This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542CA .............................................................................. 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the design and delivery of content-based literacy strategies (reading, writing, listening and speaking) in single subject classrooms. Emphasis is placed on instructional planning, design, and delivery; assessment; universal access and differentiated instruction. Candidates use this knowledge to prepare a comprehensive content area lesson plan. Guided field experience, based on work with a 7th-12th-grade student, is incorporated into the course requirements.

**IEL 500: Instructional Methods for English Language Learners**

This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide ELLs with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**MTE 564CA: Curriculum Constructs and Assessment: Secondary Science**

This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

**SPE 514CA: Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 528CA: Curriculum Constructs and Assessment: Visual Arts**

This course explores the theory, application, and strategies of teaching visual art in middle and secondary school. Participants identify the educational needs of students by exploring current instructional theory, national and state standards, assessment practices, aesthetic valuing, artistic perception, and historical and cultural origins that impact art. The course also helps prospective educators develop skills in adapting delivery methods and behavior management plans for individual students and diverse populations. The course will also emphasize classroom management skills and use of technology as they relate to visual art instruction.

**MTE 566CA: Curriculum Constructs & Assessment: Secondary Math**

This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

**SEC 590: Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the learning environment, designing and implementing assessments in preparation for the CalTPA Task Three: Assessing Learning Task, and developing as a
professional educator. The course also provides a forum for open
discussion and problem solving based on student teaching classroom
experiences and the ability to use and apply the Teaching
Performance Expectations.

SEC 595 ..................................................................................... 4 credits

Secondary Student Teaching Part B
This course will focus on the elements of the CallTPA Task Four:
Culminating Teaching Experience Task. The course explores the
following topics: school culture and diversity, pedagogical assign-
ments and tasks, self-reflection, and preparation to serve as a
beginning teacher in an induction program. It also provides practi-
cal guidance in seeking a teaching position. This course will serve
as a forum for open discussion and problem solving based on student
teaching classroom experiences and their ability to use and
apply the full-range of Teaching Performance Expectations.

TPA 001 .................................................................................. 1 credit

Subject Specific Pedagogy
This course addresses task one of California’s Teaching Perfor-
amance Assessment: Subject-Specific Pedagogy: Principles of Con-
tent-Specific and Developmentally Appropriate Pedagogy. This
course will offer an overview of the California Teaching Performance
Assessments, their history, California Teaching Performance Expectations
and their connections to the Teaching Performance Assessments. Students will review the elements of task one, Sub-
ject-Specific Pedagogy: Principles of Content-Specific and Develop-
mentally Appropriate Pedagogy, including understanding what
the task measures, constructing high quality responses and demonstr-
ating their knowledge of principles of content-specific pedagogy
and developmentally appropriate pedagogy through the task’s
exercises.

TPA 002 .................................................................................. 1 credit

Designing Instruction
This course addresses the second task of California’s Teaching Per-
formance Assessment: Designing Instruction, Connecting Instruc-
tional Planning to Student Characteristics for Academic Learning. Students
will review the elements of task two, Designing Instruction,
Teaching Performance Assessment and will demonstrate their abili-
ty to learn important details about a classroom of students, an
English learner, and a student who presents a different instruc-
tional challenge. Students will focus on how instructional planning
connects to student characteristics of a whole class and to two
focus students who present a different instructional challenge.

Master of Arts in Education/Elementary Teacher
Education (Tennessee)

The following Master of Arts in Education (MAEd)/Elementary Teacher
Education program may be offered at these University of Phoenix campus
locations: Online, depending on state of residence. The availability of
programs and concentrations depend on student demand and other
factors. Not all programs may be available to all residents of all states.
Students may want to consider completing certain courses in the Online
classroom at Online rates if the program is available via the Online
modality in their state. Please contact your enrollment advisor for more
information.

The Master of Arts in Education/Elementary Teacher Education
(MAED/TED-E) is a graduate degree program preparing candi-
dates for teacher licensure. The guiding philosophy of the MAED/
TED-E program is to provide the adult student, who already has a
degree in a discipline other than education, with the skills and
knowledge that will allow them to become a competent and effect-
ive educator. This program focuses on elementary student learn-
ing by improving the educator’s responsibility for that learning.
Student teaching is an integral component of the Teacher Educa-
tion Program. It provides students with a field-based experience at
the appropriate grade and content level. Student teachers work
with a cooperating teacher from a school site and with a University
of Phoenix faculty advisor. The student teaching experience is
designed to emphasize the achievement of state standards leading
to certification and to present individuals with growth opportuni-
ties that best prepare them to assume the duties of a certified
classroom teacher. Throughout the program, students are required to
complete a minimum of 100 hours of verified field experiences,
covering a variety of developmental levels. The focus of each
observation will relate to specific course content. Documentation
will be maintained in the student’s professional portfolio.
For more information about our graduation rates, the median debt
of students who completed the program, and other important
information, please visit our website at http://www.phoenix.edu/
programs/maed-ted-e.

Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students residing in Tennessee and/or attending University of Phoenix Online must have an undergraduate degree in a content area recognized by the Tennessee State Board of Education. Refer to the Tennessee State Board of Education website for a list of the recognized degree areas for teacher licensure at the secondary level. The student’s undergraduate degree area must be the same as the licensure area sought, student teaching placement, and required state subject area exam.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Requirements for the MAED/TED-E

• Completion of a minimum of 44 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E

• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/ TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Institutional Recommendation for the MAED/TED-E**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Field Experience for the MAED/TED-E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-E**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which the content knowledge assessment exam was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ................................................................. 0 credits
**Orientation to Teacher Education**
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ........................................................ 1 credit
**Professional Communications**
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits
**The Art and Science of Teaching**
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................. 3 credits
**Models, Theories, and Instructional Strategies**
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ................................................................................... 3 credits
**Maintaining an Effective Learning Climate for Elementary Settings**
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................................... 2 credits
**Child and Adolescent Development**
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................................... 3 credits
**Assessment and Evaluation**
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 ............................................................................. 4 credits
**Curriculum Constructs and Assessment: Reading and Language Arts**
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SEI 500 .................................................................................... 3 credits
**Structured English Immersion**
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELLs), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 .................................................................................... 3 credits
**Advanced Structured English Immersion Methods**
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes
Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 ................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ................................................................. 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ................................................................. 2 credits

Curriculum Constructs & Assessment: Physical Education and Health

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong healthy; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

ELM 598 ................................................................. 4 credits

Elementary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599 ................................................................. 4 credits

Elementary Student Teaching Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education (Tennessee)

The following Master of Arts in Education (MAEd)/Secondary Teacher Education program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- Students residing in Tennessee and/or attending University of Phoenix Online must have an undergraduate degree in a content area recognized by the Tennessee State Board of Education. Refer to the Tennessee State Board of Education website for a list of the recognized degree areas for teacher licensure at the secondary level. The campus is responsible for verifying that the student’s undergraduate degree area is the same as the licensure area sought, student teaching placement, and required state subject area exam. The campus verification is not required to be on file at time of admission.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Requirements for the MAED/TED-S

- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
Courses Waived

- Passing scores on the designated state content knowledge exam
- Immunization or TB test results (District specific)
- Verification of the completion of 100 hours of field experience.

Academic Progression Requirements for the MAED/TED-S

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.

University of Phoenix, 2014-2015

Minimum Grade Requirements for the MAED/TED-S

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.
- A candidate must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

</tr>
</tbody>
</table>

Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived:

- COM 516, MTE 507, MTE 518, MTE 523, MTE 559, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514
Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

Candidates in the MAED/TED program may not student teach in special education.

MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certifying candidate (e.g., 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/TED-S

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance (e.g., only student teaching, internship or practicum), in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must complete the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

MTE 507 .............................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .............................................................. 1 credit
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 501 .............................................................. 2 credits
Professional Communications
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .............................................................. 3 credits
Models, Theories and Strategies for Secondary Education
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 506 .............................................................. 0 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 507 .............................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .............................................................. 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative tradi-

University of Phoenix, 2014-2015
COLLEGE OF EDUCATION (Online)

693
tional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 ................................................................. 3 credits

**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

SEI 500 ................................................................. 3 credits

**Structured English Immersion**

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching English as a Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SPE 514 ................................................................. 2 credits

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 599 ................................................................. 3 credits

**Curriculum Constructs and Assessment: Secondary Methods**

This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

SEI 503 ................................................................. 3 credits

**Advanced Structured English Immersion Methods**

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SEC 598 ............................................................... 4 credits

**Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ............................................................... 4 credits

**Secondary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Master of Arts in Education/Elementary Teacher Education (Utah)**

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
- Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-E

- Completion of a minimum of 41 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Students enrolled at a Utah campus must provide verification of a 'student teaching license' and submit a copy of the license prior to the student teaching placement.
• Students enrolled at the Utah campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
• Verification of the completion of 100 hours of field experience Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514
Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waives.

Field Experience for the MAED/TED-E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can 'student teach' or 'validate' in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E
MTE 507 ................................................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516.................................................................................... 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................................... 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................................... 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ................................................................................... 3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................................... 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, psychological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................................... 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on
using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 ................................................................. 4 credits

Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SPE 514 ........................................................................ 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 553 ................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

MTE 531 ................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ........................................................................ 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ........................................................................ 2 credits

Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

ELM 598 ........................................................................ 4 credits

Elementary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599 ........................................................................ 4 credits

Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
Master of Arts in Education/Secondary Teacher Education (Utah)

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements and Courses Selections

Orientation, 0 total credits

- MTE 507: Orientation to Teacher Education

Introductory Course, 1 total credit

- COM 516: Professional Communications

Foundations of Education, 2 total credits

- MTE 501: The Art and Science of Teaching

Educational Theories and Models, 6 total credits

- SEC 508: Models, Theories and Strategies for Secondary Education
- MTE 523: Maintaining an Effective Learning Climate

Human Development, 2 total credits

- MTE 506: Child and Adolescent Development

Assessment, 3 total credits

- MTE 562: Assessment and Evaluation

Secondary Reading, 3 total credits

- RDG 542: Curriculum Constructs & Assessment: Reading Methods for Secondary Settings

Special Populations, 5 total credits

- SPE 514: Survey of Special Populations
- MTE 553: Instruction and Assessment of English Language Learners

Secondary Methods and Assessment, 3 total credits

Students must choose one of the following courses:

- MTE 559: Curriculum Constructs and Assessment: Secondary Methods
- MTE 564: Curriculum Constructs and Assessment: Secondary Math
- MTE 566: Curriculum Constructs & Assessment: Secondary English/Language Arts
- MTE 567: Curriculum Constructs & Assessment: Secondary History/Social Science
- MTE 569: Curriculum Constructs and Assessment: Secondary Science

Secondary Elective, 3 total credits

Students must choose one of the following courses:

- MTE 556: Language Development for Secondary Settings
- MAT 504: Adolescent Psychology
- MAT 538: Middle School Foundations and Philosophy

Middle School Foundations and Philosophy

- CMP 521: Using Computers in Education

Student Teaching & Field Experience, 8 total credits

- SEC 598: Secondary Student Teaching Part A
- SEC 599: Secondary Student Teaching Part B

The University reserves the right to modify the Required Course of Study.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Upon admission, student must have completed all but six (6) semester hours in the required secondary endorsement area. These additional six (6) credits must be completed prior to student teaching. Information regarding endorsement coursework requirements for secondary teacher licensure can be located on the Utah State Office of Education website.

• Students using foreign credentials when enrolling in a program must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted must have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Students enrolled at a Utah campus must provide verification of a 'student teaching license' and submit a copy of the license prior to the student teaching placement
• Students enrolled at the Utah campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching
• Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599

• Students enrolled at a Utah campus must provide verification of a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567.
Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.

MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g., 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reentry their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one
year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating courses resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends for discussion. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multilingual curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

Curriculum Constructs and Assessment: Secondary Methods
This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasize. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse stu-
MTE 566 ................................................................................... 3 credits
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 .................................................................................. 3 credits
Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 .................................................................................. 3 credits
Curriculum Constructs & Assessment: Secondary History/Social Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 556 .................................................................................. 3 credits
Curriculum Constructs & Assessment: Secondary History/Social Science
This course explores the application of basic instructional methods and strategies of teaching middle level and secondary students by exploring current instructional theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MAT 504 ................................................................................... 3 credits
Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced. Previous course description: This course covers adolescent psychology from a historical perspective to present day societal influences and pressures. Current trends and methods of learning in adolescent education will also be covered.

MAT 538 ................................................................................... 3 credits
Middle School Foundations and Philosophy
This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments. Previous description: This is a draft of the description. This course examines the junior high and middle school. The course will evaluate the unique characteristics of the adolescent, diversity among middle school students, structures of middle school, and curriculum and instruction.

SEC 598 .................................................................................... 4 credits
Using Computers in Education
This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 599 .................................................................................... 4 credits
Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

CMP 521................................................................................... 3 credits
Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
Master of Arts in Education/Elementary Teacher Education (Nevada)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Elementary Student Teaching Part B

The University reserves the right to modify the Required Course of Study.

**Additional Admission Requirements for the MAED/TED-E**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
- Level 2 Candidate Status is completed prior to entering the Student Teaching experience. Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
  - Immunization or TB test results (District specific)
  - Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
  - Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
- Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to meet the course requirements:
  - ELM 598 and ELM 599.
  - Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
  - If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Degree Completion Requirements for the MAED/TED-E

- The completion of a minimum of 46 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.

- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Institutional Recommendation for the MAED/TED-E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these...

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ....................................................................................0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ...................................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

This course focuses on teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
Online modality in their state. Please contact your enrollment advisor for
states. Students may want to consider completing certain courses in the
and other factors. Not all programs may be available to all residents of all
availability of programs and concentrations depend on student demand
EML 598 ................................................................. 4 credits

Elementary Student Teaching Part A
This course emphasizes the practical application of educational
theories and methods including classroom management, grading,
and strategies to increase parent communication and/or family
and community involvement. In addition, students will receive
practical guidance in securing a teaching position, time manage-
ment, and developing and maintaining relationships with colle-
agues and parents. This seminar also provides a forum for open
discussion and problem solving based on classroom experiences.

Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

Upon admission, student must have completed all but six (6) semester hours in the required subject majors and/or minors. These additional six (6) credits must be completed prior to student teaching. Information regarding acceptable majors/minors and credit requirements for secondary teacher licensure can be located on the Nevada Department of Education website.

Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Students enrolled at the Nevada campus must complete any remaining credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching. In-hospital evaluations cannot be completed for programs leading to initial teacher certification.

All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

**Candidacy Status for the MAED/TED-S**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program without interruption of scheduling.

Level 1 Candidate Status is completed upon admission to the University. Students who are admitted must meet the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's electronic file.

- Demonstration of basic skills proficiency
- Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
- Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**

A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.

Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Degree Completion Requirements for the MAED/TED-S**

- The completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.

In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education.
Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute may not be waived for MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Additional Academic Program Re-entry Policy for the MAED/TED-S**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TED-S**

**MTE 507** ................................................................. 0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516** ................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501** ................................................................. 2 credits

**The Art and Science of Teaching**

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**SEC 508** ................................................................. 3 credits

**Models, Theories and Strategies for Secondary Education**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523** ................................................................. 3 credits

**Maintaining an Effective Learning Climate**

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** ................................................................. 2 credits

**Child and Adolescent Development**

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**MTE 562** ................................................................. 3 credits

**Assessment and Evaluation**

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**RDG 542** ................................................................. 3 credits

**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

**MTE 553** ................................................................. 3 credits

**Instruction and Assessment of English Language Learners**

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 514 .................................................................2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564...............................................................3 credits
Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566...............................................................3 credits
Curriculum Constructs & Assessment: Secondary English/ Language Arts
This course explores the application of basic instructional methods in the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567...............................................................3 credits
Curriculum Constructs & Assessment: Secondary History/ Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569...............................................................3 credits
Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 556 .............................................................3 credits
Curriculum Constructs & Assessment: Distance Education
Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557 .............................................................3 credits
Language Development for Secondary Settings
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MAT 504 ............................................................3 credits
Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced.

MAT 538 ............................................................3 credits
Middle School Foundations and Philosophy
This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments.

CMP 521 ............................................................3 credits
Using Computers in Education
This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598 ............................................................4 credits
Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching class-
Master of Arts in Education/Special Education (Hawaii)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE
• A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam.
• Verification of the completion of 100 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
• Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 7 years.

Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization. The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
• Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/SPE program and earn a Hawaii credential.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territo-
ries are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................. 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ................................................................. 3 credits
Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ................................................................. 3 credits
Models, Theories and Instructional Strategies for SPE
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 ................................................................. 3 credits
Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 ................................................................. 3 credits
Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 ................................................................. 3 credits
Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 ................................................................. 4 credits
Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 553 ................................................................. 0 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multielement curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 574 ................................................................. 3 credits
Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 ................................................................. 3 credits
Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 554 ................................................................. 3 credits
Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 ................................................................. 3 credits
Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical
handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594........................................................................................... 4 credits
Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595........................................................................................... 4 credits
Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (New Mexico)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status for the MAED/SPE**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
- Students must take and pass a New Mexico assessment of teacher basic skills.
- Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Minimum Grade Requirements for the MAED/SPE**

- Students must take and pass the New Mexico content knowledge assessment in Special Education.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Institutional Recommendation for the MAED/SPE**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
- Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 7 years.

**Residency Requirements and Course Waivers for the MAED/SPE**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
Courses Waived

- Candidates must earn a “B” or better in Student Teaching.

Student teaching is a full-time experience. Each campus must arrange field experience. Candidates must work with their faculty prior to student teaching. Candidates must follow the completion of student teaching. Candidates must complete the Teach for America Summer Institute in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

MTE 507 ................................................................. 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ........................................................................ 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and...
evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**Orientation to the Exceptional Child**

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

**SPE 513** ................................................................. 3 credits

**Models, Theories and Instructional Strategies for SPE**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**SPE 546** ................................................................. 3 credits

**Special Education Methods**

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

**SPE 575** ................................................................. 3 credits

**Inclusion Strategies of the Special Educator**

This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

**SPE 512** ................................................................. 3 credits

**Special Education Assessment and Interpretation**

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

**RDG 570** ................................................................. 4 credits

**Curriculum Const and Asmt: Reading and Lang Arts for SPE**

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

**RDG 535** ................................................................. 3 credits

**Diagnosis & Remediation of Reading Difficulties**

This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.

**SPE 574** ................................................................. 3 credits

**Characteristics of Intellectual/Developmental Disabilities**

This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

**SPE 559** ................................................................. 3 credits

**Characteristics of Learning Disabilities**

This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

**SPE 544** ................................................................. 3 credits

**Characteristics of Emotional & Behavioral Disabilities**

This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

**SPE 556** ................................................................. 3 credits

**Characteristics of Physical & Health Disabilities**

This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

**SPE 594** ................................................................. 4 credits

**Special Education Student Teaching: Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**SPE 595** ................................................................. 4 credits

**Special Education Student Teaching: Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance
in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Colorado)

The following Master of Arts in Education/Special Education (MAED/ SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- Completion of a minimum of 45 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (200 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Verification of content knowledge mastery prior to student teaching (PLACE or PRAXIS)

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 500, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Colorado Students in the CERT/SPE program who have successfully completed all courses and wish to earn a master’s degree will waive SPE 594 and SPE 595 Student Teaching Part A and Part B with credit. These students will be required to complete MTE 553 Instruction and Assessment of English Language Learners and MTE 562 Assessment and Evaluation.

University of Phoenix, 2014-2015
Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

- Students must complete a minimum of 15 weeks of student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 15 weeks of student teaching, including the completion of a Teacher Work Sample project.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

- MTE 507: Orientation to Teacher Education
  - This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
  - SPE 513: Professional Communications
  - This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.
  - SPE 578: Models, Theories and Instructional Strategies for SPE
  - This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
  - SPE 546: Special Education Methods
  - This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.
SPE 575 ....................................................................................3 credits
**Inclusion Strategies of the Special Educator**
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 ....................................................................................3 credits
**Special Education Assessment and Interpretation**
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 500 ....................................................................................3 credits
**Scientifically Based Reading Instruction**
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children’s performance in reading and in the language arts are also emphasized.

MTH 506...................................................................................3 credits
**Methods of Teaching Mathematics**
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

MTE 553....................................................................................3 credits
**Instruction and Assessment of English Language Learners**
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 574 ....................................................................................3 credits
**Characteristics of Intellectual/Developmental Disabilities**
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 ....................................................................................3 credits
**Characteristics of Learning Disabilities**
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 .....................................................................................4 credits
**Special Education Student Teaching: Part A**
This course will focus on the design and implementation of the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 ....................................................................................4 credits
**Special Education Student Teaching: Part B**
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
### Master of Arts in Education/Special Education (Utah)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at [http://www.phoenix.edu/programs/maed-spe](http://www.phoenix.edu/programs/maed-spe).

### Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- A minimum of 41 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Students enrolled at a Utah campus must provide verification of a ‘student teaching license’ and submit a copy of the license prior to the student teaching placement.
- Verification of the completion of 100 hours of field experience Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, SPE 546, SPE 594, SPE 595
Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

### Program | Courses Waived
--- | ---
MAED/TED-E & S | MTE 501 MTE 506, MTE 518
MAED/SPE | SPE 578

### Field Experience for the MAED/SPE
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

### Student Teaching for the MAED/SPE
- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

### Additional Academic Program Re-entry Policy for the MAED/SPE
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum, and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

### Course Descriptions for the MAED/SPE

- **Orientation to Teacher Education**
  MTE 507 ..................................................................................... 0 credits
  This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
  COM 516 ..................................................................................... 1 credit

- **Professional Communications**
  SPE 513 ..................................................................................... 3 credits
  This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.
  SPE 578 ..................................................................................... 3 credits

- **Models, Theories and Instructional Strategies for SPE**
  This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
SPE 546 ................................................................. 3 credits
Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

RDG 535 ................................................................. 3 credits
Diagnosis & Remediation of Reading Difficulties
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

MTH 506 ................................................................. 2 credits
Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

SPE 559 ................................................................. 3 credits
Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 ................................................................. 3 credits
Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborative with families with children with intellectual and developmental disabilities.

SPE 545 ................................................................. 3 credits
Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

MTE 506 ................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

SPE 557 ................................................................. 3 credits
Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 575 ................................................................. 3 credits
Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 574 ................................................................. 3 credits
Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
Master of Arts in Education/Special Education
(Nevada)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-person evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE
- A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (cross-categorical [generalist] special education content area specific)
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594 and SPE 595.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, RDG 570, SPE 546, SPE 557, SPE 558, SPE 591, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical (generalist) special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical (generalist) special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical (generalist) special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

MTE 507 .................................................................................... 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 .................................................................................... 3 credits

Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

MTE 523 .................................................................................... 3 credits

Maintaining and Effective Learning Climate

This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 546 ............................................................... 3 credits  
**Special Education Methods**
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.  
MTE 505 ............................................................. 3 credits

SPE 512 ............................................................. 3 credits
**Child and Adolescent Development**
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

SPE 513 ............................................................. 3 credits
**Curriculum Const and Assmnt: Reading and Lang Arts for SPE**
This course focuses on the integration of language arts into curriculum content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

MTH 506 ............................................................. 3 credits
**Instruction and Assessment of English Language Learners**
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multilingualism and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can promote English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 557 ............................................................. 3 credits
**Collaboration with Families of Students with Disabilities**
This course focuses on the interrelationships of varied services for students with disabilities. Emphasis is placed on meeting the academic and social-emotional needs of students with disabilities by working with parents, professionals, and community services to develop collaborative and productive professional relationships.

SPE 558 ............................................................. 3 credits
**Transition Planning for Adolescents with Disabilities**
This course focuses on the role of the special education teacher as he/she transitions adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Students will learn skills and concepts in working with students with special needs, parental involvement, and the community.

SPE 591 ............................................................. 3 credits
**Characteristics of Exceptionalities**
This course examines teaching and managing students with mild disabilities. Special emphasis is placed on learning disabilities, mental retardation, and emotional disabilities. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed.

RDG 570 ............................................................. 4 credits
**Special Education Assessment and Interpretation**
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child's abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

SPE 594 ............................................................. 3 credits
**Methods of Teaching Mathematics**
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

SPE 595 ............................................................. 3 credits
**Special Education Student Teaching: Part A**
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

SPE 596 ............................................................. 3 credits
**Special Education Student Teaching: Part B**
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
Master of Arts in Education/Special Education

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/SPE**

• Completion of a minimum of 46 credits. All but six (6) credits of the major course of study must be completed at the University to meet residency requirements.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.

In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The diploma awarded for this program will read as: Master of Arts in Education Special Education

**Academic Progression Requirements for the MAED/SPE**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam.
• Verification of the completion of 100 hours of field experience Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/SPE**

• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595

• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.

• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the MAED/SPE**

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

• Candidates must pass their state-mandated professional knowledge exam.

• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/SPE**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 578, SPE 594, SPE 595, SPE 594, MTH 575, SPE 576 Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:

• Arizona Provisional SEI Endorsement (SEI/500)
• Arizona Full SEI Endorsement (SEI/500 and SEI/503)
• Arizona English as a Second Language Endorsement
• Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at: https://www.ade.az.gov/oelas/.
Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/SPE**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/SPE**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education setting will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Arizona Teaching Intern Certificate Program**

The requirements for initial issuance of the teaching intern certificate are:

- A Bachelor’s degree or higher from an accredited institution
- A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant’s teaching assignment(s)
- Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
- A valid fingerprint clearance card issued by the Arizona Department of Public Safety

**Additional Academic Program Re-entry Policy for the MAED/SPE**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.
**Course Descriptions for the MAED/SPE**

**Orientation to Teacher Education**
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516 .................................................................1 credit**

**Models, Theories and Instructional Strategies for SPE**
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**SPE 584 .................................................................3 credits**

**Learning Disabilities and Language and Development Disorders**
This course examines the characteristics of students with learning disabilities and language and development disorders. Emphasis is placed on classroom management, instructional strategies, assessment, and augmentative and alternative technologies. Attention is given to the referral process, and available program or service delivery options.

**MTH 575 .................................................................3 credits**

**Mathematics Instruction for Special Education**
This course focuses on the methodology and assessment strategies that enhance learning in mathematics for exceptional learners. Attention is given to an overview of mathematics content and process standards. Emphasis is placed on ranges of abilities and needs, modifications and accommodations, instructional strategies, and classroom management.

**SPE 512 .................................................................3 credits**

**Special Education Assessment and Interpretation**
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

**RDG 570 .................................................................4 credits**

**Curriculum Const and Assmt: Reading and Lang Arts for SPE**
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

**SEI 500 .................................................................3 credits**

**Structured English Immersion**
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

**SEI 503 .................................................................3 credits**

**Advanced Structured English Immersion Methods**
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

**SPE 574 .................................................................3 credits**

**Characteristics of Intellectual/Developmental Disabilities**
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

**SPE 544 .................................................................3 credits**

**Characteristics of Emotional & Behavioral Disorders**
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

**SPE 556 .................................................................3 credits**

**Characteristics of Physical & Health Disabilities**
This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.
SPE 576  ................................................................. 3 credits
Characteristics of Autism Spectrum Disorders
This course provides foundational information about Autism. Students will identify learning preferences, behaviors, and differences within Autism Spectrum Disorders. Emphasis will be placed on intervention techniques using recent technical supports to accommodate and modify instruction.
SPE 594 ........................................................................ 4 credits
Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SPE 595 ........................................................................ 4 credits
Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Tennessee)

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE
- A minimum of 46 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594 and SPE 595.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a “B” or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
Courses Waived

- Candidates must earn a "B" or better in Student Teaching for the MAED/SPE Field Experience for the MAED/SPE.
- Candidates must take Student Teaching Part A & B concurrently.
- The course must be comparable in content and credits to the course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or
master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.**

**Course Descriptions for the MAED/SPE**

MTE 507 ................................................................................................. 0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .................................................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 .................................................................................................. 3 credits

**Orientation to the Exceptional Child**

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 .................................................................................................. 3 credits

**Models, Theories and Instructional Strategies for SPE**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 .................................................................................................. 3 credits

**Special Education Methods**

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 .................................................................................................. 3 credits

**Inclusion Strategies of the Special Educator**

This course examines the roles of special educators when including students with disabilities into general education classrooms.

Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 .................................................................................................. 3 credits

**Special Education Assessment and Interpretation**

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 .................................................................................................. 4 credits

**Curriculum Const and Assmt: Reading and Lang Arts for SPE**

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SEI 500 .................................................................................................. 3 credits

**Structured English Immersion**

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 .................................................................................................. 3 credits

**Advanced Structured English Immersion Methods**

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 574 .................................................................................................. 3 credits

**Characteristics of Intellectual/Developmental Disabilities**

This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 559 .................................................................................................. 3 credits

**Characteristics of Learning Disabilities**

This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclu-
Program Category Requirements for the MAED/ES

Students must select one course from each Elective category selection below to complete the 6 credit requirement:

**Elective One, 3 total credits**
- AET 505................................................................. 3 credits
- Foundations of Adult Education and Training
- AET 510................................................................. 3 credits
- Critical Issues and Trends in Adult Education and Training
- AET 545................................................................. 3 credits
- E-Learning Design Technologies
- AET 555................................................................. 3 credits
- Overview of the Community College

**Elective Two, 3 total credits**
- EDL 500............................................................... 3 credits
- Personal Leadership
- EDL 510................................................................. 3 credits
- Teacher Leadership in a Global Society
- EDL 531................................................................. 3 credits
- Mentoring and Coaching
- EDL 520................................................................. 3 credits
- Instructional Leadership

The University reserves the right to modify the Program Requirements.

Additional Admission Requirements for the MAED/ES

Applicants are expected to meet all admissions requirements:

- Applicants enrolling in this program must meet all admission requirements from their University of Phoenix previous pre-licensure program.
- The University of Phoenix previous pre-licensure programs eligible for admission to the MAED/ES are the following: MAED/TED-E, MAED/TEDEE, MAED/TEDEM, MAED/TEDMS, MAED/TEDMG, MAED/TEDMM, MAED/TEDSM, MAED/TEDSS, MAED/TED-S, MAED/SPE, MAED/ECH
- Note: Some restrictions apply to the MAED/ECH program. Please contact your campus representative for more information.
- Applicants to this program must have completed all coursework from their University of Phoenix previous pre-licensure program with the exception of both Student Teaching courses.
- Students will be eligible for admission to the MAED/ES program provided that the Enrollment Agreement sign date for the previous pre-licensure program is no more than six and a half (6.5) years in the past. Applicants must be able to complete all requirements of the degree within 7 years of the Enrollment Agreement sign date of the previous pre-licensure program.

**Degree Completion Requirements for the MAED/ES**

- Completion of a minimum of 32 credits to earn a university degree.
- Completion of two (2) MAED/ES Elective courses in addition to all completed coursework from the previous pre-licensure program, with the exception of student teaching.
- A minimum grade point average (GPA) of 3.0.
- MAED/ES graduates will not be permitted to return to complete student teaching and receive a degree in any previous pre-licensure program at the University.
- The diploma awarded for this program will read as: Master of Arts in Education

The following Master of Arts in Education/Educational Studies (MAED/ES) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available outside their state. Please contact your campus representative for more information.

The Master of Arts in Education/Educational Studies (MAED/ES) degree is a non-teaching degree designed to facilitate the development of professional knowledge, skills and understanding of the teaching and learning process. The program provides students with information across a variety of education topics with an emphasis in the field of education.

**Note:** Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

---

**Characteristics of Emotional & Behavioral Disorders**

This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 ................................................................. 3 credits

---

**Characteristics of Physical & Health Disabilities**

This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594 ................................................................. 3 credits

---

**Special Education Student Teaching: Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 ................................................................. 4 credits

---

**Special Education Student Teaching: Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

---

**Master of Arts in Education/Educational Studies**

The following Master of Arts in Education/Educational Studies (MAED/ES) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Educational Studies
Residency Requirement for the MAED/ES
Students must meet the established University residency requirement for degree conferral. The University requires that all six (6) Elective credits must be completed in order to meet residency. Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

Course Descriptions for the MAED/ES
AET 505 ....................................................................................3 credits
Foundations of Adult Education and Training
This course focuses on the principles of adult learning and andragogical theory. It addresses the history of adult learning, the characteristics of adult learners, key adult learning theories, and learning processes and styles. Additionally, the course investigates factors that influence adult education and training environments such as motivation, critical thinking skills, and ethics.

AET 510 ....................................................................................3 credits
Critical Issues and Trends in Adult Education and Training
This course explores trends, issues, and innovative programs in adult education and training. It focuses on the demographics of adult learners and on the implications of diversity for instruction. Learners examine political, cultural, social, and ethical issues that impact adult education and training. The course also examines these issues within an historical context.

AET 545 ....................................................................................3 credits
E-Learning Design Technologies
This course provides adult learners the opportunity to design a Web-based e-learning tutorial. The focus is on the importance of planning, principles of good Web-page design, storyboarding, and elements of multimedia. Web-based design standards, as well as appropriate use of Web pages and multimedia, are analyzed. It reviews e-learning software, computer-mediated delivery platforms, and learning management systems.

AET 555 ....................................................................................3 credits
Overview of the Community College
This course provides an overview of the community college. It examines global, national, and local perspectives of the community college. The course also examines the history and development, mission and purpose, functions, governance and organization, and trends and issues of community colleges.

EDL 500 ....................................................................................3 credits
Personal Leadership
This course focuses on developing a personal philosophy of leadership. Students engage in self-assessment activities that reveal how individual values and beliefs directly influence personal leadership. Students examine their own organization and stakeholders who may play a role in their journey in school leadership. Aspects of effective communication are also addressed as students explore contemporary leadership theorists and popular beliefs behind organizations and school systems that will help build a foundation for personal growth.

EDL 510 ....................................................................................3 credits
Teacher Leadership in a Global Society
This course focuses on contemporary theories of school reform and effective teacher leadership in a global society. Performance indicators and dispositions as related to evaluation or decision making are explored. Candidates examine components of effective teacher leadership, including empowering others, building collaborative organizational cultures, and making informed decisions for strategic planning, while creating a vision of change. They also explore how effective leadership provides them with multiple opportunities to critically analyze and apply various leadership styles.

Course content reflects research-based frameworks on leadership and leadership processes that will assist candidates in becoming effective teacher leaders. Candidate participate in a theoretical and applied learning approach, which incorporates research and reflective writing activities, case studies, self-assessment, and collaborative team projects that are closely aligned with the National Board Professional Teaching Standards.

EDL 531 ....................................................................................3 credits
Mentoring and Coaching
This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

EDL 520 ....................................................................................3 credits
Instructional Leadership
This course is designed to provide professional teachers with an introduction to instructional leadership. Candidates utilize an instrument of self-assessment and explore opportunities for leadership with reference to theoretical and practical aspects of school improvement. Candidates create a leadership plan that outlines long-term and short-term goals for continuous development of their leadership skills. In addition, they evaluate instructional practices, determine the effectiveness of teaching within the school curriculum, and propose appropriate strategies to improve instructional performance as outlined in research and theory as "best practices."

Master of Arts in Education/Curriculum and Instruction
The following Master of Arts in Education/Curriculum and Instruction (MAED/CI) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Master of Arts in Education program with a specialization in Curriculum and Instruction is intended to afford P-12 educators the opportunity to enhance their curriculum, instruction, and leadership repertoire by expanding their knowledge of assessment, instructional strategies, integration of technology, professional development, data-driven decision making, and mentoring and coaching. Educators will develop teacher leadership skills by exploring the latest research, trends, and strategies. Graduates will be able to effectively collaborate with all stakeholders and serve their students, colleagues, and communities as ethical leaders committed to excellence.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Programs_MAED-CI.

Courses requiring prerequisites are identified by a ~ symbol following the course number. In most instances, students must complete Foundation courses prior to the Specialization.

The University reserves the right to modify the required course of study. The following courses in the Required Course of Study may not be waived: COM 516

**Additional Admission Requirements for the MAED/CI**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Degree Completion Requirements for the MAED/CI**

- The completion of a minimum of 35 credits.
- A minimum grade point average (GPA) of 3.0.
- The diploma awarded for this program will read as: Master of Arts in Education Curriculum and Instruction

**Residency Requirements and Course Waivers for the MAED/CI**

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 29 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or a foreign institution recognized/authorized by the country’s Ministry of Education.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516

Candidates who successfully complete either the MAED/TED-Elementary or MAED/TED-Secondary program may waive the following courses in the MAED/CI program upon enrolling in the Master of Arts in Education/Curriculum and Instruction program.

Any resident in the state of California who can show verification of the completion of the CTEL (California Teachers of English Learners) requirement may waive the following 6 credits upon admission to the MAED/CI program: CUR 506 and CUR 530.
Course Descriptions for the MAED/CI

COM 516 ................................................................. 1 credit
**Professional Communications**
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

CUR 505................................................................. 3 credits
**Social and Global Perspectives of Teacher Leadership**
Learners in this course have the opportunity to analyze the field of education from a social and global perspective. Learners investigate the implications of the globalization of knowledge on micro and macro educational systems. Multicultural implications, diversity, and the use of technology as a vehicle of pedagogy are explored. Emphasis is on building collaborative organizational communities and empowering teacher leaders to think strategically about school change.

CUR 506................................................................. 3 credits
**Theories and Best Practices of Curriculum and Instruction**
This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.

CUR 515 ................................................................. 3 credits
**Critical Thinking and Innovative Skills**
Learners in this course explore the development and application of critical thinking skills for all academic content areas in elementary, middle school, and high school settings. Participants identify the educational needs of students by exploring current instructional theories, models, and strategies; and state, local, and national standards as they relate to developing critical thinking skills in classroom teaching. Prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

CUR 520................................................................. 3 credits
**Advoating for Learning**
Learners examine dispositions and beliefs regarding teaching and learning for all students. This course includes discussions about supportive and engaging learning environments, along with collaboration with other professionals to develop strategies that promote student learning. Using assessment data, learners will differentiate instruction and employ appropriate strategies for students. Learners will explore advocacy through course materials, practical exercises and engaging group activities.

CUR 525................................................................. 3 credits
**Ethical Issues in Education**
Learners examine the ethical framework and challenges of teachers and teacher leaders in today’s schools. The professional educational leader fosters ethical practices and engages in purposeful ethical decision-making. Learners will ethically respond to social and political issues in education through case studies, field experiences, and other readings and interactions. Ethical leadership and decision-making will be analyzed and discussed to determine how educational leaders will be able to provide support to teachers, students, and other constituents with the purpose of improving current educational practices.

CUR 530 ................................................................. 3 credits
**Assessment and Evaluation Models**
In this course, learners use assessment data through a systematic process to make informed decisions and to evaluate classroom and school-wide learning outcomes. Emphasis is placed on the design, implementation, and analysis of formative assessments while other types of assessments are explored. Learners will use this assessment knowledge to design and analyze a comprehensive assessment plan in a K-12 setting.

CUR 535 ................................................................. 4 credits
**Research for Improved Practice**
Learners examine the process of conducting their own classroom-based or school-based research. The course provides practical experience with action research components in the educational setting for everyday instruction. Learners will use research and data to enhance the instructional environment and to promote lifelong learning.

CUR 540................................................................. 3 credits
**Methods of Coaching in the Instructional Setting**
This course provides an examination of how systemic processes, experiential learning, and coaching strategies positively affect teaching and learning outcomes. Learners examine the interchangeable competencies of coaching and mentoring including roles, fostering relationships, ethical guidelines, building learning communities, effective communication, self-reflective problem solving, conflict resolution, facilitating learning, and accountability. Learners will be equipped with content knowledge, real life application opportunities, tools, and specific strategies that can be applied in both instructional leadership and coaching situations.

CUR 545................................................................. 3 credits
**Using Technology for Teaching and Learning**
Learners evaluate technology use and technology integration for teaching and learning while considering the value of current technologies and tools as part of an interactive experience in a 21st century classroom. Learners will review the considerations and responsibilities of using and maintaining technology in today’s schools, including safety, ethics, resources, and financial needs. Using the knowledge gained in this course, learners will determine how they will advocate and be change-agents for technology integration within their districts, schools, classrooms, and the community.

CUR 550................................................................. 3 credits
**Engaging in Communities of Practice**
Learning communities are a method for the organization and operation of schools that will best meet the academic needs of students. In this course, learners examine the components of developing and maintaining school-based communities of practice to improve student achievement and assist with school improvement planning. Learners will identify resources to help them initiate, plan, and maintain communities of practice.
CUR 555 ................................................................................... 3 credits

Professional Learning for Continuous Improvement
Learners will examine the relationship of professional and personal learning to school, teacher, and student need. Learners will gain an array of effective ideas, strategies, plans, methods, and tools on designing and implementing professional development to promote the intellectual and self-reflective development of teachers, as they collaborate to raise student achievement. Topics include components of high-quality staff development and learning networks.
THIS PAGE WAS LEFT BLANK INTENTIONALLY
The School of Advanced Studies is home to the University’s doctoral programs and represents a community of professionals who want to make a meaningful social contribution to their communities and influence change in their fields. Diverse in program offerings, the School supports advanced learning in business, management, education, health care administration, nursing, higher education administration, and psychology.

**Admission Requirements**

Most doctoral programs have additional admission requirements listed within the program specific information. All applicants to doctoral programs must meet the following admission requirements:

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet one of the following exceptions in order to meet the English Language Proficiency Requirement:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.
- The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:
  - The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
  - The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
  - The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
  - The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
  - The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
  - Applicants who reside in the United States must meet one of the following requirements:
    - Be a legal resident of the United States
    - Have been granted permanent residency
    - Have a valid visa that does not prohibit educational studies
    - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
    - Have been granted asylum or refugee status.
  - Applicants who reside in Canada must meet one of the following requirements:
    - Be a legal resident of Canada
    - Be a landed immigrant
    - Have a valid visa that does not prohibit educational studies
    - A completed and signed graduate application and application fee
  - A signed current Hardware/Software agreement verifying Internet access and multimedia equipped computer.
  - A signed Research Library Access Agreement.
  - A signed Enrollment/Disclosure Agreement.
  - Completion of any state-specific required documents or forms.
  - Applicants who have been expelled from other institutions are not eligible for admission to University of Phoenix.
  - Students who have been expelled from University of Phoenix are not eligible for re-admission to University of Phoenix. No appeals will be accepted.

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

- Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.
• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University. Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records. The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• The student was born before January 1, 1957 (applicable to MMR vaccine only).
• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
• The student has a statement certifying that the student’s religious beliefs prohibit the practice of immunization.

If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.

A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• The student was born before January 1, 1957 (applicable to MMR vaccine only).
• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
• The student has a statement certifying that the student’s religious beliefs prohibit the practice of immunization.

If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.

A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.
Educational Specialist

The following Educational Specialist (Ed.S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Educational Specialist program (Ed.S) will prepare learners to become transformational leaders who will strategically manage and lead complex educational organizations. Graduates will be educational practitioners who demonstrate analytical, critical, and innovative thinking to improve the performance of educational institutions. The Educational Specialist program degree is consistent with the University’s mission to develop the knowledge and skills that will enable learners to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. The program is designed to emphasize leadership and to focus on a specialization in Curriculum and Instruction.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/eds.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the Ed.S**
- Students must satisfy all credits and non-credit bearing activities prior to commencement eligibility.
- A minimum grade point average (GPA) of 3.0.
- Completion of the graduation information packet.
- Students must satisfy all credits and non-credit bearing activities prior to commencement eligibility.

**Degree Requirements for the Ed.S**

Educational Specialist students must meet the following degree requirements:
- A minimum of 31 doctorate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Completion of the graduation information packet.
- Students must satisfy all credits and non-credit bearing activities prior to commencement eligibility.

**Academic Progression Requirements for the Ed.S**

Educational Specialist students are subject to the following academic progression requirements:
- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who miss or must withdraw from a course may complete the course via directed study, if available. All maximum enrollment policies apply. This option will only be available three times (9 credits) and applies only to online courses. However, some courses may not be suitable or available for directed study, and all directed studies must have the approval of the Doctoral Program Chair.
- Students must earn a course grade of "C+" or below must repeat that course. If a student who is not on academic probation earns a "C+" or below, that student must repeat the course and earn a grade of "B-" or better. If a student who is on academic probation earns a "C+" or below, that student must repeat the course again and earn a grade of "B" or better.
- Students who do not maintain a minimum GPA of 3.0 will be put on academic probation.
- Academic probation will last for four consecutive courses during which time students must (1) raise their GPA to a minimum of 3.0 and (2) earn at least a grade of "B" in each course.
• Students will be allowed to have only one incomplete grade on their records at a time. Students will have up to 5 weeks to complete a course once an incomplete has been issued.
• Students in the Doctor of Education in Educational Leadership (EdD) program, due to extenuating personal circumstances, may transfer their credits into the Educational Specialist program.
• Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.

**Residency Requirements for the Ed.S**

Educational Specialist students must meet the following residency requirements:

• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• Students may not waive any of the following courses: COM 705 and EDS 799

In order to waive a course in the EDS program, students must have completed a previous course that meets the following criteria:

• The course must have been completed and transmitted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be a doctoral-level course. Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the Ed.S**

**Communication Strategies**

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

CUR 712 .................................................................3 credits

**Curriculum Theory**

This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorist and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.

EDD 721 .................................................................3 credits

**Planning and Leading Change**

This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counter-resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

EDD 722 ...........................................................................3 credits

**The Legal Context of Education**

This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory issues, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case law and specific pieces of education legislation are reviewed.

EDD 723 ...........................................................................3 credits

**Ethics and Values in Learning Organizations**

The ethics and value-based decisions that learning organizations are faced with are explored in depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values in education, codes of conduct, and codes of ethics are debated.

CUR 721 .................................................................3 credits

**Curriculum Design**

In this course, learners focus on the creation of systemic models of curriculum development, including consideration of schedule, structure, stakeholder involvement, and end products. Learners will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.

CUR 722 ...........................................................................3 credits

**Instructional Models**

This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs and staff development are of special focus.

EDD 731 ...........................................................................3 credits

**The Economics of Education**

The principles and theories of the economics of education are examined. The role that Federal, state, and local government play in the economics of education is explored in depth. Key topics include budget management, grants, financial aid, expenditures and revenues, and the rising cost of education. Economic policy analysis is a focus in this course.

EDD 733 ...........................................................................3 credits

**Evaluation and Assessment Methods**

This course explores the evaluation and assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Accreditation issues, outcomes-based assessment, institutional research, and staff and faculty evaluation are key topics. The influence of leadership style on evaluation and assessment methods also is examined.

CUR 731 ...........................................................................3 credits

**Supervision of Curriculum and Instruction**

This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.
EDS 799 ................................................................. 3 credits

**Educational Specialist Capstone**
The capstone course will require learners to integrate their program of study into an in-depth project that explores and inquires into a contemporary problem within the field of educational administration. The project will be based on library research and/or fieldwork and must demonstrate an approach to addressing the problem from a leadership perspective. Additionally, within this course learners will complete a reflective self-assessment of their learning throughout the program.

**Doctor of Management in Organizational Leadership**

The following Doctor of Management in Organizational Leadership (DM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depends on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Management in Organizational Leadership degree program, offered by University of Phoenix, provides learners who hold a professional Master’s degree a means of exploring their personal readiness to become leaders in their professions or current organizations. Learners gain a mastery of leadership literature and demonstrate their competence by applying what they learn to current organizational environments. They also:

- Recognize leadership as a process promoting action in service of self, organization, community, and the planet.
- Apply leadership models to promote global and social responsibility.
- Critically analyze the validity and value of research.
- Make original scholarly contributions by researching real-world problems and issues in organizational management.
- Critically examine the philosophical foundations of organizational leadership.
- Identify personal leadership philosophies and philosophies of knowledge and their applications to organizations.
- Create learning organizations outside of contemporary paradigms utilizing optimal design theories.
- Create an environment that produces core competent, interculturally sophisticated leaders.
- Create an environment that nurtures effective cross-functional, continually enhanced human capital prepared to meet the demands of strategic organizational success.

The DM program creates a perfect opportunity for mid-career professionals to refresh and recreate their commitment to the tasks required of organizational leaders. Learners will think deeply about the current state of organizations and their leadership; create imaginative, new models from what is learned; and contribute new knowledge to the profession and society.

The DM program has a 68-credit requirement that incorporates both residency and online modalities of instruction. The majority of the program will be delivered in a virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 3-day residency; Year Two requires a 5-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into the preparation of a final research study. Additionally, in the year three residency, learners will apply their knowledge to a comprehensive, collaborative case study. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DM degree is the successful completion and oral defense of a significant, substantial, and independently completed research study. The study provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and to reflect competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the learner’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing them.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dm.

**DM Program Category Requirements**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Doctoral Dissertation
DOC 734 ~ .................................................................3 credits
Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or B courses for either DOC 733A or DOC 734A to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the “A” course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the “B” course.

DOC 733 A and B ~ .................................................................3 credits
Doctoral Dissertation
DOC 734 A and B ~ .................................................................3 credits
Doctoral Project IV

Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. Students who proceed from DOC 733A or DOC 734A to DOC 733B and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DM

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

- Current or a record of past employment in leadership of people or processes is required for admission.

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.
**Academic Progression Requirements for the DM**

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners:
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better.
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better.
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better.
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

**Academic Standing and Scholastic Disqualification for the DM**

Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

- All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
- DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

**Residency Requirements and Course Waivers for the DM**

Students must meet the following residency requirements:

- Completion of physical residencies.
- Five-day residency at the beginning of the program.
- Three-day residency at the beginning of year two.
- Eight-day residency at the beginning of year three.
- If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
- Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  - The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  - The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, LDR 736, PHL 700R, RES 722A, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R.
- The dissertation may not be waived.
Degree Requirements for the DM

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of all residencies.
- Written approval of the dissertation proposal.
- Satisfactory oral defense and written completion of the dissertation.
- The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
- Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
- The diploma awarded for this program will read as: Doctor of Management and will not reflect the specialization. Specializations are reflected on the transcript only.

Course Descriptions for the DM

COM 705 ................................................................. 1 credit

Communication Strategies

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R ................................................................. 0 credits

Doctoral Program Orientation Seminar

SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A ................................................................. 3 credits

Leadership Theory and Practice

This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

PHL 716 ................................................................. 3 credits

Knowledge of Theory and Practice

Upon completion of this course, learners will understand the purpose of inquiry and the wide spectrum of intellectual resources. Learners will clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge. The course provides an overview of the various theoretical frame-works for examining the nature of knowledge and cognition and the applications of knowledge as manifested in various fields of human endeavor. It will orient learners toward identifying their true goals in pursuing the doctoral program, as well as the methods by which they may achieve these goals.

PHL 717 ................................................................. 3 credits

Organizational Theory and Design

Upon completion of this course, learners will be prepared to analyze and select appropriate paradigms to guide organizational research. Additionally, learners will have the ability to apply organizational theories systematically to enrich existing models or develop new models to increase performance and effectiveness.

MGT 716 ................................................................. 3 credits

Management Philosophies

Upon completion of this course, learners will be prepared to employ a research-based approach to investigate the body of knowledge relating to scientific management philosophies from their recorded origins to current day applications. Learners will analyze and evaluate the evolution of management theory within historical timeframes with incremental assessments of the success or failures to optimize resources to attain performance excellence in a customer-centered organization.

RES 711 ................................................................. 3 credits

Fundamental Principles of Sound Research

RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ................................................................. 3 credits

Research Design

This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.
The Impact of Technology on Organizations

Upon completion of this course, learners will be prepared to evaluate the organizational relationship among technology, structure, and behavior. Additionally, learners will be prepared to balance the advantages and disadvantages of integrating technologies.

Organizational Diagnosis and Intervention

Upon completion of this course, learners will be prepared to optimize organizational performance through the judicious implementation of performance interventions utilizing organization theory, organization design, and technology.

Creative and Critical Thinking

This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.
LDR 736 ....................................................................................3 credits

**Architecture of Leadership**

Upon completion of this course, learners will be prepared to develop and maintain a strong orientation to the future and a commitment to improvement and innovation in creating and establishing new business models for attaining organizational goals, setting new short-term and long-term directions, and achieving performance excellence. This course includes an assessment of how leaders address current and future impacts on society in a proactive manner and how leaders establish and accomplish ethical practices in all stakeholder interactions.

RES 725 ....................................................................................3 credits

**Descriptive and Comparative Data Analysis**

This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoetelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ....................................................................................3 credits

**Correlational Methods of Analysis**

This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 ....................................................................................3 credits

**Approaches to Phenomenological Inquiry and Data Analysis**

This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ....................................................................................3 credits

**Qualitative Case Study**

This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ....................................................................................3 credits

**Ethnomethodology and the Study of Culture**

In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ....................................................................................3 credits

**Grounded Theory Methods**

This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ....................................................................................3 credits

**Mixed Methods**

The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.

DOC 722 ...................................................................................3 credits

**Doctoral Seminar II**

This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ....................................................................................3 credits

**Doctoral Dissertation**

This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 ....................................................................................3 credits

**Doctoral Project IV**

This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with
the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 733A ......................................................................................... 3 credits

**Doctoral Dissertation**

This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 733B ......................................................................................... 3 credits

**Doctoral Project IV**

This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 734A ......................................................................................... 3 credits

**Doctoral Project IV**

This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B ......................................................................................... 3 credits

**Doctoral Project IV**

This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctor of Business Administration**

The following Doctor of Business Administration (DBA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Business Administration (DBA) degree program, offered by University of Phoenix, provides learners who hold a professional Master’s degree a means of exploring their personal readiness to become senior leaders in management professions. Learners gain a mastery of business administration literature and demonstrate their competence by applying this knowledge to current business environments.

Graduates with a Doctorate in Business Administration will be able to:

- Identify, research alternatives to, and solve business problems with the highest value-adding solutions.
- Perform systems-based, financially justified analysis and research operations issues and technology-enabled opportunities in a global, market-based economy.
- Demonstrate business knowledge, and be recognized as a business subject expert.
- Formulate and re-design industry rules and standards.
- As the global information economy evolves, organizations are becoming increasingly complex and innovative, with organizational models and practices becoming crucial for successfully addressing this complexity. Consequently, leadership in this environment requires higher, more sophisticated levels of knowledge and skills. The DBA program is designed to serve this need by providing doctoral-level education to professional practitioners in business and management.

The DBA program has a 68-credit requirement that incorporates both residency and online modalities of instruction. The majority of the program will be delivered in a virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework. Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both work days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into the preparation of a final research study. Additionally, in the Year Three residency, learners will apply their knowledge to a comprehensive, collaborative case study. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DBA degree is the successful completion and oral defense of a significant, substantial, and independently completed research study that adds new information to the body of business management knowledge. The study provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and to reflect competence in
applying learning to actual organizational issues. To ensure the quality of this effort, the program's curriculum is designed to develop the learner's ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dba.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**DBA Program Category Requirements**

**Doctoral Foundations, 4 total credits**
- COM 705 ~ ................................................................. 1 credit
- Communication Strategies
- SEM 700R ................................................................. 0 credits
- Doctoral Program Orientation Seminar
- LDR 711A ~ ............................................................. 3 credits
- Leadership Theory and Practice

**Foundations in Business Administration, 12 total credits**
- FIN 711 ................................................................. 3 credits
- Financial Measures of Value Added
- ORG 711 ~ ............................................................. 3 credits
- 21st Century Issues in Organizational Behavior I
- MGT 711 ~ ............................................................. 3 credits
- Strategic Opportunities in an Internet-based Global Economy
- MKT 711 ~ ............................................................. 3 credits
- Marketing and Managing the Customer Relationship

**Research Foundations, 6 total credits**
- RES 711 ~ ............................................................. 3 credits
- Fundamental Principles of Sound Research
- RES 722A ~ ........................................................... 3 credits
- Research Design

**Advanced Research Design, 3 total credits**
- RES 723 ~ ............................................................. 3 credits
- Advanced Statistical Research Methods and Design
- RES 724 ~ ............................................................. 3 credits
- Qualitative Methods and Design

**Issues in Advanced Business Leadership, 12 total credits**
- LDR 721 ................................................................. 3 credits
- Ethical Leadership and the Legal Landscape
- BUS 721 ~ ............................................................. 3 credits
- Issues in Optimizing Operations
- MGT 721 ~ ............................................................. 3 credits
- Managing the Risks in a Global Environment
- ORG 721 ~ ............................................................. 3 credits
- 21st Century Issues in Organizational Behavior II

**Doctoral Residencies, 10 total credits**
- PHL 700R ~ ............................................................. 3 credits
- Creative and Critical Thinking
- DOC 721R ~ .......................................................... 2 credits
- Doctoral Seminar I
- DOC 731R ~ .......................................................... 3 credits
- Collaborative Case Study
- DOC 732R ~ .......................................................... 2 credits
- Doctoral Seminar III
- DOC 740R ............................................................. 0 credits
- Annual Renewal Residency

**Advanced Inquiry in Business Analysis and Leadership, 9 total credits**
- LDR 731 ................................................................. 3 credits
- Contemporary Issues in Leadership
- BUS 731 ................................................................. 3 credits
- Transforming the Business I
- BUS 732 ................................................................. 3 credits
- Transforming the Business II

**Advanced Research Analysis, 3 total credits**
- RES 725 ................................................................. 3 credits
- Descriptive and Comparative Data Analysis
- RES 726 ................................................................. 3 credits
- Correlational Methods of Analysis
- RES 727 ................................................................. 3 credits
- Approaches to Phenomenological Inquiry and Data Analysis
- RES 728 ................................................................. 3 credits
- Grounded Theory Methods
- RES 729 ................................................................. 3 credits
- Mixed Methods

**Dissertation, 9 total credits**
- DOC 722 ................................................................. 3 credits
- Doctoral Seminar II
- DOC 733 ................................................................. 3 credits
- Doctoral Dissertation
- DOC 734 ................................................................. 3 credits
- Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

**Dissertation**
- DOC 733 ................................................................. 3 credits
- Doctoral Dissertation
- DOC 734 ................................................................. 3 credits
- Doctoral Project IV
Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DBA

All applicants are expected to meet the following admissions requirements:

- A graduate degree in business, management or business administration from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Students who do not have a graduate degree in either business, management or administration may be admitted if they meet all other requirements for admission and have official transcripts listing three (3) graduate credits in each of the following subjects from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent recognized foreign institution:
  - Finance for Managerial Decision Making
  - Human Relations and Organizational Behavior
  - Marketing Management
  - Strategy Formulation and Implementation
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Degree Requirements for the DBA

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of all residencies.
- Written approval of the dissertation proposal.
- Satisfactory oral defense and written completion of the dissertation.

The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.

- Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
- The diploma awarded for this program will read as: Doctor of Business Administration.

Academic Progression for the DBA

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.

Students may have only one incomplete grade on their records at a time.

- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 721R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)
- Quality final Institutional review of dissertation during DOC 734.
• Editorial Review after DOC 734 and prior to graduation.
• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
• Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Minimum Grade Requirements for the DBA
• Students must earn a grade of “B” or better in COM 705 Communication Strategies. Students who earn less than a “B” will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of “B-” or better. Students who earn a grade lower than “B-” must repeat the course until the minimum grade requirement is met.
• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.0 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Residency Requirements and Course Waivers for the DBA
Students must meet the following residency requirements:
• Completion of physical residencies:
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: BUS 731, BUS 732, COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
• The dissertation may not be waived.

Course Descriptions for the DBA
COM 705 ....................................................................................1 credit

Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R ................................................................................0 credits

Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A ................................................................................3 credits

Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

FIN 711 .....................................................................................3 credits

Financial Measures of Value Added
This course explores and evaluates research on how businesses measure and could modify their measure of financial value in order to improve decision making. Topics include treatment of non-traditional balance sheet items (e.g. knowledge capital), mergers and acquisitions and how to predict success, conditions for successful joint ventures, marketplace valuation of equity, and small to mid-size business’ access to contemporary capital markets.

ORG 711 .....................................................................................3 credits

21st Century Issues in Organizational Behavior I
This course evaluates research on issues that organizations face in optimizing their performance. Topics include how an organization “selects” the form that best fits its mission and culture, organizational learning, and inhibitors to performance.

MGT 711 .....................................................................................3 credits

Strategic Opportunities in an Internet-Based Global Economy
This course evaluates models for creating economically viable global businesses using the technology of the Internet. Topics include assessing successful e-business models and the macroeco-
nomic environment that contributes to the success of business strategy.

MKT 711 ................................................................................... 3 credits

Marketing and Managing the Customer Relationship
This course evaluates how decision makers manage their relationship with their customers and apply their marketing knowledge to the development of products and services. Topics include the prediction of demand in global markets, managing product development, and the role of Internet-based customer information.

RES 711 ................................................................................... 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, qualitative and quantitative research basics, and critical issues in conducting research.

RES 722A ................................................................................ 3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ................................................................................... 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ................................................................................... 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

LDR 721 ................................................................................... 3 credits

Ethical Leadership and the Legal Landscape
This course evaluates research on how legal environments in the global economy shape decision making and the ethical issues that emerge from disparate legal systems and practices. This course will specifically addresses practices legal in a subsidiary country but in violation of the corporation’s ethical standards.

BUS 721 ................................................................................... 3 credits

Issues in Optimizing Operations
This course evaluates research on how businesses adopt approaches to optimizing their operations and the conditions under which these lead to success. Topics include how an organization adopts best practices, the predictors for a successful quality management program, and the role of project management.

MGT 721 ................................................................................... 3 credits

Managing the Risks in a Global Environment
This course evaluates alternative practices to manage risk in a global environment. Topics include measuring risk (economics, financial, political, etc.), creating tools to predict where to invest internationally, financial instruments of global investment, and techniques to mitigate risk.

ORG 721 ................................................................................... 3 credits

21st Century Issues in Organizational Behavior II
This course continues research on issues that organizations face in optimizing their performance. Topics include how organizations develop a culture and set of political rules that define behavior within it, virtual teams, translating culture within a global organization, and conditions that predict success or failure for an organization that expands its mission.

PHL 700R ................................................................................ 3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ................................................................................ 2 credits

Doctoral Seminar I
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ................................................................................ 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732R ................................................................................ 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ................................................................................ 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session
is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.

LDR 731 ...............................................................................................................3 credits

**Contemporary Issues in Leadership**

This course explores the successes and controversial issues surrounding how and why senior leaders set and deploy organizational values, short- and long-term directions, and performance expectations that create a balanced value. The focus is on business results that encompass organizational learning, stakeholder satisfaction, overall budgetary, financial, and market performance.

BUS 731 ...............................................................................................................3 credits

**Transforming the Business I**

This course requires the learner to integrate all previous learning by identifying and solving organizational problems and recommending new business models that will increase organizational performance. The outcome of this course will be delivered in Transforming the Business II.

BUS 732 ...............................................................................................................3 credits

**Transforming the Business II**

This course requires the learner to integrate all previous learning by identifying and solving organizational problems and recommending new business models that will increase organizational performance. The outcome of this course will be a continuation of Transforming the Business I.

RES725 ...............................................................................................................3 credits

**Descriptive and Comparative Data Analysis**

This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoetting's T, MANOVA and related techniques. Depending on the learners' needs other approaches may be covered.

RES 726 ...............................................................................................................3 credits

**Correlational Methods of Analysis**

This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners' needs, other approaches may be covered.

RES 727 ...............................................................................................................3 credits

**Approaches to Phenomenological Inquiry and Data Analysis**

This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ...............................................................................................................3 credits

**Qualitative Case Study**

This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ...............................................................................................................3 credits

**Ethnomethodology and the Study of Culture**

In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on "thick description" as a critical mode of representation.

RES 745 ...............................................................................................................3 credits

**Grounded Theory Methods**

This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ...............................................................................................................3 credits

**Mixed Methods**

The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

DOC 722 ...............................................................................................................3 credits

**Doctoral Seminar II**

This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.
**Doctoral Dissertation**

This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Project IV**

This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Dissertation**

This course is a continuation of DOC 734 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

**Doctoral Project IV**

This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctor of Education in Educational Leadership**

The following Doctor of Education in Educational Leadership (Ed.D.) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depends on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Education in Educational Leadership (Ed.D.) will prepare learners to become transformational leaders who will strategically manage and lead complex educational organizations. Graduates will be educational practitioners who demonstrate analytical, critical, and innovative thinking to improve the performance of educational institutions.

The Doctor of Education in Educational Leadership degree is consistent with the University's mission to educate working adults to develop the knowledge and skills that will enable them to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. The program is designed to emphasize leadership and to focus on applied research that improves educational environments.

**Program Goals**

Graduates of the Doctor of Education in Educational Leadership program will be able to:
- Utilize and conduct research to evaluate and improve instructional and organizational processes.
- Provide instructional leadership to support and enhance the educational process.
- Incorporate knowledge of social, historical, and political theories and processes in educational decision making.
- Lead and manage the educational organization through transformation inherent in contemporary society.

At no time in history has the need for quality education been greater. At the same time, educators face challenges unlike those faced by their predecessors. They must facilitate learning in culturally diverse classrooms; prepare students for jobs in a global, information-based economy; manage their classrooms, schools, and systems effectively and efficiently in the face of severe funding pressures; and produce all the other outcomes traditionally expected from educational institutions. It is clear that as the education system works its way through this period of radical change, leaders are needed who are capable of dealing with complexity in creative ways. Professional practice in this environment will require more sophisticated educational preparation for greater numbers of practitioners.

The Ed.D. program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year pro-
gram. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Additionally, in the Year Three residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ed.D degree is the successful completion and oral defense of a significant, substantial, and independently completed doctoral dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and express their competence in applying learning to actual educational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd.

**EdD Program Category Requirements**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Doctoral Foundations, 4 total credits**

- COM 705 ~ ..............................................................................1 credit
- Communication Strategies
- SEM 700R ..............................................................................0 credits
- Doctoral Program Orientation Seminar
- LDR 711A ~ .............................................................................3 credits
- Leadership Theory and Practice

**Foundations in Education, 12 total credits**

- EDD 711 ~ .............................................................................3 credits
  Social Contexts and Contemporary Issues
- EDD 712 ~ .............................................................................3 credits
  Leadership in Contemporary Organizations
- EDD 713 ~ .............................................................................3 credits
  Lifelong Learning: Leadership in the Educational Continuum
- EDD 714 ~ .............................................................................3 credits
  Comparative Models of Educational Environments

**Research Foundations, 6 total credits**

  Doctoral Seminar II
Additional Admission Requirements for the EdD

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Academic Progression Requirements for the EdD

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

DOC 733 A and B~ ................................................................. 3 credits

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the EdD

No additional admission requirements for the EdD.

Academic Progression Requirements for the EdD

Students are subject to the following academic progression requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree earned at a recognized foreign institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.
- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

DOC 733 A and B~ ................................................................. 3 credits
Academic Standing and Minimum Grade Requirements for the EdD

• Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.

• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Degree Requirements for the EdD

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.

The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by the Doctoral Program Chair.

• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.

The diploma awarded for this program will read as: Doctor of Education.

Residency Requirements and Course Waivers for the EdD

Students must meet the following residency requirements:

• Completion of physical residencies:
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
  • If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.

• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:

• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.

• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R

• The dissertation may not be waived.

Course Descriptions for the EdD

COM 705 .............................................................................1 credit

Communication Strategies

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R .............................................................................0 credits

Doctoral Program Orientation Seminar

SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A .............................................................................3 credits

Leadership Theory and Practice

This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

EDD 711 .............................................................................3 credits

Social Contexts and Contemporary Issues

This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.

766
EDD 712 ................................................................. 3 credits
Leadership in Contemporary Organizations
This course explores organization theory, culture, and change. The influence of leadership on the organization is examined in depth. The different functions of administration, management, and leadership are of focus.

EDD 713 ................................................................. 3 credits
Lifelong Learning: Leadership in the Educational Continuum
The concept of lifelong learning and the impact it has on educational providers is the focus of this course. Theories of learning, specifically adult learning, are examined. The role that P-12 education, higher education, corporate education/training, and the military play in instilling a belief in lifelong learning is of focus.

EDD 714 ................................................................. 3 credits
Comparative Models of Educational Environments
This course examines the various models of educational environments available to students today. Discussion topics range from the wealth of options available for P-12 school students to adult learners to alternative learning environments. Specific focus is placed on distance education modalities for learners of all ages.

RES 711 ................................................................. 3 credits
Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A .............................................................. 3 credits
Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ................................................................. 3 credits
Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ................................................................. 3 credits
Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students' understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

EDD 721 ................................................................. 3 credits
Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

EDD 722 ................................................................. 3 credits
The Legal Context of Education
This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory issues, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case law and specific pieces of education legislation are reviewed.

EDD 723 ................................................................. 3 credits
Ethics and Values in Learning Organizations
The ethics and value-based decisions that learning organizations are faced with are explored in depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values education, codes of conduct, and codes of ethics are debated.

EDD 724 ................................................................. 3 credits
Instructional Leadership
This course analyzes the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating staff and students, and creating dynamic learning environments. The importance of faculty development and their involvement in research and public service are of special focus.

PHL 700R ............................................................ 3 credits
Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one's assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ............................................................ 2 credits
Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ............................................................ 3 credits
Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learners on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory.
and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

**Doctoral Seminar III**
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

**RES 726 .................................................................3 credits**

**Correlational Methods of Analysis**
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations, and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

**RES 727 ........................................................................3 credits**

**Approaches to Phenomenological Inquiry and Data Analysis**
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

**RES 728 ........................................................................3 credits**

**Qualitative Case Study**
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

**RES 729 ........................................................................3 credits**

**Grounded Theory Methods**
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

**RES 745 ........................................................................3 credits**

**Mixed Methods**
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing, and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-
method research throughout and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches—and their blending—to actually design and conduct meaningful doctoral level research.

DOC 722 .......................................................................................... 3 credits

**Doctoral Seminar II**

This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 .......................................................................................... 3 credits

**Doctoral Dissertation**

This is a mentor-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 .......................................................................................... 3 credits

**Doctoral Project IV**

This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734A ......................................................................................... 3 credits

**Doctoral Project IV**

This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B ......................................................................................... 3 credits

**Doctor of Education in Educational Leadership/ Curriculum and Instruction**

The following Doctor of Education in Educational Leadership/ Curriculum and Instruction (EdD/CI) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Education in Educational Leadership with a specialization in Curriculum and Instruction will prepare learners to become instructional leaders who will strategically manage and lead processes related to curriculum, instruction, and assessment. Graduates will demonstrate both practical and scholarly knowledge in their use of analytical, critical, and innovative thinking to improve the performance of educational institutions.

Historically, education has been a field of constant evolution and debate, with the pull of philosophical, cultural, and political influences felt throughout the industry. As such, contemporary educators face challenges unlike those faced by their predecessors: Educational leaders must design and facilitate learning in culturally diverse classrooms; manage the needs of multiple stakeholders; develop their classrooms, schools, and systems effectively and efficiently in the face of severe funding pressures; address the demands of regulatory bodies; and meet the outcomes established by the greater educational community.

As the education system undergoes these radical changes, there has been a drastic increase in the need for leaders who are capable of designing innovative curricular models in their institutions and of consistently improving their students’ outcomes. The Doctor of Education in Educational Leadership with a specialization in Cur-
curriculum and Instruction is offered by the University of Phoenix to enable leaders to affect these high levels of performance through applied scholarship, rigorous analysis, and comprehensive evaluation methods.

The Curriculum and Instruction specialization degree is consistent with the University’s mission to educate working adults to achieve their professional goals and to improve the quality of education in their communities. The program is designed to emphasize curricular leadership and to focus on applied research that improves instruction and educational outcomes.

**Program Goals**

Upon completion of all program requirements of the Doctor of Education in Educational Leadership with a specialization in Curriculum and Instruction degree, learners will be able to:

- Evaluate and improve instructional and organizational processes through research-based decisions.
- Support and enhance the educational process through instructional leadership.
- Influence policy decisions within educational settings with knowledge of social theories, historical perspectives, and political issues.
- Design, develop, and implement curriculum, instructional strategies, and assessment tools to enhance learning.
- Create and implement sound curricular models by synthesizing research, theory, and experience.

**Program Structure**

The EdD/CI program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the Third Year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the EdD/CI degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of educational leadership knowledge.

The dissertation provides the learner an opportunity to demonstrate mastery of germinal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program's curriculum is designed to develop the student's ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues. Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd-ci.

**EdD/CI Program Category Requirements**

Courses requiring prerequisites are identified by a ~ symbol following the course name.

**Doctoral Foundations, 4 total credits**

- COM 705 .................................................................1 credit
- Communication Strategies
- SEM 700R ...............................................................0 credits
- Doctoral Program Orientation Seminar
- LDR 711A ..............................................................3 credits

**Leadership Theory and Practice**

**Foundations of Curriculum and Instruction in Education, 12 total credits**

- EDD 711 ..............................................................3 credits
- Social Contexts and Contemporary Issues
- EDD 724 ..............................................................3 credits
- Instructional Leadership
- CUR 711 ..............................................................3 credits
- Developmental and Learning Theories
- CUR 712 ..............................................................3 credits
- Curriculum Theory

**Research Foundations, 6 total credits**

- RES 711 ..............................................................3 credits
- Fundamental Principles of Sound Research
- RES 722A ............................................................3 credits
- Research Design

**Advanced Research Design, 3 total credits**

- RES 723 ..............................................................3 credits
- Advanced Statistical Research Methods and Design
- RES 724 ..............................................................3 credits
- Qualitative Methods and Design

**Principles and Practices in Curriculum and Instruction, 12 total credits**

- EDD 721 ..............................................................3 credits
- Planning and Leading Change
- CUR 721 ..............................................................3 credits
- Curriculum Design
- CUR 722 ..............................................................3 credits
- Instructional Models
- CUR 723 ..............................................................3 credits
- Assessment of Student Learning

**Doctoral Residencies, 10 total credits**

- PHL 700R ..............................................................3 credits
- Creative and Critical Thinking
- DOC 721R ............................................................2 credits
- Doctoral Seminar I
- DOC 731R ............................................................3 credits
- Collaborative Case Study
**Advanced Research Analysis, 3 total credits**

- DOC 732R ~ ................................................................. 2 credits
- Doctoral Seminar III
- DOC 740R ........................................................................ 0 credits
- Annual Renewal Residency

**Advanced Inquiry in Curriculum Leadership, 9 total credits**

- CUR 731 ~ ................................................................. 3 credits
- Supervision of Curriculum and Instruction
- EDD 732 ~ ................................................................. 3 credits
- Contemporary Policy Analysis and Development
- CUR 732 ~ ................................................................. 3 credits
- Program Evaluation

**Advanced Research Analysis, 3 total credits**

- RES 725 ~ ................................................................. 3 credits
- Descriptive and Comparative Data Analysis
- RES 726 ~ ................................................................. 3 credits
- Correlational Methods of Analysis
- RES 727 ~ ................................................................. 3 credits
- Approaches to Phenomenological Inquiry and Data Analysis
- RES 728 ~ ................................................................. 3 credits
- Qualitative Case Study
- RES 729 ~ ................................................................. 3 credits
- Ethnomethodology and the Study of Culture
- RES 745 ~ ................................................................. 3 credits
- Grounded Theory Methods
- RES 746 ~ ................................................................. 3 credits
- Mixed Methods

**Dissertation, 9 total credits**

- DOC 722 ~ ................................................................. 3 credits
- Doctoral Seminar II
- DOC 733 ~ ................................................................. 3 credits
- Doctoral Dissertation
- DOC 734 ~ ................................................................. 3 credits
- Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

**Additional Admission Requirements for the EdD/CI**

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

**Academic Progression Requirements for the EdD/CI**

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.
- Students may have only one incomplete grade on their records at a time.
Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.

Successful completion of DOC 731R which serves as a qualifying examination course in the program.

Quality review of dissertation proposal to advance beyond DOC 732R.

Institutional Review Board approval prior to enrollment in DOC 734.

Committee literature review prior to enrollment in DOC 734.

Quality final Institutional review of dissertation during DOC 734.

Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)

Quality final Institutional review of dissertation during DOC 734.

Editorial Review after DOC 734 and prior to graduation.

Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.

Students who would like to repeat DOC 740R may repeat the course.

**Academic Standing and Minimum Grade Requirements for the EdD/CI**

- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
- DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

**Degree Requirements for the EdD/CI**

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of all residencies.
- Written approval of the dissertation proposal.
- Satisfactory oral defense and written completion of the dissertation.
- The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
- Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
- The diploma awarded for this program will read as: Doctor of Education and will not reflect the specialization. Specializations are reflected on the transcript only.

**Residency Requirements and Course Waivers for the EdD/CI**

Students must meet the following residency requirements:

- Completion of physical residencies.
  - Five-day residency at the beginning of the program.
  - Three-day residency at the beginning of year two.
  - Eight-day residency at the beginning of year three.
  - If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
- Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  - The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  - The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  - The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
- The dissertation may not be waived.

**Course Descriptions for the EdD/CI**

**COM 705**

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assign-
This course analyzes the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating staff and students, and creating dynamic learning environments. The importance of faculty development and their involvement in research and public service are of special focus.

CUR 711 ................................................................. 3 credits

Developmental and Learning Theories
Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.

CUR 712 ................................................................. 3 credits

Curriculum Theory
This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorist and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.

RES 711 ................................................................. 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ................................................................. 3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ................................................................. 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ................................................................. 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

RES 722A ................................................................. 3 credits

Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counter-resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

RES 721 ................................................................. 3 credits

Curriculum Design
In this course, learners focus on the creation of systemic models of curriculum development, including consideration of schedule, structure, stakeholder involvement, and end products. Learners will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.

CUR 722 ................................................................. 3 credits

Instructional Models
This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs and staff development are of special focus.

CUR 723 ................................................................. 3 credits

Assessment of Student Learning
This course explores student assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Among the key topics are outcomes-based assessment - such as standardized achievement and criterion assessment, as well as the influence of leadership styles on these outcomes.
Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one's assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ................................................................. 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner's dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization's environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 732R ................................................................. 2 credits

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.

CUR 731 ................................................................. 3 credits

Supervision of Curriculum and Instruction
This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.

EDD 732 ................................................................. 3 credits

Contemporary Policy Analysis and Development
This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

CUR 732 ................................................................. 3 credits

Program Evaluation
This course explores program evaluation models and methods utilized in learning organizations. Both formative and summative methods are discussed, and their merits and faults are debated. Accreditation issues are among the key topics, and the influence of leadership style on program evaluation methods is examined.

RES 725 ................................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ................................................................. 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 ................................................................. 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ................................................................. 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ................................................................. 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection
methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ................................................................. 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ................................................................. 3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches -- and their blending -- to actually design and conduct meaningful doctoral level research.

DOC 722 ................................................................. 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ................................................................. 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 734 ................................................................. 3 credits

Doctoral Project IV
This course is a continuation of DOC 734 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734A ............................................................. 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B ............................................................. 3 credits

Doctoral Project IV
This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734A ............................................................. 3 credits

Doctoral Project IV
This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
Doctor of Management in Organizational Leadership with a Specialization in Information Systems and Technology

The following Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology (DM/IST) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The mission of the Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology (DM/IST) is to enable professionals from any industry to understand and evaluate the scope and impact of information systems and technology (IST) from organizational, industry-wide, and global perspectives. The DM/IST curriculum lays a foundation of knowledge in critical thinking, leadership, and the application of IST content areas. Learners integrate this knowledge with their professional experiences and doctoral-level research to create innovative, positive, and practical contributions to the body of IST knowledge. Graduates will be able to influence their organization and environment positively with transformational IST leadership practices.

This doctoral program in IST management incorporates coursework in fundamental management, organizational, and leadership concepts to engender the development of IST leadership perspectives. As such, learners with a professional leadership background in any discipline will be able to add their unique perspective to the study of the context, breadth, and processes of IST management.

Program Goals
Upon completion of all program requirements of the Doctorate in Management in Organizational Leadership with a specialization in Information Systems degree, learners will be able to:

- Conduct research as a foundation for executive action.
- Demonstrate innovation and creativity in developing new IT models to explain, forecast, support, and improve the strategic, tactical, and operational performance of organizations.
- Integrate and align IT initiatives with organizational strategy.
- Lead the IT decision-making process toward positive outcomes.
- Provide leadership to improve the overall performance of the organization in its industry, community, and global environment.

Program Structure
The DM/IST program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; and Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the Third Year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DM/IST degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of educational leadership knowledge.

The dissertation provides the learner an opportunity to demonstrate mastery of seminal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dm-ist.

DOC 724 ~ ................................................................. 3 credits

Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 723 and/or DOC 724 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

DOC 733 A and B~ .................................................... 3 credits

Doctoral Project IV

Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DM/IST

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in leadership of people or processes is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Academic Progression Requirements for the DM/IST

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
• Students may concurrently enroll in DOC 740R with any of
the dissertation courses (DOC 733 A/B or DOC 734 A/B).
• All doctoral (including reentry students) students will be
required to demonstrate a foundation of educational exposure
to research, statistics or quantitative reasoning in one of the
following manners.
• Applicable undergraduate University of Phoenix
coursework completed within 10 years with a grade of C or
better
• Applicable graduate University of Phoenix coursework
completed within 15 years with a grade of C or better
• An official transcript reflecting 3 credits of undergraduate or
comparable coursework in research, statistics, or
quantitative reasoning completed within 10 years with a
grade of C or better.
• An official transcript reflecting 3 credits of graduate
coursework in research, statistics, or quantitative reasoning
completed within 15 years with a grade of C or better
• A minimum score of at least 149 for quantitative sections and
a 4.25 on the analytical section of the GRE completed within
the last 10 years.
• A passing score on the statistics entrance assessment. The
assessment may only be taken twice.
• Students may have only one incomplete grade on their records
at a time.
• Students must submit and receive written approval of the
dissertation concept paper as a completion requirement for
DOC 721R Doctoral Seminar I.
• Successful completion of DOC 731R which serves as a qualifying
evaluation course in the program.
• Quality review of dissertation proposal to advance beyond DOC
732R.
• An official transcript reflecting 3 credits of graduate
coursework completed within 10 years with a grade of C or better
• Students who would like to repeat DOC 740R may repeat the
course.

Academic Standing and Scholastic Disqualification for the DM/IST

• Students must earn a grade of "B" or better in COM 705
Communication Strategies. Students who earn less than a "B"
will be scholastically disqualified and must repeat the course.
COM 705 may be repeated one time. Students who fail to meet
the minimum grade requirement after the second attempt will
be scholastically suspended and will not be able to continue in the
program.
• All credit-bearing courses, with the exception of COM 705, must
be completed with a grade of "B" or better. Students who earn a
grade lower than "B-" must repeat the course until the minimum
grade requirement is met.
• DOC 721R Doctoral Seminar I may only be repeated one time.
Students who fail to meet the minimum grade requirement after
the second attempt will be scholastically suspended and will not
be able to continue in the program.
• Students who do not meet minimum grade requirements and
maintain a minimum GPA of 3.00 will be placed on academic
probation (AP) and will be subject to the University academic
probation policy.

Residency Requirements and Course Waivers for the DM/IST

Students must meet the following residency requirements:
• Completion of physical residencies.
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
  • If a student’s dissertation has not been completed and
approved by the dean within 12 months of achieving
 candidacy, he or she must attend DOC 740R, a non-credit,
three-day weekend residency course. Candidacy begins
when a student has completed all coursework except DOC
733 and DOC 734.
• Students may waive a maximum of 9 credits from their required
course of study on the basis of regionally or approved nationally
accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the
required course of study, students must have completed a
previous course that meets the following criteria:
  • The course must have been completed and transcripted from a
regionally, approved nationally, or provincially accredited
college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten
(10) years from current program enrollment agreement sign
date with a grade of “B” (3.0) or better.
  • The course must be comparable in content and credits to the
University course it is replacing and must be an equivalent
level or higher level course (i.e. graduate level coursework
may be used to waive graduate or undergraduate
coursework). Course descriptions must be included with the
course waiver form in order for the Office of Admissions and
Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R,
DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC
740R, IST 710, IST 721, IST 722, IST 723, IST 724, IST 731, IST 732,
IST 733, PHL 700R, RES 722A, RES 723, RES 724, RES 725, RES
726, RES 727, RES 728, RES 729, RES 745, SEM 700R
• The dissertation may not be waived.

Degree Requirements for the DM/IST

Students must meet the following degree requirements within the
six (6) year program completion deadline established by the Uni-
versity:
• A minimum of 68 doctorate credits
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the
dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Management and will not reflect the specialization. Specializations are reflected on the transcript only.

Course Descriptions for the DM/IST

COM 705 ................................................................. 1 credit
Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment. SEM 700R .......................................................... 0 credits
Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building. LDR 711A ......................................................... 3 credits
Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations. IST 710 .............................................................. 3 credits
Foundations of Information Systems Management
This course surveys the major content areas of information systems management that will be examined at various organizational levels of the Information Systems and Technology Specialization of the Doctor of Management program. The major content areas (IST domains) to be surveyed include information technology management, networking, Web, database, programming, and systems development. Upon completion of this course, the learners will be prepared to analyze, define, and research the unique management considerations of each domain within various organization levels. PHL 717 ................................................................. 3 credits
Constructing Meaning
The postmodern world is an amalgam of our beliefs, physical sensory interpretations, psychological projections of our wants/needs/fantasies, a cultural interpretation of existence/meaning/purpose, a moral sense of right and wrong, a religious or spiritual interpretation of responsibility, and the sense of the relationship we have to each other. Learners explore the concept of postmodernism through the writings of some of the classic thinkers. Learners will also undertake an examination of the way they personally construct their world - what it means and what is meaningful at a personal level, with some insight into why that is the case for them. This information will be explored and learners will use this to inform their leadership behavior and explain their style. ORG 716 ................................................................. 3 credits
Organizational Theory and Design
Upon completion of this course, learners will be prepared to analyze and select appropriate paradigms to guide organizational research. Additionally, learners will have the ability to apply organizational theories systematically to enrich existing models or develop new models to increase performance and effectiveness. MGT 716 ................................................................. 3 credits
Management Philosophies
Upon completion of this course, learners will be prepared to employ a research-based approach to investigate the body of knowledge relating to scientific management philosophies from their recorded origins to current day applications. Learners will analyze and evaluate the evolution of management theory within historical timeframes with incremental assessments of the success or failures to optimize resources to attain performance excellence in a customer-centered organization. RES 711 ................................................................. 3 credits
Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research. RES 722A ................................................................. 3 credits
Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study. RES 723 ................................................................. 3 credits
Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.
RES 724 ..............................................................3 credits
Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.
IST 721 ................................................................3 credits

Knowledge Worker Information Systems
In this course, the learner will research and evaluate the information systems and technology tools necessary to support the individual knowledge worker in today’s environment. This analysis of the systems and tools will be conducted from the viewpoint of the program domains and how the individual worker must be supported to create a productive and efficient environment. The scope of this course will include hardware and software product considerations for management.
IST 722 ................................................................3 credits

Information Technology for Teams
Learners in this course will further evaluate the application of the domains studied in IST/721 and how those domains are applied in a team setting. The application of the program domains will be examined in the context of support necessary to implement virtual organizational team models, ranging from co-located teams to geographically distributed virtual teams. Upon completion of this course, the learner will be prepared to define and analyze issues related to the management and support of information technology necessary for organizational teams’ operations.
IST 723 ................................................................3 credits

Departmental Information Systems
This course will continue the analysis of the application of the domains used by individuals and teams studied in IST/721 and IST/722. The learner will evaluate the application of the program domains to departmental operations and strategy. The learner will research and evaluate information systems support techniques, both internal and external to the departmental interfaces.
IST 724 ................................................................3 credits

Organizational Information Systems Management
This course will build upon the considerations examined in the prior IST courses. Upon completion of this course, the learner will be prepared to evaluate and develop integrated strategies for the implementation of the IST domains within an organization.
PHL 700R .........................................................3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.
DOC 721R ..........................................................2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

Partnership and Industry Information Systems
This course extends the learning from previous intra-company relationships to external IS organizational relationships. Upon completion of this course, the learner will be prepared to define, evaluate, and plan the application of IST domains that must be considered when developing partnerships and common industry relationships.

Global Information Systems Management
This course extends the examination of the IST domains studied throughout the program to the global level. The learner will examine the application of the IST domains in the setting of a global economy and international business environment. The learners will be prepared to define the common IS management approaches for the development of business systems that can support global information systems requirements.
Information Systems Management Architecture

In this course, learners will create an innovative model, incorporating the domains and models from previous coursework. In the model building, learners will demonstrate their leadership competencies as related to IST.

RES 725 .................................................................................... 3 credits

Descriptive and Comparative Data Analysis

This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 .................................................................................... 3 credits

Correlational Methods of Analysis

This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

RES 727 .................................................................................... 3 credits

Approaches to Phenomenological Inquiry and Data Analysis

This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 .................................................................................... 3 credits

Qualitative Case Study

This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 .................................................................................... 3 credits

Ethnomethodology and the Study of Culture

In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 .................................................................................... 3 credits

Grounded Theory Methods

This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 .................................................................................... 3 credits

Mixed Methods

The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches -- and their blending -- to actually design and conduct meaningful doctoral level research.

DOC 722 .................................................................................. 3 credits

Doctoral Seminar II

This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 .................................................................................. 3 credits

Doctoral Dissertation

This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 .................................................................................. 3 credits

Doctoral Project IV

This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 733A ........................................................................................................3 credits

**Doctoral Dissertation**
This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 733B ........................................................................................................3 credits

**Doctoral Dissertation**
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation.

DOCC 734A ........................................................................................................3 credits

**Doctoral Project IV**
This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B ........................................................................................................3 credits

**Doctoral Project IV**
This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctor of Health Administration**

The following Doctor of Health Administration (DHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Doctor of Health Administration (DHA) program prepares leaders to respond effectively to the dynamic and ever-changing health care industry. These individuals will have a capacity to critically examine and evaluate issues and trends and feel empowered to influence the destiny of the health systems.

Graduates with a Doctor of Health Administration will be able to:

- Conduct, evaluate, and apply research designed to explain, forecast, predict, and/or improve the performance of health systems
- Use theoretical constructs to assess and develop implementation strategies health systems
- Strengthen leadership skills and abilities that foster the evolution of adaptive, high-performing health systems
- Evaluate, develop and implement policies and practices that impact health systems
- Lead organizations in anticipating and meeting challenges in the changing health environment

Graduates of the Doctor of Health Administration program will have enhanced their administrative and leadership skills through the completion of a curriculum that provides students with the latest theories and contemporary practice applications. They are not only able to define their role within the U.S. health system, but understand how to make necessary changes to create a work environment that is team-oriented and motivating to others. Graduates are able to analyze the influence of external and internal environments in order to align their organizations to respond to the ever-changing demands of the health care market place. Sensitivity to individuals and groups and the influence of multicultural diversity are seen as essential to effective leadership.

The curriculum is tailored to the needs of the health leader by providing content in finance, policy, research, technology, quality improvement, economics, leadership, and organizational analysis. The DHA program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 3-day residency; Year Two requires a 3-day residency; Year Three requires a 6-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Additionally, in the year three residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DHA degree is the successful completion and oral defense of a significant, substantial, and independently completed doctoral dissertation that adds new information to the body of health administration knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this
Degree.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dha.

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. Students who proceed from DOC 733B or DOC 734B must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. Students who proceed from DOC 733B or DOC 734B must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

**Doctoral Seminar III**

**Doctoral Seminar IV**

**Doctoral Project IV**

**Additional Information**

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dha.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dha.
DOC 734; RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DHA
All applicants are expected to meet the following admissions requirements:
- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Degree Requirements for the DHA
Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of all residencies.
- Written approval of the dissertation proposal.
- Satisfactory oral defense and written completion of the dissertation.
- The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
- Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
- The diploma awarded for this program will read as: Doctor of Health Administration.

Academic Progression for the DHA
Students are subject to the following academic progression requirements:
- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Minimum Grade Requirements for the DHA
- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.

• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Residency Requirements and Course Waivers for the DHA

Students must meet the following residency requirements:
• Completion of physical residencies:
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
  • If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.

• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• The following courses may not be waived: COM 705, DHA 733, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R

• The dissertation may not be waived.

Course Descriptions for the DHA

COM 705 .................................................................................... 1 credit

Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R .................................................................................... 0 credits

Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies' integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A ................................................................................ 3 credits

Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

DHA 711 ................................................................................. 3 credits

Administration of Complex Health Care Systems
Students will focus on administration of complex health systems rather than singular organizations. Topics include organizational analysis, strategic planning, multi-organizational management issues, and evolving governance structures. Students are expected to discuss and critically analyze theories and methods in health care administration. This course is intended to serve as an arena for discussion and inquiry regarding both current and historical issues in strategic decision making at the policy and the organizational level.

DHA 712 ................................................................................. 3 credits

Risk Management in Complex Organizations
Managing risk in an organization requires demonstration of an understanding of legal, licensure, certification, and accreditation dynamics, as well as litigation management within the context of corporate compliance. The student will apply concepts from labor law, risk financing, contract law, partnership agreements, and professional credentialing. Discussion will also include human subjects research, data security, and biotechnology.

DHA 713 ................................................................................. 3 credits

Managing Resources in Health Organizations
Understanding the complexity of managing the vast resources needed to deliver quality health care is essential. Although human resources comprise the majority of needed assets, other resources include facilities and industry suppliers. This course will examine how these resources are interwoven and need to be successfully managed. The course is a combination of theoretical and practical approaches for resource management.

DHA 714 ................................................................................. 3 credits

Health Care Marketing
Survival of health care institutions is primarily dependent on how well marketing succeeds at acquiring market share. This course examines key marketing concepts within the health care industry. Students will examine the financial success of health care institutions from a market share perspective including pricing, promotion, and distribution of services.

RES 711 ................................................................................ 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research
approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ....................................................................................3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ....................................................................................3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ....................................................................................3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

DHA 721 ..................................................................................3 credits

Health Care Economics
This course focuses on the application of economic theory to the amount, organizations, and distribution of health care services in the United States. Students will apply principles such as supply and demand, margin analysis, and cost effectiveness analysis. Students will discuss issues and controversies surrounding government’s role in financing and regulating health services.

DHA 722 ..................................................................................3 credits

Policy and Regulation in Health Care
Contemporary administration requires a thorough understanding of the federal policy and regulatory development process. Students analyze the history of health financing legislation, as well as regulatory implications of both the Medicare and Medicaid programs. This course examines the impact of emerging social, ethical, legal, and political issues on the future of the health care system. Emphasis is on the creation of innovative models of health care delivery.

DHA 723 ..................................................................................3 credits

Executive Information Systems
This course focuses on the use of financial systems, decision modeling programs, and advanced clinical information systems in formulating the strategic direction of modern health care systems. Practical experience using the University’s information technology partners introduces students to the richness of modern data systems. Simulations include quality improvement applications, including statistical process control methodology.

DHA 724 ..................................................................................3 credits

Globalization of Health Care
This course focuses on global health care systems with the objective of improving U.S. health care systems. Topics include global health issues, advocacy organizations, comparative political processes, and the economics of health financing. Students will understand the role of various international governing structures on health policy development.

PHL 700R ..................................................................................3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.

DOC 721R ..................................................................................2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ..................................................................................3 credits

Collaborative Case Study
This 3-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 732R ..................................................................................2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ..................................................................................0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

DHA 731 ..................................................................................3 credits

Population Health and Epidemiology
The science of epidemiology is essential for projecting the population health needs and appropriate allocation of public and private
resources. This course focuses on the utilization of epidemiologic studies and techniques as a basis for health care policy and administrative decision making. Students will apply this science in the analysis of emerging health epidemics and diseases.

DHA 732 ................................................................. 3 credits

Evaluation of Health Care Programs
This course prepares the contemporary health administrator to utilize research methodologies in making decisions regarding the cost effectiveness of specific health programs. Case studies will be used that incorporate disease-specific programs, community-wide health interventions, and population specific care management programs across a variety of health settings.

DHA 733 ................................................................. 3 credits

Contemporary Leadership Issues
This seminar focuses on the applications of new knowledge in creating new policies and models in the administration of health programs. Learners will explore contemporary issues and their impact on emerging leadership and management theory. Learners will demonstrate integration of knowledge.

RES 725 ................................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ................................................................. 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

RES 727 ................................................................. 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ................................................................. 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ................................................................. 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ................................................................. 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ................................................................. 3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.

DOC 722 ................................................................. 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ................................................................. 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities
of scholarship and practice.

**Doctoral Project IV**
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Dissertation**
This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Project IV**
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Dissertation**
This course is a continuation of DOC 734A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Project IV**
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

**Doctoral Dissertation**
This course is a continuation of DOC 734B for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctor of Education in Educational Leadership/Educational Technology**

The following Doctor of Education in Educational Leadership/Educational Technology (EDD/ET) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Educational Technology specialization of the Doctor of Education in Educational Leadership program will prepare learners to become education leaders who strategically manage and lead processes related to the integration of technology in various learning environments. Graduates will demonstrate both practical and scholarly knowledge in their use of analytical, critical, and innovative thinking to improve the performance of educational institutions by utilizing technological innovations to support and enhance the educational process.

Historically, education has been a field of constant evolution, continually shifting to meet the rapidly expanding needs of learners and demands of our society. The correct utilization of educational technology plays a key role in establishing education reform and transformation in the 21st century. Graduates of the Educational Technology specialization will be prepared to take on these challenges and to assume the lead in advocating technological innovation in educational environments. Learners will develop in-depth knowledge of the analytical, planning, implementation, and evaluation processes necessary to implement the new and expanding technologies into the classroom and to promote technological competence in their administrations. In addition, learners will explore germinal and contemporary research in educational technology, instructional design, instructional media, and distance learning.

The Educational Technology specialization is consistent with the University’s mission to educate working adults to achieve their professional goals and to improve the quality of education in their communities. The program is designed to emphasize educational leadership and to focus on applied research that improves the design, development, and integration of appropriate learning technologies into education, industry, and government.

**Program Goals**
Upon completion of all program requirements of the Educational Technology specialization of the Doctorate in Education in Educational Leadership degree, learners will be able to:

- Support and enhance the educational process through technological innovation
- Manage and lead organizational reform and transformation through strategic decision-making
- Design, develop, and implement technology solutions to enhance learning
- Balance the competing priorities of technology and curriculum based on research, theory, and experience
- Demonstrate strategies for life-long learning and continuous improvement of technological competence

**Program Structure**
The Ed.D./ET program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom set-
In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the third year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ed.D./ET degree is the successful completion and oral defense of a significant, substantial, and independently completed dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of germinal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research methodology for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd-et.

**EdD/ET Program Category Requirements**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Doctoral Foundations, 4 total credits**
- COM 705 ~ ................................................................. 1 credit
- Communication Strategies
- SEM 700R ................................................................. 0 credits
- Doctoral Program Orientation Seminar
- LDR 711A ~ .............................................................. 3 credits
- Leadership Theory and Practice

**Foundations in Educational Leadership and Technology, 12 total credits**
- EDD 711 ~ ................................................................. 3 credits
- Social Contexts and Contemporary Issues
- CUR 711 ~ ................................................................. 3 credits
- Developmental and Learning Theories
- EDT 711 ~ ................................................................. 3 credits
- Educational Technology Research
- EDD 712~ ................................................................. 3 credits
- Leadership in Contemporary Organizations

**Research Foundations, 6 total credits**
- RES 711 ~ ................................................................. 3 credits
- Fundamental Principles of Sound Research
- RES 722A ~ ................................................................. 3 credits
- Research Design

**Advanced Research Design, 3 total credits**
- RES 723 ~ ................................................................. 3 credits
- Advanced Statistical Research Methods and Design
- RES 724 ~ ................................................................. 3 credits
- Qualitative Methods and Design

**Techniques and Practices in Educational Technology, 12 total credits**
- EDD 721 .............................. 3 credits
- Planning and Leading Change
- EDT 721 ~ ................................................................. 3 credits
- Instructional Design
- EDT 722 ~ ................................................................. 3 credits
- Distance Learning
- EDT 723 ~ ................................................................. 3 credits
- Instructional Media and Design Techniques

**Doctoral Residencies, 10 total credits**
- PHL 700R ................................................................. 3 credits
- Creative and Critical Thinking
- DOC 721R ................................................................. 2 credits
- Doctoral Seminar I
- DOC 731R ................................................................. 3 credits
- Collaborative Case Study
- DOC 732R ................................................................. 2 credits
- Doctoral Seminar III
- DOC 740R ................................................................. 0 credits
- Annual Renewal Residency

**Advanced Inquiry in Educational Technology Leadership, 9 total credits**
- EDD 731 ~ ................................................................. 3 credits
- System Analysis and Design
- EDD 732 ~ ................................................................. 3 credits
- Contemporary Policy Analysis and Development
- EDT 732 ~ ................................................................. 3 credits
- Integrating Technology and Curriculum

**Advanced Research Analysis, 3 total credits**
- RES 725 ~ ................................................................. 3 credits
- Descriptive and Comparative Data Analysis
- RES 726 ~ ................................................................. 3 credits
- Correlational Methods of Analysis
- RES 727 ~ ................................................................. 3 credits
- Approaches to Phenomenological Inquiry and Data Analysis
- RES 728 ~ ................................................................. 3 credits
- Qualitative Case Study
- RES 729 ~ ................................................................. 3 credits
- Ethnomethodology and the Study of Culture
Additional Admission Requirements for the EdD/ET

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

- Current or a record of past employment in supervisory or management position is required for admission.

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Academic Progression Requirements for the EdD/ET

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and ED 799.

- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).

- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.

  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better

  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better

  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better

  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better

  - A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.

  - A passing score on the statistics entrance assessment. The assessment may only be taken twice.

  - Students may have only one incomplete grade on their records at a time.

  - Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.

  - Successful completion of DOC 731R which serves as a qualifying examination course in the program.

  - Quality review of dissertation proposal to advance beyond DOC 732R.

  - Committee literature review prior to enrollment in DOC 734.

  - Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)

  - Quality final Institutional review of dissertation during DOC 734.

  - Editorial Review after DOC 734 and prior to graduation.

  - Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.

  - Students who would like to repeat DOC 740R may repeat the course.
Academic Standing and Minimum Grade Requirements for the EdD/ET

- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
- DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Degree Requirements for the EdD/ET

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:

- A minimum of 68 doctorate credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of all residencies.
- Written approval of the dissertation proposal.
- Satisfactory oral defense and written completion of the dissertation.
- The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
- Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
- The diploma awarded for this program will read as: Doctor of Education and will not reflect the specialization. Specializations are reflected on the transcript only.

Residency Requirements and Course Waivers for the EdD/ET

Students must meet the following residency requirements:

- Completion of physical residencies.
  - Five-day residency at the beginning of the program.
  - Three-day residency at the beginning of year two.
  - Eight-day residency at the beginning of year three.
  - If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
- Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  - The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  - The course must have been completed within the last ten years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, EDT 721, EDT 732, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
- The dissertation may not be waived.

Course Descriptions for the EdD/ET

COM 705 .................................................................................... 1 credit

Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R ................................................................................ 0 credits

Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A .......................................................... 3 credits

Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

EDD 711 ................................................................................. 3 credits

Social Contexts and Contemporary Issues
This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.
CUR 711 ................................................................. 3 credits

Developmental and Learning Theories
Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.

EDT 711 ................................................................. 3 credits

Educational Technology Research
This course explores research on learning with technology. Focal areas include learner control, media preference, motivation, collaborative learning, and computer-mediated communication. Learners formulate conclusions based on refereed studies and consider the relationship between research design and questions.

EDT 721 ................................................................. 3 credits

Leadership in Contemporary Organizations
This course explores organization theory, culture, and change. The influence of leadership on the organization is examined in depth. The different functions of administration, management, and leadership are of focus.
RES 711 ................................................................. 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.
RES 722A .............................................................. 3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.
RES 723 ................................................................. 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs – experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.
RES 724 ................................................................. 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

EDD 721 ................................................................. 3 credits

Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.
EDT 721 ................................................................. 3 credits

Instructional Design
This course focuses on the principles of instructional design including a survey of instructional design models. Using the overarching ADDIE process learners will relate each of the five design phases to an educational goal. From their analyses, learners will justify the use of an instructional design model and produce a course-level unit.
EDT 722 ................................................................. 3 credits

Distance Learning
This course traces the development of distance learning, including past, present, and future trends. Learners will relate social contexts and educational goals to the evolution of technologies and their intended support of learning. Learners will explore the delivery of instruction over physical distance, focusing on concepts such as transactional distance, cultural considerations, anonymity, privacy, and accountability. Team learning is heavily emphasized and applied in this course.
EDT 723 ................................................................. 3 credits

Instructional Media and Design Techniques
Learners will apply instructional design principles in the development of electronic media. Learners explore delivering instruction through multimedia and/or multiple modalities with a focus on matching appropriate technologies to learning outcomes. Design principles include the effects of contrast, continuity of text and graphics, relevancy of graphics to text, and alignment.
PHL 700R .............................................................. 3 credits

Creative and Critical Thinking
This course challenges the learner to become a creative leader/problem-solver and to begin the process of personal transformation by questioning one’s assumptions and conventional patterns of thinking. Throughout the course, learners will demonstrate characteristics of creative and critical thinking in individual and collaborative situations.
DOC 721R ............................................................ 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the leaner on the challenges faced by managers who must balance the needs
of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization's environment. This course will incorporate learners from various doctoral program/disciplines.

**DOC 732R** ................................................................. 2 credits

### Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

**DOC 740R** ................................................................. 0 credit

### Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC 728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.

**EDT 731** ................................................................. 3 credits

### System Analysis and Design
This course follows the phases of needs analysis, planning, implementation, and evaluation that are integral to large-scale instructional technology projects. Learners consider vendor selection, organizational constraints, maintenance, and enhancements in an effort to address learners' present and future needs. Learners focus on developing systemic solutions that avoid the pitfalls of piece-meal technology adoptions.

**EDD 732** ................................................................. 3 credits

### Contemporary Policy Analysis and Development
This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

**EDT 732** ................................................................. 3 credits

### Integrating Technology and Curriculum
This course is designed to develop strategies for effective and appropriate integration of digital technology and educational goals. Learners explore the possibilities enabled by technology, the perceived need to master technologies for vocational readiness, and the design of technological implementations that enhance educational experiences. A running theme of this course is balancing the competing priorities of technology and curriculum decisions.

**RES 725** ................................................................. 3 credits

### Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoelling’s T, MANOVA and related techniques. Depending on the learners' needs other approaches may be covered.

**RES 726** ................................................................. 3 credits

### Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners' needs, other approaches may be covered.

**RES 727** ................................................................. 3 credits

### Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

**RES 728** ................................................................. 3 credits

### Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This non-credit-bearing course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

**RES 729** ................................................................. 3 credits

### Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on "thick description" as a critical mode of representation.

**RES 745** ................................................................. 3 credits

### Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

**RES 746** ................................................................. 3 credits

### Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing
and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

**Doctoral Seminar II**

This is a continuation of DOC 733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 ..................................................................................3 credits

**Doctoral Project IV**

This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734A .................................................................3 credits

**Doctoral Project IV**

This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B .................................................................3 credits

The University of Phoenix offers Professional Certificate programs to organizations and individuals with professional development or specialized training needs. The programs effectively blend theory and practice, enabling the individual to rapidly become a more effective manager or specialist. Certificate programs are currently available in several fields: technology, education, call center professional, human resource management, health care, and project management.

A Credit Bearing Certificate program is one that bears University of Phoenix credits. Credit Bearing Certificate programs are developed and maintained by the Dean of each College.

### Admission Requirements

All applicants are expected to meet the following admission requirements:

- A completed and signed certificate application and application fee
- Applicants whose native language is not English must have either:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
- or-
  - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
- or-
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
- or-
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
- or-
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
- or-
  - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:

- The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.
- The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
- The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
- The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
- Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program.
- Applicants who reside in the United States must meet one of the following requirements:
  - Be a legal resident of the United States
  - Have been granted permanent residency
  - Have a valid visa that does not prohibit educational studies
  - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  - Have been granted asylum or refugee status.
- Applicants who reside in Canada must meet one of the following requirements:
  - Be a legal resident of Canada
  - Be a landed immigrant
  - Have a valid visa that does not prohibit educational studies
  - A signed Enrollment/Disclosure Agreement.
  - Completion of any state-specific required documents or forms.
- Applicants who have been expelled from other institutions are not eligible for admission to University of Phoenix.
• Students who have been expelled from University of Phoenix are not eligible for readmission to University of Phoenix. No appeals will be accepted.

• Students are subject to all other University policies and procedures and additional requirements may be applied to specific programs at the discretion of the Dean.

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their first attendance in a post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to their attendance at another Hawaii post-secondary school.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• The student was born before January 1, 1957 (applicable to MMR vaccine only).

• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)

• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for one or more of the diseases as indicated on the immunization form.

• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.

• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
• The student has submitted a statement that immunization is contrary to his/her religious beliefs.
• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.

CERTIFICATE PROGRAMS FOR THE UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS - UNDERGRADUATE

Project Management

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The project management course sequence focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/pm.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the PM

- CPMGT 300 ~ Project Management ~ 3 credits
- CPMGT 301 ~ Strategic Portfolio and Project Management ~ 3 credits
- CPMGT 302 ~ Project Management ~ 3 credits
- CPMGT 303 ~ Procurement and Risk Management ~ 3 credits
- CPMGT 304 ~ Project Estimating and Control Techniques ~ 3 credits
- CPMGT 305 ~ Leading Projects in Organizations ~ 3 credits
- CPMGT 306 ~ Project Management Capstone ~ 3 credits

The University reserves the right to modify the required course of study.

General Information

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the PM

All applicants to this certificate program are expected to meet the following additional admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the PM

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Project Management
Residency Requirements and Course Waivers for the PM

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course in the required course of study may not be waived: CPMGT 305

Course Descriptions for the PM

CPMGT 300 3 credits

Project Management

This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

CPMGT 301 3 credits

Strategic Portfolio and Project Management

This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

CPMGT 302 3 credits

Procurement and Risk Management

This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

CPMGT 303 3 credits

Project Estimating and Control Techniques

To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

CPMGT 304 3 credits

Leading Projects in Organizations

This course provides students with an overview of organizational behavior as it relates to project management. It introduces various techniques and processes that will help students develop effective communication and interpersonal skills to successfully manage project teams. In addition, numerous leadership and motivation theories are presented as well as techniques that minimize stress in the project environment. Furthermore, project decision-making processes and techniques that facilitate effective and efficient project change management are addressed in this course. Students will also examine the influence of globalization, technology, and future trends in project management.

CPMGT 305 3 credits

Project Management Capstone

This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in prior five courses will be integrated and applied to the class project.

Sales Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Sales Management certificate program provides students with the knowledge and skills necessary to build, retain, and manage a highly effective sales force. This certificate emphasizes skill development in the sales process, business-to-business sales strategies and best practices, consumer behavior and customer relationship management, and the role of a sales manager in leading a highly productive sales force. Upon completion of this certificate, students will possess the tools needed to manage sales objectives as they relate to achieving organizational success.

Required Course of Study for the CERT/SMGT

MKT 421 3 credits

Marketing

MKT 310 3 credits

Personal Selling

MKT 360 ~ 3 credits

Sales Force Management

Students must choose 3 of the following:

MGT 317 3 credits

Critical Skills in Management

MKT 320 ~ 3 credits

Business-to-Business Sales Management
In order to be granted a waiver with credit for a course in the CERT/SMGT, students in this program may waive a maximum of 3 credits. Students must meet established University residency requirements and course waivers for the CERT/SMGT. A minimum grade point average (GPA) of 2.0 is required. Completion of a minimum of 18 credits is needed. Applicants must have access to a suitable work environment for study.

Required Course of Study
- High school graduation from an institution that holds state accreditation, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Students residing in Tennessee who are attending classes via completion of the HiSET examination with a passing score. A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/SMGT
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0 is required.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Sales Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/SMGT
- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a nationally accredited or approved college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: MKT 360

Course Descriptions for the CERT/SMGT
- MKT 421 .................................................................................. 3 credits
  Marketing
  This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.
- MKT 310 .................................................................................. 3 credits
  Personal Selling
  This course provides students with the tools and techniques necessary to understand the personal sales process. After completion of this course, students will be able to create a personal sales presentation, describe sales negotiations, compare and contrast the categories of prospect objections, summarize the elements of the closing process, and identify ethical frameworks associated with sales professional associations.
- MKT 360 .................................................................................. 3 credits
  Sales Force Management
  This course provides students with an overview of the functions and activities related to managing a sales force. After the completion of this course, students will be able to summarize the responsibilities of a sales manager, evaluate the techniques used to recruit sales force candidates, describe sales territory strategies, examine the methods used in lead generation, and explain the approaches used to forecast sales performance information.
- MKT 317 .................................................................................. 3 credits
  Critical Skills in Management
  This course provides students with fundamental knowledge and skills necessary to make important management decisions. This course places emphasis on general managerial knowledge and skills required for effective personal, interpersonal, and group leadership regarding the direction of daily business affairs in a global business environment.
- MKT 320 .................................................................................. 3 credits
  Business-to-Business Sales Management
  This course provides students with an understanding of the business-to-business selling relationship and the challenges associated with maintaining these relationships. After the completion of this course, students will be able to describe the complexities of business-to-business selling relationships, create numerous presentations to address the variety of audiences in the business-to-business setting, examine legal issues associated with business-to-business selling, and evaluate the ethical considerations of relationship building behavior within a business-to-business sales relationship.
LDR 300 ..................................................................................3 credits

Innovative Leadership

This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MKT 435 ..................................................................................3 credits

Consumer Behavior

This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 445 ..................................................................................3 credits

Sales, Tools and Strategies

This course is an examination of the basic principles involved in the sales process, the relationship between sales and marketing, sales force structure, and Customer Relationship Management (CRM). Emphasis is placed on product pricing, managing the sales force, forecasting market demand, and relating sales goals to marketing goals.

MKT 468 ..................................................................................3 credits

Customer Relationship Management

This course provides students with an understanding of the importance of building and enhancing customer relationships by utilizing best practices and customer relationship management strategies. After completion of this course, students will be able to summarize market segmentation methods, evaluate the strategies of customer acquisition and retention, identify effective customer service techniques, and understand the use of relational databases and customer relationship management software in maintaining customer loyalty.

Fundamentals of Human Resource Management

This is an introductory course in analyzing the role of human resources, employment practices, employee and labor relations, compensation, benefits, safety and health, and employee development. Participants acquire knowledge and skills that are essential in addressing the challenges of the human resource profession.

General Information for the HRM

This certificate program may be taken on its own or may be earned en-route to earning a bachelor's degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding ‘Certificate Track’ bachelor's program.

Students who complete a certificate in its entirety and who later choose to enroll in a bachelor's program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the HRM

All applicants to this certificate program are expected to meet the following additional admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the HRM

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• All students must complete the minimum number of credits required by their certificate program.
• The certificate awarded for this program will read as: Human Resource Management.

Residency Requirements and Course Waivers for the HRM
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HRM 498

Course Descriptions for the HRM

HRM 300 ................................................................. 3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human resources in achieving business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 434 ................................................................. 3 credits
Employment Law
This course provides an overview of federal statutes and state regulated areas that impact the personnel function. Among the topics addressed are EEO and Affirmative Action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraph testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

HRM 324 ................................................................. 3 credits
Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 420 ................................................................. 3 credits
Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 326 ................................................................. 3 credits
Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 498 ................................................................. 3 credits
Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

Bookkeeping Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bookkeeping Certificate focuses on the role of accounting in business and management. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/bkp.

**Additional Admission Requirements for the CERT/BKP**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- **Tennessee:** Students residing in Tennessee who are attending class via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- **Demonstration of basic skills proficiency in mathematics.** Students have the following options to satisfy this requirement:
  - Students must pass the Praxis I exam at the cut score determined by the School of Business (Math - 170).
  - Students must pass the SAT at the cut scores determined by the national benchmark (Mathematics - 480).
  - Students must pass the ACT at the cut scores determined by the national benchmark (Mathematics - 20).
  - Transfer credit may be used by students who have achieved a C- or better in a college algebra or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - **Achieve a passing score eligible for credit on an approved mathematics related National Testing Program.** Current Approved National Testing Programs are:
    - **CLEP Examination**
      - College Mathematics
      - College Algebra
      - Pre-calculus
      - Calculus
    - **DANTES Examination**
      - Principles of Statistics
      - Business Mathematics
    - **Advanced Placement Examination**
      - Calculus AB
      - Calculus BC
      - Statistics
    - **Achieve a passing score on the School of Business math readiness exam (MyMathTest Assessment - 70%).**
    - **Successful completion (passing grade) of University of Phoenix mathematics course MAT 116, equivalent or higher.**
    - **New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).**

**Certificate Completion Requirements for the CERT/BKP**

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- **The certificate awarded for this program will read as:** Bookkeeping
- Students who have completed an associates (A or B Track) or bachelor's degree in Accounting may not receive a certificate in the same area of focus. Example: a student may not earn an AAACCF Track A or B first and come back to earn a BKP certificate; however, students who have completed a certificate may return to receive an associates or bachelor's degree with a concentration in the same area as the completed certificate or another approved concentration.

**Residency Requirements and Course Waivers for the CERT/BKP**

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the
Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: BUS 210C

Course Descriptions for the CERT/BKP

BUS 210C ............................................................................. 3 credits

Foundations of Business

In this course students will explore the foundation of business by reviewing topics regarding the structure and culture of the modern business environment. Additional topics include the evolution of business, the role of the business ethics, communication, technology, operations, leadership, and human resources. Upon completion, students are better prepared to make informed decisions regarding their educational and professional goals.

XACC 210C ............................................................................. 3 credits

Accounting Information Systems

This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for a business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.

XBCOM 230C ............................................................................. 3 credits

Business Communication for Accountants

This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communications within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

XACC 290C ............................................................................. 3 credits

Principles of Accounting I

This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

XMGT 230C ............................................................................. 3 credits

Management Theory and Practice

This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

XACC 291C ............................................................................. 3 credits

Principles of Accounting II

This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

Supply Chain Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Supply Chain Management certificate highlights the important role a supply chain plays in organizational performance and efficiency. The program emphasizes the need to develop and maintain a sustainable competitive advantage through the efficient and effective performance of all supply chain activities. Students will be able to examine logistic management processes, determine appropriate purchasing and procurement strategies, identify elements of an effective supply chain information management system, and evaluate lean enterprise processes to improve organizational efficiency.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Strategic Supply Chain Management

ISCOM 352 ~ ............................................................................. 3 credits

Logistics Management

ISCOM 476 ~ ............................................................................. 3 credits

Integrated Supply Chain Applications

Students must choose 3 of the following:

BIS 375 ~ ............................................................................. 3 credits

Supply Chain Information Management in Online Environments

ISCOM 471 ............................................................................. 3 credits

Purchasing and Procurement

ISCOM 424 ~ ............................................................................. 3 credits

End-to-End Supply Chain Management

ISCOM 472 ~ ............................................................................. 3 credits

Lean Enterprise

ISCOM 473 ............................................................................. 3 credits

Global Sourcing and Procurement
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/SCM
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/SCM
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Supply Chain Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/SCM
- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: ISCOM 476

Course Descriptions for the CERT/SCM

ISCOM 370 .................................................................................. 3 credits
**Strategic Supply Chain Management**
This course will provide an overview of the strategic elements and functional relationships within manufacturing and service supply chains. Emphasis is placed on the integration of strategic planning, sourcing, operations, and logistics to achieve a sustainable competitive advantage.

ISCOM 352 .................................................................................. 3 credits
**Logistics Management**
This course provides an overview of logistics management within a supply chain operation. This includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 476 .................................................................................. 3 credits
**Integrated Supply Chain Applications**
This course introduces students to the importance of a strategic plan and its interaction with, and impact on, supply chain applications. Students will understand the processes of supply change creation and improvement, and as a result, the effects it has on competition. Students will be able to select and apply a set of metrics to the supply chain which demonstrate performance standards are achieved.

BIS 375 .................................................................................. 3 credits
**Supply Chain Information Management in Online Environments**
This course introduces students to the theory and practice of conducting supply chain functions over the Internet. It addresses various business strategies for buying, selling, or exchanging products, services, and information via computer networks. Legal and ethical requirements for handling supply chain business over the Internet are addressed.

ISCOM 361 .................................................................................. 3 credits
**Purchasing and Procurement**
This course addresses the relationship between supply chain management and procurement. This includes overview of both the procurement process and commodity markets. Students will address procurement from a strategic perspective as well as at the operational level.

ISCOM 424 .................................................................................. 3 credits
**End-to-End Supply Chain Management**
This course prepares students to be effective managers in end-to-end supply chain management. This refers to tracking all segments of the supply chain beginning with capturing customer requirements to customer consumption and disposal. Special emphasis is placed on enhancing supply chain efficiencies through problem-solving methodologies including Six Sigma, Lean management.
Students will also apply the principles of Supplier Relationship Management (SRM) and Customer Relationship Management (CRM) to make effective end-to-end supply chain decisions.

**ISCOM 472** .............................................................. 3 credits

**Lean Enterprise**
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection, and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.

**ISCOM 473** .............................................................. 3 credits

**Global Sourcing and Procurement**
This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.

**Small Business Management and Entrepreneurship Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Small Business Management and Entrepreneurship certificate provides students with an understanding of small business planning, financial management, and integrated business topics on entrepreneurship and small business management. Upon completion of this program students will be able to examine small business marketing opportunities, identify innovative small business strategies, evaluate financial management decisions, and address the challenges and opportunities specific to small business management and entrepreneurship.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• The following course may not be waived: MGT 465

Course Descriptions for the CERT/SBE

MGT 312 ................................................................. 3 credits

Organizational Behavior for Managers
This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.

MGT 401 ................................................................. 3 credits

The Small Business: Structure, Planning and Funding
This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

MGT 465 ................................................................. 3 credits

Small Business and Entrepreneurial Planning
This course focuses on the development of a strategic business plan applicable for the needs of a small business or entrepreneurial venture. This will include the strategic and integrative application of financial planning, capital management, marketing, people management, and leadership. Special emphasis is placed on adapting business planning requirements to the realistic needs of small business owners and entrepreneurs.

FIN 375 ................................................................. 3 credits

Financial Management in the Small Business
This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

LDR 300 ................................................................. 3 credits

Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 418 ................................................................. 3 credits

Evaluating New Business Opportunities
This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

MKT 431 ................................................................. 3 credits

Small Business Marketing
Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.

OIE 361 ................................................................. 3 credits

Innovation, Design, and Creativity for a Competitive Advantage
This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.

OIE 370 ................................................................. 3 credits

Innovation for the 21st Century
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

Retail Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Retail Management certificate focuses on the retail management environment. The concentration emphasizes skill development in customer service management, sales and marketing, supply management, retail operations, merchandising, and personnel management unique to the retail industry. Upon completion of this concentration, students will possess the knowledge and skills necessary to be leaders in the retail industry.

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

The certificate awarded for this program will read as: Operations Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/OPS

- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  - The following course may not be waived: ISCOM 374

Course Descriptions for the CERT/OPS

ISCOM 305 ..............................................................................3 credits

Systems Operations Management

This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, infor-
Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer-driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

Integrated Logistics Management
This course prepares students to strategically plan, implement, and control the efficient and effective flow and storage of goods, service, and related information from a point-of-origin to a point-of-consumption. This course also focuses on transportation, inventory management, warehousing, and customer services.

Supply Chain Information Management in Online Environments
This course introduces students to the theory and practice of conducting supply chain functions over the Internet. It addresses various business strategies for buying, selling, or exchanging products, services, and information via computer networks. Legal and ethical requirements for handling supply chain business over the Internet are addressed.

Integrated Marketing Strategies
Students must choose 3 of the following:

- BRM 353 ~ ................................................................. 3 credits Product and Brand Management
- MKT 411 ~ ................................................................. 3 credits Green Marketing
- MKT 431 ~ ................................................................. 3 credits Small Business Marketing
- MKT 435 ~ ................................................................. 3 credits Consumer Behavior
- MKT 438 ~ ................................................................. 3 credits Public Relations
- MKT 441 ~ ................................................................. 3 credits Marketing Research
- MKT 444 ~ ................................................................. 3 credits Hospitality Marketing

The University reserves the right to modify the required course of study.

Marketing Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Marketing certificate addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The program builds upon the foundational marketing course and allows further study in the areas of consumer behavior, marketing research, public relations, product and brand management, and small business marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following course may not be waived: MKT 498

Course Descriptions for the CERT/MKT
MKT 421 ...................................................................................3 credits
Marketing
This course involves an analysis of the role of marketing within the organization. Other topics include analyzing consumer behavior, identifying marketing variables, creating marketing strategies, and describing challenges of international marketing issues.

MKT 435 ...................................................................................3 credits
Consumer Behavior
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 498 ...................................................................................3 credits
Integrated Marketing Strategies
This course provides students with an in depth study of Integrating Marketing Communications (IMC). Emphasis will be placed on strategic roles and the integration of marketing communication tools including advertising, public relations, sales, promotion, event management, media selection, and marketing management.

BRM 353 ...................................................................................3 credits
Product and Brand Management
This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

MKT 411 ...................................................................................3 credits
Green Marketing
This course applies the principles of sustainability and the philosophy of being environmentally green to the area of marketing. Special emphasis is placed on sustainable product design; awareness and cause marketing; public relations and green-washing; and emerging going-green marketing trends.

MKT 431 ...................................................................................3 credits
Hospitality Marketing
This course applies the general tools of marketing to the specific needs of the hospitality management industry. Special emphasis is
placed on the global, regional, individual, and ethical considerations when building customer-relationships through marketing.  

**Hospitality Management Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence.   - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: HRM 498

Course Descriptions for the CERT/HRM

HRM 300 .............................................................. 3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human achieving resources in business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

MGT 434 .............................................................. 3 credits
Employment Law
This course provides an overview of federal statutes and state regulated areas that impact the personnel function. Among the topics addressed are EEO and Affirmative Action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraphy testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

HRM 324 .............................................................. 3 credits
Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 420 .............................................................. 3 credits
Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 326 .............................................................. 3 credits
Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 498 .............................................................. 3 credits
Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.
General Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Management certificate emphasizes managing human and fiscal resources within the structure, culture, and missions of any organization. The program provides students with the opportunity to examine the areas of innovation in business, human resource management, change management, organizational negotiations, and strategic management. Students will integrate advanced topics in management through real-world business application.

Product and Brand Management
This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.

CPMGT 300 .................................................................................. 3 credits
Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

FIN 419 .................................................................................. 3 credits
Finance for Decision Making
This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

HM 370 .................................................................................. 3 credits
Hospitality Management
This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

HRM 300 .................................................................................. 3 credits
Fundamentals of Human Resource Management
This course explores the critical role of human achieving resources in business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 326 .................................................................................. 3 credits
Employee Development
This course explores the role and relevance of employee development in today's business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

ISCOM 305 .................................................................................. 3 credits
Systems Operations Management
This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.

ISCOM 370 .................................................................................. 3 credits
Strategic Supply Chain Management
This course will provide an overview of the strategic elements and functional relationships within manufacturing and service supply chains. Emphasis is placed on the integration of strategic planning, sourcing, operations, and logistics to achieve a sustainable competitive advantage.

LDR 300 .................................................................................. 3 credits
Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.
MGT 317 ................................................................. 3 credits
Critical Skills in Management
This course provides students with fundamental knowledge and skills necessary to make important management decisions. This course places emphasis on general managerial knowledge and skills required for effective personal, interpersonal, and group leadership regarding the direction of daily business affairs in a global business environment.
MGT 401 ................................................................. 3 credits
The Small Business: Structure, Planning and Funding
This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.
MGT 411 ................................................................. 3 credits
Innovative and Creative Business Thinking
This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen the ability to respond to organizational changes and challenges. Course lectures, reading, and projects will span theory and practice and draw upon examples from multiple industry sectors.
MGT 418 ................................................................. 3 credits
Evaluating New Business Opportunities
This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.
MGT 420 ................................................................. 3 credits
Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.
MGT 426 ................................................................. 3 credits
Managing Change in the Workplace
This course provides an overview of methods and techniques required of supervisory and management personnel responsible for managing change. As a result of the course, students will be able to identify and develop strategies for managing the following: organizational aspects of change, including shifts in leadership, reorganizations, working conditions, technologically imposed change and workforce issues. In addition to developing strategies, students will gain expertise in applying communication strategies that effectively deal with change.
MKT 445 ................................................................. 3 credits
Sales, Tools and Strategies
This course is an examination of the basic principles involved in the sales process, the relationship between sales and marketing, sales force structure, and Customer Relationship Management (CRM). Emphasis is placed on product pricing, managing the sales force, forecasting market demand, and relating sales goals to marketing goals.
MKT 448 ................................................................. 3 credits
Web Analytics for Digital Marketing
This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.
OIL 361 ................................................................. 3 credits
Innovation, Design, and Creativity for a Competitive Advantage
This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.
OIL 370 ................................................................. 3 credits
Innovation for the 21st Century
This course covers the impact of innovation on organizations. In this course, students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.
MGT 445 ................................................................. 3 credits
Organizational Negotiations
This course provides an overview of negotiations in an organizational setting. Students will learn negotiation processes and strategies, the role of stakeholder interests in negotiation, and how to apply these concepts to the workplace. Students will also examine conflict management techniques as well as emerging negotiation trends in globalization and technology.
Project Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

Residency Requirements and Course Waivers for the CERT/PM
• Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
• Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferrable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following course may not be waived: CPMGT 305
Project Management
This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.
Strategic Portfolio and Project Management
This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.
Procurement and Risk Management
This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.
Project Estimating and Control Techniques
To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.
The University of Phoenix, 2014-2015

**Required Course of Study for the CERT/BADM**

- **Project Management Capstone**
  - This course is the capstone of the project management courses. Students will demonstrate project management skills learned via preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in prior five courses will be integrated and applied to the class project.

**Business Administration Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. - **Business Information Systems**

This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.

- **CPRMG 300** ..........................................................3 credits
- **Project Management**

This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and
control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

ACC 400  .................................................................................. 3 credits

**Accounting for Decision Making**
This course concentrates on effective decision making as it relates to financial activities in a business enterprise. Course topics will include financial assets, liabilities, equity, business operations, financial management, and financial statement analysis. Students will have the necessary analytical tools to enhance business operations.

ISCOM 305  .................................................................................. 3 credits

**Systems Operations Management**
This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.

FIN 419  .................................................................................. 3 credits

**Finance for Decision Making**
This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

MGT 448 .................................................................................. 3 credits

**Global Business Strategies**
The managers perspective in the fields of international payments, international trade, and investment are analyzed. Emphasis is given to the materials and concepts that illuminate the strategies, structure, practices and effects of multinational enterprises.

**Bookkeeping Fundamentals Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Bookkeeping Fundamentals Certificate focuses on the role of accounting in business and management. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

**Additional Admission Requirements for the CERT/BKPN**

Applicants must be at least 16 years of age at the time of application.

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HISET examination with a passing score.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Demonstration of basic skills proficiency in mathematics. Students have the following options to satisfy this requirement:
  - Students must pass the Praxis I exam at the cut score determined by the School of Business (Math - 170).
  - Students must pass the SAT at the cut scores determined by the National benchmark (Mathematics - 480).
  - Students must pass the ACT at the cut scores determined by the national benchmark (Mathematics - 20).
  - Transfer credit may be used by students who have achieved a C- or better in a college algebra or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
Achieve a passing score eligible for credit on an approved
mathematics related National Testing Program.
Current Approved National Testing Programs are:

**CLEP Examination**
- College Mathematics
- College Algebra
- Precalculus
- Calculus

**DANTES Examination**
- Principles of Statistics
- Business Mathematics

**Advanced Placement Examination**
- Calculus AB
- Calculus BC
- Statistics

- Achieve a passing score on the School of Business math
  readiness exam (MyMathTest Assessment - 70%).
- Successful completion (passing grade) of University of
  Phoenix mathematics course MAT 116, equivalent or higher.

**Certificate Completion Requirements for the CERT/BKPN**
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed
  on Academic Probation if their associate program GPA falls
  below the minimum requirement.
- Students earning this certificate en-route to completion of a
  degree program must meet the minimum GPA requirement
  at the conclusion of all required coursework for the
  certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as:
  Bookkeeping Fundamentals (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/BKPN**
Students must meet the established University residency require-
ment for certificate conferral. The University requires that the
majority of coursework, 12 credits in the Required Course of Study,
must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from
their required course of study on the basis of regionally or
approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the
Required Course of Study, a student must have completed a previ-
ous course which meets the following criteria:
- The course must have been completed at a regionally or
  approved nationally accredited, or candidate for accreditation,
  college or university.
- The course must have been completed within the past ten (10)
  years (5 years for IS&T courses) from current program
  enrollment agreement sign date with a grade of ‘C’ (2.0) or
  better.
- The course must be comparable in content and credits to the
  University course it is replacing and must be an equivalent level
  or higher level course (i.e. graduate level coursework may be
  used to waive graduate or undergraduate coursework). Course
  descriptions must be included with the course waiver form in
  order for the Office of Admissions and Evaluation to review the
course waiver request.

**Course Descriptions for the CERT/BKPN**

**BIS 220**
Introduction to Computer Applications and Systems
This course provides an overview of Business Information Sys-
tems. Students learn to apply Microsoft Office™ tools including
word processing, spreadsheet, database, and presentation software
to accomplish business objectives. Other topics include uses of
application software and the Internet for effective problem solving,
exploration of relevant emerging technologies, and how informa-
tion is used across different industries.

**QNT 275**
Statistics for Decision Making
This course introduces the techniques used for the visualization of
numerical data and descriptive statistics in business. After comple-
tion of this course, students will be able to explain how to obtain a
suitable sample of business data and evaluate its validity and reli-
ability for statistical inferences, produce tables and charts to organ-
ize and display qualitative and quantitative business data,
interpret numerical business data using measures of central ten-
dency and dispersion, apply fundamental concepts probability the-
ory for inferential decision making for business, and perform a
linear regression for trend analysis.

**BIS 330**
Business Communication for Accountants
This course introduces students to the foundations of communi-
cation in a business accounting setting. Students are exposed to vari-
ous topics related to interpersonal and group communication
within the context of applications to the accounting field. Students
will develop skills in the forms of written communication, includ-
ing memos, emails, business letters, and reports. Other topics
include communication ethics, collaboration, information utiliza-
tion, critical thinking, and professional competence and values.

**ACC 290**
Principles of Accounting I
This course covers the fundamentals of financial accounting as
well as the identification, measurement, and reporting of the finan-
cial effects of economic events on an enterprise. Students will learn
to examine financial information from the perspective of manage-
ment. Other topics include decision-making, planning, and con-
trolling from the perspective of a practicing manager.

**MGT 230**
Management Theory and Practice
This course explores the rich field of management in theory and
practice, and as both a science and an art. Students learn to apply
management concepts to current workplace issues. Other topics
include increasing competitive forces, expectations for successful
performance of employees and organizations, and achieving
desired business goals.

**ACC 291**
Principles of Accounting II
This course introduces accounting concepts in a business environ-
ment. Students learn to create and apply accounting documents in
making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

**Digital Marketing Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

With the emergence of social media, businesses are recognizing the need to enhance their marketing mix by connecting through digital channels. The digital marketing certificate emphasizes an understanding of digital marketing, social media, Internet marketing, consumer behavior, web analytics, search engine optimization, and advertising and creativity strategy. Upon completion of this certificate students will possess the knowledge and skills necessary to identify demand for products and services and digital marketing strategies.

Course Descriptions for the CERT/DMKT

MKT 421 ..................................................................................3 credits
Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

MKT 440 ..................................................................................3 credits
Fundamentals of Digital Marketing
This course provides a high-level view of the impact of technology on the marketing of goods and services. After completion of this course, students will be able to understand the structure of the Internet, compare and contrast strengths and weaknesses of various digital marketing tools, identify common terminology used in digital marketing, analyze ethical issues in public presentation of information, and evaluate the integration of digital media into a marketing plan.

MKT 498 ..................................................................................3 credits
Integrated Marketing Strategies
This course provides students with an in depth study of Integrating Marketing Communications (IMC). Emphasis will be placed on strategic roles and the integration of marketing communication tools including advertising, public relations, sales, promotion, event management, media selection, and marketing management.

MKT 443 ..................................................................................3 credits
Consumer Behavior
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 435 ..................................................................................3 credits
Social Media Marketing
The course provides an opportunity for students to examine social networks, social media, and online advertising techniques. After completion of this course, students will be able to identify interactive marketing opportunities, understand the use of social media marketing on customer loyalty, apply social media tactics to the appropriate target market, and apply concepts of micropayments in social media setting.

MKT 446 ..................................................................................3 credits
Search Engine Optimization
This course will provide students with the tools to apply concepts used in search engine optimization. After completion of this course, students will be able to design an architecture, keyword search and competitive analysis, create website building strategies, techniques and tools to enhance search results, and optimize mobile content to enhance website visibility.

MKT 447 ..................................................................................3 credits
Advertising and Creativity Strategy
This course provides an overview of advertising in the context of integrated marketing. Topics include the development of advertising objectives, creative guidelines, media selection and scheduling, budgeting, and performance evaluation.

MKT 448 ..................................................................................3 credits
Web Analytics for Digital Marketing
This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.

FIN 455 ..................................................................................3 credits
Internet Marketing
This course examines the impact of the Internet on traditional marketing methods and how it has transformed the contemporary marketing landscape. Emphasis will be placed upon the uses of the Internet for the marketing of goods, services, information, and the impact of Internet technology on marketing strategy and practices. The course examines strategies for Internet marketing and analyzes customer relationship management models and applications in the B2B (business to business) and B2C (business to consumer) environments.

Financial Planning Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations as of September 30th, 2013: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Finance Planning certificate emphasizes fundamental and advanced financial planning concepts, theories, and practices to promote well-informed personal financial decision making. Upon completion of this program, students will be able to examine the areas of personal finance planning, investment analysis and portfolio management, retirement and benefit planning, and insurance planning. Students will integrate advanced topics in financial planning through practical application.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the CERT/FINP

FIN 370 ..................................................................................3 credits
Finance for Business
FIN 420 ~ ..................................................................................3 credits
Personal Financial Planning
FIN 486 ~ ..................................................................................3 credits
Strategic Financial Management
Students must choose 3 of the following:

FIN 366 ~ ..................................................................................3 credits
Financial Institutions
FIN 402 ~ ..................................................................................3 credits
Investment Fundamentals and Portfolio Management
FIN 467 ~ ..................................................................................3 credits
Real Estate Investment
FIN 422 ~ ..................................................................................3 credits
Retirement and Benefit Planning
FIN 428 ~ Insurance for Financial Planning .................................................... 3 credits
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/FINP
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/FINP
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as:
  Financial Planning (Undergraduate)

Residency Requirements and Course Waivers for the CERT/FINP
- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: FIN 486

Course Descriptions for the CERT/FINP
FIN 370 ............................................................................................................. 3 credits
Finance for Business
This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
FIN 420 ............................................................................................................. 3 credits
Personal Financial Planning
This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on investment risk and returns, market trends and analysis tools useful in assessing financial situations.
FIN 486 ............................................................................................................. 3 credits
Strategic Financial Management
This course gives students the opportunity to integrate previously learned finance and accounting concepts and practices to contemporary business strategies, while improving financial decision-making and problem-solving skills. In addition, students will examine real-world financial management scenarios in order to apply best practices resulting in increased value for various types of organizations.
FIN 366 ............................................................................................................. 3 credits
Financial Institutions
This course will cover financial institutions such as insurance companies, commercial banks, investment banks and savings and loan associations. The risks facing financial institutions and how to measure and manage those risks are analyzed.
FIN 402 ............................................................................................................. 3 credits
Investment Fundamentals and Portfolio Management
This course covers the theories and practices of investments including financial markets, risk and return, securities, asset allocation and diversification. Students will utilize analytical techniques available in the investment planning and selection process in the environment in which investment decisions are made. Students will apply finance models and investment strategies to analyze and manage investments for various types of organizations.
FIN 467 ............................................................................................................. 3 credits
Real Estate Investment
This course involves the study of the techniques of real estate investment analysis, including financing, taxes, and decision-making criteria in today’s investment environment.
FIN 422 ............................................................................................................. 3 credits
Retirement and Benefit Planning
This course provides students with the tools necessary to create a retirement plan. After completion of this course, students will be able to identify the types of retirement plans, understand the implications of federal law on retirement plans, identify retirement
plans and participation requirements, calculate tax deduction ad
contribution limits, and create a full financial plan, including retire-
ment, for an individual.

FIN 428 .................................................................................. 3 credits
Insurance for Financial Planning
This course will prepare students to make insurance policy recom-
mendations as part of a financial plan. After completion of this
course, students will be able to apply concepts of medical, life, and
property insurance to financial planning, and understand concepts
underlying risk and insurance management for financial plans.

CERTIFICATE PROGRAMS FOR THE UNIVERSITY OF PHOENIX SCHOOL OF BUSINESS -
GRADUATE

Graduate Certificate in Human Resource Management

The following certificate program may be offered at these University of
Phoenix campus locations: Online, depending on state of residence. The
availability of programs and concentrations depend on student demand
and other factors. Not all programs may be available to all residents of all
states. Students may want to consider completing certain courses in the
Online classroom at Online rates if the program is available via the
Online modality in their state. Please contact your enrollment advisor for
more information.

The Graduate Human Resource Management Certificate Program
addresses issues which the human resource professional faces daily, from legal matters to staff recruitment and development.
This program is designed for those who have functional responsi-
bility to carry out the duties of an organization’s human resource
department; seasoned human resource staff members wishing to
keep current; newcomers to the field requiring new knowledge
and skills; and specialists wanting to broaden their knowledge.
Major topic areas covered include the role of human resources,
employment practices, employee and labor relations, compensa-
tion, benefits, safety and health, and employee development. Par-
ticipants acquire knowledge and skills that are essential in
addressing the challenges of the human resource profession.

The University reserves the right to modify the required course of
study:
- The course must have been completed within the past ten (10)
  years (3 years for IS&T courses) from current program
  enrollment agreement sign date with a grade of “B” (3.0) or

Additional Admission Requirements for the G-HRM

All applicants are expected to meet the following admissions
requirements:
- An undergraduate degree from a regionally or approved
  nationally accredited, or candidate for accreditation, college or
  university or comparable undergraduate bachelor’s degree
  earned at a recognized foreign institution or a graduate degree
  from an ABA accredited institution (i.e- JD, LLB, LLM). If the
  institution became accredited while the student was attending, a
  minimum of 75% of the coursework taken toward the degree
  must have been completed while the institution was accredited
  or during the candidacy period.
- Applicants must have access to a suitable work environment for
  the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the
  undergraduate degree posted transcript is required for
  admission.

Certificate Completion Requirements for the G-HRM

Credit Bearing Certificate completion requirements are the follow-
ing:
- Completion of a minimum of 15 credits.
- All students must meet residency requirements.
- A minimum grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as:
  Graduate Human Resource Management.

Residency Requirements and Course Waivers for the G-HRM

Completion of a minimum of 12 credits of the required course of
study to meet University residency requirements.

Students in this program may waive a maximum of 3 credits from
their required course of study on the basis of regionally or
approved nationally accredited transferable coursework.

Students who have completed graduate University of Phoenix
course work that meets the requirements for this certificate, may
apply credits earned. However, students must still meet program
residency requirements.

In order to be granted a waiver for a course in the required course
of study, the student must have completed a previous course which
meets the following criteria:
- The course must have been completed at a regionally or
  approved nationally accredited, or candidate for accreditation,
  college or university.

better.
The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HRM 595

Course Descriptions for the G-HRM

HRM 546 ................................................................. 3 credits
Human Resource Law
This course prepares human resource managers to comply with human resource laws and regulations across all jurisdictions. Students learn how to manage human resource functions within a regulatory environment. Other topics include laws and regulations related to the following: workforce planning and employment, human resource development activities, compensation and benefits, labor relations, and workplace safety.

HRM 548 ................................................................. 3 credits
Recruitment and Retention Practices
This course prepares students to evaluate and develop a workforce to attain organizational goals. Students learn to develop total reward strategies that attract and retain the best employees. Other topics include recruitment strategies, workforce planning and assessment, relocation practices, right sizing, negotiation, employment policies, and global compensation practices.

HRM 552 ................................................................. 3 credits
Organizational Training and Development
This course applies development and training concepts to enhance organizational performance. Students develop an employee engagement strategy. Other topics include training program development & delivery, employee relations, organizational development theories and applications, behavioral issues, and performance management.

HRM 558 ................................................................. 3 credits
Research in Human Resource Management
This course applies research methods to human resource functions. Students learn to use quantitative analysis and secondary research to recruit and select employees to meet organizational goals. Other topics include forecasting, evaluation of selection tests, application of selection tests, interviewing techniques, techniques to assess training program effectiveness, job evaluation methods, and external labor market analysis.

HRM 595 ................................................................. 3 credits
Human Resource Capstone Course
This content area capstone course applies human resource concepts to improve organizational effectiveness within the framework of employment laws and regulations. Students apply existing professional standards and theories to human resource management. Other topics include the alignment of human resource strategy with the organization, global workforce planning, career and leadership development, and performance analysis and appraisal.

Graduate Accounting Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Students in the Graduate Accounting Certificate will develop an understanding of accounting concepts and applications. Students will also become competent in the use of appropriate analytical tools and technologies. They will be sensitive to legal, ethical, and social values in the conduct and communication of accounting practice and decisions. In addition, students will have an understanding of a portion of the topics required in preparation for the CPA exam: Audit & Attestation, Financial Accounting & Reporting, Regulation, and Business Environment & Concepts. The Graduate Accounting Certificate is designed for students who want to enhance their accounting management skills, enter the accounting profession, or complete additional coursework required for the CPA exam.

While completing this certificate program, students who may be planning to take the CPA exam will utilize CPA Test Preparation software in conjunction with their course work.

Note: Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine if this program, combined with their undergraduate degree and any other specific criteria, meets the requirements to qualify for examination in that specific jurisdiction. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-acc.

• Completion of a minimum of 18 credits.
• A minimum program grade point average (GPA) of 3.0.
• Students who complete the Graduate Accounting Certificate and wish to enroll in the MSA program can apply courses towards the MSA program requirement.

The certificate awarded for this program will read as:
Graduate Accounting

Residency Requirements and Course Waivers/Competency for the G-ACC
Completion of a minimum of 12 credit of the required course of study to meet University residency requirements.
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
Students who have completed graduate University of Phoenix course work that meets the requirements for the Graduate Accounting Certificate, may apply credits earned. However, students must still meet program residency requirements.
In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a "B" (3.0) or better; and
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Eligible students may satisfy the two competency courses: (ACC 537, COM 530) using one of the following methods:
• Six (6) semester credits of upper-division undergraduate coursework or three (3) semester credits of graduate coursework in financial accounting that meets the following requirements will satisfy ACC 537:
  • The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university.
  • The coursework must have been completed within a C- or better, within the past ten (10) years of application to the University.
• A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in this certificate program.

Eligible students may satisfy the two competency courses: (ACC 537, COM 530) using one of the following methods:
• Six (6) semester credits of upper-division undergraduate coursework or three (3) semester credits of graduate coursework in communications that meets the following requirements will satisfy COM 530:
  • The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university.
  • The coursework must have been completed within a C- or better, within the past ten (10) years of application to the University.
• A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in this certificate program.
Course Descriptions for the G-ACC

COM 530 .................................................................................. 3 credits
Communications for Accountants
In this course, students examine principles and practices of group communication in the context of the organization. Topics include an overview of group communication, culture and conflict, group formation, influence in organizational communication, organizational change, formal communications, and public communications.
ACC 537 .................................................................................. 3 credits
Financial Accounting
In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders’ equity, statement of cash flows, and error correction and accounting changes.

ACC 541 .................................................................................. 3 credits
Accounting Theory & Research
This is the first core course in the Master of Science in Accounting (MSA). In this course, students apply accounting research tools to current accounting issues. Other topics include research of accounting questions related to: inventory, fixed assets, leases, derivative instruments, debt, contingencies, segment reporting, pensions, business combinations, consolidations, stockholder’s equity, and a program overview.

ACC 542 .................................................................................. 3 credits
Accounting Information Systems
In this course, students examine the fundamentals of accounting systems design. Topics include business information systems, business processes and data flows, database concepts and tools, internal control and risks, auditing the information system, and using the information system to perform audit functions.

ACC 543 .................................................................................. 3 credits
Managerial Accounting & Legal Aspects of Business
In this course, students examine managerial accounting as part of the business’s accounting information system and legal aspects of the business enterprise. Topics include managerial accounting and capital budgeting, cost analysis; management planning and control, negotiable instruments, secured transactions, debtor/creditor relationships, property and insurance, and legal aspects of employment and environment.

ACC 544 .................................................................................. 3 credits
Internal Control Systems
In this course, students gain a broad perspective of accounting and control that considers attainment of all goals of the organization, including those concerned with financial objectives. Topics include an overview of control, risk management, internal control systems, controls for current asset functions, controls for other accounting classifications, controls for information technology systems, and reporting on controls.

ACC 545 .................................................................................. 3 credits
Financial Reporting
This course prepares students to address concepts of financial reporting for roles as CPAs. Students learn important criteria for calculating capital changes, applying concepts of fixed assets and cost determination, and preparing consolidated financial statements. Other topics include the professional responsibilities of CPAs, deferred taxes, cash flow statements, balance sheet preparation, restructuring of troubled debt, and the intricacies of comprehensive income.

ACC 546 .................................................................................. 3 credits
Auditing
In this course, students focus on the auditing practice performed by public accountants. Topics include the CPA profession and the auditor’s role, planning the audit, audit reporting and required communications, evaluating internal controls, audit programs for current assets and liabilities, and audit programs for other business cycles.

ACC 547 .................................................................................. 3 credits
Taxation
In this course, students develop an understanding of the taxation of business entities and the individuals who own those entities. Topics include tax entities, property transactions, calculating basis, gains and losses, alternative minimum tax, S-corporations and partnerships.

ACC 548 .................................................................................. 3 credits
Not-for-Profit & Government Accounting
In this course, students receive an overview of the budgeting, accounting, financial reporting, and auditing required of government and not-for-profit organizations. Topics include the governmental accounting, accounting records in government, fund allocation, government-wide reporting, not-for-profit accounting, and governmental performance measures.

ACC 556 .................................................................................. 3 credits
Forensic Accounting
In this course, students are introduced to the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind these procedures. Topics include an overview of fraud and abuse, forensic evidence, substantive procedures for cash outflow irregularities, substantive procedures for asset irregularities, financial statement fraud, and examination reporting.

ACC 557 .................................................................................. 3 credits
Accounting Ethics
In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.

ETH 557 .................................................................................. 3 credits
Accounting Ethics
In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.
Graduate Marketing Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. This course prepares students to apply marketing concepts to create and sustain customer value. Students learn to solve marketing problems in a collaborative environment. Topics include market research, customer relationships, branding, market segmentation, product development, pricing, channels, communications, and public relations.

MKT 544                                         | 3       |

Integrated Marketing Communications

This course prepares students to apply integrated marketing communications as part of a strategic marketing plan. Students evaluate how marketing communication tools build brand value. Topics include advertising, promotions, public relations, sales, and direct marketing.

MKT 554                                         | 3       |

Consumer Behavior

This course prepares students to apply buyer behavior theories in the marketplace. Students evaluate how demographic, psychological, and socio-cultural issues contribute to buyer behavior. Topics
include consumer preference, brand perception, attitude formation, persuasion, motivation, and consumer protection.

MKT 552 ......................................................... 3 credits

**Technology Applications and e-Marketing**

This course prepares students to integrate technology in marketing functions. Students design the organization and content of a website to accomplish one or more marketing objectives. Topics include basics of the World Wide Web, bandwidth, servers and storage, e-Marketing, e-Commerce, and targeting customers.

MKT 562 ........................................................................... 3 credits

**Advanced International Marketing**

This course prepares students to develop and manage a marketing strategy in an international business environment. Students evaluate case studies of previous product launches and current research to create a launch strategy for a specific country. Topics include distribution systems, socio-cultural perspectives, business customs, product and service adaptations, and pricing issues.

MKT 595................................................................. 3 credits

**Product Design and Development**

In this content area capstone course students design an innovative product or service that satisfies an unmet consumer need. Students use research methods to identify opportunities or new product features that reflect the latest market trends. Topics include market environmental analysis, marketing strategy, the marketing process, product development, ethics and social responsibility, innovation and diffusion, pricing strategy, and strategic marketing issues.

**Graduate Project Management Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Project Management Capstone

The University reserves the right to modify the required course of study.

**General Information for the G-PM**

The Certificate Track graduate program is designed to be an option for students to earn a certificate en-route to earning the graduate degree.

Students who completed a certificate in its entirety and who later choose to enroll in a graduate program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the graduate program.

**Additional Admission Requirements for the G-PM**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- Applicants must have access to a suitable work environment for the completion of course assignments.

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

**Certificate Completion Requirements for the G-PM**

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.

- All students must meet residency requirements.

- A minimum grade point average (GPA) of 3.0.

- Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.

- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read as: Graduate Project Management

**Residency Requirements and Course Waivers for the G-PM**

Completion of a minimum of 12 credits of the required course of study to meet University residency requirements.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or
approved nationally accredited transferable coursework.

Students who have completed graduate University of Phoenix coursework that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

The following courses in the Required Course of Study may not be waived: MGT 521, PM 598

Course Descriptions for the G-PM

PM 582 .................................................................3 credits

Project Leadership

This course prepares students to lead a project to successful conclusion. Students will create a plan to lead change during project execution. Other topics include integrated change control, work breakdown structures, human resource planning, performance reporting, managing stakeholders, negotiation, conflict resolution, and cultural diversity.

PM 584 .................................................................3 credits

Project Risk Management

This course applies risk management concepts to project execution. Students will create contingency plans for a project. Other topics include risk identification, qualitative analysis, quantitative analysis, response planning, monitoring & control, and proactive planning.

PM 586 .................................................................3 credits

Project Quality Management

This course applies quality control techniques to project development and implementation. Students will create a continuous quality improvement plan for projects within an organization. Other topics include scheduling, quality planning, quality assurance, scope management, schedule control, and quality control.

PM 598 .................................................................3 credits

Project Management Capstone

In this concentration capstone course, students will design a project to meet an organizational need. Students will collaboratively create a project plan using Microsoft® Project software. Other topics include Project Management Professional (PMP) certification preparation.
Environmental Sustainability Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate provides an overview of sustainable practices and applications from the environmental science perspective. Current and historical environmental issues are evaluated by examining the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of action for environmental management. This certificate program is comprised of five categories: energy, business, agriculture, architecture and green materials, and sustainable ecosystems. Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Environmental Sustainability**

Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and energy efficient home or building design.

**Energy and the Environment**

This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.

**Introduction to Sustainable Agriculture**

This course introduces students to the field of industrial ecology.
Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.

SUS 350.....................................................................................3 credits

Green Building and Urban Planning
This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.

SUS 370.....................................................................................3 credits

Sustainable Ecosystems
In this course, students evaluate the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and manage habitats and populations.

SUS 380.....................................................................................3 credits

Sustainable Planning and Land Use
In this course, students evaluate strategies that lead to the promotion of sustainable development, planning, and land use. Students develop a sustainable land use plan for natural and human-dominated landscapes and its impact on socioeconomic issues. Upon completion of the course, students are able to apply management strategies and relevant land use practices to achieve sustainability.

SUS 385.....................................................................................3 credits

Sustainable Ocean Use
In this course, students evaluate the principles of sustainable ocean use. Students analyze the environmental and economic role of the oceans. The sources and impact of ocean environmental degradation are examined. Topics include fisheries, aquaculture, natural resources and uses, and pollution. Sustainable management practices are analyzed by examining global environmental policies and regulations.

Cultural Studies and Communications Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Cultural Studies and Communication certificate explores how culture informs and shapes communication and how communication creates, modifies, and challenges culture. Through theory, analysis and practice in understanding culture, students will analyze its impact on communication. There is also an emphasis on exploring how various interdisciplinary areas can combine with the use of cultural awareness and multicultural sensitivity to improve communication skills.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/csc.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Additional Admission Requirements for the CERT/CSC

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
CSC Residency Requirements and Course Waivers for the CERT/CSC

- The course must have been completed at a regionally or approved nationally accredited transferable coursework. Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Certificate Completion Requirements for the CERT/CSC

- Completions of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

Residency Requirements and Course Waivers for the CERT/CSC

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must have access to a suitable work environment for the completion of course assignments.

Course Descriptions for the CERT/CSC

CSC 390.................................................................................... 3 credits

Culture and Communication
Students will be introduced to the interdependent relationships between symbols, rituals, artifacts, and patterns of thought of cultural groups and the communication practices of those groups. They will engage in critical analysis of communication in contemporary society, including culture-based metaphor, nonverbal communication, advertising, print media and television.

CSC 391.................................................................................... 3 credits

Geography, Culture and Communication
This course will focus on the ecological and historical approach to cultures and communication and how they have changed within a global and spatial context. Themes will include how cultures and communication was altered due to the following triggers: adaptation to "natural" environment; culture in prehistory; migration; creation of cultural areas; fire as a cultural artifact; world views of primitive, traditional and industrial culture; cultural landscape; and the cultural geography of the United States.

CSC 392.................................................................................... 3 credits

Ethnic and Cultural Diversity
Students in this course will explore the implications of ethnicity, culture, and diversity within the context of society. Students will be introduced to racial and ethnic relations, prejudice, stereotypes, discrimination, and adaptation and conflict in diverse cultures.

CSC 475.................................................................................... 3 credits

Contemporary Communication in a Diverse Society
The objective of this course is to focus on the dynamics of human and mediated communication across cultures in a multicultural society. Communication styles of various co-cultures will be analyzed, including race, class, gender, sexuality and disability. Students will also analyze communication technology and evaluate how it affects communication in today's society.

CSC 476.................................................................................... 3 credits

Gender Communication
The objective of this course is to explore gender communication differences including how traditional and nontraditional gender roles and sexuality factor into these differences. Students will focus on gender communication in business, organizations, family and the media.

CSC 477.................................................................................... 3 credits

Race and Class in the Media
Through filmic analysis, cultural history, and media theory, students will explore the ways in which media in the United States participate in and challenge prevailing ideologies toward race, class and difference. Students will examine how various ethnic groups, including Native Americans, Asian Americans, African Americans, Latinos/as, and Whites are presented and what those images mean for audiences.
Leadership Communication in Organizations  
Certificate (Undergraduate)  

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Leadership Communication in Organizations certificate proves the premise that communication is the essence of effective leadership. The complexities of relationships and the competitive nature of business demand leaders with highly polished interpersonal, intercultural, and organizational skills. This certificate provides the practical and theoretical knowledge needed to provide innovative leadership in corporate settings, the military, non-profit, government, politics, or within the global community.

- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- • The certificate awarded for this program will read as: Leadership Communication in Organizations (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/LCO**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the CERT/LCO**

**Leadership Communication**

This course examines strategies and best practices in communication as the core driver of effective leadership. Students will identify essential characteristics of leadership, understand leadership theories, and apply this knowledge in assessing their own leadership
communication abilities, and developing and understanding of how content, channel, and leadership style affect and impact internal and external audiences.

LCO 336 ................................................................. 3 credits

Organizational Communication Theory
This course identifies the nature of organizational communication and provides seminal organizational communication theories within the context of the traditional, interpretive, and critical perspectives. Students will gain knowledge of core theories along with the organizational dynamics of culture, diversity, and ethics. They will understand the effects of technology and innovation, along with power, conflict, organizational structure, and the need for organizations to develop informed organizational communication strategies.

LCO 372 ................................................................. 3 credits

Leadership Communication Ethics
This course will focus on the ethical challenges and responsibilities of being a competent leader and communicator in a diverse and changing world. Students will learn to apply ethical and moral leadership theory and reasoning to a variety of organizational communication processes and contexts.

LCO 348 ................................................................. 3 credits

Advanced Group Communication and Leadership
This course focuses on the issues of group dynamics and leadership encountered when dealing with complex, strategic, and critical public or corporate entities. It will build on the fundamentals of group dynamics and leadership, which were covered in previous courses, and provide advanced work in theory of groups and theory of leadership. Students will explore and analyze effective group interaction in task-oriented situations, and consider small-group structures and communication styles that influence the problem-solving process.

LCO 465 ................................................................. 3 credits

Conflict Management
This course will explore advanced methods for dealing with intrapersonal, interpersonal and group conflict. Students will investigate and apply the theoretical and practical aspects of situation assessment, conflict management, negotiation, and mediation, giving them opportunities to improve their communication, critical thinking, and problem solving skills.

LCO 480 ................................................................. 3 credits

Social Media and the Organization
This course will focus on the strategic implementation of social media tools as they relate to a firm’s integrated marketing communication strategies. Students will learn how to effectively use social media to improve external communication, marketing and advertising by studying and analyzing websites, social media sites, and affiliate sites to determine how successful companies utilize social media to improve their communication and attract their target audience to achieve their business goals.

Communications and Technology Certificate (Undergraduate)
------------------------------------------------------------------------------------------------------------------
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

Communication and Technology is an interdisciplinary certificate for students interested in combining practical information technology skills with communication theory. Students in the certificate will analyze the evolution of technology and how these advancements have affected how we communicate. They will also learn skills in cutting edge technology, web and multimedia design, and how to deliver information electronically by using creative and innovative approaches.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ct.

Residency Requirements and Course Waivers for the CERT/CTL
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited transferrable coursework.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of ‘C’ (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/CTL

BSCOM 330..............................................................................3 credits
Computer Mediated Communication
This course introduces students to the social functions and communities evolving from and developed around computer-aided technologies. Topics will include the history of computer-mediated communication, how society uses these technologies and their effects on our lives. Students will submerge themselves in virtual spaces, online communities, as well as complete communication projects using various devices, such as cell phones and tablets, to gain a better understanding of how technology affects the way they operate and communicate within their daily lives.

BSCOM 435..............................................................................3 credits
Creativity and Communication
Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of creative is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one’s creativity is one of the primary focuses of the course.

VCT 300....................................................................................3 credits
Image Editing
This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on file formats, composition, color, text design, retouching and manipulation of graphic and photographic images.

VCT 305....................................................................................3 credits
Digital Design
This course presents principles of digital design. An overview of digital design is presented that includes designing and developing creative presentations across various Medias including print, video, web, and mobile platforms.

VCT 320....................................................................................3 credits
Electronic Publishing
This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

VCT 420....................................................................................3 credits
Multimedia Development
This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.
Marketing and Sales Communication Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The certificate in Marketing and Sales Communications focuses on the science of humanistic interaction in marketing and sales. Emphasis is placed on understanding the psychology of behavior, and the impact that it has on marketing communication tools and strategies. The ethical responsibility associated with customer message management is also emphasized throughout the program. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms.

Marketing and Sales Message Management

The University reserves the right to modify the required course of study. Required Course of Study for the CERT/MS, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of 'C' (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/MS
BSCOM 384 ................................................................. 3 credits
Marketing Communications

This course provides students with the basic concepts and methods related to marketing communications, including communication theories and the communication mix. Emphasis is placed on the marketing mix variables of product, place, price, and promotion, as well as marketing communications tools.

PSY 322 ........................................................................... 3 credits
Consumer Psychology and Research

This course focuses on consumer behavior and marketing research. Topics include the cognitive processes underlying consumer choice, descriptive consumer characteristics, and environmental consumer behavior. This course emphasizes the implications of consumer behavior on domestic and global marketing communications.

Certificate Completion Requirements for the CERT/MS
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

The certificate awarded for this program will read as:
Marketing and Sales Communication (Undergraduate)

Residency Requirements and Course Waivers for the CERT/MS
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of 'C' (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Additional Admission Requirements for the CERT/MS
All applicants are expected to meet the following admissions requirements:
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.
BSCOM 300 ..............................................................................3 credits
Advertising and the Media
This course addresses the elements of advertising and the media. Topics include advertising concepts, selection of media, and the use of media and advertising as marketing communications tools. The course also emphasizes the ongoing convergence of media content and commercial messages and how it is redefining marketing communications.

BSCOM 385 ..............................................................................3 credits
Public Relations and Message Management
This course focuses on the role of public relations in marketing communications and how it can be used to attain organizational marketing and sales objectives. Topics covered in this course include media relations, relationship-building strategies, crisis communication, ethics, and the development of public relations messages.

BSCOM 386 ..............................................................................3 credits
Sales Communications
This course addresses the elements of sales communications. Topics include sales promotion, direct sales, personal selling, and customer relationship management as marketing communications tools.

BSCOM 470 ..............................................................................3 credits
Marketing and Sales Message Management
This course focuses on bridging the gap between sales and marketing communications through the use of customer message management. Topics covered in this course include creating a sense of value for customers, the development of marketing communications campaigns, the integration of the sales cycle and marketing communications, the use of a single voice to customers across all selling touch-points, and the ethical considerations associated with customer message management.

Journalism Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The journalism certificate focuses on the contemporary initiatives and multi-tiered technology of today’s field of journalism. The curriculum emphasizes a variety of communication techniques, to include writing and reporting, that assist in understanding the ways individuals and organizations share and publish information. The awareness of ethical and social responsibility associated with the modern media landscape is emphasized throughout the program.

For more information about our graduation rates, the median debt with the modern media landscape is emphasized throughout the program. Students must meet established University residency requirements.

- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/JRN

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

The certificate awarded for this program will read as: Journalism (Undergraduate)
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the CERT/JRN**

**JRN 310** .................................................................................... 3 credits
**Introduction to Journalism**
This course is the introduction to the journalism concentration. The role of the journalist will be described from its origin to the emergence of the modern-era journalist. Key journalistic theories and principles will be discussed. Special attention will be given to influences in journalism and qualities that exemplify journalistic writing. The concepts of journalistic writing, research, technology, ethics, and personal responsibility will be introduced. Controversial issues faced by journalists will be highlighted throughout the course.

**JRN 320** .................................................................................... 3 credits
**Research for Journalism**
This course focuses on the research methods employed in journalistic writing and reporting. The goal of this course is to enhance the understanding of the characteristics of credible sources and accurate information. Information will be assembled and evaluated to support journalistic goals by interpreting information needs, choosing accurate and unbiased sources, and selecting relevant and reliable information. The importance of employing ethical practices to research techniques is emphasized throughout the course.

**JRN 330** .................................................................................... 3 credits
**Journalistic Writing I**
This course focuses on understanding journalistic writing styles. The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.

**JRN 340** .................................................................................... 3 credits
**Journalistic Writing II**
This course focuses on the application of the diverse journalistic writing techniques used by today’s changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The association between research and responsible writing will be explored, as writing strategies to craft effective messages are developed. The role of ethics in journalism is emphasized throughout the course.

**JRN 350** .................................................................................... 3 credits
**Controversial Issues in Journalism**
This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter’s ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public’s need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.

**JRN 360** .................................................................................... 3 credits
**Storytelling: A Multimedia Approach**
This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.
CERTIFICATE PROGRAMS FOR THE COLLEGE OF SOCIAL SCIENCES

Graduate Mediation Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Mediation Certificate Program prepares students for the practice of mediation in a variety of different employment settings. Students will learn how to approach conflict with a “mediation mindset” along with the skills required for maintaining objectivity as a neutral facilitator of the mediation process. The program surveys models and approaches to mediation and dispute resolution, and incorporates current research on mediation, including the dynamics of culture and gender, and legal and ethical issues.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the G-MDT

MDT 520

Foundations of Mediation I

MDT 521 ~

Foundations of Mediation II

MDT 522 ~ Cultural and Gender Dynamics in Mediation

MDT 523 ~ Legal and Ethical Issues in Mediation

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the G-MDT

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.

• No work experience is required for this program.

Certificate Completion Requirements for the G-MDT

• The completion of a minimum of 12 credits.

• A minimum grade point average (GPA) of 3.0.

Minimum Grade Requirements for the G-MDT

• Students who fail to meet the minimum grade requirement will be permanently withdrawn from the program and will be placed on scholastic suspension (SS status). Appeals through SAC for readmission to the program will not be accepted by the College of Social Sciences.

Minimum Grade Requirements for the G-MDT

• The certificate awarded for this program will read as:

  Mediation

Foundations of Mediation I

This is the first part of the foundation course for the Mediation/Conflict Management program that is designed to provide students with knowledge of the basic standards, principles, and skills needed for the practice of mediation. This course focuses on personal communication skills and the impact of conflict, emotions, and diversity on individual perceptions as they relate to the practice of mediation. This course combines lecture with a variety of application exercises in dyads and small groups, including mediation role-plays and related assessments.

MDT 521

Foundations of Mediation II

This is the second segment of the foundation course for the Mediation/Conflict Management program that is designed to provide students with knowledge of the basic standards, principles, and skills needed for the practice of mediation. This course focuses on specific stages in the mediation process including the opening statement, storytelling, issue identification, agenda setting, negotiation techniques, dealing with impasse, and creating a mediation agreement. In addition, ethics in mediation is addressed. This course combines lecture with a variety of application exercises in dyads and small groups, including mediation role-plays and related assessments.

MDT 522

Cultural and Gender Dynamics in Mediation

This course is an introduction to the complex ways in which cultural and gender issues impact mediation practice. Students will increase their understanding of cultural and gender-based challenges in the field of peacemaking and conflict resolution. They will enhance their communication and mediation skills to more effectively facilitate dispute resolution processes.
MDT 523 ................................................................. 3 credits

Legal and Ethical Issues in Mediation
Students will examine the differences and similarities between practicing mediation and other professions, such as law and psychological counseling. Students will focus on the legal and ethical issues in mediation, especially conflicts of interest, mediator neutrality, confidentiality, mediator liability, and enforceability of mediation agreements. The course will address state licensing and certification requirements, statutes, and case law as they pertain to the professional and community-based volunteer mediators. Additionally, students will examine mediation codes of conduct and standards of practice.

Human Services Management Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Social Services Management is comprised of 4 fundamental courses that provide a foundation for the more specialized courses in management within the social services arena and an additional 4 courses focused on organizational management and grant writing. Students will learn the components of indirect services associated with systematic delivery of direct social services, and to employ management practices to inspect, distinguish, and measure the important attributes of program management and supervision. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

The University reserves the right to modify the required course of study.

General Information for the CERT/HSM

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the CERT/HSM

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student's official transcripts.

- Applicants must demonstrate competency in College Writing. Students have the following options to satisfy this requirement:
  - Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.
  - Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.

  - Achieve a passing score on the College Composition CLEP exam.

Certificate Completion Requirements for the CERT/HSM

- Completion of a minimum of 24 credits.

- A minimum grade point average (GPA) of 2.0.

- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.

- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• All students must complete the minimum number of credits required by their certificate program.
• The certificate awarded for this program will read as: Human Services Management

Residency Requirements and Course Waivers for the CERT/HSM
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345

Course Descriptions for the CERT/HSM
BSHS 305 ..................................................................................................................3 credits

Historical Development of Human Services: An Introduction
In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.
BSHS 325 ..................................................................................................................3 credits

Human Systems and Development
Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.
BSHS 335 ..................................................................................................................3 credits

Ethics and Values for Human Service Professionals
In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.
BSHS 345 ..................................................................................................................3 credits

Diversity and Special Populations
The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.
BSHS 425 ..................................................................................................................3 credits

Administration & Management of Human Service Programs
Administration and management involve components of indirect services associated with systematic delivery of direct human services. Students will learn theories of strategic planning, human resource management, strategies for evaluation and planning the development of human service organizations, elements of agency operations, risk management, budgeting, and fiscal acquisition through grant writing and contract negotiation. The emphasis of this course is on leadership development, and managing professional and volunteer staff. Additional content areas addressed in the course involve advocacy efforts and grass roots movements focused on constituency building.
BSHS 426 ..................................................................................................................3 credits

Human Services Management: Theory & Practice
This course traces the historical context of human services management as it relates to current theory and practice. Students will examine strategies for managing an integrated, diverse workforce and prepare to be generalists, understanding the scope of leading an organization with commonly encountered agency pressures. Students will employ learned management practices to inspect, distinguish, and measure the important attributes of program management and supervision. By demonstrating a basic understanding of organizational behavior and the challenges of embracing workforce diversity, dynamic systems change, performance evaluation and effective communication with a range of Para-professional and professionals, students will explore their roles as managers in the growing human services field.
following the course number.

  - Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.

BSHS 427 .................................................................................................................. 3 credits
Critical Thinking Skills in Management Decision Making
This course will familiarize students with strategies related to making sustainable decisions. Techniques used to make decisions, solve problems and lead environments will be explored. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Specific details to human services are considered and methods for service delivery to needs-based populations and the workers who serve in this capacity. Students are introduced to, and will demonstrate understanding of, the Six Sigma elements and a five-step approach for process improvement.

BSHS 428 .................................................................................................................. 3 credits
Human Services Program Design & Proposal Writing
This course introduces students to the purposes, challenges and benefits of program design and grant writing. Students will review components of each and conduct a needs assessment and develop a business case for implementation on program design. Special attention will be given to research for finding available funding sources and how to form important partnerships. Students explore the methods of research using quantitative, qualitative and mixed-method program design concepts. Students will examine concepts of logic models and their impact on people, processes, and conditions related to program design. Using a specific framework, learners will uncover funding possibilities and use tools to prepare for the rigor related with grant writing. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.

Gerontology Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Human Services Gerontology is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

BSHS 335 .................................................................3 credits

Ethics and Values for Human Service Professionals
In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 .................................................................3 credits

Diversity and Special Populations
The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single par-
Grief, Loss and End of Life Issues
In this course students will learn strategies for facilitating the transition from curative measures to palliative care for the relief of emotional/psychological distress, pain, and a range of physical symptoms. Core competencies involve demonstrated learning of methods for anticipating the demands of end-of-life caregiving including advanced directives, 24/7 services, hospice case management, care and placement options, and easing the common challenges as individuals and families move from care and grief modalities to acceptance and healing. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

Family and Child Services Certificate
The following certificate program may be offered at the University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Human Services Family and Child Services is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on developing competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems, and will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

Family Violence Across the Lifespan: A Multi-Strata Problem
Family and Social Systems: Contemporary Trends and Issues
Childhood Abuse and Neglect
The University reserves the right to modify the required course of study.

**General Information for the CERT/FCS**

This certificate program may be taken on its own or may be earned en-route to earning a bachelor's degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding 'Certificate Track' bachelor's program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelor's program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the CERT/FCS**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student's official transcripts.
- Applicants must demonstrate competency in College Writing. Students have the following options to satisfy this requirement:
  - Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.
  - Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
- Achieve a passing score on the College Composition CLEP exam.

**Certificate Completion Requirements for the CERT/FCS**

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Family and Child Services

**Residency Requirements and Course Waivers for the CERT/FCS**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345, BSHS 405

**Course Descriptions for the CERT/FCS**

- BSHS 305: Historical Development of Human Services: An Introduction
  - In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training;
  - BSHS 325: Family and Child Services; Human Systems and Development
  - Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.
BSHS 335 ................................................................................. 3 credits

Ethics and Values for Human Service Professionals
In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 ................................................................................. 3 credits

Diversity and Special Populations
The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BSHS 405 ................................................................................. 3 credits

Intervention, Direct Service Delivery & Case Management
This course provides an overview of the role of the human service worker as a change agent with a focus on the application of theory and skills necessary for providing interventions and direct service delivery to individuals and groups. Specifically, students will develop competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Additionally, students will learn how to access resources, use consultation, and make referrals. Students will complete Module 16 of the MHF training.

BSHS 406 ................................................................................. 3 credits

Family and Social Systems: Contemporary Trends and Issues
Theories of public and private families, as differentiated by societal interaction, are explored with a focus on family systems as they exist within social systems. Micro and macro family environments are investigated. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems. Topics include the family, the state, and social policy with historical perspectives from federal and state legislation. Students will debate current trends in social policy, the efficacy of social welfare systems on a global scale, and demonstrate an understanding of the concept of practical compromise. Roles of the human service worker as advocate and service provider in the family systems context will be addressed.

BSHS 407 ................................................................................. 3 credits

Family Violence Across the Lifespan: A Multi-Strata Problem
This course explores the phenomenon and social problem of family violence with both macro- and micro-theory explanations and an in-depth literature review. Students will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Attention is focused on professional and social responses that include clinical interventions, educational initiatives within schools, and responses to the disclosure of family violence in agency and private settings. Skills to develop a human services approach to preventing family violence are enhanced in this course; students are required to outline their own personal and professional roles in the movement to end family violence.

BSHS 408 ................................................................................. 3 credits

Childhood Abuse and Neglect
This course focuses on the segment of family violence involving physical child abuse, child sexual abuse and exploitation, child neglect and psychological maltreatment of children. Students will examine the scope of these problems and the characteristics of both victims and perpetrators while conducting a search for patterns and dynamics of each distinction. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases. Areas of focus involve various forms of each category including indicators for the range of abuses on an international scale with child labor, slavery, and child prostitution issues.

Addictions Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The undergraduate Certificate Program in Human Services Addictions is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on the roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

Students will complete Module 9 of the MHF training.

**BSHS 455 ................................................................. 3 credits**

**Addiction Interventions for Human Service Workers**

This course has a focus on familiarizing students with fundamental interventions used in drug and alcohol treatment settings. Students will conduct an investigation of 12-step, alternative support group, secular organization, therapeutic community, and structured inpatient/outpatient approaches to intervention and treatment. Students will be prepared to apply basic skills for assessing and evaluating client needs, making referrals, and working as a colleague in groups of professional service providers. An exploration of commonly used evaluation instruments for assessing level of care is underscored along with tenets of co-facilitation of treatment groups and assessing special population needs. Students will demonstrate foundational knowledge and understanding of guidelines for treatment as outlined by the Substance Abuse and Mental Health Services Administration and the American Society of Addiction Medicine’s Patient Placement Criteria.

**BSHS 457 ................................................................. 3 credits**

**Codependence & Working with Families**

In this course students will demonstrate an understanding of the impact of controlling behaviors and supporting dysfunction in relation to addictions and families. Theories of codependency are explored as a disease of loss of selfhood and an addiction resulting from an imbalance of inner and outer self-awareness. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate understanding and skill in case management and referral for treatment in addition to assisting clients with recovery goals, self-awareness, self-acceptance, self-responsibility and self-reflection with a focus on prevalence, and consequences of codependency in families.

**BSHS 458 ................................................................. 3 credits**

**Action Planning, Relapse Prevention & Aftercare**

This course provides advanced skills development for the addiction and chemical dependency human service worker. Students will conduct an in-depth evaluation of various treatment approaches employed when preparing action plans with clients. An investigation of comprehensive treatment programs, community action programs, school-based programs, and public health approaches to relapse prevention and aftercare strategies will provide students an opportunity to develop and present an individualized program for a fictional client. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

**BSHS 325 ................................................................. 3 credits**

**Human Systems and Development**

This course introduces students to the biology of addiction, including brain reward mechanisms, the role of environment and genetics, psychodynamics, and the impact of addiction on individuals, families, and communities. The roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis are emphasized in the course. The course examines major models of conceptualizing and integrating prevention, intervention, rehabilitation and maintenance/relapse prevention. Students will learn strategies for accessing supportive measures and case management processes for developing wrap-around action plans for service delivery to individuals and groups with addiction and chemical dependence related issues.
Military Family Counseling Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Military Family Counseling Certificate program is designed for mental health practitioners who want in-depth information and training to prepare them for working with military service members and their families. The strain on the military to provide essential services to military families has increased as a result of recent global conflicts. Civilian counselors must now be versed in the knowledge and skills necessary to work with military families. This 18-credit program includes two foundational courses in family counseling and addictions and four courses that focus on military family life, military culture, major issues and concerns that military families face, and assessment of and appropriate interventions for working with military families.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/

Assessment and Intervention Strategies for Military Families

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/MLFC
All applicants are expected to meet the following admissions requirements:
- A graduate degree in counseling, social work, psychology, counseling psychology, or related field from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript.

Certificate Completion Requirements for the CERT/MLFC
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as: Military Family Counseling

Minimum Grade Requirements for the CERT/MLFC
- Students in this certificate are required to achieve a minimum grade of "B-" (2.67) in all courses. A "C+" grade is not acceptable. Students who fail to receive a minimum grade of "B-" in any course will be scholastically disqualified from the University.
- Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension (SS status). Appeals through SAC for readmission to the program will not be accepted by the College of Social Sciences.

Residency Requirements and Course Waivers for the CERT/MLFC
Completion of a minimum of 12 credits of the required course of study to meet University residency requirements.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Students who have completed graduate UOPX course work that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: MLFC 560, MLFC 566, MLFC 567, MLFC 568

Course Descriptions for the CERT/MLFC
MLFC 565 ................................................................................3 credits
Family, Couple and Child Counseling

This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students address integrative approaches to assessment and diagnosis in family therapy and explore systemic approaches to treatment of issues common to families and children in clinical settings. Additionally, students contrast fundamental assumptions of systems theory with intra-psychic theories.
MLFC 561  ................................................................. 3 credits
Dependency and Addictions
This course addresses addiction concepts and counseling practices. Topics include an overview of dependency theories, major substances of abuse, assessment, diagnosis, treatment modalities, special topics, and working with diverse populations.

MLFC 560  ................................................................. 3 credits
Historical and Cultural Perspectives of the Military
This course focuses on understanding the historical and cultural perspectives of the military. The unique characteristics of military life, the effect on individuals in military families, and the differences between required service during the draft and voluntary service since the early 1970s are presented. Issues such as military jargon, differences between the services, rank and pay-grade categories, and other basic information related to military culture are covered. In addition, the course provides an overview of the need for additional mental health services and trained mental health professionals who can work with military families. Ethical and legal issues involved in counseling military families are also introduced.

MLFC 566  ................................................................. 3 credits
Grief/Loss and Transition Issues for Military Families
This course focuses on the transitions that military family members face regularly and discusses the experiences of bereavement and grief usually associated with these transitions. Frequent family disruptions, such as the deployment cycle and its effect on the family, are reviewed. A foundational model is presented where all transitions are understood by clinicians and by the families with which they are working. Coping and counseling strategies are presented to assist families through the cycles and transitions. Trauma and posttraumatic stress issues are also presented.

MLFC 567  ................................................................. 3 credits
Counseling Military Families
This course focuses on the strengths, vulnerabilities, and capabilities of a military family, including the unique aspects of guard and reserve families. The family systems model is used to address issues that different family members face, including spouses, children, and families of unmarried service members. Parenting issues relevant to military families are also addressed. During the course, local resources are explored to assist families throughout their military service.

MLFC 568  ................................................................. 3 credits
Assessment and Intervention Strategies for Military Families
The focus of this course is on the assessments and interventions used to work with military families. When providing assessments and interventions, it is crucial to understand that the military has a distinct culture. This course explores how professionals can address the stigma associated with service members seeking mental health care, which may deter them from receiving therapy. Ethically and culturally appropriate, theory-based assessment and interventions strategies are explored. In addition, current research on best practices is considered, and case conceptualizations are required.
• If the results of the 10 panel, plus alcohol drug test is positive for a prescribed drug(s) but not those that would be defined as illegal in the definitions above:
  • The student shall, within three (3) business days, obtain a written statement from their treating, licensed health care provider (MD, DO, HMD, ND/NMD, NP or PA) stating that:
    • the drug level is within prescribed limits.
    • the level does not indicate abuse.
    • the student’s use of the drug as prescribed will not interfere with safe practice in the clinical area.

This statement must be provided to the Campus College Chair, Director of Nursing, or NP Program Manager. If the statement is approved, then the test result will be deemed acceptable and not failed for these purposes.

• The failure of a student to provide the above statement or a health care provider’s inability to provide a statement meeting the requirements above shall be treated as a positive test for an illegal drug.

• Students who refuse to submit to a “for-cause” drug test will not be allowed to return to any clinical setting pending conclusion of a full review by the Office of Dispute Management and Apollo Ethics and Compliance. The findings may result in dismissal from the nursing program and expulsion from the University. The results of a positive test for illegal drugs as defined herein or a refusal to undergo a required drug test will be reported to the applicable State Board of Nursing where required by the applicable State Board(s) of Nursing’s statute(s) or regulation(s).

• Students must also adhere to any other additional policies prescribed by the clinical agency. It is the sole responsibility of the student to read and acknowledge the requirements of the clinical health care facility in addition to University policy.

• All costs associated with the drug test, including any transportation costs to or from the drug testing facility, will be the responsibility of the student.

• University of Phoenix, College of Nursing, campus officials may be required to report all failed drug tests to each State Board of Nursing in which the student holds a nursing license or certificate. Campus officials shall report test results to all applicable State Boards of Nursing as described in the applicable Board’s statutes and/or regulations.

852
Graduate Health Care Informatics Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate program is designed for health care and nurse professionals interested in pursuing or advancing in careers associated with health care informatics and technology. Individuals with little or no background in Informatics receive an overview of informatics as it relates to delivery within a health care facility. The program is designed to provide the learner with current knowledge in concepts of health care informatics, systems life cycle, and data management. The 10 credit-bearing specialization is available as a certificate program for post-baccalaureate students. The four courses in the informatics specialization certificate program are available at campuses offering nursing or health care degree programs using a variety of delivery methods.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/hci.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the HCI

HCS 504 Introduction to Graduate Study in Health Sciences/Nursing
HCI 500 ~ Concepts of Health Care Informatics
HCI 510 ~ Systems Life Cycle
HCI 520 ~ Data Management and Design

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the HCI

All applicants to this certificate program are expected to meet the following additional admission requirements:

- Completion of an undergraduate degree or the entire University of Phoenix BSN, BSHCS or BSHA Required Course of Study with a minimum GPA of 2.5 or better verified by providing an official transcript.

Certificate Completion Requirements for the HCI

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 10 credits
- A minimum University program grade point average (GPA) of 3.0.

Residency Requirements and Course Waivers for the HCI

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 7 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to waive a course in a HCI Certificate Program, the student must have completed a previous course which meets the following criteria:

- The course must have been completed and transmitted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

The following course will not be waived from the certificate program: HCS 504.

Course Descriptions for the HCI

HCS 504 Introduction to Graduate Study in Health Sciences/Nursing

This course provides new graduate students in the college with an introduction to strategies for success within the University’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.

HCS 500 Concepts of Health Care Informatics

This course will introduce the student to the basic concepts of health care informatics and health information management. It will build on a historical foundation of informatics and roles of the informatics specialist.

HCI 510 Systems Life Cycle

This course will focus on the selection and implementation of an information system within a health facility. The course will review the phases of the life cycle: planning, analysis, design, implementation and evaluation.

HCI 520 Data Management and Design

This course will provide an overview of the understanding of how data, information and knowledge provides the foundation for healthcare information systems. The course will focus on the concepts of information and knowledge in relation to databases, systems operations and information systems.
Gerontological Health Care Certificate Program

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This program is designed to provide health care professionals with diverse interdisciplinary backgrounds with the knowledge and process of aging. Content is designed to provide students with relevant information related to the physical, mental, and social aspects of gerontology as well as human services, economic and legal factors that influence elders.

With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for well elders as well as those elders compromised by chronic illnesses or disabilities. Career opportunities are increasing and are not limited to just long term care. Business, industry, community health, federal and local governments and professional organizations will look to include workers prepared to understand the needs of this population as a major consumer of their products and services.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ghc.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the GHC

HCS 548 ........................................................................3 credits
Foundations of Gerontology
HCS 551 ~ .................................................................3 credits
Biological and Psychological Aspects of Aging
HCS 557 ~ .................................................................3 credits
Social and Cultural Aspects of Aging
HCS 565 ~ .................................................................3 credits
Organization and Management of Aging Services
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the GHC

All applicants to this certificate program are expected to meet the following additional admission requirements:

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• A minimum of one year full-time post-high school work experience.

Certificate Completion Requirements for the GHC

Credit Bearing Certificate completion requirements are the following:

• Completion of a minimum of 12 credits.
• All students must meet residency requirements as set by the Dean for each Certificate program.
• A minimum certificate program grade point average (GPA) of 3.0.
• Upon successful completion of HCS 548, HCS 551, HCS 557, and HCS 565, the student must submit a certificate application for GHC, as well as use these courses towards their MHA/GER program requirements. University residency applies to both programs, but students will be considered to have met program residency.
• Students enrolled in the courses as part of their degree will not be able to then request these courses as an additional certificate.

Residency Requirements and Course Waivers for the GHC

MHA/GER students may dual enroll in this program and submit a certificate application upon successful completion of HCS 548, HCS 551, HCS 557, and HCS 565. The courses may apply to both the GHC and MHA/GER required course of study. University residency applies to both programs, but students will be considered to have met program residencies.

Students in the Gerontology Health Care Certificate Program may waive a maximum of three (3) credits from their program. In order to waive a course in a Professional Certificate Program, the student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better; and
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

Course Descriptions for the GHC

HCS 548 ........................................................................3 credits
Foundations of Gerontology
This course introduces students to the field of gerontology and focuses on the aspects of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older
Certification programs for the College of Health Sciences and Nursing

Online modality in their state. Please contact your enrollment advisor for more information. Availability of programs and concentrations depend on student demand. The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The certificate awarded for this program will be: Social and Cultural Aspects of Aging. This course examines the social and cultural perspectives on aging. With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for elders as well as for adults compromised by severe injuries or disabilities. The long term care certificate focuses on increasing the knowledge and skills essential to work with these various populations. Courses focus on aging, legal issues and perspectives, programs and services, as well as alternative living environments for these populations.

**Required Course of Study for the LTC**

Course work requiring prerequisites are identified by a ~ symbol following the course number:

- **GEN 200** ~ Foundations for General Education and Professional Success 3 credits
- **HCS 433 ~ Dimensions of Health and the Older Adult** 3 credits
- **LTC 310 ~ Long-term Care Administration** 3 credits
- **LTC 315 ~ Alternative Living Environments** 3 credits

Legal Perspectives in Aging

The University reserves the right to modify the required course of study. General Information

This certificate program may be taken on its own or may be earned en-route to earning a bachelor's degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelor's program. Students who completed a certificate in its entirety and who later choose to enroll in a bachelor's program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track. Additional Admission Requirements for the LTC

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

**Certificate Completion Requirements for the LTC**

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Long Term Care

**Residency Requirements and Course Waivers for the LTC**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the
Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200

**Course Descriptions for the LTC**

**GEN 200** ................................................................. 3 credits

**Foundations for General Education and Professional Success**

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

**HCS 433** ................................................................. 3 credits

**Dimensions of Health and the Older Adult**

Basic principles and concepts of the aging process; including the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the aging are also explored.

**LTC 310** ................................................................. 3 credits

**Social and Community Related Programs and Services**

This course provides an overview of programs and policies related to our rapidly expanding aging population. Services designed to enable the older adult support their health and economic well being as well as support for their families will be examined. Issues and trends related to areas such as social and community services, economic issues, and attention to the growing needs of the aging population with special needs will be included.

**HCS 437** ................................................................. 3 credits

**Long-term Care Administration**

This course examines the organization and management of long-term care and assisted living facilities. The impact of state and federal regulations are analyzed, as well as issues surrounding funding services are discussed. Students will examine the health services needed for current and future populations needing long-term care.

**LTC 315** ................................................................. 3 credits

**Alternative Living Environments**

This course focuses on the various formats of care and living environments for the older adult. The cultural and socioeconomic demographics of our current aging population provide different expectations and needs from previous generations. With the changing needs of this population and their families, students will focus on understanding the multidisciplinary continuum of factors to be considered when determining the living and care options available.

**LTC 328** ................................................................. 3 credits

**Legal Perspectives in Aging**

This course will look at the diverse legal issues related to today's older adult. Topics will include age discrimination, advocacy and autonomy, elder and fraud abuse, major life transitions, and end of life decision making.

**Health Management Certificate Program**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate is designed to provide a framework in health care management concepts. The courses will provide perspectives related to health care delivery services, health care management and human resources, financial accounting concepts, as well as an introduction to the legal and regulatory aspects in health care.

This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200
Course Descriptions for the HM

**GEN 200** ................................................................. 3 credits

*Foundations for General Education and Professional Success*

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

HCS 235 ................................................................. 3 credits

*Health Care Delivery in the United States*

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 325 ................................................................. 3 credits

*Health Care Management*

The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

HCS 335 ................................................................. 3 credits

*Health Care Ethics and Social Responsibility*

This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

HCS 341 ................................................................. 3 credits

*Human Resources in Health Care*

This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.

HCS 405 ................................................................. 3 credits

*Health Care Financial Accounting*

This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

HCS 430 ................................................................. 3 credits

*Legal Issues in Health Care: Regulation and Compliance*

This course covers the broad range of topics affected by law and regulation ranging from patient rights to corporate responsibilities. Health care regulatory agencies and state and federal agencies are examined as well as their impact on the operation healthcare as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 446 ................................................................. 3 credits

*Facility Planning*

This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss further health care consumer utilization trends, and as well as examining the regulatory compliance requirements.

HCS 457 ................................................................. 3 credits

*Public and Community Health*

This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.

HCS 483 ................................................................. 3 credits

*Health Care Information Systems*

The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.

*Health and Wellness Administration Certificate*

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate will provide an introductory overview of concepts such as an introduction to health care delivery, communication skills, medical terminology, health care information systems, the regulatory environment, and patient records. These concepts are needed to work in an entry level aspect of the health and wellness industry, such as a medical spa, weight management clinic, physician front office or clinic.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/hwa.

Course work requiring prerequisites are identified by a ~ symbol following the course number.
Required Course of Study for the CERT/HWA

HCA 210C~ Introduction to Health Care ........................................... 3 credits
HCA 230C~ Business Communication Skills for Health Care Professionals ........................................... 3 credits
HCA 220C~ The Language of Health Care ........................................... 3 credits
HCIS 245C~ Fundamentals of Information Systems for Health Care ........................................... 3 credits
HCA 260C~ The Regulatory Environment ........................................... 3 credits
HCR 210C~ Patient Records ........................................... 3 credits

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/HWA

All applicants to this certificate program are expected to meet the following additional admission requirements:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

Certificate Completion Requirements for the CERT/HWA

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Health and Wellness Administration

- Students who have earned an Associate (A or B Track) or undergraduate degree in Health Administration may not receive a certificate in the same area of focus. Example: a student may not earn an AAHCA/HWA Track A or B first and come back to earn an HWA certificate; however, students who have completed a certificate may return to receive an Associates or bachelors in Health Administration with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the CERT/HWA

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of 'C' (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HCA 210C, HCA 260C

Course Descriptions for the CERT/HWA

HCA 210C~ Introduction to Health Care ........................................... 3 credits

This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 230C~ Business Communication Skills for Health Care Professionals ........................................... 3 credits

This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.
HCA 220C ................................................................. 3 credits
The Language of Health Care
This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care.

HCS 245C ................................................................. 3 credits
Fundamentals of Information Systems for Health Care
This course introduces the fundamentals of computer systems and the role of information processing in today's health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.

HCA 260C ................................................................. 3 credits
The Regulatory Environment
This course is an introduction to the regulatory aspects of providing health care services. Students will become familiar with state and federal health regulations. Emphasis is placed on various contemporary characteristics regarding the laws and ethics of health care delivery and the rules that impact health care employment.

HCR 210C ................................................................. 3 credits
Patient Records
Documenting patients' health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records in a variety of settings. Students are introduced to uses of health data and legal aspects of records management.

Health and Wellness Administration Foundations Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campuses: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate will provide an introductory overview of concepts such as an introduction to health care delivery, communication skills, medical terminology, health care information systems, the regulatory environment, and patient records. These concepts are needed to work in an entry level aspect of the health and wellness industry, such as a medical spa, weight management clinic, physician front office or clinic.

The University reserves the right to modify the required course of study.

General Information for the HWAF

• This certificate program may be taken on its own or may be earned en-route to earning an associates degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" associates program.

• Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.

Additional Admission Requirements for the CERT/HWAF

• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body. GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/HWAF

• Completion of a minimum of 21 credits.

• A minimum grade point average (GPA) of 2.00.

• Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

• The certificate awarded for this program will read as follows: Health and Wellness Administration Foundations (Undergraduate)

Minimum Grade Requirements for the CERT/HWAF
• Students in this program will be placed on scholastic disqualification if a minimum grade of "C" (2.0) is not attained in the following courses: HCS 182, HCS 224

• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

• Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific courses listed above only one time. If the student does not receive the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.

Residency Requirements and Course Waivers for the CERT/HWAF

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/HWAF

HCS 235 .................................................................................. 3 credits
Health Care Delivery in the U. S.
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 120 .................................................................................. 3 credits
Medical Terminology for Health Care Professionals
This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, students will have the opportunity to be immersed in the words used in health care.

HCS 245 .................................................................................. 3 credits
Introduction to Health and Disease
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCIS 140 ................................................................................. 3 credits
Business Communication Skills for Health Care Professionals
This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will focus on business writing correspondence, communication technologies, and effective communication strategies for the health care industry.

HCS 131 .................................................................................. 3 credits
Fundamentals of Electronic Health Records
This course introduces students to the fundamentals of electronic health records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCS 182 .................................................................................. 3 credits
Health Care Office Management
This course is designed to provide students with the knowledge and skills needed for the administrative operations of a health care facility. Concepts regarding office procedures, resources and supplies, and compliance and risk management requirements will be explored.

Introduction to Financial Concepts
This course introduces students to fundamental financial concepts related to the health care industry. Students will learn about basic insurance procedures, bookkeeping processes, and budgets commonly used in a variety of health care settings.

**CERTIFICATE PROGRAMS FOR THE COLLEGE OF HEALTH SCIENCES AND NURSING**
Electronic Health Records Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This certificate will provide a foundation of content needed to become an Electronic Health Records (EHR) specialist. While duties may vary, they will include entering data related to diagnostic procedures, diseases, and general health history information. EHR specialists ensure a patient’s health information is correct and assist with daily office operations. Students will be introduced to a current electronic health records system application in the certificate program. The concepts learned in this program align to national electronic health record specialist certification exam content.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ehr.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/EHR

All applicants to this certificate program are expected to meet the following additional admission requirements:

- Applicants must be at least 16 years of age at the time of application.
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

Certificate Completion Requirements for the CERT/EHR

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read as: Electronic Health Records
- Students who have earned an Associate (A or B Track) or undergraduate degree in Health Administration may not receive a certificate in the same area of focus. Example: a student may not earn an AAHCA/EHR Track A or B first and come back to earn an EHR certificate; however, students who have completed a certificate may return to receive an Associates or bachelors in Health Administration with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the CERT/EHR

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course(s) in the Required Course of Study may not be waived: HCA 210C, HCIS 275C.

**Course Descriptions for the CERT/EHR**

**HCA 210C** ............................................................................... 3 credits

**Introduction to Health Care**

This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

**HCIS 245C** ............................................................................... 3 credits

**Fundamentals of Information Systems for Health Care**

This course introduces the fundamentals of computer systems and the role of information processing in today’s health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.

**HCA 220C** ............................................................................... 3 credits

**The Language of Health Care**

This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care.

**HCIS 255C** ............................................................................... 3 credits

**Structure and Design of Electronic Health Records**

Students will learn about the evolving function and use of technology to support the documentation of vital health information contained in a patient’s medical history. This course will introduce students to the general software applications, insurance and coding information, and regulatory compliance requirements.

**HCIS 265C** ............................................................................... 3 credits

**Medical Health Information**

This course focuses on the documentation of medical data and how managing data can be vital to the treatment and care of individuals in the health care system. Students will examine development, forms, routing, filing, and storage of patient’s records in a variety of health care settings. Students will also review issues related to quality and data management, as well as privacy and security compliance.

**HCIS 275C** ............................................................................... 3 credits

**Practical Application of Electronic Health Records**

Students in the capstone course will use case studies and an electronic health record (EHR) software application to develop foundational skills related to data charting, usage, and application.

The University reserves the right to modify the required course of study.

**General Information**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the EMC**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Applicants must be currently employed in or have prior employment experience in an Emergency Management position such as Emergency Medical Technician (EMT), First Responder, firefighter, or other emergency personnel.

**Certificate Completion Requirements for the EMC**

- Completion of a minimum of 18 credits.

**Residency Requirements and Course Waivers for the EMC**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived:

Course Descriptions for the EMC

GEN 200 .........................................................................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

EMC 310 .........................................................................................................................3 credits

Principles of Emergency Management

This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.

EMC 330 .........................................................................................................................3 credits

Political and Policy Issues for Emergency Management

This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

EMC 340 .........................................................................................................................3 credits

Emergency Services and the Community

This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 .........................................................................................................................3 credits

Managing Emergency Response Operations

This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with disaster operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.

EMC 320 .........................................................................................................................3 credits

Emergency Preparedness and Planning

This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

Graduate Nursing/Health Care Education Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This course series is designed for nursing and health care professionals interested in pursuing or advancing in careers as faculty in higher educational settings. Those with no background in higher education receive a strong foundation for the many dimensions of the faculty role. Current educators can update or expand their knowledge in curriculum development, assessment and evaluation, and instructional strategies.

This credit-bearing certificate program is for post-baccalaureate students. The four courses in the education specialization/certificate program are available at campuses offering nursing or health care degree programs using on ground and/or Flexnet delivery, as well as through the online campus.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/ programs/nhec.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the NHCE

HSN 548 .........................................................................................................................3 credits

Role of the Health Care/Nursing Educator
Certificate Completion Requirements for the NHCE

- Completion of an undergraduate degree or the entire University of Phoenix BSN or BSHCS Required Course of Study with a minimum GPA of 2.5 or better verified by providing an official transcript.
- A minimum of one year full-time post-high school health care work experience.
- Current employment in a nursing or health care role or access to an appropriate healthcare organization environment in which to complete the work related course assignments.

Minimum Grade Requirements for the NHCE

- Students in this program are required to achieve a minimum program grade point average (GPA) of 3.0.
- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

Certificate Completion Requirements for the NHCE

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 12 credits.
- Completion of the following courses or their equivalents:
  - HSN 540: Using Effective Teaching Strategies (3 credits)
  - HSN 544: Design and Process of Curriculum Development (3 credits)
  - HSN 552: Assessment and Evaluation of Learning (3 credits)

Residency Requirements and Course Waivers for the NHCE

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 6 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the NHCE

- HSN 540: Using Effective Teaching Strategies (3 credits)
- HSN 544: Design and Process of Curriculum Development (3 credits)
- HSN 552: Assessment and Evaluation of Learning (3 credits)

Role of the Health Care/Nursing Educator

Responsibilities of faculty within various higher education settings are explored. Trends and issues that impact the educator role within changing health care and educational environments are discussed. Topics such as technological, legal, ethical, and professional dynamics are included.

HSN 540: Using Effective Teaching Strategies (3 credits)

Teaching and Learning Strategies

This course will focus on the concepts of learning, cognitive, and psychomotor learning, and the principles of adult learning. Selection and development of teaching strategies that enhance and facilitate learning will be explored.

HSN 544: Design and Process of Curriculum Development (3 credits)

Assessment and Evaluation of Learning

Methods of assessing learning in higher education are analyzed and applied in different learning situations. Processes and problems related to course learning assessments as well as evaluating programmatic outcomes are examined. Designing measures to evaluate learner and curricular outcomes are addressed.
CERTIFICATE PROGRAMS FOR THE COLLEGE OF EDUCATION

Administration and Supervision Certificate Program (California)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Administration and Supervision Certificate Program prepares candidates for principal licensure. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative practicum is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/asc.

School Improvement Processes

Program and Certification requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the ASC
All applicants are expected to meet the following admissions requirements:

- A Masters degree from a regionally accredited college or university or equivalent graduate degree earned at a recognized foreign institution.
- Five (5) years verified full-time teaching experience or services experiences in schools in P-12 setting (substitute or part-time service does not apply).
- The teaching or services experiences must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching or services experience:
  * Verifiable (contracted) P-12 experience - 40 hours per week
- Verification of the following items:
  * Having passed or attempted the California Basic Skills Test (CBEST)
  * Current TB test

Applicants must possess one of the following California credentials:

- A valid clear or life California teaching credential requiring a baccalaureate degree and a program of professional preparation, including student teaching
- A valid clear or life California Designated Subjects Teaching Credential provided the applicant also possesses a baccalaureate degree
- A valid clear services prerequisite credential, California Pupil Personnel Services Credential, Teacher Librarian Services Credential, Speech-Language Pathology Services Credential, Clinical or Rehabilitative Services Credential, or a School Nurse Services Credential (Clear or Professional Clear level only), requiring a baccalaureate degree and a program of professional preparation, including field practice or the equivalent.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

Completion Requirements for the ASC

- Completion of a minimum of 31 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Field Experience Observation Record (30-40 hours).
Candidates must complete and provide verification of the Academic Progression Requirements for the ASC.

**In order to receive an institutional recommendation and/or state Residency Requirements and Course Waivers for the ASC placement:**

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level coursework.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level coursework. (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 594A, ADMIN 594B, ADMIN 594C

**Minimum Grade Requirement for the ASC**
A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ADMIN 594A, ADMIN 594B, ADMIN 594C
Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the ASC**
Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR).
Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
Verification of employment in an administrative position prior to issuance of a Preliminary Administrative Credential. Those students who do not have an offer of employment in an administrative position may apply for a Certificate of Eligibility to seek employment.

**Practicum Policies for the ASC**
- The Administrative Practicum is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the practicum. Candidates must follow the guidelines in place at their campus.
- Candidates must take the practicum courses concurrently with the practicum experience. If a candidate chooses to postpone the practicum, he/she must postpone their enrollment in the practicum courses.
- Candidates must pass each Administrative Practicum course with a grade of "B" or better in order to avoid Scholastic Disqualification.
- Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

**Field Experience for the ASC**
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

*Note: The field experience hours are hours completed outside of the 240 hour Administrative Practicum experience.*

**Additional Academic Program Re-entry Policy for the ASC**
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the ASC**
ADMIN 501 ................................................................. 0 credits
**Orientation to Administration and Supervision**
This course is designed to provide an orientation to the primary components of the Master of Arts in Education/ Administration and Supervision program in California. Students will be introduced to the program's progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative practicum will be
discussed.
ADMIN 516  ................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
ADMIN 594A  ................................................................. 1 credit

**Administrative Practicum Part I: Instructional Leadership**

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.
ADMIN 594B  ................................................................. 1 credit

**Administrative Practicum Part II: Organizational Management**

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.
ADMIN 594C  ................................................................. 1 credit

**Administrative Practicum Part III: Professional Practice**

This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning and managing, problem solving, organizing with the media, and community relations will be addressed.
ADMIN 518  ................................................................. 3 credits

**Leadership and Collaborative Processes**

This course provides students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and on how educational leaders can create high performing teams.
ADMIN 570  ................................................................. 3 credits

**Equity, Diversity, and Access in Education**

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.
ADMIN 555  ................................................................. 3 credits

**School Policy and Law for Principals**

This course examines legal theory and practice in the context of the educational setting. The United States Constitution, federal and state court systems, legal issues, and their impact on schools are discussed, analyzed, and applied to current educational practices.
ADMIN 575  ................................................................. 3 credits

**Family, Community and Media Relations**

This course examines tools and models for promoting positive school relationships with families, the community, and local media. Candidates will study and practice techniques for involving stakeholders, using conflict resolution and decision making tools, forming business and community partnerships, and using public relations concepts to support school policy. Candidates also will participate in field experiences related to media and community relations.
ADMIN 524  ................................................................. 3 credits

**Supervision of Curriculum, Instruction and Assessment**

This course examines principals’ responsibilities related to supervision of curriculum, instruction, and assessment. Principal candidates study the relationships among supervision, curriculum design, national and state standards, and effective instructional practice for diverse learners. Candidates also review the types of assessments that school leaders must familiar with, the use of assessments to measure and support student achievement, the continuous school improvement model, and the development of school improvement plans. In addition, candidates participate in field experiences related to curriculum, instruction, and assessment.
ADMIN 528  ................................................................. 3 credits

**Administration of Special Programs**

This course provides an overview of various federal, state, non-profit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.
ADMIN 535C  ................................................................. 3 credits

**Business and Facilities Management**

In this course, candidates study the processes for managing business functions and school facilities. Principal candidates study school budgeting and accounting procedures and examine issues regarding facilities management. Principal candidates also participate in field experiences related to business and facilities management.
ADMIN 560  ................................................................. 3 credits

**Human Resources Management in Education**

This course focuses on the responsibilities involved in human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal are examined. In addition, the course analyzes strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism.
ADMIN 565  ................................................................. 3 credits

**School Improvement Processes**

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Candidates review the types of assessments that a school leader needs to be familiar with, and how a school leader can use assessment data to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.
Principal Licensure Certificate Program (Utah)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Principal Licensure professional certificate program is designed for educators interested in obtaining a license as a P-12 school principal. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision.

Certificate Completion Requirements for the PLC

• Completion of a minimum of 28 credits.
• A minimum grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 3.0 from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• Completion of Field Experience Observation Record.
• Completion of a minimum of 28 credits.
• A signed PLC New Student Checklist.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

Additional Admission Requirements for the PLC

All applicants are expected to meet the following admissions requirements:

• A masters degree from a regionally accredited college or university or equivalent graduate degree earned at a recognized foreign institution.
• A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
• The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
• Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  * Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week

Utah students in the MAED/ADM program can have experience as a licensed school counselor.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• A signed PLC New Student Checklist.

Certificate Completion Requirements for the PLC

• Completion of a minimum of 28 credits.
• A minimum grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

Residency Requirements and Course Waivers for the PLC

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be transferable coursework (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

Required Course of Study for the PLC

The following courses in the Required Course of Study may not be
waived:  COM 516, ADMIN 591A, ADMIN 591B, ADMIN 591C

**Minimum Grade Requirement for the PLC**
A candidate must earn a grade of “B” (grades of “I” and “B-” are
not accepted) or better in the following courses: ADMIN 591A,
ADMIN 591B, ADMIN 591C

Candidates who earn less than a grade of “B” in any of these
courses must complete a remediation plan and repeat the course.
If the candidate does not receive a grade of “B” or better on the sec-
tion attempt, the candidate will be Scholastically Suspended, per-
manently withdrawn, from the program.

**Additional Academic Program Re-entry Policy for the PLC**
Candidates who have been out of attendance for more than one
year and have completed all degree requirements except student
teaching, internship or practicum can complete within their
original deadline may reenter their original program version.
However, if the state certification requirements have changed since
a candidate went out of attendance needing only student teaching,
internship or practicum, in addition to the admissions paperwork
required by the University Re-entry policy, the candidate must
complete an Enrollment Agreement Addendum before reentry to
the original program version will be approved.

Candidates who have been out of attendance for more than one
year and are lacking courses in addition to their student teaching,
internship or practicum must reenter the current program version
and successfully complete all courses required by their reentry
credit summary.

Only students who reside within the United States and its territo-
ries are eligible to enroll into a University of Phoenix bachelor or
master of education program. International students who have
been out of attendance for more than 365 days will not be eligible
to re-enter.

**Institutional Recommendation for the PLC**
- Candidates must meet all current state certification
requirements prior to being issued an Institutional
Recommendation (IR) (request for principal certification). Refer
to the New Student Checklist and your state certification agency
for specific requirements.
- Passing scores on state exam(s) for principal licensure.
- Upon completion, candidates must complete a University of
Phoenix Diploma Application in order to receive a diploma and
official transcript. Candidates’ records will be analyzed to
ensure that they have met all academic and financial
requirements of their programs. An IR cannot be completed
until this process has been finished. This will ensure that
candidates have met all of their obligations to the University
before they receive an IR from the University.

**Course Descriptions for the PLC**

**Orientation to Administration and Supervision**
This course is designed to provide an orientation to the primary
components of the Master of Arts in Education/ Administration
and Supervision program. Students will be introduced to the pro-
gram’s progression and degree completion requirements. Field
experiences, electronic resources, E-portfolios, benchmark assign-
ments, and the administrative internship will be discussed.

**Professional Communications**
This course provides new graduate students in University of Phoe-
ix programs with an introduction to strategies for academic suc-
cess within the University of Phoenix adult learning model. Topics
include oral and written communication, methods for finding and
evaluating course resources, critical thinking, the purpose and use
of portfolios, program standards, stress and time management, and
tools for collaborative learning, in preparation for team assign-
ments in future classes.

**Leadership and Collaborative Processes**
This course is designed to provide students with an overview of
educational leadership and with an understanding of the issues in
educational leadership positions. Students analyze the various
styles of leadership and explore how leadership enhances an edu-
cational environment. Students examine information on collabora-
tive processes and examine how educational leaders can create
high performing teams.

**Equity, Diversity, and Access in Education**
This course provides candidates the opportunity to examine and to
reflect upon equity, diversity, and access in education. In particular,
it focuses on the equitable participation of students, families, teach-
ers, and staff in school practices, programs, and curriculum. Candi-
dates examine their personal beliefs, as well as issues regarding
Equity, diversity, and access, in the context of leadership.

**School Policy and Law for Principals**
This course allows students to examine legal theory and practice in
the context of the educational setting. The constitutional frame-
work, court systems, legal issues, and their subsequent impact on
schools are discussed, analyzed, and applied to current educational
practices.

**Supervision of Curriculum, Instruction and Assessment**
This course examines administrative responsibilities related to
supervision of curriculum and instruction. Principal candidates
will study the relationship among supervision, curriculum design,
national and state standards, and effective instructional practice.
Principal candidates will also participate in field experiences
related to curriculum and instruction.

**Principal Internship Part I: Instructional Leadership**
This internship experience provides comprehensive field-based
training designed to develop competencies needed by school prin-
cipals with an emphasis on instructional leadership. Application of
all principles and techniques of planning and managing curricu-
lar, leadership, problem solving, organizing, and program and
personnel evaluation will be addressed.

**Business and Facilities Management**
This course is a continuation of processes for managing business
functions and for school facilities. Principal candidates will study
school budgeting and accounting procedures, and they will study
issues regarding facilities management. Principal candidates also
will participate in field experiences related to business and facili-
ties management.
Principal Internship Part III: Professional Practice

School Improvement Processes

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

ADMIN 591C ........................................................................... 1 credit

Family, Community and Media Relations

This course focuses on the role of the school principal as a catalyst for developing and maintaining collaborations with families, business and community groups, and the media to support a school's vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision-making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

ADMIN 579 ............................................................................. 3 credits

School Improvement Processes

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will examine the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

ADMIN 591C ........................................................................... 1 credit

Principal Internship Part III: Professional Practice

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

ADMIN 560 ................................................................. 3 credits

Human Resources Management in Education

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

ADMIN 591B ........................................................................... 1 credit

Principal Internship Part II: Organizational Management

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

ADMIN 591B ........................................................................... 1 credit

Human Resources Leadership and Management

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

ADMIN 591B ........................................................................... 1 credit

Additional Admission Requirements for the PLC
All applicants are expected to meet the following admissions requirements:

- A cumulative grade point average (GPA) of 3.0 on the graduate program.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A signed PLC New Student Checklist

Certificate Completions Requirements for the PLC

- Completion of a minimum of 28 credits.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
- The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:

  * Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week

Colorado students in the Principal Licensure Certificate (PLC) programs can have experience in public or non-public P-12 schools as a licensed or certified professional including school social worker and school nurse.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A signed PLC New Student Checklist

Residency Requirements and Course Waivers for the PLC

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

Minimum Grade Requirement for the PLC

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 591A, ADMIN 591B, ADMIN 591C

Minimum Grade Requirement for the PLC

A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: ADMIN 591A, ADMIN 591B, ADMIN 591C

Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the PLC

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for principal certification). Refer to the New Student Checklist and your state certification agency for specific requirements.
- Colorado: Students must verify three (3) years licensed experience in P-12 grades in order to obtain their principal certification and will need to provide verification of this.
- Acceptable licensed experience includes the following:
  - Teacher
  - School Counselor
  - School Nurse
  - School Social Worker
  - School Psychologist
- Passing scores on state exam(s) for principal licensure.
- Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Additional Academic Program Re-entry Policy for the PLC

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry
credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**COM 516** .................................................................................... 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**ADMIN 500** .................................................................................... 0 credits

**Leadership and Collaborative Processes**

This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

**ADMIN 570** .................................................................................... 3 credits

**Equity, Diversity, and Access in Education**

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, it focuses on the equitable participation of students, families, teachers, and staff in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

**ADMIN 555** .................................................................................... 3 credits

**School Policy and Law for Principals**

This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

**ADMIN 524** .................................................................................... 3 credits

**Supervision of Curriculum, Instruction and Assessment**

This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

**ADMIN 591A** .................................................................................... 1 credit

**Principal Internship Part I: Instructional Leadership**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

**ADMIN 535** .................................................................................... 3 credits

**Business and Facilities Management**

This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

**ADMIN 560** .................................................................................... 3 credits

**Human Resources Management in Education**

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

**ADMIN 591B** .................................................................................... 1 credit

**Principal Internship Part II: Organizational Management**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

**ADMIN 575** .................................................................................... 3 credits

**Family, Community and Media Relations**

This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

**ADMIN 565** .................................................................................... 3 credits

**School Improvement Processes**

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.
The Commission can only accept course work and degrees completed at regionally accredited institutions or an equivalent undergraduate degree earned at a recognized foreign institution. Degrees and course work must have been completed while the institution was regionally accredited in order for the Commission to consider them for Credentialing purposes.

- Students using foreign credentials when enrolling in a local campus program or Online program in the State of California must use a foreign credential evaluation service that is approved by the California state regulating board.
- A minimum equivalent of three (3) years post-high school work or volunteer experience.
- Candidates entering this program must possess a valid California teaching credential, Speech-Language Pathology or Clinical or Rehabilitative Services Credential with a Special Class Authorization, School Nurse Services Credential with a Special Teaching Authorization in Health, Visiting Faculty Permit, Children’s Center Permit (excluding emergency), or Child Development Permit (excluding Assistant and Associate Permits) that authorizes the holder to provide instruction to pupils.

- The following are not appropriate prerequisite credentials or permits: Emergency Permits, Provisional Internship Permits, Short-Term Staff Permits, District Intern Credentials, University Intern Credentials, Exchange Credentials, Sojourn Certificated Employee Credentials, Services credentials without a special class authorization.
- Access to an educational setting with English language learners.
- A signed CERT/CTEL New Student Checklist

Certificate Completion Requirements for the CERT/CTEL

- Completion of a minimum of 12 credits.
- A minimum program grade point average (GPA) of 3.0.
- Completion of the e-portfolio.

Residency Requirements and Course Waivers for the CERT/CTEL

Students may waive only three (3) credits from the program. Courses may only be waived with California Commission-approved CTEL course work.

Additional Academic Program Re-entry Policy for the CERT/CTEL

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.
Institutional Recommendation for the CERT/CTEL

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their program. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Course Descriptions for the CERT/CTEL

MTE 502 ................................................................................... 0 credits
Orientation to the California Teachers of English Learners (CTEL) Program
This course is designed to provide an orientation to the primary components of the California Teachers of English Learners (CTEL) Program. Students will be introduced to the program’s components and completion requirements. Electronic Resources, Field Experience, and E-Portfolio will be discussed.

ELD 502 ................................................................................... 3 credits
Foundations of Instruction for English Learners
This course discusses standardized and authentic assessments and assessment strategies in the areas of literacy and biliteracy development of English Learners. Issues associated with the interdependent relationship between teaching and assessment are addressed in addition to effective parental and/or community involvement in literacy development.

ELD 504 ................................................................................... 3 credits
Assessment of Instruction for English Learners
This course will introduce assessment strategies in the area of literacy/biliteracy development. Assessments, both standardized and authentic, will also be discussed with regard to appropriate use with English Learners. It addresses issues associated with the interdependent relationship between teaching and assessment in addition to effective parental and/or community involvement in literacy development.

ELD 506 ................................................................................... 3 credits
Understanding Language Acquisition and Cognition
This course examines language structure and use, second language acquisition theories, and the nature of cognitive and affective language development to assist the teacher of the English Learner. The course provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse students. It also examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning and thought processes.

ELD 535 ................................................................................... 3 credits
Teaching Reading and Writing to English Learners
This course examines literacy issues related to the acquisition of English and the use of home language by English Learners (EL) in all second language programs. It also presents processes and strategies to enhance the biliteracy skills of English Learners.

Transition to Teaching Certificate/Elementary Education (Indiana)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Transition to Teaching program with specializations in elementary and secondary is designed for individuals interested in gaining the knowledge and expertise required in the field of teaching. The program is an alternative route program designed to meet the academic requirements established for state licensure. The program curriculum is focused on educational foundations, classroom management, instructional methods, assessment, and diversity. This program also includes field experiences and a full-time student teaching experience.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Elementary Student Teaching

The University reserves the right to modify the required course of study. Program requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the CERT/T2T-E

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Degrees from nationally accredited institutions will not be accepted. All coursework for the Undergraduate degree must have been taken from a regionally accredited institution. Coursework taken during an institution’s candidacy period is not acceptable for admission.
• A cumulative grade point average (GPA) of 3.0 on the undergraduate degree posted transcript.
• Demonstration of basic skills proficiency
• T2T-Elementary applicants must have passing scores on the designated state content knowledge exam (Praxis II: elementary content area specific)
• A signed Indiana Transition to Teaching New Student Checklist.
• Students who reside outside of the US or US Territory are not eligible to apply.

### Candidacy Status for the CERT/T2T-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1. Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be uploaded to the Transition to Teaching DRF in the e-portfolio and the student’s eXp file.

- Verification of current criminal background check.
- Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

### Minimum Grade Requirements for the CERT/T2T-E

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to study teach: EML 585
- Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course.
- Candidates must earn a "B" or better in student teaching in order to complete the Transition to Teaching program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from this program.

### Certificate Completion Requirements for the CERT/T2T-E

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required practicum/student teaching courses.
- Completion of Field Experience Observation Record (50 hours).
- Completion of e-portfolio.

- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The certificate awarded for this program will read as: Elementary Education

### Institutional Recommendation for the CERT/T2T-E

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential). Out-of-state institutional recommendations cannot be issued for graduates of this program. The Transition to Teaching Certificate program is only eligible for an in-state (Indiana) institutional recommendation. Candidates with out-of-state institutional recommendations may obtain a letter of verification that they completed an alternative route program recognized by the Indiana Department of Education for initial licensure.

- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.
- Indiana candidates must provide verification of current CPR/AED/Heimlich certification prior to being recommended for their credential.
- Indiana candidates must complete a basic or in-service course of education and training on suicide prevention and the recognition of signs that a student may be considering suicide prior to receiving an initial teaching license.

### Residency Requirements and Course Waivers for the CERT/T2T-E

- Students may not waive any credits from the required course of study on the basis of prior graduate-level college coursework.
- Student teaching may not be waived. However, candidates may be eligible to complete their student teaching in the classroom where they are currently employed as a full-time teacher. Students who are already teaching in an appropriate environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must be teaching in the grade level and content area that corresponds with the certification they are pursuing. Students must complete the student teaching course and complete and upload the Teacher Work Sample.
Student Teaching and Field Experience for the CERT/T2T-E

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Students must complete student teaching hours as noted below:
  - Elementary candidates must complete three (3) semester hours of supervised student teaching.
  - Students who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry and are not eligible for admission to the MAED/TED pre-licensure programs.
- Candidates may be eligible to complete their student teaching in the classroom where they are currently employed as a full-time teacher. Students who are already teaching in an appropriate environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must be teaching in a grade level and content area that corresponds with the certification they are pursuing. Students must complete the student teaching course and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Additional Academic Program Re-entry Policy for the CERT/T2T-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the CERT/T2T-E

MTE 507 ................................................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
MTE 518 ................................................................................... 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522 ................................................................................... 3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 514 ................................................................................... 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
RDG 537 .................................................................................. 4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the groundwork knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
RDG 535 ................................................................................... 3 credits
Diagnosis & Remediation of Reading Difficulties
This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.
MTE 531 .................................................................................. 2 credits

**Curriculum Constructs & Assessment: History and Social Science**

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 .................................................................................. 4 credits

**Curriculum Constructs & Assessment: Science and Mathematics**

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

ELM 585.................................................................................. 3 credits

**Elementary Student Teaching**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Transition to Teaching Certificate/Secondary Education (Indiana)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Transition to Teaching program with specializations in elementary and secondary is designed for individuals interested in gaining the knowledge and expertise required in the field of teaching. Students must complete the student teaching course and complete and upload the Teacher Work Sample.

**Student Teaching and Field Experience for the CERT/T2T-S**

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Students must complete student teaching hours as noted below:
  - Secondary candidates must complete four (4) semester hours of supervised student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

University of Phoenix, 2014-2015

PROFESSIONAL PROGRAMS

CERTIFICATE PROGRAMS FOR THE COLLEGE OF EDUCATION
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry and are not eligible for admission to the MAED/TED pre-licensure programs.
• Candidates may be eligible to complete their student teaching in the classroom where they are currently employed as a full-time teacher. Students who are already teaching in an appropriate environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must be teaching in a grade level and content area that corresponds with the certification they are pursuing. Students must complete the student teaching course and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Additional Academic Program Re-entry Policy for the CERT/T2T-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may re-enter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the CERT/T2T-S

MTE 507.....................................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
SEC 508.....................................................................................3 credits
Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 523.....................................................................................3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 514 .......................................................................................... 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
RDG 542 .......................................................................................... 3 credits
Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.
SEC 585.......................................................................................... 4 credits
Secondary Student Teaching
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
MTE 564 .......................................................................................... 3 credits
Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.
MTE 566 .......................................................................................... 3 credits
Curriculum Constructs & Assessment: Secondary English/ Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and
 behavior management plans for diverse individual students and student populations.

MTE 567  ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary History/ Social Science

This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569  ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Science

This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

Certificate in Special Education (Nevada)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Certificate in Special Education (CERT/SPE) prepares current certified teachers working in a K-12 regular education environment as special education teachers. This program is designed to provide them with the additional coursework required for certification as a K-12 special education. Coursework in this program includes special education methods, special education assessment and interpretation, characteristics of exceptionalities, scientifically based reading instruction, methods of teaching mathematics, and inclusion strategies for the special educator. Throughout the program, students are required to complete a minimum of 30-40 hours of verifiable field experiences, covering a variety of special education settings.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-spe.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the CERT/SPE

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Degrees from nationally accredited institutions will not be accepted. All coursework for the undergraduate degree must have been taken from a regionally accredited institution.
- Coursework taken during an institution’s candidacy period is not acceptable for admission.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.
- A minimum equivalent of three (3) years post-high school work or volunteer experience.
- All applicants must be currently employed as a special education teacher in a Nevada school.
- Students enrolling in the CERT/SPE must have a valid elementary, secondary, or special (K-12, Art, Music, PE or special education) license excluding Business and Industry.

Certificate Completion Requirements for the CERT/SPE

- Completion of a minimum of 32 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Field Experience Observation Record (25 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- Completion of e-portfolio.
• The certificate awarded for this program will read as:
  Special Education Generalist

Residency Requirements and Course Waivers for the CERT/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, RDG 537, SPE 512, SPE 546, SPE 591

Institutional Recommendation for the CERT/SPE

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework as required by the state certification agency.

Field Experience for the CERT/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 25 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the CERT/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the CERT/SPE

MTE 500 ....................................................................................0 credits

Orientation to the Special Education Certification Program

This course is designed to provide an orientation to the primary components of the Special Education Certificate Program. Students will be introduced to the program's certificate completion requirements. Field Experience, E-Portfolio, and technology resources will be discussed.

COM 516 .....................................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 509 .....................................................................................3 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

SPE 513 .....................................................................................3 credits

Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 546 .....................................................................................3 credits

Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an
emphasize on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

**SPE 512** ................................................................. 3 credits

**Special Education Assessment and Interpretation**

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

**SPE 591** ................................................................. 3 credits

**Characteristics of Exceptionalities**

This course examines teaching and managing students with mild disabilities. Special emphasis is placed on learning disabilities, mental retardation, and emotional disabilities. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed in depth.

**RDG 537** ................................................................. 4 credits

**Curriculum Constructs & Assessment: Reading and Language Arts**

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

**MTH 506** ................................................................. 3 credits

**Methods of Teaching Mathematics**

This course focuses on the methodology and assessment strategies that enhance learning in preschool through eighth-grade mathematics. Topics include an overview of mathematics content and process standards, developmentally effective instructional strategies, assessment, and classroom and materials management.

**MTE 522** ................................................................. 3 credits

**Maintaining an Effective Learning Climate for Elementary Settings**

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**SPE 558** ................................................................. 3 credits

**Transition Planning for Adolescents with Disabilities**

This course focuses on the role of the special education teacher as he/she transitions adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Students will learn skills and concepts in working with students with special needs, parental involvement, and the community.

**SPE 557** ................................................................. 3 credits

**Collaboration with Families of Students with Disabilities**

This course focuses on the interrelationships of varied services for students with disabilities. Emphasis is placed on meeting the academic and social-emotional needs of students with disabilities by working with parents, professionals, and community services to develop collaborative and productive professional relationships.

**Certificate in Special Education (Colorado)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Certificate in Special Education (CERT/SPE) prepares current certified teachers working in a K-12 regular education environment as special education teachers. This program is designed to provide them with the additional coursework required for certification as a K-12 special education. Coursework in this program includes special education methods, special education assessment and interpretation, characteristics of exceptionalities, scientifically based reading instruction, methods of teaching mathematics, and inclusion strategies for the special educator. MTE 500 ................................................................................... 0 credits

Orientation to the Special Education Certification Program

This course is designed to provide an introduction to the primary components of the Special Education Certificate Program. Students will be introduced to the program’s certificate completion requirements. Field Experience, E-Portfolio, and technology resources will be discussed.

COM 516 ................................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 .................................................................................... 3 credits

Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 546 .................................................................................... 3 credits

Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 512 .................................................................................... 3 credits

Special Education Assessment and Interpretation

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommen-

dations are discussed.

SPE 559 .................................................................................... 3 credits

Characteristics of Learning Disabilities

This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 574 .................................................................................... 3 credits

Characteristics of Intellectual/Developmental Disabilities

This course examines issues related to the instruction of students with intellectual and developmental disabilities. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families with children with intellectual and developmental disabilities.

SPE 544 .................................................................................... 3 credits

Characteristics of Emotional & Behavioral Disabilities

This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 .................................................................................... 3 credits

Characteristics of Physical & Health Disabilities

This course provides an overview of the unique characteristics, learning styles, and challenges faced by children with physical handicaps and other health disabilities. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special services within the schools. Various program models available through public, private, and hospital settings will be reviewed. The impact of inclusive education and self-contained placements on this population will be analyzed.

RDG 500 .................................................................................... 3 credits

Scientifically Based Reading Instruction

This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children’s performance in reading and in the language arts are also emphasized.

MTH 506 .................................................................................... 3 credits

Methods of Teaching Mathematics

This course focuses on the methodology and assessment strategies that enhance learning in preschool through eighth-grade mathematics. Topics include an overview of mathematics content and process standards, developmentally effective instructional strategies, assessment, and classroom and materials management.
SPE 575 ................................................................. 3 credits
Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored.

CERTIFICATE PROGRAMS FOR THE COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

**Advanced Virtualization Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Virtualization Certificate is designed to provide coverage of topics related to desktop, cloud and datacenter virtualization. An understanding of networking to support the practice of virtualization is also covered. Course in this certificate can also help prepare candidates for VMware industry certifications. For more information about our graduation rates, the median debt completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

**CERT/AV Program Category Requirements**

**Virtualization, 18 total credits**

- NTC 362 .................................................................................... 3 credits
  Fundamentals of Networking
- NTC 340 .................................................................................... 3 credits
  Desktop Virtualization
- NTC 345 .................................................................................... 3 credits
  Cloud Virtualization
- NTC 380 .................................................................................... 3 credits
  Data Center Virtualization
- NTC 412 .................................................................................... 3 credits
  Data Center Virtualization Administration
- NTC 414 .................................................................................... 3 credits
  Data Center Virtualization Design

The University reserves the right to modify the required course of study.

**General Information for the CERT/AV**

This certificate program may be taken on its own or may be earned en-route to earning a degree.

**Additional Admission Requirements for the CERT/AV**

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Signed Hardware/Software Agreement

**Certificate Completion Requirements for the CERT/AV**

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.00.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Virtualization (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/AV**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/AV

NTC 362 ................................................................................... 3 credits

Fundamentals of Networking

This course provides a foundation in the basic telecommunications and networking technologies fundamental to the industry and to the broad field of telecommunications. Analog, digital, and radio frequency technologies are covered. Also covered in this course is an introduction to the OSI protocol model, network-switching systems, basics of wireless communications, and network security.

NTC 340 ................................................................................... 3 credits

Desktop Virtualization

The Desktop Virtualization course covers the skills and abilities required in implementing, installing, and configuring a virtual environment. This course will help students obtain skills and abilities across both vSphere and VMware View knowledge domains and can be used to help candidates prepare for VMware certification.

NTC 345 ................................................................................... 3 credits

Cloud Virtualization

The Cloud Virtualization course covers the skills and abilities required in installing, configuring and administering a VMware vCloud® environment. This course will help students obtain skills and abilities that can be used to help candidates prepare for VMware certification.

NTC 350 ................................................................................... 3 credits

Data Center Virtualization

The Data Center Virtualization course covers installation, configuration and management of VMware® vSphere®, which consists of VMware ESXi® and VMware vCenter® Server. This course will help students obtain skills and abilities that can be used to help candidates prepare for VMware certification.

NTC 412 ................................................................................... 3 credits

Data Center Virtualization Administration

The Data Center Virtualization Administration course explores the skills and abilities required in installing, configuring, and administering large and more complex virtualized environments. This course will help students obtain skills and abilities that can be used to help candidates prepare for VMware certification.

NTC 414 ................................................................................... 3 credits

Data Center Virtualization Design

The Data Center Virtualization Design course explores the skills and abilities required in designing and integrating multi-site, large enterprise virtualized environments. This course will help students obtain skills and abilities that can be used to help candidates prepare for VMware certification.

Advanced Cloud Computing Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Cloud Computing Certificate focuses on the application of effective cloud technologies such as web design and development, mobile commerce and network web services. Courses in this certificate can help students prepare for industry certifications within the field of Cloud Computing from CompTIA and Amazon as well as Adobe.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/acl.

Course work requiring prerequisites are identified by a “P” symbol following the course number.

General Information for the CERT/ACL

This certificate program may be taken on its own or may be earned en-route to earning a degree.
Additional Admission Requirements for the CERT/ACL
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HSPE examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/ACL
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.00.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Cloud Computing (Undergraduate)

Residency Requirements and Course Waivers for the CERT/ACL
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/ACL
NCT 300....................................................................................3 credits
Cloud Technologies
This course provides an introduction to how data is architectured and organized. It discusses the different data models used to store data, it outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.
NCT 302....................................................................................3 credits
Network Web Services
This course focuses on Network Web Services with a specific focus on Amazon Web services. The course will help an IT professional identify and gather requirements in order to define a Web Services solution to be built using architecture best practices and to be capable of providing guidance on architectural best practices to developers and system administrators throughout the lifecycle of the web services project.
WEB 407 .................................................................3 credits
Advanced Web Development
This course focuses on existing and emerging Web development technologies. Topics include specialized Web markup languages, server-side backend databases, server-side programming, web services, enterprise Web development and Web applications.
WEB 436 .................................................................3 credits
Mobile Commerce
This course explores the concept of mobile commerce from the perspective of an advanced web developer or development manager. Students will focus on E-Commerce principles, M-Commerce websites and apps, security, ethics and emerging technologies.
WEB 437 .................................................................3 credits
Website Commercialization
This course builds upon a professional understanding of web design and development, emphasizing the trend towards website commercialization. Topics of this course include strategy and e-commerce planning, online supply chain management, e-commerce tools and techniques, marketing strategies, customer experience and service, and search engine optimization.
VCT 340 ................................................................. 3 credits
Web Design with Dreamweaver
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Dreamweaver CS6 certification exam. Topics include: Dreamweaver fundamentals – navigating the workspace, defining and creating a website; page layout, handling links and formatting text; integrating rich media; using templates and writing HTML and CSS code; and launching to the web and to mobile.

Advanced Software Developer Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Software Developer Certificate concentrates on principles of software application development. This certificate explores modern software development though the use of multiple modern application programming languages as well as mobile programming and software architecture principles. This program helps preparation for industry certifications such as the C++ Certified Professional Programmer, Oracle Certified Professional JAVA SE Associate and Professional Programmer (OCP) and Microsoft C# and VB certifications.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-asd.

- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of ‘C’ (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/ASD

PRG 215 ....................................................................................3 credits

Java Programming Fundamentals
Java has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming. The syntax and semantics of the Java™ language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java 2 Platform Development Kit, Standard Edition.
BSA 385 ...................................................................................3 credits

Intro to Software Engineering
This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a background in applications software development and testing techniques through a combination of theory and application.
CSS 422 ...................................................................................3 credits

Software Architecture
This course is an integrating course in business application software engineering. Integration, migration, and maintenance of enterprise software systems, including legacy systems, are emphasized.
MBL 402 ...................................................................................3 credits

Android Mobile Development
This course will cover the basics of coding for Android. Topics include use of the Android APIs, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

POS 408 ...................................................................................3 credits

.NET I
This course introduces object-oriented programming in the context of business applications development. It develops the skills and knowledge necessary to produce beginning event-driven programs with graphical user interfaces (GUI). Topics include standard Windows compatible forms, controls, and procedures. The course uses Visual Basic.
PRG 410 ...................................................................................3 credits

.NET II
This course extends the facilities of the .NET family of languages. The course focuses on the C# language. Topics covered include designing C# applications, writing and debugging programs, data files and database connectivity.

C++ Programming I
This course introduces the student to C++. Topics include C++ basics, selection and repetition structures, sequential files, arrays, and C++ libraries.
PRG 420 ...................................................................................3 credits

Java Programming I
This course introduces object-oriented programming in the context of business applications development. The basics of the Java programming language are covered.
PRG 421 ...................................................................................3 credits

Java Programming II
This course continues the subject in PRG420, Java Programming I. Topics include designing complex applications and the use of data files.

Programming Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The programming certificate focuses on the tasks involved in various programming management job roles, and the skills and technologies to perform those tasks. The certificate includes information system fundamentals and available coursework in logic for computer programming, programming in HTML5, C++, Java Programming, JavaScript applied to Microsoft Windows® application development.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-prg.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Preferred Sequence for the CERT/PRG

CIS 207 ...................................................................................3 credits

Information Systems Fundamentals
Students must complete 18 credits from the list below:
General Information for the CERT/PRG

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/PRG

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/PRG

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate or bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Programming (Undergraduate)

Residency Requirements and Course Waivers for the CERT/PRG

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/PRG

CIS 207 ................................................................. 3 credits

Information Systems Fundamentals

This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and database management, networking and telecommunications, and the Internet.

PRG 211 ................................................................. 3 credits

Algorithms and Logic for Computer Programming

This course provides students with a basic understanding of programming development practices. Concepts covered include the application of algorithms and logic to the design and development of procedural and object-oriented computer programs to address the problem solving requirements associated with business information systems. This course will cover procedural programming concepts including data types, controls structures, functional decomposition, arrays, and files, classes and objects.

893
Java Programming Fundamentals

Java has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming. The syntax and semantics of the Java™ language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java 2 Platform Development Kit, Standard Edition.

PRG 218 ................................................................. 3 credits

Introduction to C/C++

This course introduces the student to C/C++ programming. The syntax and semantics of the C/C++ programming languages are used to produce simple computer programs.

PRG 280 ................................................................. 3 credits

Programming in HTML5 with JavaScript

This course provides students an introduction to HTML5 with JavaScript and CSS3. Concepts covered include the creation and formatting of web pages using HTML5 and CSS3, development of web forms, and implementing program logic and validating user input using JavaScript.

PRG 281 ................................................................. 3 credits

Windows Application Development using HTML5 and JavaScript

This course cover enhanced HTML5 concepts using CSS3 and JavaScript. This includes use of canvas and different HTML API, exposure to and Windows Event Listener creating and validating dynamic presentation slideshow that responds to mobile and desktop layouts enhancing web presentations using Audio and video features.

PRG 282 ................................................................. 3 credits

Windows Application Development using HTML5 and JavaScript

This course covers developing web applications using HTML 5, CSS3, JQuery and JavaScript. This includes use of different advanced JavaScript API such as Drag-and-drop API, Web storage API, Geo-location API, Web socket API, Web SQL, and Document Object Model (DOM) components.

Advanced Networking Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Networking Certificate is designed to provide complete coverage of networking topics including the OSI model, network topologies, network protocols, network operating systems, as well as network architecture, network design and management. Comprehensive coverage of local area, wide area, and wireless networks including performance and service levels are addressed in this concentration. This certificate also provides an exposure to network modeling and measuring of network performance. This program helps preparation for industry certifications such as the Microsoft Certified Solutions Associate (MCSA) and Expert (MCSE) as well as the CompTIA Linux+ Powered by LPI certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-an.

In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/AN

NTC 320 .................................................................................... 3 credits

Network Design Associate
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the CISCO CCDA: Cisco Certified Design Associate certification exam. Topics include: understanding the methodology used to design a network; describing network structure and modularity; and designing enterprise campus networks, enterprise edge and remote network modules, IP addressing and routing protocols, and network services.

NTC 324 .................................................................................... 3 credits

Windows Server Configuration
This course provides students with the knowledge and skills necessary to install and configure Windows Servers 2012. The course covers Server Roles Configuration, Server Virtualization Configuration, Network Services Configuration, and Directory Services Administration & Group Policy.

NTC 326 .................................................................................... 3 credits

Advanced Windows Server
This course provides students with the knowledge and skills necessary to administer Windows Servers. The course covers Server Maintenance, Print and File Services Configuration, Manage Network Services, Server Policy Infrastructure, and Manage Directory Services & Group Policy.

NTC 328 .................................................................................... 3 credits

Advanced Windows Services
This course provides students with the knowledge and skills necessary to configure advanced Windows services. The course covers High Availability, Server File and Storage, Business Continuity, Advanced Network Services and Directory Infrastructure & Access Solutions.

NTC 362 .................................................................................... 3 credits

Fundamentals of Networking
This course provides a foundation in the basic telecommunications and networking technologies fundamental to the industry and to the broad field of telecommunications. Analog, digital, and radio frequency technologies are covered. Also covered in this course is an introduction to the OSI protocol model, network-switching systems, basics of wireless communications, and network security.

NTC 409 .................................................................................... 3 credits

Global Network Architecture and Design
This course addresses the fundamentals of network design and analysis with an emphasis on network traffic. The network design techniques necessary for LAN and WAN implementations are covered. The concept of service levels, the provisioning of and importance of service levels are analyzed.

POS 433 .................................................................................... 3 credits

UNIX Networking
This course is a survey of the UNIX operations. The student will gain an understanding of the internal operations of the UNIX system, which enables the user to make efficient use of files, file systems, and processes. Commands for efficient management of UNIX system files, file systems and process, systems administration and security are also examined.
Advanced Multimedia Development Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Multimedia Development Certificate focuses on the application of effective design principles in the development of various digital media. The skill set obtained in this certificate cover digital design, 3D design, image editing, web design, desktop publishing, electronic publishing and multimedia development. This program helps preparation for industry certifications such as the Adobe Certified Expert (ACE) as well as the Autodesk 3ds Max Design certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-ammd.

General Information for the CERT/AMMD

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/AMMD

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/AMMD

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read as: Advanced Multimedia Development (Undergraduate)

Residency Requirements and Course Waivers for the CERT/AMMD

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the last ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student...
must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

**Course Descriptions for the CERT/AMMD**

**Information Systems Fundamentals**
This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

VCT 305 ................................................................................... 3 credits

**Digital Design**
This course presents principles of digital design. An overview of digital design is presented that includes designing and developing creative presentations across various Medias including print, video, web, and mobile platforms.

VCT 315 ................................................................................... 3 credits

**3D Design**
This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, it outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.

VCT 330 ................................................................................... 3 credits

**Image Editing with Photoshop®**
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Photoshop CS6 certification exam. Topics include: Photoshop fundamentals; using Adobe Bridge; using Camera Raw; editing images; use of selections, layers and adjustments; working with video; and outputting for web, print and mobile.

VCT 340 ................................................................................... 3 credits

**Web Design with Dreamweaver®**
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Dreamweaver CS6 certification exam. Topics include: Dreamweaver fundamentals – navigating the workspace, defining and creating a website; page layout, handling links and formatting text; integrating rich media; using templates and writing HTML and CSS code; and launching to the web and to mobile.

VCT 350 ................................................................................... 3 credits

**Desktop Publishing with Acrobat Professional®**
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Adobe Acrobat XI Pro certification exam. Topics include: viewing, navigating, creating, modifying and enhancing PDF documents; working with actions; reviewing, collaborating and commenting; creating forms and collecting data; managing security; and print production.

VCT 360 ................................................................................... 3 credits

**Electronic Publishing with InDesign®**
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: InDesign CS6 certification exam. Topics include: establishing layouts, creating and managing text, working with graphics, working with colors and transparency, and publishing documents.

VCT 370 ................................................................................... 3 credits

**Multimedia Development with Flash®**
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Flash Professional CS6 certification exam. Topics include: planning and designing Flash projects; creating, importing and managing assets, including images, audio, and video; creating animations and interactivity; programming with ActionScript 3.0; and testing and publishing Flash projects.

**Advanced Information Systems Security Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Information Systems Security Certificate concentrates on the concepts and principles of securing and protecting the information assets of the organization. The areas of information assurance, systems security, risk management, cryptography, cyber security and enterprise security are covered in this certificate. This program helps prepare for industry certifications such as the ISC2 Systems Security Certified Practitioner (SSCP) and Certified Information Systems Security Professional (CISP).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aiss.

**Residency Requirements and Course Waivers for the CERT/AISS**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.

**Course Descriptions for the CERT/AISS**

- **CMGT 230** .................................................................3 credits
  Fundamentals of SSCP
  This course introduces the basics of systems security. Emphasis is placed on access controls, networking, auditing, security operations, and malicious code activity. This course is aligned to the Systems Security Certified Practitioner (SSCP) exam.

- **CMGT 400** ...............................................................3 credits
  Intro to Information Assurance & Security
  This course is an introduction to information assurance and security in computing technology. Topics include risk management; protecting information in the enterprise; business continuity and disaster recovery planning; threats and remediation; legal, ethical, and professional issues; and considerations within systems development processes.

- **CMGT 430** ...............................................................3 credits
  Enterprise Security
  This course covers the managerial and technical considerations related to access controls, authentication, external attacks and other risk areas facing the enterprise. This course will also survey the techniques to prevent unauthorized computer and facility access as well the concepts for protecting the hardware and software assets of the enterprise.

- **CMGT 431** ...............................................................3 credits
  Information Systems Security
  This course introduces students to the concepts of information systems security within the framework of the major security certification, the Certified Information Systems Security Professional (CISSP). It provides an overview of each of the CISSP's ten domains and prepares students for more detailed work in the subsequent program courses. Those domains include Access Controls;
Application Security; Business Continuity and Disaster Recovery; Cryptography; Information Security and Risk Management; Legal, Regulations, Compliance, and Investigation; Security Architecture and Design, Telecommunications and Network Security.

CMGT 432 Introduction to Cryptography
This course introduces cryptography and encryption concepts and how they are applied in real-world situations in order to implement strong and reliable security safeguards. This course will survey the various cryptography and encryption methods used in today’s information technology and communications environments as well as to review the considerations for selecting commercial products that support encryption technology.
CMGT 433 Cyber Security
This course explores the evolution from information security to cyber security, policy and cyber security development and the relationships between business and public/private sector organizations in meeting the challenges of cyber security threats. Students will be introduced to the legal and regulatory requirements for internal network and internet security both as they apply to business and personal use. Vulnerabilities of both the organization and the individual will be reviewed as well as the processes and controls for mitigating cyber security threats. The need for an IT audit will also be explored as part of the vulnerability/mitigation process as well as the need for development of an organization-wide cyber security policy.
CMGT 442 Information Systems Risk Management
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of computer based information systems. This course will survey remedies and prevention techniques available to address the risk areas present. Organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.

Advanced Business Analytics Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Advanced Business Analytics Certificate (ABA) is designed to provide specific theories, competencies, and skills necessary for success in the field of Business Analytics business systems analyst. This concentration will examine a number of methodologies and tools important to the discipline such as database concepts, data modeling, SQL, project management, information technology service management, business intelligence and data management. This program helps preparation for industry certifications such as the Oracle Database Administrator Certified Associate, ITIL Foundation and the PMI Certified Associate in Project Management (CAPM).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aba.

- The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/ABA

DBM 380 ................................................................................... 3 credits

Database Concepts
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.

IM 305 ............................................................................................................ 3 credits

Data Modeling
This course provides an in-depth look at several intermediate design and architecture concepts. The course covers the design method used in the creation of a relational database, the required steps to reengineer a database, and several tools and techniques used through the database design process.

POS 410 ............................................................................................................ 3 credits

SQL for Business
This course covers Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.

CMGT 420 ............................................................................................................ 3 credits

Integrated Project Management
This course helps to prepare students for the Project Management Institute (PMI®) (CAPM®) certification exam. It covers the Project Management Framework, a set of standard terminology and guidelines for project management, and the knowledge areas in managing projects.

BSA 413 ............................................................................................................ 3 credits

IT Service Management
This course addresses IT service management best practices from the perspective of the IT Infrastructure Library (ITIL) framework. The ITIL framework consists of Service Strategy, Design, Transition, Operation, and Continual Service Improvement.

Database Administration Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The certificate program in Database Administration focuses on the tasks and skills involved in various database management job roles, and the technologies used to perform those tasks. The certificate includes information system fundamentals, logic for computer programming, database applications, querying and administering a SQL server, managing the database environment, and applied database management. This concentration addresses the fundamental technical skills specified in the Microsoft® Certified Solutions Associate (MCSA) body of knowledge.

Course Descriptions for the CERT/IAS

CIS 207 ................................................................. 3 credits
Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
CMGT 245................................................................. 3 credits
IS Security Concepts
This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.
NTC 247 ................................................................. 3 credits
Wireless Networking Concepts
This course explores concepts of wireless networking systems, including wireless networking and topologies; hardware protocols; hardware selection and implementation; interfaces with local-area network (LAN), metropolitan area network (MAN), and wide-area network (WAN) networks; basic wireless security; and network integration concepts.
POS 221 ................................................................. 3 credits
Windows Server Configurations
This course is a survey of Windows Server Administration. Topics emphasize the structure and the various applications supported by Windows Server. The course includes remote, hands-on access to Windows lab exercises.
CMGT 230................................................................. 3 credits
Fundamentals of SSCP
This course introduces the basics of systems security. Emphasis is placed on access controls, networking, auditing, security operations, and malicious code activity. This course is aligned to the Systems Security Certified Practitioner (SSCP) exam.
CMGT 232................................................................. 3 credits
Fundamentals of Cyber Security and Cryptography
This course introduces the basics of cyber security and cryptography encryption concepts. This course will provide an overview of the various security and encryption methods used in today’s information technology and communication environments.

Multimedia Development Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The certificate in Multimedia Development offers coursework focused on technical knowledge and IT skills applied to multimedia and digital image design. This coursework provides students with technical skills and interactive, hands-on experience in electronic visual communication fundamentals, image manipulation, design fundamentals and multimedia development. This concentration covers the body of knowledge for the Adobe® Certified Associate (ACA) exam.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-mmd.

Course Descriptions for the CERT/MMD

CIS 207 ................................................................. 3 credits
Information Systems Fundamentals
This course introduces the fundamentals of computer systems and
the role of information processing in today’s business environment.
An overview is presented of information systems, systems devel-
opment, operating systems and programming, database manage-
ment, networking and telecommunications, and the Internet.

VCT 236 ................................................................. 3 credits
Introduction to Image Editing and Formatting
This course is an introduction to image editing and its role in the
disciplines of web design, electronic publishing and multimedia
development. An overview is presented on image editing software
applications, file formats, composition, color, text design, retouch-
ing, and manipulation of graphic and photographic images.

WEB 240 ................................................................. 3 credits
Web Design Fundamentals
This course introduces development tools and techniques used to
publish web pages on the World Wide Web. Students use basic
hypertext markup language, scripting, and presentation technol-
ologies to create websites with the aid of a software authoring appli-
cation. Topics include XHTML, CSS, JavaScript®, server hosting,
site publication, site maintenance, and search engine optimization.

VCT 221 ................................................................. 3 credits
Rich Media Communication Fundamentals
This course addresses the skills needed to communicate effectively
using digital media tools. Students use rich media design elements
to develop and manipulate interactive content that is based on funda-
mental design principles and technical requirements.

VCT 231 ................................................................. 3 credits
Video Communication Fundamentals
This course introduces the tools and techniques used in video post-
production. This includes examining post-production workflow,
use of graphics and audio to enhance video clips, and preparing
video communication content for a professional audience.

VCT 241 ................................................................. 3 credits
Electronic Publishing Fundamentals
This course introduces the role of electronic publishing in the deliv-
ery of information to businesses and consumers. Emphasis is
placed on the methods and techniques involved in the electronic
publishing of professional materials, reports, and digital content.

Advanced Mobile Development Certificate
(Undergraduate)

The following certificate program may be offered at these University
of Phoenix campus locations: Online, depending on state of residence. The
availability of programs and concentrations depend on student demand
and other factors. Not all programs may be available to all residents of all
states. Students may want to consider completing certain courses in the
Online classroom at Online rates if the program is available via the
Online modality in their state. Please contact your enrollment advisor for
more information.

The Advanced Mobile Development certificate is designed to pro-
vide specific theories, competencies, and skills necessary for suc-
cess as a Mobile Development professional. The Advanced Mobile
Development certificate prepares the student to design, develop
and implement mobile applications in the leading mobile plat-
forms.

For more information about our graduation rates, the median debt
of students who completed the program, and other important
information, please visit our website at http://www.phoenix.edu/
programs/cert- amd.

Course work requiring prerequisites are identified by a ~ symbol
following the course number.

Windows Mobile Implementation

The University reserves the right to modify the required course of study.

General Information for the CERT/AMD

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/AMD

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/AMD

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Mobile Development (Undergraduate)

Residency Requirements and Course Waivers for the CERT/AMD

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/CCNA

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, HSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

MBL 400 .................................................................3 credits
Mobile Fundamentals
This course is an introduction to mobile application development. Participants will learn about industry standards, how to select an application platform and architecture, and current trends in mobile application development. Additionally, the course covers HTML 5, CSS, and JavaScript for mobile devices. Upon completion, participants will be able to plan, design and create simple mobile applications.

MBL 402 .................................................................3 credits
Android Mobile Development
This course will cover the basics of coding for Android. Topics include use of the Android APIs, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to plan, design and create simple mobile applications.

MBL 404 .................................................................3 credits
Android Mobile Implementation
This course will continue to build on the fundamentals covered in Android Mobile Development. Topics include security, multithreading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

MBL 406 .................................................................3 credits
iOS Mobile Development
This course will cover the basics of coding for iOS. Topics include Objective-C, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

MBL 408 .................................................................3 credits
iOS Mobile Implementation
This course will continue to build on the fundamentals covered in iOS Mobile Development. Topics include security, multithreading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

MBL 410 .................................................................3 credits
Windows Mobile Development
This course will cover the basics of coding mobile applications for Windows Phone. Topics include use of XAML, the Windows Phone APIs (through C# or VB.NET), persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

MBL 412 .................................................................3 credits
Windows Mobile Implementation
This course will continue to build on the fundamentals covered in Windows Mobile Development. Topics include security, multithreading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.
CERTIFICATE PROGRAMS FOR THE COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/CCNA
- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for the program will read as: Cisco Networking (Undergraduate)

Residency Requirements and Course Waivers for the CERT/CCNA
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/CCNA

CIS 207 ................................................................. 3 credits
Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

CMGT 245 ................................................................. 3 credits
IS Security Concepts
This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.

CIT 245 ................................................................. 3 credits
Local Area Networking Fundamentals
This course addresses the fundamentals of local area networking (LAN). Students will learn about Ethernet LANs, wireless LANs (WLAN), and LAN connections. This will include securing the network, transmission control protocol / internet protocol (TCP/IP), troubleshooting switches, WLAN security, and constructing a network address scheme.

CIT 249 ................................................................. 3 credits
Wide Area Network Environment
This course provides students with the knowledge and skills necessary to implement and support a small to medium size network using wide area networking technologies. This course covers wide area networks (WAN) connections, network environment management, small network implementation, and medium sized switched network construction. It includes enabling the internet connection, router startup and configuration, and securing the expanded network.

CIT 274 ................................................................. 3 credits
Routing and Switching Implementations
This course provides students with the knowledge and skills necessary to design, build, and maintain routing and switching technologies. Instruction covers constructing medium-sized routed networks, implementing Single-Area Open Shortest Path First (OSPF) routing protocol, Enhanced Interior Gateway Routing Protocol (EIGRP), and applying Access Control Lists (ACLs). It includes a review of routing operations and implementing Variable Length Subnet Masking (VLSM).

CIT 276 ................................................................. 3 credits
Routing and Switching Management
This course provides students with the knowledge and skills necessary for routing and switching management. The course covers address space management and local area network (LAN) extension into a wide area network (WAN). This includes network address translation (NAT) and port address translation (PAT), virtual private network (VPN) solutions and frame relay connectivity.
Desktop Support Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Desktop Support Certificate offers coursework in the technologies and methods necessary to provide technical support to information technology and computer system users. Students will learn the customer support aspects of personal computer desktop software applications, computer hardware and software according to the A+ body of knowledge, including diagnosis and solutions. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-ds. CIS 207 Information Systems Fundamentals

This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
CIS 211 .................................................................................... 3 credits

**Office Software Support Fundamentals**

This course is an introduction to the support fundamentals of desktop software including word processor, spreadsheet, presentation, database, and personal information management (email, calendar, contact management and web browsing) applications.

CIS 290 .................................................................................... 3 credits

**Personal Computer Hardware Support**

This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair.

CIS 292 .................................................................................... 3 credits

**Personal Computer OS Support**

This course is an introduction to the fundamentals of personal computer operating systems for computer software configuration, file management, performance monitoring, optimization, maintenance, recovery, and security.

CIS 294 .................................................................................... 3 credits

**Personal Computer Customer Support**

This course is an introduction to the roles, responsibilities, and skills required to become a professional computer support technician and provide exceptional computer support service. This course includes the fundamentals of computer support, on-site support, telephone support, remote e-commerce support, and dealing with difficult customers.

CIS 296 .................................................................................... 3 credits

**Computer Systems Maintenance**

This course is an introduction to computer hardware and software maintenance and troubleshooting. This course will focus on typical problem scenarios, diagnostics, procedures and solutions.

**Network Support Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. CIS 207 .................................................................3 credits
Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

NTC 245...............................................................3 credits
Foundation of Local Area Networks
This foundational course covers local area network topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

NTC 247 .............................................................3 credits
Wireless Networking Concepts
This course explores concepts of wireless networking systems, including wireless networking and topologies; hardware protocols; hardware selection and implementation; interfaces with local-area network (LAN), metropolitan area network (MAN), and wide-area network (WAN) networks; basic wireless security; and network integration concepts.

NTC 249 .............................................................3 credits
Wide Area Networking Concepts
This course covers Wide Area Networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

CMGT 245 ..........................................................3 credits
IS Security Concepts
This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.

POS 221 .............................................................3 credits
Windows Server Configurations
This course is a survey of Windows Server Configurations. Topics emphasize the structure and the various applications supported by Windows Server. The course includes remote, hands-on access to Windows lab exercises.

Web Administration Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. Network Technology Foundations

The University reserves the right to modify the required course of study.

General Information for the CERT/WA

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/WA

All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
Certificate Completion Requirements for the CERT/WA

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for the program will read as: Web Administration (Undergraduate)

Residency Requirements and Course Waivers for the CERT/WA

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from coursework, 12 credits in the Required Course of Study, must be approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/WA

CIS 207 ..................................................................................... 3 credits

Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

VCT 236 ................................................................. 3 credits

Introduction to Image Editing and Formatting
This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on image editing software applications, file formats, composition, color, text design, retouching, and manipulation of graphic and photographic images.

CMGT 245 ................................................................. 3 credits

IS Security Concepts
This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.

CIT 277 ..................................................................................... 3 credits

Website Development Foundations
This course introduces essential Website development skills. Students will write code manually, as well as use graphical user interface (GUI) authoring tools. Topics include XHTML code validation, web forms, tables and frames, internet marketing and search engine optimization, and content formatting with style sheets. This course addresses the objectives specified in the CIW Site Development Associate Certificate.

CIT 278 ..................................................................................... 3 credits

Internet Business Concepts
This course introduces the Information Technology (IT) foundational skills and technologies used in business and the tasks involved in various IT job roles. Topics include Internet connection methods and protocols, the Domain Name System (DNS), cloud computing, social networking, and business skills. This course addresses the objectives specified in the CIW Internet Business Associate Certificate.

CIT 279 ..................................................................................... 3 credits

Network Technology Foundations
This course introduces the basics of network administration. Topics include the fundamentals of network architecture, the secure transmission of data, the OSI reference model, implementing a Content Management System (CMS), and mobile computing devices. This course addresses the objectives specified in the CIW Network Technology Associate Certificate.
A+ Fundamentals Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

This program is designed to help students become competent in the areas of computer hardware installation, configuration, maintenance, networking, file management, security, and troubleshooting.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aplus.

Required Course of Study for the CERT/APLUS
Course work requiring prerequisites are identified by a ~ symbol following the course number.

Note: Although the completion of courses for this certificate program does not result in A+ certification, there are course materials available including simulations, hands-on exercises, and video lectures which the student can use for certification preparation if they choose to take the certification exam.

Computer Hardware Support, 3 total credits
CIS 290 ........................................................................................................... 3 credits
Personal Computer Hardware Support

Computer Operating System (OS) Support, 3 total credits
CIS 292 ~ ........................................................................................................... 3 credits
Personal Computer OS Support
CIS 296 ~ ........................................................................................................... 3 credits
Computer Systems Maintenance
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/APLUS
All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• No work experience is required.

Certificate Completion Requirements for the CERT/APLUS
Credit Bearing Certificate completion requirements are the following:
• Completion of the 6 credits in the Required Course of Study.
• All students must meet residency requirements as set by the Dean for each Certificate program. Students who have completed the courses required for this certificate program as part of a University of Phoenix degree program are not eligible to enroll in and earn this certificate.
• A minimum program grade point average (GPA) of 2.0.
• The certificate awarded for this program will read as: A+ Fundamentals

Residency Requirements and Course Waivers for the CERT/APLUS
• Students may not waive any credits in this certificate program.
• The following courses in the required course of study may not be waived: CIS 290, CIS 292

Course Descriptions for the CERT/APLUS
CIS 290 ........................................................................................................... 3 credits
Personal Computer Hardware Support
This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair.
CIS 292 ........................................................................................................... 3 credits
Personal Computer OS Support
This course is an introduction to the fundamentals of personal computer operating systems for computer software configuration, file management, performance monitoring, optimization, maintenance, recovery, and security.
CIS 296 ........................................................................................................... 3 credits
Computer Systems Maintenance
This course is an introduction to computer hardware and software maintenance and troubleshooting. This course will focus on typical problem scenarios, diagnostics, procedures and solutions.

Health Care Information Technology Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations: Online. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Health Care IT certificate offers coursework focused on technical knowledge and IT skills applied to health care business operations. This certificate covers the body of knowledge for the CompTIA HIT technician exam by focusing on technical skills and interactive, hands-on experience in Information Systems (IS) fundamentals, personal computer hardware and operating systems support, and Health Care Information Technology (HIT).
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/
The certificate awarded for this program will read as:

A minimum grade point average (GPA) of 2.0.

Successful completion of a minimum of 18 credits.

High school graduation from an institution that holds state approval.

Additional Admission Requirements for the CERT/HIT

General Information for the CERT/HIT

This certificate program may be taken on its own or may be earned en-route to earning an associates degree.

Students who completed a certificate in its entirety and who later choose to enroll in an associate program with a concentration in the same area of focus as the completed certificate will not earn a second certificate en-route to completing the associate program.

Additional Admission Requirements for the CERT/HIT

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/HIT

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Healthcare Information Technology

- Students who have earned an Associate (A or B Track) or undergraduate degree in Information Technology may not receive a certificate in the same area of focus. Example: a student may not earn an AAIT/HIT Track A or B first and come back to earn an HIT certificate; however, students who have completed a certificate may return to receive an associate or bachelor's in Information Technology with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the CERT/HIT

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course(s) in the Required Course of Study may not be waived: CIS 298

Course Descriptions for the CERT/HIT

CIS 208 ................................................................. 3 credits
Information Systems Fundamentals in Health Care
CIS 290 ................................................................. 3 credits
Personal Computer Hardware Support
CIS 296 ~ ............................................................ 3 credits
Computer Systems Maintenance
HCS 208 ............................................................. 3 credits
Introduction to Health Care Industry Terms
HCS 235 ~ ............................................................ 3 credits
Health Care Delivery in the U.S.
CIS 298 ~ ............................................................. 3 credits
Healthcare IT

The University reserves the right to modify the required course of study.
HCS 208 ................................................................. 3 credits
Introduction to Health Care Industry Terms
This course provides students with a foundational set of basic health care vocabulary that relates to a variety of health care work settings. Students will review terms and concepts related to the structure and professions within the health care delivery systems.
HCS 235 ................................................................. 3 credits
Health Care Delivery in the U.S.
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
CIS 298 ................................................................. 3 credits
Healthcare IT
This course is an introduction to the technical knowledge and IT skills applied to health care business operations. This course will focus on the application of regulatory requirements, medical business and IT operations, and IT security. In addition, students will also explore medical business and technology applications in health care.

Network+ Technologies Certificate
.................................................................
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.
.................................................................
This program is designed to help students become competent in the areas of managing, maintaining, troubleshooting, installing, and configuring basic network infrastructure. The program covers local area networks (LAN), wireless networking systems (W-LAN), and wide area networks (WAN).
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/netplus.

Required Course of Study for the NETPLUS
Course work requiring prerequisites are identified by a ~ symbol following the course number.
Note: Although the completion of courses for this certificate program does not result in Network + certification, there are course materials available including simulations, hands-on exercises, and video lectures which the student can use for certification preparation if they choose to take the certification exam.
NCT 245 ................................................................. 3 credits
Foundation of Local Area Networks
NCT 247 ~ ............................................................. 3 credits
Wireless Networking Concepts
NCT 249 ~ ............................................................. 3 credits
Wide Area Networking Concepts
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the NETPLUS
All applicants are expected to meet the following admissions requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• No work experience is required.

Certificate Completion Requirements for the NETPLUS
• Completion of a minimum of 9 credits of the required course of study to meet University residency requirements.
• All students must meet residency requirements as set by the Dean for each Certificate program. Students who have completed the courses required for this certificate program as part of a University of Phoenix degree program are not eligible to enroll in and earn this certificate.
• A minimum grade point average (GPA) of 2.0.
• The certificate awarded for this program will read as: Network+ Technologies

Residency Requirements and Course Waivers for the NETPLUS
Students may not waive any credits in this certificate program. The following courses in the required course of study may not be waived: NCT 245, NCT 247 and NCT 249
Course Descriptions for the NETPLUS
NCT 245 ................................................................. 3 credits
Foundation of Local Area Networks
This foundational course covers local area network topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.
NCT 247 ................................................................. 3 credits
Wireless Networking Concepts
This course explores concepts of wireless networking systems, including wireless networking and topologies; hardware protocols; hardware selection and implementation; interfaces with local-area network (LAN), metropolitan area network (MAN), and wide-area network (WAN) networks; basic wireless security; and network integration concepts.
The Cisco Networking Fundamentals certificate offers coursework designed to help students acquire the knowledge to install, configure and operate Local Area Network (LAN), Wide Area Network (WAN) as well as routing and switching implementations and management. This certificate covers the body of knowledge for the Cisco Certified Network Associate (CCNA®) exam in preparing the student to install and configure Cisco® switches and routers in multiprotocol internetworks using LAN and WAN interfaces.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

- No work experience is required.
(NAT) and port address translation (PAT), virtual private network (VPN) solutions and frame relay connectivity.

**Graduate Business Analytics Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Graduate Business Analytics Certificate is designed to provide specific theories, competencies, and skills necessary for success in the field of Business Analytics. This certificate will examine a number of methodologies and tools important to the discipline such as Information Systems Concepts, Database Management, Statistics, IT Architecture, Data Relationship Management, Customer Relationship Management, Analytic Programming and Statistical Business Analytics. Courses in this certificate can be used to help prepare for Oracle and SAS industry certifications. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-ba

Course work requiring prerequisites are identified by a ~ symbol following the course number.

**Required Course of Study for the CERT/G-BA**

**Students must select 18 credits from the following course selections:**

- BSA 530 ................................................................. 3 credits
- IT Architecture
- BSA 540 ................................................................. 3 credits
- Data Relationship Management
- BSA 550 ................................................................. 3 credits
- Customer Relationship Management
- BSA 570 ................................................................. 3 credits
- Analytic Programming
- BSA 580 ................................................................. 3 credits
- Statistical Business Analytics
- CIS 568 ................................................................. 3 credits
- Information Systems Concepts
- DBM 502 ................................................................. 3 credits
- Database Management
- MTH 540 ................................................................. 3 credits
- Statistics

The University reserves the right to modify the required course of study.

**General Information for the CERT/G-BA**

This certificate program may be taken on its own or may be earned en-route to earning a graduate degree.

**Additional Admission Requirements for the CERT/G-BA**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- Signed Hardware/Software Agreement

**Certificate Completion Requirements for the CERT/G-BA**

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 3.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Graduate Business Analytics

**Residency Requirements and Course Waivers for the CERT/G-BA**

Students must meet established University residency requirements for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better;
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**IT Architecture**

The IT Architecture course covers the material to allow a professional to design, develop, document and deliver IT architectural
solutions for the business environment. The IT Architecture course is aligned to the Oracle Reference Architecture Overview certification requirements and covers Application Infrastructure, Security, Engineering, Integration, Management and Monitoring, Service Orientation and User Interaction.

Data Relationship Management
The Oracle Hyperion Data Relationship Management Specialization is for individuals focused on selling and implementing a Master Data Management software solution to build consistency within master data assets despite endless changes within the underlying transactional and analytical systems. The certification will cover such topics as: creating applications, working with hierarchies and nodes, defining properties, querying and comparing data, blending versions, formulas for derived properties, and managing security.

BSA 540 ................................................................. 3 credits

Customer Relationship Management
The Oracle Fusion Middleware 11g Business Intelligence Applications 7 for CRM Certified Implementation Specialist Certification identifies professionals that are skilled in implementing solutions based on Oracle Business Intelligence Applications for CRM source systems. The certification covers skills such as: installing and configuring Oracle BI Applications, using the Data Administration Console, configuring security for Oracle BI Applications, and customizing Oracle BI Applications. The exam targets the intermediate-level implementation team member. Up-to-date training and field experience are recommended.

BSA 550 ................................................................. 3 credits

Analytic Programming
This course covers the subject of Business Analytics Statistics. The analysis of large quantity of data through the use of statistical tools to help guide business operations has become an essential component of the modern organization. Topics in this course include foundational statistical concepts, t tests, Analysis of Variance, Linear Regression, diagnostic and data analysis. This course is aligned to the SAS Statistical Business Analyst Using SAS 9: Regression and Modeling certification.

BSA 580 ................................................................. 3 credits

Statistical Business Analytics
This course covers Statistical Business Analytics. The course includes the topics of analysis of variance, linear and logistic regression, preparing inputs for predictive models, and measuring model performance. This course is aligned to the SAS Statistical Business Analyst Using SAS, Regression and Modeling certification.

CIS 568 ................................................................. 3 credits

Information Systems Concepts
This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.
The University reserves the right to modify the required course of study.

**General Information for the CERT/G-ISA**

This certificate program may be taken on its own or may be earned en-route to earning a graduate degree.

**Additional Admission Requirements for the CERT/G-ISA**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- Signed Hardware/Software Agreement

**Certificate Completion Requirements for the CERT/G-ISA**

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 3.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Graduate Information Systems Audit and Control

**Residency Requirements and Course Waivers for the CERT/G-ISA**

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better;
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the CERT/G-ISA**

**Financial Accounting**

In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders’ equity, statement of cash flows, and error correction and accounting changes.

**IT Governance and Management**

This course provides an intensive workshop where the student will gain the hands-on experience and knowledge required to provide assurance that the enterprise has the structure, policies, accountability mechanisms and monitoring practices in place to achieve the requirements of corporate governance of IT. This course is based on the Governance and Management of IT Domain of the ISACA Model Curriculum for IS Audit and Control. ISACA (www.isaca.org) is a leading global provider of knowledge, certifications, community, advocacy and education on information systems (IS) assurance and security, enterprise governance and management of IT, and IT-related risk and compliance.

**Acquisition, Development and Implementation of IS**

The Information Systems Operations, Maintenance and Support domain is divided into ten topic areas that focus on service level management, maintenance of information systems, problem and incident management, change and configuration management, and backup and restoration of systems. The objective of this domain is to ensure that students understand and can provide assurance that the practices for systems operations and maintenance meet the enterprise’s strategies and objectives.

**Operations, Maintenance and Support of IS**

The Information Systems Acquisition, Development and Implementation domain is divided into six topic areas that focus on business case development, project management and controls. The objective of this domain is to ensure that students understand and can provide assurance that the practices of acquiring, developing, testing and implementing information systems meet the enterprise’s strategies and objectives.
BSA 525 ................................................................. 3 credits

Information Assets Protection
The Protection of Information Assets domain is divided into five topic areas that focus on design and implementation of system and security controls, data classification, physical access, and the process of retrieving and disposing of information assets. The objective of this domain is to ensure that students understand and can provide assurance that the enterprise’s security policies, standards, procedures and controls ensure the confidentiality, integrity and availability of information assets.

CIS 568 ................................................................. 3 credits

Information Systems Concepts
This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.

Graduate Information Systems Management Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Graduate Information Systems Management Certificate is designed to provide Information Systems Professionals an essential understanding of the Information Systems and Business environment in which they will work. This certificate contains courses on information systems, programming concepts, database management, and information system leadership. The certificate also provides an understanding of business areas such as accounting, marketing and human resources and their importance for an information systems leader.

For more information about all graduation requirements, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-ism.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the CERT/G-ISM

Students must select 18 credits from the following course selections:

BSA 500 ................................................................. 3 credits
Business Systems I
BSA 502 ................................................................. 3 credits
Business Systems II
CIS 532 ................................................................. 3 credits
Information Systems Leadership
CIS 568 ................................................................. 3 credits
Information Systems Concepts
CSS 562 ................................................................. 3 credits
Programming Concepts
DBM 502 ................................................................. 3 credits
Database Management

The University reserves the right to modify the required course of study.

General Information for the CERT/G-ISM

This certificate program may be earned en-route to earning a graduate degree.

Additional Admission Requirements for the CERT/G-ISM

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• Applicants must have access to a suitable work environment for the completion of course assignments.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

• Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/G-ISM

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 3.0.

• Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.

• Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

The certificate awarded for this program will read as: Graduate Information Systems Management

Residency Requirements and Course Waivers for the CERT/G-ISM

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;

• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better;
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/G-ISM

BSA 500 ........................................................................................................... 3 credits

Business Systems I

This course introduces business systems. The course first reviews the basics of the business environment and influences on that environment. Then accounting and finance business systems are reviewed.

BSA 502 ........................................................................................................... 3 credits

Business Systems II

This course reviews the following business systems: marketing, sales, human resources, operations and legal. Emphasis is placed upon the inputs and outputs of information systems and the potential for integration of the systems.

CIS 532 ........................................................................................................... 3 credits

Information Systems Leadership

The Information Systems Leadership course provides an opportunity for a student to explore the role of senior level Information systems executives, these titles range from IT director, VP of technology, and CIO as well as functional titles. Their duties often encompass responsibility for the overall direction for technology through strategic planning and evaluation. This course addresses numerous skills that can help Information Systems leaders excel within their unique roles in the organization.

CIS 568 ........................................................................................................... 3 credits

Information Systems Concepts

This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.

CS 562 ........................................................................................................... 3 credits

Programming Concepts

This course provides the conceptual foundation to develop computer software programs. Topics include program development processes, flowcharting, basic design, program structure (methods and events), Boolean logic, looping, recursion, lists and arrays.

DBM 502 ........................................................................................................... 3 credits

Database Management

The course focuses on database management systems from a managerial perspective. Emphasis is placed on developing a strategy for managing and organizing corporate data, including data warehousing, to support the business activities of the organization. The course uses Microsoft Access and simulations of Oracle software.

CERTIFICATE PROGRAMS FOR THE COLLEGE OF CRIMINAL JUSTICE AND SECURITY

Criminal Justice Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Criminal Justice Management certificate area coursework is designed to give learners a depth of understanding concerning the management and administrative skills necessary to effectively run organizations in the various domains of criminal justice system. The courses included in this degree concentration focus primarily on the management and administration skill sets associated with the police, the courts, and with corrections. The theories and principles behind criminal justice are also examined. Students learn about policies, procedures associated with management functions, as well as many administrative practices and factors impacting criminal justice agency operations. This will not only give you the insight into what these specific departments are and what they do, but how to maintain and evaluate organizational operations from an administrative viewpoint. The certificate does not lead to certification; however the coursework alignment provides an emphasis of academic content that upon mastery is a source of in depth knowledge and skills for effectively managing criminal justice organizations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cjm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Criminal Justice Administration Capstone

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/CJM

All applicants are expected to meet the following admissions requirements:
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
• Applicants must have access to a suitable work environment for the completion of course assignments.
• Signed Acknowledgement Form
• A minimum of one year full-time post high school work experience in the Criminal Justice industry is required.

Certificate Completion Requirements for the CERT/CJM
• Completion of a minimum of 18 credits.
• A minimum grade point average (GPA) of 2.0.
  • Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  • Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• The certificate awarded for this program will read as: Criminal Justice Management (Undergraduate)

Additional Residency Requirements and Course Waivers for the CERT/CJM
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the required course of study may not be waived: CJA 484

Course Descriptions for the CERT/CJM
CJA 395 .................................................................................... 3 credits
Current Issues/Futures in Criminal Justice Management
This course examines both the principle issues in contemporary criminal justice management as well as the extrapolation of such issues toward possible futures within the criminal justice management field. Students will focus on relevant research in policing, courts, and corrections that reflect key elements of current conditions and what may be expected in the years to come that will be important to criminal justice administrators. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.

CJA 444 .................................................................................... 3 credits
Organizational Behavior and Management
This course in organizational behavior encompasses the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.

CJA 454 .................................................................................... 3 credits
Criminal Justice Management Theory and Practice
This course applies management and financial principles to criminal justice organizations. Emphasis is placed on budgets, financial accounting principles and assessing the effectiveness of the activities of criminal justice organizations. Constitutional requirements, court decisions, and legislation (such as EEOC requirements) as they impact management in criminal justice organizations are discussed. Basic accounting and financial terminology, and purposes and formats of financial statements are introduced: depreciation of assets, capital budgeting, cash management, lease versus purchase, and inventory management.

CJA 474 .................................................................................... 3 credits
Managing Criminal Justice Personnel
This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.

CJA 475 .................................................................................... 3 credits
Forecasting and Strategic Planning
This course provides pre- or in-service administrators/managers the knowledge, skills and tools necessary to consider the long-term mission and direction of various criminal justice agencies and to build strategy and operations from both internal and external stakeholders to achieve identified mission goals. Students consider strategic planning as a process and method for implementing effec-
The Cybercrimes certificate area coursework provides students with the basic knowledge and skills needed to recognize relevant sources of electronic evidence and determine how electronic evidence can be used in court proceedings and as part of an organizational security plan. The concentration combines academic instruction in criminal justice and cybercrime domains to include; the evolution of cybercrime, cybercrime forensics, electronic evidence gathering, and cybercrime investigation and prevention. Students are prepared to provide services in a variety of private and public settings within the criminal justice domains of policing, the courts, corrections, and security organizations. The certificate does not lead to specific industry certification; however, the coursework alignment is an emphasis of academic content and skills based knowledge designed to develop a strong foundational understanding of cybercrime models and issues.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cyb.

Additional Residency Requirements and Course Waivers for the CERT/CYB

Students in this program may waive a maximum of 3 credits from coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix. Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

- The certificate awarded for this program will read as: Cybercrimes (Undergraduate)

**Additional Residency Requirements and Course Waivers for the CERT/CYB**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the required course of study may not be waived:

**Course Descriptions for the CERT/Cyb**

BCC 395 ............................................................... 3 credits

Contemporary Issues and Futures in Cybercrimes
This course examines both the principle topics in the field of cybercrime investigation as well as the examination of the varying issues regarding the futures within the field of technology-facilitated crime. Students will focus on relevant exploration of technology crimes that reflect key fundamentals of current conditions and what may be expected in technology and cybercrime in the years to come. Students will apply critical review of current technological crimes and engage in in-depth discussions of these concepts as a basis for comprehensive understanding at the local and global levels of cybercrime investigation and prevention.

BCC 400 ............................................................... 3 credits

Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in current business environments. Students receive an overview of information systems, systems development, operating systems, networking, telecommunications, security concerns, and the Internet. Completing this course provides students new skills and knowledge that better prepares them for the Cybercrime specialization courses, and aids their present or future organizations as leaders, providing service to their communities.

BCC 401 ............................................................... 3 credits

Cybercrimes in the 21st Century
Practice of criminal justice brought about by technology and crime as well as the rapid technological change in computers, and other Internet access devices. Specific topics include: cybercrime, how different cybercrimes are committed, the rapid evolution of technology and its effects on crime, cybercrimes against persons, and criminal justice agencies involved in the investigation and prevention of cybercrimes. The new skills and knowledge gained in this course will add to the protection, safety, and security of our society.

BCC 402 ............................................................... 3 credits

Cybercrime and Role of Law Enforcement Security Personnel
This course explores the developments and changes in the role of law enforcement and security officials in their investigation of cybercrimes. Specific topics include: cybercrime forensics, obtaining search warrants for cybercrimes, jurisdictional issues in cybercrimes, law enforcement issues in cybercrimes, and personal and corporate security and the prevention of cybercrimes. Upon completion of this cybersecurity course, students will have new skills and knowledge that will aid their present or future organizations, and as leaders provide service to their communities.

BCC 403 ............................................................... 3 credits

Global Technology and Cybercrime
In this course, students will study how global technology is used to further cybercrime. Topics in this course include homeland security and cybertechnology, global technology threats to the United States, preventing and fighting global technology crime, and the role of local and federal agencies in preventing and investigating global technology crimes. Students will also explore the future of law enforcement and security to prevent and fight global cybercrimes. The new skills and knowledge gained by the students will aid them in their current or future professional endeavors.

CJA 484 ............................................................... 3 credits

Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

**Human Services and the Criminal Justice System Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Human Services and the Criminal Justice System certificate area coursework is intended to give graduates knowledge and basic skills to work in human services and helping domains of the criminal justice system. This particular certificate concentration represents an integrated program combining academic instruction in criminal justice with applied skills for students whose goal is a career in the areas of the system where basic skills in interviewing, case management, mental health interventions, advocacy and mediation are required. Human Services certificate does not lead to a particular industry certification; however, graduates are prepared to provide services in a variety of institutional and community settings within the criminal justice domains of policing, the courts, institutional and community corrections.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/hscj.

Course Descriptions for the CERT/HSCJ

CJHS 395.................................................3 credits

Issues and Futures in Human Services in Criminal Justice

This course examines both the principle issues in contemporary human services in the criminal justice system as well as the extrapolation of such issues toward possible futures within human services in the criminal justice field. Students will focus on relevant research that reflects key elements of current conditions and what may be expected in the years to come. Such research will reflect case management, mental health care, crisis and trauma situations, and legal requirements affecting children and families as they relate to policing, courts, and corrections; the main components of the criminal justice system. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of human services in the criminal justice system as addressed by criminal justice administration.

CJHS 400.................................................3 credits

Theory and Practice: Human Services in Criminal Justice

Students explore major theoretical areas in human services, including psychotherapeutic, behavioral, cognitive, multicultural, and systems theories. Students learn the foundational concepts associated with the major theories, approaches to change, and techniques and interventions used by practitioners. This course emphasizes the development of a personal theory and approach to human services within criminal justice. In addition, students analyze the practical applications of theory-based techniques that criminal justice and human services professionals use while working in the criminal justice system.

CJHS 410.................................................3 credits

Mental Health and Crisis Interventions in Criminal Justice

Students learn about human services delivery, crisis intervention, and mental health services within the criminal justice system. Students explore the skills associated with crisis intervention and mental health services and how they are applied in the field. Strategies for providing services to various populations in the criminal justice system also are examined.

CJHS 420.................................................3 credits

Case Management and Services Provided in Criminal Justice

This course covers principles, practices, and issues in case management. Students learn about the nature of diagnoses, basic inter-
viewing skills, and how to identify treatment resources in the criminal justice system. Ethics and professional boundaries in case management are also examined.

CJHS 430 .................................................. 3 credits

Collaborative Services in Criminal Justice

This course examines the collaboration between human service professionals and those working in the criminal justice system. Students analyze the roles of mediator, advocate, and agency representatives to include forensic evaluation. Overcoming barriers to effective service delivery through the use of collaboration is also considered.

CJA 484 .................................................. 3 credits

Criminal Justice Administration Capstone

This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Criminal Justice Security Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment advisor for more information.

The Criminal Justice Security certificate area coursework is intended to give graduates knowledge and basic skills to work in Homeland Security and other areas of the criminal justice system that deal with terrorism, counterintelligence and analysis. This particular certificate concentration represents an integrated program combining academic instruction in criminal justice with applied skills for students whose goal is a career in the areas of the system where basic skills in analysis, risk management, counterterrorism, critical infrastructure and management are required. Security graduates are prepared to provide services in a variety of private and public settings within the criminal justice domains of policing, the courts, corrections and security organizations. The certificate does not lead to specific industry certification; however, the coursework alignment provides an emphasis of academic content and skills that support effective security practices and in depth knowledge of security related issues.

The following courses in the required course of study may not be waived: CJA 484

Course Descriptions for the CERT/SEC

BSS 395 .............................................................. 3 credits
Contemporary Issues and Futures in Security
This course examines the principles issues in contemporary criminal justice as well as the extrapolation of such issues toward potential futures within the criminal justice field. Students focus on relevant research about the current environment of the law enforcement field and analytic conclusions of potential future conditions. Students will apply critical thinking to and engage in in-depth discussion of these concepts in this comprehensive study of local, state, national, and global levels of criminal justice administration.

BSS 480 .............................................................. 3 credits
Risk Management Perception and Communication
In this course, students will explore different global and regional threats; integrate security decision concerns with antiterrorism resource allocation; examine the psychological perception of the risk of terrorism threats; evaluate security plans; and discuss the role of the media in regard to accuracy and timely reporting. The knowledge and skills developed in this course will help prepare students for service in local and global security environments.

BSS 481 .............................................................. 3 credits
Counterterrorism Intelligence and Analysis
This course explores developments and changes in the practice of security operations brought about from global and local terrorist threats to different organizations. Students in this course will study the typology and anatomy of terrorist operations; evaluate intelligence and information sharing in counterterrorism; examine counterterrorism analysis methods and global security tactics; discuss international ethical and legal issues in counterterrorism; and analyze technology issues in counterterrorism. The new skills and knowledge gained will add to the protection, safety, and security of our society.

BSS 482 .............................................................. 3 credits
Securing Critical Infrastructure and Cyberspace
This course explores the developments and changes in security operations to secure the critical infrastructure in both the public and private environments. Students will explore the critical infrastructure and interdependency; evaluate cybersecurity in post 9/11 global security; discuss the securing of human and property assets; develop proactive planning for protection of assets; and analyze border and transportation security issues. Upon completion of this security course, students will have new skills and knowledge that will aid them in their present or future organizations.

BSS 483 .............................................................. 3 credits
World View of Homeland Security
Students in this course will develop new skills to aid in the protection, safety, and security of our society. Students will examine public and private security collaboration in homeland security response; discuss the leadership task of controlling the human influence in homeland security; analyze and understand the political influence on idea development in homeland security; compare and contrast jurisdictional responsibilities of homeland security programs; and evaluate the goals, objectives, and assessment of homeland security measures.

CJA 484 .............................................................. 3 credits
Criminal Justice Administration Capstone
This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Certificate Awards

Upon completion of all courses in a certificate program and submission of the Request for Certificate form, a certificate of completion and a certificate posted transcript will be processed.

Accreditation and Affiliations

The following agencies have supported the development of the certificate program that relates to their specific field:
- The Society for Human Resource Management (SHRM)
- Project Management Institute (PMI), Globally Registered Education Provider (R.E.P)
- Call Center Industry Advisory Council (CIAC)
