first attempt will be scholastically disqualified.
Students who fail to meet the minimum grade requirement after
the second attempt, will be placed on scholastic suspension and
will be withdrawn from the program. Students must sit out for
six months after the second unsuccessful attempt. Once the
student has sat out six months, the student may submit to SAC
to appeal for a third attempt. If students do not meet the
minimum grade requirement after the third attempt, the student
will be Scholastically Suspended.
• Any student who demonstrates behaviors in a clinical,
classroom, or laboratory setting that gives rise to a reasonable
suspicion, of substance abuse or otherwise indicates that the
student may be impaired by drugs or alcohol, without
reasonable justification will be required to undergo a “for-
cause” 10 panel, plus alcohol drug test.
Minimum Grade Requirements for MSN/NED
• All graduate level MSN courses must be completed with a grade
of B- or better. Students who do not pass these classes with a
grade of B- or better will be scholastically disqualified. Students
who fail to meet the minimum grade requirement will be
allowed to repeat the class once. Students who fail to meet the
minimum grade requirement after the second attempt, will be
permanently withdrawn from the program and will be placed
on scholastic suspension.
Any student who has been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.

Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

**Assessment, Measurement, and Evaluation**

The course presents the use of statistical designs, qualitative data, and quantitative data in determining educational outcomes. A key focus is on assessment, measurement, and evaluation of clinical practice and nursing curriculum. This course requires 20 hours of clinical practicum.

**Comprehensive Health Assessment**

This course examines instructional design and development theories and research as a necessary foundation for meeting goals of outcome-based curriculum. Topics include current instructional design models and learning theories. Students apply the systematic process of analysis, design, development, implementation, and evaluation to create instructional products and solutions. This course requires 20 hours of clinical practicum.

**Practicum**

This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.
For all students starting 7/1/2012 - Applicants must reside in Oregon or attending the Oregon campus. A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree with an upper division major in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelors degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A cumulative grade point average (GPA) of 3.0 is required for all students residing in Oregon or attending the Oregon campus.

• Current employment is not a requirement for admission.

• For all students starting 7/1/2012 - Applicants must reside in the United States or in one of the US Territories with documentation of a valid, unrestricted / unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  • Guam
  • American Samoa
  • Northern Mariana Islands
  • US Virgin Islands

• Effective 11/1/06, nursing students in the state of Florida attending ground based or FlexNet MSN or RN/BSN programs must hold a RN license from the state of Florida for admissions, as mandated by the Florida State Board of Nursing. Military and VA nursing students may hold a RN license from any state as ruled by federal guidelines. Clinical placement of military or VA students must be completed in VA or military environments or the student is subject to obtaining a Florida RN license for placement.

• Signed Criminal Background Check Disclosure
• Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
• Signed FERPA Release/Drug Test or Failure to Test Results

Minimum Grade Requirements for the MSN/NED

• All MSN bridge courses must be completed with a grade of C or better. Students who do not pass these courses with a grade of C or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.

• Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.
• Students must successfully complete NSG 580 with a B- or better. Students have a maximum of three attempts to meet the minimum grade requirement. Students who do not pass this class on the first attempt will be scholastically disqualified.

Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. The following courses in the Required Course of Study may not be waived: HSN 505, NSG 510, NSG 520, NSG 525, NSG 580.

The School of Advanced Studies offers a bridge opportunity for master’s degree students who are interested in taking doctoral courses as part of the master’s degree program.

Additional Academic Program Re-Entry Policies for the MSN/ NED

• Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course will be required to re-enter and follow the admission, degree requirements and program policies published in the catalog which is in effect at the time of re-entry.

• Students who have been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.

• Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Course Descriptions for the MSN/NED

HSN 505 .............................................................................. 2 credits

Introduction to Graduate Studies in Nursing

This course presents the University of Phoenix model and learning goals. A key focus of this course is an introduction to the role of masters-prepared nurses in professional practice. Topics include working in learning teams, academic honesty, graduate-level oral and written communication, APA guidelines, and professional presentations.

NSG 397 .............................................................................. 3 credits

Professional Nursing Role

This course introduces the Division of Nursing’s philosophical framework for professional practice and the interrelated roles of the nurse as practitioner, leader, and researcher. Topics include critical thinking, clinical judgment, and professional values and responsibilities. A key focus is the behaviors necessary for professional and academic accountability.

NSG 415 .............................................................................. 3 credits

Theory-Based Nursing Practice

This course focuses on behaviors, attitudes, and values necessary for theory-based professional nursing practice. The roles of the generalist nurse are presented within the frameworks of Watson’s theory of human caring and Benner’s theory of novice to expert.

NSG 455 .............................................................................. 3 credits

Evidence-Based Practice and Statistics

This course emphasizes the role of evidence-based practice in the nursing profession. Topics include formulating research questions; collecting, summarizing, and interpreting data; and understanding the elements of research designs. The key concept is the role of the nurse as researcher.

NSG 510 .............................................................................. 3 credits

Theoretical Foundations of Nursing Roles and Practice

This course introduces the Division of Nursing’s philosophical framework for professional practice. Topics include theories and models of the interrelated roles of the nurse as researcher, practitioner, and leader.

NSG 415 .............................................................................. 3 credits

Nursing Research and Evidence-Based Practice

This course focuses on research and evidence-based practice in nursing science. A key focus is the process of translating knowledge influenced from quantitative and qualitative research into clinical guidelines. Topics include research methodologies and designs, statistical measures, and the role of the nurse as scientist.

NC 520 .............................................................................. 3 credits

Nursing Leadership

This course integrates the principles, theories, and models of leadership used in advanced nursing roles. A key focus is determining one’s personal identity as a nurse leader. Topics include complexities in global health care, delivery systems, leadership in the current health care environment, and the future of nursing.

Students...
begin developing a project to be finalized and presented in the capstone course.

NSG 525....................................................................................3 credits

Role of the Nurse Educator
This course examines the role of the nurse educator in research, education, community, service, and practice. Topics focus on emerging trends and issues that influence nursing education and the rights and responsibilities inherent in educational positions. This course requires 20 hours of clinical practicum.

NSG 530....................................................................................3 credits

Theory and Principles of Nursing Education
This course focuses on andragogy, educational frameworks, and learning theories. A key focus is for nurse educators to understand how students acquire knowledge. Topics include teaching strategies in diverse settings for nursing education. This course requires 20 hours of clinical practicum.

NSG 535....................................................................................3 credits

Curriculum Development
This course focuses on curriculum design and development theories and research. A key focus is preparing educators to meet learning needs of students in changing social, cultural, and technological environments. Topics focus on aligning curriculum and course design to program mission, objectives, and outcomes. This course requires 20 hours of clinical practicum.

NSG 540....................................................................................3 credits

Instructional Design and Technology
This course examines instructional design and development theories and research as a necessary foundation for meeting goals of outcome-based curriculum. Topics include current instructional design models and learning theories. Students apply the systematic process of analysis, design, development, implementation, and evaluation to create instructional products and solutions. This course requires 20 hours of clinical practicum.

NSG 545....................................................................................3 credits

Assessment, Measurement, and Evaluation
The course presents the use of statistical designs, qualitative data, and quantitative data in determining educational outcomes. A key focus is on assessment, measurement, and evaluation of clinical practice and nursing curriculum. This course requires 20 hours of clinical practicum.

NSG 500....................................................................................4 credits

An Integrated Approach to Pathophysiology and Pharmacology
This course presents an integrated approach to pathophysiology, pharmacokinetics, and pharmacodynamics of medications throughout the life span. A key focus is developing clinical decision-making skills essential to safe and effective pharmacological intervention based on pathophysiology. Topics include a holistic approach to changes associated with disease states, improving physiological status through nursing interventions, and the nurse’s role in health promotion and disease management.

NSG 505....................................................................................3 credits

Comprehensive Health Assessment
This course presents theories and techniques for performing and documenting comprehensive health assessments across the life span. Topics include physiological, psychological, spiritual, sociocultural, and developmental variables of patients. This course requires 10 lab hours allowing students to demonstrate a complete health assessment.

NSG 580....................................................................................4 credits

Practicum
This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.

Master of Science in Nursing Concentration in Nurse Education-International

The following Master of Science in Nursing Concentration in Nurse Education-International (MSN/NED-I) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Science in Nursing (MSN) program, accredited by the Commission of Collegiate Nursing Education (CCNE)*, enhances the knowledge and skills of registered nurses with baccalaureate-degree preparation. The program prepares registered nurses to function in leadership roles in administration, practice, and education settings. Advanced nursing theory and research provide the foundation for nurses to influence the future of nursing and health care. Students complete core courses in advanced nursing content, process, and leadership. Concentrations in nursing administration, nursing education, or family nurse practitioner allow students to concentrate on developing increased knowledge and skills in a specific area of content or advanced practice role.

* For more information about accreditation, please contact CCNE at One Dupont Circle, NW, Suite 530, Washington, DC 20036. (202) 887-6791

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/msn-ned-i.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

HSN 505 ...................................................................................2 credits

Introduction to Graduate Studies in Nursing
NSG 510 ~ .............................................................................3 credits

Theoretical Foundations of Nursing Roles and Practice
NSG 515 ~ .............................................................................3 credits

Nursing Research and Evidence-Based Practice
NSG 520 ~ .............................................................................3 credits

Nursing Leadership
NSG 525 ~ .............................................................................3 credits

Role of the Nurse Educator
NSG 530 ~ .............................................................................3 credits

Theory and Principles of Nursing Education
NSG 535 ~ .............................................................................4 credits

Curriculum Development
NSG 540 ~ .............................................................................3 credits

Instructional Design and Technology
NSG 545 ~ .............................................................................3 credits

Assessment, Measurement, and Evaluation
**Additional Admission Requirements for the MSN/NED-I**

All applicants are expected to meet the following admissions requirements:

- Applicants must be residents outside of the United States or approved US Territories. Program will be offered only through the Online Campus.
- An undergraduate degree with an upper division major in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelors degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- All students, with the exception of students residing in Canada or Puerto Rico, will be required to validate their International Nursing License equivalency by CGFNS (Commission on Graduates of Foreign Nursing Schools) or ICD (International Consultants of Delaware) for RN equivalency.
- All Canadian students must complete the Canadian RN License Acknowledgment Form and submit documentation of a valid, unrestricted, unencumbered RN license.
- Applicants residing in the Commonwealth of Puerto Rico must have an approved appeal on file documenting successful completion of the US NCLEX-RN exam and that all Puerto Rico RN licensing requirements are met to be eligible for admission.
- Minimum Grade Requirements for the MSN/NED-I
  - All graduate level MSN courses must be completed with a grade of B- or better. Students who do not pass these classes with a grade of B- or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.
  - Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.

**Degree Requirements for the MSN/NED-I**

- Completion of a minimum of 38 credits.
- A minimum program grade point average (GPA) of 3.0.
- Concentrations are reflected on the transcript only and will not appear on the diploma. The diploma awarded for this program will read as: Master of Science in Nursing

**Academic Progression Requirements for the MSN/NED-I**

- Minimum grade of B- or better in all graduate level courses.
- Clinical experiences/hours cannot be completed during work time at the student’s place of employment.
- Students must successfully complete NSG 580 with a B- or better. Students have a maximum of three attempts to meet the minimum grade requirement. Students who do not pass this class on the first attempt will be scholastically disqualified. Students who fail to meet the minimum grade requirement after the second attempt, will be placed on scholastic suspension and will be withdrawn from the program. Students must sit out for six months after the second unsuccessful attempt. Once the student has sat out six months, the student may submit to SAC to appeal for a third attempt. If students do not meet the minimum grade requirement after the third attempt, the student will be Scholastically Suspended.
- Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a “for-cause” 10 panel, plus alcohol drug test.

**Residency Requirements and Course Waivers for the MSN/NED-I**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 30 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 8 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previ-
uous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: HSN 505, NSG 510, NSG 520, NSG 525, NSG 580.

The School of Advanced Studies offers a bridge opportunity for master's degree students who are interested in taking doctoral courses as part of the master's degree program.

Additional Academic Program Re-Entry Policies for the MSN/ NED-I
• Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course will be required to re-enter and follow the admission, degree requirements and program policies published in the catalog which is in effect at the time of re-entry.
• Students who have been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.
• Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Course Descriptions for the MSN/NED-I

HSN 505 .................................................................................................................2 credits

Introduction to Graduate Studies in Nursing
This course presents the University of Phoenix model and learning goals. A key focus of this course is an introduction to the role of masters-prepared nurses in professional practice. Topics include working in learning teams, academic honesty, graduate-level oral and written communication, APA guidelines, and professional presentations.
NSG 510 .................................................................................................................3 credits

Theoretical Foundations of Nursing Roles and Practice
This course introduces the Division of Nursing's philosophical framework for professional practice. Topics include theories and models of the interrelated roles of the nurse as researcher, practitioner, and leader.
NSG 515 .................................................................................................................3 credits

Nursing Research and Evidence-Based Practice
This course focuses on research and evidence-based practice in nursing science. A key focus is the process of translating knowledge influenced from quantitative and qualitative research into clinical guidelines. Topics include research methodologies and designs, statistical measures, and the role of the nurse as scientist.
NSG 520 ..................................................................................................................3 credits

Nursing Leadership
This course integrates the principles, theories, and models of leadership used in advanced nursing roles. A key focus is determining one's personal identity as a nurse leader. Topics include complexities in global health care, delivery systems, leadership in the current health care environment, and the future of nursing. Students begin developing a project to be finalized and presented in the capstone course.
NSG 525 ..................................................................................................................3 credits

Role of the Nurse Educator
This course examines the role of the nurse educator in research, education, community, service, and practice. Topics focus on emerging trends and issues that influence nursing education and the rights and responsibilities inherent in educational positions. This course requires 20 hours of clinical practicum.
NSG 530 .................................................................................................................4 credits

Theory and Principles of Nursing Education
This course focuses on andragogy, educational frameworks, and learning theories. A key focus is for nurse educators to understand how students acquire knowledge. Topics include teaching strategies in diverse settings for nursing education. This course requires 20 hours of clinical practicum.
NSG 535 .................................................................................................................3 credits

Curriculum Development
This course focuses on curriculum design and development theories and research. A key focus is preparing educators to meet learning needs of students in changing social, cultural, and technological environments. Topics focus on aligning curriculum and course design to program mission, objectives, and outcomes. This course requires 20 hours of clinical practicum.
NSG 540 .................................................................................................................3 credits

Instructional Design and Technology
This course examines instructional design and development theories and research as a necessary foundation for meeting goals of outcome-based curriculum. Topics include current instructional design models and learning theories. Students apply the systematic process of analysis, design, development, implementation, and evaluation to create instructional products and solutions. This course requires 20 hours of clinical practicum.
NSG 545 .................................................................................................................3 credits

Assessment, Measurement, and Evaluation
The course presents the use of statistical designs, qualitative data, and quantitative data in determining educational outcomes. A key focus is on assessment, measurement, and evaluation of clinical practice and nursing curriculum. This course requires 20 hours of clinical practicum.
NSG 580 .................................................................................................................4 credits

An Integrated Approach to Pathophysiology and Pharmacology
This course presents an integrated approach to pathophysiology, pharmacokinetics, and pharmacodynamics of medications throughout the life span. A key focus is developing clinical decision-making skills essential to safe and effective pharmacological intervention based on pathophysiology. Topics include a holistic approach to changes associated with disease states, improving physiological status through nursing interventions, and the nurse's role in health promotion and disease management.
Online modality in their state. Please contact your enrollment advisor for more information. The availability of programs and concentrations depend on student demand. Some programs may not be available in all states. Students may want to consider completing certain courses in the Phoenix campus locations: Online, depending on state of residence. The online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The following Master of Science in Nursing and Master of Health Administration (MSN/MHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The program includes essential elements from both degree programs to provide students with the knowledge and skills needed to effectively examine and evaluate issues and trends impacting health care.

The MSN program is designed for those nurses who want to pursue more advanced positions in today’s challenging health care environment. The program blends nursing theory and advanced practice concepts necessary to successful work within the structure, culture, and mission of any size health care organization or educational setting.

The MSN program consists of three major areas: the core, the major, and the cognate. The core incorporates the major foci of the Master of Science in Nursing degree: the theory of nursing influence, influence of nursing research, and on the advanced practice of nursing. The major includes advanced course work in nursing: management of families and aggregates, administration, and education. The cognate is fulfilled through the MHA program content.

The MHA curriculum focuses on the content related to finance, economics, policy, quality improvement, marketing, and strategic planning. In addition, students complete course work in concepts related to public health, long term care and health care informatics. Graduates will have enhanced their management/administrative background through a curriculum that provides students with the ability to apply theory to contemporary practice applications.

For more information about accreditation, please contact CCNE at One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202)887-6791

For more information about our graduation rates, the median debt experiences at selected locations. There is a minimum 60 hours mentor, they achieve the objectives through approved student experiences at selected locations. There is a minimum 60 hours clinical practicum. This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.

**Master of Science in Nursing and Master of Health Administration**

The MSN/MHA program, accredited by the Commission on Collegiate Nursing Education (CCNE)*, is designed to provide nurses with a unique blend of advanced nursing and healthcare related business skills to manage in today’s evolving health care delivery systems. The program combines essential elements from both degree programs to provide students with the knowledge and skills needed to effectively examine and evaluate issues and trends impacting health care.

The MSN program is designed for those nurses who want to pursue more advanced positions in today’s challenging health care environment. The program blends nursing theory and advanced practice concepts necessary to successful work within the structure, culture, and mission of any size health care organization or educational setting.

The MSN program consists of three major areas: the core, the major, and the cognate. The core incorporates the major foci of the Master of Science in Nursing degree: the theory of nursing influence, influence of nursing research, and on the advanced practice of nursing. The major includes advanced course work in nursing: management of families and aggregates, administration, and education. The cognate is fulfilled through the MHA program content.

The MHA curriculum focuses on the content related to finance, economics, policy, quality improvement, marketing, and strategic planning. In addition, students complete course work in concepts related to public health, long term care and health care informatics. Graduates will have enhanced their management/administrative background through a curriculum that provides students with the ability to apply theory to contemporary practice applications.

Graduates are able to define their role within the health care system and understand how to make necessary changes to create a work environment which is team oriented and motivating to others.

* For more information about accreditation, please contact CCNE at One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202)887-6791

**Nursing Practicum/Clinical Hours**

The Nursing Practicum allows students the opportunity to apply what they have learned in the program. Students develop learning objectives for the experience and, along with a faculty member and mentor, they achieve the objectives through approved student experiences at selected locations. There is a minimum 60 hours applied practicum clinical experience required. A minimum of 21...
graduate credits must be completed before enrollment in the Practicum course. Clinical experiences may focus on leadership, education, or administration. The nursing practicum is intended to serve as a capstone experience that allows the student to integrate graduate level nursing course content to an area of nursing of interest to the student.

**Additional Admission Requirements for the MSN/MHA**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree with an upper division major in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelors degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- Students residing in the state of Oregon or attending the Oregon campus are required to have an undergraduate degree posted transcript with a cumulative grade point average (GPA) of 3.0.
- Current employment in a nursing or healthcare role or access to an appropriate healthcare organization environment in which to complete the work related course assignments.
- Applicants must reside in the United States or in one of the US Territories with documentation of a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  - Guam
  - American Samoa
  - Northern Mariana Islands
  - US Virgin Islands
- Nursing students in the state of Florida attending ground based or FlexNet MSN or RN/BSN programs must hold a RN license from the state of Florida for admissions, as mandated by the Florida State Board of Nursing.
- Military and VA nursing students may hold a RN license from any state as ruled by federal guidelines. Clinical placement of military or VA students must be completed in VA or military environments or the student is subject to obtaining a Florida RN license for placement.
- Non-military students who enroll in the MSN/MHA program while living in the US and then move outside of the U.S. and its territories will not be eligible to continue in the program. To continue pursuing nursing coursework, the student must change to the International version of the university’s MSN degree. Students must sign a new Enrollment Agreement for the international version of the degree. Students must: 1) notify their campus representative within thirty (30) days of their moving outside the country; 2) update their profile to reflect the new international address; and 3) have a nursing license to practice nursing in the country where they are residing for the MSN practicum or contact an Online College representative.
- Signed Criminal Background Check Disclosure
- Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results

**Degree Requirements for the MSN/MHA**

- Completion of a minimum of 54 credits (63 credits for the MSN/MHA bridge).
- A minimum program grade point average (GPA) of 3.0. Grades earned in MSN/MHA bridge courses are calculated in the MSN/MHA grade point average (GPA).
- Concentrations are reflected on the transcript only and will not appear on the diplomas. Two diplomas will be awarded for this dual degree. The diplomas awarded for this program will read as follows:
  - Master of Science in Nursing
  - Master of Health Administration

**Additional Academic Progression Requirements for the MSN/MHA**

- Students enrolling in the MSN bridge program must complete the three MSN bridge courses NUR 403, NUR 443 and NUR 440 with a C or better prior to enrolling in NUR 513 Theoretical Foundations of Practice.
- Students must start NUR 590B within 12 months of the completion date of NUR 590A. If the student does not meet that deadline, the student will be required to retake NUR 590A. Any extension request beyond this policy must be submitted to the Student Appeals Center (SAC) for approval.
- Students must hold a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program.

**Minimum Grade Requirements for the MSN/MHA**

- If students do not pass the bridge courses with a C or better, they will be scholastically disqualified. Students who fail to meet the minimum grade requirement will be allowed to repeat each class once. Students who fail to meet the minimum grade requirement after the second attempt will be Scholastically Suspended and will not be able to continue in the MSN program.
• All MSN and MSN bridge students must complete NUR 598, NUR 590A and NUR 590B with a B or better. Students who do not pass these classes with a grade of B or better will be scholastically disqualified. Students who fail to meet the minimum grade requirement for NUR 598, NUR 590A and/or NUR 590B will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension. Appeals through the Student Appeals Center (SAC) for readmission to the program will not be accepted by the College of Health Sciences and Nursing.

Residency Requirements and Course Waivers for the MSN/MHA

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 42 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 12 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students enrolled in the MSN/MHA Bridge may waive the nine (9) undergraduate bridge credits (NUR 403, NUR 443, and NUR 440) in addition to waiving a maximum of 12 credits from their Required Course of Study.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: HCS 504, NUR 590A, NUR 590B, NUR 598

Additional Academic Program Re-Entry Policies for the MSN/MHA

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course will be required to re-enter and follow the admission, degree requirements and program policies published in the catalog which is in effect at the time of re-entry. Students who have been out of attendance over one year who have not exceeded their program completion deadline who wish to remain in their current program version will be required to appeal to the Student Appeals Center to move forward with the re-entry process.

Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Course Descriptions for the MSN/MHA

HCS 504 ................................................................................................................ 1 credit
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University's adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.

HCS 531 ................................................................................................................. 3 credits
Health Care Organizations and Delivery Systems
This course is a comprehensive approach to health care organizations and systems that provide the student with an in-depth understanding of health organizations. Topics include the evolution of health care delivery during a time of financial and regulatory stress, the impact of the evolving consumer movement, and managing efficient and effective organizational structures.

HCS 533 ................................................................................................................. 3 credits
Health Information Systems
This course provides administrators and managers an overview of the information systems used in the health care industry. The effective use of data requires an understanding of how the data is captured as well as the HIPAA and security issues related to this confidential material. The course provides students with a general background to communicate more effectively with technical personnel and provide general management oversight of information systems within health care organizations.

HCS 514 ................................................................................................................. 3 credits
Managing in Today's Health Care Organizations
This course focuses on the adaptation of organizational management to evolving health systems. Students will examine organizational theory, organizational performance, structure, change management and human resource management. Students apply various organizational theories to contemporary issues.

HCS 552 ................................................................................................................. 3 credits
Health Care Economics
This course focuses on the application of macro and micro economic tools to the health care industry. Content includes demand management; concepts of efficiency, production and distribution of health care services; impact of regulation and reimbursement; and economic incentives in health care. Students apply principles to a variety of business models.

HCS 577 ................................................................................................................. 3 credits
Financial Management in Health Care
This course presents the concepts of financial accounting important to the understanding of the financial environment of the health care industry. Students interpret financial statements, prepare analyses of financial data necessary to make decisions, describe the different third party payment methods, experiment with cost finding and price setting, and conduct break-even analyses. The course provides students with experience in capital and operating budgets, and financial forecasts.

HCS 535 ................................................................................................................. 3 credits
Concepts of Population Health
This course addresses the epidemiological and sociological perspectives and techniques for analyzing the health status of populations. Topics focus on disease trends, distribution and detriments...
of health and disease, models and concepts of health and wellness, and the development of a proactive response to community health issues.

HCS 545.................................................................3 credits

Health Law and Ethics
Students explore and analyze current ethical issues such as biomedical research, insurance statutes, and demand management. Students survey the extensive legal foundations of health care, and apply current case law to contemporary situations. Topics include legal aspects of legislation, patient rights, data security, professional liability, and labor relations.

HCS 539.................................................................3 credits

Marketing for Health Care
This course examines marketing principles as they are applied within various health delivery systems. Special attention is focused on consumer behavior, market segmentation, environmental scanning, and identification of new market opportunities. The role of social marketing, data base research, and evaluation design and interpretation are addressed.

HCS 567.................................................................3 credits

Entrepreneurship in Health Care
This course will set up the context of entrepreneurship and new business development; examine the characteristics of entrepreneurs, identifying and quantifying market opportunities in the health care market, as well conceptualizing the resources and capabilities needed. Topics include opportunity assessment, industry implications and requirements, as well as the challenges of expansion within an existing enterprise.

NUR 513.................................................................3 credits

Theoretical Foundations of Practice
This course focuses on the critical components of contemporary nursing knowledge, including concepts, statements, metaparadigms, philosophies, conceptual models, and theories. Students evaluate the variety of ways to organize nursing knowledge and explore the implications of their application. Through the clinical application of the course content, students examine the use of theory and nursing knowledge in professional environments.

NUR 518.................................................................3 credits

Analysis of Research Reports
Evidence-based practice relies upon analyzing the scientific merit of nursing research reports and integrating the results from valid studies into care. Published reports using quantitative and qualitative methods are examined to determine the validity of study findings and their readiness for implementation into practice. Ethics in research is also considered.

NUR 531.................................................................3 credits

Influencing the Future of Nursing and Health Care
The role of advanced practice nurses in today’s health care environment provides numerous opportunities and responsibilities. Nursing’s potential for improving the health of individuals, families, groups, and communities is examined. Strategies for involvement in shaping health care policy are developed.

HCS 587.................................................................3 credits

Creating Change Within Organizations
Diffusion of innovations models in health care systems use principles of planned change within a dynamic organizational environment. Communication skills, such as negotiation and conflict resolution, help leaders analyze and respond to health care needs while using resources efficiently.

NUR 588.................................................................3 credits

Developing and Evaluating Educational Programs
Identifying learning needs provides the foundation for designing health care educational programs for individuals, families, groups, or communities. Students select and develop teaching strategies and explore ways of monitoring and evaluating teaching methods and learner outcomes. Roles of educators in organizations, communities, and higher education settings are examined.

NUR 590A..............................................................1 credit

Nursing Practicum-A
This capstone course is designed to provide students with opportunities to integrate and apply previously learned knowledge and skills in a 60-hour practicum. Students develop specific learning objectives that are approved by faculty. Objectives are achieved as a result of working with a nurse mentor and various experts during the practicum.

NUR 542.................................................................2 credits

Dynamics of Family Systems
Family systems theories and models are used to understand the impact of nuclear families, as well as on society. These theories and models are used as well to develop strategies for promoting and monitoring the health of families.

HCS 588.................................................................3 credits

Measuring Performance Standards
Quality improvement initiatives rely upon data from monitoring program implementation and evaluating program outcomes to determine achievement of program objectives. The processes of developing and revising monitoring and outcome measures are used to help determine progress toward meeting accreditation and regulatory standards.

NUR 590B..............................................................2 credits

Nursing Practicum-B
This capstone course is designed to provide students with opportunities to integrate and apply previously learned knowledge and skills in a 60-hour practicum. Students develop specific learning objectives that are approved by faculty. Objectives are achieved as a result of working with a nurse mentor and various experts during the practicum.

NUR 598.................................................................3 credits

Research Utilization Project
This is a graduate research course that focuses on the use of a body of nursing knowledge and scientific knowledge in the nursing practice setting. Students develop a proposal to address a problem or concern in the nursing practice, propose a evidence-based solution, develop an implementation and evaluation plan, and describe implementation strategies for the proposed solution.

NUR 403.................................................................3 credits

Theories and Models of Nursing Practice
This course is designed to focus baccalaureate students on the behaviors, attitudes, and values necessary for theory-based professional nursing practice. Concepts of professional nursing are presented within the unifying framework of Jean Watson’s Theory of Human Caring.

NUR 443.................................................................3 credits

Evidence-Based Nursing Research and Practice
This course will focus on current review of nursing research literature and research utilization through evidence-based practice. Three areas of research competencies will be examined which
include interpreting and using research in nursing practice, evaluating research, and conducting research.

NUR 440................................................................................... 3 credits

Health Assessment and Promotion for Vulnerable Population

This course is designed to assist professional nurses in developing interviewing skills, refinement of physical assessment techniques, and preventative health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in performing a health assessment is emphasized.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
The College of Education offers graduate level degree and non-degree courses designed for future teachers and current educators. These programs are developed and taught by skilled practitioners who work in their respective fields, and emphasize knowledge, skills, dispositions, and lifelong learning as essential elements for professional practice. Each program blends theory and practice through a combination of individual and collaborative work to foster a learning environment that allows students to build their knowledge base and apply what they have learned to "impact student learning one educator at a time." Graduate students may choose to pursue a major in a variety of areas. Graduate non-degree programs include several state-specific certificates/endorsements designed for current educators. Each student/applicant is responsible for checking with his/her state Department of Education and/or school district to determine specific credentialing requirements.

Admission Requirements

All applicants to this program are expected to meet the following admission requirements:

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- Applicants whose native language is not English must have either:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  - or-
    - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  - or-
    - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  - or-
    - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  - or-
    - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  - or-
    - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.
- The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:
  - The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.
  - The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
  - The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
  - The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
  - Applicants (including re-entry students) attending the Puerto Rico campus must meet the English language proficiency requirement for admission.
  - Applicants who reside in the United States must meet one of the following requirements:
    - Be a legal resident of the United States
    - Have been granted permanent residency
    - Have a valid visa that does not prohibit educational studies
    - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
    - Have been granted asylum or refugee status.
  - Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program.
  - A signed New Student Checklist may be required
  - A signed Enrollment/Disclosure Agreement.
  - Completion of any state-specific required documents or forms.
  - Applicants who have been expelled from other institutions are not eligible for admission to University of Phoenix.
  - Students who have been expelled from University of Phoenix are not eligible for readmission to University of Phoenix. No appeals will be accepted.

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.
• Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students residing in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/ Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment /Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school.

Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• The student was born before January 1, 1957 (applicable to MMR vaccine only).
• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
• The student has submitted a statement that immunization is contrary to his/her religious beliefs.
• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.
• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.
• A copy of each exemption must be kept in the student’s health record at school.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• A medical exemption may be granted to specific vaccines.
  • A U.S. licensed physician (M.D. or D.O.) must state in writing that giving a specific vaccine would endanger the student's life or health, and specify the reason based on valid medical contraindications.
  • The physician must state the length of time during which the vaccine would endanger the student's health or life.
  • The exemption certification must be signed by the physician on the physician's printed stationery.
• A religious exemption may be granted if the student signs a statement certifying that the student's religious beliefs prohibit the practice of immunization.
• If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.
Master of Arts in Education/Administration and Supervision

The following Master of Arts in Education/Administration and Supervision (MAED/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students must want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Administration and Supervision program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/. Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MAED/ADM

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
- The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  - Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Completion Requirements for the MAED/ADM

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record.
- Satisfactory completion of any required internship and/or practicum courses with a grade of "B" or better.
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Administration and Supervision

Minimum Grade Requirement for the MAED/ADM

- A candidate must earn a grade of "B" (3.0) or better in the following practicum/internship courses, grades of "B-" are not accepted: ADMIN 591A, ADMIN 591B and ADMIN 591C.
- Students who earn less than a grade of "B" (3.0) in any of these courses must repeat the course in order to continue in their one credit administrative practicum/internship courses.
- Candidates who earn less than a grade of "B" (3.0) in any of these courses must complete a remediation plan and repeat the course.
• If the candidate does not receive a grade of "B" (3.0) or better on the second attempt, the candidate will be, scholastically suspended, permanently withdrawn from program.

Residency Requirements and Course Waivers for the MAED/ADM

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 32 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: ADMIN 591A, ADMIN 591B, ADMIN 591C, COM 516, EDD 581

Institutional Recommendation for the MAED/ADM

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for principal certification).

• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

• Candidates must pass their state-mandated administrator exam, if required.

• Students must verify full SEI endorsement or equivalent coursework prior to issuance of an administrative license. Approved SEI courses/workshops can be found at http://www.ade.az.gov/olas/.

• Students must verify three (3) years of classroom teaching experience prior to issuance of Institutional Recommendation.

Internship Policies for the MAED/ADM

• The Administrative Internship is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the internship. Candidates must follow the guidelines in place at their campus.

• Candidates must take the internship courses concurrently with the internship experience. If a candidate chooses to postpone the internship, he/she must postpone their enrollment in the internship courses.

• Candidates must pass each Administrative Internship course with a grade of "B" or better in order to avoid Scholastic Disqualification.

• Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Field Experience for the MAED/ADM

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the MAED/ADM

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/ADM

 ADMIN 500 .............................................................................0 credits

Orientation to Administration and Supervision

This course is designed to provide an orientation to the primary components of the Master of Arts in Education / Administration and Supervision program. Students will be introduced to the program’s progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.

COM 516 ..............................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and
evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**ADMIN 518** ................................................................. 3 credits

**Leadership and Collaborative Processes**
This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

**ADMIN 570** ................................................................. 3 credits

**Equity, Diversity, and Access in Education**
This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

**ADMIN 555** ................................................................. 3 credits

**School Policy and Law for Principals**
This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

**ADMIN 524** ................................................................. 3 credits

**Supervision of Curriculum, Instruction and Assessment**
This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

**ADMIN 591A** ................................................................. 1 credit

**Principal Internship Part I: Instructional Leadership**
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

**ADMIN 529** ................................................................. 3 credits

**Administration of Special Programs**
This course provides an overview of various federal, state, non-profit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.

**ADMIN 535** ................................................................. 3 credits

**Business and Facilities Management**
This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

**ADMIN 560** ................................................................. 3 credits

**Human Resources Leadership and Management**
This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

**ADMIN 591B** ................................................................. 1 credit

**Principal Internship Part II: Organizational Management**
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

**ADMIN 575** ................................................................. 3 credits

**Family, Community and Media Relations**
This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs; establishing reciprocal relationships; the use of conflict resolution and decision making tools; and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

**EDD 581** ................................................................. 4 credits

**Action Research and Evaluation**
This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing data are discussed. Students identify ethical issues related to research as well, including a professional code of ethics, confidentiality, and research using human subjects. In addition, they synthesize and apply the content of the course by writing a proposal for an action research study.

**ADMIN 565** ................................................................. 3 credits

**School Improvement Processes**
This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

**ADMIN 591C** ................................................................. 1 credit

**Administrative Internship Part III: Professional Practice**
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing,
leadership, problem solving, organizing, working with the media, and community relations will be addressed.

AET 520 ........................................................................................................ 3 credits

Instructional Strategies in Adult Education and Training
This course builds upon the foundation provided in the instructional design course and focuses on development and implementation of instruction that facilitates adult learning. Learners examine and apply models, strategies, and methods for planning and for implementing instruction. Instructional approaches, engagement strategies, and management of the instructional environment are explored.

AET 535 ........................................................................................................ 3 credits

Assessment and Evaluation in Adult Learning
This course focuses on developing the skills necessary to become effective assessors of adult learners in postsecondary and training environments. It provides the fundamentals of varied classroom assessments and training evaluation models, such as formative and summative tests and authentic assessments. Learners develop assessments and analyze how assessment data is used to improve instruction and learning. Additionally, the purposes, the methods, and the reporting of evaluation for trainers are explored.

EDL 505 ........................................................................................................ 3 credits

Cultural Competency
Culturally responsive teachers facilitate and support learning for all students regardless of their cultures. This course deepens candidates’ understanding of teaching and learning through examination of the diverse make-up of today’s communities, schools, and classrooms. Through personal reflection and identification of theoretically sound and culturally responsive pedagogy, this course prepares the candidate to model, mentor, and lead efforts in creating a school climate that effectively addresses the learning needs of all students.

EDL 531 ........................................................................................................ 3 credits

Mentoring and Coaching
This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

Master of Arts in Education/Administration and Supervision (Colorado)

The following Master of Arts in Education/Administration and Supervision (MAED/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Administration and Supervision program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision.

The University reserves the right to modify the required course of study.
Additional Admission Requirements for the MAED/ADM

All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
- The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  - Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Completion Requirements for the MAED/ADM

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record.
- Satisfactory completion of any required internship and/or practicum courses with a grade of "B" or better.
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Administration and Supervision

Minimum Grade Requirement for the MAED/ADM

- A candidate must earn a grade of "B" (3.0) or better in the following practicum/internship courses, grades of "B-" are not accepted: ADMIN 591A, ADMIN 591B and ADMIN 591C. Students who earn less than a grade of "B" (3.0) in any of these courses must repeat the course in order to continue in their one credit administrative practicum/internship courses.
- Candidates who earn less than a grade of "B" (3.0) in any of these courses must complete a remediation plan and repeat the course.
- If the candidate does not receive a grade of "B" (3.0) or better on the second attempt, the candidate will be, scholastically suspended, permanently withdrawn from program.

Residency Requirements and Course Waivers for the MAED/ADM

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 32 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: ADMIN 591A, ADMIN 591B, ADMIN 591C, COM 516, EDD 581

Institutional Recommendation for the MAED/ADM

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for principal certification).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated administrator exam, if required.
- Colorado: Students must verify three (3) years licensed experience in P-12 grades in order to obtain their principal certification and will need to provide verification of this. Acceptable licensed experience includes the following:
  - Teacher
  - School Counselor
  - School Nurse
  - School Social Worker
  - School Psychologist

Internship Policies for the MAED/ADM

- The Administrative Internship is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the internship. Candidates must follow the guidelines in place at their campus.
- Candidates must take the internship courses concurrently with the internship experience. If a candidate chooses to postpone the internship, he/she must postpone their enrollment in the internship courses.
- Candidates must pass each Administrative Internship course with a grade of "B" or better in order to avoid Scholastic Disqualification.
• Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

Field Experience for the MAED/ADM

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the MAED/ADM

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/ADM

ADMIN 500 ................................................................. 0 credits

Orientation to Administration and Supervision

This course is designed to provide an orientation to the primary components of the Master of Arts in Education/Administration and Supervision program. Students will be introduced to the program’s progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.

COM 516 ................................................................. 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

ADMIN 518 ................................................................. 3 credits

Leadership and Collaborative Processes

This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

ADMIN 570 ................................................................. 3 credits

Equity, Diversity, and Access in Education

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

ADMIN 555 ................................................................. 3 credits

School Policy and Law for Principals

This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

ADMIN 524 ................................................................. 3 credits

Supervision of Curriculum, Instruction and Assessment

This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

ADMIN 591A ............................................................... 1 credit

Principal Internship Part I: Instructional Leadership

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

ADMIN 528 ................................................................. 3 credits

Administration of Special Programs

This course provides an overview of various federal, state, non-profit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.

ADMIN 535 ................................................................. 3 credits

Business and Facilities Management

This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

ADMIN 560 ................................................................. 3 credits

Human Resources Leadership and Management

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.
ADMIN 591B................................................................. 1 credit

**Principal Internship Part II: Organizational Management**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

ADMIN 575 ................................................................. 3 credits

**Family, Community and Media Relations**

This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs; establishing reciprocal relationships; the use of conflict resolution and decision making tools; and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

EDD 581 ................................................................. 4 credits

**Action Research and Evaluation**

This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing data are discussed. Students identify ethical issues related to research as well, including a professional code of ethics, confidentiality, and research using human subjects. In addition, they synthesize and apply the content of the course by writing a proposal for an action research study.

ADMIN 565 ................................................................. 3 credits

**School Improvement Processes**

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

ADMIN 591C ............................................................. 1 credit

**Administrative Internship Part III: Professional Practice**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

AET 520 ................................................................. 3 credits

**Instructional Strategies in Adult Education and Training**

This course builds upon the foundation provided in the instructional design course and focuses on development and implementation of instruction that facilitates adult learning. Learners examine and apply models, strategies, and methods for planning and for implementing instruction. Instructional approaches, engagement strategies, and management of the instructional environment are explored.

AET 535 ................................................................. 3 credits

**Assessment and Evaluation in Adult Learning**

This course focuses on developing the skills necessary to become effective assessors of adult learners in postsecondary and training environments. It provides the fundamentals of varied classroom assessments and training evaluation models, such as formative and summative tests and authentic assessments. Learners develop assessments and analyze how assessment data is used to improve instruction and learning. Additionally, the purposes, the methods, and the reporting of evaluation for trainers are explored.

EDL 505 ................................................................. 3 credits

**Cultural Competency**

Culturally responsive teachers facilitate and support learning for all students regardless of their diversities. This course deepens candidates' understanding of teaching and learning through examination of the diverse make-up of today’s communities, schools, and classrooms. Through personal reflection and identification of theoretically sound and culturally responsive pedagogy, this course prepares the candidate to model, mentor, and lead efforts in creating a school climate that effectively addresses the learning needs of all students.

EDL 531 ................................................................. 3 credits

**Mentoring and Coaching**

This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

**Master of Arts in Education/Administration and Supervision (New Mexico)**

The following Master of Arts in Education/Administration and Supervision (MAED/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Administration and Supervision program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision. For more information about our graduation rates, the median debt of students who completed the program, and other important
information, please visit our website at http://www.phoenix.edu/programs/maed-adm.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the MAED/ADM**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
- The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  - Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week
  - All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Degree Completion Requirements for the MAED/ADM**

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record.
- Satisfactory completion of any required internship and/or practicum courses with a grade of "B" or better.
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Administration and Supervision

**Minimum Grade Requirement for the MAED/ADM**

- A candidate must earn a grade of "B" (3.0) or better in the following practicum/internship courses, grades of "B-" are not accepted: ADMIN 591A, ADMIN 591B and ADMIN 591C.
- Students who earn less than a grade of "B" (3.0) in any of these courses must repeat the course in order to continue in their one credit administrative practicum/internship courses.
- Candidates who earn less than a grade of "B" (3.0) in any of these courses must complete a remediation plan and repeat the course.
- If the candidate does not receive a grade of "B" (3.0) or better on the second attempt, the candidate will be, scholastically suspended, permanently withdrawn from program.

**Residency Requirements and Course Waivers for the MAED/ADM**

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 32 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: ADMIN 591A, ADMIN 591B, ADMIN 591C, COM 516, EDD 581

Institutional Recommendation for the MAED/ADM
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for principal certification).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated administrator exam, if required.

Internship Policies for the MAED/ADM
• The Administrative Internship is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the internship. Candidates must follow the guidelines in place at their campus.
• Candidates must take the internship courses concurrently with the internship experience. If a candidate chooses to postpone the internship, he/she must postpone their enrollment in the internship courses.
• Candidates must pass each Administrative Internship course with a grade of “F” or better in order to avoid Scholastic Disqualification.
• Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

Field Experience for the MAED/ADM
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the MAED/ADM
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Additional Admission Requirements for the MAED/ADM

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.

• The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.

• Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:

  Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week.

• Students in Nevada may not use substitute teaching or student teaching experience toward their 18 months of required work experience. Their work experience must be a full-time contracted position in a K-12 setting.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Completion Requirements for the MAED/ADM

• The completion of a minimum of 38 credits.

• A minimum grade point average (GPA) of 3.0.
Completion of e-portfolio.
Completion of Field Experience Observation Record.
Satisfactory completion of any required internship and/or practicum courses with a grade of "B" or better.
Students must take courses within a sequence specified by course prerequisite requirements.
The diploma awarded for this program will read as: Master of Arts in Education Administration and Supervision

Residency Requirements and Course Waivers for the MAED/ADM

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 32 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: ADMIN 591A, ADMIN 591B, ADMIN 591C, COM 516, EDD 581

Minimum Grade Requirement for the MAED/ADM

- A candidate must earn a grade of "B" (3.0) or better in the following practicum/internship courses, grades of "B-" are not accepted: ADMIN 591A, ADMIN 591B and ADMIN 591C.
- Students who earn less than a grade of "B" (3.0) in any of these courses must repeat the course in order to continue in their one credit administrative practicum/internship courses.
- Candidates who earn less than a grade of "B" (3.0) in any of these courses must complete a remediation plan and repeat the course.
- If the candidate does not receive a grade of "B" (3.0) or better on the second attempt, the candidate will be, scholastically suspended, permanently withdrawn from program.

Institutional Recommendation

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for principal certification).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated administrator exam, if required.
- The cut score for residents of Nevada is 146 on the 0411 School Leadership Exam

Internship Policies for MAED/ADM

- The Administrative Internship is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the internship. Candidates must follow the guidelines in place at their campus.
- Candidates must take the internship courses concurrently with the internship experience. If a candidate chooses to postpone the internship, he/she must postpone their enrollment in the internship courses.
- Candidates must pass each Administrative Internship course with a grade of "B" or better in order to avoid Scholastic Disqualification.
- Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Field Experience for MAED/ADM

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the MAED/ADM

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible
Leadership and Collaborative Processes

Admin 500 ................................................................. 0 credits

Orientation to Administration and Supervision

This course is designed to provide an orientation to the primary components of the Master of Arts in Education/Administration and Supervision program. Students will be introduced to the program's progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.

Admin 516 ................................................................. 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

Admin 518 ................................................................. 3 credits

Leadership and Collaborative Processes

This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

Admin 570 ................................................................. 3 credits

Equity, Diversity, and Access in Education

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

Admin 555 ................................................................. 3 credits

School Policy and Law for Principals

This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

Admin 524 ................................................................. 3 credits

Supervision of Curriculum, Instruction, and Assessment

This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principle candidates will also participate in field experiences related to curriculum and instruction.

Admin 591A ............................................................ 1 credit

Principal Internship Part I: Instructional Leadership

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

Admin 528 ................................................................. 3 credits

Administration of Special Programs

This course provides an overview of various federal, state, nonprofit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.

Admin 535 ................................................................. 3 credits

Business and Facilities Management

This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

Admin 560 ................................................................. 3 credits

Human Resources Leadership and Management

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

Admin 591B .............................................................. 1 credit

Principal Internship Part II: Organizational Management

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

Admin 575 ................................................................. 3 credits

Family, Community and Media Relations

This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs; establishing reciprocal relationships; the use of conflict resolution and decision making tools; and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

EdD 581 ................................................................. 4 credits

Action Research and Evaluation

This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing data are discussed. Students identify ethical issues related to research as well, including a professional code of ethics, confidentiality, and research using human subjects. In addition, they synthesize and apply the content of the course by writing a proposal for
an action research study.
ADMIN 565 ................................................................. 3 credits

School Improvement Processes
This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.
ADMIN 591C ................................................................. 1 credit

Administrative Internship Part III: Professional Practice
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.
AET 520 ................................................................. 3 credits

Instructional Strategies in Adult Education and Training
This course builds upon the foundation provided in the instructional design course and focuses on development and implementation of instruction that facilitates adult learning. Learners examine and apply models, strategies, and methods for planning and for implementing instruction. Instructional approaches, engagement strategies, and management of the instructional environment are explored.
AET 535 ................................................................. 3 credits

Assessment and Evaluation in Adult Learning
This course focuses on developing the skills necessary to become effective assessors of adult learners in postsecondary and training environments. It provides the fundamentals of varied classroom assessments and training evaluation models, such as formative and summative tests and authentic assessments. Learners develop assessments and analyze how assessment data is used to improve instruction and learning. Additionally, the purposes, the methods, and the reporting of evaluation for trainers are explored.
EDL 505 ................................................................. 3 credits

Cultural Competency
Culturally responsive teachers facilitate and support learning for all students regardless of their diversities. This course deepens candidates’ understanding of teaching and learning through examination of the diverse make-up of today’s communities, schools, and classrooms. Through personal reflection and identification of theoretically sound and culturally responsive pedagogy, this course prepares the candidate to model, mentor, and lead efforts in creating a school climate that effectively addresses the learning needs of all students.
EDL 531 ................................................................. 3 credits

Mentoring and Coaching
This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

Master of Arts in Education/Administration and Supervision (Utah)

The following Master of Arts in Education/Administration and Supervision (MAED/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Administration and Supervision program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-adm.

The following Master of Arts in Education/Administration and Supervision (MAED/ADM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may wish to contact their local campus for more information.

The Master of Arts in Education/Administration and Supervision program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-adm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the MAED/ADM**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Five (5) years verified full-time teaching experience or services experiences in schools in P-12 setting, (substitute or part-time service does not apply).
  - The teaching or services experiences must be as a contracted teacher in either a traditional or year-round public or private school.
  - Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching or services experience.
  - Verifiable (contracted) P-12 experience - 40 hours per week
  - Verification of the following:
    - Having passed or attempted the California Basic Skills Test (CBEST)
    - Current TB test

Applicants must possess one of the following California credentials:

- A valid clear or life California teaching credential requiring a baccalaureate degree and a program of professional preparation, including student teaching
- A valid clear or life California Designated Subjects Teaching Credential provided the applicant also possesses a baccalaureate degree
- A valid clear services prerequisite credential, California Pupil Personnel Services Credential, Teacher Librarian Services Credential, Speech-Language Pathology Services Credential, Clinical or Rehabilitative Services Credential, or a School Nurse Services Credential (Clear or Professional Clear level only), requiring a baccalaureate degree and a program of professional preparation, including field practice or the equivalent.

**Candidacy Status for the MAED/ADM**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Proof of passing score on the CBEST exam.
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/ADM**

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record. The Administrative Practicum is a minimum 240-hour placement and cannot be waived. (Each state’s requirement for these hours will vary; candidates must follow the guidelines within their state.)
- Students must meet 30-40 hours of field experience by the end of the MAED/ADM program. These hours are outside of the practicum experience.
- Students must take courses within a sequence specified by course prerequisite requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Administration and Supervision

**Minimum Grade Requirement for the MAED/ADM**

- A candidate must earn a grade of “B” (3.0) or better in the following practicum courses, grades of “B−” are not accepted: ADMIN 594A, ADMIN 594B and ADMIN 594C. Students who earn less than a grade of “B” (3.0) in any of these courses must repeat the course in order to continue in their one credit administrative practicum courses.
- Candidates who earn less than a grade of “B” (3.0) in any of these courses must complete a remediation plan and repeat the course.
- If the candidate does not receive a grade of “B” (3.0) or better on the second attempt, the candidate will be, scholastically suspended, permanently withdrawn from program.

**Residency Requirements and Course Waivers for the MAED/ADM**

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 32 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request. Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: ADMIN 594A, ADMIN 594B, ADMIN 594C, COM 516, EDD 581

**Institutional Recommendation for the MAED/ADM**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for principal certification). Refer to New Student Checklist and your state certification agency for specific requirements.
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Verification of employment in an administrative position prior to issuance of a Preliminary Administrative Credential. Those students who do not have an offer of employment in an administrative position may apply for a Certificate of Eligibility to seek employment.

**Practicum Policies for the MAED/ADM**

- The Administrative Practicum is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the practicum. Candidates must follow the guidelines in place at their campus.
- Candidates must take the practicum courses concurrently with the practicum experience. If a candidate chooses to postpone the practicum, he/she must postpone their enrollment in the practicum courses.
- Candidates must pass each Administrative Practicum course with a grade of “B” or better in order to avoid Scholastic Disqualification.
- Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

**Field Experience for the MAED/ADM**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.
**Additional Academic Program Re-entry Policy for the MAED/ADM**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary. Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/ADM**

**ADMIN 501** ................................................................. 0 credits  
**Orientation to Administration and Supervision**

This course is designed to provide an orientation to the primary components of the Master of Arts in Education/ Administration and Supervision program. Students will be introduced to the program's progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.  
**COM 516** ................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.  
**ADMIN 518** ................................................................. 3 credits

**Leadership and Collaborative Processes**

This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.  
**ADMIN 570** ................................................................. 3 credits

**Equity, Diversity, and Access in Education**

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.  
**ADMIN 555** ................................................................. 3 credits

**School Policy and Law for Principals**

This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.  
**ADMIN 524** ................................................................. 3 credits

**Supervision of Curriculum, Instruction and Assessment**

This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.  
**ADMIN 594A** ................................................................. 1 credit

**Administrative Practicum Part I: Instructional Leadership**

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.  
**ADMIN 528** ................................................................. 3 credits

**Administration of Special Programs**

This course provides an overview of various federal, state, non-profit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.  
**ADMIN 535** ................................................................. 3 credits

**Business and Facilities Management**

This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.  
**ADMIN 560** ................................................................. 3 credits

**Human Resources Leadership and Management**

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.  
**ADMIN 594B** ................................................................. 1 credit

**Administrative Practicum Part II: Organizational Management**

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.  
**ADMIN 575** ................................................................. 3 credits

**Family, Community and Media Relations**

This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a
school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs; establishing reciprocal relationships; the use of conflict resolution and decision making tools; and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

EDD 581 ................................................................. 4 credits

Action Research and Evaluation

This course examines action research and its role in decision-making and in educational practices. Students are introduced to various types of action research and to the elements of the action research process, including identifying a problem, determining a problem statement and a purpose, conducting a literature review, planning for the collection and the analysis of data, and creating a plan of action. Methods for collecting, evaluating, and analyzing data are discussed. Students identify ethical issues related to research as well, including a professional code of ethics, confidentiality, and research using human subjects. In addition, they synthesize and apply the content of the course by writing a proposal for an action research study.

ADMIN 565 ............................................................. 3 credits

School Improvement Processes

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

ADMIN 594C .......................................................... 1 credit

Administrative Practicum Part III: Professional Practice

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

AET 520 ................................................................. 3 credits

Instructional Strategies in Adult Education and Training

This course builds upon the foundation provided in the instructional design course and focuses on development and implementation of instruction that facilitates adult learning. Learners examine and apply models, strategies, and methods for planning and for implementing instruction. Instructional approaches, engagement strategies, and management of the instructional environment are explored.

AET 585 ................................................................. 3 credits

Assessment and Evaluation in Adult Learning

This course focuses on developing the skills necessary to become effective assessors of adult learners in postsecondary and training environments. It provides the fundamentals of varied classroom assessments and training evaluation models, such as formative and summative tests and authentic assessments. Learners develop assessments and analyze how assessment data is used to improve instruction and learning. Additionally, the purposes, the methods, and the reporting of evaluation for trainers are explored.

EDL 505 .............................................................................. 3 credits

Cultural Competency

Culturally responsive teachers facilitate and support learning for all students regardless of their diversities. This course deepens candidates’ understanding of teaching and learning through examination of the diverse make-up of today’s communities, schools, and classrooms. Through personal reflection and identification of theoretically sound and culturally responsive pedagogy, this course prepares the candidate to model, mentor, and lead efforts in creating a school climate that effectively addresses the learning needs of all students.

EDL 531 .............................................................................. 3 credits

Mentoring and Coaching

This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

Master of Arts in Education/Administration and Supervision (Texas)

The following Master of Arts in Education/Administration and Supervision (MAED/ADM) may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Administration and Supervision program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-adm.

Leadership and Collaborative Processes
• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/ADM

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

• Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/ADM

• Completion of a minimum of 38 credits.

• A minimum grade point average (GPA) of 3.0.

• Completion of e-portfolio.

• Completion of Field Experience Observation Record.

• Candidates must pass their state-mandated administrator exam, if required.

• Satisfactory completion of any required internship and/or practicum courses with a grade of “B” or better.

• Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.

• Students must take courses within a sequence specified by course prerequisite requirements.

• The diploma awarded for this program will read as: Master of Arts in Education Administration and Supervision

Residency Requirements and Course Waivers for the MAED/ADM

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 32 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

Additional Admission Requirements for the MAED/ADM

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.

• The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.

• Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:

  * Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week.

  • Texas candidates must include a current copy of a teaching certificate and two (2) years of credible teaching experience as a classroom teacher of record.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request. Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. This course deepens candidates’ understanding of teaching and learning through examination of the diverse make-up of today’s communities, schools, and classrooms. Through personal reflection and identification of theoretically sound and culturally responsive pedagogy, this course prepares the candidate to model, mentor, and lead efforts in creating a school climate that effectively addresses the learning needs of all students.

EDL 531 .................................................................................... 3 credits

Mentoring and Coaching
This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

Master of Arts in Education/Adult Education and Training

The following Master of Arts in Education/Adult Education and Training (MAED/AET) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts/Adult Education and Training (MAED/AET) program is designed for individuals interested in working with adult learners in areas such as corporate training, non-profit and community-based organizations, government, postsecondary education, and human services agencies. Learners develop competencies and expertise necessary to align education and training with strategic objectives and human services foundations across an enterprise with culturally diverse populations. Learners expand their knowledge in andragogical theory, instructional design and strategies, assessment of learning, delivering online learning, management and marketing, and technology integration. In addition, learners engage in practice through collaborative learning, social media, and community-based learning. Graduates will be able to serve adult students, colleagues, industries, and communities as expert educators and trainers. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-adm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Development in Adult Education

The University reserves the right to modify the Program Requirements.

Additional Admission Requirements for the MAED/AET

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Degree Completion Requirements for the MAED/AET

- The completion of a minimum of 34 credits.
- A minimum grade point average (GPA) of 3.0.
- The diploma awarded for this program will read: Master of Arts in Education Adult Education and Training.
Residency Requirements and Course Waivers for the MAED/AET

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of prior graduate level coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally approved nationally accredited, or candidate for accreditation, college or university.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following course in the Required Course of Study may not be waived: COM 520

Academic Progression for the MAED/AET

Students must successfully complete COM 520 as the first course in the program.

Course Descriptions for the MAED/AET

COM 520 ...................................................................................3 credits

Organizational Communication for Adult Education and Training

In this course, learners apply written and oral communication principles to their roles as trainers and adult educators. Learners demonstrate how to persuade a variety of stakeholders through applicable communication channels. Learners examine the role of perception, techniques, and business justifications related to effective communication. The course includes topics about oral and written communication, interpersonal and intercultural communication, and tools for collaborative learning.

AET 500 ...................................................................................3 credits

Foundations of Adult Learning Theory

Learners focus on the principles of adult learning and andragogical theory. In addition, learners address the history of adult learning, the characteristics of adult learners, key adult learning theories, and learning processes and styles. Learners investigate factors that influence adult education and training environments such as motivation, critical thinking skills, and ethics. Additionally, learners review current developments in the field of adult education, training, and workplace learning.

AET 508 ...................................................................................3 credits

Community-Based Education

This course provides an overview of community-based programs and services available for adult learners. Learners examine programs designed to enable adults to engage in educational, informational, and enrichment activities for lifelong learning. Learners examine issues, trends, and barriers to success for adult students, including areas such as social and community services, economic issues, and legislative influence. Additionally, learners review special populations of adult learners such as the aging population, adults with disabilities, military veterans, immigrants, refugees, incarcerated adults, and sexual minorities.

CUR 516 ...................................................................................3 credits

Curriculum Theory and Instructional Design

In this course, learners focus on applying theory and systematic approaches to design and implementation of instruction for diverse adult learners. Learners identify and analyze trends, issues, models, methods, various instructional strategies, technology, and classroom management strategies in instructional design for adults. In addition, learners design an instructional unit, applying research-based best practices and employing instructional design models.

CUR 518 ...................................................................................3 credits

Multicultural Strategies for the Adult Learner

In this course, learners acquire a rich and deep framework to understand what diversity means in the workplace, in the training and development environment, and in the higher education classroom. Learners explore dimensions of diversity which include race, gender, age, ethnicity, sexual orientation, gender identity and expression, religion, education, and socioeconomic status. Learners acquire an awareness of diversity and understand how to design, deliver, and evaluate training and education programs that are sensitive to the challenges and opportunities that a multicultural context presents.

CUR 528 ...................................................................................3 credits

Assessment of Learning

Learners focus on developing the skills necessary to become effective assessors of adult learners in corporate training and in other adult education learning environments. Learners examine the fundamentals of planning, implementing, and analyzing assessments to improve instruction and learning. Additionally, learners explore purposes and methods of evaluation for courses, programs, and training.

CUR 532 ...................................................................................3 credits

Facilitating Online Learning

Learners explore practical strategies for aligning effective principles of instruction with the use of technology in adult learning and training environments. Learners develop the knowledge and skills required for effectively engaging adult learners in distance learning experiences using a variety of web-based course management and information systems. In addition, learners apply and evaluate audio, video, and collaborative technology tools, mobile learning technologies, and corporate online training techniques. Learners discuss essential aspects of learning in online training programs and classrooms such as engagement, time management, reflection, and assessment strategies.

AET 552 ...................................................................................3 credits

Marketing Adult Education

This course prepares graduate students to apply marketing principles to the roles they play as trainers and adult educators. Topics include the following: marketing basics, obtaining buy-in, market research, marketing strategies, communications, negotiation, and advocacy in education.
The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix Online locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning, and identifying future trends in training and program development.

Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Additional Elementary Admission Requirements for Michigan:

- Students enrolled in the MAED/TED-E program and residing in the state of Michigan must provide a transcripted verification of the completion of 100 hours of field experience.
- Students must take courses within a sequence specified by the University.
- Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.
- Students attending the Online campus must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

Degree Completion Requirements for the MAED/TED-E

- Completion of a minimum of 44 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.
- Students residing in Iowa must provide verification of the completion of any outstanding credits as indicated in the admissions requirements prior to student teaching.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/ TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:

- Arizona Provisional SEI Endorsement (SEI 500)
- Arizona Full SEI Endorsement (SEI 503)
- Arizona Bilingual Endorsement
- Arizona English as a Second Language Endorsement

Approved SEI courses/workshops can be found at https://www.ade.az.gov/oelas/.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

Arizona Teacher candidates enrolled in the MAED/TED-E program will be issued an Elementary certificate in grades 1-8. Teacher candidates in the MAED/TED-E program will not be eligible to student teach in Kindergarten and will not be issued an Institutional Recommendation (IR) as the Arizona Department of Education will no longer recognize Kindergarten experience for certification in Elementary education.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Arizona Teaching Intern Certificate Program
The requirements for initial issuance of the teaching intern certificate are:
• A Bachelor’s degree or higher from an accredited institution
• A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant’s teaching assignment(s)
• Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
• A valid fingerprint clearance card issued by the Arizona Department of Public Safety

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by the reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ...................................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ...................................................................................1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ...................................................................................2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ...................................................................................3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ...................................................................................3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ...................................................................................2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ...................................................................................3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative tradi-
tional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 537  4 credits**

**Curriculum Constructs and Assessment: Reading and Language Arts**

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

**SEI 500  3 credits**

**Structured English Immersion**

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and ELL Learners acquire English.

**SEI 503  3 credits**

**Advanced Structured English Immersion Methods**

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

**MTE 533  4 credits**

**Curriculum Constructs & Assessment: Science and Mathematics**

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

**MTE 534  2 credits**

**Curriculum Constructs & Assessment: Physical Education and Health**

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

**MTE 537  2 credits**

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 531  2 credits**

**Curriculum Constructs & Assessment: History and Social Science**

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

**ELM 598  4 credits**

**Elementary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem-solving based on classroom experiences.

**ELM 599  4 credits**

**Elementary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
Master of Arts in Education/Secondary Teacher Education

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with cooperating teachers from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt will be maintained in the student’s professional portfolio.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Additional Secondary Admission Requirements for Michigan:

• Students enrolled in the MAED/TED-S program and residing in the state of Michigan must provide a transcripted verification of a minimum of 30 semester credit hours in their secondary content area prior to admission to the University.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TED-S**

- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
- Demonstrations of basic skills proficiency
- Verification of fingerprint clearance

To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.

- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates must meet all other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

The diploma awarded for this program will read as:

Master of Arts in Education

Secondary Teacher Education

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.
- Students residing in Iowa must provide verification of the completion of any outstanding credits as indicated in the admissions requirements prior to student teaching.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**

- A candidate must earn a grade of "B" (grades of "I" or "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the MAED/TED-S**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/TED-S**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 559, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:

- Arizona Provisional SEI Endorsement (SEI 500)
- Arizona Full SEI Endorsement (SEI 503)
- Arizona English as a Second Language Endorsement
- Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at https://www.ade.az.gov/oelas/.
Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-S**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-S**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.

- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.
- Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Arizona Teaching Intern Certificate Program**

The requirements for initial issuance of the teaching intern certificate are:

- A Bachelor’s degree or higher from an accredited institution
- A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant’s teaching assignment(s)
- Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
- A valid fingerprint clearance card issued by the Arizona Department of Public Safety

**Additional Academic Program Re-entry Policy for the MAED/TED-S**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have
been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

**MTE 507** ................................................................. 0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516** ................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501** ................................................................. 2 credits

**The Art and Science of Teaching**

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**SEC 508** ..................................................................... 3 credits

**Models, Theories and Strategies for Secondary Education**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523** ................................................................. 3 credits

**Maintaining an Effective Learning Climate**

This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** ................................................................. 2 credits

**Child and Adolescent Development**

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**MTE 562** ................................................................. 3 credits

**Assessment and Evaluation**

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 542** ..................................................................... 3 credits

**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

**MTE 559** ..................................................................... 3 credits

**Curriculum Constructs and Assessment: Secondary Methods**

This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

**SEI 500** ..................................................................... 3 credits

**Structured English Immersion**

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

**SEI 503** ..................................................................... 3 credits

**Advanced Structured English Immersion Methods**

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

**SPE 514** ..................................................................... 2 credits

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
SEC 598 ................................................................. 4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SEC 599 ................................................................. 4 credits

Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (Colorado)
The following Master of Arts in Education (MAEd)/Elementary Teacher Education program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAEd/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Majors: Colorado State Department of Education guidelines determine specific major requirements. Students will need a major in one of the multi-disciplinary areas listed below:
  • Language Arts
  • Liberal Arts
  • Humanities
  • Sciences
  • Mathematics
  • Social Sciences
  • Business*
  • Health*
  • Information Technology*
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in I53 and the student’s EAP file.
  • Demonstration of basic skills proficiency.
  • Verification of fingerprint clearance.
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience:
• Immunization or TB test results (district specific).
• Content knowledge mastery prior to student teaching.
• Verification of the completion of 200 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: ELM 598, ELM 599
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperaing/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Degree Completion Requirements for the MAED/TED-E
• Completion of a minimum of 44 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (200 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Institutional Recommendation for the MAED/TED-E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Student Teaching for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Formal field experience evaluations are required during the program (including observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

Candidates in the MAED/TED program may not student teach in special education.

MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample.

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.
### Course Descriptions for the MAED/TED-E

#### Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**MTE 507** ................................................................. 0 credits

#### Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501** ................................................................. 2 credits

#### The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**MTE 518** ................................................................. 3 credits

#### Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 522** ................................................................. 3 credits

#### Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** ................................................................. 2 credits

#### Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**MTE 562** ................................................................. 3 credits

#### Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 500** ................................................................. 3 credits

#### Scientifically Based Reading Instruction
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children's performance in reading and in the language arts are also emphasized.

**RDG 537** ................................................................. 4 credits

#### Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

**MTE 553** ................................................................. 3 credits

#### Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**SPE 514** ................................................................. 2 credits

#### Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 531** ................................................................. 2 credits

#### Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

**University of Phoenix, 2014-2015**

**COLLEGE OF EDUCATION (Online)**
MTE 533 ...................................................................................4 credits
Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
MTE 534 ...................................................................................2 credits
Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.
MTE 537 ...................................................................................2 credits
Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on scope, sequence, and state and national standards. This course will include framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course will also include framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas will be explored.
ELM 598 ...................................................................................4 credits
Elementary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.
ELM 599 ...................................................................................4 credits
Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education (Colorado)

The following Master of Arts in Education (MAEd)/Secondary Teacher Education program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

The University reserves the right to modify the Required Course of Study.

**Additional Admission Requirements for the MAED/TED-S**
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Majors: Colorado State Department of Education guidelines determine specific major requirements. Candidates for the Secondary Teacher Education program must have a major in one of the following areas:
  - Business
  - Information Technology
  - English/Language Arts
  - Mathematics
  - Science
  - Social Studies/History/Political Science
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status**
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency.
  - Verification of fingerprint clearance.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Academic Progression Requirements for the MAED/TED-S**
Candidates must provide verification of the following prior to beginning their student teaching experience:
- Immunization or TB test results (district specific).
- Content knowledge mastery prior to student teaching.
- Verification of the completion of 200 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SEC 598, SEC 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Degree Completion Requirements for the MAED/TED-S**
- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (200 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Institutional Recommendation for the MAED/TED-S
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-S
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 567, MTE 569, MTE 580, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514
• Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Formal field experience evaluations are required during the program (including observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can 'student teach' or 'validate' in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Additional Academic Program Re-entry Policy for the MAED/TED-S**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TED-S**

**MTE 501** ................................................................. 2 credits

**The Art and Science of Teaching**

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**SEC 508** ................................................................. 3 credits

**Models, Theories and Strategies for Secondary Education**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523** ................................................................. 3 credits

**Maintaining an Effective Learning Climate**

This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** ................................................................. 2 credits

**Child and Adolescent Development**

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**MTE 562** ................................................................. 3 credits

**Assessment and Evaluation**

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 500** ................................................................. 3 credits

**Scientifically Based Reading Instruction**

This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children's performance in reading and in the language arts are also emphasized.
University of Phoenix, 2014-2015

RDG 542 ................................................................. 3 credits
Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.
MTE 553 ................................................................. 3 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 514 ................................................................. 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 564 ................................................................. 3 credits
Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.
MTE 566................................................................. 3 credits
Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 567 ................................................................. 3 credits
Curriculum Constructs & Assessment: Secondary History/Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 569 ................................................................. 3 credits
Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.
MTE 580 ................................................................. 3 credits
Curriculum Constructs and Assessment: Secondary Business & Marketing
This course focuses on instruction and assessment strategies to provide secondary students background and knowledge in business/marketing content and careers, employment and workplace skills, applied academics, and leadership skills through participation in career and technical student organizations (CTSOs). This course will provide teacher candidates the opportunity to develop the ability to evaluate and use appropriate instructional methods, curricular materials and resources, and assessment strategies.
SEC 598 ................................................................. 4 credits
Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SEC 599 ................................................................. 4 credits
Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. ELM 599 ~ ........................................................... 4 credits
Elementary Student Teaching Part B

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
Residency Requirements and Course Waivers for the MAED/TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Program | Courses Waived
--- | ---
MAED/TED-E & SPE | MTE 501, MTE 506, MTE 518
MAED/SPE | SPE 578

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

Candidates in the MAED/TED program may not student teach in special education.

MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching experience through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-E
Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Candidates must pass their state-mandated professional knowledge exam.

Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ................................................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .................................................................................... 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix master’s degree programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................................... 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends
and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ........................................................................................................... 3 credits

Models, Theories, and Instructional Strategies

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ........................................................................................................... 3 credits

Maintaining an Effective Learning Climate for Elementary Settings

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506........................................................................................................... 2 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562........................................................................................................... 3 credits

Assessment and Evaluation

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDC 537 ........................................................................................................... 4 credits

Curriculum Constructs and Assessment: Reading and Language Arts

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 529 ........................................................................................................... 2 credits

Reading and Phonological Theory

This course expounds upon the basic premise that systematically integrated phonics instruction is a fundamental component of effective reading programs. Students will study the relevant research and applications that support principles of sequential phonics instruction and phonological awareness and review traditional and contemporary phonics approaches.

MTE 535 ........................................................................................................... 3 credits

Instruction and Assessment of English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ........................................................................................................... 2 credits

Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 ........................................................................................................... 2 credits

Curriculum Constructs & Assessment: History and Social Science

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ........................................................................................................... 4 credits

Curriculum Constructs & Assessment: Science and Mathematics

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ........................................................................................................... 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ........................................................................................................... 2 credits

Curriculum Constructs & Assessment: Physical Education and Health

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and
self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of life-long health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

ELM 598 .................................................................................................................. 4 credits

Elementary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599 .................................................................................................................. 4 credits

Elementary Student Teaching Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

The Master of Arts in Education/Secondary Teacher Education (New Mexico)

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depends on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

The University reserves the right to modify the Required Course of
Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S

- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S

A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599

Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of
courses waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Course Descriptions for the MAED/TED-S

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**The Art and Science of Teaching**

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**Models, Theories and Strategies for Secondary Education**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**Maintaining an Effective Learning Climate**

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**Child and Adolescent Development**

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**Assessment and Evaluation**

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

**Instruction and Assessment of English Language Learners**

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**Curriculum Constructs and Assessment: Secondary Methods**

This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

**Curriculum Constructs and Assessment: Distance Education Methods for Secondary Schools**

This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environ-
ment.

MTE 557 ................................................................................... 3 credits

**Language Development for Secondary Settings**

This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504 ................................................................................... 3 credits

**Adolescent Psychology**

This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced.

MAT 538 ................................................................................... 3 credits

**Middle School Foundations and Philosophy**

This course examines middle level education. It evaluates the curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technology skills and knowledge are also the focal point of this course. This course uses a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598 ................................................................................... 4 credits

**Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ................................................................................... 4 credits

**Secondary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Master of Arts in Education/Elementary Teacher Education (Hawaii)**

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

The University reserves the right to modify the Required Course of Study.

Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must enter in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-E
- Completion of a minimum of 41 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Completion of Field Experience Observation Record (100 hours).

Minimum Grade Requirements for the MAED/TED-E
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.
- A candidate must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.
Institutional Recommendation for the MAED/TED-E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which they pass the content area exam during Teacher Work Sample. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching
experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/TED program and earn a Hawaii credential. This policy applies to candidates in the following programs: MAED/TED-E, MAED/TED-S (English, social studies, math, or science concentrations).

MAED/TED-S candidates living in Hawaii who attend the Online campus and are pursuing a content area outside of the four areas noted above must meet the Arizona requirements, including AEPA exams or comparable content and professional knowledge examinations from another state or agency taken within the past 7 years and Arizona fingerprinting requirements, in order to complete the Arizona approved program and be eligible for Institutional Recommendation.

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for MAED/TED-E

MTE 507 ...................................................................................0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

MTE 501 ...................................................................................2 credits

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 522 ..................................................................................3 credits

Models, Theories, and Instructional Strategies

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 506 ...................................................................................2 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ...................................................................................3 credits

Assessment and Evaluation

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purpose, the methods, and the reporting of evaluations are explored.
RDG 537 ........................................................................................................ 4 credits
Curriculum Constructs and Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
MTE 533 ........................................................................................................ 4 credits
Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
MTE 534 ........................................................................................................ 2 credits
Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.
MTE 537 ........................................................................................................ 2 credits
Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.
SPE 514 ........................................................................................................ 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 531 ........................................................................................................ 2 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
ELM 598 ........................................................................................................ 4 credits
Elementary Student Teaching Part A
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
MTE 537 ........................................................................................................ 2 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of schedule.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status
prior to being reviewed for Level 2 Candidate Status.

Degree Requirements for the MAED/TED-S

- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Candidates must pass their state-mandated professional knowledge exam.

Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date credits with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.
Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
- Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/TED program and earn a Hawaii credential. This policy applies to candidates in the following programs: MAED/TED-E, MAED/TED-S (English, social studies, math, or science concentrations).
- MAED/TED-S candidates living in Hawaii who attend the Online campus and are pursuing a content area outside of the four areas noted above must meet the Arizona requirements, including AEPA exams or comparable content and professional knowledge examinations from another state or agency taken within the past 7 years and Arizona fingerprinting requirements, in order to complete the Arizona approved program and be eligible for Institutional Recommendation.

Additional Academic Program Re-entry Policy for the MAED/TED-S

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

MTE 507 ..............................................................0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ..............................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ..............................................................2 credits

The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends
Terms and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 ................................................................................................. 3 credits

Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, employ lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ................................................................................................. 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 ................................................................................................. 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

MTE 553 ................................................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can promote English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564 ................................................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 ................................................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary English/ Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 ................................................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary History/ Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 ................................................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.
MTE 556...........................................................................................3 credits
Curriculum Constructs and Assessment: Distance Education Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557...........................................................................................3 credits
Language Development for Secondary Settings
This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504 ...................................................................................3 credits
Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced. Previous course description: This course covers adolescent psychology from a historical perspective to present day societal influences and pressures. Current trends and methods of learning in adolescent education will also be covered.

MAT 538 ...................................................................................3 credits
Middle School Foundations and Philosophy
This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments. Previous description: This is a draft of the description. This course examines the junior high and middle school. The course will evaluate the unique characteristics of the adolescent, diversity among middle school students, structures of middle school, and curriculum and instruction.

CMP 521 ...................................................................................3 credits
Using Computers in Education
This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598...........................................................................................4 credits
Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599...........................................................................................4 credits
Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (Indiana)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Courses requiring prerequisites are identified by a ~ symbol following the course number.
### Program Category Requirements and Course Selections

**Orientation, 0 total credits**
- MTE 507: Orientation to Teacher Education

**Introductory Course, 1 total credit**
- COM 516: Professional Communications

**Foundations of Education, 2 total credits**
- MTE 501: The Art and Science of Teaching

**Educational Theories and Models, 6 total credits**
- MTE 518: Models, Theories, and Instructional Strategies
- MTE 522: Maintaining an Effective Learning Climate for Elementary Settings

**Human Development, 2 total credits**
- MTE 506: Child and Adolescent Development

**Assessment, 3 total credits**
- MTE 562: Assessment and Evaluation

**Reading, 10 total credits**
- RDG 537: Curriculum Constructs & Assessment: Reading and Language Arts
- MTE 536: Children’s Literature
- RDG 535: Diagnosis & Remediation of Reading Difficulties

**Elementary Methods and Assessment, 10 total credits**
- MTE 531: Curriculum Constructs & Assessment: History and Social Science
- MTE 533: Curriculum Constructs & Assessment: Science and Mathematics
- MTE 534: Curriculum Constructs & Assessment: Visual and Performing Arts
- MTE 537: Curriculum Constructs & Assessment: Physical Education and Health

**Student Teaching & Field Experience, 8 total credits**
- ELM 598: Elementary Student Teaching Part A
- ELM 599: Elementary Student Teaching Part B

**Special Populations, 5 total credits**
- MTE 553: Instruction and Assessment of English Language Learners
- SPE 514: Survey of Special Populations

### Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admission requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

### Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Passing scores on the designated state content knowledge exam (elementary content area specific)
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

### Degree Completion Requirements for the MAED/TED-E

- Completion of a minimum of 47 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as:
  Master of Arts in Education
  Elementary Teacher Education

**Academic Progression Requirements for the MAED/TED-E**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Students enrolled in Indiana campus must complete any outstanding credits towards completion of their major/minor prior to student teaching.
- Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-E**

- A candidate must earn a grade of "B" (grades of "I" or "B-" are minimum grade requirements for the MAED/TED-E

**Elementary Teacher Education**

**Residency Requirements and Course Waivers for the MAED/TED-E**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Academic Progression Requirements for the MAED/TED-E**

- A candidate must earn a grade of "B" (grades of "I" or "B-" are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the MAED/TED-E**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.
- Indiana candidates must provide verification of current CPR/AED/Heimlich certification prior to being recommended for their credential.
- The course must be comparable in content and credits to the course which meets the following criteria:

**Field Experience for the MAED/TED-E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to

**The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.**

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization. The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

**Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.**
Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Maintaining an Effective Learning Climate for Elementary Settings

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ............................................................................................................2 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ............................................................................................................3 credits

Assessment and Evaluation

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 ...........................................................................................................4 credits

Curriculum Constructs & Assessment: Reading and Language Arts

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 536 ............................................................................................................3 credits

Children’s Literature

This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied, as well as the application of children’s literature to instruction and assessment in reading. Methods for incorporating the use of children’s literature in all content areas will also be examined.

RDG 535 ...........................................................................................................3 credits

Diagnosis & Remediation of Reading Difficulties

This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.

MTE 531 ...........................................................................................................2 credits

Curriculum Constructs & Assessment: History and Social Science

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ...........................................................................................................4 credits

Curriculum Constructs & Assessment: Science and Mathematics

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ...........................................................................................................2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ...........................................................................................................2 credits

Curriculum Constructs & Assessment: Physical Education and Health

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

ELM 598 ...........................................................................................................4 credits

Elementary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.
ELM 599 ................................................................. 4 credits

Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
MT 553 .............................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 514 ..................................................................... 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

Master of Arts in Education/Secondary Teacher Education (Indiana)

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available in the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file:
  - Demonstration of basic skills proficiency
  - Passing scores on the designated state content knowledge exam (secondary content area specific)
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S
- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Students enrolled in Indiana campus must complete any outstanding credits towards completion of their major/minor prior to student teaching.
- Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.
Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.
- Indiana candidates must provide verification of current CPR/AED/Heimlich certification prior to being recommended for their credential.
- Indiana candidates must complete a basic or in-service course of education and training on suicide prevention and the recognition of signs that a student may be considering suicide prior to receiving an initial teaching license.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/TED-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum, must reenter the current program version. Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S
MTE 507 .....................................................................................0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ........................................................................................1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 .....................................................................................2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 .....................................................................................3 credits

Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .....................................................................................3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .....................................................................................2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .....................................................................................3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 .....................................................................................3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and techno-
logical literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

MTE 553 ................................................................. 3 credits

Instruction and Assessment of English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................. 2 credits

Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564 ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Math

This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts

This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary History/Social Science

This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Science

This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 543 ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary Visual & Performing Arts

This course explores the application of basic instructional methods to the content areas and strategies of teaching the visual and performing arts in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional theory, National and state standards, assessment practices, and social issues that impact the arts in the classroom. The course also helps prospective educators develop skills in adapting delivery methods and behavior management plans for individual students and diverse populations. The course will also emphasize classroom management skills as they relate to visual and performing arts instruction.

MTE 551 ................................................................. 3 credits

Curriculum Constructs and Assessment: Physical Education

This course explores the secondary physical education classroom, professionalism, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, national and state standards including the developing motor skills through activities, developing levels of physical fitness, understanding principles of human movement, and developing and practicing social skills and the value of fair play in games and sports. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom and sport/field management skills and safety as they relate to physical education instruction.

MTE 560 ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary Health Science

This course explores the application of instructional methods to the content area of Health Science in middle school and high school settings. Participants explore the contexts of societal issues, and of state, local, and national standards for the teaching of health science. They also examine current instructional theory, models, and strategies as they relate to instruction, assessment, and accountability. The course helps prospective educators to identify the educational needs of middle level and secondary students, and to develop skills in selecting and adapting delivery methods, external resources, and behavior management plans for diverse students.

MTE 580 ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Business & Marketing

This course focuses on instruction and assessment strategies to provide secondary students background and knowledge in business/marketing content and careers, employment and workplace skills, applied academics, and leadership skills through participa-
tion in career and technical student organizations (CTSOs). This course will provide teacher candidates the opportunity to develop the ability to evaluate and use appropriate instructional methods, curricular materials and resources, and assessment strategies.

MTE 570...3 credits

Curriculum Constructs and Assessment: Global Languages
This course explores the application of basic instructional methods to the content area of Global Languages in middle school and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and cultural issues in the teaching of foreign languages. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 556...3 credits

Curriculum Constructs & Assessment: Distance Education
Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557...3 credits

Language Development for Secondary Settings
This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504...3 credits

Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced. Previous course description: This course covers adolescent psychology from a historical perspective to present day societal influences and pressures. Current trends and methods of learning in adolescent education will also be covered.

MAT 538...3 credits

Middle School Foundations and Philosophy
This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments.

Previous description: This is a draft of the description. This course examines the junior high and middle school. The course will evaluate the unique characteristics of the adolescent, diversity among middle school students, structures of middle school, and curriculum and instruction.

CMP 521...3 credits

Using Computers in Education
This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598...4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599...4 credits

Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (California)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is
designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

**Additional Admission Requirements for the MAED/TED-E**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate or graduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All California residents (Online and Local) must enroll in this version. Candidates in the MAED/TED-E and MAED/TED-S programs must sign the California Teaching Performance Assessment (TPA) Code of Honor Guidelines.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status for the MAED/TED-E**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

- **Demonstration of basic skills proficiency**
  - Students who reside in states that require a basic skills test exam for teacher certification will be required to successfully pass the state exam (i.e. CBEST, CSET, Praxis I, etc.) using their state’s cut score.
  - Online students who reside in California and are enrolled in a California approved program (MAED/TED-E or MAED/TED-S) must successfully pass the CBEST exam.
• Students enrolled in MAED/TED-E must pass all sections of the CSET. Multiple Subjects examination plus the additional CSET: Writing Skills examination will have met the basic skills requirement and will not need to pass the CBEST.

• Verification of Certificate of Clearance

• Students enrolled in this program (Elementary or Secondary) must provide one of the following verifications prior to the completion of 12 semester credits in the program:
  • The candidate provides evidence of having passed the appropriate subject matter examination(s).
  • The candidate provides evidence of having attempted the appropriate subject matter examination(s).
  • The candidate provides evidence of registration for the next scheduled examination.
  • The candidate provides evidence of having completed a Commission approved subject matter preparation program.
  • The candidate provides evidence of continuous progress toward meeting the subject matter requirement.

• TB test results (District specific)

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TED-E**

• Completion of a minimum of 43 credits.
• A minimum grade point average (GPA) of 3.0.
• Students must pass all four Teacher Performance Assessments (TPA).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The candidate provides evidence of registration for the next scheduled examination.
• The candidate provides evidence of continuous progress toward meeting the subject matter requirement.

• The diploma awarded for this program will read as:
  Master of Arts in Education
  Elementary Teacher Education

**Academic Progression Requirements for the MAED/TED-E**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience. California students must pass the following courses: TPA 001 and TPA 002 prior to beginning their student teaching experience. Candidates enrolled in MAED/TED-E and S must receive passing scores on the following assessments: TPA 1 Subject-specific Pedagogy and TPA 2 Designing Instruction prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.

**Transfer Requirements for the MAED/TED-E**

**Transfer of non-California specific coursework**

California MAED/TED programs will accept a maximum of 10 credits of non-California (CA) coursework as identified in the list below. COM 516 is not included in the 10 credits and does not need to be repeated.

The following non-California (CA) courses can be transferred into the California specific program:

- MTE 501 (2 credits)
- MTE 505 (3 credits) or MTE 506 (2 credits)
- MTE 508 (3 credits) or MTE 509 (2 credits)

**Minimum Grade Requirements for the MAED/TED-E**

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: ELM 590, ELM 595
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/TED-E**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 590, ELM 595, MTE 507CA, MTE 518CA, MTE 522CA, MTE 533CA, RDG 537CA, SPE 514CA.

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and pass CalTPA tasks 3 and 4.
- California students must pass the Teacher Performance Assessment 3 and 4 during student teaching. Students may attempt the Teacher Performance Assessment 3 and 4 a maximum of two (2) times.
- Candidates enrolled in this program must complete placements in two elementary grade levels. Placements must occur in two of the following grade levels: K-2, 3-5, or 6. One placement is for seven (7) weeks and the other placement is for eight (8) weeks. These must be self-contained classroom settings in which the candidates teach 6 of the 7 multiple subject areas to the same group of students.
- Candidates enrolled in this program must complete a full-time student teaching experience (minimum 15 weeks) in which they teach two content areas and/or two grade-levels within their discipline. Candidates must student teach in the disciplines covered by their subject matter competency exams.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates in this program must pass the RICA exam.
• Candidates must provide verification of current CPR certification prior to being recommended for their credential.
• Candidates must provide verification of U.S. Constitution coursework (with a grade of "C" or better), or exam as required by the state certification agency.

California Teaching Performance Assessment Policy
• Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy (course and assessment) and TPA 002: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.
• Candidates may attempt the Teaching Performance Assessment 1: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction a total of three times each. Candidates are required to retake TPA 001 or TPA 002 courses if they have failed the corresponding assessment two times. This retake must be completed prior to the third attempt.
• Teaching Performance Assessment 3: Assessing Learning and Teaching Performance Assessment 4: Culminating Teaching Experience are completed during the student teaching experience. These assessments can only be attempted two times each.
• Candidates must earn a score of 3 or 4 on each Teaching Performance Assessment to be considered passing. Scores of 1 or 2 are not considered passing scores.
• Candidates who are unable to pass any assessment after the allotted number of attempts are permanently removed from the program.
  TPA 1 and TPA2 = 3 attempts
  TPA 3 and TPA4 = 2 attempts
• Students who transfer into MAED/TEDCA E or S and have documentation of passing TPA 1: Subject-specific Pedagogy and/or TPA 2: Designing Instruction while attending another university are not required to complete the corresponding preparation courses TPA 001 - Subject-specific Pedagogy and/or TPA 002 - Designing Instruction. Students should submit a course waiver request to apply the TPA 1 and/or TPA 2 assessments to the TPA 001 and/or TPA 002 courses at University of Phoenix.

California Intern Credential
Candidates in California may qualify for an intern credential in California while enrolled in the MAED/TED program. The California Commission has identified specific requirements for intern qualification.
• Candidates who qualify as an elementary or secondary intern must meet the requirements noted below and sign an intern checklist.
• Candidates who are seeking an Internship must also be advised of the Early Completion Option.
• Candidates must provide verification of each of the following requirements:
  • Passing score on CBEST
  • Passing score on appropriate CSET for intern placement
  • Completion of a Bachelor's degree from a regionally accredited institution
  • Letter of Intent to Hire
  • Completion of 30 hours Field Experience with diverse students
  • Certificate of Clearance
• Continuous enrollment in the University of Phoenix MAED/TED-E or S (Elementary or Secondary Education teacher preparation degree program)
• US Constitution (units or exam)
• Verification of TB results
• Completion of the following coursework: Multiple Subject: MTE 506CA; MTE 518CA; ELL 500; SPE 514CA; RDG 537CA; MTE 522CA Single Subject: MTE 506CA; SEC 508CA; ELL 500; SPE 514CA; RDG 542CA; MTE 523CA
• If an intern candidate is removed from the university intern program, the university must notify the California Commission on Teacher Credentialing so the intern certificate can be deactivated by the Commission. If the candidate re-enters the program, the Commission must be notified in order to reactivate the intern credential.
• Candidates who had been issued an Internship from another university must provide a letter of academic good standing from their previous university prior to being accepted in the Internship Program.

California Early Completion Option
California residents may qualify, per state Commission requirements, for the early completion option. This allows candidates to complete only the supervised student teaching component and teaching performance assessment.
Candidates who qualify for the early completion option must take TPA 001 and TPA 002, Student Teaching Seminars A & B and successfully complete the Teaching Performance Assessments 1, 2, 3 and 4.
Candidates do not waive course work in MAED/TED and are not earning an MAED/TED degree.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E
MTE 507CA.................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 ................................................................. 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal and ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518CA .......................................................... 3 credits

Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522CA .......................................................... 3 credits

Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physical, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537CA .......................................................... 4 credits

Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the design and delivery of a comprehensive reading/language arts program of systematic instruction in reading, writing, listening, and speaking in multiple subject classrooms. Emphasis is placed on instructional planning, design, delivery and assessment as well as universal access and differentiated instruction. Candidates use this knowledge to prepare an integrated unit of instruction. Guided field experience, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

ELL 500 .................................................................. 3 credits

Instructional Methods for English Language Learners
This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide ELLs with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514CA ............................................................ 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 .................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533CA .......................................................... 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 .................................................................. 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 .................................................................. 2 credits

Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on scope, sequence, and state and national standards. This course will include framework-based teaching...
strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course will also include framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas will be explored.

**Elementary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the learning environment, designing and implementing assessments in preparation for the CaTTPA Task Three: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the Teaching Performance Expectations.

**Elementary Student Teaching Part B**

This course will focus on the elements of the CalTPA Task Four: Culminating Teaching Experience Task. The course explores the following topics: school culture and diversity, pedagogical assignments, self-reflection, and preparation to serve as a beginning teacher in an induction program. It also provides practical guidance in seeking a teaching position. This course will serve as a forum for open discussion and problem solving based on student teaching classroom experiences and their ability to use and apply the full-range of Teaching Performance Expectations.

**Subject Specific Pedagogy**

This course addresses California's Teaching Performance Assessment: Principles of Content-Specific and Developmentally Appropriate Pedagogy. Students will review the elements of this assessment and will demonstrate their knowledge of principles of content-specific pedagogy and developmentally appropriate pedagogy. Through this assessment process, students will learn the importance of their performance with K-12 students in mastering the knowledge, skills and abilities required of a beginning teacher, as exemplified in the Teacher Performance Expectations.

**Designing Instruction**

This course addresses the second task of California's Teaching Performance Assessment: Designing Instruction, Connecting Instructional Planning to Student Characteristics for Academic Learning. Students will review the elements of the Designing Instruction Teaching Performance Assessment and will demonstrate their ability to learn important details about a classroom of students, an English learner, and a student who presents a different instructional challenge. Students will focus on how instructional planning connects to student characteristics of a whole class and to two focus students who present a different instructional challenge.

---

**Master of Arts in Education/Teacher Education Middle Level Generalist (Texas)**

The following Master of Arts in Education/Teacher Education Middle Level Generalist (MAED/TEDMG) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Teacher Education Middle Level Generalist (MAED/TEDMG) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDMG program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on middle level student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedmg.

Additional Admission Requirements for the MAED/TEDMG
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDMG
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
  • Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDMG
• Completion of a minimum of 37 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• Candidates must pass their state-mandated professional knowledge exam.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education
  Teacher Education - Middle Level Generalist

Academic Progression Requirements for the MAED/TEDMG
Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:
• Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.
• Verification of the completion of 100 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDMG
• A candidate must earn a grade of "B" (grades of "I" and "B-") are not accepted) or better in the following courses in order to teach: MTE 586, MTE 587
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDMG

• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 523, MTE 533, MTE 586, MTE 587, RDG 532, SPE 514

Field Experience for the MAED/TEDMG

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TEDMG

• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

• Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.

• Students who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
Institutional Recommendation for the MAED/TEDMG

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDMG

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TEDMG

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 .............................................................................. 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 ................................................................. 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
MTE 518 .............................................................................. 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 523 .............................................................................. 3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 .............................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physical, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender biases, are examined.
RDG 532 .............................................................................. 4 credits
Curriculum Constructs and Assessment: English Language Arts and Reading 4-8
This course focuses on the knowledge, skills, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study; vocabulary, comprehension; fluency, research and study skills, writing, viewing and presenting, representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differenciating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.
MTE 553 .............................................................................. 3 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 514 .............................................................................. 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses
on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 ...................................................................................2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ...................................................................................4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 562 ...................................................................................3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 586 ...................................................................................4 credits

Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. This course will focus on the student teaching experience and the design and implementation of the Teacher Work Sample. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

MTE 587 ...................................................................................4 credits

Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education Middle Level Mathematics (Texas)

The following Master of Arts in Education/Teacher Education Middle Level Mathematics (MAED/TEDMM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Teacher Education Middle Level Mathematics (MAED/TEDMM) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDMM program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on middle level student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedmm.

Additional Admission Requirements for the MAED/TEDMM

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- Students in the MAED/TEDMM-Middle Level Mathematics program must have preparation in the Mathematics field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.
- Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDMM

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
  - Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDMM

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- Candidates must pass their state-mandated professional knowledge exam.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education
- Teacher Education - Middle Level Mathematics

Academic Progression Requirements for the MAED/TEDMM

Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:

- Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.
- Verification of the completion of 100 hours of field experience

Candidacy Status for the MAED/TEDMM

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDMM

A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: MTE 586, MTE 587
Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/TEDMM**

- Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
- The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 523, MTE 533, MTE 564, MTE 586, MTE 587, RDG 532, SPE 514

**Field Experience for the MAED/TEDMM**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TEDMM**

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can 'student teach' or 'validate' in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching**

- Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
Institutional Recommendation for the MAED/TEDMM
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDMM
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TEDMM

**MTE 507** .......................................................... 0 credits

**Orientation to Teacher Education**
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516** .......................................................... 1 credit

**Professional Communications**
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501** .......................................................... 2 credits

**The Art and Science of Teaching**
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**MTE 518** ......................................................... 3 credits

**Models, Theories, and Instructional Strategies**
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523** ......................................................... 3 credits

**Maintaining an Effective Learning Climate**
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** .......................................................... 2 credits

**Child and Adolescent Development**
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**RDG 532** .......................................................... 4 credits

**Curriculum Constructs and Assessment: English Language Arts and Reading 4-8**
This course focuses on the knowledge, skills, texts, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study; vocabulary, comprehension, fluency, research and study skills, writing, viewing and presenting, representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differentiating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.

**MTE 553** .......................................................... 3 credits

**Instruction and Assessment of English Language Learners**
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**SPE 514** .......................................................... 2 credits

**Survey of Special Populations**
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses
on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 533 ...................................................................................4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 562 ...................................................................................3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 564 ...................................................................................3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 586 ...................................................................................3 credits

Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. This course will focus on the student teaching experience and the design and implementation of the Teacher Work Sample. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

MTE 587 ...................................................................................4 credits

Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education Middle Level Science (Texas)

The following Master of Arts in Education/Teacher Education Middle Level Science (MAED/TEDMS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Teacher Education Middle Level Science (MAED/TEDMS) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDMS program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on middle level student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedms. Courses requiring prerequisites are identified by a ~ symbol following the course number.

Additional Admission Requirements for the MAED/TEDMS
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- Students in the MAED/TEDMS-Middle Level Science program must have preparation in the Science field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.
- Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDMS
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
  - Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDMS
- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- Candidates must pass their state-mandated professional knowledge exam.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education
- Teacher Education - Middle Level Science

Academic Progression Requirements for the MAED/TEDMS
Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:
- Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDMS
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: MTE 586, MTE 587
Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDMS

• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 533, MTE 569, MTE 586, MTE 587, RDG 532, SPE 514

Field Experience for the MAED/TEDMS

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TEDMS

• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

• Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.

• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

• Student teaching can only be repeated one time.

• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.

• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or validate in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching

• Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
Institutional Recommendation for the MAED/TEDMS

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDMS

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may re-enter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll in a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TEDMS

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ............................................................ 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................. 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ................................................................. 3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

RDG 532 ............................................................ 4 credits
Curriculum Constructs and Assessment: English Language Arts and Reading 4-8
This course focuses on the knowledge, skills, texts, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study, vocabulary, comprehension, fluency, research and study skills, writing, viewing and presenting, representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differentiating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.

MTE 553 ................................................................. 3 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................. 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses...
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 569 ...................................................................................3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 586 ...................................................................................4 credits

Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. This course will focus on the student teaching experience and the design and implementation of the Teacher Work Sample. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

MTE 587 ...................................................................................4 credits

Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education Secondary Mathematics (Texas)

The following Master of Arts in Education/Teacher Education Secondary Mathematics (MAED/TEDSM) program may be offered at the University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Teacher Education Secondary Mathematics (MAED/TEDSM) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDSM program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow him to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
- Demonstration of basic skills proficiency
- Verification of fingerprint clearance
- Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Minimum Grade Requirements for the MAED/TEDSM

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
University of Phoenix, 2014-2015

• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDSM
• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Field Experience for the MAED/TEDSM
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TEDSM
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
• Students who are removed from a placement at the request of a school district administrator will be withdrawn from the program and will be issued a grade of "F" by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Students who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
• Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
Institutional Recommendation for the MAED/TEDSM
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDSM
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TEDSM
MTE 507 ................................................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .................................................................................... 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................................... 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 .................................................................................... 3 credits
Models, Theories, and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .................................................................................... 3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .................................................................................... 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physical, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

RDG 542 .................................................................................... 3 credits
Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

MTE 553 .................................................................................... 3 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 .................................................................................... 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 562 ................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 564 ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

SEC 598 ................................................................. 4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ................................................................. 4 credits

Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education

Secondary Science (Texas)

The following Master of Arts in Education/Teacher Education Secondary Science MAED/TEDSS program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Teacher Education Secondary Science (MAED/TEDSS) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDSS program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator's responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student's professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedss.

Secondary Student Teaching Part A
Level 1 Candidate Status is completed upon admission to the Candidacy Status for the MAED/TEDSS. Students in the MAED/TEDSS-Secondary Science program must have preparation in the Science field by verification of equivalent undergraduate degree or the equivalent undergraduate degree earned at a recognized foreign institution. Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments. Students in the MAED/TEDSS-Secondary Science program must have preparation in the Science field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level. Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDSS

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

- Demonstration of basic skills proficiency
- Verification of fingerprint clearance
- Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDSS

- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.

Additional Admission Requirements for the MAED/TEDSS

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- Students in the MAED/TEDSS-Secondary Science program must have preparation in the Science field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.
- Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Minimum Grade Requirements for the MAED/TEDSS

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
- Candidates must earn a “B” or better in Student Teaching Part A 
  & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the Seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/ TEDSS

- Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

**Field Experience for the MAED/TEDSS**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TEDSS**

• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpose their enrollment in the student teaching courses.

• Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.

• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

• Student teaching can only be repeated one time.

• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.

• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching**

• Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Institutional Recommendation for the MAED/TEDSS**

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential). Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

• Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

**Additional Academic Program Re-entry Policy for the MAED/TEDSS**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork...
Maintaining an Effective Learning Climate

Course Descriptions for the MAED/TEDSS

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

MTE 501 ................................................................. 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 ................................................................. 3 credits
Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 525 ................................................................. 3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

RDG 542 ......................................................................................................................... 3 credits
Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

MTE 553 ......................................................................................................................... 3 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multicultural curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ......................................................................................................................... 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 562 ......................................................................................................................... 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 569 ......................................................................................................................... 3 credits
Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.
SEC 598 .............................................................. 4 credits

Secondary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 .............................................................. 4 credits

Secondary Student Teaching Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education (California)

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate or graduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All California residents (Online and Local) must enroll in this version. Candidates in the MAED/TED-E and MAED/TED-S programs must sign the California Teaching Performance Assessment (TPA) Code of Honor Guidelines.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
- Demonstration of basic skills proficiency
  - Students who reside in states that require a basic skills test exam for teacher certification will be required to successfully pass the state exam (i.e. CBEST, CSET, Praxis I, etc.) using their state’s cut score.
  - Online students who reside in California and are enrolled in a California approved program (MAED/TED-E or MAED/TED-S) must successfully pass the CBEST exam.
  - Verification of Certificate of Clearance
  - Students enrolled in this program (Elementary or Secondary) must provide one of the following verifications prior to the completion of 12 semester credits in the program:
    - The candidate provides evidence of having attempted the appropriate subject matter examination(s).
    - The candidate provides evidence of having completed a Commission approved subject matter preparation program.
    - The candidate provides evidence of continuous progress toward meeting the subject matter requirement.
- TB test results (District specific)
  - Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S
- Completion of a minimum of 37 credits.
- A minimum grade point average (GPA) of 3.0.
- Students must pass all four Teacher Performance Assessments (TPA).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
  - To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

California students must pass the following courses: TPA 001 and TPA 002 prior to beginning their student teaching experience.

Candidates enrolled in MAED/TED-E and S must receive passing scores on the following assessments: TPA 1 Subject-specific Pedagogy and TPA 2 Designing Instruction prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.

Transfer Requirements for the MAED/TED-S
Transfer of non-California specific coursework
California MAED/TED programs will accept a maximum of 10 credits of non-California (CA) coursework as identified in the list below. COM 516 is not included in the 10 credits and does not need to be repeated.

The following non-California (CA) courses can be transferred into the California specific program:
- MTE 501 (2 credits)
- MTE 505 (3 credits) or MTE 506 (2 credits)
Courses Waived

Minimum Grade Requirements for the MAED/TED-S

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SEC 590, SEC 595
- Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507CA, SEC 508CA, MTE 525CA, RDG 542CA, SPE 514CA, MTE 528CA, MTE 566CA, MTE 567CA, MTE 569CA, MTE 551CA, MTE 541CA, MTE 564CA, SEC 590, SEC 595.

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can 'student teach' or 'validate' in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and pass CalTPA tasks 3 and 4.
• California students must pass the Teacher Performance Assessment 3 and 4 during student teaching. Students may attempt the Teacher Performance Assessment 3 and 4 a maximum of two (2) times.
• Candidates enrolled in this program must complete placements in two elementary grade levels. Placements must occur in two of the following grade levels: K-2, 3-5, or 6. One placement is for seven (7) weeks and the other placement is for eight (8) weeks. These must be self-contained classroom settings in which the candidates teach 6 of the 7 multiple subject areas to the same group of students.
• Candidates enrolled in this program must complete a full-time student teaching experience (minimum 15 weeks) in which they teach two content areas and/or two grade-levels within their discipline. Candidates must student teach in the disciplines covered by their subject matter competency exams.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-S
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates in this program must pass the RICA exam.
• Candidates completing the California approved MAED/TED-E or S program must provide verification of current CPR certification prior to being recommended for their credential.
• Candidates must provide verification of U.S. Constitution coursework (with a grade of “C” or better), or exam as required by the state certification agency.

California Teaching Performance Assessment Policy
• Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy (course and assessment) and TPA 002: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.
• Candidates may attempt the Teaching Performance Assessment 1: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction a total of three times each. Candidates are required to retake TPA 001 or TPA 002 courses if they have failed the corresponding assessment two times. This retake must be completed prior to the third attempt.
• Teaching Performance Assessment 3: Assessing Learning and Teaching Performance Assessment 4: Culminating Teaching Experience are completed during the student teaching experience. These assessments can only be attempted two times each.
• Candidates must earn a score of 3 or 4 on each Teaching Performance Assessment to be considered passing. Scores of 1 or 2 are not considered passing scores.
• Candidates who are unable to pass any assessment after the allotted number of attempts are permanently removed from the program.
• TPA 1 and TPA2 = 3 attempts
• TPA 3 and TPA4 = 2 attempts
• Students who transfer into MAED/TEDCA E or S and have documentation of passing TPA 1: Subject-specific Pedagogy and/or TPA 2: Designing Instruction while attending another university are not required to complete the corresponding preparation courses TPA 001 - Subject-specific Pedagogy and/or TPA 002 - Designing Instruction. Students should submit a course waiver request to apply the TPA 1 and/or TPA 2 assessments to the TPA 001 and/or TPA 002 courses at University of Phoenix.

California Intern Credential
Candidates in California may qualify for an intern credential in California while enrolled in the MAED/TED program. The California Commission has identified specific requirements for intern qualification.
• Candidates who qualify as an elementary or secondary intern must meet the requirements noted below and sign an intern checklist.
• Candidates who are seeking an Internship must also be advised of the Early Completion Option.
• Candidates must provide verification of each of the following requirements:
  • Passing score on CBEST
  • Passing score on appropriate CSET for intern placement
  • Completion of a Bachelors degree from a regionally accredited institution
  • Letter of Intent to Hire
  • Completion of 30 hours Field Experience with diverse students
  • Certificate of Clearance
  • Continuous enrollment in the University of Phoenix MAED/TED-E or S (Elementary or Secondary Education teacher preparation degree program)
  • US Constitution (units or exam)
  • Verification of TB results
• Completion of the following coursework: Multiple Subject: MTE 506CA; MTE 518CA; ELL 500; SPE 514CA; RDG 537CA; MTE 522CA Single Subject: MTE 506CA; SEC 508CA; ELL 500; SPE 514CA; RDG 542CA; MTE 523CA

• If an intern candidate is removed from the university internship program, the university must notify the California Commission on Teacher Credentialing so the intern certificate can be deactivated by the Commission. If the candidate re-enters the program, the Commission must be notified in order to reactivate the intern credential.

• Candidates who had been issued an Internship from another university must provide a letter of academic good standing from their previous university prior to being accepted in the Internship Program.

California Early Completion Option
California residents may qualify, per state Commission requirements, for the early completion option. This allows candidates to complete only the supervised student teaching component and teaching performance assessment.

Candidates who qualify for the early completion option must take TPA 001 and TPA 002, Student Teaching Seminars A & B and successfully complete the Teaching Performance Assessments 1, 2, 3 and 4.

Candidates do not waive course work in MAED/TED and are not earning an MAED/TED degree.

Additional Academic Program Re-entry Policy for the MAED/TED-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S
MTE 507CA .............................................................................. 0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .............................................................................. 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 .................................................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508CA .............................................................................. 3 credits

Models, Theories, and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523CA .............................................................................. 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .................................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .............................................................................. 3 credits

Assessment and Evaluation
