- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Additional Elementary Admission Requirements for Michigan:

- Students enrolled in the MAED/TED-E program and residing in the state of Michigan must provide a transcripted verification of a minimum of 30 semester credit hours in one of the content areas appropriate to elementary education prior to admission to the University.

- Appropriate content areas are:
  - English/Language Arts
  - Math
  - Science
  - Social Studies

Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-E
- Completion of a minimum of 44 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
  To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.
- Students residing in Iowa must provide verification of the completion of any outstanding credits as indicated in the admissions requirements prior to student teaching.
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514
Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:
- Arizona Provisional SEI Endorsement (SEI 500)
- Arizona Full SEI Endorsement (SEI 503)
- Arizona English as a Second Language Endorsement
- Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at https://www.ade.az.gov/oelas/.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

Arizona Teacher candidates enrolled in the MAED/TED-E program will be issued an Elementary certificate in grades 1-8. Teacher candidates in the MAED/TED-E program will not be eligible to student teach in Kindergarten and will not be issued an Institutional Recommendation (IR) as the Arizona Department of Education will no longer recognize Kindergarten experience for certification in Elementary education.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Arizona Teaching Intern Certificate Program

The requirements for initial issuance of the teaching intern certificate are:
- A Bachelor’s degree or higher from an accredited institution
- A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant’s teaching assignment(s)
- Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
- A valid fingerprint clearance card issued by the Arizona Department of Public Safety

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one
year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary. Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Assessment and Evaluation**

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**Curriculum Constructs and Assessment: Reading and Language Arts**

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to develop an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-5 school setting, is incorporated into the course requirements.

**Structured English Immersion**

This course will introduce students to the concept of and methods for instruction in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and ELL Learners acquire English.

**Advanced Structured English Immersion Methods**

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**Curriculum Constructs & Assessment: History and Social Science**

This course defines and provides a context for teaching and assess-
Elementary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Additional Secondary Admission Requirements for Michigan:

- Students enrolled in the MAED/TED-S program and residing in the state of Michigan must provide a transcripted verification of a minimum of 30 semester credit hours in their secondary content area prior to admission to the University.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S

- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.
- Students residing in Iowa must provide verification of the completion of any outstanding credits as indicated in the admissions requirements prior to student teaching.

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S

- A candidate must earn a grade of "B" (grades of "I" or "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599

- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

- Candidates must provide verification of completion in order to be eligible for these waivers.

Institutional Recommendation for the MAED/TED-S

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 559, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:

- Arizona Provisional SEI Endorsement (SEI 500)
- Arizona Full SEI Endorsement (SEI 503)
- Arizona English as a Second Language Endorsement
- Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at https://www.ade.az.gov/oelas/.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project. Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Arizona Teaching Intern Certificate Program
The requirements for initial issuance of the teaching intern certificate are:
• A Bachelor’s degree or higher from an accredited institution
• A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant’s teaching assignment(s)
• Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
• A valid fingerprint clearance card issued by the Arizona Department of Public Safety

Additional Academic Program Re-entry Policy for the MAED/TED-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S
MTE 507 .........................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 .........................................................................1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 .........................................................................2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
SEC 508 .........................................................................3 credits
Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 523 .........................................................................3 credits
Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 .........................................................................2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 .........................................................................3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of
classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**Secondary Settings**

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

MTE 559 ................................................................. 3 credits

**Curriculum Constructs and Assessment: Secondary Methods**

This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

SEI 500 ................................................................. 3 credits

**Structured English Immersion**

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 ................................................................. 3 credits

**Advanced Structured English Immersion Methods**

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 514 ................................................................. 2 credits

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

SEC 598 ................................................................. 4 credits

**Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ................................................................. 4 credits

**Secondary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Master of Arts in Education/Elementary Teacher Education (Colorado)**

The following Master of Arts in Education (MAEd) /Elementary Teacher Education program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Majors: Colorado State Department of Education guidelines determine specific major requirements. Students will need a major in one of the multi-disciplinary areas listed below:
  - Language Arts
  - Liberal Arts
  - Humanities
  - Sciences
  - Mathematics
  - Social Studies
  - Business*
  - Health*
  - Information Technology*

* Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency.
  - Verification of fingerprint clearance.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience:
- Immunization or TB test results (district specific).
- Content knowledge mastery prior to student teaching.
- Verification of the completion of 200 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: ELM 598, ELM 599
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Degree Completion Requirements for the MAED/TED-E
• Completion of a minimum of 44 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (200 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Institutional Recommendation for the MAED/TED-E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

• Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Formal field experience evaluations are required during the program (including observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for an elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E
MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 ........................................................................................................ 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 ........................................................................................................ 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
MTE 518 ........................................................................................................ 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522 ........................................................................................................ 1 credit
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 .................................................................................................... 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 .................................................................................................... 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.
RDG 500 .................................................................................................... 3 credits
Scientifically Based Reading Instruction
This course focuses on scientifically based research as the founda-
This course focuses on the pedagogy and assessment strategies designed to yield accurate information on student progress and traditional testing tools based on clear criteria. Integrated curriculum are explored, including the use of critical thinking, interdisciplinary teaching, and curriculum and assessment approaches for the content area within the framework of an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 533 ................................................................. 3 credits

Instruction and Assessment of English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and culture of other languages and linguistic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................. 2 credits

Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 ................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ................................................................. 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ................................................................. 2 credits

Curriculum Constructs & Assessment: Physical Education and Health

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on scope, sequence, and state and national standards. This course will include framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course will also include framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas will be explored.

ELM 598 ................................................................. 4 credits

Elementary Student Teaching Part A

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599 ................................................................. 4 credits

Elementary Student Teaching Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education (Colorado)

The following Master of Arts in Education (MAEd)/Secondary Teacher Education program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Majors: Colorado State Department of Education guidelines determine specific major requirements. Candidates for the Secondary Teacher Education program must have a major in one of the following areas:
  • Business
  • Information Technology
  • English/Language Arts
  • Mathematics
  • Science
  • Social Studies/History/Political Science
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidate Status

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  • Demonstration of basic skills proficiency.
  • Verification of fingerprint clearance.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience:

• Immunization or TB test results (district specific).
• Content knowledge mastery prior to student teaching.
• Verification of the completion of 200 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**

• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SEC 598, SEC 599
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Degree Completion Requirements for the MAED/TED-S**

• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (200 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

**Institutional Recommendation for the MAED/TED-S**

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/TED-S**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 501, MTE 506, MTE 518, MTE 564, MTE 566, MTE 567, MTE 569, MTE 580, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 200 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Formal field experience evaluations are required during the program (including observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

• Student teaching can only be repeated one time.

• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Additional Academic Program Re-entry Policy for the MAED/TED-S

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

MTE 507 .................................................................0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ....................................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ...................................................................................2 credits

The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 ...................................................................................3 credits

Models, Theories and Strategies for Secondary Education

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ...................................................................................3 credits

Maintaining an Effective Learning Climate

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse
Student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ........................................................................................................................................ 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ........................................................................................................................................ 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 500 ........................................................................................................................................ 3 credits

Scientifically Based Reading Instruction
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children's performance in reading and in the language arts are also emphasized.

RDG 542 ........................................................................................................................................ 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

MTE 553 ........................................................................................................................................ 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ........................................................................................................................................ 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564 ........................................................................................................................................ 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 ........................................................................................................................................ 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 ........................................................................................................................................ 3 credits

Curriculum Constructs & Assessment: Secondary History/Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 ........................................................................................................................................ 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 580 ........................................................................................................................................ 3 credits

Curriculum Constructs and Assessment: Secondary Business & Marketing
This course focuses on instruction and assessment strategies to provide secondary students background and knowledge in busi-
ness/marketing content and careers, employment and workplace skills, applied academics, and leadership skills through participation in career and technical student organizations (CTSOs). This course will provide teacher candidates the opportunity to develop the ability to evaluate and use appropriate instructional methods, curricular materials and resources, and assessment strategies.  

SEC 598 ................................................................. 4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.  

SEC 599 ..................................................................... 4 credits

Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (Missouri)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the campus locations: Online, depending on state of residence. The guiding philosophy of the MAED/TED-E program is the development of curriculum and instructional strategies, the ability to evaluate and use appropriate instructional methods, curricular materials and resources, and assessment strategies.  

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator's responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student's professional portfolio.  

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e. Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of Study.
Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

 Candidacy Status for the MAED/TED-E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

 Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
• Demonstration of basic skills proficiency
• Verification of fingerprint clearance
• Verification of Child Abuse Registry check.
• Verification of 21 credit hour content specialization
  • English
  • Math
  • Science
  • Social Sciences
• Verification of the completion of the Missouri Educator Profile
 Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

 Degree Completion Requirements for the MAED/TED-E
• Completion of a minimum of 46 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Satisfactory completion of any student teaching or alternative clinical practice. For more information on alternative clinical practice, visit the Department of Elementary & Secondary Education Website and view item 2(A): alternative clinical practice.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

 Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience.
• Verification of the completion of the Missouri Educator Profile
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

 Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

 Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

 In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level (graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study.
Courses Waived

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Institutional Recommendation for the MAED/TED-E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .............................................................. 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................. 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ................................................................. 3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................. 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 536 ................................................................. 3 credits
Children's Literature
This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied, as well as the application of children’s literature to instruction and assessment in reading. Methods for incorporating the use of children's literature in all content areas will also be examined.

RDG 535 ................................................................. 3 credits
Diagnosis & Remediation of Reading Difficulties
This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.

RDG 537 ................................................................. 4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SPE 514 ................................................................. 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 ................................................................. 2 credits
Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................. 4 credits
Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
MTE 534 ................................................................. 2 credits

Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.
MTE 537 ................................................................. 2 credits

Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.
ELM 598 ................................................................. 4 credits

Elementary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.
ELM 599 ................................................................. 4 credits

Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
RDG 537FE ............................................................. 1 credit

Reading Field Experience
Students will complete reading field experience activities.
SPE 514FE ............................................................. 1 credit

Special Education Field Experience
Students will complete special education field experience activities.

Master of Arts in Education/Secondary Teacher

Education (Missouri)
The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs are available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

- Demonstration of basic skills proficiency
- Verification of fingerprint clearance
- Verification of Child Abuse Registry check.
- Verification of Subject matter requirement:
  - English: 30 Credits
  - Math: 30 Credits
  - Science: 32 Credits
  - Social Sciences: 40 Credits
- Verification of the completion of the Missouri Educator Profile

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S

- Completion of a minimum of 37 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Satisfactory completion of any student teaching or alternative clinical practice. For more information on alternative clinical practice, visit the Department of Elementary & Secondary Education Website and view item 2(A): alternative clinical practice.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
  To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
Courses Waived

- Immunization or TB test results (District specific)

Academic Progression Requirements for the MAED/TED-S

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.

Minimum Grade Requirements for the MAED/TED-S

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/ TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, RDG 542FE, SEC 508, SEC 598, SEC 599, SPE 514, SPE 514FE

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-S

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

• Candidates must pass their state-mandated professional knowledge exam.

• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-S

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

MTE 507 ................................................................. 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ....................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits

The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 ....................................................................... 3 credits

Models, Theories and Strategies for Secondary Education

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ....................................................................... 3 credits

Maintaining an Effective Learning Climate

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ....................................................................... 2 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family
influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .................................................................................... 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 ................................................................................... 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

MTE 553 .................................................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 .................................................................................... 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564 .................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 .................................................................................... 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 .................................................................................... 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 .................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course explores the application of basic instructional methods and strategies of teaching science in middle school and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 541 .................................................................................... 3 credits

Language Development for Secondary Setting
This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct pronunciation and intonation for those working with linguistically diverse secondary populations.

MTE 549 .................................................................................... 2 credits

Curriculum Constructs and Assessment: Distance Education Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

SEC 589 .................................................................................... 4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following top-
The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. • All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
• Demonstration of basic skills proficiency
• Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-E
• Completion of a minimum of 43 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education
Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)

• Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAE/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-E

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ............................. 0 credits
Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio,
Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................. 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 ............................................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
MTE 518 ............................................................................. 3 credits

Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522 ............................................................................. 3 credits

Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 ............................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 ............................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.
RDG 537 ............................................................................. 4 credits

Curriculum Constructs and Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
MTE 529 ............................................................................. 2 credits

Reading and Phonological Theory
This course expounds upon the basic premise that systematically integrated phonics instruction is a fundamental component of effective reading programs. Students will study the relevant research and applications that support principles of sequential phonics instruction and phonological awareness and review traditional and contemporary phonics approaches.
MTE 553 ............................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multicultural curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
MTE 533 ............................................................................. 4 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 531 ............................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.
MTE 533 ............................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
MTE 534 ............................................................................. 2 credits

Curriculum Constructs & Assessment: Visual and Performing
Online modality in their state. Please contact your enrollment representative for more information.

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campuses: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the states. Students may want to consider completing certain courses in the Elementary Student Teaching Part B (MAED/TED-S) program may be offered at these University of Phoenix campuses.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s. Courses requiring prerequisites are identified by a ~ symbol following the course number.

• Level 1 Candidate Status is completed upon admission to the Candidacy Status for the MAED/TED-S
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Student Teaching & Field Experience, 8 total credits
SEC 598 ~ .................................................................4 credits
Secondary Student Teaching Part A
SEC 599 ~ .................................................................4 credits
Secondary Student Teaching Part B
The University reserves the right to modify the Required Course of Study.

Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S
• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours).
  To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
Courses Waived

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching for the MAED/TED-S

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-S

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/
TED-S

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, and can complete within their original deadline may reenter their original program version. Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

MTE 507 ...........................................................................................................0 credits

Orientation to Teacher Education

This course is designed to provide an introduction to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ........................................................................................................1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ........................................................................................................2 credits

The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 ........................................................................................................3 credits

Models, Theories and Strategies for Secondary Education

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ........................................................................................................3 credits

Maintaining an Effective Learning Climate

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ........................................................................................................2 credits

Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ........................................................................................................3 credits

Assessment and Evaluation

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 ........................................................................................................3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

MTE 553 ........................................................................................................3 credits

Instruction and Assessment of English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ........................................................................................................2 credits

Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 559 ........................................................................................................3 credits

Curriculum Constructs and Assessment: Secondary Methods

This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of
secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

MTE 556 ................................................................................... 3 credits

**Curriculum Constructs and Assessment: Distance Education Methods for Secondary Schools**

This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557 ................................................................................... 3 credits

**Language Development for Secondary Settings**

This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504................................................................................... 3 credits

**Adolescent Psychology**

This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced.

MAT 538................................................................................... 3 credits

**Middle School Foundations and Philosophy**

This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments.

CMP 521................................................................................... 3 credits

**Using Computers in Education**

This course examines how emerging technology can affect the classroom teacher, school administrator, school board members, students, and parents. It explores how technology influences curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technology skills and knowledge are also the focal point of this course. This course uses a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598 ................................................................................... 4 credits

**Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ................................................................................... 4 credits

**Secondary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Master of Arts in Education/Elementary Teacher Education (Hawaii)**

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

**Additional Admission Requirements for the MAED/TED-E**
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TED-E**

- Completion of a minimum of 41 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.

**Academic Progression Requirements for the MAED/TED-E**
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience
  Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/TED-E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization. The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514
Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Program; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project. Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education Program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/TED program and earn a Hawaii credential. This policy applies to candidates in the following programs: MAED/TED-E, MAED/TED-S (English, social studies, math, or science concentrations).

MAED/TED-S candidates living in Hawaii who attend the Online campus and are pursuing a content area outside of the four areas noted above must meet the Arizona requirements, including AEPA exams or comparable content and professional knowledge examinations from another state or agency taken within the past 7 years and Arizona fingerprinting requirements, in order to complete the Arizona approved program and be eligible for Institutional Recommendation.

Additional Academic Program Re-entry Policy for the MAED/TED-E

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for MAED/TED-E

MTE 507 ................................................................................... 0 credits
Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................................... 1 credit
Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................................... 2 credits
The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................................... 3 credits
Models, Theories, and Instructional Strategies

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 ................................................................................... 3 credits
Maintaining an Effective Learning Climate for Elementary Settings

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................................... 2 credits
Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 .................................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 .................................................................................. 4 credits

Curriculum Constructs and Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 553 .................................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multilingual curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 .................................................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 .................................................................................. 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 .................................................................................. 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
dates for teacher licensure. Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulations of the state in which the student is attending. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Requirements for the MAED/TED-S**

• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as:
  Master of Arts in Education
  Secondary Teacher Education

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**

• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the MAED/TED-S**

• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/TED-S**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Program; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-S**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a
structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-S**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/TED program and earn a Hawaii credential. This policy applies to candidates in the following programs: MAED/TED-E, MAED/TED-S (English, social studies, math, or science concentrations).

MAED/TED-S candidates living in Hawaii who attend the Online campus and are pursuing a content area outside of the four areas noted above must meet the Arizona requirements, including APEA exams or comparable content and professional knowledge examinations from another state or agency taken within the past 7 years and Arizona fingerprinting requirements, in order to complete the Arizona approved program and be eligible for Institutional Recommendation.

**Additional Academic Program Re-entry Policy for the MAED/TED-S**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TED-S**

- MTE 507 ....................................................................................0 credits
- Orientation to Teacher Education
  This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
  COM 516 ....................................................................................1 credit
- Professional Communications
  This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 .................................................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 ................................................................. 3 credits

Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .................................................................................. 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .................................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .................................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 .................................................................................. 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

MTE 553 .................................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 .................................................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564 .................................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 .................................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 .................................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary History/Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 .................................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that
impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 556 .................................................................................... 3 credits
Curriculum Constructs and Assessment: Distance Education Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557 .................................................................................... 3 credits
Language Development for Secondary Settings
This course examines secondary language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504 ................................................................................... 3 credits
Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced. Previous course description: This course covers adolescent psychology from a historical perspective to present day societal influences and pressures. Current trends and methods of learning in adolescent education will also be covered.

MAT 538 ..................................................................................... 3 credits
Middle School Foundations and Philosophy
This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments. Previous description: This is a draft of the description. This course examines the junior high and middle school. The course will evaluate the unique characteristics of the adolescent, diversity among middle school students, structures of middle school, and curriculum and instruction.

CMP 521 ..................................................................................... 3 credits
Using Computers in Education
This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598 ..................................................................................... 4 credits
Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ..................................................................................... 4 credits
Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (California)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Additional Admission Requirements for the MAED/TED-E

All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate or graduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All California residents (Online and Local) must enroll in this version. Candidates in the MAED/TED-E and MAED/TED-S programs must sign the California Teaching Performance Assessment (TPA) Code of Honor Guidelines.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1. Level 2 Candidate Status is completed prior to the completion of 12 semester credits in the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in the University's IS3 and the student's eXp file.

- Demonstration of basic skills proficiency
  - Students who reside in states that require a basic skills test exam for teacher certification will be required to successfully pass the state exam (i.e. CBEST, CSET, Praxis I, etc.) using their state’s cut score.
  - Online students who reside in California and are enrolled in a California approved program (MAED/TED-E or MAED/TED-S) must successfully pass the CBEST exam, CSET Multiple subject Plus Writing Skills, Examination, or another state approved basic skills exam.

- Students enrolled in this program (Elementary or Secondary) must provide one of the following verifications prior to the completion of 12 semester credits in the program:
  - The candidate provides evidence of having passed the appropriate subject matter examination(s).
  - The candidate provides evidence of having attempted the appropriate subject matter examination(s).
  - The candidate provides evidence of registration for the next scheduled examination.
  - The candidate provides evidence of having completed a Commission approved subject matter preparation program.
Courses Waived

University of Phoenix, 2014-2015

• The candidate provides evidence of continuous progress toward meeting the subject matter requirement.
• TB test results (District specific)

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-E

• Completion of a minimum of 43 credits.
• A minimum grade point average (GPA) of 3.0.
• Students must pass all four Teacher Performance Assessments (TPA).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience. California students must pass the following courses: TPA 001 and TPA 002 prior to beginning their student teaching experience.

Candidates enrolled in MAED/TED-E and S must receive passing scores on the following assessments: TPA 1 Subject-specific Pedagogy and TPA 2 Designing Instruction prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.

Transfer Requirements for the MAED/TED-E

Transfer of non-California specific coursework

California MAED/TED programs will accept a maximum of 10 credits of non-California (CA) coursework as identified in the list below. COM 516 is not included in the 10 credits and does not need to be repeated.

The following non-California (CA) courses can be transferred into the California specific program:
• MTE 501 (2 credits)
• MTE 505 (3 credits) or MTE 506 (2 credits)
• MTE 508 (3 credits) or MTE 509 (2 credits)

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: ELM 590, ELM 595

Transfer Requirements for the MAED/TED-E

Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 590, ELM 595, MTE 507CA, MTE 518CA, MTE 522CA, MTE 533CA, RDG 537CA, SPE 514CA.

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Program | Courses Waived
--- | ---
MAED/TED-E | MTE 501, MTE 501CA, MTE 506, MTE 506CA, MTE 518, MTE 518CA
MAED/TED-S | MTE 501, MTE 506, MTE 518, SEC 508CA
MAED/SPE | SPE 578

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels
Candidates must take Student Teaching Part A & B concurrently. Student Teaching for the MAED/TED-E

Unapproved self-terminations of student teaching will result in:

Student teaching can only be repeated one time. Candidates enrolled in the MAED/TED program must student teach. Candidates must work with their campus to arrange field experience.

Out of state Student Teaching

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Institutional Recommendation for the MAED/TED-E

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Candidates must pass their state-mandated professional knowledge exam.

Candidates in this program must pass the RICA exam.

Candidates completing the California approved MAED/TED-E program must upload verification of current CPR certification prior to being recommended for their credential.

Candidates must provide verification of U.S. Citizenship coursework (with a grade of "C" or better), or exam as required by the state certification agency.

California Teaching Performance Assessment Policy

Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy (course and assessment) and TPA 002: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.

Candidates may attempt the Teaching Performance Assessment 1: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction a total of three times each. Candidates are required to retake TPA 001 or TPA 002 courses if they have failed the corresponding assessment two times. This retake must be completed prior to the third attempt.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can "student teach" or "validate" in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and pass CalTPA tasks 3 and 4.
- California students must pass the Teacher Performance Assessment 3 and 4 during student teaching. Students may attempt the Teacher Performance Assessment 3 and 4 a maximum of two (2) times.
- Candidates enrolled in this program must complete placements in two elementary grade levels. Placements must occur in two of the following grade levels: K-2, 3-5, or 6. One placement is for seven (7) weeks and the other placement is for eight (8) weeks. These must be self-contained classroom settings in which the candidates teach 6 of the 7 multiple subject areas to the same group of students.

From ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience. Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.

Candidates may attempt the Teaching Performance Assessment 1: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction a total of three times each. Candidates are required to retake TPA 001 or TPA 002 courses if they have failed the corresponding assessment two times. This retake must be completed prior to the third attempt.

California Teaching Performance Assessment Policy

Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy (course and assessment) and TPA 002: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.
• Teaching Performance Assessment 3: Assessing Learning and Teaching Performance Assessment 4: Culminating Teaching Experience are completed during the student teaching experience. These assessments can only be attempted two times each.
• Candidates must earn a score of 3 or 4 on each Teaching Performance Assessment to be considered passing. Scores of 1 or 2 are not considered passing scores.
• Candidates who are unable to pass any assessment after the allotted number of attempts are permanently removed from the program.
  TPA 1 and TPA2 = 3 attempts
  TPA 3 and TPA4 = 2 attempts
• Students who transfer into MAED/TEDCA E or S and have documentation of passing TPA 1: Subject-specific Pedagogy and/or TPA 2: Designing Instruction while attending another university are not required to complete the corresponding preparation courses TPA 001 - Subject-specific Pedagogy and/or TPA 002 - Designing Instruction. Students should submit a course waiver request to apply the TPA 1 and/or TPA 2 assessments to the TPA 001 and/or TPA 002 courses at University of Phoenix.

California Intern Credential
Candidates in California may qualify for an intern credential in California while enrolled in the MAED/TED program. The California Commission has identified specific requirements for intern qualification.
• Candidates who qualify as an elementary or secondary intern must meet the requirements noted below and sign an intern checklist.
• Candidates who are seeking an Internship must also be advised of the Early Completion Option.
• Candidates must provide verification of each of the following requirements:
  • Passing score on appropriate CSET for intern placement
  • Passing score on CBEST, CSET Multiple subject Plus Writing Skills, Examination, or another state approved basic skills exam.
  • Completion of a Bachelors degree from a regionally accredited institution
  • Letter of Intent to Hire
  • Completion of 30 hours Field Experience with diverse students
  • Certificate of Clearance
  • Continuous enrollment in the University of Phoenix MAED/TED-E or S (Elementary or Secondary Education teacher preparation degree program)
  • US Constitution (units or exam)
  • Negative TB results or negative chest xray
• Completion of the following coursework: Multiple Subject: MTE 506CA; MTE 518CA; ELL 500; SPE 514CA; RDG 537CA; MTE 522CA Single Subject: MTE 506CA; SEC 508CA; ELL 500; SPE 514CA; RDG 542CA; MTE 523CA
• If an intern candidate is removed from the university intern program, the university must notify the California Commission on Teacher Credentialing so the intern certificate can be deactivated by the Commission. If the candidate re-enters the program, the Commission must be notified in order to reactivate the intern credential.
• Candidates who had been issued an Internship from another university must provide a letter of academic good standing from their previous university prior to being accepted in the Internship Program.

California Early Completion Option
California residents may qualify, per state Commission requirements, for the early completion option. This allows candidates to complete only the supervised student teaching component and teaching performance assessment.
• Candidates who qualify for the early completion option must take TPA 001 and TPA 002, Student Teaching Seminars A & B and successfully complete the Teaching Performance Assessments 1, 2, 3 and 4.
• Candidates do not waive course work in MAED/TED and are not earning an MAED/TED degree.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
• Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
• Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E
MTE 507CA .......................................................... 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 .......................................................... 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 .......................................................... 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends
and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518CA .................................................................................... 3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522CA .................................................................................... 3 credits
Maintenance of an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and recordkeeping. The course focuses on helping teacher candidates develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .................................................................................... 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .................................................................................... 3 credits
Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537CA .................................................................................... 4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the design and delivery of a comprehensive reading/language arts program of systematic instruction in reading, writing, listening, and speaking in multiple subject classrooms. Emphasis is placed on instructional planning, design, delivery and assessment as well as universal access and differentiated instruction. Candidates use this knowledge to prepare an integrated unit of instruction. Guided field experience, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

ELL 500 .................................................................................... 3 credits
Instructional Methods for English Language Learners (ELLs)
This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K–12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide ELLs with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514CA .................................................................................... 2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 531 .................................................................................... 2 credits
Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533CA .................................................................................... 4 credits
Curriculum Constructs & Assessment: Science and Mathematics
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 .................................................................................... 2 credits
Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 538 .................................................................................... 2 credits
Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing K-8 students in the area of physical education and health based on scope, sequence, and state and national standards. This course will include framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course will also include framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas will be explored.
designing and implementing assessments in preparation for the CalTPA Task Three: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the Teaching Performance Expectations.

ELM 595.................................................................4 credits

Elementary Student Teaching Part B

This course will focus on the elements of the CalTPA Task Four: Culuminating Teaching Experience Task. The course explores the following topics: school culture and diversity, pedagogical assignments and tasks, self-reflection, and preparation to serve as a beginning teacher in an induction program. It also provides practical guidance in seeking a teaching position. This course will serve as a forum for open discussion and problem solving based on student teaching classroom experiences and their ability to use and apply the full-range of Teaching Performance Expectations.

TPA 001.................................................................1 credit

Subject Specific Pedagogy

This course addresses California’s Teaching Performance Assessment: Principles of Content-Specific and Developmentally Appropriate Pedagogy. Students will review the elements of this assessment and will demonstrate their knowledge of principles of content-specific pedagogy and developmentally appropriate pedagogy. Through this assessment process, students will learn the importance of their performance with K-12 students in mastering the knowledge, skills and abilities required of a beginning teacher, as exemplified in the Teacher Performance Expectations.

TPA 002.................................................................1 credit

Designing Instruction

This course addresses the second task of California’s Teaching Performance Assessment: Designing Instruction, Connecting Instructional Planning to Student Characteristics for Academic Learning. Students will review the elements of the Designing Instruction Teaching Performance Assessment and will demonstrate their ability to learn important details about a classroom of students, an English learner, and a student who presents a different instructional challenge. Students will focus on how instructional planning connects to student characteristics of a whole class and to two focus students who present a different instructional challenge.

Master of Arts in Education/Teacher Education Middle Level Generalist (Texas)

The following Master of Arts in Education/Teacher Education Middle Level Generalist (MAED/TEDMG) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Teacher Education Middle Level Generalist (MAED/TEDMG) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDMG program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on middle level student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedmg.

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the MAED/TEDMG
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDMG
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
  • Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDMG
• Completion of a minimum of 37 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours).
To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• Candidates must pass their state-mandated professional knowledge exam.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Teacher Education - Middle Level Generalist

Academic Progression Requirements for the MAED/TEDMG
Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:
• Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.
• Verification of the completion of 100 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDMG
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: MTE 586, MTE 587
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDMG
• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
Candidates must earn a “B” or better in Student Teaching.

Candidates must take Student Teaching Part A & B concurrently.

Student teaching is a full-time experience. Each campus will establish operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

Candidates who are unable to complete their student teaching, internship or practicum and can complete within their original deadline may reenter their original program version.

Candidates need to work directly with the Online campus to arrange field experience.

Field Experience for the MAED/TEDMG

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to enrollment in the student teaching courses.

Student Teaching for the MAED/TEDMG

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.

Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.

Candidates in the MAED/TED program may not student teach in special education.

MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

Institutional Recommendation for the MAED/TEDMG

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).

Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDMG

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version.

However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork...
required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TEDMG**

**MTE 507 ................................................................. 0 credits**

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516 .............................................................. 1 credit**

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501 ................................................................. 2 credits**

**The Art and Science of Teaching**

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**MTE 518 ................................................................. 3 credits**

**Models, Theories, and Instructional Strategies**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523 ................................................................. 3 credits**

**Maintaining an Effective Learning Climate**

This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506 ................................................................. 2 credits**

**Child and Adolescent Development**

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**RDG 532 ............................................................. 4 credits**

**Curriculum Constructs and Assessment: English Language Arts and Reading 4-8**

This course focuses on the knowledge, skills, texts, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study, vocabulary, comprehension, fluency, research and study skills, writing, viewing and presenting/representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differentiating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.

**MTE 553 ................................................................. 3 credits**

**Instruction and Assessment of English Language Learners**

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**SPE 514 ................................................................. 2 credits**

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 531 ................................................................. 2 credits**

**Curriculum Constructs & Assessment: History and Social Science**

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing methods on clear criteria, which are designed to yield accurate information on student progress.

**MTE 533 ................................................................. 4 credits**

**Curriculum Constructs & Assessment: Science and Mathematics**

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curriculum materials and resources, and
appropriate assessment strategies.

MTE 562 ...................................................................................3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 586 ...................................................................................4 credits

Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. This course will focus on the student teaching experience and the design and implementation of the Teacher Work Sample. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

MTE 587 ...................................................................................4 credits

Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education Middle Level Mathematics (Texas)

The following Master of Arts in Education/Teacher Education Middle Level Mathematics (MAED/TEDMM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Teacher Education Middle Level Mathematics (MAED/TEDMM) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDMM program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on middle level student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedmm.

The University reserves the right to modify the required course of Study.

Additional Admission Requirements for the MAED/TEDMM

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

730
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

• Students in the MAED/TEDMM-Middle Level Mathematics program must have preparation in the Mathematics field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.

• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

**Candidacy Status for the MAED/TEDMM**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidacy Status Level 1.

- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed: Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
  • Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TEDMM**

- Completion of a minimum of 38 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.

- Completion of e-portfolio.
- Candidates must pass their state-mandated professional knowledge exam.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

- The diploma awarded for this program will read as: Master of Arts in Education Teacher Education - Middle Level Mathematics

**Academic Progression Requirements for the MAED/TEDMM**

Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:

- Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.

- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)

- Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.

- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TEDMM**

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: MTE 586, MTE 587

- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/TEDMM**

- Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 523, MTE 533, MTE 564, MTE 586, MTE 587, RDG 532, SPE 514

Field Experience for the MAED/TEDMM
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TEDMM
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
• Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TEDMM
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDMM
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved. Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TEDMM

MTE 507 ................................................................................... 0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................................... 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................................... 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................................... 3 credits

Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ................................................................................... 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................................... 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

RDG 532 ................................................................................... 4 credits

Curriculum Constructs and Assessment: English Language Arts and Reading 4-8
This course focuses on the knowledge, skills, texts, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study, vocabulary, comprehension, fluency, research and study skills, writing, viewing and presenting/representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differentiating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.

MTE 553 ................................................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................................... 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 533 ................................................................................... 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 562 ................................................................................... 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 564 ................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse stu-
dent populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 586 ................................................. 4 credits

Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. This course will focus on the student teaching experience and the design and implementation of the Teacher Work Sample. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

MTE 587 .................................................. 4 credits

Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education Middle Level Science (Texas)

The following Master of Arts in Education/Teacher Education Middle Level Science (MAED/TEDMS) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

MTE 533 ........................................................................... 4 credits

The Master of Arts in Education/Teacher Education Middle Level Science (MAED/TEDMS) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDMS program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on middle level student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedms.

Additional Admission Requirements for the MAED/TEDMS

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

• Students in the MAED/TEDMS-Middle Level Science program must have preparation in the Science field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.

• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDMS

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
  • Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDMS

• Completion of a minimum of 38 credits.

• A minimum grade point average (GPA) of 3.0.

• Satisfactory completion and uploading of the Teacher Work Sample (TWS).

• Satisfactory completion of any required internship, student teaching, and/or practicum courses.

• Students must take courses within a sequence specified by course prerequisite requirements.

• Completion of Field Experience Observation Record (100 hours).
  To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.

• Completion of e-portfolio.

• Candidates must pass their state-mandated professional knowledge exam.

• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The diploma awarded for this program will read as: Master of Arts in Education Teacher Education - Middle Level Science

Academic Progression Requirements for the MAED/TEDMS

Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:

• Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.

• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)

• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.

• Verification of the completion of 100 hours of field experience Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDMS

• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: MTE 586, MTE 587

• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDMS

• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 523, MTE 533, MTE 569, MTE 586, MTE 587, RDG 532, SPE 514

Field Experience for the MAED/TEDMS
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TEDMS
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.
• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
• Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education Program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TEDMS
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDMS
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved. Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TEDMS**

**Orientation to Teacher Education**
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

MTE 516 ................................................................................... 1 credit

**Professional Communications**
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................................... 2 credits

**The Art and Science of Teaching**
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 ................................................................................... 3 credits

**Models, Theories, and Instructional Strategies**
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 ................................................................................... 3 credits

**Maintaining an Effective Learning Climate**
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................................... 2 credits

**Child and Adolescent Development**
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

RDG 532 ................................................................................... 4 credits

**Curriculum Constructs and Assessment: English Language Arts and Reading 4-8**
This course focuses on the knowledge, skills, texts, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study, vocabulary, comprehension, fluency, research and study skills, writing, viewing and presenting/representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differentiating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.

MTE 553 ................................................................................... 3 credits

**Instruction and Assessment of English Language Learners**
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................................... 2 credits

**Survey of Special Populations**
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 533 ................................................................................... 3 credits

**Curriculum Constructs & Assessment: Science and Mathematics**
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curriculum materials and resources, and appropriate assessment strategies.

MTE 562 ................................................................................... 3 credits

**Assessment and Evaluation**
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

MTE 569 ................................................................................... 3 credits

**Curriculum Constructs and Assessment: Secondary Science**
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective
The following Master of Arts in Education/Teacher Education Secondary Mathematics (MAED/TEDSM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Teacher Education Secondary Mathematics (MAED/TEDSM) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDSM program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedsm.

Additional Admission Requirements for the MAED/TEDSM

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
• Students in the MAED/TEDSM-Secondary Mathematics program must have preparation in the Mathematics field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.
• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDSM
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
  • Successful completion of the Oral Language Proficiency Assessment.

Degree Completion Requirements for the MAED/TEDSM
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.
• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• Candidates must pass their state-mandated professional knowledge exam.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Teacher Education - Secondary Mathematics

Academic Progression Requirements for the MAED/TEDSM
Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:
• Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.
• Verification of the completion of 100 hours of field experience
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDSM
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDSM
• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Field Experience for the MAED/TEDSM
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TEDSM
• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
• Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TEDSM
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TEDSM
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved. Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TEDSM**

**MTE 507** ................................................................. 0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516** ................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**MTE 501** ................................................................. 2 credits

**The Art and Science of Teaching**

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

**SEC 508** ................................................................. 3 credits

**Models, Theories and Strategies for Secondary Education**

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

**MTE 523** ................................................................. 3 credits

**Maintaining an Effective Learning Climate**

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

**MTE 506** ................................................................. 2 credits

**Child and Adolescent Development**

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

**RDG 542** ................................................................. 3 credits

**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

**MTE 553** ................................................................. 3 credits

**Instruction and Assessment of English Language Learners**

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

**SPE 514** ................................................................. 2 credits

**Survey of Special Populations**

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

**MTE 562** ................................................................. 3 credits

**Assessment and Evaluation**

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

**MTE 564** ................................................................. 3 credits

**Curriculum Constructs and Assessment: Secondary Math**

This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

**SEC 598** ................................................................. 4 credits

**Secondary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**SEC 599** ................................................................. 4 credits
Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Teacher Education Secondary Science (Texas)

The following Master of Arts in Education/Teacher Education Secondary Science MAED/TEDSS program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Teacher Education Secondary Science (MAED/TEDSS) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TEDSS program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-tedss.

Additional Admission Requirements for the MAED/TEDSS
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- Students in the MAED/TEDSS-Secondary Science program must have preparation in the Science field by verification of at least 24 semester hours. Of those 24 semester hours, 12 semester hours must be at the upper division level.
• Only students who reside within the state of Texas are eligible to enroll into the MAED Texas program.

Candidacy Status for the MAED/TEDSS
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
  • Successful completion of the Oral Language Proficiency Assessment.

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TEDSS
• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• Candidates must pass their state-mandated professional knowledge exam.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Teacher Education - Secondary Science

Academic Progression Requirements for the MAED/TEDSS
Candidates must provide verification of content knowledge mastery prior to beginning their student teaching experience. Candidates must provide:
• Verification of completion of six (6) or more clock hours of content test preparation which is not embedded in other curriculum. This may be in the form of CEU or for-credit preparation.
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Some schools/districts may require candidates to provide verification of immunization or TB test results. Candidates must comply with the requirements of the district if they wish to work at that location.

• Verification of the completion of 100 hours of field experience.

Field Experience for the MAED/TEDSS
Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TEDSS
• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TEDSS
• Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  • The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
  • The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
• The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Field Experience for the MAED/TEDSS
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of development levels from birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to
student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TEDSS**

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either a middle level generalist, middle level (content specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing, can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching**

- Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

**Institutional Recommendation for the MAED/TEDSS**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix Certificate Application in order to receive a certificate and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must provide verification of state and U.S. Constitution course work as required by the state certification agency.

**Additional Academic Program Re-entry Policy for the MAED/TEDSS**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the MAED/TEDSS**

- MTE 507 ....................................................................................0 credits
- **Orientation to Teacher Education**
  - This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
- COM 516 .....................................................................................1 credit
- **Professional Communications**
  - This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501  ........................................................................................................ 2 credits  
**The Art and Science of Teaching**  
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
SEC 508  ........................................................................................................ 3 credits  
**Models, Theories and Strategies for Secondary Education**  
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 523  ........................................................................................................ 3 credits  
**Maintaining an Effective Learning Climate**  
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506  ........................................................................................................ 2 credits  
**Child and Adolescent Development**  
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
RDG 542  ........................................................................................................ 3 credits  
**Curriculum Constructs & Assessment: Reading Methods for Secondary Settings**  
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.
MTE 553  ........................................................................................................ 3 credits  
**Instruction and Assessment of English Language Learners**  
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 514  ........................................................................................................ 2 credits  
**Survey of Special Populations**  
This course provides an overview of the categories of exceptional-
TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate or graduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All California residents (Online and Local) must enroll in this version. Candidates in the MAED/TED-E and MAED/TED-S programs must sign the California Teaching Performance Assessment (TPA) Code of Honor Guidelines.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to con-
tinue in their program with no interruption of scheduling. Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

- Demonstration of basic skills proficiency
  - Students who reside in states that require a basic skills test exam for teacher certification will be required to successfully pass the state exam (i.e. CBEST, CSET, Praxis I, etc.) using their state’s cut score.
  - Online students who reside in California and are enrolled in a California approved program (MAED/TED-E or MAED/TED-S) must successfully pass the CBEST exam, CSET Multiple subject Plus Writing Skills, Examination, or another state approved basic skills exam.

- Students enrolled in this program (Elementary or Secondary) must provide one of the following verifications prior to the completion of 12 semester credits in the program:
  - The candidate provides evidence of having passed the appropriate subject matter examination(s).
  - The candidate provides evidence of having attempted the appropriate subject matter examination(s).
  - The candidate provides evidence of registration for the next scheduled examination.
  - The candidate provides evidence of having completed a Commission approved subject matter preparation program.
  - The candidate provides evidence of continuous progress toward meeting the subject matter requirement.

- TB test results (District specific)

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/TED-S**

- Completion of a minimum of 37 credits.
- A minimum grade point average (GPA) of 3.0.
- Students must pass all four Teacher Performance Assessments (TPA).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

**Academic Progression Requirements for the MAED/TED-S**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience
- Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

California students must pass the following courses: TPA 001 and TPA 002 prior to beginning their student teaching experience. Candidates enrolled in MAED/TED-E and S must receive passing scores on the following assessments: TPA 1 Subject-specific Pedagogy and TPA 2 Designing Instruction prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.

**Transfer Requirements for the MAED/TED-S**

**Transfer of non-California specific coursework**

California MAED/TED programs will accept a maximum of 10 credits of non-California (CA) coursework as identified in the list below. COM 516 is not included in the 10 credits and does not need to be repeated.

- The following non-California (CA) courses can be transferred into the California specific program:
  - MTE 501 (2 credits)
  - MTE 505 (3 credits) or MTE 506 (2 credits)
  - MTE 508 (3 credits) or MTE 509 (2 credits)

**Minimum Grade Requirements for the MAED/TED-S**

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SEC 590, SEC 595
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Residency Requirements and Course Waivers for the MAED/TED-S**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507CA, SEC 508CA, MTE 523CA, RDG 542CA, SPE 514CA, MTE 528CA, MTE 566CA, MTE 567CA, MTE 569CA, MTE 551CA, MTE 541CA, MTE 564CA, SEC 590, SEC 595. Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-S**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-S**

Students teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g., 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and pass CalTPA tasks 3 and 4.
- California students must pass the Teacher Performance Assessment 3 and 4 during student teaching. Students may attempt the Teacher Performance Assessment 3 and 4 a maximum of two (2) times.
- Candidates enrolled in this program must complete placements in two elementary grade levels. Placements must occur in two of the following grade levels: K-2, 3-5, or 6. One placement is for seven (7) weeks and the other placement is for eight (8) weeks. These must be self-contained classroom settings in which the candidates teach 6 of the 7 multiple subject areas to the same group of students.
- Candidates enrolled in this program must complete a full-time student teaching experience (minimum 15 weeks) in which they teach two content areas and/or two grade-levels within their discipline. Candidates must student teach in the disciplines covered by their subject matter competency exams.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching**

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Institutional Recommendation for the MAED/TED-S**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates in this program must pass the RICA exam.
• Candidates completing the California approved MAED/TED-E or S program must provide verification of current CPR certification prior to being recommended for their credential.
• Candidates must provide verification of U.S. Constitution coursework (with a grade of "C" or better), or exam as required by the state certification agency.

California Teaching Performance Assessment Policy
• Candidates must receive passing scores on TPA 001: Subject-Specific Pedagogy (course and assessment) and TPA 002: Designing Instruction (course and assessment) prior to beginning their student teaching experience. Verification of scores is maintained by the campus Credential Analyst.
• Candidates may attempt the Teaching Performance Assessment 1: Subject-Specific Pedagogy and Teaching Performance Assessment 2: Designing Instruction a total of three times each. Candidates are required to retake TPA 001 or TPA 002 courses if they have failed the corresponding assessment two times. This retake must be completed prior to the third attempt.
• Teaching Performance Assessment 3: Assessing Learning and Teaching Performance Assessment 4: Culminating Teaching Experience are completed during the student teaching experience. These assessments can only be attempted two times each.
• Candidates must earn a score of 3 or 4 on each Teaching Performance Assessment to be considered passing. Scores of 1 or 2 are not considered passing scores.
• Candidates who are unable to pass any assessment after the allotted number of attempts are permanently removed from the program.
  TPA 1 and TPA2 = 3 attempts
  TPA 3 and TPA4 = 2 attempts
• Students who transfer into MAED/TEDCA E or S and have documentation of passing TPA 1: Subject-specific Pedagogy and/or TPA 2: Designing Instruction while attending another university are not required to complete the corresponding preparation courses TPA 001 - Subject-specific Pedagogy and/or TPA 002 - Designing Instruction. Students should submit a course waiver request to apply the TPA 1 and/or TPA 2 assessments to the TPA 001 and/or TPA 002 courses at University of Phoenix.

California Intern Credential
Candidates in California may qualify for an intern credential in California while enrolled in the MAED/TED program. The California Commission has identified specific requirements for intern qualification.
• Candidates who qualify as an elementary or secondary intern must meet the requirements noted below and sign an intern checklist.
• Candidates who are seeking an Internship must also be advised of the Early Completion Option.
• Candidates must provide verification of each of the following requirements:
  • Passing score on CBEST, CSET Multiple subject Plus Writing Skills, Examination, or another state approved basic skills exam.
  • Passing score on appropriate CSET for intern placement
  • Completion of a Bachelors degree from a regionally accredited institution
  • Letter of Intent to Hire
  • Completion of 30 hours Field Experience with diverse students
  • Certificate of Clearance
  • Continuous enrollment in the University of Phoenix MAED/TED-E or S (Elementary or Secondary Education teacher preparation degree program)
  • US Constitution (units or exam)
  • Negative TB results or negative chest xray
  • Completion of the following coursework: Multiple Subject: MTE 506CA; MTE 518CA; ELL 500; SPE 514CA; RDG 537CA; MTE 522CA Single Subject: MTE 506CA; SEC 508CA; ELL 500; SPE 514CA; RDG 542CA; MTE 523CA
• If an intern candidate is removed from the university intern program, the university must notify the California Commission on Teacher Credentialing so the intern certificate can be deactivated by the Commission. If the candidate re-enters the program, the Commission must be notified in order to reactivate the intern credential.
• Candidates who had been issued an Internship from another university must provide a letter of academic good standing from their previous university prior to being accepted in the Internship Program.

California Early Completion Option
California residents may qualify, per state Commission requirements, for the early completion option. This allows candidates to complete only the supervised student teaching component and teaching performance assessment.
Candidates who qualify for the early completion option must take TPA 001 and TPA 002, Student Teaching Seminars A & B and successfully complete the Teaching Performance Assessments 1, 2, 3 and 4.
Candidates do not waive course work in MAED/TED and are not earning an MAED/TED degree.

Additional Academic Program Re-entry Policy for the MAED/TED-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry
credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

MTE 507CA ................................................................. 0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................. 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508CA ............................................................... 3 credits

Models, Theories, and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523CA ............................................................... 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 ................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542CA ............................................................. 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the design and delivery of content-based literacy strategies (reading, writing, listening and speaking) in single subject classrooms. Emphasis is placed on instructional planning, design, and delivery; assessment; universal access and differentiations. The course examines the roles of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

ELL 500 ................................................................. 3 credits

Instructional Methods for English Language Learners
This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multicultural curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K–12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide ELLs with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514CA ............................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 528CA ............................................................. 3 credits

Curriculum Constructs and Assessment: Visual Arts
This course explores the theory, application, and strategies of teaching visual art in middle and secondary school. Participants identify the educational needs of students by exploring current instructional theory, national and state standards, assessment practices, aesthetic valuing, artistic perception, and historical and cultural origins that impact art. The course also helps prospective educators develop skills in adapting delivery methods and behavior management plans for individual students and diverse populations. The course will also emphasize classroom management skills and use of technology as they relate to visual art instruction.

MTE 564CA ............................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse stu-
dent populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566CA ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary English/Language Arts
This course explores the application of basic instructional methods to the content area of English/languag arts in middle school and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567CA ................................................................. 3 credits

Curriculum Constructs & Assessment: Secondary History/ Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569CA ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 551CA ................................................................. 3 credits

Curriculum Constructs and Assessment: Secondary Social Science
This course explores the secondary physical education classroom, professionalism, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, national and state standards including the developing motor skills through activities, developing levels of physical fitness, understanding principles of human movement, and developing and practicing social skills and the value of fair play in games and sports. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom and sport/field management skills and safety as they relate to physical education instruction.

MTE 541CA ................................................................. 2 credits

Language Development for Secondary Settings
This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner (ELL) student. The course focuses on language acquisition development within alternative language service programs and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with linguistically diverse students including the learning styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

SEC 590 ................................................................. 4 credits

Subject Specific Pedagogy
This course addresses task one of California’s Teaching Performance Assessment: Subject-Specific Pedagogy: Principles of Content-Specific and Developmentally Appropriate Pedagogy. This course will focus on the elements of the CalTPA Task Four: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the full-range of Teaching Performance Expectations.

TPA 001 ................................................................. 1 credit

Designing Instruction
This course addresses the second task of California’s Teaching Performance Assessment: Designing Instruction, Connecting Instruc tion Planning to Student Characteristics for Academic Learning. Students will review the elements of the Designing Instruction Teaching Performance Assessment and will demonstrate their ability to learn important details about a classroom of students, an English learner, and a student who presents a different instructional challenge. Students will focus on how instructional planning connects to student characteristics of a whole class and to two focus students who present a different instructional challenge.

Master of Arts in Education/Elementary Teacher
The Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-E program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on elementary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements and Course Selections

**Orientation, 0 total credits**

- MTE 507 Orientation to Teacher Education

**Introductory Course, 1 total credit**

- COM 516 Professional Communications

**Foundations of Education, 2 total credits**

- MTE 501 ~ The Art and Science of Teaching

**Educational Theories and Models, 6 total credits**

- MTE 518 Models, Theories, and Instructional Strategies
- MTE 522 Maintaining an Effective Learning Climate for Elementary Settings

**Human Development, 2 total credits**

- MTE 506 Child and Adolescent Development

**Assessment, 3 total credits**

- MTE 562 ~ Assessment and Evaluation

**Reading, 4 total credits**

- RDG 537 Curriculum Constructs & Assessment: Reading and Language Arts

**Special Populations, 8 total credits**

- SEI 500 Structured English Immersion
- SEI 503~ Advanced Structured English Immersion Methods
- SPE 514 Survey of Special Populations

**Elementary Methods and Assessment, 10 total credits**

- MTE 531 Elementary Student Teaching Part A
- MTE 532 Elementary Student Teaching Part B

The University reserves the right to modify the Required Course of Study.

**Additional Admission Requirements for the MAED/TED-E**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

- Students residing in Tennessee and/or attending University of Phoenix Online must have an undergraduate degree in a content area recognized by the Tennessee State Board of Education. Refer to the Tennessee State Board of Education website for a list of the recognized degree areas for teacher licensure at the secondary level. The student’s undergraduate degree area must be the same as the licensure area sought, student teaching placement, and required state subject area exam.

- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program without interruption.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance
Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Requirements for the MAED/TED-E
• Completion of a minimum of 44 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.

• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.
The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514
Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Institutional Recommendation for the MAED/TED-E
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Candidates must pass their state-mandated professional knowledge exam.

Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Field Experience for the MAED/TED-E
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
• Candidates in the MAED/TED program may not student teach in special education.

MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.

• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete their student teaching, internship or practicum within their original deadline may reenter their original program version. Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E
MTE 507 ...................................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .....................................................................................1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 ................................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
MTE 518 ........................................................................ 3 credits

Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522 ........................................................................ 3 credits

Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 ...................................................................... 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 ...................................................................... 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.
RDG 537 ..................................................................... 4 credits

Curriculum Constructs and Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
MTE 500 ...................................................................... 3 credits

Structured English Immersion
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.
SEI 503 .......................................................................... 3 credits

Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona's Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.
SPE 514 ...................................................................... 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
MTE 531 ...................................................................... 2 credits

Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.
MTE 533 ...................................................................... 4 credits

Curriculum Constructs & Assessment: Science and Mathematics
This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
MTE 534 ...................................................................... 2 credits
Curriculum Constructs & Assessment: Visual and Performing Arts
This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.
MTE 537 ................................................................. 2 credits

Curriculum Constructs & Assessment: Physical Education and Health
This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.
ELM 598 ..................................................................... 4 credits

Elementary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem-solving based on classroom experiences.
ELM 599 ..................................................................... 4 credits

Elementary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Secondary Teacher Education (Tennessee)

The following Master of Arts in Education (MAEd)/Secondary Teacher Education program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students residing in Tennessee and/or attending University of Phoenix Online must have an undergraduate degree in a content area recognized by the Tennessee State Board of Education. Refer to the Tennessee State Board of Education web site for a list of the recognized degree areas for teacher licensure at the secondary level. The campus is responsible for verifying that the student’s undergraduate degree area is the same as the licensure area sought, student teaching placement, and required state subject area exam. The campus verification is not required to be on file at time of admission.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.

- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance
- Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Requirements for the MAED/TED-S
- Completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.

- Completion of Field Experience Observation Record (100 hours).
- To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.

- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

- The diploma awarded for this program will read as: Master of Arts in Education
- Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
- Verification of the completion of 100 hours of field experience.
- Student’s undergraduate degree area must be the same as the licensure area sought, student teaching placement, and required state subject area exam.
- Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S
- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
University of Phoenix, 2014-2015

- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the course being waived at the University of Phoenix and must be taken within five (5) years of current program enrollment agreement sign date. Course descriptions must be included in the course waiver form in order for the Office of Administration and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 518, MTE 523, MTE 559, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Program: MAED/TED-E & S MTE 501 MTE 506, MTE 518

Program | Courses Waived
--- | ---
MAED/TED-E & S | MTE 501 MTE 506, MTE 518
MAED/SPE | SPE 578

Institutional Recommendation for the MAED/TED-S
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Field Experience for the MAED/TED-S
Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S
Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.
Additional Academic Program Re-entry Policy for the MAED/TED-S

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum, in addition to the admissions paperwork required by the University of Phoenix Adult Learning, can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance they will need to complete an additional internship or practicum in order to reenter. Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. Students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S

MTE 507 .................................................................................... 0 credits
Orientation to Teacher Education

This course introduces teaching as both an art and a science. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 .................................................................................... 2 credits
The Art and Science of Teaching

This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

SEC 508 .................................................................................... 3 credits
Models, Theories and Strategies for Secondary Education

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 523 .................................................................................... 3 credits
Maintaining an Effective Learning Climate

This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .................................................................................... 2 credits
Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .................................................................................... 3 credits
Assessment and Evaluation

This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including teacher made and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 .................................................................................... 3 credits
Curriculum Constructs and Assessment: Secondary Settings

This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various institutional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th grade setting, is incorporated into the course requirements.

SEI 500 ..................................................................................... 3 credits
Structured English Immersion

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SPE 514 .................................................................................... 2 credits
Survey of Special Populations

This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 559 .................................................................................... 3 credits
Curriculum Constructs and Assessment: Secondary Methods

This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of
secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

SEI 503 .................................................................................. 3 credits

Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SEC 598 ............................................................................. 4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ............................................................................. 4 credits

Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Elementary Teacher Education (Utah)

The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) programs may be offered at these University of Phoenix locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Elementary Teacher Education

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Students enrolled at a Utah campus must provide verification of a ‘student teaching license' and submit a copy of the license prior to the student teaching placement
• Students enrolled at the Utah campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching
• Verification of the completion of 100 hours of field experience

Minimum Grade Requirements for the MAED/TED-E
A candidate must earn a grade of "B" (grades of "I" and "B-") are not accepted) or better in the following courses in order to student teach: ELM 598, ELM 599

Residency Requirements and Course Waivers for the MAED/TED-E
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTE 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/TED-E**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documented field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/TED-E**

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

**Out of state Student Teaching**

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Institutional Recommendation for the MAED/TED-E**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Additional Academic Program Re-entry Policy for the MAED/TED-E**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their
original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

MTE 518 ................................................................. 3 credits
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501 ................................................................. 2 credits
The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 506 ................................................................. 2 credits
Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 522 ................................................................. 3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 531 ................................................................. 2 credits
Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessment of English Language Learners (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

MTE 533 ................................................................. 3 credits
Instruction and Assessment of English Language Learners
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 553 ................................................................. 3 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 562 ................................................................. 3 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SPE 514 ................................................................. 2 credits
Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 ................................................................. 2 credits
Curriculum Constructs & Assessment: History and Social Science
This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative
assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................. 4 credits
**Curriculum Constructs & Assessment: Science and Mathematics**

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ................................................................. 2 credits

**Curriculum Constructs & Assessment: Visual and Performing Arts**

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ................................................................. 2 credits

**Curriculum Constructs & Assessment: Physical Education and Health**

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

ELM 598................................................................. 4 credits

**Elementary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599................................................................. 4 credits

**Elementary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

**Master of Arts in Education/Secondary Teacher Education**

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-e.

The University reserves the right to modify the Required Course of Study.

Additional Admission Requirements for the MAED/TED-S
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Upon admission, student must have completed all but six (6) semester hours in the required secondary endorsement area. These additional six (6) credits must be completed prior to student teaching. Information regarding endorsement coursework requirements for secondary teacher licensure can be located on the Utah State Office of Education website.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/TED-S
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
  • Demonstration of basic skills proficiency
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/TED-S
• Completion of a minimum of 36 credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student’s meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

Academic Progression Requirements for the MAED/TED-S
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Students enrolled at a Utah campus must provide verification of a 'student teaching license' and submit a copy of the license prior to the student teaching placement.

• Students enrolled at the Utah campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.

• Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/TED-S

• A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598, SEC 599.

• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.

• If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/TED-S

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514.

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-S

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-S

• Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

• Student teaching can only be repeated one time.

• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

• Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.

• Candidates in the MAED/TED program may not student teach in special education.

• MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Out of state Student Teaching
Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Institutional Recommendation for the MAED/TED-S
• Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Additional Academic Program Re-entry Policy for the MAED/TED-S
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.
Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.
Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-S
MTE 507 ................................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
COM 516 ............................................................. 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
MTE 501 ............................................................. 2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
SEC 508 ............................................................. 3 credits

Models, Theories and Strategies for Secondary Education
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 523 ............................................................. 3 credits

Maintaining an Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 506 ............................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
MTE 562 ............................................................. 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct
RDG 542 .........................................................................................3 credits

This course explores the application of basic instructional methods and assessment techniques are modeled. A practical application project, based on work with a student in a 7th-12th-grade setting, is incorporated into the course requirements.

SPE 514 .........................................................................................2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 553 .........................................................................................3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

MTE 559 .........................................................................................3 credits

Curriculum Constructs and Assessment: Secondary Methods
This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

MTE 564 .........................................................................................3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 .........................................................................................3 credits

Curriculum Constructs & Assessment: Secondary English/ Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 .........................................................................................3 credits

Curriculum Constructs & Assessment: Secondary History/ Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 .........................................................................................3 credits

Curriculum Constructs and Assessment: Distance Education Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557 .........................................................................................3 credits

Language Development for Secondary Settings
This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504 .........................................................................................3 credits

Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the
The following Master of Arts in Education/Elementary Teacher Education (MAED/TED-E) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. Additional Admission Requirements for the MAED/TED-E
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or the equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
• Verification of the completion of 100 hours of field experience.

Degree Completion Requirements for the MAED/TED-E
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
• Demonstration of basic skills proficiency
• Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Academic Progression Requirements for the MAED/TED-E
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
• Immunization or TB test results (District specific)
• Passing scores on the designated state content knowledge exam (elementary content or secondary content area specific)
• Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
• Verification of the completion of 100 hours of field experience.

Minimum Grade Requirements for the MAED/TED-E
• A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses in order to student teach: ELM 598 and ELM 599.
• Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/TED-E
Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
Courses Waived

- The course must have been completed at a regionally accredited, TED-E
- Residency Requirements and Course Waivers for the MAED/TED-E
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/TED-E

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, ELM 598, ELM 599, MTE 507, MTÉ 518, MTE 522, MTE 533, RDG 537, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/TED-E

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/TED-E

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/TED program must student teach in the subject area in which a passing score was achieved on the content knowledge assessment exam. This is either an elementary (general), middle level (subject specific), or secondary (content specific) setting based on their program specialization.
- Candidates in the MAED/TED program may not student teach in special education.
- MAED/TED candidates, who are currently employed as the teacher of record in a classroom appropriate grade level/content for the certificate they are pursuing (e.g. 4th grade for elementary candidate or 9th grade English for secondary candidate), can ‘student teach’ or ‘validate’ in their current classroom. Students will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students must complete the Student Teaching courses and complete and upload the Teacher Work Sample.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Teacher Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.
• Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
• Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/TED-E
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/TED-E

MTE 507 ....................................................................................0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .....................................................................................1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 501I .........................................................................................2 credits

The Art and Science of Teaching
This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.

MTE 518 .....................................................................................3 credits
Models, Theories, and Instructional Strategies
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

MTE 522 .....................................................................................3 credits
Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 506 .....................................................................................2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 .....................................................................................3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 537 ...................................................................................4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 536 .....................................................................................3 credits
Children’s Literature
This course will examine the use of children’s literature in the elementary school classroom. Various genres will be studied, as well as the application of children’s literature to instruction and assessment in reading. Methods for incorporating the use of children’s literature in all content areas will also be examined.

MTE 529 .....................................................................................2 credits

Reading and Phonological Theory
This course expounds upon the basic premise that systematically integrated phonics instruction is a fundamental component of effective reading programs. Students will study the relevant research and applications that support principles of sequential phonics instruction and phonological awareness and review traditional and contemporary phonics approaches.

SPE 514 .....................................................................................2 credits
Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses
on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 533 ................................................................................... 3 credits

**Instruction and Assessment of English Language Learners**

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

MTE 531 ................................................................................... 2 credits

**Curriculum Constructs & Assessment: History and Social Science**

This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533 ................................................................................... 4 credits

**Curriculum Constructs & Assessment: Science and Mathematics**

This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.

MTE 534 ................................................................................... 2 credits

**Curriculum Constructs & Assessment: Visual and Performing Arts**

This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

MTE 537 ................................................................................... 2 credits

**Curriculum Constructs & Assessment: Physical Education and Health**

This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on scope, sequence, and state and national standards. This course will include framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course will also include framework-based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas will be explored.

ELM 598 ................................................................................... 4 credits

**Elementary Student Teaching Part A**

This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.

ELM 599 ................................................................................... 4 credits

**Elementary Student Teaching Part B**

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

**Master of Arts in Education/Secondary Teacher Education (Nevada)**

The following Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Secondary Teacher Education (MAED/TED-S) is a graduate degree program preparing candidates for teacher licensure. The guiding philosophy of the MAED/TED-S program is to provide the adult student, who already has a degree in a discipline other than education, with the skills and knowledge that will allow them to become a competent and effective educator. This program focuses on secondary student learning by improving the educator’s responsibility for that learning. Student teaching is an integral component of the Teacher Education Program. It provides students with a field-based experience at the appropriate grade and content level. Student teachers work with a cooperating teacher from a school site and with a University of Phoenix faculty advisor. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified classroom teacher. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s professional portfolio. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ted-s.

Additional Admission Requirements for the MAED/TED-S

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Upon admission, student must have completed all but six (6) semester hours in the required subject majors and/or minors. These additional six (6) credits must be completed prior to student teaching. Information regarding acceptable majors/minors and credit requirements for secondary teacher licensure can be located on the Nevada Department of Education website.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Candidacy Status for the MAED/TED-S

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Academic Progression Requirements for the MAED/TED-S

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam
- Students enrolled at the Nevada campus must complete any outstanding credits towards completion of their major/minor as indicated in the admissions requirements prior to student teaching.
- Verification of the completion of 100 hours of field experience. Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/TED-S**
- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses in order to student teach: SEC 598 and SEC 599.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Degree Completion Requirements for the MAED/TED-S**
- The completion of a minimum of 36 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
- To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Secondary Teacher Education

**Institutional Recommendation for the MAED/TED-S**
- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

**Residency Requirements and Course Waivers for the MAED/TED-S**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study from completion. Candidates must be approved by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, MTE 564, MTE 566, MTE 567, MTE 569, RDG 542, SEC 508, SEC 598, SEC 599, SPE 514

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 562 ................................................................................... 3 credits

Assessment and Evaluation
This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including standardized, formative and summative, traditional, and performance classroom assessments. Learners focus on using a variety of assessment tools and construct objective and performance assessments. Additionally, the purposes, the methods, and the reporting of evaluations are explored.

RDG 542 ................................................................................... 3 credits

Curriculum Constructs & Assessment: Reading Methods for Secondary Settings
This course focuses on the most current research, theory, and methods of teaching literacy, in particular, reading, writing, and technological literacy, in the content areas at the secondary level. Various instructional and assessment techniques are modeled. A practical application project, based on work with a student in a 7th- 12th-grade setting, is incorporated into the course requirements.

MTE 553 .................................................................................. 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implemetation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 514 .................................................................................. 2 credits

Survey of Special Populations
This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.

MTE 564 ................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Math
This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.

MTE 566 ................................................................................... 3 credits

Curriculum Constructs & Assessment: Secondary English/ Language Arts
This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 567 ................................................................................... 3 credits

Curriculum Constructs & Assessment: Secondary History/ Social Science
This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

MTE 569 ................................................................................... 3 credits

Curriculum Constructs and Assessment: Secondary Science
This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 556 ................................................................................... 3 credits

Curriculum Constructs & Assessment: Distance Education Methods for Secondary Schools
This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.

MTE 557 ................................................................................... 3 credits

Language Development for Secondary Settings
This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically
diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.

MAT 504 ................................................................. 3 credits

Adolescent Psychology
This course provides an overview of adolescent development, including the biological, cognitive, and social changes during the period between childhood and adulthood. The psychosocial developmental period is explored, and current trends and methods of teaching and learning in a middle school are examined and practiced.

MAT 538 ........................................................................ 3 credits

Middle School Foundations and Philosophy
This course examines middle level education. It evaluates the structure of middle schools and their characteristics, including curriculum, instruction, and learning in middle level education. It also addresses issues such as managing the middle level environment. Students in this course will demonstrate knowledge through application, analysis, and observation of middle level environments.

CMP 521 ........................................................................ 3 credits

Using Computers in Education
This course will examine how emerging technology can affect the classroom teacher, school administrator, school board member, students, and parents. Students will explore how technology has impacted curriculum, instructional design, and educational standards. Equity issues and the consequences to students who lack technological skills and knowledge will be the focal point of discussion. Students will get hands-on, interactive experience using a variety of media and technologies to prepare teaching materials, develop curriculum, and deliver instruction.

SEC 598 ........................................................................ 4 credits

Secondary Student Teaching Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SEC 599 ........................................................................ 4 credits

Secondary Student Teaching Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Masters of Arts in Education/Special Education (Hawaii)

The following Masters of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states.

Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the MAED/SPE**

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Candidacy Status for the MAED/SPE**

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/SPE**

- A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).

To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.

- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education

Special Education

**Academic Progression Requirements for the MAED/SPE**

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

**Minimum Grade Requirements for the MAED/SPE**

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the MAED/SPE**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
• Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
• Candidates must pass their state-mandated professional knowledge exam.
• Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
• Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 7 years.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited, comparable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following courses in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

• Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
• Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
• Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
• Student teaching can only be repeated one time.
• Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
• Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
• Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
• Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
• Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Online campus. Candidates must contact the Online campus for a list of participating states and procedures for
student teaching placement

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Candidates attending the Online campus who live in Hawaii, must transfer to the Hawaii ground campus for their student teaching experience and student teaching seminars. These courses will allow students to complete their MAED/SPE program and earn a Hawaii credential.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

MTE 507 .................................................................................... 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .................................................................................... 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 .................................................................................... 3 credits

Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 .................................................................................... 3 credits

Models, Theories and Instructional Strategies for SPE

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 .................................................................................... 3 credits

Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 .................................................................................... 3 credits

Inclusion Strategies of the Special Educator

This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 .................................................................................... 3 credits

Special Education Assessment and Interpretation

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 .................................................................................... 4 credits

Curriculum Const & Assmt: Reading and Lang Arts for SPE

This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

MTE 553 .................................................................................... 3 credits

Instruction and Assessment of English Language Learners

This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaning-
fully with educational materials as they learn subject matter and acquire English.

SPE 574 .....................................................................................3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.

SPE 559 .....................................................................................3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 .....................................................................................3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 .....................................................................................3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities including students with traumatic brain injury, other health impairments, and orthopedic impairments. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within schools. Various program models available through public, private, and hospital settings will be reviewed. Supports, accommodations, and curricular modifications will be explored. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 545 .....................................................................................3 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 599 .....................................................................................4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 .....................................................................................4 credits

Master of Arts in Education/Special Education (New Mexico)

The following Master of Arts in Education/Special Education (MAED/ SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
• Level 1 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 1 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  • Students must take and pass a New Mexico assessment of teacher basic skills.
  • Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE
• A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion and uploading of the Teacher Work Sample (TWS).
• Satisfactory completion of any required internship, student teaching, and/or practicum courses.
• Students must take courses within a sequence specified by course prerequisite requirements.
• Completion of Field Experience Observation Record (100 hours). To ensure student's meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
• Completion of e-portfolio.
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience.
• Immunization or TB test results. (District specific)
• Students must take and pass the New Mexico content knowledge assessment in Special Education.
• Verification of the completion of 100 hours of field experience
Candiates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE
• A candidate must earn a grade of "B" (grades of "I" and "B-") are not accepted) or better in the following courses: SPE 594, SPE 595
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
• Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
Courses Waived

- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.
- Online students may submit a passing score on a comparable professional knowledge examination from another state or agency taken within the past 7 years.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived:

- COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 573, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
• Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

MTE 507 ..................................................................................... 0 credits

Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 .................................................................................... 1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ..................................................................................... 3 credits

Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ..................................................................................... 3 credits

Models, Theories and Instructional Strategies for SPE
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 ..................................................................................... 3 credits

Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 ..................................................................................... 3 credits

Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 ..................................................................................... 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

RDG 570 .................................................................................. 4 credits

Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

RDG 535 ..................................................................................... 3 credits

Diagnosis & Remediation of Reading Difficulties
This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.

SPE 574 ..................................................................................... 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating...
with families of children with intellectual and developmental disabili-
ties.

SPE 559 .................................................................3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are exam-
ined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 544 .................................................................3 credits

Characteristics of Emotional & Behavioral Disabilities
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 .................................................................3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities including students with traumatic brain injury, other health impairments, and orthopedic impairments. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within schools. Various program models available through public, private, and hospital settings will be reviewed. Supports, accommodations, and curricular modifications will be explored. The impact of incul-

SPE 594 .................................................................4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595 .................................................................4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Colorado)

The following Master of Arts in Education/Special Education (MAED/ SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.
- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- Completion of a minimum of 45 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:
- Immunization or TB test results (District specific)
- Verification of content knowledge mastery prior to student teaching (PLACE or PRAXIS)

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of "B" (grades of "T" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
Candidates must pass their state-mandated professional knowledge exam.

Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 500, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Colorado Students in the CERT/SPE program who have successfully completed all courses and wish to earn a master's degree will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 generalist special education setting that meets their state requirements for student teaching.

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since the candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 500. .......................................................................................... 3 credits

Scientifically Based Reading Instruction
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonic fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children's performance in reading and in the language arts are also emphasized.

MTH 506 .......................................................................................... 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

MTE 553 .......................................................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multietnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

SPE 574 .......................................................................................... 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.

Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.
Characteristics of Physical & Health Disabilities

This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities including students with traumatic brain injury, other health impairments, and orthopedic impairments. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within schools. Various program models available through public, private, and hospital settings will be reviewed. Supports, accommodations, and curricular modifications will be explored. The impact of inclusive education and self-contained placements on this population will be analyzed.

SPE 594 ....................................................................................4 credits

Special Education Student Teaching: Part A

This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

SPE 595 ....................................................................................4 credits

Special Education Student Teaching: Part B

This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Special Education (Utah)

The following Master of Arts in Education/Special Education (MAED/ SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 10 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Level 1 Candidate Status is completed upon admission to the Candidacy Status for the MAED/SPE. Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in I53 and the student's eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- A minimum of 41 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate's e-portfolio.
- Completion of e-portfolio.

- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Students enrolled at a Utah campus must provide verification of a 'student teaching license' and submit a copy of the license prior to the student teaching placement.
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of "B" (grades of "T" and "B-" are not accepted) or better in the following courses: SPE 594, SPE 595
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, SPE 546, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute or candidate for certification, college or university.

Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Student teaching can only be repeated one time.

Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.

Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.

Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

### Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

### Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

### Student Teaching for the MAED/SPE

- Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.
- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Course MTE 507 ...................................................................................0 credits
- Orientation to Teacher Education
  This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed. COM 516 ...........................................................................................................1 credit

792
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ................................................................. 3 credits

Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ................................................................. 3 credits

Models, Theories and Instructional Strategies for SPE
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 ................................................................. 3 credits

Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

MTE 506 ................................................................. 2 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

SPE 512 ................................................................. 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 535 ................................................................. 3 credits

Diagnosis & Remediation of Reading Difficulties
This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students’ contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.

MTH 506 ................................................................. 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.

SPE 559 ................................................................. 3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.

SPE 574 ................................................................. 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.

SPE 544 ................................................................. 3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 575 ................................................................. 3 credits

Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 594 ................................................................. 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching class-
Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this teaching position often have a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:
- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.
Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.
- Demonstration of basic skills proficiency
- Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- A minimum of 43 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours).
- To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE

Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam (cross-categorical [generalist] special education content area specific)
- Verification of the completion of 100 hours of field experience

Candidates will be required to have the minimum GPA for the program prior to entering the Student Teaching experience.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: SPE 594 and SPE 595.
- Candidates must earn a “B” or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a “B” or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, MTE 523, RDG 570, SPE 546, SPE 595.

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

### Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students’ electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

### Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical (generalist) special education student teaching setting.
- Students who are already teaching in an appropriate K-12 cross-categorical (generalist) special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical (generalist) special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

### Institutional Recommendation for the MAED/SPE

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of school law, state and U.S. Constitution coursework, as required by the state certification agency.

### Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

### Course Descriptions for the MAED/SPE

**MTE 507** ................................................................. 0 credits

**Orientation to Teacher Education**

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

**COM 516** ................................................................. 1 credit

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**SPE 513** ................................................................. 3 credits

**Orientation to the Exceptional Child**

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

**MTE 523** ................................................................. 3 credits
Maintaining and Effective Learning Climate
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 546 .......................................................... 3 credits

Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.
MTE 505 .......................................................... 3 credits

Child and Adolescent Development
This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.
SPE 512 .......................................................... 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.
RDG 570 .......................................................... 4 credits

Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
MTH 506 .......................................................... 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in elementary mathematics. Topics include an overview of mathematics content and process standards, developmentally appropriate instructional strategies, assessment, and classroom and materials management.
MTE 553 .......................................................... 3 credits

Instruction and Assessment of English Language Learners
This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
SPE 557 .......................................................... 3 credits

Collaboration with Families of Students with Disabilities
This course focuses on the interrelationships of varied services for students with disabilities. Emphasis is placed on meeting the academic and social-emotional needs of students with disabilities by working with parents, professionals, and community services to develop collaborative and productive professional relationships.
SPE 558 .......................................................... 3 credits

Transition Planning for Adolescents with Disabilities
This course focuses on the role of the special education teacher as he/she transitions adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Students will learn skills and concepts in working with students with special needs, parental involvement, and the community.
SPE 591 .......................................................... 3 credits

Characteristics of Exceptionalities
This course examines teaching and managing students with mild disabilities. Special emphasis is placed on learning disabilities, mental retardation, and emotional disabilities. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed in depth.
SPE 594 .......................................................... 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SPE 595 .......................................................... 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
Master of Arts in Education/Special Education

The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education (MAED) with a specialization in Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE

All applicants are expected to meet the following admissions requirements:

• Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution.

• Students using foreign credentials when enrolling in a program leading to initial teacher certification/licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.

• All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE

The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

• Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
• Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in IS3 and the student’s eXp file.

• Demonstration of basic skills proficiency

• Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

**Degree Completion Requirements for the MAED/SPE**

• Completion of a minimum of 46 credits. All but six (6) credits of the major course of study must be completed at the University to meet residency requirements.

• A minimum grade point average (GPA) of 3.0.

• Satisfactory completion and uploading of the Teacher Work Sample (TWS).

• Satisfactory completion of any required internship, student teaching, and/or practicum courses.

• Students must take courses within a sequence specified by course prerequisite requirements.

• Completion of Field Experience Observation Record (100 hours).

To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.

• Completion of e-portfolio.

• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level coursework.

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

• Arizona Full SEI Endorsement (SEI/500 and SEI/503)

• Arizona Provisional SEI Endorsement (SEI/500)

• Arizona Full SEI Endorsement (SEI/500 and SEI/503)

• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study.

Upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 578, SPE 594, SPE 595, SPE 584, MTH 575, SPE 576

Arizona residents may waive SEI 500 and/or SEI 503 with an Arizona Department of Education approved SEI course (institution of higher education or approved district workshop) OR verification of one of the following endorsements:

• Arizona Provisional SEI Endorsement (SEI/500)

• Arizona Full SEI Endorsement (SEI/500 and SEI/503)

• Arizona English as a Second Language Endorsement

• Arizona Bilingual Endorsement

Approved SEI courses/workshops can be found at: https://www.ade.az.gov/oelas/.
Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

**Field Experience for the MAED/SPE**

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

**Student Teaching for the MAED/SPE**

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.
- Candidates must earn a "B" or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a "B" or better will be required to repeat the seminar and student teaching.
- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.
- Student teaching can only be repeated one time.
- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.
- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.
- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.
- Candidates who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.
- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.
- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.
- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

**Arizona Teaching Intern Certificate Program**

The requirements for initial issuance of the teaching intern certificate are:

- A Bachelor's degree or higher from an accredited institution
- A passing score on one or more subject knowledge portions of the Arizona Teacher Proficiency Assessment that corresponds to the applicant's teaching assignment(s)
- Completion of the requirements for a Provisional Structured English Immersion endorsement as prescribed in R7-2-613(J)
- A valid fingerprint clearance card issued by the Arizona Department of Public Safety

**Additional Academic Program Re-entry Policy for the MAED/SPE**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.
Course Descriptions for the MAED/SPE

MTE 507 .............................................................. 0 credits
Orientation to Teacher Education
This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ............................................................ 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ............................................................. 3 credits
Orientation to the Exceptional Child
This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ............................................................. 3 credits
Models, Theories and Instructional Strategies for SPE
This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 584 ............................................................. 3 credits
Learning Disabilities and Language and Development Disorders
This course examines the characteristics of students with learning disabilities and language and development disorders. Emphasis is placed on classroom management, instructional strategies, assessment, and augmentative and alternative technologies. Attention is given to the referral process, and available program or service delivery options.

MTH 575 ............................................................. 3 credits
Mathematics Instruction for Special Education
This course focuses on the methodology and assessment strategies that enhance learning in mathematics for exceptional learners. Attention is given to an overview of mathematics content and process standards. Emphasis is placed on ranges of abilities and needs, modifications and accommodations, instructional strategies, and classroom management.

SPE 512 ............................................................. 3 credits
Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 ........................................................... 4 credits
Curriculum Const and Assmt: Reading and Lang Arts for SPE
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

SEI 500 ............................................................ 3 credits
Structured English Immersion
This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 ............................................................ 3 credits
Advanced Structured English Immersion Methods
This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 574 ............................................................. 3 credits
Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.

SPE 544 ............................................................. 3 credits
Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556 ............................................................. 3 credits
Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities including students with traumatic brain injury, other health impairments, and orthopedic impairments. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within schools. Various program models available through public, private,
The following Master of Arts in Education/Special Education (MAED/SPE) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Special Education is a graduate degree program preparing candidates for teacher licensure in the field of special education. Candidates for this program have already earned a bachelor’s degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming effective special education educators. The program’s curriculum includes orientation to the exceptional child, foundations and methodologies of mild disabilities, diagnosis and assessment of disabilities, structured English immersion, reading and language arts instruction, inclusion strategies, and collaboration and resource management for the special educator. Throughout the program, students are required to complete a minimum of 100 hours of verified field experiences. The focus of each observation will relate to specific course content. Documentation will be maintained in the student’s electronic portfolio. Students’ field experiences are designed to prepare them for student teaching. Student teaching is an integral component of the Special Education Program. Student teachers work with a cooperating teacher and with a University of Phoenix faculty advisor during a field-based experience in a cross-categorical special education setting. The student teaching experience is designed to emphasize the achievement of state standards leading to certification and to present individuals with growth opportunities that best prepare them to assume the duties of a certified teacher. The degree program has a research component as well. This component requires an Action Research Project. The project integrates the theoretical aspects of special education and the practical experience of the adult learner through the identification and exploration of a significant problem related to the student’s area of professional responsibilities and interest.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-spe.

Additional Admission Requirements for the MAED/SPE
All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or an equivalent undergraduate degree earned at a recognized foreign institution.
- Students using foreign credentials when enrolling in a program leading to initial teacher certification/ licensure must use a foreign credential evaluation service that is on both the approved University of Phoenix evaluation agency list and the state regulating board list of approved agencies, for the particular state in which the student is attending, to verify degree completion and equivalency to a United States undergraduate degree. Students attending the Online campus should abide by the regulations of the state in which they reside. In-house evaluations cannot be completed for programs leading to initial teacher certification.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

Candidacy Status for the MAED/SPE
The College of Education has two levels of review consisting of Level 1 Candidate Status and Level 2 Candidate Status. Applicants must meet requirements for both levels of candidacy status to continue in their program with no interruption of scheduling.

- Level 1 Candidate Status is completed upon admission to the University. Students who are admitted have met the requirements for Candidate Status Level 1.
- Level 2 Candidate Status is completed prior to the completion of 12 semester credits of the program. To meet the Candidate Status Level 2 requirements, the following items must be completed. Evidence that these requirements have been met must be entered in ISS and the student’s eXp file.
  - Demonstration of basic skills proficiency
  - Verification of fingerprint clearance

Students must be admitted and meet Level 1 Candidate Status prior to being reviewed for Level 2 Candidate Status.

Degree Completion Requirements for the MAED/SPE

- A minimum of 46 graduate credits in the Required Program Category Preferred Sequence.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion and uploading of the Teacher Work Sample (TWS).
- Satisfactory completion of any required internship, student teaching, and/or practicum courses.
- Students must take courses within a sequence specified by course prerequisite requirements.
- Completion of Field Experience Observation Record (100 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.

- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- The diploma awarded for this program will read as: Master of Arts in Education Special Education

Academic Progression Requirements for the MAED/SPE
Candidates must provide verification of the following prior to beginning their student teaching experience. Candidates must provide:

- Immunization or TB test results (District specific)
- Passing scores on the designated state content knowledge exam.
- Verification of the completion of 100 hours of field experience

In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.

Minimum Grade Requirements for the MAED/SPE

- A candidate must earn a grade of "B" (grades of "I" and "B-" are not accepted) or better in the following courses: SPE 594 and SPE 595.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete this program. Candidates who do not earn a "B" or better will be required to repeat the seminar(s) in which the candidate did not receive the required minimum grade and the related portion of student teaching. The Campus College chair will coordinate with the Cooperating/Mentor Teacher and Faculty Supervisor to design a remediation plan.
- Candidates must earn a "B" or better in Student Teaching Part A & B in order to complete the MAED/SPE program. Candidates who do not earn a "B" or better will be required to repeat the seminars and student teaching.
- If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the MAED/SPE

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).

- Upon completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

Residency Requirements and Course Waivers for the MAED/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.

The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.

The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516, MTE 507, RDG 570, SPE 546, SPE 559, SPE 575, SPE 578, SPE 594, SPE 595

Students who complete the Teach for America Summer Institute are eligible to waive the following course in the MAED/TED Programs; however, they may not exceed the maximum number of credits allowed to be waived in their program. Candidates must provide verification of completion in order to be eligible for these waivers.

Field Experience for the MAED/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 100 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the student’s electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty prior to student teaching. Candidates must work with their campus to arrange field experience.

Student Teaching for the MAED/SPE

Student teaching is a full-time experience. Each campus establishes operational policies related to placement and completion of student teaching. Candidates must follow the guidelines in place at their campus.

- Candidates must take Student Teaching Part A & B concurrently with the student teaching experience. If a candidate chooses to postpone student teaching, he/she must postpone their enrollment in the student teaching courses.

Candidates must earn a “B” or better in Student Teaching Seminar A in order to progress to Seminar B and the remainder of the student teaching experience. Candidates who do not earn a “B” or better will be required to repeat the seminar and student teaching.

- Student teachers who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of “F” by their faculty member.

- Student teaching can only be repeated one time.

- Unapproved self-terminations of student teaching will result in the candidate receiving a failing grade for the student teaching experience and the associated student teaching seminar. This experience counts as one of their two student teaching attempts.

- Candidates who do not successfully complete the second student teaching experience will be removed from the program and are not eligible for re-entry.

- Candidates enrolled in the MAED/SPE program must student teach in the appropriate cross-categorical special education student teaching setting.

- Students who are already teaching in an appropriate K-12 cross-categorical special education environment will be evaluated by a faculty supervisor in their classroom and will not have to seek additional placement for student teaching. Students in the MAED/SPE program must be currently teaching in a K-12 cross-categorical special education setting that meets their state requirements for student teaching.

- Students should complete student teaching within twelve (12) months from the completion date of their last required course in the program.

- Students must complete a minimum of 8 credit hours of student teaching, including the completion of a Teacher Work Sample project.

Candidates who are unable to complete their student teaching experience at the campus where they began are not guaranteed a placement. Candidates may be able to complete their student teaching through the University of Phoenix Online campus. A select number of states do not participate in the University of Phoenix Special Education program. Candidates must contact the Online campus for a list of participating states and procedures for student teaching placement.

- Candidates must enroll in the remaining Student Teaching Seminars through the Online campus while completing their student teaching experience.

- Candidates need to work directly with the Online campus to complete the requirements for verification of placement.

Additional Academic Program Re-entry Policy for the MAED/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching,
Orientation to the Exceptional Child

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the MAED/SPE

MTE 507 ........................................................................................................ 0 credits

Orientation to Teacher Education

This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program’s progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.

COM 516 ................................................................................................. 1 credit

Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

SPE 513 ................................................................. 3 credits

Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 578 ................................................................................................. 3 credits

Models, Theories and Instructional Strategies for SPE

This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SPE 546 ................................................................................................. 3 credits

Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 575 ................................................................................................. 3 credits

Inclusion Strategies of the Special Educator

This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored.

This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.

SPE 512 ................................................................................................. 3 credits

Special Education Assessment and Interpretation

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

RDG 570 ................................................................................................. 4 credits

Curriculum Const and Assmt: Reading and Lang Arts for SPE

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELLs), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 500................................................................................................. 3 credits

Structured English Immersion

This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELLs), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.

SEI 503 ................................................................................................. 3 credits

Advanced Structured English Immersion Methods

This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona’s Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.

SPE 574 ................................................................................................. 3 credits

Characteristics of Intellectual/Developmental Disabilities

This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.

SPE 559 ................................................................................................. 3 credits
Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.
SPE 544 ................................................................. 3 credits

Characteristics of Emotional & Behavioral Disorders
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.
SPE 556 ................................................................. 3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities including students with traumatic brain injury, other health impairments, and orthopedic impairments. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within schools. Various program models available through public, private, and hospital settings will be reviewed. Supports, accommodations, and curricular modifications will be explored. The impact of inclusive education and self-contained placements on this population will be analyzed.
SPE 594 ................................................................. 4 credits

Special Education Student Teaching: Part A
This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SPE 595 ................................................................. 4 credits

Special Education Student Teaching: Part B
This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

Master of Arts in Education/Educational Studies
The following Master of Arts in Education/Educational Studies (MAED/ES) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education/Educational Studies (MAED/ES) degree is a non-teaching degree designed to facilitate the development of professional knowledge, skills and understanding of the teaching and learning process. The program provides students with information across a variety of education topics with an emphasis in the field of education.

**Note: Students enrolled in this degree program are ineligible to receive Federal Student Financial Aid.**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Program Category Requirements for the MAED/ES
Students must select one course from each Elective category selection below to complete the 6 credit requirement:

**Elective One, 3 total credits**
- AET 505 ................................................................. 3 credits
- Foundations of Adult Education and Training
- AET 510 ................................................................. 3 credits
- Critical Issues and Trends in Adult Education and Training
- AET 545 ................................................................. 3 credits
- E-Learning Design Technologies
- AET 555 ................................................................. 3 credits
- Overview of the Community College

**Elective Two, 3 total credits**
- EDL 500 ................................................................. 3 credits
- Personal Leadership
- EDL 510 ................................................................. 3 credits
- Teacher Leadership in a Global Society
- EDL 531 ................................................................. 3 credits
- Mentoring and Coaching
- EDL 520 ................................................................. 3 credits
- Instructional Leadership
- The University reserves the right to modify the Program Requirements.

Additional Admission Requirements for the MAED/ES
Applicants are expected to meet all admissions requirements:
- Applicants enrolling in this program must meet all admission requirements from their University of Phoenix previous pre-licensure program.
- The University of Phoenix previous pre-licensure programs eligible for admission to the MAED/ES are the following: MAED/TED-E, MAED/TEDEE, MAED/TEDEM, MAED/TEDMS, MAED/TEDMG, MAED/TEDMM, MAED/TEDSM, MAED/TEDSS, MAED/TED-S, MAED/SPE, MAED/ECH
- Note: Some restrictions apply to the MAED/ECH program. Please contact your campus representative for more information.

- Applicants to this program must have completed all coursework from their University of Phoenix previous pre-licensure program with the exception of both Student Teaching courses.
- Students will be eligible for admission to the MAED/ES program provided that the Enrollment Agreement sign date for the previous pre-licensure program is no more than six and a half (6.5) years in the past. Applicants must be able to complete all requirements of the degree within 7 years of the Enrollment Agreement sign date of the previous pre-licensure program.
Degree Completion Requirements for the MAED/ES

- Completion of a minimum of 32 credits to earn a university degree.
- Completion of two (2) MAED/ES Elective courses in addition to all completed coursework from the Required Course of Study program, with the exception of student teaching.
- A minimum grade point average (GPA) of 3.0.
- MAED/ES graduates will not be permitted to return to complete student teaching and receive a degree in any previous pre-licensure program at the University.
- The diploma awarded for this program will read as: Master of Arts in Education

Educational Studies

Residency Requirement for the MAED/ES

Students must meet the established University residency requirement for degree conferral. The University requires that all six (6) elective credits must be completed in order to meet residency. Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

Course Descriptions for the MAED/ES

AET 505................................................................. 3 credits

Foundations of Adult Education and Training

This course focuses on the principles of adult learning and andragogical theory. It addresses the history of adult learning, the characteristics of adult learners, key adult learning theories, and learning processes and styles. Additionally, the course investigates factors that influence adult education and training environments such as motivation, critical thinking skills, and ethics.

AET 510................................................................. 3 credits

Critical Issues and Trends in Adult Education and Training

This course explores trends, issues, and innovative programs in adult education and training. It focuses on the demographics of adult learners and on the implications of diversity for instruction. Learners examine political, cultural, social, and ethical issues that impact adult education and training. The course also examines these issues within an historical context.

AET 545................................................................. 3 credits

E-Learning Design Technologies

This course provides adult learners the opportunity to design a Web-based e-learning tutorial. The focus is on the importance of planning, principles of good Web-page design, storyboarding, and elements of multimedia. Web-based design standards, as well as appropriate use of Web pages and multimedia, are analyzed. It reviews e-learning software, computer-mediated delivery platforms, and learning management systems.

AET 555................................................................. 3 credits

Overview of the Community College

This course provides an overview of the community college. It examines global, national, and local perspectives of the community college. The course also examines the history and development, mission and purpose, functions, governance and organization, and trends and issues of community colleges.

EDL 500................................................................. 3 credits

Personal Leadership

This course focuses on developing a personal philosophy of leadership. Students engage in self-assessment activities that reveal how individual values and beliefs directly influence personal leadership. Students examine their own organization and stakeholders who may play a role in their journey in school leadership. Aspects of effective communication are also addressed as students explore contemporary leadership theorists and popular beliefs behind organizations and school systems that will help build a foundation for personal growth.

EDL 510................................................................. 3 credits

Teacher Leadership in a Global Society

This course focuses on contemporary theories of school reform and effective teacher leadership in a global society. Performance indicators and dispositions as related to evaluation or decision making are explored. Candidates examine components of effective teacher leadership, including empowering others, building collaborative organizational cultures, and making informed decisions for strategic planning, while creating a vision of change. They also explore how effective leadership provides them with multiple opportunities to critically analyze and apply various leadership styles.

Course content reflects research-based frameworks on leadership and leadership processes that will assist candidates in becoming effective teacher leaders. Candidates participate in a theoretical and applied learning approach, which incorporates research and reflective writing activities, case studies, self-assessment, and collaborative team projects that are closely aligned with the National Board Professional Teaching Standards.

EDL 531................................................................. 3 credits

Mentoring and Coaching

This course provides an exploration into how mentoring and coaching improves teaching and learning. This course examines mentoring and coaching competencies, including ethical guidelines, creating collegial relationships, building learning communities, effective communication, problem-solving and conflict resolution, and facilitating learning and accountability. Candidates will be equipped with the knowledge and skills to integrate and apply these competencies in real life and instructional leadership situations.

EDL 520................................................................. 3 credits

Instructional Leadership

This course is designed to provide professional teachers an introduction to instructional leadership. Candidates utilize an instrument of self-assessment and explore opportunities for leadership with reference to theoretical and practical aspects of school improvement. Candidates create a leadership plan that outlines long-term and short-term goals for continuous development of their leadership skills. In addition, they evaluate instructional practices, determine the effectiveness of teaching within the school curriculum, and propose appropriate strategies to improve instructional performance as outlined in research and theory as "best practices."

Master of Arts in Education/Curriculum and Instruction

The following Master of Arts in Education/Curriculum and Instruction (MAED/CI) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the
Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Master of Arts in Education program with a specialization in Curriculum and Instruction is intended to afford P-12 educators the opportunity to enhance their curriculum, instruction, and leadership repertoire by expanding their knowledge of assessment, instructional strategies, integration of technology, professional development, data-driven decision making, and mentoring and coaching. Educators will develop teacher leadership skills by exploring the latest research, trends, and strategies. Graduates will be able to effectively collaborate with all stakeholders and serve their students, colleagues, and communities as ethical leaders committed to excellence.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/maed-ci.

Courses requiring prerequisites are identified by a ~ symbol following the course number. In most instances, students must complete Foundation courses prior to the Specialization.

**Additional Admission Requirements for the MAED/CI**

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.

**Degree Completion Requirements for the MAED/CI**

The completion of a minimum of 35 credits.
- A minimum grade point average (GPA) of 3.0.
- The diploma awarded for this program will read as: Master of Arts in Education Curriculum and Instruction

**Residency Requirements and Course Waivers for the MAED/CI**

The University requires that the majority of coursework in the Required Course of Study be completed through the University. Also known as the residency requirement, the University requires completion of a minimum of 29 graduate level credits at the University.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university, or foreign institution recognized/authorized by the country’s Ministry of Education.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Nationally recognized and/or industry accepted certifications may be used to waive certain courses in the Required Course of Study upon approval by the appropriate college or school that the courses reside under, and will not require Prior Learning Assessment. All waivers using certifications must be verified by an official transcript or completion documentation from the certifying organization.

The following courses in the Required Course of Study may not be waived: COM 516

Candidates who successfully complete either the MAED/TED-Elementary or MAED/TED-Secondary program may waive the following courses in the MAED/CI program upon enrolling in the
Master of Arts in Education/Curriculum and Instruction program.

Any resident in the state of California who can show verification of the completion of the BTSA (Beginning Teacher Support and Assessment Induction) requirement may waive the following 6 credits upon admission to the MAED/CI program: CUR 506, CUR 530

Verification of the following:
- Verification of Completion Form (41-Induction) - Multiple and Single Subject Only

**Course Descriptions for the MAED/CI**

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

CUR 505 ................................................................. 3 credits

**Social and Global Perspectives of Teacher Leadership**

Learners in this course have the opportunity to analyze the field of education from a social and global perspective. Learners investigate the implications of the globalization of knowledge on micro and macro educational systems. Multicultural implications, diversity, and the use of technology as a vehicle of pedagogy are explored. Emphasis is on building collaborative organizational communities and empowering teacher leaders to think strategically about school change.

CUR 506 ...................................................................... 3 credits

**Theories and Best Practices of Curriculum and Instruction**

This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.

CUR 515 ................................................................. 3 credits

**Critical Thinking and Innovative Skills**

Learners in this course explore the development and application of critical thinking skills for all academic content areas in elementary, middle school, and high school settings. Participants identify the educational needs of students by exploring current instructional theories, models, and strategies; and state, local, and national standards as they relate to developing critical thinking skills in classroom teaching. Prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

CUR 520 ...................................................................... 3 credits

**Advocating for Learning**

Learners examine dispositions and beliefs regarding teaching and learning for all students. This course includes discussions about supportive and engaging learning environments, along with collaboration with other professionals to develop strategies that promote student learning. Using assessment data, learners will differentiate instruction and employ appropriate strategies for students. Learners will explore advocacy through course materials, practical exercises and engaging group activities.

CUR 525 ...................................................................... 3 credits

**Ethical Issues in Education**

Learners examine the ethical framework and challenges of teachers and teacher leaders in today’s schools. The professional educational leader fosters ethical practices and engages in purposeful ethical decision-making. Learners will ethically respond to social and political issues in education through case studies, field experiences, and other readings and interactions. Ethical leadership and decision-making will be analyzed and discussed to determine how educational leaders will be able to provide support to teachers, students, and other constituents with the purpose of improving current educational practices.

CUR 530 ...................................................................... 3 credits

**Assessment and Evaluation Models**

In this course, learners use assessment data through a systematic process to make informed decisions and to evaluate classroom and school-wide learning outcomes. Emphasis is placed on the design, implementation, and analysis of formative assessments while other types of assessments are explored. Learners will use this assessment knowledge to design and analyze a comprehensive assessment plan in a K-12 setting.

CUR 535 ...................................................................... 4 credits

**Research for Improved Practice**

Learners examine the process of conducting their own classroom-based or school-based research. The course provides practical experience with action research components in the educational setting for everyday instruction. Learners will use research and data to enhance the instructional environment and to promote lifelong learning.

CUR 540 ...................................................................... 3 credits

**Methods of Coaching in the Instructional Setting**

This course provides an examination of how systemic processes, experiential learning, and coaching strategies positively affect teaching and learning outcomes. Learners examine the interchangeable competencies of coaching and mentoring including roles, fostering relationships, ethical guidelines, building learning communities, effective communication, self-reflective problem solving, conflict resolution, facilitating learning, and accountability.

Learners will be equipped with content knowledge, real life application opportunities, tools, and specific strategies that can be applied in both instructional leadership and coaching situations.

CUR 545 ...................................................................... 3 credits

**Using Technology for Teaching and Learning**

Learners evaluate technology use and technology integration for teaching and learning while considering the value of current technologies and tools as part of an interactive experience in a 21st cen-
tury classroom. Learners will review the considerations and responsibilities of using and maintaining technology in today’s schools, including safety, ethics, resources, and financial needs. Using the knowledge gained in this course, learners will determine how they will advocate and be change-agents for technology integration within their districts, schools, classrooms, and the community.

CUR 550....................................................................................3 credits

Engaging in Communities of Practice

Learning communities are a method for the organization and operation of schools that will best meet the academic needs of students. In this course, learners examine the components of developing and maintaining school-based communities of practice to improve student achievement and assist with school improvement planning. Learners will identify resources to help them initiate, plan, and maintain communities of practice.

CUR 555....................................................................................3 credits

Professional Learning for Continuous Improvement

Learners will examine the relationship of professional and personal learning to school, teacher, and student need. Learners will gain an array of effective ideas, strategies, plans, methods, and tools on designing and implementing professional development to promote the intellectual and self-reflective development of teachers, as they collaborate to raise student achievement. Topics include components of high-quality staff development and learning networks.
The School of Advanced Studies is home to the University's doctoral programs and represents a community of professionals who want to make a meaningful social contribution to their communities and influence change in their fields. Diverse in program offerings, the School supports advanced learning in business, management, education, health care administration, nursing, higher education administration, and psychology.

**Admission Requirements**

Most doctoral programs have additional admission requirements listed within the program specific information. All applicants to doctoral programs must meet the following admission requirements:

- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet one of the following exceptions in order to meet the English Language Proficiency Requirement:
  - achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.
  - achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.
  - achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.
  - achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.
  - successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.
  - achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:

- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.
- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.
- The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.
- The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.
- The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.
- The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.
- Applicants who reside in the United States must meet one of the following requirements:
  - Be a legal resident of the United States
  - Have been granted permanent residency
  - Have a valid visa that does not prohibit educational studies
  - Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  - Have been granted asylum or refugee status.
- Applicants who reside in Canada must meet one of the following requirements:
  - Be a legal resident of Canada
  - Be a landed immigrant
  - Have a valid visa that does not prohibit educational studies
  - A completed and signed graduate application and application fee
  - A signed current Hardware/Software agreement verifying Internet access and multimedia equipped computer.
  - A signed Research Library Access Agreement.
  - A signed Enrollment/Disclosure Agreement.
  - Completion of any state-specific required documents or forms.
  - Students who have been expelled from other institutions are not eligible for admission to University of Phoenix.
- Students who have been expelled from University of Phoenix are not eligible for readmission to University of Phoenix. No appeals will be accepted.

Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

- Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.
• Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University.

Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

• Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state who were born after December 31, 1956, be immunized for measles-mumps-rubella (MMR). Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR immunization requirement may be granted for the following reasons:

• A medical exemption may be granted to specific vaccines.
  • A U.S. licensed physician (M.D. or D.O.) must state in writing that giving a specific vaccine would endanger the student’s life or health, and specify the reason based on valid medical contraindications.
  • The physician must state the length of time during which the vaccine would endanger the student’s health or life.
  • The exemption certification must be signed by the physician on the physician’s printed stationery.
  • A religious exemption may be granted if the student signs a statement certifying that the student’s religious beliefs prohibit the practice of immunization.

If the State of Hawaii Director of Health determines that there is a danger of an outbreak from any of the diseases for which immunization is required, no exemption shall be recognized and inadequately immunized students shall be excluded from school until the Director has determined that the outbreak is over.

A copy of each exemption must be kept in the student’s health record at school.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii.

A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school.

Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

• The student was born before January 1, 1957 (applicable to MMR vaccine only).
• The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
• The student has documentation from a physician stating that it is medically inadvisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
• The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
• The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
• The student has submitted a statement that immunization is contrary to his/her religious beliefs.
• The student is enrolled exclusively in the Online Campus and does not congregate with other students on campus or at campus-sponsored events. If the student later decides to attend a class at a University of Phoenix local campus location in Connecticut, the student must meet the immunization requirements before he/she may begin attending classes at a local campus location.
• The student graduated from a public or nonpublic high school in the state of Connecticut in 1999 or later and was not exempt from the measles, rubella and on or after August 1, 2010, the mumps vaccination requirement pursuant to subdivision (2) or (3) of subsection (a) of section 10-204a.

Educational Specialist

The following Educational Specialist (Ed.S) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

University of Phoenix, 2014-2015
The Educational Specialist program (Ed.S) will prepare learners to become transformational leaders who will strategically manage and lead complex educational organizations. Graduates will be educational practitioners who demonstrate analytical, critical, and innovative thinking to improve the performance of educational institutions. The Educational Specialist program degree is consistent with the University’s mission to develop the knowledge and skills that will enable learners to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. The program is designed to emphasize leadership and to focus on a specialization in Curriculum and Instruction.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/eds.

**Ed.S Required Course of Study**

Courses requiring prerequisites are identified by a ~ symbol following the course number. All general academic policies of the University of Phoenix are applicable.

**COM 705** Communication Strategies ........................................................................ 1 credit

**CUR 712** Curriculum Theory .................................................................................. 3 credits

**EDD 721** Planning and Leading Change .................................................................. 3 credits

**EDD 722** The Legal Context of Education ................................................................. 3 credits

**EDD 723** Ethics and Values in Learning Organizations ................................................. 3 credits

**CUR 721** Curriculum Design .................................................................................. 3 credits

**CUR 722** Instructional Models ................................................................................. 3 credits

**EDD 731** The Economics of Education .................................................................. 3 credits

**EDD 733** Evaluation and Assessment Methods .......................................................... 3 credits

**CUR 731** Supervision of Curriculum and Instruction ................................................ 3 credits

**EDS 799** Educational Specialist Capstone ................................................................. 3 credits

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the Ed.S**

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university, an ABA accredited institution (if coursework was from a graduate level program) or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

- Current or a record of past employment in an education or related position is required for admission.

**Degree Requirements for the Ed.S**

Educational Specialist students must meet the following degree requirements:

- A minimum of 31 doctorate credits in the Required Program Category Preferred Sequence.

- A minimum grade point average (GPA) of 3.0.

- Completion of the graduation information packet.

- Students must satisfy all credits and non-credit bearing activities prior to commencement eligibility.

**Academic Progression Requirements for the Ed.S**

Educational Specialist students are subject to the following academic progression requirements:

- Students must earn a grade of “B” or better in COM 705 Communication Strategies. Students who earn less than a “B” will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

- Students who miss or must withdraw from a course may complete the course via directed study, if available. All maximum enrollment policies apply. This option will only be available three times (9 credits) and applies only to online courses. However, some courses may not be suitable or available for directed study, and all directed studies must have the approval of the Doctoral Program Chair.

- Any student who earns a course grade of “C+” or below must repeat that course. If a student who is on academic probation earns a “C+” or below, that student must repeat the course and earn a grade of “B-” or better. If a student who is on academic probation earns a “C+” or below, that student must repeat the course again and earn a grade of “B” or better.

- Any student who does not maintain a minimum GPA of 3.0 will be put on academic probation.

- Academic probation will last for four consecutive courses during which time students must (1) raise their GPA to a minimum of 3.0 and (2) earn at least a grade of “B” in each course.

- Students will be allowed to have only one incomplete grade on their records at a time. Students will have up to 5 weeks to complete a course once an incomplete has been issued.

- Students in the Doctor of Education in Educational Leadership (EdD) program, due to extenuating personal circumstances, may transfer their credits into the Educational Specialist program.

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
Residency Requirements for the Ed.S

Educational Specialist students must meet the following residency requirements:

- Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- Students may not waive any of the following courses: COM 705 and EDS 799

In order to waive a course in the EdS program, students must have completed a previous course that meets the following criteria:

- The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be a doctoral-level course. Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the Ed.S

COM 705 ....................................................................................1 credit

Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.
CUR 712 ...................................................................................3 credits

Curriculum Theory
This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorist and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.
EDD 721 ...................................................................................3 credits

Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counter-act resistance to change, and the politics of economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.
EDD 722 ...................................................................................3 credits

The Legal Context of Education
This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory systems, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case law and specific pieces of education legislation are reviewed.
EDD 723 ...................................................................................3 credits

Ethics and Values in Learning Organizations
The ethics and value-based decisions that learning organizations are faced with are explored in depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values education, codes of conduct, and codes of ethics are debated.
CUR 721 ...................................................................................3 credits

Curriculum Design
In this course, learners focus on the creation of systemic models of curriculum development, including consideration of schedule, structure, stakeholder involvement, and end products. Learners will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.
CUR 722 ...................................................................................3 credits

Instructional Models
This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs and staff development are of special focus.
EDD 731 ...................................................................................3 credits

The Economics of Education
The principles and theories of the economics of education are examined. The role that Federal, state, and local government play in the economics of education is explored in depth. Key topics include budget management, grants, financial aid, expenditures and revenues, and the rising cost of education. Economic policy analysis is a focus in this course.
EDD 733 ...................................................................................3 credits

Evaluation and Assessment Methods
This course explores the evaluation and assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Accreditation issues, outcomes-based assessment, institutional research, and staff and faculty evaluation are key topics. The influence of leadership style on evaluation and assessment methods also is examined.
CUR 731 ...................................................................................3 credits

Supervision of Curriculum and Instruction
This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.
EDS 799 ...................................................................................3 credits

Educational Specialist Capstone
The capstone course will require learners to integrate their program of study into an in-depth project that explores and inquires into a contemporary problem within the field of educational administration. The project will be based on library research and/or fieldwork and must demonstrate an approach to addressing the problem from a leadership perspective. Additionally, within this course learners will complete a reflective self-assessment of their learning throughout the program.
Doctor of Management in Organizational Leadership

The following Doctor of Management in Organizational Leadership (DM) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Doctor of Management in Organizational Leadership degree program, offered by University of Phoenix, provides learners who hold a professional Master’s degree a means of exploring their personal readiness to become leaders in their professions or current organizations. Learners gain a mastery of leadership literature and demonstrate their competence by applying what they learn to current organizational environments. They also:

- Recognize leadership as a process promoting action in service of self, organization, community, and the planet.
- Apply leadership models to promote global and social responsibility.
- Critically analyze the validity and value of research.
- Make original scholarly contributions by researching real-world problems and issues in organizational management.
- Critically examine the philosophical foundations of organizations and leadership.
- Identify personal leadership philosophies and philosophies of knowledge and their applications to organizations.
- Create learning organizations outside of contemporary paradigms utilizing optimal design theories.
- Create an environment that produces core competent, interculturally sophisticated leaders.
- Create an environment that nurtures effective cross-functional, continually enhanced human capital prepared to meet the demands of strategic organizational success.

The DM program creates a perfect opportunity for mid-career professionals to refresh and reinvigorate their commitment to the tasks required of organizational leaders. Learners will think deeply about the current state of organizations and their leadership; create imaginative, new models from what is learned; and contribute new knowledge to the profession and society.

The DM program has a 68-credit requirement that incorporates both residency and online modalities of instruction. The majority of the program will be delivered in a virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into the preparation of a final research study. Additionally, in the year three residency, learners will apply their knowledge to a comprehensive, collaborative case study. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DM degree is the successful completion and oral defense of a significant, substantial, and independently completed research study. The study provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and to reflect competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the learner’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing them.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dm.

Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the 'A' course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the 'B' course.

**Additional Admission Requirements for the DM**

All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A record of past employment in leadership of people or processes is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

**Academic Progression Requirements for the DM**

Students are subject to the following academic progression requirements:

- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners:
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
• An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
• An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
• A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
• A passing score on the statistics entrance assessment. The assessment may only be taken twice.
• Students may have only one incomplete grade on their records
• Students must earn a grade of “B” or better in COM 705

Academic Standing and Scholastic Disqualification for the DM
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  • The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, LDR 736, PHL 700R, RES 722A, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
  • The dissertation may not be waived.

Degree Requirements for the DM
Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Management and will not reflect the specialization. Specializations are reflected on the transcript only.

Course Descriptions for the DM
COM 705.................................................................................... 1 credit
Communication Strategies

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies and their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R ....................................................................................0 credits

Doctoral Program Orientation Seminar

SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A ................................................................................3 credits

Leadership Theory and Practice

This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

PHL 716 .....................................................................................3 credits

Knowledge of Theory and Practice

Upon completion of this course, learners will understand the purpose of inquiry and the wide spectrum of intellectual resources. Learners will clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge. The course provides an overview of the various theoretical frameworks for examining the nature of knowledge and cognition and the applications of knowledge as manifested in various fields of human endeavor. It will orient learners toward identifying their true goals in pursuing the doctoral program, as well as the methods by which they may achieve these goals.

PHL 717 .....................................................................................3 credits

Constructing Meaning

The postmodern world is an amalgam of our beliefs, physical sensory interpretations, psychological projections of our wants/needs/fantasies, a cultural interpretation of existence/meaning/purpose, a moral sense of right and wrong, a religious or spiritual interpretation of responsibility, and the sense of the relationship we have to each other. Learners explore the concept of postmodernism through the writings of some of the classic thinkers. Learners will also undertake an examination of the way they personally construct their world - what it means and what is meaningful at a personal level, with some insight into why that is the case for them. This information will be explored and learners will use this to inform their leadership behavior and explain their style.

ORG 716 ....................................................................................3 credits

Organizational Theory and Design

Upon completion of this course, learners will be prepared to analyze and select appropriate paradigms to guide organizational research. Additionally, learners will have the ability to apply organizational theories systematically to enrich existing models or develop new models to increase performance and effectiveness.

MGT 716 ....................................................................................3 credits

Management Philosophies

Upon completion of this course, learners will be prepared to employ a research-based approach to investigate the body of knowledge relating to management philosophies from their recorded origins to current day applications. Learners will analyze and evaluate the evolution of management theory within historical timeframes with incremental assessments of the success or failures to optimize resources to attain performance excellence in a customer-centered organization.

RES 711 .......................................................................................3 credits

Fundamental Principles of Sound Research

RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A .....................................................................................3 credits

Research Design

This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 .....................................................................................3 credits

Advanced Statistical Research Methods and Design

The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 .....................................................................................3 credits

Qualitative Methods and Design

This course is designed to provide students with an introduction to the design and development of qualitative research studies. Learners will develop a qualitative research design for their dissertation proposal. This course will also cover qualitative data collection and analysis techniques to aid in the design and development of qualitative research designs.

RES 722A .....................................................................................3 credits

The Dynamics of Group and Team Leadership

Upon completion of this course, learners will be prepared to use advanced leadership strategies for group communications, team building, and coaching skills to attain organizational objectives. Learners explore large group and smaller team dynamics and the ways in which the role of a leader is required to affect behavior. Emphasis is placed on the growing dependency on self-directed work teams in the workplace.

ORG 726 .....................................................................................3 credits

The Impact of Technology on Organizations

Upon completion of this course, learners will be prepared to evaluate the organizational relationship among technology, structure, and behavior. Additionally, learners will be prepared to balance the advantages and disadvantages of integrating technologies.
MGT 726 ................................................................. 3 credits
Emerging Managerial Practices
Upon completion of this course, learners will be prepared to implement emerging managerial practices designed to develop organizational agility and responsiveness. Additionally, they will be able to adapt best practices, implement high-performance work teams, and build advanced strategies for effective global communications. Emphasis is placed on how organizations are encouraged to develop and demonstrate creative, adaptive, and flexible business approaches.

ORG 727 ................................................................. 3 credits
Organizational Diagnosis and Intervention
Upon completion of this course, learners will be prepared to optimize organizational performance through the judicious implementation of performance interventions utilizing organization theory, organization design, and technology.

PHL 700R .......................................................... 3 credits
Creative and Critical Thinking
This course helps learners understand the purpose of inquiry and the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.

DOC 721R ......................................................... 2 credits
Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ......................................................... 3 credits
Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 722R ......................................................... 2 credits
Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ......................................................... 0 credit
Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

PHL 736 .......................................................... 3 credits
Political Acumen and Ethics
Upon completion of this course, learners will possess an insight into how leaders address current and future impacts on society and how leaders influence organizational commitment toward proactively addressing risk factors as well as legal, regulatory, and governmental requirements. Topics include public responsibility, organizational community involvement, and attaining and maintaining American corporation ethical standards in local and global environments.

MGT 736 .......................................................... 3 credits
Contemporary Systems Management
Upon completion of this course, learners will be prepared to manage and lead complex organizations through strategic decision making, resulting in business plans. Learners focus on extended systems and theoretical and practical frameworks for systematically managing organizations.

LDR 736 .......................................................... 3 credits
Architecture of Leadership
Upon completion of this course, learners will be prepared to develop and maintain a strong orientation to the future and a commitment to improvement and innovation in creating and establishing new business models for attaining organizational goals, setting new short-term and long-term directions, and achieving performance excellence. This course includes an assessment of how leaders address current and future impacts on society in a proactive manner and how leaders establish and accomplish ethical practices in all stakeholder interactions.

RES 725 .......................................................... 3 credits
Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoeting’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 .......................................................... 3 credits
Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the
learners’ needs, other approaches may be covered.
RES 727 .................................................................................... 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.
RES 728 .................................................................................... 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.
RES 729 .................................................................................... 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.
RES 745 .................................................................................... 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.
RES 746 .................................................................................... 3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.
DOC 722 .................................................................................... 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.
DOC 733 .................................................................................... 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 734 .................................................................................... 3 credits

Doctoral Project IV
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 733A ................................................................................... 3 credits

Doctoral Dissertation
This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 733B ................................................................................... 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.
DOC 734A ................................................................................... 3 credits

Doctoral Project IV
This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee mem-
Perform systems-based, financially justified analysis and solve business problems to:

- Identify, research alternatives to, and solve business problems to:
- Demonstrate business knowledge, and be recognized as a business subject expert.
- Provide leadership in this environment requires higher, more sophisticated levels of knowledge and skills.
- The DBA program is designed to serve this need by providing doctoral-level education to professional practitioners in business and management.

The DBA program has an 68-credit requirement that incorporates both residency and online modalities of instruction. The majority of the program will be delivered in a virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into the preparation of a final research study. Additionally, in the Year Three residency, learners will apply their knowledge to a comprehensive, collaborative case study. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DBA degree is the successful completion and oral defense of a significant, substantial, and independently completed research study that adds new information to the body of business management knowledge. The study provides the learner an opportunity to demonstrate mastery of the germinial and current literature in the field and to reflect competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the learner’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dba.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Doctoral Project IV
The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A to DOC 734B or DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. DOC 733 A and B~.................................................3 credits
Doctoral Dissertation
DOC 734 A and B~.................................................3 credits
Doctoral Project IV

Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DBA
All applicants are expected to meet the following admissions requirements:

- A graduate degree in business, management or business administration from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- Students who do not have a graduate degree in either business, management or administration may be admitted if they meet all other requirements for admission and have official transcripts listing three (3) graduate credits in each of the following subjects from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent recognized foreign institution:
The following courses are part of the required course of study.

- Finance for Managerial Decision Making
- Human Relations and Organizational Behavior
- Marketing Management
- Strategy Formulation and Implementation
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
• Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Degree Requirements for the DBA

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Business Administration.

Academic Progression for the DBA

Students are subject to the following academic progression requirements:
• Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
• Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
• All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  • Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better.
  • Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better.
  • An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.0 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Residency Requirements and Course Waivers for the DBA

Students must meet the following residency requirements:
• Completion of physical residencies:
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
  • If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  • The following courses may not be waived: BUS 731, BUS 732, COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
  • The dissertation may not be waived.

Course Descriptions for the DBA

COM 705 ......................................................................................1 credit

Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R .................................................................0 credits

Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A .................................................................3 credits

Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

FIN 711 ......................................................................................3 credits

Financial Measures of Value Added
This course explores and evaluates research on how businesses measure and could modify their measure of financial value in order to improve decision making. Topics include treatment of non-traditional balance sheet items (e.g., knowledge capital), mergers and acquisitions and how to predict success, conditions for successful joint ventures, marketplace valuation of equity, and small to mid-size business’ access to contemporary capital markets.

ORG 711 ......................................................................................3 credits

21st Century Issues in Organizational Behavior I
This course evaluates research on issues that organizations face in optimizing their performance. Topics include how an organization “selects” the form that best fits its mission and culture, organizational learning, and inhibitors to performance.

MGT 711 ......................................................................................3 credits

Strategic Opportunities in an Internet-Based Global Economy
This course evaluates models for creating economically viable global businesses using the technology of the Internet. Topics include assessing successful e-business models and the macroeconomic environment that contributes to the success of business strategy.

MKT 711 ......................................................................................3 credits

Marketing and Managing the Customer Relationship
This course evaluates how decision makers manage their relationship with their customers and apply their marketing knowledge to the development of products and services. Topics include the prediction of demand in global markets, managing product development, and the role of Internet-based customer information.

RES 711 ......................................................................................3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A .................................................................3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ......................................................................................3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ......................................................................................3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

LDR 721 ......................................................................................3 credits

Ethical Leadership and the Legal Landscape
This course evaluates research on how legal environments in the
global economy shape decision making and the ethical issues that emerge from disparate legal systems and practices. This course will specifically address practices legal in a subsidiary country but in violation of the corporation’s ethical standards.

BUS 721 ................................................................. 3 credits

Issues in Optimizing Operations
This course evaluates research on how businesses adopt approaches to optimizing their operations and the conditions under which these lead to success. Topics include how an organization adopts best practices, the predictors for a successful quality management program, and the role of project management.

MGT 721 ................................................................. 3 credits

Managing the Risks in a Global Environment
This course evaluates alternative practices to manage risk in a global environment. Topics include measuring risk (economics, financial, political, etc.), creating tools to predict where to invest internationally, financial instruments of global investment, and techniques to mitigate risk.

ORG 721 ................................................................. 3 credits

21st Century Issues in Organizational Behavior II
This course continues research on issues that organizations face in optimizing their performance. Topics include how organizations develop a culture and set of political rules that define behavior within it, virtual teams, translating culture within a global organization, and conditions that predict success or failure for an organization that expands its mission.

PHL 700R ............................................................... 3 credits

Creative and Critical Thinking
This course helps learners understand the purpose of inquiry and the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.

DOC 721R .............................................................. 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R .............................................................. 3 credits

Collaborative Case Study
This 3-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732R .............................................................. 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R .............................................................. 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

LDR 731 .............................................................. 3 credits

Contemporary Issues in Leadership
This course explores the successes and controversial issues surrounding how and why senior leaders set and deploy organizational values, short- and long-term directions, and performance expectations that create a balanced value. The focus is on business results that encompass organizational learning, stakeholder satisfaction, overall budgetary, financial, and market performance.

BUS 731 .............................................................. 3 credits

Transforming the Business I
This course requires the learner to integrate all previous learning by identifying and solving organizational problems and recommending new business models that will increase organizational performance. The outcome of this course will be delivered in Transforming the Business II.

BUS 732 .............................................................. 3 credits

Transforming the Business II
This course requires the learner to integrate all previous learning by identifying and solving organizational problems and recommending new business models that will increase organizational performance. The outcome of this course will be a continuation of Transforming the Business I.

RES725 .............................................................. 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ............................................................... 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assump-
tions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners' needs, other approaches may be covered.

RES 727 ....................................................................................3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ....................................................................................3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ....................................................................................3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 743 ....................................................................................3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ....................................................................................3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.

RES 722 ....................................................................................3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

RES 733 ....................................................................................3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

RES 734 ....................................................................................3 credits

Doctoral Project IV
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

RES 733A ....................................................................................3 credits

Doctoral Dissertation
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

RES 733B ....................................................................................3 credits

Doctoral Project IV
This is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

RES 734 ....................................................................................3 credits

Doctoral Dissertation
This is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

RES 733A ....................................................................................3 credits

Doctoral Project IV
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

RES 733B ....................................................................................3 credits

Doctoral Dissertation
This is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

RES 734 ....................................................................................3 credits

Doctoral Project IV
This is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation
for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctoral Project IV**

This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

**Doctor of Education in Educational Leadership**

The following Doctor of Education in Educational Leadership (EdD) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Doctor of Education in Educational Leadership (Ed.D.) will prepare learners to become transformational leaders who will strategically manage and lead complex educational organizations. Graduates will be educational practitioners who demonstrate analytical, critical, and innovative thinking to improve the performance of educational institutions.

The Doctor of Education in Educational Leadership degree is consistent with the University’s mission to educate working adults to develop the knowledge and skills that will enable them to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities. The program is designed to emphasize leadership and to focus on applied research that improves educational environments.

**Program Goals**

Graduates of the Doctor of Education in Educational Leadership program will be able to:

- Utilize and conduct research to evaluate and improve instructional and organizational processes.
- Provide instructional leadership to support and enhance the educational process.
- Incorporate knowledge of social, historical, and political theories and processes in educational decision making.
- Lead and manage the educational organization through transformation inherent in contemporary society.

At no time in history has the need for quality education been greater. At the same time, educators face challenges unlike those faced by their predecessors. They must facilitate learning in culturally diverse classrooms; prepare students for jobs in a global, information-based economy; manage their classrooms, schools, and systems effectively and efficiently in the face of severe funding pressures; and produce all the other outcomes traditionally expected from educational institutions. It is clear that as the educational system works its way through this period of radical change, leaders are needed who are capable of dealing with complexity in creative ways. Professional practice in this environment will require more sophisticated educational preparation for greater numbers of practitioners.

The Ed.D. program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Additionally, in the Year Three residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ed.D degree is the successful completion and oral defense of a significant, substantial, and independently completed doctoral dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and express their competence in applying learning to actual educational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd.

Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. DOC 733 A and B ~ .................................................................3 credits
Doctoral Dissertation
DOC 734 A and B ~ .................................................................3 credits
Doctoral Project IV

Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the EdD

All applicants are expected to meet the following admissions requirements:

• A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 3.0 on the graduate
degree post-transcript is required for admission.
• Current or a record of past employment in supervisory or
management position is required for admission.
• Applicants who completed high school/secondary school
outside of the United States, in a country where English is not
the official language, must meet the English language
proficiency requirement for admission.

Academic Progression Requirements for the EdD
Students are subject to the following academic progression require-
ments:
• Learners meeting a minimum GPA of 3.5 may concurrently
enroll in courses not in the following areas: Year 1 coursework
(must successfully complete DOC 721R or 13 credits earned in
EDS program), research courses (RES prefix), residency courses,
and EDS 799.
• Students may concurrently enroll in DOC 740R with any of
the dissertation courses (DOC 733 A/B or DOC 734 A/B).
• All doctoral (including reentry students) students will be
required to demonstrate a foundation of educational exposure
to research, statistics or quantitative reasoning in one of the
following manners.
  • Applicable undergraduate University of Phoenix
coursework completed within 10 years with a grade of C or
better
  • Applicable graduate University of Phoenix coursework
completed within 15 years with a grade of C or better
  • An official transcript reflecting 3 credits of undergraduate or
comparable coursework in research, statistics, or
quantitative reasoning completed within 10 years with a
grade of C or better.
• An official transcript reflecting 3 credits of graduate
coursework in research, statistics, or quantitative reasoning
completed within 15 years with a grade of C or better
• A minimum score of at least 149 for quantitative sections and
a 4.25 on the analytical section of the GRE completed within
the last 10 years.
• A passing score on the statistics entrance assessment. The
assessment may only be taken twice.
  • Students may have only one incomplete grade on their records
at a time.
  • Students must submit and receive written approval of the
dissertation concept paper as a completion requirement for
DOC 721R Doctoral Seminar I.
  • Successful completion of DOC 731R which serves as a qualifying
examination course in the program.
  • A minimum score of at least 149 for quantitative sections and
a 4.25 on the analytical section of the GRE completed within
the last 10 years.
• Quality review of dissertation proposal to advance beyond DOC
732R.
• Committee literature review prior to enrollment in DOC 734.
• Institutional Review Board approval prior to enrollment in
advanced qualitative and quantitative analysis course (RES 725 -
RES 729)
• Quality final Institutional review of dissertation during DOC
734.
• Editorial Review after DOC 734 and prior to graduation.
• Enrollment in DOC 740R is required only when a student has
not completed his or her dissertation within 12 months of
completing their last group study course. The soonest a student
can take DOC 740R is 6 months after completing the last group
study course. Once students have completed DOC 740R, it does
not need to be repeated unless the student chooses to take it
again.
• Students who would like to repeat DOC 740R may repeat the
course.

Academic Standing and Minimum Grade Requirements for the
EdD
• Students who do not meet minimum grade requirements and
stay below a “B-” must meet the minimum grade requirement after the second attempt will
be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must
be completed with a grade of “B-” or better. Students who earn a
grade lower than “B-” must repeat the course until the minimum
grade requirement is met.
• Students who do not meet minimum grade requirements and
maintain a minimum GPA of 3.00 will be placed on academic
probation (AP) and will be subject to the University academic
probation policy.

Degree Requirements for the EdD
Students must meet the following degree requirements within the
six (6) year program completion deadline established by the Univer-
sity:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the
dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral
students, who have satisfied all program requirements with the
exception of their dissertation, a one (1) year graduation
deadline extension to allow additional time for dissertation
completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated
satisfactory progress and completion of the dissertation is
probable if a one (1) year extension is granted. Approval of the
one (1) year extension must be granted by a Doctoral Program
Chair.
• Students must satisfy all credit and non-credit bearing activities
prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of
Education.

Residency Requirements and Course Waivers for the EdD
Students must meet the following residency requirements:
• Completion of physical residencies.
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
• Eight-day residency at the beginning of year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
• The dissertation may not be waived.

**Course Descriptions for the EdD**

**Communication Strategies**

COM 705 ....................................................................................1 credit

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

**SEM 700R ................................................................. 0 credits**

**Doctoral Program Orientation Seminar**

SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A .................................................................................. 3 credits

**Leadership Theory and Practice**

This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

EDD 711 ....................................................................................3 credits

**Social Contexts and Contemporary Issues**

This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.

EDD 712 ....................................................................................3 credits

**Leadership in Contemporary Organizations**

This course explores organization theory, culture, and change. The influence of leadership on the organization is examined in depth. The different functions of administration, management, and leadership are of focus.

EDD 713 ....................................................................................3 credits

**Lifelong Learning: Leadership in the Educational Continuum**

The concept of lifelong learning and the impact it has on education providers is the focus of this course. Theories of learning, specifically adult learning, are examined. The role that P-12 education, higher education, corporate education/training, and the military play in instilling a belief in lifelong learning is of focus.

EDD 714 ....................................................................................3 credits

**Comparative Models of Educational Environments**

This course examines the various models of educational environments available to students today. Discussion topics range from the wealth of options available for P-12 school students to adult learners to alternative learning environments. Specific focus is placed on distance education modalities for learners of all ages.

RES 711 ....................................................................................3 credits

**Fundamental Principles of Sound Research**

RES 722A ....................................................................................3 credits

**Research Design**

This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ....................................................................................3 credits

**Advanced Statistical Research Methods and Design**

The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ....................................................................................3 credits

**Qualitative Methods and Design**

This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on
the design and development of qualitative research studies.

EDD 721 .................................................................................. 3 credits

**Planning and Leading Change**

This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the policies and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

EDD 722 .................................................................................. 3 credits

**The Legal Context of Education**

This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory issues, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case law and specific pieces of education legislation are reviewed.

EDD 723 .................................................................................. 3 credits

**Ethics and Values in Learning Organizations**

The ethics and value-based decisions that learning organizations are faced with are explored in depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values education, codes of conduct, and codes of ethics are debated.

EDD 724 .................................................................................. 3 credits

**Instructional Leadership**

This course analyzes the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating staff and students, and creating dynamic learning environments. The importance of faculty development and their involvement in research and public service are of special focus.

PHL 700R ................................................................................ 3 credits

**Creative and Critical Thinking**

This course helps learners understand the purpose of inquiry and the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.

DOC 721R .................................................................................. 2 credits

**Doctoral Seminar I**

This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral program/disciplines.

DOC 731 .................................................................................. 3 credits

**Collaborative Case Study**

This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732 .................................................................................. 2 credits

**Doctoral Seminar III**

This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740 .................................................................................. 0 credit

**Annual Renewal Residency**

This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

EDD 731 .................................................................................. 3 credits

**The Economics of Education**

The principles and theories of the economics of education are examined. The role that Federal, state, and local government play in the economics of education is explored in depth. Key topics include budget management, grants, financial aid, expenditures and revenues, and the rising cost of education. Economic policy analysis is a focus in this course.

EDD 732 .................................................................................. 3 credits

**Contemporary Policy Analysis and Development**

This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

EDD 733 .................................................................................. 3 credits

**Evaluation and Assessment Methods**

This course explores the evaluation and assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Accreditation issues, outcomes-based assessment, institutional research, and staff and faculty evaluation are key topics. The influence of leadership style on evaluation and assessment methods also is examined.

RES 725 .................................................................................. 3 credits

**Descriptive and Comparative Data Analysis**

This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will
Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.

DOC 722 ................................................................. 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be developed and refined. The learner will focus on laying the groundwork for preparing the dissertation proposal for approval. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.
DOC 733 ................................................................. 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assure and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 734 ................................................................. 3 credits

Doctoral Project IV
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assure and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 733A ............................................................... 3 credits

Doctoral Dissertation
This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and
skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 734A ........................................................................................................... 3 credits

Doctoral Project IV
This course is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B ........................................................................................................... 3 credits

Doctoral Project IV
This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

Doctor of Education in Educational Leadership/ Curriculum and Instruction

The following Doctor of Education in Educational Leadership/ Curriculum and Instruction (EdD/CI) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Doctor of Education in Educational Leadership with a specialization in Curriculum and Instruction will prepare learners to become instructional leaders who will strategically manage and lead processes related to curriculum, instruction, and assessment. Graduates will demonstrate both practical and scholarly knowledge in their use of analytical, critical, and innovative thinking to improve the performance of educational institutions.

Historically, education has been a field of constant evolution and debate, with the pull of philosophical, cultural, and political influences felt throughout the industry. As such, contemporary educators face challenges unlike those faced by their predecessors: Educational leaders must design and facilitate learning in culturally diverse classrooms; manage the needs of multiple stakeholders; develop their classrooms, schools, and systems effectively and efficiently in the face of severe funding pressures; address the demands of regulatory bodies; and meet the outcomes established by the greater educational community. As the education system undergoes these radical changes, there has been a drastic increase in the need for leaders who are capable of designing innovative curricular models in their institutions and of consistently improving their students’ outcomes. The Doctor of Education in Educational Leadership with a specialization in Curriculum and Instruction is offered by the University of Phoenix to enable leaders to affect these high levels of performance through applied scholarship, rigorous analysis, and comprehensive evaluation methods.

The Curriculum and Instruction specialization degree is consistent with the University’s mission to educate working adults to achieve their professional goals and to improve the quality of education in their communities. The program is designed to emphasize curricular leadership and to focus on applied research that improves instruction and educational outcomes.

Program Goals
Upon completion of all program requirements of the Doctor of Education in Educational Leadership with a specialization in Curriculum and Instruction degree, learners will be able to:

- Evaluate and improve instructional and organizational processes through research-based decisions.
- Support and enhance the educational process through instructional leadership.
- Influence policy decisions within educational settings with knowledge of social theories, historical perspectives, and political issues.
- Design, develop, and implement curriculum, instructional strategies, and assessment tools to enhance learning.
- Create and implement sound curricular models by synthesizing research, theory, and experience.

Program Structure
The EdD/CI program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the Third Year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the EdD/CI degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of seminal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is
designed to develop the student's ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues. Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd-ci.

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course. Students may be required to complete DOC 733B and DOC 734B
until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of

• A graduate degree from a regionally or approved nationally

• All doctoral (including reentry students) students will be

• Learners meeting a minimum GPA of 3.5 may concurrently

Academic Progression Requirements for the EdD/CI

• Applicants who completed high school/secondary school

• A cumulative grade point average (GPA) of 3.0 on the graduate

• Students who would like to repeat DOC 740R may repeat the

A minimum score of at least 149 for quantitative sections and

• A minimum score of at least 149 for quantitative sections and

• A passing score on the statistics entrance assessment. The

Students may only have one incomplete grade on their records

• Students must submit and receive written approval of the

• A minimum grade point average (GPA) of 3.0.

• A minimum grade point average (GPA) of 3.0.

• Satisfactory completion of all residencies.

• Written approval of the dissertation proposal.

Additional Admission Requirements for the EdD/CI

All applicants are expected to meet the following admissions requirements:

• A graduate degree from a regionally or approved nationally

• Students may concurrently enroll in DOC 740R with any of

• Students must earn a grade of "B" or better in COM 705

• Students who would like to repeat DOC 740R may repeat the

University of Phoenix, 2014-2015

SCHOOL OF ADVANCED STUDIES
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.

Residency Requirements and Course Waivers for the EdD/CI
Students must meet the following residency requirements:
• Completion of physical residencies.
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
  • The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
  • The dissertation may not be waived.

Course Descriptions for the EdD/CI
COM 705 ..................................................................................1 credit
Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/
doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R ..................................................................................0 credits
Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM 700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

LDR 711A ..................................................................................3 credits
Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

EDD 711 ..................................................................................3 credits
Social Contexts and Contemporary Issues
This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.

EDD 724..................................................................................3 credits
Instructional Leadership
This course analyzes the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating staff and students, and creating dynamic learning environments. The importance of faculty development and their involvement in research and public service are of special focus.

CUR 711 ..................................................................................3 credits
Developmental and Learning Theories
Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.

CUR 712 ..................................................................................3 credits
Curriculum Theory
This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorist and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.

RES 711 ..................................................................................3 credits
Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ..................................................................................3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.
RES 723 ................................................................. 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.
RES 724 ................................................................. 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.
EDD 721 ................................................................. 3 credits

Planning and Leading Change
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.
CUR 721 ................................................................. 3 credits

Curriculum Design
In this course, learners focus on the creation of systemic models of curriculum development, including consideration of schedule, structure, stakeholder involvement, and end products. Learners will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.
CUR 722 ................................................................. 3 credits

Instructional Models
This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs and staff development are of special focus.
CUR 723 ................................................................. 3 credits

Assessment of Student Learning
This course explores student assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Among the key topics are outcomes-based assessment - such as standardized achievement and criterion assessment, as well as the influence of leadership styles on these outcomes.
PHL 700R ............................................................. 3 credits

Creative and Critical Thinking
This course helps learners understand the purpose of inquiry and the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.
DOC 721R ............................................................ 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.
DOC 731R ............................................................ 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral programs/disciplines.
DOC 732R ............................................................ 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.
DOC 740R ............................................................. 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.
CUR 731 ............................................................... 3 credits

Supervision of Curriculum and Instruction
This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.
EDD 732 ............................................................. 3 credits

Contemporary Policy Analysis and Development
This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institu-
tional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

CUR 732 ........................................................................................................... 3 credits

Program Evaluation
This course explores program evaluation models and methods utilized in learning organizations. Both formative and summative methods are discussed, and their merits and faults are debated. Accreditation issues are among the key topics, and the influence of leadership style on program evaluation methods is examined.

RES 725 ........................................................................................................... 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T², MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ........................................................................................................... 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

RES 727 ........................................................................................................... 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ........................................................................................................... 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ........................................................................................................... 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ........................................................................................................... 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ........................................................................................................... 3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches — and their blending — to actually design and conduct meaningful doctoral level research.

DOC 722 ........................................................................................................... 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ........................................................................................................... 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 ........................................................................................................... 3 credits

Doctoral Project IV
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with
The following Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology (DM/IST) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The mission of the Doctor of Management in Organizational Leadership with a specialization in Information Systems and Technology (DM/IST) is to enable professionals from any industry to understand and evaluate the scope and impact of information systems and technology (IST) from organizational, industry-wide, and global perspectives. The DM/IST curriculum lays a foundation of knowledge in critical thinking, leadership, and the application of IST content areas. Learners integrate this knowledge with their professional experiences and doctoral-level research to create innovative, positive, and practical contributions to the body of IST knowledge. Graduates will be able to influence their organization and environment positively with transformational IST leadership practices.

This doctoral program in IST management incorporates coursework in fundamental management, organizational, and leadership concepts to engender the development of IST leadership perspectives. As such, learners with a professional leadership background in any discipline will be able to add their unique perspective to the study of the context, breadth, and processes of IST management.

**Program Goals**

Upon completion of all program requirements of the Doctorate in Management in Organizational Leadership with a specialization in Information Systems degree, learners will be able to:

- Conduct research as a foundation for executive action.
- Demonstrate innovation and creativity in developing new IT models to explain, forecast, support, and improve the strategic, tactical, and operational performance of organizations.
- Integrate and align IT initiatives with organizational strategy.
- Lead the IT decision-making process toward positive outcomes.
- Provide leadership to improve the overall performance of the organization in its industry, community, and global environment.

**Program Structure**

The DM/IST program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required coursework. Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the Third Year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DM/IST degree is the successful completion and oral defense of a significant, substantial, and independently completed Doctoral Dissertation that adds new
Information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of terminal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues. Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dm-ist.

**DM/IST Program Category Requirements**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Doctoral Foundations, 4 total credits**
- COM 705 ~ .................................................................1 credit
- Communication Strategies
- IST 700R ~ .............................................................0 credits
- Developmental Program Orientation Seminar
- LDR 711A ~ .............................................................3 credits
- Leadership Theory and Practice

**Foundations of Informational Systems in Management and Organizational Leadership, 12 total credits**
- IST 710 ~ .................................................................3 credits
- Foundations of Information Systems Management
- PHL 717 ~ .................................................................3 credits
- Constructing Meaning
- ORG 716 ~ .................................................................3 credits
- Organizational Theory and Design
- MGT 716 ~ .................................................................3 credits
- Management Philosophies

**Research Foundations, 6 total credits**
- RES 711 ~ .................................................................3 credits
- Fundamental Principles of Sound Research
- RES 722A ~ .............................................................3 credits
- Research Design

**Advanced Research Design, 3 total credits**
- RES 723 ~ .................................................................3 credits
- Advanced Statistical Research Methods and Design
- RES 724 ~ .................................................................3 credits
- Qualitative Methods and Design

**Information Systems Across Organizations, 12 total credits**
- IST 721 ~ .................................................................3 credits
- Knowledge Worker Information Systems
- IST 722 ~ .................................................................3 credits
- Information Technology for Teams
- IST 723 ~ .................................................................3 credits
- Departmental Information Systems
- IST 724 ~ .................................................................3 credits
- Organizational Information Systems Management

**Doctoral Residencies, 10 total credits**
- PHL 700R ~ .............................................................3 credits
- Creative and Critical Thinking
- DOC 721R ~ .............................................................2 credits
- Doctoral Seminar I
- DOC 731R ~ .............................................................3 credits
- Collaborative Case Study
- DOC 732R ~ .............................................................2 credits
- Doctoral Seminar II
- DOC 740R ~ .............................................................0 credits
- Annual Renewal Residency

**Advanced Inquiry in Information Systems and Technology, 9 total credits**
- IST 731 ~ .................................................................3 credits
- Partnership and Industry Information Systems
- IST 732 ~ .................................................................3 credits
- Global Information Systems Management
- IST 733 ~ .................................................................3 credits
- Information Systems Management Architecture

**Advanced Research Analysis, 3 total credits**
- RES 725 ~ .................................................................3 credits
- Descriptive and Comparative Data Analysis
- RES 726 ~ .................................................................3 credits
- Correlational Methods of Analysis
- RES 727 ~ .................................................................3 credits
- Approaches to Phenomenological Inquiry and Data Analysis
- RES 728 ~ .................................................................3 credits
- Qualitative Case Study
- RES 729 ~ .................................................................3 credits
- Ethnography and the Study of Culture
- RES 745 ~ .................................................................3 credits
- Grounded Theory Methods
- RES 746 ~ .................................................................3 credits
- Mixed Methods

**Dissertation, 9 total credits**
- DOC 722 ~ .................................................................3 credits
- Doctoral Seminar II
- DOC 733 ~ .................................................................3 credits
- Doctoral Dissertation
- DOC 734 ~ .................................................................3 credits
- Doctoral Project IV

The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

DOC 733 A and B~ .................................................................3 credits
Doctoral Dissertation
DOC 734 A and B—............................................................... 3 credits

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DM/IST
All applicants are expected to meet the following admissions requirements:

- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in leadership of people or processes is required for admission.
- Applicants who completed high school/secondary school or a record of past employment in leadership of people or processes is required for admission.
- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" must repeat the course until the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students must meet the following residency requirements:

  - Three-day residency at the beginning of year two.
  - Five-day residency at the beginning of the program.

- An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better
- A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
- A passing score on the statistics entrance assessment. The assessment may only be taken twice.
- Students may have only one incomplete grade on their records at a time.
- Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
- Successful completion of DOC 731R which serves as a qualifying examination course in the program.
- Quality review of dissertation proposal to advance beyond DOC 732R.
- Committee literature review prior to enrollment in DOC 734.
- Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).
- Quality final Institutional review of dissertation during DOC 734.
- Editorial Review after DOC 734 and prior to graduation.
- Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
- Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Scholaristic Disqualification for the DM/IST
- Students must earn a grade of "B" or better in COM 705 Communication Strategies. Students who earn less than a "B" will be scholastically disqualified and must repeat the course.
- Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- All credit-bearing courses, with the exception of COM 705, must be completed with a grade of "B-" or better. Students who earn a grade lower than "B-" must repeat the course until the minimum grade requirement is met.
- DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
- Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Residency Requirements and Course Waivers for the DM/IST
Students must meet the following residency requirements:

- Completion of physical residencies.
- Five-day residency at the beginning of the program.
- Three-day residency at the beginning of year two.
• Eight-day residency at the beginning of year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, IST 710, IST 721, IST 722, IST 723, IST 724, IST 731, IST 732, IST 733, PHL 700R, RES 722A, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, RES 745, SEM 700R
• The dissertation may not be waived.

Degree Requirements for the DM/IST
Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Management and will not reflect the specialization. Specializations are reflected on the transcript only.

Course Descriptions for the DM/IST
COM 705 .....................................................................................1 credit

Communication Strategies
This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.
SEM 700R ..................................................................................0 credits

Doctoral Program Orientation Seminar
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.
LDR 711A ................................................................................3 credits

Leadership Theory and Practice
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.
IST 710 .....................................................................................3 credits

Foundations of Information Systems Management
This course surveys the major content areas of information systems management that will be examined at various organizational levels of the Information Systems and Technology Specialization of the Doctor of Management program. The major content areas (IST domains) to be surveyed include information technology management, networking, Web, database, programming, and systems development. Upon completion of this course, the learners will be prepared to analyze, define, and research the unique management considerations of each domain within various organization levels.
PHL 717 .....................................................................................3 credits

Constructing Meaning
The postmodern world is an amalgam of our beliefs, physical sensory interpretations, psychological projections of our wants/needs/fantasies, a cultural interpretation of existence/meaning/purpose, a moral sense of right and wrong, a religious or spiritual interpretation of responsibility, and the sense of the relationship we have to each other. Learners explore the concept of postmodernism through the writings of some of the classic thinkers. Learners will also undertake an examination of the way they personally construct their world - what it means and what is meaningful at a personal level, with some insight into why that is the case for them. This information will be explored and learners will use this to inform their leadership behavior and explain their style.
ORG 716 .....................................................................................3 credits

Organizational Theory and Design
Upon completion of this course, learners will be prepared to analyze and select appropriate paradigms to guide organizational research. Additionally, learners will have the ability to apply organizational theories systematically to enrich existing models or develop new models to increase performance and effectiveness.
MGT 716 .....................................................................................3 credits
Management Philosophies
Upon completion of this course, learners will be prepared to employ a research-based approach to investigate the body of knowledge relating to scientific management philosophies from their recorded origins to current day applications. Learners will analyze and evaluate the evolution of management theory within historical timeframes with incremental assessments of the success or failures to optimize resources to attain performance excellence in a customer-centered organization.

RES 711 .................................................................................... 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A ................................................................. 3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 .................................................................................... 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ..................................................................................... 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

IST 721 .................................................................................... 3 credits

Knowledge Worker Information Systems
In this course, the learner will research and evaluate the information systems and technology tools necessary to support the individual knowledge worker in today’s environment. This analysis of the systems and tools will be conducted from the viewpoint of the program domains and how the individual worker must be supported to create a productive and efficient environment. The scope of this course will include hardware and software product considerations for management.

IST 722 ..................................................................................... 3 credits

Information Technology for Teams
Learners in this course will further evaluate the application of the domains studied in IST/721 and how those domains are applied in a team setting. The application of the program domains will be examined in the context of support necessary to implement various organizational team models, ranging from co-located teams to geographically distributed virtual teams. Upon completion of this course, the learner will be prepared to define and analyze issues related to the management and support of information technology necessary for organizational teams’ operations.

IST 723 .................................................................................... 3 credits

Departmental Information Systems
This course will continue the analysis of the application of the domains used by individuals and teams studied in IST/721 and IST/722. The learner will evaluate the application of the program domains to departmental operations and strategy. The learner will research and evaluate information systems support techniques, both internal and external to the departmental interfaces.

IST 724 ..................................................................................... 3 credits

Organizational Information Systems Management
This course will build upon the considerations examined in the prior IST courses. Upon completion of this course, the learner will be prepared to evaluate and develop integrated strategies for the implementation of the IST domains within an organization.

PHL 700R ............................................................................. 3 credits

Creative and Critical Thinking
This course helps learners understand the purpose of inquiry and the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.

DOC 721R ................................................................................ 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners from various doctoral programs/disciplines.

DOC 731R ................................................................................ 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral programs/disciplines.

DOC 732R ................................................................................ 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process
through an approved Doctoral Proposal to final submission of the
Doctoral Dissertation due at the end of the program, with the final
chapters being explored for content and format.

DOC 740R .................................................................0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a
learner has not completed the dissertation within 12 months of
completing all courses, excluding DOC/728. This residency session
is designed to allow for concentrated time between the learner and
a faculty member, focusing on dissertation completion. This annual
renewal residency is required for every full year a learner remains
in “all but dissertation” status.

IST 731 .................................................................3 credits

Partnership and Industry Information Systems
This course extends the learning from previous intra-company
relationships to external IS organizational relationships. Upon
completion of this course, the learner will be prepared to define,
evaluate, and plan the application of IST domains that must be
considered when developing partnerships and common industry
relationships.

IST 732 .................................................................3 credits

Global Information Systems Management
This course extends the examination of the IST domains studied
throughout the program to the global level. The learner will exam-
ine the application of the IST domains in the setting of a global
economy and international business environment. The learners
will be prepared to define the common IS management approaches
for the development of business systems that can support global
information systems requirements.

IST 733 .................................................................3 credits

Information Systems Management Architecture
In this course, learners will create an innovative model, incorporat-
ing the domains and models from previous coursework. In the
model building, learners will demonstrate their leadership compe-
tencies as related to IST.

RES 725 .................................................................3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting
results when describing and comparing data from groups. Lear-
ers will explore the assumptions, advantages, limitations, and
appropriate applications of these quantitative approaches. The
methods covered will include comparison of means for various
forms of data including multiple means using methods of basic
and advanced factorial ANOVA. Multivariate comparisons will
also be explored under conditions of multiple independent and
dependent variables using techniques including Hotelling’s T,
MANOVA and related techniques. Depending on the learners’
needs other approaches may be covered.

RES 726 .................................................................3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and
reporting when examining bivariate and multivariate relationships
among variables. Learners will explore the underlying assump-
tions, advantages, limitations and appropriate application of corre-
lation/regression based approaches to data analysis. The course
will cover basic correlation methods, simple and multiple regres-
sion techniques, and advanced multivariate procedures including
factor analysis and structural equation models. Depending on the
learners’ needs, other approaches may be covered.

RES 727 .................................................................3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students
with instruction in qualitative phenomenological approaches as
applied to social science research. The course will emphasize indi-
vidual and group interviewing as techniques for phenomenologi-
cal data collection. Focus is placed on analysis approaches that
are appropriate for and relevant to phenomenological research.

RES 728 .................................................................3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students
with instruction in qualitative case study research approaches as
applied to social science research. The course will emphasize indi-
vidual and group interviewing as techniques for qualitative case
study data collection. This course is particularly useful for
advanced doctoral students who plan to conduct a qualitative dis-
sertation. Focus is placed on analysis approaches appropriate for
and relevant to case study research.

RES 729 .................................................................3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence
with data analysis techniques developed in the anthropological tra-
dition of ethnography. Integrating data from multiple collection
methods (e.g. observational field notes, interviews, analyses of cul-
tural artifacts), students will develop coding/thematic grouping
protocols as well as strategies to develop findings into comprehen-
sive interpretation of a particular culture. The course will conclude
with a comprehensive overview of the process and practice of writ-
ing up ethnographic texts, centering largely on “thick description”
as a critical mode of representation.

RES 745 .................................................................3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students
with instruction in qualitative approaches as applied to social sci-
ence research, where the research objective is the development of
typeory. Building upon an existing understanding of qualitative
inquiry, students explore the concept of data within grounded the-
ory as well as the techniques and processes traditionally found
within grounded theory, such as the constant comparative method.
Focus is placed on the steps and procedures for analyzing data
within a grounded theory context.

RES 746 .................................................................3 credits

Mixed Methods
The Mixed-Methods course focuses on both conceptual issues sur-
rounding the use of mixed methods in business, education, nursing
and social science research and the analysis of data using mixed
methods. The course will involve scrutiny of published mixed-
method research throughout, and uses published research for ref-
ence purposes throughout the course. Students are expected to
develop skills in mixed-method research by engaging in actual
analysis of data using mixed methods. Thus, the course will blend
conceptualization, design, and analysis. Content of the course rep-
resents a clear recognition of the importance of mixed methods in
research and the growing importance of a solid knowledge of both
quantitative and qualitative approaches – and their blending – to
actually design and conduct meaningful doctoral level research.

DOC 722 .................................................................3 credits
Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 .................................................................................. 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 .................................................................................. 3 credits

Doctoral Project IV
This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

Doctor of Health Administration

The following Doctor of Health Administration (DHA) program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The DHA program prepares leaders to respond effectively to the dynamic and ever-changing health care industry. These individuals will have a capacity to critically examine and evaluate issues and trends and feel empowered to influence the destiny of the health systems.

Graduates with a Doctor of Health Administration will be able to:
- Conduct, evaluate, and apply research designed to explain, forecast, predict, and/or improve the performance of health systems
- Use theoretical constructs to assess and develop implementation strategies health systems
- Strengthen leadership skills and abilities that foster the evolution of adaptive, high-performing health systems
- Evaluate, develop and implement policies and practices that impact health systems
- Lead organizations in anticipating and meeting challenges in the changing health environment

Graduates of the Doctor of Health Administration program will have enhanced their administrative and leadership skills through the completion of a curriculum that provides students with the latest theories and contemporary practice applications. They are not only able to define their role within the U.S. health system, but understand how to make necessary changes to create a work environment that is team-oriented and motivating to others. Graduates are able to analyze the influence of external and internal environments in order to align their organizations to respond to the ever-changing demands of the health care market place. Sensitivity to individuals and groups and the influence of multicultural diversity are seen as essential to effective leadership.

The curriculum is tailored to the needs of the health leader by providing content in finance, policy, research, technology, quality improvement, economics, leadership, and organizational analysis. The DHA program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the
program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and will be required to spend approximately 25 hours per week on required coursework.

Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both weekdays and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation. Additionally, in the year three residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the DHA degree is the successful completion and oral defense of a significant, substantial, and independent doctoral dissertation that adds new information to the body of health administration knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of the germinal and current literature in the field and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research method for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/dha.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Doctoral Project IV
The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.
DOC 733 A and B~ ................................................................. 3 credits
Doctoral Dissertation
DOC 734 A and B~ ................................................................. 3 credits
Doctoral Project IV
Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the DHA
All applicants are expected to meet the following admissions requirements:
• A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
• Current or a record of past employment in supervisory or management position is required for admission.
• Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Degree Requirements for the DHA
Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Health Administration.

Academic Progression for the DHA
Students are subject to the following academic progression requirements:
• Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
• Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
• All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  • Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  • Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  • An official transcript reflecting 3 credits of comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  • An official transcript reflecting 3 credits of comparable coursework in research, statistics, or qualitative reasoning completed within 15 years with a grade of C or better
  • A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
  • A passing score on the statistics entrance assessment. The assessment may only be taken twice.
• Students may have only one incomplete grade on their records at a time.
• Students must submit and receive written approval of the dissertation concept paper as a completion requirement for DOC 721R Doctoral Seminar I.
• Successful completion of DOC 731R which serves as a qualifying examination course in the program.
• Quality review of dissertation proposal to advance beyond DOC 732R.
• Committee literature review prior to enrollment in DOC 734.
• Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729).
• Quality final Institutional review of dissertation during DOC 734.
• Editorial Review after DOC 734 and prior to graduation.

**Institutional Review Board**

• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.

• Students who would like to repeat DOC 740R may repeat the course.

**Academic Standing and Minimum Grade Requirements for the DHA**

Students must earn a grade of “B” or better in COM 705 Communication Strategies. Students who earn less than a “B” will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of “B-” or better. Students who earn a grade lower than “B-” must repeat the course until the minimum grade requirement is met.

• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.

• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

**Residency Requirements and Course Waivers for the DHA**

Students must meet the following residency requirements:

• Completion of physical residencies:
  • Five-day residency at the beginning of the program.
  • Three-day residency at the beginning of year two.
  • Eight-day residency at the beginning of year three.
  • If a student's dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.

• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:

• The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

• The following courses may not be waived: COM 705, DHA 733, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R.
• The dissertation may not be waived.

**Course Descriptions for the DHA**

**COM 705** ........................................................................................................1 credit

**Communication Strategies**

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

**SEM 700R** ........................................................................................................0 credits

**Doctoral Program Orientation Seminar**

SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies' integrated scholarship, practice, and leadership approach. During SEM 700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

**LDR 711A** ........................................................................................................3 credits

**Leadership Theory and Practice**

This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

**DHA 711** ........................................................................................................3 credits

**Administration of Complex Health Care Systems**

Students will focus on administration of complex health systems rather than singular organizations. Topics include organizational analysis, strategic planning, multi-organizational management issues, and evolving governance structures. Students are expected to discuss and critically analyze theories and methods in health care administration. This course is intended to serve as an arena for discussion and inquiry regarding both current and historical issues in strategic decision making at the policy and the organizational level.

**DHA 712** ........................................................................................................3 credits
Risk Management in Complex Organizations
Managing risk in an organization requires demonstration of an understanding of legal, licensure, certification, and accreditation dynamics, as well as litigation management within the context of corporate compliance. The student will apply concepts from labor law, risk financing, contract law, partnership agreements, and professional credentialing. Discussion will also include human subjects research, data security, and biotechnology.

DHA 713 .......................... 3 credits

Managing Resources in Health Organizations
Understanding the complexity of managing the vast resources needed to deliver quality health care is essential. Although human resources comprise the majority of needed assets, other resources include facilities and industry suppliers. This course will examine how these resources are interwoven and need to be successfully managed. The course is a combination of theoretical and practical approaches for resource management.

DHA 714 .......................... 3 credits

Health Care Marketing
Survival of health care institutions is primarily dependent on how well marketing succeeds at acquiring market share. This course examines key marketing concepts within the health care industry. Students will examine the financial success of health care institutions from a market share perspective including pricing, promotion, and distribution of services.

RES 711 .......................... 3 credits

Fundamental Principles of Sound Research
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A .......................... 3 credits

Research Design
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 .......................... 3 credits

Advanced Statistical Research Methods and Design
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 .......................... 3 credits

Qualitative Methods and Design
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

DHA 721 .......................... 3 credits

Health Care Economics
This course focuses on the application of economic theory to the amount, organizations, and distribution of health care services in the United States. Students will apply principles such as supply and demand, margin analysis, and cost effectiveness analysis. Students will discuss issues and controversies surrounding the government’s role in financing and regulating health services.

DHA 722 .......................... 3 credits

Policy and Regulation in Health Care
Contemporary administration requires a thorough understanding of the federal policy and regulatory development process. Students analyze the history of health financing legislation, as well as regulatory implications of both the Medicare and Medicaid programs. This course examines the impact of emerging social, ethical, legal, and political issues on the future of the health care system. Emphasis is on the creation of innovative models of health care delivery.

DHA 723 .......................... 3 credits

Executive Information Systems
This course focuses on the use of financial systems, decision modeling programs, and advanced clinical information systems in formulating the strategic direction of modern health care systems. Practical experience using the University’s information technology partners introduces students to the richness of modern data systems. Simulations include quality improvement applications, including statistical process control methodology.

DHA 724 .......................... 3 credits

Globalization of Health Care
This course focuses on global health care systems with the objective of improving U.S. health care systems. Topics include global health issues, advocacy organizations, comparative political processes, and the economics of health financing. Students will understand the role of various international governing structures on health policy development.

PHL 700R .......................... 3 credits

Creative and Critical Thinking
This course helps learners understand the purpose of inquiry and the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.

DOC 721R .......................... 2 credits

Doctoral Seminar I
This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation’s submission at the end of the program. Topics in the course include problem statement, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner’s dissertation. This course will incorporate learners
from various doctoral programs/disciplines.

DOC 731R ................................................................. 3 credits

Collaborative Case Study
This 5-day residency course is an exercise in practical, professional management decision making and is intended to focus the learner on the challenges faced by managers who must balance the needs of customers, shareholders, employees, and other stakeholders. The course requires the learner to synthesize and integrate theory and practice and to apply them toward the development of recommended solutions for specific managerial situations found within the organization’s environment. This course will incorporate learners from various doctoral program/disciplines.

DOC 732R ............................................................. 2 credits

Doctoral Seminar III
This 3-day residency course is designed to facilitate the process through an approved Doctoral Proposal to final submission of the Doctoral Dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 740R ............................................................. 0 credit

Annual Renewal Residency
This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in “all but dissertation” status.

DHA 731 ............................................................... 3 credits

Population Health and Epidemiology
The science of epidemiology is essential for projecting the population health needs and appropriate allocation of public and private resources. This course focuses on the utilization of epidemiologic studies and techniques as a basis for health care policy and administrative decision making. Students will apply this science in the analysis of emerging health epidemics and diseases.

DHA 732 ............................................................... 3 credits

Evaluation of Health Care Programs
This course prepares the contemporary health administrator to utilize research methodologies in making decisions regarding the cost effectiveness of specific health programs. Case studies will be used that incorporate disease-specific programs, community-wide health interventions, and population specific care management programs across a variety of health settings.

DHA 733 ............................................................... 3 credits

Contemporary Leadership Issues
This seminar focuses on the applications of new knowledge in creating new policies and models in the administration of health programs. Learners will explore contemporary issues and their impact on emerging leadership and management theory. Learners will demonstrate integration of knowledge.

RES 725 ............................................................... 3 credits

Descriptive and Comparative Data Analysis
This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoelting’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

RES 726 ............................................................... 3 credits

Correlational Methods of Analysis
This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs, other approaches may be covered.

RES 727 ............................................................... 3 credits

Approaches to Phenomenological Inquiry and Data Analysis
This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

RES 728 ............................................................... 3 credits

Qualitative Case Study
This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.

RES 729 ............................................................... 3 credits

Ethnomethodology and the Study of Culture
In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on “thick description” as a critical mode of representation.

RES 745 ............................................................... 3 credits

Grounded Theory Methods
This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ............................................................... 3 credits
Mixed Methods
The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches – and their blending – to actually design and conduct meaningful doctoral level research.

DOC 722 .................................................................................. 3 credits

Doctoral Seminar II
This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s progress will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 .................................................................................. 3 credits

Doctoral Dissertation
This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 .................................................................................. 3 credits

Doctoral Project IV
This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734A ............................................................................... 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 733A ............................................................................... 3 credits

Doctoral Project IV
This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B .................................................................................. 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 733B .................................................................................. 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 733A ............................................................................... 3 credits

Doctoral Project IV
This course is a continuation of DOC 734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734B .................................................................................. 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 733B .................................................................................. 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 733A ............................................................................... 3 credits

Doctoral Dissertation
This course is a continuation of DOC 733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.
knowledge of the analytical, planning, implementation, and evaluation processes necessary to implement the new and expanding technologies into the classroom and to promote technological competence in their administrations. In addition, learners will explore germinal and contemporary research in educational technology, instructional design, instructional media, and distance learning. The Educational Technology specialization is consistent with the University’s mission to educate working adults to achieve their professional goals and to improve the quality of education in their communities. The program is designed to emphasize educational leadership and to focus on applied research that improves the design, development, and integration of appropriate learning technologies into education, industry, and government.

**Program Goals**

Upon completion of all program requirements of the Educational Technology specialization of the Doctorate in Education in Educational Leadership degree, learners will be able to:

- Support and enhance the educational process through technological innovation
- Manage and lead organizational reform and transformation through strategic decision-making
- Design, develop, and implement technology solutions to enhance learning
- Balance the competing priorities of technology and curriculum based on research, theory, and experience
- Demonstrate strategies for life-long learning and continuous improvement of technological competence

**Program Structure**

The Ed.D/ET program has a 68-credit requirement that involves both residency and online modalities of instruction. The majority of the program will be delivered in an online, virtual classroom setting. In these courses, learners will work in a cohort of approximately 12 peers and be required to spend approximately 25 hours per week on required course work. Learners will attend 16 days in residency during the 3-year program. Year One begins with a 5-day residency; Year Two requires a 3-day residency; Year Three requires an 8-day residency. Attendance during all days of the residencies is mandatory. Please note that learners can expect residencies to occur during both week days and weekend days. The courses offered during residency sessions cover a variety of areas essential to the successful completion of this advanced degree program, including insights into dissertation preparation.

Additionally, in the third year residency, learners will apply their knowledge to a comprehensive, collaborative case study. This case study is the University’s vehicle for assessing programmatic learning. Because of the nature and value of the information presented in the residency environment, learners must attend all residency sessions.

The most important milestone of the Ed.D/ET degree is the successful completion and oral defense of a significant, substantial, and independently completed dissertation that adds new information to the body of educational leadership knowledge. The dissertation provides the learner an opportunity to demonstrate mastery of germinal and current literature and express their competence in applying learning to actual organizational issues. To ensure the quality of this effort, the program’s curriculum is designed to develop the student’s ability to create original solutions to complex issues and to carefully identify and apply the most appropriate research methodology for addressing these issues.

Because of the highly independent nature of the program, learners must be self-disciplined and exceedingly motivated to earn this degree. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/edd-et.

**EdD/ET Program Category Requirements**

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Doctoral Foundations, 4 total credits**

- COM 705 ~ ................................................................. 1 credit
- Communication Strategies
- SEM 700R ................................................................. 0 credits
- Doctoral Program Orientation Seminar
- LDR 711A ~ .............................................................. 3 credits
- Leadership Theory and Practice

**Foundations in Educational Leadership and Technology, 12 total credits**

- EDD 711 ~ ................................................................. 3 credits
- Social Contexts and Contemporary Issues
- CUR 711 ~ ................................................................. 3 credits
- Developmental and Learning Theories
- EDT 711 ~ ................................................................. 3 credits
- Educational Technology Research
- EDD 712~ ................................................................. 3 credits
- Leadership in Contemporary Organizations

**Research Foundations, 6 total credits**

- RES 711 ~ ................................................................. 3 credits
- Fundamental Principles of Sound Research
- RES 722A ~ ................................................................. 3 credits
- Research Design

**Advanced Research Design, 3 total credits**

- RES 723 ~ ................................................................. 3 credits
- Advanced Statistical Research Methods and Design
- RES 724 ~ ................................................................. 3 credits
- Qualitative Methods and Design

**Techniques and Practices in Educational Technology, 12 total credits**

- EDD 721 ~ ................................................................. 3 credits
- Planning and Leading Change
- EDT 721 ~ ................................................................. 3 credits
- Instructional Design
- EDT 722 ~ ................................................................. 3 credits
- Distance Learning
- EDT 723 ~ ................................................................. 3 credits
- Instructional Media and Design Techniques

**Doctoral Residencies, 10 total credits**

- PHL 700R ~ ................................................................. 3 credits
- Creative and Critical Thinking
- DOC 721R ~ ................................................................. 2 credits
Doctoral Seminar I
DOC 731R ~ ................................................................. 3 credits
Collaborative Case Study
DOC 732R ~ ................................................................. 2 credits
Doctoral Seminar III
DOC 740R ................................................................. 0 credits
Annual Renewal Residency
Advanced Inquiry in Educational Technology Leadership, 9 total credits
EDT 731 ~ ................................................................. 3 credits
System Analysis and Design
EDD 732 ~ ................................................................. 3 credits
Contemporary Policy Analysis and Development
EDT 732 ~ ................................................................. 3 credits
Integrating Technology and Curriculum
Advanced Research Analysis, 3 total credits
RES 725 ~ ................................................................. 3 credits
Descriptive and Comparative Data Analysis
RES 726 ~ ................................................................. 3 credits
Correlational Methods of Analysis
RES 727 ~ ................................................................. 3 credits
Approaches to Phenomenological Inquiry and Data Analysis
RES 728 ~ ................................................................. 3 credits
Qualitative Case Study
RES 729 ~ ................................................................. 3 credits
Ethnomethodology and the Study of Culture
RES 745 ~ ................................................................. 3 credits
Grounded Theory Methods
RES 746 ~ ................................................................. 3 credits
Mixed Methods
Dissertation, 9 total credits
DOC 722 ~ ................................................................. 3 credits
Doctoral Seminar II
DOC 733 ~ ................................................................. 3 credits
Doctoral Dissertation
DOC 734 ~ ................................................................. 3 credits
Doctoral Project IV
The following courses are not part of the required course of study; however, are available to students as an extension to satisfy the dissertation and project requirements for the doctoral program. Students have the option to complete the A or A and B courses for either DOC 733 and/or DOC 734 to ensure that all programmatic requirements and approvals have been met. Students who choose to pursue DOC 733A or DOC 734A must be awarded a letter grade from the faculty member for their final attempt at the "A" course. Students who proceed from DOC 733A or DOC 734A to DOC 733B or DOC 734B, respectively, must also be awarded a letter grade from the faculty member for their final attempt at the "B" course.

DOC 733 A and B~ ................................................................. 3 credits
Doctoral Dissertation
DOC 734 A and B~ ................................................................. 3 credits
Doctoral Project IV
Students may be required to complete DOC 733B and DOC 734B until all programmatic requirements and approvals have been met. In addition to fulfilling the Advanced Research Design and Advanced Research Analysis Program Requirements, you may select additional courses from the following if you have not satisfied the dissertation approval requirements upon completion of DOC 734: RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, and/or RES 729. You will be required to select and attend Doctoral Project courses from the list of courses outlined above until dissertation approval is granted. Doctoral Project courses may be designated as ELEC 723 or ELEC 725 on the initial course schedule. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the EdD/ET
All applicants are expected to meet the following admissions requirements:
- A graduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LL.M). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current or a record of past employment in supervisory or management position is required for admission.
- Applicants who completed high school/secondary school outside of the United States, in a country where English is not the official language, must meet the English language proficiency requirement for admission.

Academic Progression Requirements for the EdD/ET
Students are subject to the following academic progression requirements:
- Learners meeting a minimum GPA of 3.5 may concurrently enroll in courses not in the following areas: Year 1 coursework (must successfully complete DOC 721R or 13 credits earned in EDS program), research courses (RES prefix), residency courses, and EDS 799.
- Students may concurrently enroll in DOC 740R with any of the dissertation courses (DOC 733 A/B or DOC 734 A/B).
- All doctoral (including reentry students) students will be required to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning in one of the following manners.
  - Applicable undergraduate University of Phoenix coursework completed within 10 years with a grade of C or better
  - Applicable graduate University of Phoenix coursework completed within 15 years with a grade of C or better
  - An official transcript reflecting 3 credits of undergraduate or comparable coursework in research, statistics, or quantitative reasoning completed within 10 years with a grade of C or better.
  - An official transcript reflecting 3 credits of graduate coursework in research, statistics, or quantitative reasoning completed within 15 years with a grade of C or better.
• A minimum score of at least 149 for quantitative sections and a 4.25 on the analytical section of the GRE completed within the last 10 years.
• A passing score on the statistics entrance assessment. The assessment may only be taken twice.
• Students may have only one incomplete grade on their records at a time.
• Students must earn a grade of “B” or better in COM 705.
• Editorial Review after DOC 734 and prior to graduation.
• Quality final Institutional review of dissertation during DOC 734.
• Committee literature review prior to enrollment in DOC 734.
• Institutional Review Board approval prior to enrollment in advanced qualitative and quantitative analysis course (RES 725 - RES 729)
• Quality review of dissertation proposal to advance beyond DOC 731R.
• Successful completion of DOC 731R which serves as a qualifying examination course in the program.
• Students who would like to repeat DOC 740R may repeat the course.
• Enrollment in DOC 740R is required only when a student has not completed his or her dissertation within 12 months of completing their last group study course. The soonest a student can take DOC 740R is 6 months after completing the last group study course. Once students have completed DOC 740R, it does not need to be repeated unless the student chooses to take it again.
• Students who would like to repeat DOC 740R may repeat the course.

Academic Standing and Minimum Grade Requirements for the EdD/ET

• Students must earn a grade of “B” or better in COM 705 Communication Strategies. Students who earn less than a “B” will be scholastically disqualified and must repeat the course. COM 705 may be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• All credit-bearing courses, with the exception of COM 705, must be completed with a grade of “B-” or better. Students who earn a grade lower than “B-” must repeat the course until the minimum grade requirement is met.
• DOC 721R Doctoral Seminar I may only be repeated one time. Students who fail to meet the minimum grade requirement after the second attempt will be scholastically suspended and will not be able to continue in the program.
• Students who do not meet minimum grade requirements and maintain a minimum GPA of 3.00 will be placed on academic probation (AP) and will be subject to the University academic probation policy.

Degree Requirements for the EdD/ET

Students must meet the following degree requirements within the six (6) year program completion deadline established by the University:
• A minimum of 68 doctorate credits.
• A minimum grade point average (GPA) of 3.0.
• Satisfactory completion of all residencies.
• Written approval of the dissertation proposal.
• Satisfactory oral defense and written completion of the dissertation.
• The School of Advanced Studies (SAS) will allow Doctoral students, who have satisfied all program requirements with the exception of their dissertation, a one (1) year graduation deadline extension to allow additional time for dissertation completion. Students requesting an extension must submit a letter from their mentor stating that they have demonstrated satisfactory progress and completion of the dissertation is probable if a one (1) year extension is granted. Approval of the one (1) year extension must be granted by a Doctoral Program Chair.
• Students must satisfy all credit and non-credit bearing activities prior to commencement eligibility.
• The diploma awarded for this program will read as: Doctor of Education and will not reflect the specialization. Specializations are reflected on the transcript only.

Residency Requirements and Course Waivers for the EdD/ET

Students must meet the following residency requirements:
• Completion of physical residencies.
• Five-day residency at the beginning of the program.
• Three-day residency at the beginning of year two.
• Eight-day residency at the beginning of year three.
• If a student’s dissertation has not been completed and approved by the dean within 12 months of achieving candidacy, he or she must attend DOC 740R, a non-credit, three-day weekend residency course. Candidacy begins when a student has completed all coursework except DOC 733 and DOC 734.
• Students may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
• In order to be granted a waiver with credit for a course in the required course of study, students must have completed a previous course that meets the following criteria:
  • The course must have been completed and transcripted from a regionally, approved nationally, or provincially accredited college or university or one in candidacy for accreditation.
  • The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  • The course may be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following courses may not be waived: COM 705, DOC 721R, DOC 722, DOC 731R, DOC 732R, DOC 733, DOC 734, DOC 740R, EDT 721, EDT 732, PHL 700R, RES 723, RES 724, RES 725, RES 726, RES 727, RES 728, RES 729, SEM 700R
• The dissertation may not be waived.

Course Descriptions for the EdD/ET

COM 705 .................................................................................................1 credit

Communication Strategies

This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/
doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.

SEM 700R ................................................................. 0 credits

**Doctoral Program Orientation Seminar**
SEM 700R is designed to promote active doctoral-level inquiry and reinforce the School of Advanced Studies’ integrated scholarship, practice, and leadership approach. During SEM/700R, students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, and community building.

**Leadership Theory and Practice**
This course provides an opportunity for students to examine leadership from various theoretical and practical perspectives in historical and contemporary contexts. Students will identify and develop leadership skills to enhance their role as a scholar, practitioner, and leader within their organizations.

EDD 711 ................................................................. 3 credits

**Social Contexts and Contemporary Issues**
This course focuses on the historical concepts, demographic trends, and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.

CUR 711 ................................................................. 3 credits

**Developmental and Learning Theories**
Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.

EDT 711 ................................................................. 3 credits

**Educational Technology Research**
This course explores research on learning with technology. Focal areas include learner control, media preference, motivation, collaborative learning, and computer-mediated communication. Learners formulate conclusions based on refereed studies and consider the relationship between research design and questions.

EDD 712 ................................................................. 3 credits

**Leadership in Contemporary Organizations**
This course explores organization theory, culture, and change. The influence of leadership on the organization is examined in depth. The different functions of administration, management, and leadership are of focus.

RES 711 ................................................................. 3 credits

**Fundamental Principles of Sound Research**
RES 711 emphasizes epistemologies and ontologies of research, along with similarities and differences between the major research approaches. Learners will develop an understanding of the foundations and origins of research, the nature of research, paradigms underlying different major research approaches, the process of research, quantitative and qualitative research basics, and critical issues in conducting research.

RES 722A .............................................................. 3 credits

**Research Design**
This course is designed to provide students with an overview of qualitative and quantitative research approaches and the application to work in different types of organizational and institutional settings. Various qualitative and quantitative research designs are discussed. Students learn about the elements of a research plan and how to develop and align them within a given research method and design to address a given problem in their field of study.

RES 723 ................................................................. 3 credits

**Advanced Statistical Research Methods and Design**
The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.

RES 724 ................................................................. 3 credits

**Qualitative Methods and Design**
This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students’ understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.

EDD 721 ................................................................. 3 credits

**Planning and Leading Change**
This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.

EDT 721 ................................................................. 3 credits

**Instructional Design**
This course focuses on the principles of instructional design including a survey of instructional design models. Using the overarching ADDIE process learners will relate each of the five design phases to an educational goal. From their analyses, learners will justify the use of an instructional design model and produce a course-level unit.

EDT 722 ................................................................. 3 credits

**Distance Learning**
This course traces the development of distance learning, including past, present, and future trends. Learners will relate social contexts and educational goals to the evolution of technologies and their intended support of learning. Learners will explore the delivery of instruction over physical distance, focusing on concepts such as transactional distance, cultural considerations, anonymity, privacy, and accountability. Team learning is heavily emphasized and applied in this course.

EDT 723 ................................................................. 3 credits

**Instructional Media and Design Techniques**
Learners will apply instructional design principles in the development of electronic media. Learners explore delivering instruction through multimedia and/or multiple modalities with a focus on matching appropriate technologies to learning outcomes. Design principles include the effects of contrast, continuity of text and graphics, relevancy of graphics to text, and alignment.

PHL 700R ............................................................. 3 credits

**Creative and Critical Thinking**
This course helps learners understand the purpose of inquiry and
the wide spectrum of epistemological assumptions and values that underlie scholarly research and the definitions and uses of knowledge in the workplace. Learners clarify their individual philosophies regarding the definition, purpose, acquisition, and application of knowledge through an exploration of diverse theoretical approaches to the nature of knowledge and cognition and representative concrete examples of the application of epistemology to various professions, management theories, and fields of human endeavor.

**DOC 721R** ................................................................. 2 credits

**Doctoral Seminar I**

This 3-day residency course begins the formal development of the learner’s dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner's dissertation. This course will incorporate learners from various doctoral programs/disciplines.

**DOC 731R** ................................................................. 3 credits

**Collaborative Case Study**

This 5-day residency course is designed to develop strategies for effective and appropriate integration of digital technology and educational goals. Learners explore the possibilities enabled by technology, the perceived need to master technologies for vocational readiness, and the design of technological implementations that enhance educational experiences. A running theme of this course is balancing the competing priorities of technology and curriculum decisions.

**DOC 728 ........................................................................... 3 credits**

**Annual Renewal Residency**

This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/728. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.

**EDT 731 ........................................................................... 3 credits**

**System Analysis and Design**

This course follows the phases of needs analysis, planning, implementation, and evaluation that are integral to large-scale instructional technology projects. Learners consider vendor selection, organizational constraints, maintenance, and enhancements in an effort to address learners' present and future needs. Learners focus on developing systemic solutions that avoid the pitfalls of piece-meal technology adoptions.

**EDD 732 ........................................................................... 3 credits**

**Contemporary Policy Analysis and Development**

This course provides an overview of contemporary education policy analysis and development. The Federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.

**EDT 732 ........................................................................... 3 credits**

**Integrating Technology and Curriculum**

This course is designed to develop strategies for effective and appropriate integration of digital technology and educational goals. Learners explore the possibilities enabled by technology, the perceived need to master technologies for vocational readiness, and the design of technological implementations that enhance educational experiences. A running theme of this course is balancing the competing priorities of technology and curriculum decisions.

**RES 725 ........................................................................... 3 credits**

**Descriptive and Comparative Data Analysis**

This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hotelling’s T, MANOVA and related techniques. Depending on the learners’ needs other approaches may be covered.

**RES 726 ........................................................................... 3 credits**

**Correlational Methods of Analysis**

This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners’ needs other approaches may be covered.

**RES 727 ........................................................................... 3 credits**

**Approaches to Phenomenological Inquiry and Data Analysis**

This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.

**RES 728 ........................................................................... 3 credits**

**Qualitative Case Study**

This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.
RES 729 ................................................................. 3 credits

**Ethnomethodology and the Study of Culture**

In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g., observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on "thick description" as a critical mode of representation.

RES 745 ................................................................. 3 credits

**Grounded Theory Methods**

This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.

RES 746 ................................................................. 3 credits

**Mixed Methods**

The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed-method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches -- and their blending -- to actually design and conduct meaningful doctoral level research.

DOC 722 ................................................................. 3 credits

**Doctoral Seminar II**

This is a mentor-guided course designed to focus on preparing the dissertation proposal for approval. During this course, the learner’s prospectus will be applied to the development of a proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, human subjects research requirements, and submission timelines.

DOC 733 ................................................................. 3 credits

**Doctoral Dissertation**

This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.

DOC 734A ............................................................. 3 credits

**Doctoral Project IV**

This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOC 734 ................................................................. 3 credits

**Doctoral Project IV**

This is a continuation of DOC 734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

PROFESSIONAL PROGRAMS

CREDIT-BEARING CERTIFICATE PROGRAMS

The University of Phoenix offers Professional Certificate programs to organizations and individuals with professional development or specialized training needs. The programs effectively blend theory and practice, enabling the individual to rapidly become a more effective manager or specialist. Certificate programs are currently available in several fields: technology, education, call center professional, human resource management, health care, and project management.

A Credit Bearing Certificate program is one that bears University of Phoenix credits. Credit Bearing Certificate programs are developed and maintained by the Dean of each College.

Admission Requirements

All applicants are expected to meet the following admission requirements:

• A completed and signed certificate application and application fee

• Applicants whose native language is not English must have either:
  • achieved a minimum score of 213 on the computer-based test (cBT), or a score of 79 on the internet-based test (iBT), or a score of 550 on the written-based test (wBT) on the Test of English as a Foreign Language (TOEFL) within two years of application to the University.

  -or-
  • achieved a minimum passing score of 750 on the Test of English as an International Communication (TOEIC) within two years of application to the University.

  -or-
  • achieved a minimum passing score of 6.5 on the test of the International English Language Testing System (IELTS) within two years of application to the University.

  -or-
  • achieved a minimum score of 69 on the Berlitz Online Test of Reading and Listening Skills - English or a minimum score of 550 on the Berlitz Online English Proficiency Exam within two years of application to the University.

  -or-
  • successful completion of the approved ESL series of courses completed at: Canadian College of English Language (CCEL), International Language Schools of Canada (ILSC) or Kaplan.

  -or-
  • achieved a minimum score of 59 on the Pearson Test of English Academic Exam within two years of application to the University.

• The following may exempt a non-native speaker from having to take the TOEFL/TOEIC/IELTS, however official documentation may be required:

• The applicant has successfully completed thirty (30) transferable, academic semester credits at a regionally or nationally accredited college or university in the United States.

• The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized college or university in a country in which English is the official language.

• The applicant has successfully completed the equivalent of thirty (30) transferable, academic semester credits at a recognized institution where English is the medium of instruction.

• The applicant has previously earned, prior to applying for admission to the University of Phoenix, a U.S. high school diploma or G.E.D. Applicants that list any language other than English as their native language on the admission application and G.E.D is taken, must submit a copy of the G.E.D to verify it was taken in the English version format.

• The applicant has earned the equivalent of a U.S. high school diploma in a country in which English is the official language.

• The applicant has earned the equivalent of a U.S. high school diploma at an institution where English is the medium of instruction.

• Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program.

• Applicants who reside in the United States must meet one of the following requirements:
  • Be a legal resident of the United States
  • Have been granted permanent residency
  • Have a valid visa that does not prohibit educational studies
  • Have been granted temporary protected status and has been verified through Citizenship and Immigration Service that the country is eligible for TPS status at the time of application sign date. Student must list TPS as the visa type on the admissions application in order for US to verify TPS status.
  • Have been granted asylum or refugee status.

• Applicants who reside in Canada must meet one of the following requirements:
  • Be a legal resident of Canada
  • Be a landed immigrant
  • Have a valid visa that does not prohibit educational studies
  • A signed Enrollment/Disclosure Agreement.
  • Completion of any state-specific required documents or forms.

• Applicants who have been expelled from other institutions are not eligible for admission to University of Phoenix.
Students who have been expelled from University of Phoenix are not eligible for readmission to University of Phoenix. No appeals will be accepted.

Students are subject to all other University policies and procedures and additional requirements may be applied to specific programs at the discretion of the Dean. Students who begin their studies at campuses located in the states listed below are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

Students attending a local campus in Oklahoma must provide written documentation of vaccinations or immunity against Hepatitis B, measles, mumps, and rubella (MMR). Students must demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Students attending a physical campus in the state of Tennessee are required to submit a Hepatitis B Waiver form to the University. Students attending a local campus in the states listed below are required to submit health insurance information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

Full and part-time students enrolled in a college, university or other institution of higher learning in Massachusetts must participate in a school sponsored health insurance plan, or an alternate plan with comparable coverage. All full and part-time students attending a Massachusetts local campus must complete the Student Health Insurance Plan Enrollment/Acknowledgement form indicating either that they have either enrolled in the University’s sponsored plan or that they decline participation in the University sponsored plan as they have comparable health insurance coverage. Students must complete and submit this form prior to enrolling in any class. Students who do not complete the Enrollment/Acknowledgement form each calendar year may not enroll in further courses until the form has been completed and the student has appropriate health insurance coverage.

Students who begin their studies at campuses located in Hawaii are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

The Hawaii State Department of Health requires that all students attending school at a campus in this state shall provide a Certificate of TB Examination issued in the United States within 12 months prior to their first attendance in a post-secondary school in Hawaii. A completed Certificate of TB Examination shall be submitted prior to the first night of class or the student will not be permitted to attend class. Students shall complete Section A of this form, or submit a copy of their TB Clearance Certification received prior to their attendance at another Hawaii post-secondary school. Students residing in the state of Connecticut are required to submit immunization information to the University. The state appropriate forms must be completed and sent to Office of Admissions & Records.

In accordance with Section 10a-155 of the Connecticut general statutes, all full time or matriculating students will be required to demonstrate proof of adequate immunization against measles, mumps, rubella (MMR) and varicella as recommended by the Advisory Committee for Immunization Practices (ACIP). For more specific state information, refer to the link below. Students shall demonstrate compliance with the immunization requirement prior to the first attendance in a university course and documentation concerning this requirement must be on file at the time of admission to the university.

Exemptions from the MMR and varicella immunization requirements may be granted for the following reasons:

- The student was born before January 1, 1957 (applicable to MMR vaccine only).
- The student was born in the United States before January 1, 1980 (applicable to the varicella (chicken pox) vaccine only)
- The student has documentation from a physician stating that it is medically advisable to receive the vaccines for the one or more of the diseases as indicated on the immunization form.
- The student has documentation from a physician or director of health that he/she has had a confirmed case of one or more of the diseases as indicated on the immunization form.
- The student has laboratory confirmation of immunity to the disease(s) as indicated on the immunization form.
Online classroom at Online rates if the program is available via the states. Students may want to consider completing certain courses in the and other factors. Not all programs may be available to all residents of all Phoenix campus locations: Online, depending on state of residence. The following certificate program may be offered at these University of Phoenix locations:

**Project Management**

The following certificate program may be offered at these University of Phoenix locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The project management course sequence focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at [http://www.phoenix.edu/programs/pm](http://www.phoenix.edu/programs/pm).

The University reserves the right to modify the required course of study.

**General Information**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding “Certificate Track” bachelors program. Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the PM**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

**Certificate Completion Requirements for the PM**

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Project Management
Residency Requirements and Course Waivers for the PM

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course in the required course of study may not be waived: CPMGT 305

Course Descriptions for the PM

CPMGT 300.................................................................3 credits

Project Management

This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

CPMGT 301 .................................................................3 credits

Strategic Portfolio and Project Management

This course provides students with insight into the management of an organization’s strategic project portfolio. Students will learn the value of aligning a project’s goals and objectives with the organization’s strategies and stakeholders’ interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.

CPMGT 302 .................................................................3 credits

Procurement and Risk Management

This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.

CPMGT 303 .................................................................3 credits

Project Estimating and Control Techniques

To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.

CPMGT 304 .............................................................................3 credits

Leading Projects in Organizations

This course provides students with an overview of organizational behavior as it relates to project management. It introduces various techniques and processes that will help students develop effective communication and interpersonal skills to successfully manage project teams. In addition, numerous leadership and motivation theories are presented as well as techniques that minimize stress in the project environment. Furthermore, project decision-making processes and techniques that facilitate effective and efficient project change management are addressed in this course. Students will also examine the influence of globalization, technology, and future trends in project management.

CPMGT 305 .............................................................................3 credits

Project Management Capstone

This course is the capstone of the Professional Certificate in Project Management. Students will demonstrate project management skills learned via the preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in the prior five courses will be integrated and applied to the class project.

Sales Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Sales Management certificate program provides students with the knowledge and skills necessary to build, retain, and manage a highly effective sales force. This certificate emphasizes skill development in the sales process, business-to-business sales strategies and best practices, consumer behavior and customer relationship management, and the role of a sales manager in leading a highly productive sales force. Upon completion of this certificate, students will possess the tools needed to manage sales objectives as they relate to achieving organizational success.

- The following course may not be waived: MKT 360

Critical Skills in Management

This course provides students with fundamental knowledge and skills necessary to make important management decisions. This course places emphasis on general managerial knowledge and skills required for effective personal, interpersonal, and group leadership regarding the direction of daily business affairs in a global business environment.

Business-to-Business Sales Management

This course provides students with an understanding of the business-to-business selling relationship and the challenges associated with maintaining these relationships. After the completion of this course, students will be able to describe the complexities of business-to-business selling relationships, create numerous presentations to address the variety of audiences in the business-to-business setting, examine legal issues associated with business-to-business selling, and evaluate the ethical considerations of relationship building behavior within a business-to-business sales relationship.
LDR 300 ................................................................. 3 credits

Innovative Leadership
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MKT 435 ................................................................. 3 credits

Consumer Behavior
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 445 ................................................................. 3 credits

Sales, Tools and Strategies
This course is an examination of the basic principles involved in the sales process, the relationship between sales and marketing, sales force structure, and Customer Relationship Management (CRM). Emphasis is placed on product pricing, managing the sales force, forecasting market demand, and relating sales goals to marketing goals.

MKT 468 ................................................................. 3 credits

Customer Relationship Management
This course provides students with an understanding of the importance of building and enhancing customer relationships by utilizing best practices and customer relationship management strategies. After completion of this course, students will be able to summarize market segmentation methods, evaluate the strategies of customer acquisition and retention, identify effective customer service techniques, and understand the use of relational databases and customer relationship management software in maintaining customer loyalty.

Human Resource Management

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Certificate Program in Human Resource Management provides education in areas which the human resource professional faces daily; from legal matters to staff recruitment and development. This program is designed for those who have functional responsibility to carry out the duties of an organization’s human resource department; seasoned human resource staff members wishing to keep current; newcomers to the field requiring new knowledge and skills; and specialists wanting to broaden their knowledge.

Major topic areas covered include the role of human resources, employment practices, employee and labor relations, compensation, benefits, safety and health, and employee development. Participants acquire knowledge and skills that are essential in addressing the challenges of the human resource profession.

- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
Employment Law

Course Descriptions for the HRM

Total Compensation
This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 420 .................................................................................. 3 credits

Human Resource Risk Management
This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 326 .................................................................................. 3 credits

Employee Development
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 498 .................................................................................. 3 credits

Strategic Human Resource Management and Emerging Issues
This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

Supply Chain Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Supply Chain Management certificate highlights the important role a supply chain plays in organizational performance and efficiency. The program emphasizes the need to develop and maintain a sustainable competitive advantage through the efficient and effective performance of all supply chain activities. Students will be able to examine logistic management processes, determine appropriate purchasing and procurement strategies, identify elements of an effective supply chain information management system, and evaluate lean enterprise processes to improve organizational efficiency.

ISCOM 370 ............................................................................... 3 credits
Strategic Supply Chain Management
This course will provide an overview of the strategic elements and functional relationships within manufacturing and service supply chains. Emphasis is placed on the integration of strategic planning, sourcing, operations, and logistics to achieve a sustainable competitive advantage.

ISCOM 352 ............................................................................... 3 credits
Logistics Management
This course provides an overview of logistics management within a supply chain operation. This includes an analysis of different modes of transportation, logistics management within the United States, and logistics management in the global market. Special emphasis is placed on transportation and fleet management elements including operations management, information technology, decision support systems, fuel savings strategies, and reverse logistics considerations.

ISCOM 476 ............................................................................... 3 credits
Integrated Supply Chain Applications
Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

- The following course may not be waived: ISCOM 476

Final Examinations:
All required certification courses must be completed and a final examination must be passed. The University reserves the right to determine whether a final examination is required for any course.

Additional Admission Requirements for the CERT/SCM
- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HSET examination with a passing score.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/SCM
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Supply Chain Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/SCM
- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
Purchasing and Procurement
This course addresses the relationship between supply chain management and procurement. This includes overview of both the procurement process and commodity markets. Students will address procurement from a strategic perspective as well as at the operational level.
ISCOM 424 ....................................................................................... 3 credits

End-to-End Supply Chain Management
This course prepares students to be effective managers in end-to-end supply chain management. This refers to tracking all segments of the supply chain beginning with capturing customer requirements to customer consumption and disposal. Special emphasis is placed on enhancing supply chain efficiencies through problem-solving methodologies including Six Sigma, Lean management. Students will also apply the principles of Supplier Relationship Management (SRM) and Customer Relationship Management (CRM) to make effective end-to-end supply chain decisions.
ISCOM 472 ....................................................................................... 3 credits

Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection, and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.
ISCOM 473 ....................................................................................... 3 credits

Global Sourcing and Procurement
This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.

Small Business Management and Entrepreneurship Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Small Business Management and Entrepreneurship certificate provides students with an understanding of small business planning, financial management, and integrated business topics on entrepreneurship and small business management. Upon completion of this program students will be able to examine small business marketing opportunities, identify innovative small business strategies, evaluate financial management decisions, and address the challenges and opportunities specific to small business management and entrepreneurship.
Courses requiring prerequisites are identified by a ~ symbol following the course number.

  • The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
• The following course may not be waived: MGT 465

**Course Descriptions for the CERT/RETM**

**MGT 312** ...............................................................3 credits

**Organizational Behavior for Managers**

This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.

**MGT 401** ...............................................................3 credits

**The Small Business: Structure, Planning and Funding**

This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

**MGT 465** ...............................................................3 credits

**Small Business and Entrepreneurial Planning**

This course focuses on the development of a strategic business plan applicable for the needs of a small business or entrepreneurial venture. This will include the strategic and integrative application of financial planning, capital management, marketing, people management, and leadership. Special emphasis is placed on adapting business planning requirements to the realistic needs of small business owners and entrepreneurs.

**FIN 375** ...............................................................3 credits

**Financial Management in the Small Business**

This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.

**LDR 300** ...............................................................3 credits

**Innovative Leadership**

This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

**MGT 418** ...............................................................3 credits

**Evaluating New Business Opportunities**

This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

**MKT 431** ...............................................................3 credits

**Small Business Marketing**

Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.

**OI 361** ...............................................................3 credits

**Innovation, Design, and Creativity for a Competitive Advantage**

This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.

**OI 370** ...............................................................3 credits

**Innovation for the 21st Century**

This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

**Retail Management Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Retail Management certificate focuses on the retail management environment. The concentration emphasizes skill development in customer service management, sales and marketing, supply management, retail operations, merchandising, and personnel management unique to the retail industry. Upon completion of this concentration, students will possess the knowledge and skills necessary to be leaders in the retail industry.

**Required Course of Study for the CERT/RETM**

This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, infor-
mation technology resources, and operational components for effective decision making.
MGT 420 .............................................................................. 3 credits
Managing Quality in the Supply Chain
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.
ISCOM 374 .............................................................................. 3 credits
Integrated Logistics Management
This course prepares students to strategically plan, implement, and control the efficient and effective flow and storage of goods, service, and related information from a point-of-origin to a point-of-consumption. This course also focuses on transportation, inventory management, warehousing, and customer services.
BIS 375 .................................................................................. 3 credits
Supply Chain Information Management in Online Environments
This course introduces students to the theory and practice of conducting supply chain functions over the Internet. It addresses various business strategies for buying, selling, or exchanging products, services, and information via computer networks. Legal and ethical requirements for handling supply chain business over the Internet are addressed.
ISCOM 361 .............................................................................. 3 credits
Purchasing and Procurement
This course addresses the relationship between supply chain management and procurement. It includes overview of both the procurement process and commodity markets. Students will address procurement from a strategic perspective as well as at the operational level.
ISCOM 383 .............................................................................. 3 credits
Global Value Chain Management
This course describes value chain activities between buyers and sellers in international business. Emphasis is placed on global sourcing, procurement of materials and services, and on business-to-business cultural differences between countries.
ISCOM 386 .............................................................................. 3 credits
Service Operations Management
The course presents structured techniques for evaluating operating efficiency and effectiveness in the service sector. Special emphasis is placed on key service principles. Students learn how to manage service operations through a series of case studies and applications, inventory control, waiting time management, project management, site selection, performance evaluation, and scoring systems.
ISCOM 472 .............................................................................. 3 credits
Lean Enterprise
This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection, and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.
Marketing Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Marketing certificate addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market, the pricing of products and services, and how to respond to growing demands in different countries and cultures. The program builds upon the foundational marketing course and allows further study in the areas of consumer behavior, marketing research, public relations, product and brand management, and small business marketing. Marketing managers need creative, analytical, and leadership abilities to manage the marketing function of the business enterprise.

- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read: Hospitality Management (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/HPM**

- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: HM 475

**Course Descriptions for the CERT/HPM**

- MGT 312 ........................................ 3 credits
  Organizational Behavior for Managers
  This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.
- HM 370 ........................................ 3 credits
  Hospitality Management
  This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.
- HM 475 ........................................ 3 credits
  Hospitality Decision Analysis
  This capstone course integrates the principles and concepts of hospitality operations management. Upon completion of this course, students will be able to prepare a service delivery model, conduct financial analyses, and develop sales and marketing strategies within a hospitality organization.
- BIS 303 ........................................ 3 credits
Managing Information Technology in the Hospitality Industry
This course provides a managerial overview of information technology in the hospitality industry. Special emphasis is placed on utilizing information technology systems such as POS, inventory tracking, and reservation networks to make managerial and strategic decisions for the organization.
HM 486 ...................................................................................3 credits

Trends and Emerging Issues in Hospitality
This course applies a strategic perspective to assessing new trends and emerging issues in hospitality management. Special emphasis is placed on applying a global perspective to new and emerging markets in the hospitality industry. This includes consideration of changing social and economic groups as well as shifting demand for existing and new products and services.
ISCOM 386 .................................................................3 credits

Service Operations Management
The course presents structured techniques for evaluating operating efficiency and effectiveness in the service sector. Special emphasis is placed on key service principles. Students learn how to manage service operations through a series of case studies and applications, inventory control, waiting time management, project management, site selection, performance evaluation, and scoring systems.
MGT 314 ...........................................................................3 credits

Hospitality Entrepreneurship
This course provides an overview of the managerial and entrepreneurial skills needed to operate and manage a small business in the hospitality industry. Special emphasis is placed on business plan-ning, marketing, financial management, and the regulatory environment.
MGT 485 ...........................................................................3 credits

Risk Management in the Hospitality Industry
This course provides a framework for assessing risk from the hospitality management perspective. Students will evaluate various risk evaluation tools as appropriate for different components of the hospitality industry. Special emphasis is placed on assessing the risk, the risk management process, risk evaluation, preventative planning.
MKT 444 ...........................................................................3 credits

Hospitality Marketing
This course applies the general tools of marketing to the specific needs of the hospitality management industry. Special emphasis is placed on the global, regional, individual, and ethical considerations when building customer-relationships through marketing.

Human Resource Management Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Human Resource Management certificate prepares students to develop an understanding of the fundamentals of human resource management and its strategic relevance in business. The program addresses the legal and ethical components of the decision making process involved in the human resources environment. Students will also develop an understanding of the critical business implications for human resource professionals today and in the future. HR practitioners and managers must be equipped with a solid understanding of the fundamentals of human resource management, along with strong skills in the areas of systems thinking, problem solving, influencing, negotiating, communications, and leadership. This program is consistent with generally accepted human resource management principles, including the professional certification knowledge areas.

Additional Admission Requirements for the CERT/HRM

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/HRM

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
The certificate awarded for this program will read as:

Human Resource Management (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/HRM**

- Students must meet established University residency requirement for certificate conferment. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The following course may not be waived: HRM 498

**Course Descriptions for the CERT/HRM**

**Fundamentals of Human Resource Management**

This course explores the critical role of human achieving resources in business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 300 ................................................................. 3 credits

**Employment Law**

This course provides an overview of federal statutes and state regulated areas that impact the personnel function. Among the topics addressed are EEC and Affirmative Action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (poliography testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

HRM 324 ................................................................. 3 credits

**Total Compensation**

This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.

HRM 420 .................................................................. 3 credits

**Human Resource Risk Management**

This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will include health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 326 ................................................................. 3 credits

**Employee Development**

This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

HRM 498 ................................................................. 3 credits

**Strategic Human Resource Management and Emerging Issues**

This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.

**General Management Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Management certificate emphasizes managing human and fiscal resources within the structure, culture, and missions of any organization. The program provides students with the opportunity to examine the areas of innovation in business, human resource management, change management, organizational negotiations, and strategic management. Students will integrate advanced topics in management through real-world business application. Courses requiring prerequisites are identified by a ~ symbol following the course number.

HRM 300 .................................................................... 3 credits

**Fundamentals of Human Resource Management**
This course explores the critical role of human achieving resources in business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.

HRM 326 .................................................................... 3 credits

**Employee Development**
This course explores the role and relevance of employee development in today’s business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.

ISCOM 305 ............................................................ 3 credits

**Systems Operations Management**
This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.

ISCOM 370 ............................................................ 3 credits

**Strategic Supply Chain Management**
This course will provide an overview of the strategic elements and functional relationships within manufacturing and service supply chains. Emphasis is placed on the integration of strategic planning, sourcing, operations, and logistics to achieve a sustainable competitive advantage.

LDR 300 .................................................................... 3 credits

**Innovative Leadership**
This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.

MGT 317 .................................................................... 3 credits

**Critical Skills in Management**
This course provides students with fundamental knowledge and skills necessary to make important management decisions. This course places emphasis on general managerial knowledge and skills required for effective personal, interpersonal, and group leadership regarding the direction of daily business affairs in a global business environment.

MGT 401 .................................................................... 3 credits

**The Small Business: Structure, Planning and Funding**
This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

MGT 411 .................................................................... 3 credits

**Innovative and Creative Business Thinking**
This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and
Practice and draw upon examples from multiple industry sectors.

**MGT 418** ................................................................. 3 credits

**Evaluating New Business Opportunities**
This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.

**MGT 420** ................................................................. 3 credits

**Managing Quality in the Supply Chain**
This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer-driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.

**MGT 426** ................................................................. 3 credits

**Managing Change in the Workplace**
This course provides an overview of methods and techniques required of supervisory and management personnel responsible for managing change. As a result of the course, students will be able to identify and develop strategies for managing the following: organizational aspects of change, including shifts in leadership, reorganizations, working conditions, technology imposed change and workforce issues. In addition to developing strategies, students will gain expertise in applying communication strategies that effectively deal with change.

**MKT 445** ................................................................. 3 credits

**Sales, Tools and Strategies**
This course is an examination of the basic principles involved in the sales process, the relationship between sales and marketing, sales force structure, and Customer Relationship Management (CRM). Emphasis is placed on product pricing, managing the sales force, forecasting market demand, and relating sales goals to marketing goals.

**MKT 448** ................................................................. 3 credits

**Web Analytics for Digital Marketing**
This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.

**OI 361** ................................................................. 3 credits

**Innovation, Design, and Creativity for a Competitive Advantage**
This course will provide students with a solid foundation in innovation, design, and creativity. Additionally, students will be prepared to apply relevant principles, tools, and techniques to promote and sustain organizational innovation for competitive advantage.

**OI 370** ................................................................. 3 credits

**Innovation for the 21st Century**
This course covers the impact of innovation on organizations. In this course students will apply innovation strategies, processes, and theories to help propel an organization into the 21st century. Topics will include managing innovation process, organizational culture for innovation, and leadership of innovation.

**MGT 445** ................................................................. 3 credits

**Organizational Negotiations**
This course provides an overview of negotiations in an organizational setting. Students will learn negotiation processes and strategies, the role of stakeholder interests in negotiation, and how to apply the concepts to the workplace. Students will also examine conflict management techniques as well as emerging negotiation trends in globalization and technology.

**MUS 320** ................................................................. 3 credits

**The Music Business Today**
Guided by music industry luminary Randy Jackson, this course begins by introducing the song as the foundational component of today’s music business model. Each week, students are exposed to the key elements of the music business with emphasis on case studies, industry roles, the role of revenue flows, and the current use and impact of technology. The course provides students with a firm grasp of the realities of today’s music industry. Students complete relevant individual and learning team activities that prompt them to consider how they might engage with the music industry’s ecosystem.

**Project Management Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

Business Information Systems

This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.

Accounting for Decision Making

This course concentrates on effective decision making as it relates to financial activities in a business enterprise. Course topics will include financial assets, liabilities, equity, business operations, financial management, and financial statement analysis. Students will have the necessary analytical tools to enhance business operations.
### Systems Operations Management
This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.

FIN 419 ................................. 3 credits

### Finance for Decision Making
This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.

MGT 448 ................................. 3 credits

### Global Business Strategies
The managers perspective in the fields of international payments, international trade, and investment are analyzed. Emphasis is given to the materials and concepts that illuminate the strategies, structure, practices and effects of multinational enterprises.

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Bookkeeping Fundamentals Certificate focuses on the role of accounting in business and management. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

### Additional Admission Requirements for the CERT/BKPN
Applicants must be at least 16 years of age at the time of application.

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Demonstration of basic skills proficiency in mathematics. Students have the following options to satisfy this requirement:
  - Students must pass the Praxis I exam at the cut score determined by the School of Business (Math - 170).
  - Students must pass the Praxis I exam at the cut score determined by the School of Business (Math - 170).
  - Students must pass the SAT at the cut scores determined by the School of Business (Math - 170).
  - Students must pass the ACT at the cut scores determined by the School of Business (Math - 170).
  - Transfer credit may be used by students who have achieved a C- or better in a college algebra or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - Achieve a passing score eligible for credit on an approved mathematics related National Testing Program. Current Approved National Testing Programs are:
    - CLEP Examination
      - College Mathematics
      - College Algebra
      - Prealgebra
      - Calculus
    - DANTES Examination
      - Principles of Statistics
      - Business Mathematics
    - Advanced Placement Examination
      - Calculus AB
      - Calculus BC
      - Statistics
    - Achieve a passing score on the School of Business math readiness exam (MyMathTest Assessment - 70%).
    - Successful completion (passing grade) of University of Phoenix mathematics course MAT 116, equivalent or higher.

### Certificate Completion Requirements for the CERT/BKPN
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
• Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• The certificate awarded for this program will read as: Bookkeeping Fundamentals (Undergraduate)

Residency Requirements and Course Waivers for the CERT/BKPN
Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/BKPN
BIS 220 ................................................................................... 3 credits

Introduction to Computer Applications and Systems
This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office™ tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.
QNT 275 ................................................................................... 3 credits

Statistics for Decision Making
This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for statistical inferences, produce tables and charts to organize and display qualitative and quantitative business data, interpret numerical business data using measures of central tendency and dispersion, apply fundamental concepts probability theory for inerential decision making for business, and perform a linear regression for trend analysis.

BCOM 230 ................................................................................... 3 credits

Business Communication for Accountants
This course introduces students to the foundations of communication in a business accounting setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications to the accounting field. Students will develop skills in the forms of written communication, including memos, emails, business letters, and reports. Other topics include communication ethics, collaboration, information utilization, critical thinking, and professional competence and values.

MKT 300 ................................................................................... 3 credits

Accreditation Policy
The university reserves the right to change the course requirements. The final decision on course requirements rests with the Board of Trustees. Students earning this certificate en-route to completion of a degree program with a GPA below the minimum requirement must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral. The certificate awarded for this program will read as: Bookkeeping Fundamentals (Undergraduate)

Required Course of Study for the CERT/DMKT

MKT 421 ................................................................................... 3 credits

Principles of Accounting I
This course covers the fundamentals of financial accounting as well as the identification, measurement, and reporting of the financial effects of economic events on an enterprise. Students will learn to examine financial information from the perspective of management. Other topics include decision-making, planning, and controlling from the perspective of a practicing manager.

MGT 230 ................................................................................... 3 credits

Management Theory and Practice
This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.

ACC 291 ................................................................................... 3 credits

Principles of Accounting II
This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.

Digital Marketing Certificate (Undergraduate)

- The following course may not be waived: MKT 498

Course Descriptions for the CERT/DMKT

MKT 421 ................................................................. 3 credits
Marketing
This course involves an integrated analysis of the role of marketing within the total organization. Specific attention is given to the analysis of factors affecting consumer behavior, the identification of marketing variables, the development and use of marketing strategies, and the discussion of international marketing issues.

MKT 440 ................................................................. 3 credits
Fundamentals of Digital Marketing
This course provides a high-level view of the impact of technology on the marketing of goods and services. After completion of this course, students will be able to understand the structure of the Internet, compare and contrast strengths and weaknesses of various digital marketing tools, identify common terminology used in digital marketing, analyze ethical issues in public presentation of information, and evaluate the integration of digital media into a marketing plan.

MKT 435 ................................................................. 3 credits
Social Media Marketing
This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 443 ................................................................. 3 credits
Consumer Behavior
This is an introductory course in examining consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.

MKT 446 ................................................................. 3 credits
Internet Marketing
The course provides an opportunity for students to examine social networks, social media, and online advertising techniques. After
completion of this course, students will be able to identify interactive marketing opportunities, understand the use of social media marketing on customer loyalty, apply social media tactics to the appropriate target market, and apply concepts of micropayments in social media settings.

MKT 446 ..................................................................................3 credits

Search Engine Optimization
This course will provide students with the tools to apply concepts used in search engine optimization. After completion of this course, students will be able to design an architecture, keyword search and competitive analysis, create website building strategies, techniques and tools to enhance search results, and optimize mobile content to enhance website visibility.

MKT 447 ..................................................................................3 credits

Advertising and Creativity Strategy
This course provides an overview of advertising in the context of integrated marketing. Topics include the development of advertising objectives, creative guidelines, media selection and scheduling, budgeting, and performance evaluation.

MKT 448 ..................................................................................3 credits

Web Analytics for Digital Marketing
This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.

MKT 455 ..................................................................................3 credits

Internet Marketing
This course examines the impact of the Internet on traditional marketing methods and how it has transformed the contemporary marketing landscape. Emphasis will be placed upon the uses of the Internet for the marketing of goods, services, information, and the impact of Internet technology on marketing strategy and practices. The course examines strategies for Internet marketing and analyzes customer relationship management models and applications in the B2B (business to business) and B2C (business to consumer) environments.

Financial Planning Certificate (Undergraduate)

Certificate Programs for the University of Phoenix School of Business - Graduate

---

Graduate Human Resource Management Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This certificate may only be available as an en-route credential to the Dual Degree in Master of Health Administration/Master of Business Administration/Concentration in Human Resource Management.

The Graduate Human Resource Management Certificate Program addresses issues which the human resource professional faces daily, from legal matters to staff recruitment and development. This program is designed for those who have functional responsi-
General Information for the CERT/G-HRM

- This certificate program may be taken on its own or may be earned en-route to earning a graduate degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding “Certificate Track” graduate program.
- Students who completed a certificate in its entirety and who later choose to enroll in a graduate program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the CERT/G-HRM

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (e.g.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Certificate Completion Requirements for the CERT/G-HRM

- Completion of a minimum of 15 credits.
- A minimum grade point average (GPA) of 3.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Graduate Human Resource Management

Residency Requirements and Course Waivers for the CERT/G-HRM

- Completion of a minimum of 12 credit of the required course of study to meet University residency requirements.
- Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
- In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
  - The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
  - The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
  - The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.
- The following course in the Required Course of Study may not be waived: HRM 595

Course Descriptions for the CERT/G-HRM

HRM 531 .................................................................3 credits
Human Capital Management

This course prepares students to address the concepts of personnel development as managers. Students learn criteria for developing effective job analysis, appraisal systems, and appropriate career development plans for employees. Other topics include personnel selection, employee compensation, benefits, training, workplace diversity, discipline, employee rights, unions, and management behaviors.

HRM 595 .................................................................3 credits
Human Resource Capstone Course
This content area capstone course applies human resource concepts to improve organizational effectiveness within the framework of employment laws and regulations. Students apply existing professional standards and theories to human resource management. Other topics include the alignment of human resource strategy with the organization, global workforce planning, career and leadership development, and performance analysis and appraisal.

HRM 546 ................................................................. 3 credits

Human Resource Law
This course prepares human resource managers to comply with human resource laws and regulations across all jurisdictions. Students learn how to manage human resource functions within a regulatory environment. Other topics include laws and regulations related to the following: workforce planning and employment, human resource development activities, compensation and benefits, labor relations, and workplace safety.

HRM 548 ................................................................. 3 credits

Recruitment and Retention Practices
This course prepares students to evaluate and develop a workforce to attain organizational goals. Students learn to develop total reward strategies that attract and retain the best employees. Other topics include recruitment strategies, workforce planning and assessment, relocation practices, right sizing, negotiation, employment policies, and global compensation practices.

HRM 552 ................................................................. 3 credits

Organizational Training and Development
This course applies development and training concepts to enhance organizational performance. Students develop an employee engagement strategy. Other topics include training program development & delivery, employee relations, organizational development theories and applications, behavioral issues, and performance management.

HRM 558 ................................................................. 3 credits

Research in Human Resource Management
This course applies research methods to human resource functions. Students learn to use quantitative analysis and secondary research to recruit and select employees to meet organizational goals. Other topics include forecasting, evaluation of selection tests, application of selection tests, interviewing techniques, techniques to assess training program effectiveness, job evaluation methods, and external labor market analysis.

HRM 559 ................................................................. 3 credits

Graduate Certificate in Human Resource Management
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Graduate Human Resource Management Certificate Program in addresses issues which the human resource professional faces daily, from legal matters to staff recruitment and development. This program is designed for those who have functional responsibility to carry out the duties of an organization’s human resource department; seasoned human resource staff members wishing to keep current; newcomers to the field requiring new knowledge and skills; and specialists wanting to broaden their knowledge. HRM 559 ................................................................. 3 credits

Human Resource Capstone Course
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the G-HRM
All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for their required course of study.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Certificate Completion Requirements for the G-HRM
Credit Bearing Certificate completion requirements are the following:
- Completion of a minimum of 15 credits.
- All students must meet residency requirements.
- A minimum grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as: Graduate Human Resource Management.

Residency Requirements and Course Waivers for the G-HRM
Completion of a minimum of 12 credits of the required course of study to meet University residency requirements. Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students who have completed graduate University of Phoenix
course work that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HRM 595

**Course Descriptions for the G-HRM**

**HRM 546** ................................................................................. 3 credits

**Human Resource Law**

This course prepares human resource managers to comply with human resource laws and regulations across all jurisdictions. Students learn how to manage human resource functions within a regulatory environment. Other topics include laws and regulations related to the following: workforce planning and employment, human resource development activities, compensation and benefits, labor relations, and workplace safety.

**HRM 548** ................................................................................. 3 credits

**Recruitment and Retention Practices**

This course prepares students to evaluate and develop a workforce to attain organizational goals. Students learn to develop total reward strategies that attract and retain the best employees. Other topics include recruitment strategies, workforce planning and assessment, relocation practices, right sizing, negotiation, employment policies, and global compensation practices.

**HRM 552** ................................................................................. 3 credits

**Organizational Training and Development**

This course applies development and training concepts to enhance organizational performance. Students develop an employee engagement strategy. Other topics include training program development & delivery, employee relations, organizational development theories and applications, behavioral issues, and performance management.

**HRM 558** ................................................................................. 3 credits

**Research in Human Resource Management**

This course applies research methods to human resource functions. Students learn to use quantitative analysis and secondary research to recruit and select employees to meet organizational goals. Other topics include forecasting, evaluation of selection tests, application of selection tests, interviewing techniques, techniques to assess training program effectiveness, job evaluation methods, and external labor market analysis.

**HRM 595** ................................................................................. 3 credits

**Human Resource Capstone Course**

This content area capstone course applies human resource concepts to improve organizational effectiveness within the framework of employment laws and regulations. Students apply existing professional standards and theories to human resource management. Other topics include the alignment of human resource strategy with the organization, global workforce planning, career and leadership development, and performance analysis and appraisal.

**Graduate Accounting Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Students in the Graduate Accounting Certificate will develop an understanding of accounting concepts and applications. Students will also become competent in the use of appropriate analytical tools and technologies. They will be sensitive to legal, ethical, and social values in the conduct and communication of accounting practice and decisions. In addition, students will have an understanding of a portion of the topics required in preparation for the CPA exam: Audit & Attestation, Financial Accounting & Reporting, Regulation, and Business Environment & Concepts.

The Graduate Accounting Certificate is designed for students who want to enhance their accounting management skills, enter the accounting profession, or complete additional coursework required for the CPA exam.

While completing this certificate program, students who may be planning to take the CPA exam will utilize CPA Test Preparation software in conjunction with their course work.

**Note:** Each state sets forth standards required to be eligible to take the CPA exam and apply for licensure or certification as a CPA. While this program was designed with consideration for the standards proposed by the National Association of State Boards of Accounting (NASBA), the University of Phoenix cannot, and will not, provide any assurance that completion of this program will allow a successful student to qualify within the student’s specific jurisdiction. Potential applicants should check with the appropriate organization within their jurisdiction to determine if this program, combined with their undergraduate degree and any other specific criteria, meets the requirements to qualify for examination in that specific jurisdiction. States frequently change their requirements for examination. There is no assurance that at the time of degree completion the specific jurisdiction’s requirements will be consistent with the requirements at the time of admission.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-acc.

**Required Course of Study for the G-ACC**

**COM 530** ................................................................................. 3 credits

**Communications for Accountants**

**ACC 537** ................................................................................. 3 credits
Additional Admission Requirements for the G-ACC

All applicants to this certificate program are expected to meet the following additional admission requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Certificate Completion Requirements for the G-ACC

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 3.0.
- Students who complete the Graduate Accounting Certificate and wish to enroll in the MSA program can apply courses towards the MSA program requirement.

The certificate awarded for this program will read as: Graduate Accounting

Residency Requirements and Course Waivers/Competency for the G-ACC

Completion of a minimum of 12 credit of the required course of study to meet University residency requirements.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students who have completed graduate University of Phoenix coursework that meets the requirements for the Graduate Accounting Certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university; The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a “B” (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Accounting Theory & Research (ACC 541) may not be waived.

Competency Course Satisfaction for the G-ACC

Eligible students may satisfy the two competency courses: (ACC 537, COM 530) using one of the following methods:

- Six (6) semester credits of upper-division undergraduate coursework or three (3) semester credits of graduate coursework in financial accounting that meets the following requirements will satisfy ACC 537:
  - The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university, and wish to enroll in the MSA program can apply courses towards the MSA program requirement.
  - The coursework must have been completed with a C- or better, within the past ten (10) years of application to the University.
  - A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in this certificate program.
- Six (6) semester credits of upper-division undergraduate coursework or three (3) semester credits of graduate coursework in communications that meets the following requirements will satisfy COM 530:
  - The coursework must have been completed at a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university, and wish to enroll in the MSA program can apply courses towards the MSA program requirement.
  - The coursework must have been completed with a C- or better, within the past ten (10) years of application to the University.
A Competency Waiver Request Form must be submitted listing six semester credits of upper division undergraduate coursework or three semester credits of graduate coursework and the competency courses requested to be satisfied as some students may wish to complete one or more of the competency courses to improve their ability to succeed in this certificate program.

Course Descriptions for the G-ACC

COM 530 ................................................................. 3 credits

Communications for Accountants

In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders' equity, statement of cash flows, and error correction and accounting changes.

ACC 537 ................................................................. 3 credits

Financial Accounting

In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders' equity, statement of cash flows, and error correction and accounting changes.

ACC 541 ................................................................. 3 credits

Accounting Theory & Research

This is the first core course in the Master of Science in Accounting (MSA). In this course, students apply accounting research tools to current accounting issues. Other topics include research of accounting questions related to: inventory, fixed assets, leases, derivative instruments, debt, contingencies, segment reporting, pensions, business combinations, consolidations, stockholder's equity, and a program overview.

ACC 542 ................................................................. 3 credits

Accounting Information Systems

In this course, students examine the fundamentals of accounting systems design. Topics include business information systems, business processes and data flows, database concepts and tools, internal control and risks, auditing the information system, and using the information system to perform audit functions.

ACC 543 ................................................................. 3 credits

Managerial Accounting & Legal Aspects of Business

In this course, students examine managerial accounting as part of the business's accounting information system and legal aspects of the business enterprise. Topics include managerial accounting and capital budgeting, cost analysis; management planning and control, negotiable instruments, secured transactions, debtor/creditor relationships, property and insurance, and legal aspects of employment and environment.

ACC 544 ................................................................. 3 credits

Internal Control Systems

In this course, students gain a broad perspective of accounting and control that considers attainment of all goals of the organization, including those concerned with financial objectives. Topics include an overview of control, risk management, internal control systems, controls for current asset functions, controls for other accounting classifications, controls for information technology systems, and reporting on controls.

ACC 545 ................................................................. 3 credits

Financial Reporting

This course prepares students to address concepts of financial reporting for roles as CPAs. Students learn important criteria for calculating capital changes, applying concepts of fixed assets and cost determination, and preparing consolidated financial statements. Other topics include the professional responsibilities of CPAs, deferred taxes, cash flow statements, balance sheet preparation, restructuring of troubled debt, and the intricacies of comprehensive income.

ACC 546 ................................................................. 3 credits

Auditing

In this course, students focus on the auditing practice performed by public accountants. Topics include the CPA profession and the auditor's role, planning the audit, audit reporting and required communications, evaluating internal controls, audit programs for current assets and liabilities, and audit programs for other business cycles.

ACC 547 ................................................................. 3 credits

Taxation

In this course, students develop an understanding of the taxation of business entities and the individuals who own those entities. Topics include tax entities, property transactions, calculating basis, gains and losses, alternative minimum tax, S-corporations and partnerships.

ACC 548 ................................................................. 3 credits

Not-for-Profit & Government Accounting

In this course, students receive an overview of the budgeting, accounting, financial reporting, and auditing required of government and not-for-profit organizations. Topics include the governmental accounting, accounting records in government, fund allocation, government-wide reporting, not-for-profit accounting, and governmental performance measures.

ACC 556 ................................................................. 3 credits

Forensic Accounting

In this course, students are introduced to the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind these procedures. Topics include an overview of fraud and abuse, forensic evidence, substantive procedures for cash outflow irregularities, substantive procedures for asset irregularities, financial statement fraud, and examination reporting.

ACC 557 ................................................................. 3 credits

Accounting Ethics

In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.

ETH 557 ................................................................. 3 credits

Graduate Marketing Certificate

The following certificate program may be offered at these University of
Online modality in their state. Please contact your enrollment representative for more information.

Students in the Marketing Certificate program will develop an understanding of marketing concepts and applications. Students will develop and communicate innovative approaches to stakeholders in a socially responsible manner and will be well positioned for several professionally recognized marketing certification exams. The Marketing Certificate is designed for students who want to enhance their marketing skills, enter the marketing profession, or complete additional coursework required for several professionally recognized marketing certification exams.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-mkt.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course in the Required Course of Study may not be waived: MKT 593

**Course Descriptions for the GMKT**

- **MKT 571** ................................................................. 3 credits
  - **Marketing**
  - This course prepares students to apply marketing concepts to create and sustain customer value. Students learn to solve marketing problems in a collaborative environment. Topics include market research, customer relationships, branding, market segmentation, product development, pricing, channels, communications, and public relations.

- **MKT 544 ~** ................................................................. 3 credits
  - **Integrated Marketing Communications**
  - This course prepares students to apply integrated marketing communications as part of a strategic marketing plan. Students evaluate how marketing communication tools build brand value. Topics include advertising, promotions, public relations, sales, and direct marketing.

- **MKT 554** ................................................................. 3 credits
  - **Consumer Behavior**
  - This course prepares students to apply buyer behavior theories in the marketplace. Students evaluate how demographic, psychological, and socio-cultural issues contribute to buyer behavior. Topics include consumer preference, brand perception, attitude formation, persuasion, motivation, and consumer protection.
MKT 552 ..............................................................3 credits
Technology Applications and e-Marketing

This course prepares students to integrate technology in marketing functions. Students design the organization and content of a website to accomplish one or more marketing objectives. Topics include basics of the World Wide Web, bandwidth, servers and storage, e-Marketing, e-Commerce, and targeting customers.

MKT 562 ..............................................................3 credits

Advanced International Marketing

This course prepares students to develop and manage a marketing strategy in an international business environment. Students evaluate case studies of previous product launches and current research to create a launch strategy for a specific country. Topics include distribution systems, socio-cultural perspectives, business customs, product and service adaptations, and pricing issues.

MKT 593 ..............................................................3 credits

Product Design and Development

In this content area capstone course students design an innovative product or service that satisfies an unmet consumer need. Students use research methods to identify opportunities or new product features that reflect the latest market trends. Topics include market environmental analysis, marketing strategy, the marketing process, product development, ethics and social responsibility, innovation and diffusion, pricing strategy, and strategic marketing issues.

Graduate Project Management Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Students in the Graduate Project Management Certificate program will develop an understanding of project management concepts, applications, and the five processes that define project management. Students will collaboratively create an organizational project plan using Microsoft Project® software. The concentration is based on standards as tested by the Project Management Professional (PMP) certification examination. The Graduate Project Management Certificate program is designed for students who want to enhance their project management skills, become project managers, or complete additional coursework in preparation for Project Management Professional (PMP) certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs.

Project Management Capstone

The University reserves the right to modify the required course of study.

General Information for the G-PM

The Certificate Track graduate program is designed to be an option for students to earn a certificate en-route to earning the graduate degree.

Students who completed a certificate in its entirety and who later choose to enroll in a graduate program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the graduate program.

Additional Admission Requirements for the G-PM

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- Applicants must have access to a suitable work environment for the completion of course assignments.

- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

Certificate Completion Requirements for the G-PM

Credit Bearing Certificate completion requirements are the following:

- Completion of a minimum of 18 credits.

- All students must meet residency requirements.

- A minimum grade point average (GPA) of 3.0.

- Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.

- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read as: Graduate Project Management

Residency Requirements and Course Waivers for the G-PM

Completion of a minimum of 12 credits of the required course of study to meet University residency requirements.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

Students who have completed graduate University of Phoenix
coursework that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course if it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

The following courses in the Required Course of Study may not be waived: MGT 521, PM 598

**Course Descriptions for the G-PM**

MGT 521 ................................................................. 3 credits

Management

This course applies the tools available to University of Phoenix graduate students and the competencies of successful managers to understand the functions of business. Students learn their own perceptions and values to communicate more effectively with others. Other topics include MBA program goals, argument construction, decision making, collaboration, and academic research.

PM 571 ................................................................. 3 credits

Project Management

This course integrates the five processes that define project management. Students will design a project management plan to accomplish an organizational objective. Other topics include project initiation, budgeting, communications, execution, team management, control, and closure.

PM 582 ................................................................. 3 credits

Project Leadership

This course prepares students to lead a project to successful conclusion. Students will create a plan to lead change during project execution. Other topics include integrated change control, work breakdown structures, human resource planning, performance reporting, managing stakeholders, negotiation, conflict resolution, and cultural diversity.

PM 584 ................................................................. 3 credits

Project Risk Management

This course applies risk management concepts to project execution. Students will create contingency plans for a project. Other topics include risk identification, qualitative analysis, quantitative analysis, response planning, monitoring & control, and proactive planning.

PM 586 ................................................................. 3 credits

Project Quality Management

This course applies quality control techniques to project development and implementation. Students will create a continuous quality improvement plan for projects within an organization. Other topics include scheduling, quality planning, quality assurance, scope management, schedule control, and quality control.

PM 598 ................................................................. 3 credits

Project Management Capstone

In this concentration capstone course, students will design a project to meet an organizational need. Students will collaboratively create a project plan using Microsoft® Project software. Other topics include Project Management Professional (PMP) certification preparation.

---

**Environmental Sustainability Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This certificate provides an overview of sustainable practices and applications from the environmental science perspective. Current and historical environmental issues are evaluated by examining the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of action for environmental management. This certificate program is comprised of five categories: energy, business, agriculture, architecture and green materials, and sustainable ecosystems.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

**Required Course of Study for the SUS**

SUS 300 ................................................................. 3 credits

Environmental Sustainability

SUS 340 ................................................................. 3 credits

Energy and the Environment

SUS 330 ~ ............................................................. 3 credits

Introduction to Sustainable Agriculture

SUS 310 ~ ............................................................. 3 credits

Industrial Ecology

SUS 350 ~ ............................................................. 3 credits

Green Building and Urban Planning

Students must choose one of the following:

SUS 370 ~ ............................................................. 3 credits

Sustainable Ecosystems

SUS 380 ~ ............................................................. 3 credits

Sustainable Planning and Land Use
Introduction to Sustainable Agriculture
This course introduces principles in sustainable agriculture as it relates to environmental and socioeconomic issues. Students evaluate the environmental impact of conventional agriculture, and the solutions that sustainable agriculture provides. Students examine the principles and effectiveness of sustainable agriculture and its ability to meet the global demand for food. Upon completion of the course, students are able to analyze issues regarding sustainable agriculture and its effects on society and the environment.
SUS 310 ................................................................. 3 credits

Industrial Ecology
This course introduces students to the field of industrial ecology. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life-cycle assessment.
SUS 350 ................................................................. 3 credits

Green Building and Urban Planning
This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.
SUS 370 ................................................................. 3 credits

Sustainable Ecosystems
In this course, students evaluate the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and manage habitats and populations.
SUS 380 ................................................................. 3 credits

Sustainable Planning and Land Use
In this course, students evaluate strategies that lead to the promotion of sustainable development, planning, and land use. Students develop a sustainable land use plan for natural and human-dominated landscapes and its impact on socioeconomic issues. Upon completion of the course, students are able to apply management strategies and relevant land use practices to achieve sustainability.
SUS 385 ................................................................. 3 credits

Sustainable Ocean Use
In this course, students evaluate the principles of sustainable ocean use. Students analyze the environmental and economic role of the oceans. The sources and impact of ocean environmental degradation are examined. Topics include fisheries, aquaculture, natural resources and uses, and pollution. Sustainable management practices are analyzed by examining global environmental policies and regulations.

Cultural Studies and Communications Certificate
(Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Cultural Studies and Communication certificate explores how culture informs and shapes communication and how communication creates, modifies, and challenges culture. Through theory, analysis and practice in understanding culture, students will analyze its impact on communication. There is also an emphasis on exploring how various interdisciplinary areas can combine with the use of cultural awareness and multicultural sensitivity to improve communication skills.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/csc.

Additional Admission Requirements for the CERT/CSC

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/CSC

- Completions of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Cultural Studies and Communication (Undergraduate)

Residency Requirements and Course Waivers for the CERT/CSC

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for I&IT courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

| between symbols, rituals, artifacts, and patterns of thought of cultural groups and the communication practices of those groups. They will engage in critical analysis of communication in contemporary society, including culture-based metaphor, nonverbal communication, advertising, print media and television.
| Geography, Culture and Communication                                   | 3       |
| This course will focus on the ecological and historical approach to    |         |
| cultures and communication and how they have changed within a global and spatial context. Within the context of culture and communication, themes will include human-environmental interaction; exploration of human-environmental systems analysis; diffusion and movement of commerce and urban sprawl; location |
and spatial patterns of development; identity and the boundaries of place; and selected topics within the scope of human geography.

CSC 392 ............................................................................................................... 3 credits

Ethnic and Cultural Diversity

Students in the course will analyze the topics of identity, culture, and diversity as it relates to modern society. Students will be introduced to the conceptual frameworks of racial and ethnic relations, generalizations, stereotypes, prejudices, and adaptations in diverse cultures.
CSC 475 ............................................................................................................... 3 credits

Contemporary Communication in a Diverse Society

The objective of this course is to focus on the dynamics of human and mediated communication across cultures in a multicultural society. Communication styles of various co-cultures will be analyzed, including race, class, gender, sexuality and disability. Students will also analyze communication technology and evaluate how it affects communication in today's society.
CSC 476 ............................................................................................................... 3 credits

Gender Communication

The objective of this course is to explore gender communication differences including how traditional and nontraditional gender roles and sexuality factor into these differences. Students will focus on gender communication in business, organizations, family and the media.
CSC 477 ............................................................................................................... 3 credits

Race and Class in the Media

Through filmic analysis, cultural history, and media theory, students will explore the ways in which media in the United States participate in and challenge prevailing ideologies toward race, class and difference. Students will examine how various ethnic groups, including Native Americans, Asian Americans, African Americans, Latinos/as, and Whites are presented and what those images mean for audiences.

Leadership Communication in Organizations Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Leadership Communication in Organizations certificate proves the premise that communication is the essence of effective leadership. The complexities of relationships and the competitive nature of business demand leaders with highly polished interpersonal, intercultural, and organizational skills. This certificate provides the practical and theoretical knowledge needed to provide innovative leadership in corporate settings, the military, non-profit, government, politics, or within the global community.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/lco.

Additional Admission Requirements for the CERT/LCO

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/LCO

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Leadership Communication in Organizations (Undergraduate)

Residency Requirements and Course Waivers for the CERT/LCO

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/LCO

LCO 360 ................................................................. 3 credits

Leadership Communication
This course examines strategies and best practices in communication as the core driver of effective leadership. Students will identify essential characteristics of leadership, understand leadership theories, and apply this knowledge in assessing their own leadership communication abilities, and developing and understanding of how content, channel, and leadership style affect and impact internal and external audiences.

LCO 336 ................................................................. 3 credits

Organizational Communication Theory
This course identifies the nature of organizational communication and provides seminal organizational communication theories within the context of the traditional, interpretive, and critical perspectives. Students will gain knowledge of core theories along with the organizational dynamics of culture, diversity, and ethics. They will understand the effects of technology and innovation, along with power, conflict, organizational structure, and the need for organizations to develop informed organizational communication strategies.

LCO 372 ................................................................. 3 credits

Leadership Communication Ethics
This course focuses on the ethical challenges and responsibilities of being a competent leader and communicator in a diverse and changing world. Students will learn to apply ethical and moral leadership theory and reasoning to a variety of organizational communication processes and contexts.

LCO 348 ................................................................. 3 credits

Advanced Group Communication and Leadership
This course focuses on the issues of group dynamics and leadership encountered when dealing with complex, strategic, and critical public or corporate entities. It will build on the fundamentals of group dynamics and leadership, which were covered in previous courses, and provide advanced work in theory of groups and theory of leadership. Students will explore and analyze effective group interaction in task-oriented situations, and consider small-group structures and communication styles that influence the problem-solving process.

LCO 465 ................................................................. 3 credits

Conflict Management
This course will explore advanced methods for dealing with intrapersonal, interpersonal and group conflict. Students will investigate and apply the theoretical and practical aspects of situation assessment, conflict management, negotiation, and mediation, giving them opportunities to improve their communication, critical thinking, and problem solving skills.

LCO 480 ................................................................. 3 credits

Social Media and the Organization
This course will focus on the strategic implementation of social media tools as they relate to a firm’s integrated marketing communication strategies. Students will learn how to effectively use social media to improve external communication, marketing and advertising by studying and analyzing websites, social media sites, and affiliate sites to determine how successful companies utilize social media to improve their communication and attract their target audience to achieve their business goals.

Communications and Technology Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Communication and Technology is an interdisciplinary certificate for students interested in combining practical information technology skills with communication theory. Students in the certificate will analyze the evolution of technology and how these advancements have affected how we communicate. They will also learn skills in cutting edge technology, web and multimedia design, and how to deliver information electronically by using creative and innovative approaches.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ct.

Course Descriptions for the CERT/CTL

BSCOM 330.................................................................3 credits

Computer Mediated Communication

This course introduces students to the study of computer mediated communication and how it changes, shapes, and develops community through the use of diverse technological and social tools. Topics will include the history of computer-mediated communication, and how these technologies are leveraged in daily life. Students will develop their knowledge of computer mediated communication through immersive experiences of online and networked spaces and communities. Practical application of technology is used to complete communication projects to gain experience and depth of knowledge regarding how technology affects human communication.

BSCOM 435.................................................................3 credits

Creativity and Communication

Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of creative is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one’s creativity is one of the primary focuses of the course.

VCT 300.................................................................3 credits

Image Editing

This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on file formats, composition, color, text design, retouching and manipulation of graphic and photographic images.

VCT 305.................................................................3 credits

Digital Design

This course presents principles of digital design. An overview of digital design is presented that includes designing and developing creative presentations across various Medias including print, video, web, and mobile platforms.

VCT 320.................................................................3 credits

Electronic Publishing

This course presents the essential role of electronic publishing in the delivery of information to today’s businesses and consumers. Most of the course is concerned with methods and techniques involved in the electronic publishing of business presentations, corporate reports, newsletters, training materials, manuals and electronic books, but other information formats such as wikis and blogs are also considered.

VCT 420.................................................................3 credits

Multimedia Development

This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.
Marketing and Sales Communication Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The certificate in Marketing and Sales Communications focuses on the science of humanistic interaction in marketing and sales. Emphasis is placed on understanding the psychology of behavior, and the impact that it has on marketing communication tools and strategies. The ethical responsibility associated with customer message management is also emphasized throughout the program. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ms.

- Applicants must have access to a suitable work environment for the completion of course assignments.

### Certificate Completion Requirements for the CERT/JRN

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read as: Journalism (Undergraduate)

### Residency Requirements and Course Waivers for the CERT/JRN

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previ-
The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.

**JRN 340** ................................................................. 3 credits

### Journalistic Writing II

This course focuses on the application of the diverse journalistic writing techniques used by today’s changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written media messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The association between research and responsible writing will be explored, as writing strategies to craft effective messages are developed. The role of ethics in journalism is emphasized throughout the course.

**JRN 350** ................................................................. 3 credits

### Controversial Issues in Journalism

This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter’s ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public’s need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.

**JRN 360** ................................................................. 3 credits

### Storytelling: A Multimedia Approach

This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.

MDT 523 ................................................................. 3 credits
Legal and Ethical Issues in Mediation
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the G-MDT
All applicants are expected to meet the following admissions requirements:
- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.
- No work experience is required for this program.

Certificate Completion Requirements for the G-MDT
- The completion of a minimum of 12 credits.
- A minimum grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as: Mediation

Minimum Grade Requirements for the G-MDT
- Students will be placed on Scholastic Disqualification if a minimum grade of “B-” (2.67) is not attained in the following courses: MDT 520, MDT 521, MDT 522
- Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension (SS status). Appeals through SAC for readmission to the program will not be accepted by the College of Social Sciences.

Residency Requirements and Course Waivers for the G-MDT
Students must meet established University residency requirements for certificate conferral. The University requires that 12 credits in the Required Course of Study must be completed at University of Phoenix. Students in this program may not waive any courses.

Course Descriptions for the G-MDT
MDT 520 ................................................................. 3 credits
Foundations of Mediation I
This is the first part of the foundation course for the Mediation/Conflict Management program that is designed to provide students with knowledge of the basic standards, principles, and skills needed for the practice of mediation. This course focuses on personal communication skills and the impact of conflict, emotions, and diversity on individual perceptions as they relate to the practice of mediation. This course combines lecture with a variety of application exercises in dyads and small groups, including mediation role-plays and related assessments.
MDT 521 ................................................................. 3 credits
Foundations of Mediation II
This is the second segment of the foundation course for the Mediation/Conflict Management program that is designed to provide students with knowledge of the basic standards, principles, and skills needed for the practice of mediation. This course focuses on specific stages in the mediation process including the opening statement, storytelling, issue identification, agenda setting, negotiation techniques, dealing with impasse, and creating a mediation agreement. In addition, ethics in mediation is addressed. This course combines lecture with a variety of application exercises in dyads and small groups, including mediation role-plays and related assessments.
MDT 522 ................................................................. 3 credits
Cultural and Gender Dynamics in Mediation
This course is an introduction to the complex ways in which cultural and gender issues impact mediation practice. Students will increase their understanding of cultural and gender-based challenges in the field of peacemaking and conflict resolution. They will enhance their communication and mediation skills to more effectively facilitate dispute resolution processes.
MDT 523 ................................................................. 3 credits
Legal and Ethical Issues in Mediation
Students will examine the differences and similarities between practicing mediation and other professions, such as law and psychological counseling. Students will focus on the legal and ethical issues in mediation, especially conflicts of interest, mediator neutrality, confidentiality, mediator liability, and enforceability of mediation agreements. The course will address state licensing and certification requirements, statutes, and case law as they pertain to the professional and community-based volunteer mediators. Additionally, students will examine mediation codes of conduct and standards of practice.

Human Services Management Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The undergraduate Certificate Program in Social Services Management is comprised of 4 fundamental courses that provide a foundation for the more specialized courses in management within the social services arena and an additional 4 courses focused on organizational management and grant writing. Students will learn the components of indirect services associated with systematic delivery of direct social services, and to employ management practices to inspect, distinguish, and measure the important attributes of program management and supervision. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students
will be introduced to the processes, obstacles and costs associated to grant writing and program design.

### Certificate Completion Requirements for the CERT/HSM

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 2.0.
- Successful completion of University of Phoenix course COMM 215, equivalent or higher.
- Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
- Achieve a passing score on the College Composition CLEP exam.

### General Information for the CERT/HSM

This certificate program may be taken on its own or may be earned en-route to earning a bachelor's degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelor's programs.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelor's program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

### Additional Admission Requirements for the CERT/HSM

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student's official transcripts.

### Residency Requirements and Course Waivers for the CERT/HSM

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345

**PROFESSIONAL PROGRAMS**

**CERTIFICATE PROGRAMS FOR THE COLLEGE OF SOCIAL SCIENCES**
Historical Development of Human Services: An Introduction
In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

BSHS 325 .................................................................................3 credits

Human Systems and Development
Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

BSHS 335 ..................................................................................3 credits

Ethics and Values for Human Service Professionals
In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 ..................................................................................3 credits

Diversity and Special Populations
The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BSHS 425 .................................................................3 credits

Administration & Management of Human Service Programs
Administration and management involve components of indirect services associated with systematic delivery of direct human services. Students will learn theories of strategic planning, human resource management, strategies for evaluation and planning the development of human service organizations, elements of agency operations, risk management, budgeting, and fiscal acquisition through grant writing and contract negotiation. The emphasis of this course is on leadership development, and managing professional and volunteer staff. Additional content areas addressed in the course involve advocacy efforts and grass roots movements focused on constituency building.

BSHS 426 ......................................................................................3 credits

Human Services Management: Theory & Practice
This course traces the historical context of human services management as it relates to current theory and practice. Students will examine strategies for managing an integrated, diverse workforce and prepare to be generalists, understanding the scope of leading an organization with commonly encountered agency pressures. Students will employ learned management practices to inspect, distinguish, and measure the important attributes of program management and supervision. By demonstrating a basic understanding of organizational behavior and the challenges of embracing workforce diversity, dynamic systems change, performance evaluation and effective communication with a range of Para-professional and professionals, students will explore their roles as managers in the growing human services field.

BSHS 427 ......................................................................................3 credits

Critical Thinking Skills in Management Decision Making
This course will familiarize students with strategies related to making sustainable decisions. Techniques used to make decisions, solve problems and lead environments will be explored. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Specific details to human services are considered and methods for service delivery to needs-based populations and the workers who serve in this capacity. Students are introduced to, and will demonstrate understanding of, the Six Sigma elements and five-step approach for process improvement.

BSHS 428 ......................................................................................3 credits

Human Services Program Design & Proposal Writing
This course introduces students to the purposes, challenges and benefits of program design and grant writing. Students will review components of each and conduct a needs assessment and develop a business case for implementation on program design. Special attention will be given to research for finding available funding sources and how to form important partnerships. Students explore the methods of research using quantitative, qualitative and mixed-method program design concepts. Students will examine concepts of logic models and their impact on people, processes, and conditions related to program design. Using a specific framework, learners will uncover funding possibilities and use tools to prepare for the rigor related with grant writing. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.

Gerontology Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the
Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The undergraduate Certificate Program in Human Services Gerontology is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

The University reserves the right to modify the required course of study.

**General Information for the CERT/GER**

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

**Additional Admission Requirements for the CERT/GER**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student’s official transcripts.
- Applicants must demonstrate competency in College Writing. Students have the following options to satisfy this requirement:
  - Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.
  - Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - Achieve a passing score on the College Composition CLEP exam.
- Applicants must demonstrate competency in College Mathematics. Students have the following options to satisfy this requirement:
  - Successful completion (passing grade) of University of Phoenix mathematics course MTH 209, equivalent or higher.
  - Transfer credit may be used by students who have achieved a C- or better in a college mathematics or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
  - Achieve a passing score on the College Mathematics CLEP exam.

**Certificate Completion Requirements for the CERT/GER**

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
The certificate awarded for this program will read as:

**Gerontology**

**Residency Requirements and Course Waivers for the CERT/GER**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345

**Course Descriptions for the CERT/GER**

**BSHS 305 ................................................................. 3 credits**

**Human Systems and Development**

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

**BSHS 335 ................................................................. 3 credits**

**Ethics and Values for Human Service Professionals**

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

**BSHS 345 ................................................................. 3 credits**

**Diversity and Special Populations**

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

**BSHS 345 ................................................................. 3 credits**

**Research & Statistics in Human Services**

This course provides an overview of research methods and appropriate use of statistics in the social sciences. A component of program development and evaluation involves knowledge of theory related to understanding research and statistics in the human services arena. The scientific method, research tools, data collection, and analysis will be reviewed. Understanding research and developing the ability to critically evaluate published research reports will be emphasized. Statistical concepts will be reviewed, and students will gain a conceptual understanding of underlying principles of research and statistical analysis. Statistical software will be introduced, and students will compute descriptive and inferential statistical data. Students will practice developing research designs and conducting statistical analyses.

**BSHS 347 ................................................................. 3 credits**

**Social Systems and Aging**

This course traces the origins of social systems for the aging around the world, followed by an examination of program types, the effects on retirement, demographic changes, political sustainability of social programs for the aging, institutional settings and labor supply. Students will define and measure population aging by comparing and contrasting U.S. data with other countries by exploring elderly dependency and age-dependency ratios. Additional topics for discussion and demonstrated understanding by students include: the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology.

**BSHS 438 ................................................................. 3 credits**
Care for Aging Populations

The course is an exploration of various living environments for aging and elderly including retirement communities, living with relatives and/or children, independence, assisted living, the goodness-of-fit between lifestyle and housing, and managing long-term care. Students will demonstrate knowledge of segregated versus age-integrated residential settings and the impact on residents. An in-depth investigation of care-related issues across the growing aging population will include topics such as chronic illness, subsidized and un-subsidized healthcare related expenses, and needs assessment protocol. The basic model and principles of integrative, interdisciplinary healthcare is presented as the foundation for a team approach to the development of intervention plans, strategies of care, and implementation.

BSHS 439 ............................................................................................................... 3 credits

Grief, Loss and End of Life Issues

In this course students will learn strategies for facilitating the transition from curative measures to palliative care for the relief of emotional/psychological distress, pain, and a range of physical symptoms. Core competencies involve demonstrated learning of methods for anticipating the demands of end-of-life caregiving including advanced directives, 24/7 services, hospice case management, care and placement options, and easing the common challenges as individuals and families move from care and grief modalities to acceptance and healing. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.

Family and Child Services Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The undergraduate Certificate Program in Human Services Family and Child Services is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on developing competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems, and will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

BSHS 325 ................................................................................. 3 credits

Human Systems and Development

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

BSHS 335 ................................................................................. 3 credits

Ethics and Values for Human Service Professionals

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 ................................................................................. 3 credits

Diversity and Special Populations

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard-to-serve populations in general. Students will complete Module 9 of the MHF training.

BSHS 405 ................................................................................. 3 credits

Intervention, Direct Service Delivery & Case Management

This course provides an overview of the role of the human service worker as a change agent with a focus on the application of theory and skills necessary for providing interventions and direct service delivery to individuals and groups. Specifically, students will develop competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Additionally, students will learn how to access resources, use consultation, and make referrals. Students

908
will complete Module 16 of the MHF training.

**Family and Social Systems: Contemporary Trends and Issues**

Theories of public and private families, as differentiated by societal interaction, are explored with a focus on family systems as they exist within social systems. Micro and macro family environments are investigated. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems. Topics include the family, the state, and social policy with historical perspectives from federal and state legislation. Students will debate current trends in social policy, the efficacy of social welfare systems on a global scale, and demonstrate an understanding of the concept of practical compromise. Roles of the human service worker as advocate and service provider in the family systems context will be addressed.

BSHS 407 ................................................................. 3 credits

**Family Violence Across the Lifespan: A Multi-Strata Problem**

This course explores the phenomenon and social problem of family violence with both macro- and micro-theory explanations and an in-depth literature review. Students will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Attention is focused on professional and social responses that include clinical interventions, educational initiatives within schools, and responses to the disclosure of family violence in agency and private settings. Skills to develop a human services approach to preventing family violence are enhanced in this course; students are required to outline their own personal and professional roles in the movement to end family violence.

BSHS 408 ................................................................. 3 credits

**Childhood Abuse and Neglect**

This course focuses on the segment of family violence involving physical child abuse, child sexual abuse and exploitation, child neglect and psychological maltreatment of children. Students will examine the scope of these problems and the characteristics of both victims and perpetrators while conducting a search for patterns and dynamics of each distinction. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children’s Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases. Areas of focus involve various forms of each category including indicators for the range of abuses on an international scale with child labor, slavery, and child prostitution issues.

**Addictions Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The undergraduate Certificate Program in Human Services Addictions is comprised of 4 fundamental courses that provide a foundation for more specialized courses within this human services area, and an additional 4 courses focused on the roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

**Additional Admission Requirements for the CERT/ADD**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
The course must have been completed within the past ten (10)
years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

Applicants must have completed and earned 24 or more previous college credits, as verified by the university on the student’s official transcripts.

Applicants must demonstrate competency in College Writing. Students have the following options to satisfy this requirement:

- Successful completion (passing grade) of University of Phoenix course COMM 215, equivalent or higher.
- Transfer credit may be used by students who have achieved a C- or better in a college writing or comparable course of at least 2.67 semester credits completed at a regionally or approved nationally accredited institution. Transfer courses used to fulfill this requirement must be eligible to receive general education credit.
- Achieve a passing score on the College Composition CLEP exam.

Certificate Completion Requirements for the CERT/ADD

- Completion of a minimum of 24 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Addictions

Residency Requirements and Course Waivers for the CERT/ADD

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 9 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses may not be waived: BSHS 305, BSHS 325, BSHS 335, BSHS 345

Course Descriptions for the CERT/ADD

BSHS 305 .................................................................................3 credits

Historical Development of Human Services: An Introduction

In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery services to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker’s investment in the multidimensional field. Students will complete Module 1 of the MHF training.

BSHS 325 .................................................................................3 credits

Human Systems and Development

Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training.

BSHS 335 .................................................................................3 credits

Ethics and Values for Human Service Professionals

In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.

BSHS 345 .................................................................................3 credits

Diversity and Special Populations

The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single par-
Codependence & Working with Families

Working With Addictions
This course introduces students to the biology of addiction, including brain reward mechanisms, the role of environment and genetics, psychodynamics, and the impact of addiction on individuals, families, and communities. The roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis are emphasized in the course. The course examines major models of conceptualizing and integrating prevention, intervention, rehabilitation and maintenance/relapse prevention. Students will learn strategies for accessing supportive measures and case management processes for developing wrap-around action plans for service delivery to individuals and groups with addiction and chemical dependence related issues.

Addiction Interventions for Human Service Workers
This course has a focus on familiarizing students with fundamental interventions used in drug and alcohol treatment settings. Students will conduct an investigation of 12-step, alternative support group, secular organization, therapeutic community, and structured inpatient/outpatient approaches to intervention and treatment. Students will be prepared to apply basic skills for assessing and evaluating client needs, making referrals, and working as a colleague in groups of professional service providers. An exploration of commonly used evaluation instruments for assessing level of care is underscored along with tenets of co-facilitation of treatment groups and assessing special population needs. Students will demonstrate foundational knowledge and understanding of guidelines for treatment as outlined by the Substance Abuse and Mental Health Services Administration and the American Society of Addiction Medicine’s Patient Placement Criteria.

Codependence & Working with Families
In this course students will demonstrate an understanding of the impact of controlling behaviors and supporting dysfunction in relation to addictions and families. Theories of codependency are explored as a disease of loss of selfhood and an addiction resulting from an imbalance of inner and outer self-awareness. Cardinal characteristics of codependency are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate understanding and skill in case management and referral for treatment in addition to assisting clients with recovery goals, self-awareness, self-acceptance, self-responsibility and self-reflection with a focus on prevalence, and consequences of codependency in families.

Action Planning, Relapse Prevention & Aftercare
This course provides advanced skills development for the addiction and chemical dependency human service worker. Students will conduct an in-depth evaluation of various treatment approaches employed when preparing action plans with clients. An investigation of comprehensive treatment programs, community action programs, school-based programs, and public health approaches to relapse prevention and aftercare strategies will provide students an opportunity to develop and present an individualized program for a fictional client. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.

Military Family Counseling Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Military Family Counseling Certificate program is designed for mental health practitioners who want in-depth information and training to prepare them for working with military service members and their families. The strain on the military to provide essential services to military families has increased as a result of recent global conflicts. Civilian counselors must now be versed in the knowledge and skills necessary to work with military families. This 18-credit program includes two foundational courses in family counseling and addictions and four courses that focus on military family life, military culture, major issues and concerns that military families face, and assessment of and appropriate interventions for working with military families.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Assessment and Intervention Strategies for Military Families
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/MLFC
All applicants are expected to meet the following admissions requirements:
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript.

Certificate Completion Requirements for the CERT/MLFC
• Completion of a minimum of 18 credits.
• A minimum grade point average (GPA) of 3.0.
• The certificate awarded for this program will read as: Military Family Counseling

Minimum Grade Requirements for the CERT/MLFC
• Students in this certificate are required to achieve a minimum grade of "B" (2.67) in all courses. A "C+" grade is not acceptable. Students who fail to receive a minimum grade of "B" - in any course will be scholastically disqualified from the University.
• Students who fail to meet the minimum grade requirement will be allowed to repeat the class once. Students who fail to meet the minimum grade requirement after the second attempt, will be permanently withdrawn from the program and will be placed on scholastic suspension (SS status). Appeals through SAC for readmission to the program will not be accepted by the College of Social Sciences.

Residency Requirements and Course Waivers for the CERT/MLFC
Completion of a minimum of 12 credits of the required course of study to meet University residency requirements. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. Students who have completed graduate UOPX course work that meets the requirements for this certificate, may apply credits earned. However, students must still meet program residency requirements.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: MLFC 560, MLFC 566, MLFC 567, MLFC 568

Course Descriptions for the CERT/MLFC
MLFC 565 ................................................................................3 credits
• Family, Couple and Child Counseling
This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students address integrative approaches to assessment and diagnosis in family therapy and explore systemic approaches to treatment of issues common to families and children in clinical settings. Additionally, students contrast fundamental assumptions of systemic theory with intrapsychic theories.
MLFC 561 ................................................................................3 credits
• Dependency and Addictions
This course addresses addiction concepts and counseling practices. Topics include an overview of dependency theories, major substances of abuse, assessment, diagnosis, treatment modalities, special topics, and working with diverse populations.
MLFC 560 ................................................................................3 credits
• Historical and Cultural Perspectives of the Military
This course focuses on understanding the historical and cultural perspectives of the military. The unique characteristics of military life, the effect on individuals in military families, and the differences between required service during the draft and voluntary service since the early 1970s are presented. Issues such as military jargon, differences between the services, rank and pay-grade categories, and other basic information related to military culture are covered. In addition, the course provides an overview of the need for additional mental health services and trained mental health professionals who can work with military families. Ethical and legal issues involved in counseling military families are also introduced.
MLFC 566 ................................................................................3 credits
• Grief/Loss and Transition Issues for Military Families
This course focuses on the transitions that military family members face regularly and discusses the experiences of bereavement and grief usually associated with these transitions. Frequent family disruptions, such as the deployment cycle and its effect on the family, are reviewed. A foundational model is presented where all transitions are understood by clinicians and by the families with which they are working. Coping and counseling strategies are presented to assist families through the cycles and transitions. Trauma and posttraumatic stress issues are also presented.
MLFC 567 ................................................................................3 credits
• Counseling Military Families
This course focuses on the strengths, vulnerabilities, and capabilities of a military family, including the unique aspects of guard and reserve families. The family systems model is used to address issues that different family members face, including spouses, children, and families of unmarried service members. Parenting issues relevant to military families are also addressed. During the course, local resources are explored to assist families throughout their military service.
MLFC 568 ................................................................................3 credits
• Assessment and Intervention Strategies for Military Families
The focus of this course is on the assessments and interventions used to work with military families. When providing assessments and interventions, it is crucial to understand that the military has a distinct culture. This course explores how professionals can address the stigma associated with service members seeking men-
Nursing Programs (excluding BSN/I)

Academic Progression Requirements for all Current Nursing Programs (excluding BSN/I)

Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a "for-cause" 10 panel, plus alcohol drug test.

- For purposes of this policy, the following definitions apply:
  - Drug testing means the scientific analysis of urine, blood, breath, saliva, hair, tissue, and other specimens from the human body for the purpose of detecting the use of drugs or alcohol.
  - Reasonable suspicion means evidence which forms a reasonable basis for concluding that it is more likely than not that a person is impaired by alcohol or drugs or has engaged in substance abuse. Facts which could give rise to reasonable suspicion include, but are not limited to: the odor of alcohol or drugs, impaired behavior such as slurred speech, decreased motor coordination, difficulty in maintaining balance, marked changes in personality or job performance, and unexplained accidents, without reasonable justification. Such evidence may come from a professional or expert opinion, layperson opinion, scientific tests, or other sources or methods.
  - Illegal drug means any drug which is not legally obtainable; any drug which is legally obtainable but has not been legally obtained; any prescribed drug not legally obtained; any prescribed drug not being used for the prescribed purpose or by the person for whom it was prescribed; any over-the-counter drug being used at a dosage level other than that recommended by the manufacturer, or being used for a purpose other than the purpose intended by the manufacturer; and any drug being used for a purpose or by a person not in accordance with bona fide medical therapy. Examples of illegal drugs include, but are not limited to: stimulants; depressants; narcotic or hallucinogenic drugs; cannabis substances, such as marijuana and hashish; cocaine; heroin; methamphetamine; phencyclidine (PCP); and so-called designer drugs and look-alike drugs.
  - Impaired means that a person’s mental or physical capabilities are reduced below his or her normal levels without reasonable justification. An impaired student manifests deterioration in the level of function as compared to that previously observed, or the student does not function at a level normally expected under the prevailing circumstances. Impairment may exist in one or more multiple domains, including psychomotor activity and skills, conceptual or factual recall, integrative or synthetic thought processes, judgment, attentiveness, demeanor and attitudes as manifested in speech or actions. Impairment will include addiction to and/or physical dependence upon alcohol or illegal drugs.
  - Substance abuse means: the consumption, possession, or distribution of alcohol or illegal drugs by any nursing student while on University or affiliated clinical site premises or while participating in any University (or affiliated clinical site) sponsored or related activity, including any nursing-related course or clinical training activity.
  - a nursing student’s use of alcohol or any drug in such a way that the student’s performance in any nursing course, including activities at any clinical site, is impaired.
  - Prior to being assigned to a clinical placement and as a prerequisite for placement at any agency or health care facility the nursing student shall sign an agreement:
    - to abide by the drug policies and drug testing policies of the University and each agency or health care facility in which a student is assigned as applicable,
    - to submit to any “for cause” drug testing required by the University and testing required by each agency or health care facility the nursing student obtains clinical hours, and
    - to release a copy of any and all drug test results to the University of Phoenix, Dean/Associate Dean of Nursing, other appropriate University officials, and to any State Board(s) of Nursing in which the student holds a nursing license or certificate, where required by the relevant State Board(s) of Nursing.
    Failure to sign such agreement is grounds for refusal for student admission and progression in the program.
  - The College of Nursing requires students to obtain a 10 panel, plus alcohol drug test if the student's behavior in the clinical, classroom or laboratory setting creates facts that give rise to a reasonable suspicion of substance abuse, or indicates they are impaired by alcohol or drugs.
  - If the results of the 10 panel, plus alcohol drug test is negative for alcohol or illegal drugs:
    - The student shall meet with their Campus College Chair, Director of Nursing, or NP Program Manager within 24 hours or by the first business day following the test results to discuss the circumstances surrounding suspected behavior.
    - The Campus College Chair, Director of Nursing, or NP Program Manager will counsel the student regarding return to the classroom and clinical agency. The preliminary investigation will cease and the student will be released from further action at that time.
    - The Campus College Chair, Director of Nursing, or NP Program Manager will arrange for the student to make up the missed clinical hours.
  - If the results of the 10 panel, plus alcohol drug test is positive for alcohol or illegal drugs:
    - Substance abuse means:
      - the consumption, possession, or distribution of alcohol or illegal drugs by any nursing student while on University or affiliated clinical site premises or while participating in any University (or affiliated clinical site) sponsored or related activity, including any nursing-related course or clinical training activity.
      - a nursing student’s use of alcohol or any drug in such a way that the student’s performance in any nursing course, including activities at any clinical site, is impaired.
    - Prior to being assigned to a clinical placement and as a prerequisite for placement at any agency or health care facility the nursing student shall sign an agreement:
      - to abide by the drug policies and drug testing policies of the University and each agency or health care facility in which a student is assigned as applicable,
      - to submit to any “for cause” drug testing required by the University and testing required by each agency or health care facility the nursing student obtains clinical hours, and
      - to release a copy of any and all drug test results to the University of Phoenix, Dean/Associate Dean of Nursing, other appropriate University officials, and to any State Board(s) of Nursing in which the student holds a nursing license or certificate, where required by the relevant State Board(s) of Nursing.
      Failure to sign such agreement is grounds for refusal for student admission and progression in the program.
    - The College of Nursing requires students to obtain a 10 panel, plus alcohol drug test if the student's behavior in the clinical, classroom or laboratory setting creates facts that give rise to a reasonable suspicion of substance abuse, or indicates they are impaired by alcohol or drugs.
    - If the results of the 10 panel, plus alcohol drug test is negative for alcohol or illegal drugs:
      - The student shall meet with their Campus College Chair, Director of Nursing, or NP Program Manager within 24 hours or by the first business day following the test results to discuss the circumstances surrounding suspected behavior.
      - The Campus College Chair, Director of Nursing, or NP Program Manager will counsel the student regarding return to the classroom and clinical agency. The preliminary investigation will cease and the student will be released from further action at that time.
      - The Campus College Chair, Director of Nursing, or NP Program Manager will arrange for the student to make up the missed clinical hours.
    - If the results of the 10 panel, plus alcohol drug test is positive for alcohol or illegal drugs:
A full review by the Office of Dispute Management and Apollo Ethics and Compliance shall be conducted. Students who test positive for alcohol or illegal drugs will not be permitted to return to any clinical setting pending conclusion of the review. The findings may result in student dismissal from the nursing program and expulsion from the University.

The results of the positive test for alcohol or illegal drugs shall be reported to the applicable State Board(s) of Nursing, if required by the applicable State Board(s), by the Campus College Chair, Director of Nursing, or NP Program Manager.

If the results of the 10 panel, plus alcohol drug test(s) are positive for a prescribed drug(s) but not those that would be defined as illegal in the definitions above:

- The student shall, within three (3) business days, obtain a written statement from their treating, licensed health care provider (MD, DO, HMD, ND/NMD, NP or PA) stating that:
  - the drug level is within prescribed limits,
  - the level does not indicate abuse.
- the student’s use of the drug as prescribed will not interfere with safe practice in the clinical area.

This statement must be provided to the Campus College Chair, Director of Nursing, or NP Program Manager. If the statement is approved, then the test result will be deemed acceptable and not failed for these purposes.

- The failure of a student to provide the above statement or a health care provider’s inability to provide a statement meeting the requirements above shall be treated as a positive test for an illegal drug.
- Students who refuse to submit to a “for-cause” drug test will not be allowed to return to any clinical setting pending conclusion of a full review by the Office of Dispute Management and Apollo Ethics and Compliance. The findings may result in dismissal from the nursing program and expulsion from the University. The results of a positive test for illegal drugs as defined herein or a refusal to undergo a required drug test will be reported to the applicable State Board of Nursing where required by the applicable State Board(s) of Nursing’s statute(s) or regulation(s).

- Students must also adhere to any other additional policies prescribed by the clinical agency. It is the sole responsibility of the student to read and acknowledge the requirements of the clinical health care facility in addition to University policy.
- All costs associated with the drug test, including any transportation costs to or from the drug testing facility, will be the responsibility of the student.
- University of Phoenix, College of Nursing, campus officials may be required to report all failed drug tests to each State Board of Nursing in which the student holds a nursing license or certificate. Campus officials shall report test results to all applicable State Boards of Nursing as described in the applicable Board’s statutes and/or regulations.

**Graduate Health Care Sustainability Management Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

---

Students enrolled in the Graduate Health Care Sustainability Management Certificate focus on curriculum that is designed to instill environmental, economical, and social sensitivity and responsibility within the health care industry. This includes covering concepts such as accountability for managing outcomes, reducing costs and waste, and minimizing the environmental impact of health care systems.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g.hcs.

The University reserves the right to modify the required course of study.

**General Information for the CERT/G-HCS**

- This certificate program may be taken on its own or may be earned en-route to earning a graduate degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding Certificate Track graduate program.
- Students who completed a certificate in its entirety and who later choose to enroll in a graduate program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the graduate program.

**Additional Admission Requirements for the CERT/G-HCS**

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- A minimum of one year of full-time post high school work experience or volunteer experience is required.
Certificate Completion Requirements for the CERT/G-HCS

- Completion of a minimum of 10 credits.
- A minimum program grade point average (GPA) of 3.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.
- The following courses in the Required Course of Study may not be waived: HCS 504

Course Descriptions for the CERT/G-HCS

HCS 504 .......................... 3 credits
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.

HCS 591 .......................... 3 credits
Creating a Sustainable Health Care Organization
This course explores the challenges faced by health care organizations as they create an environment focused on sustainability. Understanding sustainability, assessing institutional practices, supporting behavioral change, organizational leadership, and exploring innovation are examined.

HCS 593 .......................... 3 credits
Economics of Sustainability
This course examines the economic issues related to the management of resources in the creation of lean/green environmentally focused organizations. Topics include financial implications, economic analysis of sustainable goods and resources, as well as measures collaborating with external programs and services.

HCS 596 .......................... 3 credits
Issues in Environmental Sustainability
Sustainability strategies are evolving and transforming the landscape of health care. This course will explore the impact of technology, regulations, societal and community interactions, and use of evidenced based knowledge to support environmental sustainability.

Graduate Health Care Informatics Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This certificate program is designed for health care and nurse professionals interested in pursuing or advancing in careers associated with health care informatics and technology. Individuals with little or no background in Informatics receive an overview of informatics as it relates to delivery within a health care facility. The program is designed to provide the learner with current knowledge in concepts of health care informatics, systems life cycle, and data management. The 10 credit-bearing specialization is available as a certificate program for post-baccalaureate students. The four courses in the informatics specialization certificate program are available at campuses offering nursing or health care degree programs using a variety of delivery methods. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/hci.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the HCI

HCS 504 .......................... 1 credit
Introduction to Graduate Study in Health Sciences/Nursing

HCS 500 ~ .......................... 3 credits
Concepts of Health Care Informatics

HCS 510 ~ .......................... 3 credits
Systems Life Cycle

HCS 520 ~ .......................... 3 credits
Data Management and Design

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the HCI

All applicants to this certificate program are expected to meet the following additional admission requirements:
• Completion of an undergraduate degree or the entire University of Phoenix BSN, BSHCS or BSHA Required Course of Study with a minimum GPA of 2.5 or better verified by providing an official transcript.

Certificate Completion Requirements for the HCI
Credit Bearing Certificate completion requirements are the following:
• Completion of a minimum of 10 credits
• A minimum University program grade point average (GPA) of 3.0.

Residency Requirements and Course Waivers for the HCI
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 7 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to waive a course in a HCI Certificate Program, the student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past five years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

The following course will not be waived from the certificate program: HCS 504.

Course Descriptions for the HCI
HCS 504 ................................................................................ 1 credit
Introduction to Graduate Study in Health Sciences/Nursing
This course provides new graduate students in the college with an introduction to strategies for success within the University’s adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.
HCS 500 ................................................................................ 3 credits
Concepts of Health Care Informatics
This course will introduce the student to the basic concepts of health care informatics and health information management. It will build on a historical foundation of informatics and roles of the informatics specialist.
HCS 510 ................................................................................ 3 credits

Systems Life Cycle
This course will focus on the selection and implementation of an information system within a health facility. The course will review the phases of the life cycle: planning, analysis, design, implementation and evaluation.
HCS 520 ................................................................................ 3 credits
Data Management and Design
This course will provide an overview of the understanding of how data, information and knowledge provides the foundation for healthcare information systems. The course will focus on the concepts of information and knowledge in relation to databases, systems operations and information systems.

Gerontology Health Care Certificate Program
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This program is designed to provide health care professionals with diverse interdisciplinary backgrounds with the knowledge and process of aging. Content is designed to provide students with relevant information related to the physical, mental, and social aspects of gerontology as well as human services, economic and legal factors that influence elders.

With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for well elders as well as those elders compromised by chronic illnesses or disabilities. Career opportunities are increasing and are not limited to just long term care. Business, industry, community health, federal and local governments and professional organizations will look to include workers prepared to understand the needs of this population as a major consumer of their products and services.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ghc.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the GHC
HCS 548 ................................................................................ 3 credits
Foundations of Gerontology
HCS 551 ~ ............................................................................. 3 credits
Biological and psychological Aspects of Aging
HCS 557 ~ ............................................................................. 3 credits
Social and Cultural Aspects of Aging
HCS 565 ~ ............................................................................. 3 credits
Organization and Management of Aging Services
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the GHC
All applicants to this certificate program are expected to meet the following additional admission requirements:
- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
- A minimum of one year full-time post-high school work experience.

**Certificate Completion Requirements for the GHC**

Credit Bearing Certificate completion requirements are the following:
- Completion of a minimum of 12 credits.
- All students must meet residency requirements as set by the Dean for each Certificate program.
- A minimum certificate program grade point average (GPA) of 3.0.
- Upon successful completion of HCS 548, HCS 551, HCS 557, and HCS 565, the student can submit a certificate application for GHC, as well as use these courses towards their MHA/GER program requirements. University residency applies with both programs, but students will be considered to have met program residency.
- Students enrolled in the courses as part of their degree will not be able to then request these courses as an additional certificate.

**Residency Requirements and Course Waivers for the GHC**

MHA/GER students may dual enroll in this program and submit a certificate application upon successful completion of HCS 548, HCS 551, HCS 557, and HCS 565. The courses may apply to both, the GHC and MHA/GER required course of study. University residency applies to both programs, but students will be considered to have met program residency. Students in the Gerontology Health Care Certificate Program may waive a minimum of three (3) credits from their program.

In order to waive a course in a Professional Certificate Program, the student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or approved nationally accredited, foreign equivalency, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better; and
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

- Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

**Course Descriptions for the GHC**

- **Foundations of Gerontology**
  3 credits
  This course introduces students to the field of gerontology and focuses on the aspect of aging. Emphasis will be placed on the basic conceptual and theoretical perspectives on aging using a multidisciplinary framework. Students will uncover the myths and stereotypes of aging, demographic changes occurring in the U.S., available programs and services, and current issues affecting older adults.

- **Biological and Psychological Aspects of Aging**
  3 credits
  This course examines the physical process of aging and the effects on physical and mental health. These topics are applied to disease prevention, health maintenance, and selected disorders that affect health and independent living. Public policy and program development issues will also be addressed to promote the health of the aging population.

- **Social and Cultural Aspects of Aging**
  3 credits
  This course examines the social and cultural perspectives on aging. Public and personal aspects of aging will be addressed through historical, theoretical, cultural, and social venues. Topics will include work and retirement, social policy, older people as social and political forces, care needs, diversity, economics, social support, and disability.

- **Organization and Management of Aging Services**
  3 credits
  This course examines a variety of services currently available for aging adults and their families. Students will learn the basic principles for planning, organizing, implementing, and coordinating programs and services intended for maturing adults. Topics include community programs, policy, institutional services, religious-based and other nonprofit resources, contracted service providers, and residential facilities.

**Long Term Care Certificate Program**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for elders as well as for adults compromised by severe injuries or disabilities. The long term care certificate focuses on increasing the knowledge and skills essential to work with these various populations. Courses focus on aging, legal issues and perspectives, programs and services, as well as alternative living environments for these populations.

LTC 310 ...................................................................................3 credits  Dimensions of Health and the Older Adult
LTC 315 ...................................................................................3 credits  Long-term Care Administration
LTC 328 ...................................................................................3 credits  Alternative Living Environments
Legal Perspectives in Aging
The University reserves the right to modify the required course of study.

General Information
This certificate program may be taken on its own or may be earned en-route to earning a bachelor's degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelor's program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelor's program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the LTC
All applicants are expected to meet the following admission requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Applicants must be currently employed or have access to a work environment.

Certificate Completion Requirements for the LTC
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as:
  Long Term Care

Residency Requirements and Course Waivers for the LTC
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200

Course Descriptions for the LTC
GEN 200 ...................................................................................3 credits  Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs are available to all residents of all states. Students may want to consider completing certain courses in the Online classroom if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This certificate is designed to provide a framework in health care management concepts. The courses will provide perspectives related to health care delivery services, health care management and human resources, financial accounting concepts, as well as an introduction to the legal and regulatory aspects in health care.

The following course in the Required Course of Study may not be waived: GEN 200

Course Descriptions for the HM

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success
This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

HCS 235 ...................................................................................3 credits

Health Care Delivery in the United States
This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 325 ...................................................................................3 credits

Health Care Management
This course explores fundamental concepts of management theory as applied to health care. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

HCS 335 ...................................................................................3 credits

Health Care Ethics and Social Responsibility
This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.

HCS 341 ...................................................................................3 credits

Human Resources in Health Care
This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.

HCS 405 ...................................................................................3 credits

Health Care Financial Accounting
This course provides an understanding of the general principles of accounting applied in the health care environment. It includes an overview of sources of revenue for various health care entities. The fundamentals of financial planning, cost concepts, capital budgeting and management analysis are applied in the health care environment. Issues surrounding the development and management of budgets are also examined.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course may not be waived: HCA 210C, HCA 260C

Course Descriptions for the CERT/HWA

HCA 210C ................................................................................3 credits

Introduction to Health Care

This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCA 230C ................................................................................3 credits

Business Communication Skills for Health Care Professionals

This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.

HCA 220C ................................................................................3 credits

The Language of Health Care

This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care.

HCIS 245C ................................................................................3 credits

Fundamentals of Information Systems for Health Care

This course introduces the fundamentals of computer systems and the role of information processing in today’s health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.

HCA 260C ................................................................................3 credits

The Regulatory Environment

This course is an introduction to the regulatory aspects of providing health care services. Students will become familiar with state and federal health regulations. Emphasis is placed on various contemporary characteristics regarding the laws and ethics of health care delivery and the rules that impact health care employment.

HCR 210C ................................................................................3 credits

Patient Records

Documenting patients’ health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records in a variety of settings. Students are introduced to uses of health data and legal aspects of records management.

Health and Wellness Administration Foundations Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. Introduction to Financial Concepts  

The University reserves the right to modify the required course of study.

General Information for the HWAF  
- This certificate program may be taken on its own or may be earned en-route to earning an associates degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" associates program.

- Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.

Additional Admission Requirements for the CERT/HWAF  
- Applicants must be at least 16 years of age at the time of application.

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/HWAF  
- Completion of a minimum of 21 credits.

- A minimum grade point average (GPA) of 2.00.

- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.

- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for this program will read as follows: Health and Wellness Administration Foundations (Undergraduate)

Minimum Grade Requirements for the CERT/HWAF  
- Students in this program will be placed on scholastic disqualification if a minimum grade of "C" (2.0) is not attained in the following courses: HCS 182, HCS 224

- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

- Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific courses listed above only one time. If the student does not receive the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.

Residency Requirements and Course Waivers for the CERT/HWAF  
Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discus-
sions and activities, students will have the opportunity to be immersed in the words used in health care.

HCS 245 ................................................................. 3 credits

Introduction to Health and Disease
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 131 ................................................................. 3 credits

Business Communication Skills for Health Care Professionals
This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will focus on business writing correspondence, communication technologies, and effective communication strategies for the health care industry.

HCIS 140 ................................................................. 3 credits

Fundamentals of Electronic Health Records
This course introduces students to the fundamentals of electronic health records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCS 224 ................................................................. 3 credits

Health Care Office Management
This course is designed to provide students with the knowledge and skills needed for the administrative operations of a health care facility. Concepts regarding office procedures, resources and supplies, and compliance and risk management requirements will be explored.

HCS 182 ................................................................. 3 credits

Introduction to Financial Concepts
This course introduces students to fundamental financial concepts related to the health care industry. Students will learn about basic insurance procedures, bookkeeping processes, and budgets commonly used in a variety of health care settings.

Electronic Health Records Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This certificate will provide a foundation of content needed to become an Electronic Health Records (EHR) specialist. While duties may vary, they will include entering data related to diagnostic procedures, diseases, and general health history information. EHR specialists ensure a patient’s health information is correct and assist with daily office operations. Students will be introduced to a current electronic health records system application in the certificate program. The concepts learned in this program align to national electronic health record specialist certification exam content.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ehr.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/EHR

All applicants to this certificate program are expected to meet the following additional admission requirements:

• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations, must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school attended and date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

• New students who list less than 24 previous college credits as recognized by the University on the admissions application, are required to successfully complete a University Orientation Workshop (UNIV 100 or UNIV 101) to be officially admitted (AM).

Certificate Completion Requirements for the CERT/EHR

Credit Bearing Certificate completion requirements are the following:

• Completion of a minimum of 18 credits.

• A minimum program grade point average (GPA) of 2.0.

• Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.

• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
The certificate awarded for this program will read as:

Electronic Health Records

Students who have earned an Associate (A or B Track) or undergraduate degree in Health Administration may not receive a certificate in the same area of focus. Example: a student may not earn an AAHCA/EHR Track A or B first and come back to earn an EHR certificate; however, students who have completed a certificate may return to receive an Associates or bachelors in Health Administration with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the CERT/EHR

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course(s) in the Required Course of Study may not be waived: HCA 210C, HCIS 275C

Course Descriptions for the CERT/EHR

HCA 210C................................................................................ 3 credits

Introduction to Health Care

This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.

HCIS 245C ............................................................................. 3 credits

Fundamentals of Information Systems for Health Care

This course introduces the fundamentals of computer systems and the role of information processing in today’s health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.

HCA 220C................................................................................ 3 credits

The Language of Health Care

This course offers the student engagement and interaction with the dynamic lan, age of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care.

HCIS 255C ............................................................................. 3 credits

Structure and Design of Electronic Health Records

Students will learn about the evolving function and use of technology to support the documentation of vital health information contained in a patient’s medical history. This course will introduce students to the general software applications, insurance and coding information, and regulatory compliance requirements.

HCIS 265C ............................................................................. 3 credits

Medical Health Information

This course focuses on the documentation of medical data and how managing data can be vital to the treatment and care of individuals in the health care system. Students will examine development, forms, routing, filing, and storage of patient’s records in a variety of health care settings. Students will also review issues related to quality and data management, as well as privacy and security compliance.

HCIS 275C ............................................................................. 3 credits

Practical Application of Electronic Health Records

Students in the capstone course will use case studies and an electronic health record (EHR) software application to develop foundational skills related to data charting, usage, and application.

Electronic Health Records Fundamentals Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The University reserves the right to modify the required course of study.

General Information for the EHRF

• This certificate program may be taken on its own or may be earned en-route to earning an associates degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" associates program.

• Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will be required to enroll in the Certificate Track and will not earn a second certificate en-route to completing the associates program.

Additional Admission Requirements for the CERT/EHRF

• Applicants must be at least 16 years of age at the time of application.

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/EHRF

• Completion of a minimum of 21 credits.

• A minimum grade point average (GPA) of 2.00.

• Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.

• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

• The certificate awarded for this program will read as follows: Electronic Health Records Fundamentals (Undergraduate)

Minimum Grade Requirements for the CERT/EHRF

• Students in this program will be placed on scholastic disqualification if a minimum grade of "C" (2.0) is not attained in the following courses: HCIS 250, HCIS 270

• Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Students may repeat the specific courses listed above only one time. If the student does not receive the minimum grade requirement on the second attempt, the student will be scholastically suspended, permanently withdrawn, from this program.

Residency Requirements and Course Waivers for the CERT/EHRF

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

• The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course(s) may not be waived: HCIS 270

Course Descriptions for the CERT/EHRF

HCS 235 ................................................................. 3 credits

Health Care Delivery in the U. S.

This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.

HCS 120 ................................................................. 3 credits

Medical Terminology for Health Care Professionals

This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discus-
sions and activities, students will have the opportunity to be immersed in the words used in health care.

HCS 245  
Introduction to Health and Disease
This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.

HCS 131 ................................................................................ 3 credits

Business Communication Skills for Health Care Professionals
This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will focus on business writing, correspondence, communication technologies, and effective communication strategies for the health care industry.

HCIS 140 ................................................................................ 3 credits

Fundamentals of Electronic Health Records
This course introduces students to the fundamentals of electronic health records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCIS 250 ................................................................................ 3 credits

Structure, Design and Tools of Electronic Health Records
Students will learn about the evolving functions and uses of technology to support the documentation of vital health information contained in a patient’s electronic health record. This course will introduce students to software applications, claims and reimbursement information, as well as regulatory compliance requirements. Students will examine forms, routing, and reporting of patient records in a variety of health care settings. Students will use an electronic health record (EHR) software to reinforce quality and data management of patient information.

HCIS 270 ................................................................................ 3 credits

Application of Electronic Health Records
Students in the capstone course for the electronic health records (EHR) concentration will continue to use an EHR software to apply foundational skills related to administrative tasks, data charting, insurance and billing, and regulatory compliance and reporting. Students will demonstrate mastery processing an electronic health record.

Medical Records Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The certificate in Medical Records lays a foundation for further study in health care medical records at the undergraduate level. Topics focus on anatomy and physiology related to terminology and disease diagnosis, medical billing and coding, medical insurance processes, and medical claims processing and compliance.

Software instruction synthesizes a variety of records processes common in medical facilities. The concepts learned in this certificate align to the national certified medical administrative assistant exam content.

General Information

The availability of programs and concentrations depend on student demand
and other factors. Not all programs may be available to all residents of all
states. Students may want to consider completing certain courses in the
Online classroom at Online rates if the program is available via the
Online modality in their state. Please contact your enrollment
representative for more information.

This certificate is designed for EMTs, First Responders, Firefight-
ers, or any other emergency personnel that want to expand their
knowledge and skills related to emergency management. Focus
will be on principles of emergency management, managing emer-
gency response operations, and planning and preparedness of
emergency situations.

Required Course of Study for the EMC

Course work requiring prerequisites are identified by a ~ symbol
following the course number.

GEN 200 ~ Foundations for General Education and Professional Success
EMC 310 ~ Principles of Emergency Management
EMC 330 ~ Political and Policy Issues for Emergency Management
EMC 340 ~ Emergency Services and the Community
EMC 350 ~ Managing Emergency Response Operations
EMC 320 ~ Emergency Preparedness and Planning

The University reserves the right to modify the required course of
study.

General Information

This certificate program may be taken on its own or may be earned
en-route to earning a bachelor's degree. Students wishing to earn
the certificate en-route must be enrolled in the corresponding "Cer-
tificate Track" bachelor programs.

Students who completed a certificate in its entirety and who later
choose to enroll in a bachelor's program with a concentration in the
same area of focus as the completed certificate will not be required
to enroll in the Certificate Track.

Additional Admission Requirements for the EMC

All applicants are expected to meet the following admissions
requirements:

• High school graduation from an institution that holds state
approval to confer high school diplomas or are accredited or a
candidate for accreditation at the time the student attended by
an acceptable accrediting body, GED certificate, CHSPE
(California High School Proficiency Examination) certificate, or
completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending
classes via the Online modality and students attending a
local campus in Tennessee, including from any cross-border
locations must provide the university with an official High
School transcript or official GED score (if applicable). A
college transcript which documents high school date of
completion or a copy of a DD-214 showing high school
graduation or equivalency may be submitted to satisfy this
requirement.

• Applicants must be currently employed in or have prior
employment experience in an Emergency Management position
such as Emergency Medical Technician (EMT), First Responder,
firefighter, or other emergency personnel.

Certificate Completion Requirements for the EMC

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 2.0.

• Students earning the certificate en-route will only be placed
on Academic Probation if their bachelor program GPA falls
below the minimum requirement.

• Students earning this certificate en-route to completion of a
degree program must meet the minimum GPA requirement
at the conclusion of all required coursework for the
certificate to be eligible for certificate conferral.

• All students must complete the minimum number of credits
required by their certificate program.

• The certificate awarded for this program will read as:
Emergency Management

Residency Requirements and Course Waivers for the EMC

Students must meet established University residency requirement
for certificate conferral. The University requires that the majority
of coursework, 12 credits in the Required Course of Study, must be
completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from
their required course of study on the basis of regionally or
approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the
Required Course of Study, a student must have completed a previ-
ous course which meets the following criteria:

• The course must have been completed at a regionally or
approved nationally accredited, or candidate for accreditation,
college or university.

• The course must have been completed within the past ten (10)
years (5 years for IS&T courses) from current program
enrollment agreement sign date with a grade of "C" (2.0) or
better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e., graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

The following course in the Required Course of Study may not be waived: GEN 200

Course Descriptions for the EMC

GEN 200 ...................................................................................3 credits

Foundations for General Education and Professional Success

This general education course is designed to introduce the intentional learner to communication, collaboration, information utilization, critical thinking, problem solving and professional competence and values. The course uses an interdisciplinary approach for the learner to develop personal, academic strategies in order to reach desired goals and achieve academic success.

EMC 310 ...................................................................................3 credits

Principles of Emergency Management

This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.

EMC 330 ...................................................................................3 credits

Political and Policy Issues for Emergency Management

This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

EMC 340 ...................................................................................3 credits

Emergency Services and the Community

This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350 ...................................................................................3 credits

Managing Emergency Response Operations

This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.

EMC 320 ...................................................................................3 credits

Emergency Preparedness and Planning

This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.

Graduate Nursing/Health Care Education Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students who may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This credit-bearing certificate program is for post-baccalaureate students. The four courses in the education specialization/certificate program are available at campuses offering nursing or health care degree programs using on ground and/or Flexnet delivery, as well as through the online campus. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/nhce.

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the NHCE
All applicants to this certificate program are expected to meet the following additional admission requirements:
- Completion of an undergraduate degree or the entire University of Phoenix BSN or BSHCS Required Course of Study with a minimum GPA of 2.5 or better verified by providing an official transcript.
- A minimum of one year full-time post-high school health care work experience.
- Current employment in a nursing or health care role or access to an appropriate healthcare organization environment in which to complete the work related course assignments.

Certificate Completion Requirements for the NHCE
Credit Bearing Certificate completion requirements are the following:
- Completion of a minimum of 12 credits.

Minimum Grade Requirements for the NHCE
- Students in this program are required to achieve a minimum grade of “C” (2.0) in the following courses: HSN 540, HSN 544, HSN 548 and HSN 552. A “C-” grade is not acceptable. Students who fail to receive a minimum grade of “C” in any of the following courses will be scholastically disqualified from the University.
- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have retaken the course which placed them on scholastic disqualification, satisfied the grade requirement, and fulfilled any additional criteria for reentry, as determined by the faculty member and the Campus College Chair or appropriate Dean.

Residency Requirements and Course Waivers for the NHCE
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 6 credits in the Required Course of Study, be completed at University of Phoenix.
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the

Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the NHCE

HSN 548 ............................................................... 3 credits
Role of the Health Care/Nursing Educator
Responsibilities of faculty within various higher education settings are explored. Trends and issues that impact the educator role within changing health care and educational environments are discussed. Topics such as technological, legal, ethical, and professional dynamics are included.

HSN 540 ............................................................... 3 credits
Teaching and Learning Strategies
This course will focus on the concepts of learning, cognitive, and psychomotor learning, and the principles of adult learning. Selection and development of teaching strategies that enhance and facilitate learning will be explored.

HSN 544 ............................................................... 3 credits
Design and Process of Curriculum Development
Development of curriculum for programs in higher education settings is examined. This course focuses on curriculum planning and design, as well as development of individual courses and their relationship to program mission, objectives, and outcomes.

HSN 552 ............................................................... 3 credits
Assessment and Evaluation of Learning
Methods of assessing learning in higher education are analyzed and applied in different learning situations. Processes and problems related to course learning assessments as well as evaluating programmatic outcomes are examined. Designing measures to evaluate learner and curricular outcomes are addressed.

CERTIFICATE PROGRAMS FOR THE COLLEGE OF EDUCATION

Administration and Supervision Certificate Program (California)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

Additional Admission Requirements for the ASC
All applicants are expected to meet the following admissions requirements:
• Having passed California Basic Skills Test (CBEST), CSET Multiple subject Plus Writing Skills, Examination, or another state approved basic skills exam.
• Current negative TB test or negative chest xray
• Applicants must possess one of the following California credentials:
  • A valid clear or life California teaching credential requiring a baccalaureate degree and a program of professional preparation, including student teaching
  • A valid clear or life California Designated Subjects Teaching Credential provided the applicant also possesses a baccalaureate degree
  • A valid clear services prerequisite credential, California Pupil Personnel Services Credential, Teacher Librarian Services Credential, Speech-Language Pathology Services Credential, Clinical or Rehabilitative Services Credential, or a School Nurse Services Credential (Clear or Professional Clear level only), requiring a baccalaureate degree and a program of professional preparation, including field practice or the equivalent.
• A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.

Completion Requirements for the ASC
• Completion of a minimum of 31 credits.
• A minimum grade point average (GPA) of 3.0.
• Completion of Field Experience Observation Record (30-40 hours).
• In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
• Completion of e-portfolio.
• The certificate awarded for this program will read as: Administration and Supervision

Academic Progression Requirements for the ASC
Candidates must complete and provide verification of the following academic progression requirements prior to practicum placement:
• Proof of passing score on the CBEST exam, CSET Multiple subject Plus Writing Skills, Examination, or another state approved basic skills exam.

Residency Requirements and Course Waivers for the ASC
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.
In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally accredited college or university.
• The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 594A, ADMIN 594B, ADMIN 594C

Minimum Grade Requirement for the ASC

A candidate must earn a grade of "B" (grades of "I" and "B-") are not accepted) or better in the following courses in order to student teach: ADMIN 594A, ADMIN 594B, ADMIN 594C

Candidates who earn less than a grade of "B" in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of "B" or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Institutional Recommendation for the ASC

Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR).

Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates' records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Verification of employment in an administrative position prior to issuance of a Preliminary Administrative Credential. Those students who do not have an offer of employment in an administrative position may apply for a Certificate of Eligibility to seek employment.

Practicum Policies for the ASC

• The Administrative Practicum is a minimum 240-hour placement. Each campus establishes operational policies related to placement and completion of the practicum. Candidates must follow the guidelines in place at their campus.
• Candidates must take the practicum courses concurrently with the practicum experience. If a candidate chooses to postpone the practicum, he/she must postpone their enrollment in the practicum courses.
• Candidates must pass each Administrative Practicum course with a grade of "B" or better in order to avoid Scholastic Disqualification.
• Candidates who are removed from a placement at the request of a school district administrator will be withdrawn from class and will be issued a grade of "F" by their faculty member.

Field Experience for the ASC

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 30-40 hours of verified field experiences. The focus of each field experience will relate to specific course content and will follow a structured format. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Note: The field experience hours are hours completed outside of the 240 hour Administrative Practicum experience.

Additional Academic Program Re-entry Policy for the ASC

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the ASC

ADMIN 501 .............................................................................. 0 credits
Orientation to Administration and Supervision
This course is designed to provide an orientation to the primary components of the Master of Arts in Education/ Administration and Supervision program in California. Students will be introduced to the program’s progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative practicum will be discussed.

ADMIN 516 .............................................................................. 1 credit
Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

ADMIN 594A ................................................................. 1 credit
Administrative Practicum Part I: Instructional Leadership
This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

ADMIN 594B ................................................................. 1 credit
Administrative Practicum Part II: Organizational Management
This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.
ADMIN 594C .................................................................1 credit
Administrative Practicum Part III: Professional Practice
This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

ADM 518.................................................................3 credits
Leadership and Collaborative Processes
This course provides students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and on how educational leaders can create high performing teams. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

ADM 555.................................................................3 credits
Equity, Diversity, and Access in Education
This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

ADM 575.................................................................3 credits
School Policy and Law for Principals
This course provides an overview of various federal, state, non-profit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.

ADM 550 .................................................................3 credits
Business and Facilities Management
In this course, students study the processes for managing business functions and school facilities. Principal candidates study school budgeting and accounting procedures and examine issues regarding facilities management. Principal candidates also participate in field experiences related to business and facilities management.

ADM 560 .................................................................3 credits
Human Resources Management in Education
This course focuses on the responsibilities involved in human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal are examined. In addition, the course analyzes strategic planning, employment continuity, employment justice, including laws, policies, and procedures, and unionism.

ADM 565 .................................................................3 credits
School Improvement Processes
This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Candidates review the types of assessments that a school leader needs to be familiar with, and how a school leader can use assessment data to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

Principal Licensure Certificate Program (Utah)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Principal Licensure professional certificate program is designed for educators interested in obtaining a license as a P-12 school principal. The standards-based program is designed to provide principal candidates with the knowledge, skills, and dispositions necessary to be successful school leaders who can apply theory to practice. The program encompasses instructional leadership, organizational management, technology management, and data-driven decision-making. An administrative internship is an integral component of the program, providing candidates with a field-based experience in the various aspects of school administration and supervision.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/plc.

Principal Internship Part III: Professional Practice
The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the PLC
All applicants are expected to meet the following admissions requirements:

- A masters degree from a regionally accredited college or university or equivalent graduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
  - The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
  - Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
    - Verifiable (contracted) P-12 instructional classroom experience - 40 hours per week

Utah students in the MAED/ADM program can have experience as a licensed school counselor.

- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A signed PLC New Student Checklist

Certificate Completion Requirements for the PLC
- Completion of a minimum of 28 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of the Administration Internship courses ADMIN 591A, ADMIN 591B, and ADMIN 591C.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record.
- Students may need to meet additional requirements set forth by their State Department of Education.
- The certificate awarded for this program will read as: Principal Licensure Certificate.

Residency Requirements and Course Waivers for the PLC
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 591A, ADMIN 591B, ADMIN 591C

Minimum Grade Requirement for the PLC
A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: ADMIN 591A, ADMIN 591B, ADMIN 591C

Candidates who earn less than a grade of “B” in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

Additional Academic Program Re-entry Policy for the PLC
Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version.

However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible
Institutional Recommendation for the PLC

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for principal certification). Refer to the New Student Checklist and your state certification agency for specific requirements.
- Passing scores on state exam(s) for principal licensure.
- Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Course Descriptions for the PLC

ADMIN 500..............................................................................0 credits

Orientation to Administration and Supervision
This course is designed to provide an orientation to the primary components of the Master of Arts in Education/ Administration and Supervision program. Students will be introduced to the program’s progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.

COM 516 ....................................................................................1 credit

Professional Communications
This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

ADMIN 518.................................................................3 credits

Leadership and Collaborative Processes
This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

ADMIN 570 .................................................................3 credits

Equity, Diversity, and Access in Education
This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, it focuses on the equitable participation of students, families, teachers, and staff in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

ADMIN 555.................................................................3 credits

School Policy and Law for Principals
This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

ADMIN 524 .................................................................3 credits

Supervision of Curriculum, Instruction and Assessment
This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship between supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

ADMIN 591A .............................................................................1 credit

Principal Internship Part I: Instructional Leadership
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

ADMIN 555 .................................................................3 credits

Business and Facilities Management
This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

ADMIN 560 .................................................................3 credits

Human Resources Management in Education
This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

ADMIN 591B .................................................................1 credit

Principal Internship Part II: Organizational Management
This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.

ADMIN 575 .................................................................3 credits

Family, Community and Media Relations
This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school’s vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

ADMIN 565 .................................................................3 credits

School Improvement Processes
This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal per-
spective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

**Principal Internship Part III: Professional Practice**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

**Principal Licensure Certificate Program (Colorado)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. **Additional Admission Requirements for the PLC**

All applicants are expected to meet the following admissions requirements:

- A masters degree from a regionally accredited college or university or equivalent graduate degree earned at a recognized foreign institution.
- A minimum equivalent of three (3) years post-high school work experience including 18 months of instructional experience in a P-12 setting.
- The teaching or instructional experience must be as a contracted teacher in either a traditional or year-round public or private school.
- Teaching experience is defined as stand-up teaching or facilitation with a pre-school (P)-12 school-age population. The following constitutes teaching experience:
  - Colorado students in the Principal Licensure Certificate (PLC) programs can have experience in public or non-public P-12 schools as a licensed or certified professional including school social worker and school nurse.
- All applicants must be currently employed or have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- A signed PLC New Student Checklist

**Certificate Completions Requirements for the PLC**

- Completion of a minimum of 28 credits.
- A minimum grade point average (GPA) of 3.0.
- Satisfactory completion of the Administration Internship courses ADMIN 591A, ADMIN 591B, and ADMIN 591C.
- Completion of e-portfolio.
- Completion of Field Experience Observation Record.
- Students may need to meet additional requirements set forth by their State Department of Education.
- The certificate awarded for this program will read as: Principal Licensure Certificate.

**Residency Requirements and Course Waivers for the PLC**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previ-
ous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of “B” (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, ADMIN 591A, ADMIN 591B, ADMIN 591C

**Minimum Grade Requirement for the PLC**

A candidate must earn a grade of “B” (grades of “I” and “B-” are not accepted) or better in the following courses: ADMIN 591A, ADMIN 591B, ADMIN 591C

Candidates who earn less than a grade of “B” in any of these courses must complete a remediation plan and repeat the course. If the candidate does not receive a grade of “B” or better on the second attempt, the candidate will be Scholastically Suspended, permanently withdrawn, from the program.

**Institutional Recommendation for the PLC**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for principal certification). Refer to the New Student Checklist and your state certification agency for specific requirements.
- Colorado: Students must verify three (3) years licensed experience in P-12 grades in order to obtain their principal certification and will need to provide verification of this. Acceptable licensed experience includes the following:
  - Teacher
  - School Counselor
  - School Nurse
  - School Social Worker
  - School Psychologist
- Passing scores on state exam(s) for principal licensure.
- Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

**Additional Academic Program Re-entry Policy for the PLC**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum and can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary. Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the PLC**

**Orientation to Administration and Supervision**

This course is designed to provide an orientation to the primary components of the Master of Arts in Education/ Administration and Supervision program. Students will be introduced to the program’s progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.

**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**Leadership and Collaborative Processes**

This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

**Equity, Diversity, and Access in Education**

This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, it focuses on the equitable participation of students, families, teachers, and staff in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.

**School Policy and Law for Principals**

This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.
will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.

**Principal Internship Part I: Instructional Leadership**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning, managing curriculum, leadership, problem solving, organizing, and personnel evaluation will be addressed.

**Human Resources Management in Education**

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

**Family, Community and Media Relations**

This course focuses on the role of the school principal as a catalyst for developing and maintaining collaborations with families, business and community groups, and the media to support a school's vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision-making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

**School Improvement Processes**

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

**Business and Facilities Management**

This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

**Human Resources Management in Education**

This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.

**Family, Community and Media Relations**

This course focuses on the role of the school principal as a catalyst for developing and maintaining collaborations with families, business and community groups, and the media to support a school's vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs, establishing reciprocal relationships, the use of conflict resolution and decision-making tools, and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

**School Improvement Processes**

This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.

**Principal Internship Part III: Professional Practice**

This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.

**California Teachers of English Learners Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This certificate program is aligned directly to the Candidate Competency Standards and the Knowledge, Skills, and Abilities for California Teachers of English Learners (CERT/CTEL). The curriculum is designed around the Knowledge, Skills, and Abilities for California Teachers of English Learners (CERT/CTEL), and provides candidates with a depth of knowledge regarding current research-based theories and research in the specialized instruction of English language development (ELD).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-ctel.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

**Required Course of Study for the CERT/CTEL**

**MTE 502 ~ ................................................................................ 0 credits**

Orientation to the California Teachers of English Learners (CTEL) Program

**ELD 502 ~ ................................................................................ 3 credits**

Foundations of Instruction for English Learners

**ELD 535 ~ ................................................................................ 3 credits**

Teaching Reading & Writing to English Learners

The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

**Additional Admission requirements for the CERT/CTEL**

All applicants to this certificate program are expected to meet the following additional admission requirements:

- The Commission can only accept course work and degrees completed at regionally accredited institutions or an equivalent undergraduate degree earned at a recognized foreign institution. Degrees and course work must have been completed while the institution was regionally accredited in order for the Commission to consider them for Credentialing purposes.
Institutional Recommendation for the CERT/CTEL

Course Descriptions for the CERT/CTEL

Orientation to the California Teachers of English Learners (CTEL) Program

Assessment of English Learners

Foundations of Instruction for English Learners

MTE 502 ................................................................. 0 credits

 Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).

 Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their program. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Certificate in Special Education (Nevada)

The following certificate program may be offered at these University of Phoenix locations:

- University of Phoenix, 2014-2015

Certificate Completion Requirements for the CERT/CTEL

- A minimum equivalent of three (3) years post-high school work or volunteer experience.
- Candidates entering this program must possess a valid California teaching credential, Speech-Language Pathology or Clinical or Rehabilitative Services Credential with a Special Class Authorization, School Nurse Services Credential with a Special Teaching Authorization in Health, Visiting Faculty Permit, Children’s Center Permit (excluding emergency), or Child Development Permit (excluding Assistant and Associate Permits) that authorizes the holder to provide instruction to pupils.
- The following are not appropriate prerequisite credentials or permits: Emergency Permits, Provisional Internship Permits, Short-Term Staff Permits, District Intern Credentials, University Intern Credentials, Exchange Credentials, Sojourn Certified Employee Credentials, Services credentials without a special class authorization
- Access to an educational setting with English language learners.
- A signed CERT/CTEL New Student Checklist

Certificate Completion Requirements for the CERT/CTEL

- Completion of a minimum of 12 credits.
- A minimum program grade point average (GPA) of 3.0.
- Completion of the e-portfolio.

Residency Requirements and Course Waivers for the CERT/CTEL

Students may waive only three (3) credits from the program.

Courses may only be waived with California Commission-approved CTEL course work.

Additional Academic Program Re-entry Policy for the CERT/CTEL

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary.

Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Institutional Recommendation for the CERT/CTEL

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR) (request for state teaching credential).

- Upon completion, candidates must complete a University of Phoenix Diploma Application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their program. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.

Course Descriptions for the CERT/CTEL

MTE 502 ................................................................. 0 credits

Orientation to the California Teachers of English Learners (CTEL) Program

This course is designed to provide an orientation to the primary components of the California Teachers of English Learners (CTEL) Program. Students will be introduced to the program’s components and completion requirements. Electronic Resources, Field Experience, and E-Portfolio will be discussed.

ELD 502 ........................................................................... 3 credits

Foundations of Instruction for English Learners

This course discusses standardized and authentic assessments and assessment strategies in the areas of literacy and biliteracy development of English Learners. Issues associated with the interdependent relationship between teaching and assessment are addressed in addition to effective parental and/or community involvement in literacy development.

ELD 504 ........................................................................... 3 credits

Assessment of English Learners

This course will introduce assessment strategies in the area of literacy/biliteracy development. Assessments, both standardized and authentic, will also be discussed with regard to appropriate use with English Learners. It addresses issues associated with the interdependent relationship between teaching and assessment in addition to effective parental and/or community involvement in literacy development.

ELD 506 ........................................................................... 3 credits

Understanding Language Acquisition and Cognition

This course examines language structure and use, second language acquisition theories, and the nature of cognitive and affective language development to assist the teacher of the English Learner. The course provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse students. It also examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning and thought processes.

ELD 535 ........................................................................... 3 credits

Teaching Reading and Writing to English Learners

This course examines literacy issues related to the acquisition of English and the use of home language by English Learners (EL) in all second language programs. It also presents processes and strategies to enhance the biliteracy skills of English Learners.

Certificate in Special Education (Nevada)

The following certificate program may be offered at these University of Phoenix locations:

University of Phoenix, 2014-2015
Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Certificate in Special Education (CERT/SPE) prepares current certified teachers working in a K-12 regular education environment as special education teachers. This program is designed to provide them with the additional coursework required for certification as a K-12 special education. Coursework in this program includes special education methods, special education assessment and interpretation, characteristics of exceptionalities, scientifically based reading instruction, methods of teaching mathematics, and inclusion strategies for the special educator. Throughout the program, students are required to complete a minimum of 30-40 hours of verifiable field experiences, covering a variety of special education settings.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-spe.

The University reserves the right to modify the required course of study. Program and Certification requirements are subject to change based on Department of Education or University Policy.

Additional Admission Requirements for the CERT/SPE

All applicants are expected to meet the following admissions requirements:

- Students enrolled in this program must have an undergraduate degree from a regionally accredited college or university or equivalent undergraduate degree earned at a recognized foreign institution. Degrees from nationally accredited institutions will not be accepted. All coursework for the undergraduate degree must have been taken from a regionally accredited institution. Coursework taken during an institution’s candidacy period is not acceptable for admission.
- A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.
- A minimum equivalent of three (3) years post-high school work or volunteer experience.
- All applicants must be currently employed as a special education teacher in a Nevada school.
- Students enrolling in the CERT/SPE must have a valid elementary, secondary, or special (K-12, Art, Music, PE or special education) license excluding Business and Industry.

Certificate Completion Requirements for the CERT/SPE

- Completion of a minimum of 32 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Field Experience Observation Record (25 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- In order to receive an institutional recommendation and/or state certification, candidates may need to meet other requirements as set forth by their state of residency. Candidates are advised to check with their State Department of Education for any additional certification requirements.
- Completion of e-portfolio.
- The certificate awarded for this program will read as: Special Education Generalist

Residency Requirements and Course Waivers for the CERT/SPE

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: COM 516, RDG 537, SPE 512, SPE 546, SPE 591

Institutional Recommendation for the CERT/SPE
Field Experience for the CERT/SPE

Beginning with the first course, and throughout the program, candidates are required to complete a minimum of 25 hours of verified field experiences, covering a variety of developmental levels from ages birth through 18 years of age. The focus of each field experience will relate to specific course content and will follow a structured format. Four formal field experience evaluations are required during the program (observation/interview, one-on-one instruction, small-group instruction, and whole-group instruction). These evaluations must be posted to the students' electronic portfolio. Documentation of field experience must be uploaded to the electronic portfolio and will be reviewed by campus staff and faculty. Candidates must work with their campus to arrange field experience.

Additional Academic Program Re-entry Policy for the CERT/SPE

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary. Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

Course Descriptions for the CERT/SPE

MTE 500 ...................................................................................0 credits
Orientation to the Special Education Certification Program

This course is designed to provide an orientation to the primary components of the Special Education Certificate Program. Students will be introduced to the program's certificate completion requirements. Field Experience, E-Portfolio, and technology resources will be discussed.

COM 516 .....................................................................................1 credit
Professional Communications

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

MTE 505 ...................................................................................3 credits
Child and Adolescent Development

This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, psychological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

SPE 513 .....................................................................................3 credits
Orientation to the Exceptional Child

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

SPE 546 .....................................................................................3 credits
Special Education Methods

This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.

SPE 512 .....................................................................................3 credits
Special Education Assessment and Interpretation

This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child's abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.

SPE 591 .....................................................................................3 credits
Characteristics of Exceptionalities

This course examines teaching and managing students with mild disabilities. Special emphasis is placed on learning disabilities, mental retardation, and emotional disabilities. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed in depth.

RDG 537 .....................................................................................4 credits
Curriculum Constructs & Assessment: Reading and Language Arts
This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
MTH 506 ................................................................. 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in preschool through eighth-grade mathematics. Topics include an overview of mathematics content and process standards, developmentally effective instructional strategies, assessment, and classroom and materials management.
MTE 522 ................................................................. 3 credits

Maintaining an Effective Learning Climate for Elementary Settings
This course examines the strategies used in managing a positive classroom environment within the framework of today’s diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
SPE 558 ................................................................. 3 credits

Transition Planning for Adolescents with Disabilities
This course focuses on the role of the special education teacher as he/she transitions adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Students will learn skills and concepts in working with students with special needs, parental involvement, and the community.
SPE 557 ................................................................. 3 credits

Collaboration with Families of Students with Disabilities
This course focuses on the interrelationships of varied services for students with disabilities. Emphasis is placed on meeting the academic and social-emotional needs of students with disabilities by working with parents, professionals, and community services to develop collaborative and productive professional relationships.

Additional Admission Requirements for the CERT/SPE
All applicants are expected to meet the following admissions requirements:
• Students enrolled in this program must have an undergraduate degree posted transcript.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript.

University of Phoenix, 2014-2015
PROFESSIONAL PROGRAMS
CERTIFICATE PROGRAMS FOR THE COLLEGE OF EDUCATION
A minimum equivalent of three (3) years post-high school work or volunteer experience.

- Students enrolling in the CERT/SPE must have a valid elementary or secondary license.

**Certificate Completion Requirements for the CERT/SPE**

- Completion of a minimum of 31 credits.
- A minimum grade point average (GPA) of 3.0.
- Completion of Field Experience Observation Record (30-40 hours). To ensure students meet this requirement documentation will be periodically uploaded, reviewed, and maintained in the candidate’s e-portfolio.
- Completion of e-portfolio.
- The certificate awarded for this program will read as: Special Education Generalist

**Institutional Recommendation for the CERT/SPE**

- Candidates must meet all current state certification requirements prior to being issued an Institutional Recommendation (IR, request for state teaching credential).
- On completion, candidates must complete a University of Phoenix diploma application in order to receive a diploma and official transcript. Candidates’ records will be analyzed to ensure that they have met all academic and financial requirements of their programs. An IR cannot be completed until this process has been finished. This will ensure that candidates have met all of their obligations to the University before they receive an IR from the University.
- Candidates must pass their state-mandated professional knowledge exam.
- Candidates must provide verification of state and U.S. Constitution coursework as required by the state certification agency.

**Residency Requirements and Course Waivers for the CERT/SPE**

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

**Additional Academic Program Re-entry Policy for the CERT/SPE**

Candidates who have been out of attendance for more than one year and have completed all degree requirements except student teaching, internship or practicum can complete within their original deadline may reenter their original program version. However, if the state certification requirements have changed since a candidate went out of attendance needing only student teaching, internship or practicum, in addition to the admissions paperwork required by the University Re-entry policy, the candidate must complete an Enrollment Agreement Addendum before reentry to the original program version will be approved.

Candidates who have been out of attendance for more than one year and are lacking courses in addition to their student teaching, internship or practicum must reenter the current program version and successfully complete all courses required by their reentry credit summary. Only students who reside within the United States and its territories are eligible to enroll into a University of Phoenix bachelor or master of education program. International students who have been out of attendance for more than 365 days will not be eligible to re-enter.

**Course Descriptions for the CERT/SPE**

**MTE 500** .................................................................0 credits  
**Orientation to the Special Education Certification Program**

This course is designed to provide an orientation to the primary components of the Special Education Certificate Program. Students will be introduced to the program’s certificate completion requirements. Field Experience, E-Portfolio, and technology resources will be discussed.

**COM 516** .................................................................1 credit  
**Professional Communications**

This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.

**SPE 513** .................................................................3 credits  
**Orientation to the Exceptional Child**

This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.

**SPE 546** .................................................................3 credits
Special Education Methods
This course provides an overview of methodologies used in teaching learners with special needs from early childhood on, with an emphasis on students with learning disabilities, mental retardation, and emotional handicaps. Students explore the relationship between individual student characteristics and the development of the Individualized Education Program, instructional implications of special education categories, characteristics of various service delivery models, task analysis, unit and lesson development, instructional strategies, classroom organization and management, behavior management, crisis prevention, and transition planning/career counseling. Communication through consultation and collaboration and professional/ethical practices are also considered.
SPE 512 ................................................................. 3 credits

Special Education Assessment and Interpretation
This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child’s abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavior recommendations are discussed.
SPE 559 ................................................................. 3 credits

Characteristics of Learning Disabilities
This course examines the characteristics of students with learning disabilities. Causes attributed to learning disabilities, the referral process, and available program/service delivery options are examined. Various assessment and remediation techniques, as well as the utilization of appropriate classroom materials, are analyzed, and evaluative and curricular modifications for students in inclusive settings are explored.
SPE 574 ................................................................. 3 credits

Characteristics of Intellectual/Developmental Disabilities
This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.
SPE 544 ................................................................. 3 credits

Characteristics of Emotional & Behavioral Disabilities
This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.
SPE 556 ................................................................. 3 credits

Characteristics of Physical & Health Disabilities
This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities including students with traumatic brain injury, other health impairments, and orthopedic impairments. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within schools. Various program models available through public, private, and hospital settings will be reviewed. Supports, accommodations, and curricular modifications will be explored. The impact of inclusive education and self-contained placements on this population will be analyzed.
RDG 500 ................................................................. 3 credits

Scientifically Based Reading Instruction
This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children’s performance in reading and in the language arts are also emphasized.
MTH 506 ................................................................. 3 credits

Methods of Teaching Mathematics
This course focuses on the methodology and assessment strategies that enhance learning in preschool through eighth-grade mathematics. Topics include an overview of mathematics content and process standards, developmentally effective instructional strategies, assessment, and classroom and materials management.
SPE 575 ................................................................. 3 credits

Inclusion Strategies of the Special Educator
This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.
Course work requiring prerequisites are identified by a ~ symbol following the course number.

The University reserves the right to modify the required course of study.

General Information for the CERT/AV

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/AV

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/AV

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.00.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Virtualization (Undergraduate)

Residency Requirements and Course Waivers for the CERT/AV

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/AV

- NTC 362....................................................................................3 credits
- Fundamentals of Networking
- NTC 340....................................................................................3 credits
- Desktop Virtualization
- NTC 345....................................................................................3 credits
- Cloud Virtualization
- NTC 350....................................................................................3 credits
- Data Center Virtualization
- NTC 412....................................................................................3 credits
- Data Center Virtualization Administration
- NTC 414....................................................................................3 credits
- Data Center Virtualization Design

The Desktop Virtualization course covers the skills and abilities required in implementing, installing, and configuring a virtual environment. This course will help students obtain skills and abilities across both vSphere and VMware View knowledge domains and can be used to help candidates prepare for VMware certification.

- NTC 345....................................................................................3 credits
Cloud Virtualization
The Cloud Virtualization course covers the skills and abilities required in installing, configuring and administering a VMware vCloud® environment. This course will help student obtain skills and abilities that can be used to help candidates prepare for VMware certification.

NTC 350 ................................................................. 3 credits

Data Center Virtualization
The Data Center Virtualization course covers installation, configuration and management of VMware® vSphere™, which consists of VMware ESXi™ and VMware vCenter™ Server. This course will help student obtain skills and abilities that can be used to help candidates prepare for VMware certification.

NTC 412 ................................................................. 3 credits

Data Center Virtualization Administration
The Data Center Virtualization Administration course explores the skills and abilities required in installing, configuring and administering large and more complex virtualized environments. This course will help student obtain skills and abilities that can be used to help candidates prepare for VMware certification.

NTC 414 ................................................................. 3 credits

Data Center Virtualization Design
The Data Center Virtualization Design course explores the skills and abilities required in designing and integrating multi-site, large enterprise virtualized environments. This course will help student obtain skills and abilities that can be used to help candidates prepare for VMware certification.

Advanced Cloud Computing Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the states. The University reserves the right to modify the required course of study.

General Information for the CERT/ACL
This certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the states. The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/ACL
• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HSET examination with a passing score.
• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). Course Descriptions for the CERT/ACL

NCT 300 ........................................................................................ 3 credits

Cloud Technologies

This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, it outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.

NCT 302 ........................................................................................ 3 credits

Network Web Services

This course focuses on Network Web Services with a specific focus on Amazon Web services. The courses will help an IT professional identify and gather requirements in order to define a Web Services solution to be built using architecture best practices and to be capable of providing guidance on architectural best practices to developers and system administrators throughout the lifecycle of the web services project.

WEB 407 ........................................................................................ 3 credits

Advanced Web Development

This course focuses on existing and emerging web development technologies. Topics include specialized web markup languages, server-side backend databases, server-side programming, web services, enterprise web development, and web applications.

WEB 436 ........................................................................................ 3 credits

Mobile Commerce

This course explores the concept of mobile commerce from the perspective of an advanced web developer or development manager.

Students will focus on E-Commerce principles, M-Commerce websites and apps, security, ethics and emerging technologies.

WEB 437 ........................................................................................ 3 credits

Website Commercialization

This course builds upon a professional understanding of web design and development, emphasizing the trend towards website commercialization. Topics of this course include strategy and e-commerce planning, online supply chain management, e-commerce tools and techniques, marketing strategies, customer experience and service, and search engine optimization.

VCT 340 ........................................................................................ 3 credits

Web Design with Dreamweaver

This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Dreamweaver CS6 certification exam. Topics include: Dreamweaver fundamentals – navigating the workspace, defining and creating a website; page layout, handling links and formatting text; integrating rich media; using templates and writing HTML and CSS code; and launching to the web and mobile.

Advanced Software Developer Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Advanced Software Developer Certificate concentrates on principles of software application development. This certificate explores modern software development though the use of multiple modern application programming languages as well as mobile programming and software architecture principles. This program helps preparation for industry certifications such as the C++ Certified Professional Programmer, Oracle Certified Professional JAVA SE Associate and Professional Programmer (OCP) and Microsoft C# and VB certifications.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-asd.

Java Programming Fundamentals

Java has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming. The syntax and semantics of the Java language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java 2 Platform Development Kit, Standard Edition.

CSS 422

Intro to Software Engineering

This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a background in applications software development and testing techniques through a combination of theory and application.

MBL 420

Software Architecture

This course is an integrating course in business application software engineering. Integration, migration, and maintenance of enterprise software systems, including legacy systems, are emphasized.

Android Mobile Development

This course will cover the basics of coding for Android. Topics include use of the Android APIs, persistent data retrieval and stor-
age, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.

POS 408 ..................................................................................... 3 credits

.NET I
This course introduces object-oriented programming in the context of business applications development. It develops the skills and knowledge necessary to produce beginning event-driven programs with graphical user interfaces (GUI). Topics include standard Windows compatible forms, controls, and procedures. The course uses Visual Basic.

POS 409 ..................................................................................... 3 credits

.NET II
This course extends the facilities of the .NET family of languages. The course focuses on the C# language. Topics covered include designing C# applications, writing and debugging programs, data files and database connectivity.

PRG 410 ..................................................................................... 3 credits

C++ Programming I
This course introduces the student to C++. Topics include C++ basics, selection and repetition structures, sequential files, arrays, and C++ libraries.

PRG 420 ..................................................................................... 3 credits

Java Programming I
This course introduces object-oriented programming in the context of business applications development. The basics of the Java programming language are covered.

PRG 421 ..................................................................................... 3 credits

Java Programming II
This course continues the subject in PRG420, Java Programming I. Topics include designing complex applications and the use of data files.

Programming Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The programming certificate focuses on the tasks involved in various programming management job roles, and the skills and technologies to perform these tasks. The certificate includes information system fundamentals and available coursework in logic for computer programming, programming in HTML5, C++, Java Programming, JavaScript applied to Microsoft Windows® application development.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-prg.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

General Information for the CERT/PRG
This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/PRG

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

• Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/PRG

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 2.0.

• Students earning the certificate en-route will only be placed on Academic Probation if their associate or bachelor program GPA falls below the minimum requirement.

• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

• The certificate awarded for this program will read as: Programming (Undergraduate)

Residency Requirements and Course Waivers for the CERT/PRG

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or
approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&IT courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/PRG

CIS 207 ............................................................................................................. 3 credits

Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
PRG 211 ............................................................................................................. 3 credits

Algorithms and Logic for Computer Programming
This course provides students with a basic understanding of programming development practices. Concepts covered include the application of algorithms and logic to the design and development of procedural and object-oriented computer programs to address the problem-solving requirements associated with business information systems. This course will cover procedural programming concepts including data types, control structures, functional decomposition, arrays, and files, classes and objects.
PRG 215 ............................................................................................................. 3 credits

Java Programming Fundamentals
Java has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming. The syntax and semantics of the Java™ language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java 2 Platform Development Kit, Standard Edition.
PRG 218 ............................................................................................................. 3 credits

Introduction to C/C++
This course introduces the student to C/C++ programming. The syntax and semantics of the C/C++ programming languages are used to produce simple computer programs.
PRG 280 ............................................................................................................. 3 credits

Programming in HTML5 with JavaScript
This course provides students an introduction to HTML5 with JavaScript and CSS3. Concepts covered include the creation and formatting of web pages using HTML5 and CSS3, development of web forms, and implementing program logic and validating user input using JavaScript.
PRG 281 ............................................................................................................. 3 credits

Windows Application Development using HTML5 and JavaScript I
This course covers developing web applications using HTML 5, CSS3, JQuery and JavaScript. This includes use of canvas and different HTML API, input using JavaScript.
PRG 282 ............................................................................................................. 3 credits

Windows Application Development using HTML5 and JavaScript II
This course covers developing web applications using HTML 5, JQuery and JavaScript. This includes use of different advanced JavaScript API such as Drag-and-drop API, Web storage API, Geo-location API, Web socket API, Web SQL, and Document Object Model (DOM) components.

Advanced Networking Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Advanced Networking Certificate is designed to provide complete coverage of networking topics including the OSI model, network topologies, network protocols, network operating systems, as well as network architecture, network design and management. Comprehensive coverage of local area, wide area, and wireless networks including performance and service levels are addressed in this concentration. This certificate also provides an exposure to network modeling and measuring of network performance. This program helps preparation for industry certifications such as the Microsoft Certified Solutions Associate (MCSA) and Expert (MCSE) as well as the CompTIA Linux+ Powered by LPI certifica-
• A minimum grade point average (GPA) of 2.0.
• Completion of a minimum of 18 credits.

The University reserves the right to modify the required course of study.

General Information for the CERT/AN

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/AN

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation equivalency may be submitted to satisfy this requirement.

• Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/AN

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 2.0.
  • Students earning the certificate on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  • Students earning this certificate on Academic Probation if their bachelor program GPA falls below the minimum requirement.

Course Descriptions for the CERT/AN

NTC 320 ................................................................................... 3 credits
Network Design Associate

This course provides an intensive workshop where the student will learn to design network models, IP addressing and routing protocols, and network services.

Network Design Associate

This course offers an introduction to the concepts and technologies associated with enterprise campus networks, enterprise edge and remote networks, and network services.
CERTIFICATE PROGRAMS FOR THE COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

Windows Server Configuration
This course provides students with the knowledge and skills necessary to install and configure Windows Servers 2012. The course covers Server Roles Configuration, Server Virtualization Configuration, Network Services Configuration, and Directory Services Administration & Group Policy.

Advanced Windows Services
This course provides students with the knowledge and skills necessary to configure advanced Windows services. The course covers High Availability, Server File and Storage, Business Continuity, Advanced Network Services and Directory Infrastructure & Access Solutions.

Fundamentals of Networking
This course provides a foundation in the basic telecommunications and networking technologies fundamental to the industry and to the broad field of telecommunications. Analog, digital, and radio frequency technologies are covered. Also covered in this course is an introduction to the OSI protocol model, network-switching systems, basics of wireless communications, and network security.

Global Network Architecture and Design
This course addresses the fundamentals of network design and analysis with an emphasis on network traffic. The network design techniques necessary for LAN and WAN implementations are covered. The concept of service levels, the provisioning of and importance of service levels are analyzed.

UNIX Networking
This course is a survey of the UNIX operations. The student will gain an understanding of the internal operations of the UNIX system, which enables the user to make efficient use of files, file systems, and processes. Commands for efficient management of UNIX system files, file systems and process, systems administration and security are also examined.

Advanced Multimedia Development Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Advanced Multimedia Development Certificate focuses on the application of effective design principles in the development of various digital media. The skill set obtained in this certificate cover digital design, 3D design, image editing, web design, desktop publishing, electronic publishing and multimedia development. This program helps preparation for industry certifications such as the Adobe Certified Expert (ACE) as well as the Autodesk 3ds Max Design certification.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

• Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/AMMD

• Completion of a minimum of 18 credits.
• A minimum grade point average (GPA) of 2.0.
• Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• The certificate awarded for this program will read as:
Advanced Multimedia Development (Undergraduate)

Residency Requirements and Course Waivers for the CERT/AMMD
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credit, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/AMMD
CIS 207 .................................................................................... 3 credits

Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
VCT 305 .................................................................................... 3 credits

Digital Design
This course presents principles of digital design. An overview of digital design is presented that includes designing and developing creative presentations across various Medias including print, video, web, and mobile platforms.
VCT 315 .................................................................................... 3 credits

3D Design
This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, it outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.
VCT 330 .................................................................................... 3 credits

Image Editing with Photoshop®
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Photoshop CS6 certification exam. Topics include: Photoshop fundamentals; using Adobe Bridge; using Camera Raw; editing images; use of selections, layers and adjustments; working with video; and outputting for web, print and mobile.
VCT 340 .................................................................................... 3 credits

Web Design with Dreamweaver®
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Dreamweaver CS6 certification exam. Topics include: Dreamweaver fundamentals – navigating the workspace, defining and creating a website; page layout, handling links and formatting text; integrating rich media; using templates and writing HTML and CSS code; and launching to the web and to mobile.
VCT 350 .................................................................................... 3 credits

Desktop Publishing with Acrobat Professional®
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Adobe Acrobat XI Pro certification exam. Topics include: viewing, navigating, creating, modifying and enhancing PDF documents; working with actions; reviewing, collaborating and commenting; creating forms and collecting data; managing security; and print production.
VCT 360 .................................................................................... 3 credits

Electronic Publishing with InDesign®
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: InDesign CS6 certification exam. Topics include: establishing layouts, creating and managing text, working with graphics, working with colors and transparency, and publishing documents.
VCT 370 .................................................................................... 3 credits

Multimedia Development with Flash®
This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Flash Professional CS6 certification exam. Topics include: planning and designing Flash projects; creating, importing and managing assets, including images, audio, and video; creating animations and inter-
activity: programming with ActionScript 3.0; and testing and publishing Flash projects.

Advanced Information Systems Security Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Advanced Information Systems Security Certificate concentrates on the concepts and principles of securing and protecting the information assets of the organization. The areas of information assurance, systems security, risk management, cryptography, cyber security and enterprise security are covered in this certificate. This program helps prepare for industry certifications such as theISC2 Systems Security Certified Practitioner (SSCP) and Certified Information Systems Security Professional (CISP).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aiss.

**Course Descriptions for the CERT/AISS**

**Fundamentals of SSCP**
This course introduces the basics of systems security. Emphasis is placed on access controls, networking, auditing, security operations, and malicious code activity. This course is aligned to the Systems Security Certified Practitioner (SSCP) exam.

**Intro to Information Assurance & Security**
This course is an introduction to information assurance and security in computing technology. Topics include risk management; protecting information in the enterprise; business continuity and disaster recovery planning; threats and remediation; legal, ethical, and professional issues; and considerations within systems development processes.

**Enterprise Security**
This course covers the managerial and technical considerations related to access controls, authentication, external attacks and other risk areas facing the enterprise. This course will also survey the techniques to prevent unauthorized computer and facility access as well the concepts for protecting the hardware and software assets of the enterprise.

**Information Systems Security**
This course introduces students to the concepts of information systems security within the framework of the major security certification, the Certified Information Systems Security Professional (CISSP). It provides an overview of each of the CISSP’s ten domains and prepares students for more detailed work in the subsequent program courses. Those domains include Access Controls; Application Security; Business Continuity and Disaster Recovery; Cryptography; Information Security and Risk Management; Legal, Regulations, Compliance, and Investigation; Security Architecture and Design, Telecommunications and Network Security.

**Introduction to Cryptography**
This course introduces cryptography and encryption concepts and how they are applied in real-world situations in order to implement strong and reliable security safeguards. This course will survey the various cryptography and encryption methods used in today’s information technology and communications environments as well as to review the considerations for selecting commercial products that support encryption technology.

**Cyber Security**
This course explores the evolution from information security to cyber security, policy and cyber security development and the relationships between business and public/private sector organizations in meeting the challenges of cyber security threats. Students will be introduced to the legal and regulatory requirements for internal network and internet security both as they apply to business and personal use. Vulnerabilities of both the organization and the individual will be reviewed as well as the processes and controls for mitigating cyber security threats. The need for an IT audit will also be explored as part of the vulnerability/mitigation process as well as the need for development of an organization-wide cyber security policy.

**Information Systems Risk Management**
This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of computer based information systems. This course will survey remedies and prevention techniques available to address the risk areas present. Organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.

**Advanced Business Analytics Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Advanced Business Analytics Certificate (ABA) is designed to provide specific theories, competencies, and skills necessary for success in the field of Business Analytics business systems analyst. This concentration will examine a number of methodologies and tools important to the discipline such as database concepts, data modeling, SQL, project management, information technology service management, business intelligence and data management. This program helps preparation for industry certifications such as the Oracle Database Administrator Certified Associate, ITIL Foundation and the PMI Certified Associate in Project Management (CAPM).

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aba.

• The course must have been completed with a grade of “C” (2.0) or better during the effective dates of the approved articulation agreement.
• The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Course Descriptions for the CERT/ABA

DBM 380 .................................................................................... 3 credits
Database Concepts
This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.
IM 300 .................................................................................... 3 credits
Data Organization Architecture
This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.
IM 305 .................................................................................... 3 credits
Data Modeling
This course provides an in-depth look at several intermediate design and architecture concepts. The course covers the design method used in the creation of a relational database, the required steps to reengineer a database, and several tools and techniques used through the database design process.
POS 410 .................................................................................... 3 credits
SQL for Business
This course covers Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.
CMGT 420 .................................................................................... 3 credits
Integrated Project Management

This course helps to prepare students for the Project Management Institute (PMI®) (CAPM®) certification exam. It covers the Project Management Framework, a set of standard terminology and guidelines for project management, and the knowledge areas in managing projects.

BSA 413 .................................................................................................................. 3 credits

IT Service Management

This course addresses IT service management best practices from the perspective of the IT Infrastructure Library (ITIL) framework. The ITIL framework consists of Service Strategy, Design, Transition, Operation, and Continual Service Improvement.

Database Administration Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The certificate program in Database Administration focuses on the tasks and skills involved in various database management job roles, and the technologies used to perform those tasks. The certificate includes information system fundamentals, logic for computer programming, database applications, querying and administering a SQL Server, managing the database environment, and applied database management. This concentration addresses the fundamental technical skills specified in the Microsoft® Certified Solutions Associate (MCSA) body of knowledge.

For more information about our graduation rates, the median debt ramifications Associate (MCSA) body of knowledge.

The University reserves the right to modify the required course of study.

General Information for the CERT/DA

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/DA

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/DA

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

The certificate awarded for this program will read as: Database Administration (Undergraduate)

Residency Requirements and Course Waivers for the CERT/DA

Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/DA

CIS 207 .................................................................................................................. 3 credits
Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

PRG 211 ................................................................. 3 credits

Algorithms and Logic for Computer Programming
This course provides students with a basic understanding of programming development practices. Concepts covered include the application of algorithms and logic to the design and development of procedural and object oriented computer programs to address the problem solving requirements associated with business information systems. This course will cover procedural programming concepts including data types, controls structures, functional decomposition, arrays, and files, and classes and objects.

DBM 290 ................................................................. 3 credits

Fundamentals of Access Database
This course will cover the use of desktop database software to create small database applications. Emphasis will be placed on creating and managing a database, creating tables, and building forms. Emphasis is placed on hands-on experience in the installation, design, and debugging of desktop database software.

DBM 294 ................................................................. 3 credits

DBM 296 ................................................................. 3 credits

Querying a SQL Server
This course provides an overview of querying a SQL Server. Emphasis is placed on creating database objects, working and modifying data, and optimizing the database environment. This course addresses the objectives contained in the Microsoft Certified Solutions Associate (MCSA) for querying a Microsoft® SQL server.

DBM 298 ................................................................. 3 credits

Administering a SQL Server
This course provides an introduction to the installation, configuration, support, availability and recovery of databases. The considerations for database administration addressing the requirements for user access, security, backup and recovery will be covered in this course. This course addresses the objectives contained in the Microsoft Certified Solutions Associate (MCSA) for administering a Microsoft® SQL server database.

DBM 298 ................................................................. 3 credits

Implementing a Data Warehouse
This course examines the use of database technology in a variety of information technology applications. Emphasis is placed on implementing, configuring, deploying, and maintaining SQL Server Integration Services (SSIS), Analysis Services (SSAS), and Reporting Services (SSRS) solutions. This course addresses the objectives contained in the Microsoft Certified Solutions Associate (MCSA) for implementing a data warehouse with Microsoft SQL server.

DBM 298 ................................................................. 3 credits

Information Assurance and Security Certificate (Undergraduate)
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Information Assurance and Security Certificate offers coursework to successfully apply information technology theory and principles to address real world business opportunities and challenges. The coursework provides students with technical skills and interactive, hands-on experience in information systems, wireless networking, cyber security, cryptography, and systems security. This certificate concentrates on the concepts and principles of securing and protecting the information assets of the organization. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-ias.

General Information for the CERT/IAS
This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/IAS
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HISSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/IAS

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
• Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• The certificate awarded for this program will read as: Information Assurance and Security (Undergraduate)

Residency Requirements and Course Waivers for the CERT/IAS
Students must meet the established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits from a combination of the Required Course of Study, General Education, and Electives must be completed at University of Phoenix.
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/IAS
CIS 207 ................................................................................... 3 credits
Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunication, and the Internet.
CMGT 245 ................................................................................ 3 credits
IS Security Concepts
This course introduces general concepts of information system security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.
NCT 247 ................................................................................... 3 credits
Wireless Networking Concepts
This course explores concepts of wireless networking systems, including wireless networking and topologies; hardware protocols; hardware selection and implementation; interfaces with local-area network (LAN), metropolitan area network (MAN), and wide-area network (WAN) networks; basic wireless security; and network integration concepts.
POS 221 ................................................................................... 3 credits
Windows Server Configurations
This course is a survey of Windows Server Administration. Topics emphasize the structure and the various applications supported by Windows Server. The course includes remote, hands-on access to Windows lab exercises.
CMGT 230 ................................................................................ 3 credits
Fundamentals of SSCP
This course introduces the basics of systems security. Emphasis is placed on access controls, networking, auditing, security operations, and malicious code activity. This course is aligned to the Systems Security Certified Practitioner (SSCP) exam.
CMGT 232 ................................................................................ 3 credits
Fundamentals of Cyber Security and Cryptography
This course introduces the basics of cyber security and cryptography encryption concepts. This course will provide an overview of the various security and encryption methods used in today's information technology and communication environments.

Multimedia Development Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The certificate in Multimedia Development offers coursework focused on technical knowledge and IT skills applied to multimedia and digital image design. This coursework provides students with technical skills and interactive, hands-on experience in electronic visual communication fundamentals, image manipulation, design fundamentals and multimedia development. This concentration covers the body of knowledge for the Adobe Certified Associate (ACA) exam.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-mmd.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/MMD

- CIS 207 .................................................................................. 3 credits
- Information Systems Fundamentals
  This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
- VCT 236 .................................................................................. 3 credits
- Introduction to Image Editing and Formatting
  This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on image editing software applications, file formats, composition, color, text design, retouching, and manipulation of graphic and photographic images.
- WEB 240 .................................................................................. 3 credits
- Web Design Fundamentals
  This course introduces development tools and techniques used to publish web pages on the World Wide Web. Students use basic hypertext markup language, scripting, and presentational technologies to create websites with the aid of a software authoring application. Topics include XHTML, CSS, JavaScript®, server hosting, site publication, site maintenance, and search engine optimization.
- VCT 221 .................................................................................. 3 credits
- Rich Media Communication Fundamentals
  This course addresses the skills needed to communicate effectively using digital media tools. Students use rich media design elements to develop and manipulate interactive content that is based on fundamental design principles and technical requirements.
- VCT 231 .................................................................................. 3 credits
- Video Communication Fundamentals
  This course introduces the tools and techniques used in video post-production. This includes examining post-production workflow, use of graphics and audio to enhance video clips, and preparing video communication content for a professional audience.
- VCT 241 .................................................................................. 3 credits
- Electronic Publishing Fundamentals
  This course introduces the role of electronic publishing in the delivery of information to businesses and consumers. Emphasis is placed on the methods and techniques involved in the electronic publishing of professional materials, reports, and digital content.

Advanced Mobile Development Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment
The Advanced Mobile Development certificate is designed to provide specific theories, competencies, and skills necessary for success as a Mobile Development professional. The Advanced Mobile Development certificate prepares the student to design, develop and implement mobile applications in the leading mobile platforms.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/representative for more information.

Certificate Completion Requirements for the CERT/AMD
- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Mobile Development (Undergraduate)

Residency Requirements and Course Waivers for the CERT/AMD
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements). This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
Windows Mobile Development. Topics include security, multithreading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

**Cisco Networking Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Cisco Networking certificate offers coursework designed to help students acquire the knowledge to install, configure and operate Local Area Network (LAN), Wide Area Network (WAN) as well as routing and switching implementations and management. This certificate covers the body of knowledge for the Cisco® Certified Network Associate (CCNA®) exam in preparing the student to install and configure Cisco® switches and routers in multiprotocol internetworks using LAN and WAN interfaces. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-ccna.

Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/CCNA

CIS 207 ................................................................................................. 3 credits

Information Systems Fundamentals
This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

CMGT 245 ............................................................................................. 3 credits

IS Security Concepts
This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.

CIT 249 ................................................................................................. 3 credits

Local Area Networking Fundamentals
This course addresses the fundamentals of local area networking (LAN). Students will learn about Ethernet LANs, wireless LANs (WLAN), and LAN connections. This will include securing the network, transmission control protocol / internet protocol (TCP/IP), troubleshooting switches, WLAN security, and constructing a network address scheme.

CIT 274 ................................................................................................. 3 credits

Routing and Switching Implementations
This course provides students with the knowledge and skills necessary to implement and support a small to medium size network using wide area networking technologies. This course covers wide area networks (WAN) connections, network environment management, small network implementation, and medium sized switched network construction. It includes enabling the internet connection, router startup and configuration, and securing the expanded network.

CIT 276 ................................................................................................. 3 credits

Routing and Switching Management
This course provides the knowledge and skills necessary for routing and switching management. The course covers address space management and local area network (LAN) extension into a wide area network (WAN). This includes network address translation (NAT) and port address translation (PAT), virtual private network (VPN) solutions and frame relay connectivity.

Desktop Support Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Desktop Support Certificate offers coursework in the technologies and methods necessary to provide technical support to information technology and computer system users. Students will learn the customer support aspects of personal computer desktop software applications, computer hardware and software according to the A+ body of knowledge, including diagnosis and solutions.
The certificate awarded for the program will read as:

Preferred Sequence for the CERT/DS

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate on a part-time basis must be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate on a part-time basis must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

- The certificate awarded for the program will read as: Network Support (Undergraduate)

**Residency Requirements and Course Waivers for the CERT/NS**

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits, be completed at University of Phoenix.

Students in this program may complete a maximum of 6 credits from approved nationally accredited transferable coursework. In order to be granted a waiver with credit, the course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.

The course must have been completed within the past ten years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.

The course must be comparable in content and credits to the University course; it is not replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the CERT/NS**

CIS 207 ......................................................................................3 credits

**Information Systems Fundamentals**

This course introduces the fundamentals of computer systems and the role of information processing in today’s business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

NTC 245 ......................................................................................3 credits
Foundation of Local Area Networks
This foundational course covers local area network topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.

NTC 247 ................................................................. 3 credits

Wireless Networking Concepts
This course explores concepts of wireless networking systems, including wireless networking and topologies; hardware protocols; hardware selection and implementation; interfaces with local-area network (LAN), metropolitan area network (MAN), and wide-area network (WAN) networks; basic wireless security; and network integration concepts.

NTC 249 ................................................................. 3 credits

Wide Area Networking Concepts
This course covers Wide Area Networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.

CMGT 245............................................................... 3 credits

IS Security Concepts
This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.

POS 221 ................................................................. 3 credits

Windows Server Configurations
This course is a survey of Windows Server Configurations. Topics emphasize the structure and the various applications supported by Windows Server. The course includes remote, hands-on access to Windows lab exercises.

Web Administration Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Web Administration Certificate focuses on the tasks involved in various web technology job roles, and the skills and technologies to perform those tasks. The coursework includes information system fundamentals, image editing and formatting, information system security, website development, Internet business concepts and networking technology. This certificate addresses the objectives specified in the CIW® Web Foundations, CompTIA® IT Fundamentals and CompTIA® Security+ certificates.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-wa.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Preferred Sequence for the CERT/WA
CIS 207 ................................................................. 3 credits
Information Systems Fundamentals
VCT 236 ~ ................................................................. 3 credits
Introduction to Image Editing and Formatting
CMGT 245 ~ ........................................................... 3 credits
IS Security Concepts
CIT 277 ~ ................................................................. 3 credits
Website Development Foundations
CIT 278 ................................................................. 3 credits
Internet Business Concepts
CIT 279 ~ ................................................................. 3 credits

Network Technology Foundations
The University reserves the right to modify the required course of study.

General Information for the CERT/WA
This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/WA
All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body; GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HISET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/WA

- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their associate program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for the program will read as: Web Administration (Undergraduate)

Residency Requirements and Course Waivers for the CERT/WA
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be
Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

**Course Descriptions for the CERT/WA**

**CIS 207** .........................................................3 credits  
**Information Systems Fundamentals**

This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.

**VCT 236** .........................................................3 credits  
**Introduction to Image Editing and Formatting**

This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on image editing software applications, file formats, composition, color, text design, retouching, and manipulation of graphic and photographic images.

**CMGT 245** .........................................................3 credits  
**IS Security Concepts**

This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.

**CIT 277** .........................................................3 credits  
**Website Development Foundations**

This course introduces essential Website development skills. Students will write code manually, as well as use graphical user interface (GUI) authoring tools. Topics include XHTML code validation, web forms, tables and frames, internet marketing and search engine optimization, and content formatting with style sheets. This course addresses the objectives specified in the CIW Site Development Associate Certificate.

**CIT 278** .........................................................3 credits  
**Internet Business Concepts**

This course introduces the Information Technology (IT) foundational skills and technologies used in business and the tasks involved in various IT job roles. Topics include Internet connection methods and protocols, the Domain Name System (DNS), cloud computing, social networking, and business skills. This course addresses the objectives specified in the CIW Internet Business Associate Certificate.

**CIT 279** .........................................................3 credits  
**Network Technology Foundations**

This course introduces the basics of network administration. Topics include the fundamentals of network architecture, the secure transmission of data, the OSI reference model, implementing a Content Management System (CMS), and mobile computing devices. This course addresses the objectives specified in the CIW Network Technology Associate Certificate.

**A+ Fundamentals Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

This program is designed to help students become competent in the areas of computer hardware installation, configuration, maintenance, networking, file management, security, and troubleshooting.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-aplus.

**Required Course of Study for the CERT/APLUS**

Course work requiring prerequisites are identified by a ~ symbol following the course number.

- Note: Although the completion of courses for this certificate program does not result in A+ certification, there are course materials available including simulations, hands-on exercises, and video lectures which the student can use for certification preparation if they choose to take the certification exam.

**Computer Hardware Support, 3 total credits**

**CIS 290** .........................................................3 credits  
Personal Computer Hardware Support

**Computer Operating System (OS) Support, 3 total credits**

**CIS 292** .........................................................3 credits  
Personal Computer OS Support

**Computer Systems Maintenance**

The University reserves the right to modify the required course of study.

**Additional Admission Requirements for the CERT/APLUS**

All applicants are expected to meet the following admissions requirements:

**General Information for the CERT/HIT**

This certificate program may be taken on its own or may be earned en-route to earning an associates degree. Students who completed a certificate in its entirety and who later choose to enroll in an associates program with a concentration in the same area of focus as the completed certificate will not earn a second certificate en-route to completing the associates program.

**Additional Admission Requirements for the CERT/HIT**

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

**Certificate Completion Requirements for the CERT/APLUS**

Credit Bearing Certificate completion requirements are the following:

- Completion of the 6 credits in the Required Course of Study.
- All students must meet residency requirements as set by the Dean for each Certificate program. Students who have completed the courses required for this certificate program as part of a University of Phoenix degree program are not eligible to enroll in and earn this certificate.
- A minimum program grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: A+ Fundamentals

**Residency Requirements and Course Waivers for the CERT/APLUS**

- Students may not waive any credits in this certificate program.
- The following courses in the required course of study may not be waived: CIS 290, CIS 292

**Course Descriptions for the CERT/APLUS**

**Personal Computer Hardware Support**

This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair.

**Personal Computer OS Support**

This course is an introduction to the fundamentals of personal computer operating systems for computer software configuration, file management, performance monitoring, optimization, maintenance, recovery, and security.

**Computer Systems Maintenance**

This course is an introduction to computer hardware and software maintenance and troubleshooting. This course will focus on typical problem scenarios, diagnostics, procedures and solutions.

**Health Care Information Technology Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The University reserves the right to modify the required course of study.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

Certificate Completion Requirements for the CERT/HIT
- Successful completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
- Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Health Care Information Technology
- Students who have earned an Associate (A or B Track) or undergraduate degree in Information Technology may not receive a certificate in the same area of focus. Example: a student may not earn an AAIT/HIT Track A or B first and come back to earn an HIT certificate; however, students who have completed a certificate may return to receive an associates or bachelors in Information Technology with a concentration in the same area as the completed certificate or another approved concentration.

Residency Requirements and Course Waivers for the CERT/HIT
Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:
- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following course(s) in the Required Course of Study may not be waived: CIS 298

**Certificate Completion Requirements for the CCNA**

- Completion of 12 credits in the Required Course of Study
- All students must meet residency requirements as set by the Dean for each Certificate program.
- A minimum grade point average (GPA) of 2.0.
- The certificate awarded for this program will read as: Cisco Networking Fundamentals

**Residency Requirements and Course Waivers for the CCNA**

- Students may not waive any credits in this certificate program.
- The following courses in the required course of study may not be waived: CIT 245, CIT 249, CIT 274, CIT 276

**Course Descriptions for the CCNA**

**CIT 245**

This course provides students with the knowledge and skills necessary for the construction of a small to medium-sized network using wide area networking technologies. This course covers wide area networks (WAN) connections, network environment management, and medium-sized switched network construction. It includes enabling the internet connection, router startup and configuration, and securing the expanded network.

**CIT 274**

This course provides students with the knowledge and skills necessary to design, build, and maintain routing and switching technologies. Instruction covers constructing medium-sized routed networks, implementing Single-Area Open Shortest Path First (OSPF) routing protocol, Enhanced Interior Gateway Routing Protocol (EIGRP), and applying Access Control Lists (ACLs). It includes a review of routing operations and implementing Variable Length Subnet Masking (VLSM).

**CIT 276**

This course provides the knowledge and skills necessary for routing and switching management. The course covers address space management and local area network (LAN) extension into a wide area network (WAN). This includes network address translation (NAT) and port address translation (PAT), virtual private network (VPN) solutions and frame relay connectivity.

**Graduate Business Analytics Certificate**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Graduate Business Analytics Certificate is designed to provide specific theories, competencies, and skills necessary for success in the field of Business Analytics. This certificate will examine a number of methodologies and tools important to the discipline such as Information Systems Concepts, Database Management, Statistics, IT Architecture, Data Relationship Management, Customer Relationship Management, Analytic Programming and Statistical Business Analytics. Courses in this certificate can be used to help prepare for Oracle and SAS industry certifications.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-ba

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Information Systems Concepts
This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.

DBM 502 .................................................................................. 3 credits

Database Management
The course focuses on database management systems from a managerial perspective. Emphasis is placed on developing a strategy for managing and organizing corporate data, including data warehousing, to support the business activities of the organization. The course uses Microsoft Access and simulations of Oracle software.

MTH 540 .................................................................................. 3 credits

Statistics
This course surveys descriptive and inferential statistics with emphasis on practical applications of statistical analysis. The principles of collecting, analyzing, and interpreting data are covered in this course. It examines the role of statistical analysis, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings through the applications and functions of statistical methods.

Graduate Information Systems Audit and Control Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Graduate Information Systems Audit and Control Certificate will examine a number of methodologies and tools important to the discipline such as Information Systems Concepts, Financial Accounting, IS Auditing Processes, IT Governance and Management, Acquisition, Development and Implementation of IS, Operations, Maintenance and Support of IS, and Information Assets Protection. Courses in this certificate can be used to help prepare for ISACA industry certifications.

Information Systems Concepts

The University reserves the right to modify the required course of study.

General Information for the CERT/G-ISA

This certificate program may be taken on its own or may be earned en-route to earning a graduate degree.

Additional Admission Requirements for the CERT/G-ISA

All applicants are expected to meet the following admissions requirements:

• An undergraduate degree from a nationally accredited or approved university or comparable undergraduate bachelor’s degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e.- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• Applicants must have access to a suitable work environment for completion of course assignments.

• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.

• Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/G-ISA

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 3.0.

• Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.

• Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

Residency Requirements and Course Waivers for the CERT/G-ISA

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.

In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better;
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Course Descriptions for the CERT/G-ISA

ACC 537 ............................................................... 3 credits

Financial Accounting
In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders’ equity, statement of cash flows, and error correction and accounting changes.

BSA 505 ............................................................... 3 credits

IS Auditing Processes
This course focuses on information systems auditing, IT governance and protection of information assets. An audit preparation guide is created. Applicable laws, regulations, standards, guidance, techniques and professional ethics will be applied. Control self-assessment is evaluated as a process of continuous IS audit preparation.

BSA 510 ............................................................... 3 credits

IT Governance and Management
This course provides an intensive workshop where the student will gain the hands-on experience and knowledge required to provide assurance that the enterprise has the structure, policies, accountability mechanisms and monitoring practices in place to achieve the requirements of corporate governance of IT. This course is based on the Governance and Management of IT Domain of the ISACA Model Curriculum for IS Audit and Control. ISACA (www.isaca.org) is a leading global provider of knowledge, certifications, community, advocacy and education on information systems (IS) assurance and security, enterprise governance and management of IT, and IT-related risk and compliance.

BSA 515 ............................................................... 3 credits

Acquisition, Development and Implementation of IS
The Information Systems Operations, Maintenance and Support domain is divided into ten topic areas that focus on service level management, maintenance of information systems, problem and incident management, change and configuration management, and backup and restoration of systems. The objective of this domain is to ensure that students understand and can provide assurance that the practices for systems operations and maintenance meet the enterprise’s strategies and objectives.

BSA 520 ............................................................... 3 credits

Operations, Maintenance and Support of IS
The Information Systems Acquisition, Development and Implementation domain is divided into six topic areas that focus on business case development, project management and controls. The objective of this domain is to ensure that students understand and can provide assurance that the practices of acquiring, developing, testing and implementing information systems meet the enterprise’s strategies and objectives.

BSA 525 ............................................................... 3 credits

Information Assets Protection
The Protection of Information Assets domain is divided into five topic areas that focus on design and implementation of system and security controls, data classification, physical access, and the process of retrieving and disposing of information assets. The objective of this domain is to ensure that students understand and can provide assurance that the enterprise’s security policies, standards, procedures and controls ensure the confidentiality, integrity and availability of information assets.

CIS 568 ............................................................... 3 credits

Information Systems Concepts
This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.

Graduate Information Systems Management Certificate
The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Graduate Information Systems Management Certificate is designed to provide Information Systems Professionals an essential understanding of the Information Systems and Business environment in which they will work. This certificate contains courses on information systems, programming concepts, database management, and information system leadership. The certificate also provides an understanding of business areas such as accounting, marketing and human resources and their importance for an information systems leader.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/g-ism.

Course work requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the CERT/G-ISM
Students must select 18 credits from the following course selections:

BSA 500 ............................................................... 3 credits
BSA 502 ............................................................... 3 credits

Business Systems I
Business Systems II
CIS 532 ............................................................... 3 credits

Information Systems Leadership
CIS 568 ............................................................... 3 credits

Information Systems Concepts
CSS 562 ............................................................... 3 credits

Programming Concepts
DBM 502 ............................................................... 3 credits
Database Management
The University reserves the right to modify the required course of study.

General Information for the CERT/G-ISM
This certificate program may be taken on its own or may be earned en-route to earning a graduate degree.

Additional Admission Requirements for the CERT/G-ISM
All applicants are expected to meet the following admissions requirements:
• An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e. JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
• Applicants must have access to a suitable work environment for the completion of course assignments.
• A cumulative grade point average (GPA) of 2.5 on the undergraduate degree posted transcript is required for admission.
• Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/G-ISM
• Completion of a minimum of 18 credits.
• A minimum grade point average (GPA) of 3.0.
• Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
• The certificate awarded for this program will read as: Graduate Information Systems Management

Residency Requirements and Course Waivers for the CERT/G-ISM
Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix. Students in this program may waive a maximum of 6 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework.
In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:
• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “B” (3.0) or better;

Course Descriptions for the CERT/G-ISM
BSA 500 ......................................................................................3 credits
Business Systems I
This course introduces business systems. The course first reviews the basics of the business environment and influences on that environment. Then accounting and finance business systems are reviewed.
BSA 502 ......................................................................................3 credits
Business Systems II
This course reviews the following business systems: marketing, sales, human resources, operations and legal. Emphasis is placed upon the inputs and outputs of information systems and the potential for integration of the systems.
CIS 532..................................................................................3 credits
Information Systems Leadership
The Information Systems Leadership course provides an opportunity for a student to explore the role of senior level Information systems executives, these titles range from IT director, VP of technology, and CIO as well as functional titles. Their duties often encompass responsibility for the overall direction for technology through strategic planning and evaluation. This course addresses numerous skills that can help Information Systems leaders excel within their unique roles in the organization.
CIS 568..................................................................................3 credits
Information Systems Concepts
This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.
CSS 562 ..................................................................................3 credits
Programming Concepts
This course provides the conceptual foundation to develop computer software programs. Topics include program development processes, flowcharting, basic design, program structure (methods and events), Boolean logic, looping, recursion, lists and arrays.
DBM 502..................................................................................3 credits
Database Management
The course focuses on database management systems from a managerial perspective. Emphasis is placed on developing a strategy for managing and organizing corporate data, including data warehousing, to support the business activities of the organization. The course uses Microsoft Access and simulations of Oracle software.
CERTIFICATE PROGRAMS FOR THE COLLEGE OF CRIMINAL JUSTICE AND SECURITY

Criminal Justice Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Criminal Justice Management certificate area coursework is designed to give learners a depth of understanding concerning the management and administrative skills necessary to effectively run organizations in the various domains of criminal justice system. The courses included in this degree concentration focus primarily on the management and administration skill sets associated with the police, the courts, and with corrections. The theories and principles behind criminal justice are also examined. Students learn about policies, procedures associated with management functions, as well as many administrative practices and factors impacting criminal justice agency operations. This will not only give you the insight into what these specific departments are and what they do, but how to maintain and evaluate organizational operations from an administrative viewpoint. The certificate does not lead to certification; however the coursework alignment provides an emphasis of academic content that upon mastery is a source of in depth knowledge and skills for effectively managing criminal justice organizations.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cjm.

Courses requiring prerequisites are identified by a ~ symbol following the course number.

Required Course of Study for the CERT/CJM

CJA 395 ................................................................. 3 credits
Current Issues/Futures in Criminal Justice Management
CJA 444 ~ ............................................................. 3 credits
Organizational Behavior and Management
CJA 454 ~ ............................................................. 3 credits
Criminal Justice Management Theory and Practice
CJA 474 ~ ............................................................. 3 credits
Managing Criminal Justice Personnel
CJA 475 ~ ............................................................. 3 credits
Forecasting and Strategic Planning
CJA 484 ~ ............................................................. 3 credits
Criminal Justice Administration Capstone

The University reserves the right to modify the required course of study. The University’s Criminal Justice programs are educational degree programs. For those interested in pursuing a career in law enforcement, corrections, or as a peace officer with any particular local, state, federal, or international agency, there are numerous additional qualifications (and often disqualifications) depending on the position. Before enrolling in a Criminal Justice program, potential students are highly encouraged to check with the relevant agency for a complete list of position requirements. The University makes no representations regarding whether any particular University program will qualify a graduate for any such position.

Additional Admission Requirements for the CERT/CJM

All applicants are expected to meet the following admissions requirements:

• High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.

• Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official High School transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.

• An associate's degree or higher from a regionally or approved nationally accredited college or university, or candidate for accreditation, or foreign equivalent program earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

• A minimum of one year full-time post high school work experience in the Criminal Justice industry is required.

• Signed Acknowledgement Form

• A minimum of one year full-time post high school work experience in the Criminal Justice industry is required.

Certificate Completion Requirements for the CERT/CJM

• Completion of a minimum of 18 credits.

• A minimum grade point average (GPA) of 2.0.

• Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.

• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

• The certificate awarded for this program will read as: Criminal Justice Management (Undergraduate)

Additional Residency Requirements and Course Waivers for the CERT/CJM

Students must meet established University residency requirement
for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of “C” (2.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be of an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the required course of study may not be waived: CJA 484

**Course Descriptions for the CERT/CJM**

**CJA 395**.....................................................................................3 credits

**Current Issues/Futures in Criminal Justice Management**

This course examines both the principle issues in contemporary criminal justice management as well as the extrapolation of such issues toward possible futures within the criminal justice management field. Students will focus on relevant research in policing, courts, and corrections that reflect key elements of current conditions and what may be expected in the years to come that will be important to criminal justice administrators. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.

CJA 444...........................................................................................3 credits

**Organizational Behavior and Management**

This course in organizational behavior encompasses the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.

CJA 445...........................................................................................3 credits

**Criminal Justice Management Theory and Practice**

This course applies management and financial principles to criminal justice organizations. Emphasis is placed on budgets, financial accounting principles and assessing the effectiveness of the activities of criminal justice organizations. Constitutional requirements, court decisions, and legislation (such as EEOC requirements) as they impact management in criminal justice organizations are discussed. Basic accounting and financial terminology, and purposes and formats of financial statements are introduced; depreciation of assets, capital budgeting, cash management, lease versus purchase, and inventory management.

**CJA 474**...........................................................................................3 credits

**Managing Criminal Justice Personnel**

This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.

CJA 475...........................................................................................3 credits

**Forecasting and Strategic Planning**

This course provides pre- or in-service administrators/managers the knowledge, skills and tools necessary to consider the long-term mission and direction of various criminal justice agencies and to build strategy and operations from both internal and external stakeholders to achieve identified mission goals. Students consider strategic planning as a process and method for implementing effective strategic management. Students receive a high-level overview of data collection and analysis methods for strategic planning that provide the ability to develop long-term solutions to continually evolving organizational challenges. Students explore long-term strategic management options, and how to use that information in planning, decision making, and developing strategies for more efficient organizational management of operations and programs.

CJA 484...........................................................................................3 credits

**Criminal Justice Administration Capstone**

This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

**Cybercrimes Certificate (Undergraduate)**

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Cybercrimes certificate area coursework provides students with the basic knowledge and skills needed to recognize relevant sources of electronic evidence and determine how electronic evidence can be used in court proceedings and as part of an organizational security plan. The concentration combines academic instruction in criminal justice and cybercrime domains to include: the evolution of cybercrime, cybercrime forensics, electronic evidence gathering, and cybercrime investigation and prevention. Students are prepared to provide services in a variety of private and public settings within the criminal justice domains of policing, the courts, corrections, and security organizations. The certificate does not lead to specific industry certification; however, the coursework alignment is an emphasis of academic content and skills based knowledge designed to develop a strong foundational understanding of cybercrime models and issues.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cyb.

Course Descriptions for the CERT/HSCJ

CJHS 395.................................................................................................................. 3 credits
Issues and Futures in Human Services in Criminal Justice
This course examines both the principle issues in contemporary human services in the criminal justice system as well as the extrapolation of such issues toward possible futures within human services in the criminal justice field. Students will focus on relevant research that reflects key elements of current conditions and what may be expected in the years to come. Such research will reflect case management, mental health care, crisis and trauma situations, and legal requirements affecting children and families as they relate to policing, courts, and corrections; the main components of the criminal justice system. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of human services in the criminal justice system as addressed by criminal justice administration.

CJHS 400.................................................................................................................. 3 credits
Theory and Practice: Human Services in Criminal Justice
Students explore major theoretical areas in human services, including psychotherapeutic, behavioral, cognitive, multicultural, and systems theories. Students learn the foundational concepts associated with the major theories, approaches to change, and techniques and interventions used by practitioners. This course emphasizes the development of a personal theory and approach to human services within criminal justice. In addition, students analyze the practical applications of theory-based techniques that criminal justice and human services professionals use while working in the criminal justice system.

CJHS 410.................................................................................................................. 3 credits
Mental Health and Crisis Interventions in Criminal Justice
Students learn about human services delivery, crisis intervention, and mental health services within the criminal justice system. Students explore the skills associated with crisis intervention and mental health services and how they are applied in the field. Strategies for providing services to various populations in the criminal justice system also are examined.

CJHS 420.................................................................................................................. 3 credits
Case Management and Services Provided in Criminal Justice
This course covers principles, practices, and issues in case management. Students learn about the nature of diagnoses, basic interviewing skills, and how to identify treatment resources in the criminal justice system. Ethics and professional boundaries in case management are also examined.

CJHS 430.................................................................................................................. 3 credits
Collaborative Services in Criminal Justice

This course examines the collaboration between human service professionals and those working in the criminal justice system. Students analyze the roles of mediator, advocate, and agency representatives to include forensic evaluation. Overcoming barriers to effective service delivery through the use of collaboration is also considered.

CJA 484 ~ .................................................................3 credits

Criminal Justice Security Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Online, depending on state of residence. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Students may want to consider completing certain courses in the Online classroom at Online rates if the program is available via the Online modality in their state. Please contact your enrollment representative for more information.

The Criminal Justice Security certificate area coursework is intended to give graduates knowledge and basic skills to work in Homeland Security and other areas of the criminal justice system that deal with terrorism, counterintelligence and analysis. This particular certificate concentration represents an integrated program combining academic instruction in criminal justice with applied skills for students whose goal is a career in the areas of the system where basic skills in analysis, risk management, counterterrorism, critical infrastructure and management are required. Security graduates are prepared to provide services in a variety of private and public settings within the criminal justice domains of policing, the courts, corrections and security organizations. The certificate does not lead to specific industry certification; however, the coursework alignment provides an emphasis of academic content and skills that support effective security practices and in depth knowledge of security related issues.

The University reserves the right to modify the required course of study.

The University’s Criminal Justice programs are educational degree programs. For those interested in pursuing a career in law enforcement, corrections, or as a peace officer with any particular local, state, federal, or international agency, there are numerous additional qualifications (and often disqualifications) depending on the position. Before enrolling in a Criminal Justice program, potential students are highly encouraged to check with the relevant agency for a complete list of position requirements. The University makes no representations regarding whether any particular University program will qualify a graduate for any such position.

Additional Admission Requirements for the CERT/SEC

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Tennessee: Students residing in Tennessee who are attending classes via the Online modality and students attending a local campus in Tennessee, including from any cross-border locations must provide the university with an official high school transcript or official GED score (if applicable). A college transcript which documents high school date of completion or a copy of a DD-214 showing high school graduation or equivalency may be submitted to satisfy this requirement.
- An associate’s degree or higher from a regionally or approved nationally accredited college or university, or candidate for accreditation, or foreign equivalent program earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A minimum of one year full-time post high school work experience in the Criminal Justice industry is required.
- Signed Acknowledgement Form
- A minimum of one year full-time post high school work experience in the Criminal Justice industry is required.

Certificate Completion Requirements for the CERT/SEC

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
- Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
• Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.

• The certificate awarded for this program will read as: Criminal Justice Security (Undergraduate)

Additional Residency Requirements and Course Waivers for the CERT/SEC

Students must meet established University residency requirement for certificate conferment. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 3 credits from their required course of study on the basis of regionally or approved nationally accredited transferable coursework. In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

• The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
• The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better.
• The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the required course of study may not be waived: CJA 484

Course Descriptions for the CERT/SEC

BSS 395 .......................................................................................... 3 credits
Contemporary Issues and Futures in Security

This course examines the principle issues in contemporary criminal justice and the extrapolation of such issues toward potential futures within the criminal justice field. Students focus on relevant research about the current environment of the law enforcement field and analytic conclusions of potential future conditions. Students will apply critical thinking to and engage in in-depth discussion of these concepts in this comprehensive study of local, state, national, and global levels of criminal justice administration.

BSS 480 .......................................................................................... 3 credits
Risk Management Perception and Communication

In this course, students will explore different global and regional threats; integrate security decision concerns with antiterrorism resource allocation; examine the psychological perception of the risk of terrorism threats; evaluate security plans; and discuss the role of the media in regard to accuracy and timely reporting. The knowledge and skills developed in this course will help prepare students for service in local and global security environments.

BSS 481 .......................................................................................... 3 credits
Counterterrorism Intelligence and Analysis

This course explores developments and changes in the practice of security operations brought about from global and local terrorist threats to different organizations. Students in this course will study the typology and anatomy of terrorist operations; evaluate intelligence and information sharing in counterterrorism; examine counterterrorism analysis methods and global security tactics; discuss international ethical and legal issues in counterterrorism; and analyze technology issues in counterterrorism. The new skills and knowledge gained will add to the protection, safety, and security of our society.

BSS 482 .......................................................................................... 3 credits
Securing Critical Infrastructure and Cyberspace

This course explores the developments and changes in security operations to secure the critical infrastructure in both the public and private environments. Students will explore the critical infrastructure and interdependency; evaluate cybersecurity in post 9/11 global security; discuss the securing of human and property assets; develop proactive planning for protection of assets; and analyze border and transportation security issues. Upon completion of this security course, students will have new skills and knowledge that will aid them in their present or future organizations.

BSS 483 .......................................................................................... 3 credits
World View of Homeland Security

This course will develop new skills to aid in the protection, safety, and security of our society. Students will examine public and private security collaboration in homeland security response; discuss the leadership task of controlling the human influence in homeland security; analyze and understand the political influence on idea development in homeland security; compare and contrast jurisdictional responsibilities of homeland security programs; and evaluate the goals, objectives, and assessment of homeland security measures.

CJA 484 .......................................................................................... 3 credits
Criminal Justice Administration Capstone

This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students’ selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

Certificate Awards

Upon completion of all courses in a certificate program and submission of the Request for Certificate form, a certificate of completion and a certificate posted transcript will be processed.

Accreditation and Affiliations

The following agencies have supported the development of the certificate program that relates to their specific field:

• The Society for Human Resource Management (SHRM)
• Project Management Institute (PMI), Globally Registered Education Provider (R.E.P)
• Call Center Industry Advisory Council (CIAC)
